The U.S. Government has consistently adhered to the continuous nationality principle in its espousal of private claims. This practice is reflected in bilateral claims settlement agreements and in U.S. legislation.

INTERNATIONAL AGREEMENTS

Since World War II the United States has entered into numerous claims settlement agreements with foreign governments. These agreements settled only those claims falling within the scope of the continuous nationality principle. A number of such agreements expressly recognize the applicability of that principle. These include the agreement of July 16, 1960 with Poland (TIAS 4545); the agreements of July 19. 1948 and November 5. 1964 with Yugoslavia (TIAS 1803; TIAS 5750); the agreement of March 30, 1960 with Romania (TIAS 4451); the agreement of July 2, 1963 with Bulgaria (TIAS 5387); and the pending agreement of November 6, 1981 with Czechoslovakia.

Certain other claims settlement agreements, such as the agreement of March 6, 1973 with Hungary (TIAS 7569) and the agreement of May 11, 1979 with the People's Republic of China (TIAS 9306), do not include language explicitly reflecting the continuous nationality principle. The negotiating histories and the record of the implementation of such agreements make clear, nonetheless, that no departure from that principle was involved.

The continuous nationality principle has also been adhered to by numerous Mixed Claims Commissions and similar tribunals to which the United States has been party, as well as in bilateral claims settlement agreements not involving the United States, and by international tribunals such as the Permanent Court of International Justice, predecessor to the International Court of Justice. The United States-Iran claims settlement mechanism established pursuant to the Declaration of the Government of the Democratic and Popular Republic of Algeria of January 19, 1981, also follows the continuous nationality principle.

The multilateral treaties of peace between the allied and associated powers with Italy (February 10, 1947; TIAS 1948), Bulgaria (February 10, 1947; TIAS 1659), and Hungary (February 10, 1947; TIAS 1651), and Romania (February 10, 1947; TIAS 1649), respectively require payment of compensation to United Nations nationals for loss or damage to property in each such country during World War II, and define "United Nations Nationals" to include persons having the nationality of any of the United Nations on the date of entry into force of such treaties so long as such persons held that nationality as of the date of the armistice with the country against which the claim is made.

This adaptation of the normal rule reflected both the ability of the victors to dictate terms departing from the norm and requiring the defeated Axis Powers to provide such compensation, and the difficulty of determining the precise date of losses or damages occurring during wartime hostilities. As noted below, the Congress in 1955 rejected attempts to extend the U.S. program for settlement of such wartime claims to include persons who became U.S. nationals subsequent to the armistice but prior to the effective date of the peace treaties.

U.S. LEGISLATION

Under U.S. law and practice, settlement of individual claims against a foreign government is normally made subsequent to the determination by the Foreign Claims Settlement Commission of the validity and amount of such claims, and the certification of the resulting awards for payment. The Commission operates pursuant to express statutory authority embodied in the International Claims Settlement Act of 1949, as amended (22 U.S.C. §§ 1621 et seq.; hereinafter: the "1949 Act"). With one limited exception, described below, the 1949 act has authorized only those settlements consistent with the continuous nationality principle.

The 1949 act is organized into seven titles, each dealing with a discrete category of claims. Section 4(a) of title I (22 U.S.C. 1623c(a)) provides general authority for the Commission to adjudicate claims of U.S. nationals included within the terms of the Yugoslav Claims Agreement of 1948 (supra), or within the terms of any claims agreement hereafter concluded between the United States and a foreign government and providing for the en bloc settlement of claims. That section further provides that in adjudicating such claims the Commission is to apply: First, the provisions of the applicable agreement; and second, applicable provisions of international law, justice, and equity.

The only departure from the continuous nationality principle anywhere in the 1949 act is in section 304 of title III (22 U.S.C. 1641c, as amended by Public Law 85–604). That section authorizes the Commission to receive and adjudicate claims against Italy by natural persons who were citizens of the United States on the date of enactment of title III, that is, on August 9, 1955.

Such adjudication was to take place only after payment of the principal amount of all other claims against Italy under an August 14, 1947, memorandum of understanding (TIAS 1757), and any resulting awards were to be paid from any balances remaining in the $5,000,000 paid by Italy under that agreement in settlement of claims not provided for in the 1947 peace treaty.

This unique departure from consistent principle was clearly recognized as such at the time, see the Senate debate set out at 104 CONGRESSIONAL RECORD 13246 et seq. (July 9, 1958), and was justified on the ground that the amount paid by Italy was more than that required to pay the principal amount of claims of persons who were U.S. nationals at the time of loss. It also reflects the special considerations, noted previously, arising in the context of the World War II peace settlements.

As noted previously, the Congress, in its consideration of title III, rejected an effort to expand the class of eligible claimants against Hungary, Bulgaria, and Romania to include persons who became U.S. nationals after the date of loss. A House amendment that would have had such effect was deleted in conference (see H. Rept. 1475, 84th Cong., 1st sess.) thereby preserving the continuous nationality rule with regard to claims against those three countries under title III.

The remaining titles of the 1949 act each expressly apply to the continuous nationality principle in defining the authority of the Commission to adjudicate claims in the context of specific claims settlement programs. Section 405 of title IV relating to claims against Czechoslovakia (22 U.S.C. 1642d), section 504 of title V relating to claims against the People's Republic of China and Cuba (22 U.S.C. 1643c), section 603 of title VI relating to claims against the German Democratic Republic (22 U.S.C. 1644c), and section 704 of title VII relating to claims against Vietnam (22 U.S.C. 1645c) all specifically limit the authority of the Commission to claims arising

from property interests owned at the time of loss by nationals of the United States and continuously thereafter until presentation to the Commission for adjudication.

By request of Mr. STEVENS the following statement was ordered to be placed in the RECORD.

● Mr. PERCY. Mr. President, this bill would approve the agreement negotiated with Czechoslovakia for the compensation of American citizens whose property was expropriated by the Communist Government of Czechoslovakia in 1948. The Senate has previously passed a version of this bill which is virtually identical to the one just received from the House, with one exception. The House would include a provision which would devote $7 million of the total lump sum settlement payed by Czechoslovakia to a group of people—the so-called Benes group—who were not U.S. citizens at the time of the original taking of their property by the pro-Communist Benes Government.

Under long-standing U.S. practice and accepted principles of international law, the U.S. Government was not able to negotiate on behalf of people who were not citizens at the time their property was lost. Therefore, the Foreign Claims Settlement Commission, after a full hearing in 1958, decided that this group of people was not eligible to share in any future claims settlement negotiated with the Czech Government.

Those members of the Foreign Relations and Finance Committee who have had an interest in this legislation have sought to preserve this principle and, therefore, the bill which passed the Senate last Friday did not include an amount for the Benes claimants.

Given the strong arguments in the House, however, that some payments to the Benes group are justified because of the compelling equities of their case, and in the interest of resolving this matter during this session we have here agreed to include $4.95 million for this group, but to do so with the understanding that this money is being paid ex gratia out of the share which would otherwise be provided to the U.S. Treasury as compensation for the expenses of the Government in negotiating and implementing this agreement, plus $925,000 from the account which would have otherwise been held to pay those claimants who may still come forward because they were not adjudicated claimants in 1958 and are hereafter found to be eligible to recover.

In short, Mr. President, we are agreeing to provide some compensation to the Benes group, but only because the formula I have just outlined allows us to do so without violating two important principles of U.S. practice and international law: First, that the U.S. Government—that is, the U.S. taxpaver—is entitled to some reimbursement from the amounts awarded to claimants under a lump-sum settlement of this kind; and second, that only those people who were American citizens at the time their property was taken are entitled to be represented by the U.S. Government in claims negotiations and to share in the resulting settlement.

I urge the Senate to accept this bill as reamended and I hope the House will act expeditiously to see that it becomes law this year.

I ask unanimous consent to print in the RECORD the "continuous nationality" principle.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE "CONTINUOUS NATIONALITY" PRINCIPLE

Under generally accepted principles of international law, a claim for compensation for losses or damages may be espoused by one government against another only on behalf of persons who were nationals of the espousing government at the time of the loss or damage and continuously thereafter until the date of the presentation of the claim. This principle of "continuous nationality" rests on two primary foundations. First, the espousing government is in reality asserting its own right to redress for a breach of an international legal duty owed to it, through injury to its nationals; no such breach occurs when the persons involved were not nationals of the espousing government at the time of injury. Second, any other rule could give rise to "nationality shopping" among claimants seeking a government willing to assert a claim notwithstanding the absence of a breach of an international legal duty to that government at the time the loss or damage took place.

The United States Government has consistently adhered to the "continuous nationality" principle in its espousal of private claims. This practice is reflected in bilateral claims settlement agreements and in United States legislation.

INTERNATIONAL AGREEMENTS

Since World War II the United States has entered into numerous claims settlement agreements with foreign governments. These agreements settled only those claims falling within the scope of the "continuous nationality" principle. A number of such agreements expressly recognize the applicability of that principle. These include the Agreement of July 16, 1960 with Poland (TIAS 4545); the Agreements of July 19, 1948 and November 5, 1964 with Yugoslavia (TIAS 1803; TIAS 5750); the Agreement of March 30, 1960 with Romania (TIAS 4451); the Agreement of July 2, 1963 with Bulgaria (TIAS 5387); and the pending Agreement of November 6, 1981 with Czechoslovakia.

Certain other claims settlement agreements, such as the Agreement of March 6, 1973 with Hungary (TIAS 7569) and the Agreement of May 11, 1979 with the People's Republic of China (TIAS 9306), do not include language explicitly reflecting the "continuous nationality" principle. The negotiating histories and the record of the implementation of such agreements make clear, nonetheless, that no departure from that principle was involved.

The "continuous nationality" principle has also been adhered to by numerous Mixed Claims Commissions and similar tribunals to which the United States has been party, as well as in bilateral claims settlement agreements not involving the United States, and by international tribunals such as the Permanent Court of International Justice, predecessor to the International Court of Justice. The United States-Iran claims settlement mechanism established pursuant to the Declaration of the Government of the Democratic and Popular Republic of Algeria of January 19, 1981, also follows the "continuous nationality" principle.

The multilateral Treaties of Peace between the Allied and Associated Powers with Italy (February 10, 1947; TIAS 1948), Bulgaria (February 10, 1947; TIAS 1659), Hungary (February 10, 1947; TIAS 1651), and Romania (February 10, 1947; TIAS 1649), respectively, require payment of compensation to "United Nations nationals" for loss or damage to property in each such country during World War II, and define "United Nations nationals" to include persons having the nationality of any of the United Nations on the date of entry into force of such treaties, so long as such persons held that nationality as of the date of the armistice with the country against which the claim is made.

This adaptation of the normal rule reflected both the ability of the victors to dictate terms departing from the norm and requiring the defeated Axis powers to provide such compensation, and the difficulty of determining the precise date of losses or damages occurring during wartime hostilities. As noted below, the Congress in 1955 rejected attempts to extend the U.S. program for settlement of such wartime claims to include persons who became United States nationals subsequent to the armistice but prior to the effective date of the peace treaties.

UNITED STATES LEGISLATION

Under United States law and practice, settlement of individual claims against a foreign government is normally made subsequent to the determination by the Foreign Claims Settlement Commission of the validity and amount of such claims, and the certification of the resulting awards for payment. The Commission operates pursuant to express statutory authority embodied in the International Claims Settlement Act of 1949, as amended (22 U.S.C. §§ 1621 *et seq.*; hereinafter: the "1949 Act"). With one limited exception, described below, the 1949 Act has authorized only those settlements consistent with the "continuous nationality" principle.

The 1949 Act is organized into seven titles, each dealing with a discrete category of claims. Section 4(a) of title I (22 U.S.C. § 1623c(a)) provides general authority for the Commission to adjudicate claims of United States nationals "included within the terms of the Yugoslav Claims Agreement of 1948 (supra), or within the terms of any claims agreement hereafter concluded" between the United States and a foreign government and providing for the en bloc settlement of claims. That section further provides that in adjudicating such claims the Commission is to apply (1) the provisions of the applicable agreement, and (2) applicable provisions of "international law, justice, and equity".

Section 2(c) of title I (22 U.S.C. § 1621(c)) defines "national of the United States" for the purposes of that title to include natural persons who are U.S. citizens and persons "who, though not citizens of the United States, owe permanent allegiance to the United States". Aliens are expressly excluded. This definition forms the basic pattern for comparable definitions in other titles of the 1949 Act. A Senate amendment that would have broadened this definition to include persons who, at the time of loss, were permanent residents of the United States intending to become citizens and who, prior to the effective date of a settlement agreement, became citizens, was rejected in conference.

Title III of the 1949 Act relates to claims against Hungary, Bulgaria, Romania, Italy, and the Soviet Union. (Title II deals with the vesting and liquidation of certain foreign property located within the United States, and does not address claims settlement procedures directly.) Claims cognizable under title III include those provided for in the 1947 peace treaties with Italy, Hungary, Bulgaria, and Romania (see above) and certain other subsequent claims covered in applicable bilateral claims settlement agreements with those countries. Title III also provides for the determination of claims against the

Soviet Union in connection with the "Litvinov Assignment" of 1933.

The only departure from the "continuous nationality" principle anywhere in the 1949 Act is in section 304 of title III (22 U.S.C. § 1641c, as amended by Public Law 85-604). That section authorizes the Commission to receive and adjudicate claims against Italy by natural persons who were citizens of the United States on the date of enactment of title III (that is, on August 9, 1955).

Such adjudication was to take place only after payment of the principal amount of all other claims against Italy under an August 14, 1947 Memorandum of Understanding (TIAS 1757), and any resulting awards were to be paid from any balances remaining in the $5,000,000 paid by Italy under that agreement in settlement of claims not provided for in the 1947 peace treaty.

This unique departure from consistent principle was clearly recognized as such at the time (see the Senate debate set out at 104 Cong. Rec. 13246 et seq. (July 9, 1958)), and was justified on the ground that the amount paid by Italy was more than that required to pay the principal amount of claims of persons who were United States nationals at the time of loss. It also reflects the special considerations, noted previously, arising in the context of the World War II peace settlements.

As noted previously, the Congress, in its consideration of title III, rejected an effort to expand the class of eligible claimants against Hungary, Bulgaria, and Romania to include persons who became United States nationals after the date of loss. A House amendment that would have had such effect was deleted in conference, see H. Rept. No. 1475, 84th Cong., 1st Sess., thereby preserving the "continuous nationality" rule with regard to claims against those three countries under title III.

The remaining titles of the 1949 Act each expressly apply to the "continuous nationality" principle in defining the authority of the Commission to adjudicate claims in the context of specific claims settlement programs. Section 405 of title IV relating to claims against Czechoslovakia (22 U.S.C. § 1642d), section 504 of title V relating to claims against the People's Republic of China and Cuba (22 U.S.C. § 1643c), section 603 of title VI relating to claims against the German Democratic Republic (22 U.S.C. § 1644c), and section 704 of title VII relating to claims against Vietnam (22 U.S.C. § 1645c), all specifically limit the authority of the Commission to claims arising from property interests owned at the time of loss by nationals of the United States and continuously thereafter until presentation to the Commission for adjudication.●

Mr. STEVENS. Mr. President, I move that the Senate concur in the amendment of the House with the amendments of the Senate.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Alaska.

Mr. BRADLEY. Does this relate to the Finnish population as well as the Czech population?

Mr. STEVENS. I can state to the Senator not to my knowledge unless the Senator has more knowledge than I do of particular Senate committee amendments.

If they were in the amendments as they came from the committee they are in the series of amendments.

Mr. BRADLEY. Is this bill similar to the bill adopted in the House of Representatives?

Mr. STEVENS. It is, but with the Senate amendments sent to us by the Committee on Foreign Relations.

Mr. BRADLEY. I thank the Senator.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Alaska.

The motion was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL YEAR OF DISABLED PERSONS

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate, Senate Joint Resolution 134, the National Year of Disabled Persons resolution.

The PRESIDING OFFICER. The clerk will state the joint resolution by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 134) to designate 1982 as the National Year of Disabled Persons.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

Mr. DOLE. Mr. President, this resolution before us for consideration, Senate Joint Resolution 134, designates 1982 as the "National Year of Disabled Persons." The year 1981 was declared by the United Nations to be the International Year of Disabled Persons, and this year was very beneficial in terms of increasing awareness of the special needs and potential of handicapped individuals, and generating a spirit of cooperation between the public and private sector in carrying out various activities in communities throughout this country.

Mr. RANDOLPH. The Senator from West Virginia agrees with the Senator from Kansas that this past year has been very successful in highlighting the problems and capabilities of 35 million Americans who happen to live with some kind of disability. The spirit of this year was manifested in many activities beyond our own borders that promoted public awareness of the problems of handicapped people.

Mr. DOLE. The Senator from West Virginia has very eloquently expressed the results of the international year, and the Senator from Kansas is supportive of the goals implied in designating a national year of disabled persons. However, I would question this kind of a year following so closely on the one that just passed. I realize that there has been a certain momentum gained from the activities this past year, but we perhaps should be headed in the direction of substantive program changes and other ways of improving the quality of the lives of 35 million Americans who are disabled.

The Senator from Kansas is very interested in taking this momentum one step further than the designation of another year—I would like to take a close look at the services we provide handicapped people, and encourage a stronger participation by the private sector in improving the life style of our disabled citizens—in helping them to lead independent, productive lives within the mainstream of our society.

Mr. RANDOLPH. The Senator from West Virginia shares the goals and approach that the Senator from Kansas has just expressed, and it is my understanding that Senate Joint Resolution 134 will encourage private sector participation in accomplishing the goals carried out by the International Year through the U.S. Council on the IYDP, and continue the kind of momentum that has been gained.

Mr. DOLE. I thank the distinguished Senator from West Virginia for underlining this aspect of private sector participation in carrying out what will be the goals of a national year of disabled persons, and I think this is a very important point to make at this time. It is the intention of those who have previously been involved with the International Year that no Federal funds or expenditures be used for the purpose of implementing the goals of the national year resolution.

It is the anticipation of many of us who are concerned about issues affecting our disabled citizens, that the U.S. Council will build on the momentum that has been gained in 1981 by finding alternative sources of private funding for their activities—I understand that they did a very commendable job of harnessing the resources of over 250 corporations in IYDP efforts and activities, and this kind of support should be encouraged to the maximum. Available Federal resources should be reserved for direct services provided through effective programs.

Mr. RANDOLPH. I am pleased that the Senator from Kansas has raised these funding issues, because the Senator from West Virginia shares these concerns, and believes that our limited Federal resources should be used for programs that provide direct services to handicappel individuals. At a time of budget constraints, Federal funds must be reserved for essential Federal programs. I think we should set our priorities and direct our limited Federal financial resources to those programs that have been proven effective.

The PRESIDING OFFICER. The joint resolution is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S.J. RES. 134

Whereas the designation by the United Nations of 1981 as the International Year of Disabled Persons has stimulated new progress toward achieving the full participation in national and community life of the thirty-five million Americans who have disabilities;

Whereas such progress has depended upon the initiative and resources of individuals and organizations in all sectors of American society who have worked in partnership with disabled persons;

Whereas such partnership has contributed substantially toward improving the lives of disabled Americans;

Whereas further additional action is required to increase public understanding of the unfulfilled needs and potential contributions of disabled persons; and

Whereas further progress should be made in the United States toward achieving the following long-term goals of and for disabled persons promoted during the International Year of Disabled Persons: (1) expanded educational opportunity; (2) improved access to housing, buildings, and transportation; (3) expanded employment opportunity; (4) expanded participation in recreational, social, and cultural activities; (5) expanded and strengthened rehabilitation programs and facilities; (6) purposeful application of biomedical research aimed at conquering major disabling conditions; (7) reduction in the incidence of disability by expanded accident and disease prevention; (8) expanded application of technology to minimize the effects of disability; and (9) expanded international exchange of information and experience to benefit all disabled persons; and

Whereas the United Nations is building upon the International Year of Disabled Persons momentum and is considering long-term initiatives to improve the lives of the world's one-half billion disabled persons: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That 1982 hereby is designated the "National Year of Disabled Persons", and the President of the United States is authorized and requested to issue a proclamation calling upon the elected officials and people of the United States to observe such year through activities in support of the long-term goals for disabled persons promoted during the International Year of Disabled Persons.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL JAYCEE WEEK

Mr. STEVENS. Mr. President, I ask the Chair to lay before the Senate Calendar Order No. 420, Senate Joint Resolution 117, the National Jaycee Week resolution.

The PRESIDING OFFICER. The clerk will state the joint resolution by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 117) to authorize and request the President to designate the week of January 17, 1982, through January 23, 1982, as "National Jaycee Week."

The PRESIDING OFFICER. Is there objection to proceeding to the consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

Mr. MATTINGLY. Mr. President, today the Senate will consider Senate Joint Resolution 117 which authorizes the President to designate the week of January 17–23, 1982, as "National Jaycee Week." As the United States Jaycees celebrate their 62d year in January, I believe it is appropriate that we, as a body and as citizens, recognize the fine contributions that some 300,000 Jaycees have made in communities throughout this Nation. For this reason, I have cosponsored the resolution. I encourage my colleagues to join me this afternoon in declaring our appreciation to these young men for their dedication to the belief that service to humanity is the best work of life.

In September, Jaycees from throughout the country convened in Washington to hold a national "Jaycee Legislature" and to participate in a governmental affairs training session. The primary purpose of this seminar, like the primary purpose of the United States Jaycees, was to provide leadership training for the young men who will be called upon to assume positions of leadership in the future. Our Nation needs leaders who are well informed about the legislative process and about the problems which face this Nation and who are dedicated to solving these problems and to serving their fellow citizens. As leaders, we must, I believe, encourage those organizations which nurture these qualities.

Each year Jaycees in my home State of Georgia, like those in several other States, hold a Jaycee legislature at the State capitol. This year's Georgia Jaycee legislature reviewed mock bills endorsing maximum penalties for those convicted of selling drugs to minors and calling for labeling of look-alike drugs consistent with the requirements of the Control Substances Act. By participating in these legislatures the Jaycees of Georgia gain an in-depth understanding of the intricacies of current issues, arrive at solutions, and inform the citizens of the State about these issues. Later, the Jaycees present these bills with strong recommendations to the legislature and leaders of the State for consideration.

The services the Georgia Jaycees provide reach beyond the realms of informing and recommending. On Labor Day this year the 7,500 members of 176 chapters in the State of Georgia raised in excess of $48,000 for muscular dystrophy. This fund drive represents only one of the many service-oriented projects the Jaycees support.

As we in Congress strive to represent fairly the citizens of America and to restore our Nation to a sound economic base, we should perhaps consider the principles expressed in the Jaycee creed:

We believe that faith in God gives meaning and purposes to human life;

That the brotherhood of man transcends the sovereignty of nations;

That economic justice can best be won by free men through free enterprise;

That government should be of laws rather than of men;

That earth's great treasure lies in human personality;

That service to humanity is the best work of life.

It is with pride that I join my distinguished colleague from Oklahoma as a cosponsor of the "National Jaycee Week" resolution.

The joint resolution was ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

The joint resolution, with its preamble, is as follows:

S.J. RES. 117

Whereas the Jaycee idea began with a handful of young men in Saint Louis, Missouri, sixty-two years ago;

Whereas the Jaycee idea embraces today approximately three hundred thousand members in seven thousand five hundred American communities that have chapters in the United States Jaycees;

Whereas the Jaycee idea enriches the lives of communities around the world through affiliation in Jaycees International;

Whereas the Jaycee organization retains a youthful outlook, even in its maturity, and continues to build on the individual member, even with its global scope—first, helping him be the best man he can be, then helping him help his fellow man in need, one to one;

Whereas a Jaycee cares about people, and he shows it;

Whereas a Jaycee cares about progress, and he does something about it;

Whereas a Jaycee lives by the creed that "service to humanity is the best work of life", and throws himself into that work both in his vocation and avocation;

Whereas a Jaycee is the kind of young man this country will need in great numbers to help meet the challenges of our times and the coming century; and

Whereas it is fitting that we should give special recognition and encouragement to the Jaycee and his organization: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating the week of January 17, 1982, through January 23, 1982, as "National Jaycee Week", and calling upon all Government agencies and people of the United States to observe the week with appropriate programs, ceremonies, and activities.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FORMER MEMBERS OF CONGRESS

Mr. STEVENS. Mr. President, I call up calendar order No. 422, H.R. 4755, and ask that the Chair lay before the Senate this bill to recognize the organization known as Former Members of Congress.

The PRESIDING OFFICER. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 4755) to recognize the organization known as Former Members of Congress.

Mr. STEVENS. Mr. President, I ask for immediate consideration of this bill.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on the Judiciary with an amendment on page 6, after line 4, insert the following:

SEC. 17. That (a) the Court of Claims shall have jurisdiction to hear, determine, and

render judgment upon any claim for losses sustained by any producer, manufacturer, distributor, or retailer of children's sleepwear, or by any producer, converter, manufacturer, distributor, or retailer of fabric, yarn, or fiber contained in or intended for use in children's sleepwear as a result of the actions taken by the United States under the Federal Hazardous Substances Act on April 8, 1977, and thereafter relating to apparel, fabric, yarn, or fiber containing Tris (2,3-dibromopropyl) phosphate: *Provided, however,* That such children's sleepwear and such fabric, yarn, or fiber contained in or intended for use in children's sleepwear was subject to the requirements of or was subject to use in compliance with the mandatory Federal flammability standard FF3–71 or FF5–74, at the time of its manufacture.

(b)(1) In determining the validity of any claim under this Act and the amount of the losses sustained for which such a claim is brought, the court shall consider the following factors:

(A) The degree to which reasonable alternatives to Tris (2,3-dibromopropyl) phosphate existed at the time the Federal Government established the applicable mandatory Federal flammability standard referred to in subsection (a).

(B) Whether it would have been feasible, or reasonable, for the claimant to have tested Tris (2-3 dibromopropyl) phosphate for chronic hazards at the time the Federal Government established such flammability standard.

(C) The degree to which the Federal Government, or other nationally known researchers tested Tris (2,3-dibromopropyl) phosphate for toxicity, or other health hazards, and disseminated the results of these tests.

(D) The degree of good faith demonstrated by a claimant in seeking to comply fully with such Federal flammability standard.

(E) The extent to which a claimant may have relied in good faith upon assurances from suppliers that the products containing Tris (2,3-dibromopropyl) phosphate were safe.

(F) The degree to which a claimant acted reasonably in using Tris (2,3-dibromopropyl) phosphate for the time period that such substance was used.

(G) The degree to which a claimant, in good faith, complied with actions taken by the United States under the Federal Hazardous Substances Act on April 8, 1977.

(H) The degree to which a claimant, in good faith, complied with the export provisions of the Federal Hazardous Substances Act and the Consumer Product Safety Act.

(2) In determining the amount of the losses for which a claim is brought under this Act, the amount of such losses shall not include lost profits, proceeds from distress sales, attorney's fees, or interest on any such resulting loss suffered by any producer, converter, manufacturer, distributor, or retailer of such children's sleepwear, or to any producer, or manufacturer of fabric, yarn, or fiber.

(c)(1) The measure of losses for producers or manufacturers of children's sleepwear shall be the cost of producing or manufacturing the sleepwear garment, plus the cost of the fabric, yarn, or fiber used for such production or manufacture, or the cost such goods held in stock on the date of enactment of this Act, less the fair market value, if any, of the sleepwear garment, or the fabric, yarn, or fiber. If such garment, fabric, yarn, or fiber was resold after April 8, 1977, but prior to the date of enactment of this Act, then the measure of losses shall be the cost of producing or manufacturing the sleepwear garment plus the cost of the fabric, yarn, or fiber less the proceeds from any such sale.

(2) The measure of losses for producers, converters, or manufacturers of fabric, yarn, or fiber shall be the cost of producing, converting, or manufacturing the fabric, yarn, or fiber, plus the cost of the raw materials used for such production, converting, or manufacturing or the cost of such goods held in stock on the date of enactment of this Act, less the fair market value, if any, of the fabric, yarn, or fiber on such date. If the fabric, yarn, or fiber was resold after April 8, 1977, but prior to such date of enactment, then the measure of losses shall be the cost or producing, converting, or manufacturing the fabric, yarn, or fiber plus the cost of the raw materials used for such production, converting, or manufacturing less proceeds from any such sale.

(3) The measure of losses for distributors and retailers shall be the distributor's or retailer's purchase price for goods referred to in paragraphs (1) and (2) of this subsection, held in stock on the date of enactment of this Act, less the fair market value, if any, of such goods, and less the amount of any reimbursement received. A distributor or retailer shall, notwithstanding the lack of possession of such merchandise, qualify to claim for the unreimbursed portion of its losses, as limited by this paragraph.

(4) In addition to the losses determined under paragraphs (1), (2), and (3) of this subsection, a claimant may also be compensated for unreimbursed costs of transportation paid for the return of such sleepwear garments, fabric, yarn, or fiber.

(d) No claim under this Act may be brought as a class action nor may any claim under this Act be brought by two or more parties unless damages are claimed to be jointly recoverable or are disputed among the parties.

(e) Upon payment of any claim under this Act, regardless of whether such payment is the result of a court judgment or a settlement, the United States shall be subrogated to the claimant's rights to recover losses or to assert a claim against any person or organization relating to the subject matter of such claim paid by the United States. The claimant shall execute and deliver instruments and papers and take whatever steps are necessary to secure such rights in the United States in order to be entitled to the entry of a judgment by the Court and payment under this Act, and the failure of the claimant to perform such acts or take such steps shall constitute cause to deny the entry of such judgment and payment. The failure of the claimant to perform such acts or to take such steps shall not limit or adversely affect the right of the United States to act as subrogee or assignee to the full extent of its payments under this Act. Any purported limitation on the right of the United States to act as assignee or to become subrogated to the rights of a claimant shall be without any effect, to the extent that the United States has made payments under this Act.

(f) Any claim under this Act shall be barred unless commenced within two years after the date of enactment of this Act.

(g) No payment shall be made under this Act upon any claim for losses sustained by any such producer, processor, manufacturer, distributor or other retailer, for apparel, fabric, yarn or fiber containing Tris phosphate until such time as the claimant produces proof of the proper disposal of such goods.

Mr. THURMOND. Mr. President, I rise in support of both H.R. 4755, to establish a charter for the organization of former Members of Congress and, more importantly, section 17 of that bill which is identical to legislation passed earlier this year by the Senate.

Section 17 is identical to S. 823 which passed the Senate on June 18, 1981. It is also similar to legislation that passed the Congress in the 95th Congress, but was vetoed by President Carter. A subsequent bill, S. 521, passed the Senate in the 96th Congress, but was not acted on by the House Judiciary Committee. S. 823, passed in this Congress, is once again stuck in the House Judiciary Committee. For that reason, I offered the bill as an amendment to H.R. 4755 in the Judiciary Committee on December 15, 1981. The committee, without objection, adopted the amendment and ordered it reported to the Senate.

Mr. President, I will not take the time of the Senate to repeat the arguments in favor of this legislation. The Senate has acted favorably on three prior occasions and I urge the Senate to do so again today.

Mr. STEVENS. Mr. President, I ask that the committee amendment be agreed to.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

The title was amended so as to read:

A bill to recognize the organization known as Former Members of Congress and to provide for the payment of losses incurred as a result of the ban on the use of the chemical Tris in apparel, fabric, yarn or fiber, and for other purposes.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FEDERAL TORT CLAIMS

Mr. STEVENS. Mr. President, I move the Senate Judiciary Committee be discharged from further consideration of H.R. 3799, an act to extend the Federal court claims provisions concerning the National Guard members, and I ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection? Without objection, the clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 3799) to extend the Federal court claims provisions of title 28, United States Code, to acts or omissions of members of the National Guard, and to provide that the remedy under those provisions shall be exclusive in medical malpractice actions involving members of the National Guard.

The Senate proceeded to consider the bill.

Mr. THURMOND. Mr. President, I am pleased that the Senate is today taking action on S. 267, introduced by Senator DECONCINI on behalf of himself and me on January 27 of this year. In my view, there is a pressing need for this legislation which extends coverage of the Federal Tort Claims Act (FTCA) to the National Guard when it is engaged in certain federally authorized training activities. It would also make the FTCA the

exclusive remedy for claims based on the medical malpractice of National Guard medical personnel. Similar legislation, having 32 cosponsors, was approved by the Judiciary Committee and passed the Senate last year. Unfortunately, the House was unable to complete action on that legislation before the end of the Congress.

The Senate has approved the substance of S. 267 in this Congress as well. During committee consideration of S. 815, the fiscal year 1982 defense procurement bill, I offered an amendment to that bill to accomplish the same goals as S. 267. My amendment, which was agreed to by the Armed Services Committee, would have added a new section to title 10 of the United States Code, the title of the code governing the activities of the armed services. S. 267, on the other hand, amends title 28 of the code in which the FTCA is found. My amendment was dropped during the conference on the military procurement bill.

Mr. President, there is currently a great deal of discussion and activity in both the administration and in the Congress regarding the need to improve our defense capabilities. The Army National Guard and the Air National Guard are, in my opinion, critically important elements of our national defense, being part of our total-force concept under which Reserve forces would be called upon to perform critical functions in any future conflicts.

It makes little sense, therefore, to continue to operate under a set of circumstances which conflicts with our goal of assuring that the National Guard is well trained, well equipped, and capable of being rapidly mobilized and integrated into our Active Forces should a national emergency arise. Aside from the adverse impact which lack of FTCA coverage is having on our ability to properly train the National Guard, this situation has had a serious impact on the morale of Guard members. I am sure that they find it difficult to understand why their Government does not provide them with the same protection as it does members of the Army Reserve and Air Force Reserve when they are all performing essentially the same duties.

I am sure that it is also very difficult for the innocent person who has been injured or who has sustained damaged or loss of property as the result of National Guard activity to understand why he does not have the same judicial remedy as he would have had the tort-feasor been a member of the Armed Forces on active duty or a member of the Army or Air Force Reserve. The damaged claimant would undoubtedly be confused by the fact that the National Guard member was wearing a U.S. Armed Forces uniform, was driving a federally owned vehicle, was being paid by the United States, and was performing duty in a federally recognized Guard unit, as required by Federal law.

Mr. President, I urge favorable action on this brief, but very important, piece of legislation. Enactment of this bill into law is necessary to assure the continued and effective participation of the National Guard in our defense system. It is also needed to protect fully our citizens from any injuries or damage which they may incur as the result of federally authorized National Guard training activities.

Mr. DECONCINI. Mr. President, at a time when our great Nation is in the process of sending a message to the world that our military is prepared to defend the vital interests of the United States, the training, the skills, and numbers of our Army and Air National Guard Reserve components are critical elements in our effort to maintain a strong national defense. When mobilized as the total force, the Army National Guard provides 27 percent of the total Army strength in the following percentages: 33 percent of the combat division; 72 percent of the separate brigades; 57 percent of the armored cavalry requirement; 63 percent of the infantry batallions; 33 percent of the special forces groups; and 21 percent of the medical units. Our timely and demonstrated ability to mobilize these forces—itself a function of training—can contribute greatly to deterring the Warsaw Pact from launching an attack in Europe in the belief that the U.S. units could not respond in time to augment forces already stationed in that theater.

The measure which we are dealing with today, the National Guard Tort Claims Act, will make a major contribution to our Nation's effort to maintain a strong national defense by finally allowing the National Guard component to conduct training which will prepare the men and women of the Guard to play their rightful role as part of the total force of our Military Establishment. It will do so by covering the Guard under the Federal Tort Claims Act while in training, thus creating liability in the Federal Government for torts committed by National Guards men and women in the scope of their employment. This bill will have the additional effect of encouraging volunteers, today so badly needed in the Reserves.

Mr. President, I would like to take this opportunity to not only express my support for this measure, but to express my sincere gratitude to Senator GRASSLEY and the members of the Agency Administration Subcommittee. Congressman DANIELSON also deserves thanks for his help in developing this legislation in the House. These individuals have been instrumental in the swift attention which this legislation has received and their concern is admirable and appreciated.

Finally, I would like to thank the National Guard Association and General Greenley, in particular, for their efforts in developing and successfully ushering this bill to fruition.

Mr. GRASSLEY. Mr. President. H.R. 3799, the National Guard Federal Tort Claims Act amendments, is the House companion bill to S. 267, a bill sponsored by Senator DECONCINI and cosponsored by Senator THURMOND, myself, and over 30 of our colleagues.

Hearings were held on this bill in July of this year in the Subcommittee on Agency Administration, which I chair. It was later reported by a unanimous vote of that subcommittee, and reported from the Committee on the Judiciary without objection.

The House passed bill differs only slightly from our Senate legislation. Those differences are:

First. The title of the bill has been amended to accurately reflect the content of the bill.

Second. Unnecessary commas have been eliminated from the bill.

Third. The words "naval forces of" have been added in section, 1, subsection 2 in order to assure accurate placement of the amendment.

Fourth. The phrase "National Guard" as defined in section 101(3) of title 32 has been substituted for the words "Army National Guard or Air National Guard" in section 1, subsection 2 for purposes of clarity and consistency.

Fifth. The phrase "or any other provision of law for which such a member is entitled to, or has waived, under title 37" has been striken from the bill because it is potentially confusing.

Sixth. A new section "4" providing for an effective date has been added in order to eliminate confusion about the applicability of 32 U.S.C. 715, the National Guard Claims Act and the indemnity provisions of 32 U.S.C. 334 to claims arising prior to the date of enactment.

By way of background this legislation would extend the Federal Tort Claims Act to cover members of the National Guard in training.

The National Guard is the modern militia reserved to the States by article I, section 8 of the Constitution. It has only been in the last few decades that the National Guard has been an organized force capable of being assimilated with ease into the regular Military Establishment of the United States. From the days of the Minutemen of Lexington and Concord until just prior to World War I, the various militias embodied the concept of a citizen army, but lacked the equipment and training necessary for their use as an integral part of the U.S. Armed Forces.

The passage of the National Defense Act of 1916 materially altered the status of the militia by constituting them as the National Guard. Pursuant to power vested in Congress, the Guard was to be uniformed, equipped, and trained in much the same way as the regular Army, subject to Federal standards and capable of being federalized by units, rather than by drafting individual members.

In return, Congress authorized the allocation of Federal equipment to the Guard and provided Federal compensation for members of the Guard, supplementing any State payments. The Governor, however, remained in charge of the National Guard in each State except when the Guard was called into active Federal service. In most instances, the Governor administered the Guard through the State adjutant general, who was required by the act to report periodically to the National Guard Bureau, a Federal organization, on the Guard Reserve status. The basic structure of the

1916 act has been preserved to the present day.

The United States is currently not liable for the torts of National Guardsmen. However, in 1960 Congress enacted the National Guard Tort Claims Act located in title 32 of the United States Code, section 715, which excludes the application of the Federal Tort Claims Act, but does authorize the Secretaries of the Army and Air Force to pay claims resulting from activities of the National Guard up to the amount of $25,000. The National Guard Claims Act provides for administrative payment for the loss of or damage to either real or personal property and for personal injury or death.

Controversy concerning the application of the Federal Tort Claims Act has centered upon the absence of a master-servant relationship between the National Guard personnel not in active Federal service and the United States. In essence, opponents argue that the United States is not liable for the torts of National Guardsmen, since the right to control the normal day-to-day activities and operations of the National Guard rests with the individual States. On the one hand, the States hire, fire, discharge, promote, and discipline the guardsmen when they are in the training status. On the other hand, the Guard is federally funded; there are strict and stringent Federal regulations and standards governing training; they must take training at military facilities, use military equipment, and undergo a Federal inspection.

A number of States have waived their sovereign immunity and permitted suit to be brought against them for the tortious acts or omissions of Guard members. However, most of these laws, as the laws in my own State of Iowa reflect, have been held to apply only to State-mandated duty, such as providing military aid to the civil authorities in disaster relief and not to training duty required by Federal law, title 32 and paid from Federal funds.

An example of the need for clarification in this area that is very close to home is one that occurred in my home State in December of 1968. At that time an aircraft piloted by a captain in the Iowa National Guard who was on full-time training duty under section 503 of title 32 of the United States Code, crashed on a farmstead. The pilot and a lieutenant who were then on active duty under title 10, United States Code, section 672(d), were killed. The Air Force, without admitting liability for the incident, paid out $5,000 in emergency payments. What then ensued was a tug of war between the Air Force and the State of Iowa over who had jurisdiction of the claim. Meanwhile, no relief was afforded to the claimants, the Tjernagels, whose farmstead, personal belongings, farm equipment, and entire 1968 crop were destroyed in the crash. The operator of the farm, Mr. Tjernagel, died 52 days after the crash and his son was drafted into the Army shortly thereafter, leaving the responsibility for rebuilding the family home and carrying on the family farming operation to the widow, Mrs. Tjernagel.

The accident was not an isolated incident in Iowa. Only 9 months earlier, a Wisconsin National Guard jet aircraft crashed and burned on a farm in Howard County, Iowa, destroying the home, household goods, furnishings, and other property. Three and one-half years later, no resolution was in sight for either of the claimants.

Gov. Robert Ray, then and present Governor of Iowa, issued an executive order prohibiting any movement of Federal vehicles or aircraft issued to the Iowa Army or Air National Guard until the claims were resolved. The claims were finally paid administratively in 1972, but only after much bad publicity for the Guard and ill feelings were vented on both sides.

Mr. President, although there are not great numbers of these cases they are certainly not isolated. Their impact upon the individuals involved is severe, and our hearings proved that the effect of this on the moral of our Nation's Guardsmen is terrible.

This situation can be remedied. All it takes is for this body to follow the lead of the action taken earlier by the other body. I urge all of my colleagues to join in the support of this much needed legislation.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 3799) was ordered to a third reading, was read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I ask unanimous consent that Calendar No. 413, S. 267, the Senate companion bill, be indefinitely postponed.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

OBLIGATION LIMITATIONS UNDER THE SURFACE TRANSPORTATION ASSISTANCE ACT

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 3210.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the bill (H.R. 3210) entitled "An Act to amend the Surface Transportation Assistance Act of 1978, to establish obligation limitations for fiscal year 1982, and for related purposes", with the following amendment:

In lieu of the matter proposed to be inserted by said amendment, insert:

That the first sentence of section 105 of the Surface Transportation Assistance Act of 1978 is amended by striking out "per fiscal year for each of the fiscal years ending September 30, 1982 and September 30, 1983." and inserting in lieu thereof "for the fiscal year ending September 30, 1982, not to exceed $800,000,000 for the fiscal year ending September 30, 1983, and not to exceed $800,000,000 the fiscal year ending September 30, 1984.".

SEC. 2. The Secretary of Transportation shall apportion for the fiscal year ending September 30, 1983, the sums authorized to be apportioned for such year by section 108(b) of the Federal-Aid Highway Act of 1956, as amended, for expenditures on the National System of Interstate and Defense Highways, using the apportionment factors contained in revised table 5 of the committee print numbered 97-28 of the Committee on Public Works and Transportation of the House of Representatives.

SEC. 3. (a) Notwithstanding any other provision of law, the total of all obligations for Federal-aid highways and highway safety construction programs for fiscal year 1982 shall not exceed $8,000,000,000. This limitation shall not apply to obligations for emergency relief under section 125 of title 23, United States Code, or projects covered under section 320 of title 23, United States Code, section 147 of the Surface Transportation Assistance Act of 1978, or section 9 of the Federal-Aid Highway Act of 1981. No obligation constraints shall be placed upon any ongoing emergency project carried out under section 125 of title 23, United States Code, or section 147 of the Surface Transportation Assistance Act of 1978.

(b) For the fiscal year 1982, the Secretary shall distribute the limitation imposed by subsection (a) by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to each State for such fiscal year bears to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to all the States for such fiscal year.

(c) During the period October 1 through December 31, 1981, no State shall obligate more than 35 per centum of the amount distributed to such State under subsection (b), and the total of all State obligations during such period shall not exceed 25 per centum of the total amount distributed to all States under such subsection.

(d) Notwithstanding subsections (b) and (c), the Secretary shall—

(1) provide all States with authority sufficient to prevent lapses of sums authorized to be appropriated for Federal-aid highways and highway safety construction which have been apportioned to a State, except in those instances in which a State indicates its intention to lapse sums apportioned under section 104(b)(5)(A) of title 23, United States Code;

(2) after August 1, 1982, revise a distribution of the funds made available under subsection (b) if a State will not obligate the amount distributed during that fiscal year and redistribute sufficient amounts to those States able to obligate amounts in addition to those previously distributed during that fiscal year; and

(3) not distribute amounts authorized for administrative expenses and forest highways.

SEC. 4. (a) Subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, is amended by striking out "the additional sum of $3,200,000,000 for the fiscal year ending September 30, 1983," and inserting in lieu thereof the following: "the additional sum of $3,100,000,000 for the fiscal year ending September 30, 1983,".

(b) Subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, is further amended by adding at the end thereof the following: "Effective on and after the date of enactment of this sentence, the obligation of funds authorized by this subsection, except for advance construction interstate projects approved

before the date of enactment of this sentence, shall be limited to the construction necessary to provide a minimum level of acceptable service on the Interstate System which shall consist of (1) full access control; (2) a pavement design to accommodate the types and volumes of traffic anticipated for the twenty-year period from date of authorization of the initial basic construction contract; (3) essential environmental requirements; (4) a design of not more than six lanes (exclusive of high occupancy vehicle lanes) in rural areas and all urbanized areas under four hundred thousand population, and up to eight lanes (exclusive of high occupancy vehicle lanes) in urbanized areas of four hundred thousand population or more as shown in the 1980 Federal census; and (5) those high occupancy vehicle lanes (including approaches and all directly related facilities) included in the interstate cost estimate for fiscal year 1981. The obligation of funds authorized by this subsection shall be further limited to the actual costs of only those design concepts, locations, geometrics, and other construction features included in the 1981 interstate cost estimate, except in any case where the Secretary of Transportation determines that a provision of Federal law requires a different design, location, geometric, or other construction feature of a type authorized by this subsection. For purposes of this subsection, construction necessary to provide a minimum level of acceptable service on the Interstate System shall include, but not be limited to, any construction on the Interstate System which is required under a court order issued before the date of enactment of this sentence".

(c) Section 104(b)(5)(A) of title 23, United States Code, is amended by adding at the end thereof the following new sentence: "Notwithstanding any other provisions of this subparagraph, the Secretary in making the revised estimate of the cost of completing the then designated Interstate System for the purpose of transmitting it to the Senate and House of Representatives within ten days subsequent to January 2, 1983, or thereafter, shall include only those costs eligible for funds authorized by subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, including the amendments made by section 4 of the Federal-Aid Highway Act of 1981.".

SEC. 5. Section 104(b)(5)(B) of title 23, United States Code, is amended to read as follows:

"(B) For resurfacing, restoring, rehabilitating, and reconstructing the Interstate System:

"55 per centum in the ratio that lane miles on the Interstate routes designated under sections 103 and 139(c) of this title (other than those on toll roads not subject to a Secretarial agreement provided for in section 105 of the Federal-Aid Highway Act of 1978) in each State bears to the total of all such lane miles in all States; and 45 per centum in the ratio that vehicle miles traveled on lanes on the Interstate routes designated under sections 103 and 139(c) of this title (other than those on toll roads not subject to a Secretarial agreement provided for in section 105 of the Federal-Aid Highway Act of 1978) in each State bears to the total of all such vehicle miles in all States. Notwithstanding the preceding sentence, no State excluding any State that has no interstate lane miles shall receive less than one-half of 1 per centum of the total apportionment made by this subparagraph for any fiscal year.".

SEC. 6. (a) Section 119(a) of title 23, United States Code, is amended by striking out the words "and rehabilitating" and by inserting in lieu thereof the words "rehabilitating and reconstructing" and by striking out the words "those lanes in use for more than five years on the Interstate System" and inserting in lieu thereof the words "routes of the Interstate System designated under sections 103 and 139(c) of this title.".

(b) Section 119 of title 23, United States Code, is further amended by adding the following new subsection:

"(b) Reconstructing as authorized in subsection (a) of this section may include, but is not limited to, the addition of travel lanes and the construction and reconstruction of interchanges and overcrossings along existing completed interstate routes, including the acquisition of right-of-way where necessary.".

SEC. 7. Subsection (a) of section 119 of title 23, United States Code, is amended by adding at the end thereof the following: "Effective on and after the date of enactment of this sentence, the Federal share for projects financed by funds apportioned under section 104(b)(5)(B) of title 23, United States Code, for resurfacing, restoring, rehabilitating, and reconstructing routes of the Interstate System designated under sections 103 and 139(c) of this title shall be that set forth in section 120(c) of this title.".

SEC. 8. In any case in which the city of Santa Rosa, California, has incurred costs on behalf of the State of California for the acquisition, between the date of enactment of Public Law 94–154 and the date of enactment of the Federal-Aid Highway Act of 1976 (Public Law 94–280), of land which was utilized in a Federal-aid urban system project at an intersection with a segment of the Federal-aid primary system, the Secretary of Transportation is authorized, notwithstanding any other provision of law, to reimburse the State of California from funds apportioned to the State of California under section 104(b)(6) of title 23, United States Code, 75 per centum of such costs.

SEC. 9. (a) The Secretary of Transportation may approve any project for the reconstruction, resurfacing, restoration, or rehabilitation of any bridge on the Interstate System which is both owned by the United States Government and located in two States and the District of Columbia, whenever both such States and the District shall submit to the Secretary for approval appropriate plans, specifications, and estimates for any such project.

(b) The Secretary of Transportation shall prior to approval of such project enter into an agreement with such States and the District for future maintenance and rehabilitation of the bridge.

(c) There is hereby authorized to be appropriated $60,000,000, out of the Highway Trust Fund, to be available until expended, to carry out the provisions of this section. Such sums shall be available for obligation in the same manner and to the same extent as if such funds were apportioned for the Interstate System under chapter 1 of title 23, United States Code. The Federal share of the project cost shall be 100 per centum.

(d) In making any revised estimate of the cost completing the Interstate System, which estimate is required by section 104(d)(5)(A) of title 23, United States Code, to be transmitted to the Congress after the date of enactment of this Act, the Secretary of Transportation shall not include any costs for any bridge eligible for approval under subsection (a). The Secretary shall reduce apportionments made under section 104(b)(5) of title 23, United States Code, to such States or District by an amount, if any, equal to amounts apportioned under such section to any such State or District with respect to any such bridge for any fiscal year ending before October 1, 1982. The reduction, if any, made by the preceding sentence for each State or the District shall be made out of apportionments under such section to such State or the District, beginning with the apportionment for the fiscal year ending September 30, 1983, and shall be made, in equal shares, over the number of fiscal years in which apportionments described in the preceding sentence were made.

SEC. 10. Section 139 of title 23, United States Code, is amended by adding a new subsection (c) as follows:

"(c) The Secretary shall designate those portions of highway segments on the Federal-aid primary system in States which have no Interstate System that are logical components to a system serving the State's principal cities, national defense needs and military installations, and traffic generated by rail, water, and air transportation modes. The designated segments shall have been constructed to the geometric and construction standards adequate for current and probable future traffic demands and the needs of the locality of the segment. The mileage of any highway designated as part of the Interstate System under this subsection shall not be charged against the limitation established by the first sentence of section 103(e)(1) of this title. The designation of a highway under this subsection shall create no Federal financial responsibility with respect to such highway, except that the State involved may use Federal-aid highway funds available to it under sections 104(b)(1) and 104(b)(5)(B) of this title, for the resurfacing, rehabilitation, restoration, and reconstruction of a highway designated as a route on the Interstate System under this subsection.".

SEC. 11. Section 145 of the Federal-Aid Highway Act of 1978 is amended to read as follows:

"SEC. 145. (a) Upon satisfaction by the State of Maine or the Maine Turnpike Authority of the following conditions, the State of Maine and the Maine Turnpike Authority shall be free of all restrictions with respect to the imposition and collection of tolls or other charges on the Maine Turnpike or for the use thereof contained in title 23, United States Code, or in any regulation or agreement thereunder: repayment by the State of Maine or the Maine Turnpike Authority to the Treasurer of the United States of the sum of $8,577,900 which is the amount of Federal-aid highway funds received for construction of interchanges or connections with the Maine Turnpike at West Gardiner, Kennebec County, Maine, at York, York County, Maine, and at Scarborough-South Portland, Cumberland County, Maine. The amount to be repaid shall be deposited to the credit of the appropriation for 'Federal-Aid Highway (Trust Fund)'. Such repayment shall be credited to the unprogramed balance of the Federal-aid highway funds of the classes determined by the Secretary to and in cooperation with the State of Maine. The amount so credited shall be in addition to all other funds then apportioned to such State and shall be available for expenditure in accordance with the provisions of title 23, United States Code.

"(b) The State of Maine and the Maine Turnpike Authority are deemed to be in compliance with section 129(c) of title 23, United States Code: *Provided*, That the conditions of subsection (a) are satisfied.".

SEC. 12. (a) Section 152 of the Federal-Aid Highway Act of 1978 is amended by adding after "fiscal year 1981" the following "and $55,000,000 for fiscal year 1983".

(b) Such section 152 is further amended by adding at the end thereof the following new sentence: "Sums authorized to be appropriated under this section shall not be subject to any State or local law relating to apportionment of funds available for the construction or improvement of highways.".

SEC. 13. This Act may be cited as the "Federal-Aid Highway Act of 1981".

Mr. STAFFORD. Mr. President, I am pleased that the Senate Environment and Public Works Committee and the House Public Works and Transportation Committee have reached agreement on the Federal-Aid Highway Act of 1981.

I believe this legislation is a major accomplishment in reassessing and redirecting the Federal interest in the highway program. Since the Highway Trust Fund was established in 1956, the Interstate Highway System has been a major priority of the Federal Government, and massive resources have been directed toward building this extraordinary network of highways. That job is almost complete now with over 95 percent of the Interstate Highway System finished. However, the remaining 5 percent of the system could potentially cost more than the initial 95 percent. That is an unacceptable cost when the Interstate System is in need of major reconstruction.

Mr. President, this legislation defines a safe, connected, environmentally responsible, completed Interstate System, and is a major step toward our goal of completing the Interstate System within a reasonable period of time and at a reasonable cost.

This legislation recognizes that the highway infrastructure required for the movement of goods and the mobility of this country's citizens is largely in place. Our responsibility now is to insure that this capital investment is not lost. This bill expands the existing interstate 3R program by adding a fourth R—reconstruction—and authorizes the program for 2 years.

When the interstate program was begun, it was with the understanding that the Federal Government would provide the initial capital investment and the States would be responsible for routine maintenance and major rehabilitation. It is becoming increasingly evident, however, that the States do not have the resources to address the major rehabilitation and reconstruction needs of the Interstate System. The States will continue to be responsible for all routine maintenance but with this legislation, there will be a substantial increase in the commitment the Federal Government has made to assist the States with major rehabilitation and reconstruction work in order to preserve the Interstate System.

Mr. President. I believe it is important to note that all States will receive a minimum one-half percent apportionment for both the interstate construction and interstate 4R categories. Those States who made an early commitment to expediously complete the Interstate System, often at the expense of the rest of their highway network, should not be penalized.

The interstate 4R formula has been a matter of considerable discussion. The formula in law is based on 75-percent lane miles and 25-percent vehicle miles traveled (VMT). The Senate recognized that the vehicles using the roads have an impact on deterioration and modified this formula to 60-percent lane miles and 40-percent VMT. However, testimony received during the committee's hearings indicated that other factors including temperature extremes, the freeze-thaw cycle, and the number of trucks in the vehicle mix contributed to highway deterioration.

It is difficult, however, to measure the impact from these factors and translate them into an apportionment formula. I believe it is premature and unwise at this point to alter the interstate 4R formula beyond the 60/40 provision contained in the Senate bill. However, I reluctantly agreed to the compromise provision in this bill with the understanding that this formula will be reviewed next year.

A further significant provision in this legislation provides funds for the rehabilitation of the Woodrow Wilson Bridge. This federally owned bridge located in Virginia, Maryland, and the District of Columbia is in urgent need of repair. I believe this provision will enable that repair to begin in the near future.

Mr. President, the agreement reached by the House and Senate committees speaks only to the interstate programs. The highway bill reported by the Senate Environment and Public Works Committee and passed by the Senate included authorizations and program changes for the entire Federal aid program through fiscal year 1986 which I believe are necessary and I intend to continue to press for these changes and multiyear funding when highway legislation is again considered.

Mr. President, I believe this legislation represents a responsible commitment to the Interstate Highway System. It will allow the interstate construction apportionments for this year to be made to the States and it will reduce the cost to complete the Interstate System from $53.8 billion to $38.9 billion. I urge its adoption.

Mr. President, this bill contains a provision which would designate Interstate System mileage in Alaska. This mileage will be designated as completed interstate and will not be added to the interstate cost estimate. It will, however, treat Alaska as every other State and make them eligible for interstate 4R funding. It is our intent that as soon as the mileage is designated, Alaska will be eligible for interstate 4R funding.

Mr. President, it is also the intent of the committee that each State, including Alaska, receive a minimum one-half of 1 percent interstate construction apportionment. Current law authorizes $125 million for this purpose. If this is not sufficient under the new interstate cost estimate redefinition contained in this legislation, it is the intent of this committee and the agreement reached by the House and Senate that all States will be insured of receiving the entire one-half of 1 percent minimum apportionment. It is our intent that before making the interstate apportionment, the funds authorized under section 4 of this bill—the interstate construction authorization of $3.1 billion for fiscal year 1983—the Secretary shall deduct any additional amount above the $125 million which will be necessary to guarantee each State, including Alaska, a one-half percent minimum apportionment.

Mr. SYMMS. Mr. President, the Federal-Aid Highway Act of 1981 represents a carefully negotiated agreement on highway legislation by the Senate Environment and Public Works Committee and the House Public Works and Transportation Committee.

Earlier this year the Environment and Public Works Committee considered, and the full Senate passed S. 1024, the Federal-Aid Highway Improvement Act of 1981. That bill authorized the highway program through fiscal year 1986 and made a number of significant program changes. I believe the multiyear funding and increased flexibility S. 1024 provided is absolutely necessary so that States can do long-range planning and target scarce resources at their highest priorities. The bill before us today addresses only the interstate highway program. While I believe the other issues in S. 1024 should also have been addressed this year, the interstate provisions included in this compromise are an important step in the right direction.

Mr. President, this legislation will permit the interstate construction funds for this year to be apportioned to the States and brings us significantly closer to completion of the Interstate System. The current cost to complete the remaining 5 percent of the system is $53.8 billion. Because of inflation and the continuous addition of eligible items allowed under current law the goal of completion is unachievable. The definition of completion in this bill will permit a safe, connected system to be built in a reasonable time and, hopefully, at a cost we can afford.

The cost of completion is reduced from $53.8 billion to $38.9 billion. The legislation also continues the minimum one-half percent interstate construction apportionment to all States, and authorizes $3.1 billion for fiscal year 1983. In addition, future cost estimates will be based on the redefinition in this legislation and will be limited to those eligible items outlined in this legislation.

The second major provision creates the interstate 4R program by adding a fourth R—reconstruction—to the existing 3R program, and authorizes the program for 2 years. All items no longer eligible for interstate construction funds would be eligible for interstate 4R funds. The primary purpose of this category is to provide funds to maintain the large capital investment that has already been made in the Interstate System by the Federal Government. This legislation recognizes that this country's highway network is largely in place and the task now is to reconstruct and maintain that system. Funds will be available for the 4R program on a Federal/State matching ratio of 90/10, and the amount authorized—$800 million—is an increase of almost 300 percent.

I am concerned with the changes made in the interstate 4R formula. The Environment and Public Works Committee received testimony on this issue during hearings held on highway legislation. While there is agreement that the number of vehicles using a road impact on its

deterioration, there is also evidence that other factors such as freeze-thaw cycles, temperature extremes and the number of trucks in the vehicle mix. I believe this formula needs further attention and our committee will be reviewing this again next year.

This legislation also provides a solution to the longstanding problem of the Woodrow Wilson Bridge. This bridge is federally-owned and located in three jurisdictions—Virginia, Maryland, and the District of Columbia. It is in urgent need of repair and I hope this provision will provide the necessary funds and framework for a timely resolution of this situation.

A provision is included which designates Interstate System mileage in Alaska. This mileage is designated as completed and will incur no further cost to the Federal Government. It will, however, treat Alaska as all other States and make them eligible for the interstate 4R program. This legislation will also permit the State of Maine to repay funds received for interstate construction so that tolls can be retained on an interstate segment.

Finally, Mr. President, this legislation establishes an $8 billion obligation ceiling on the Federal-aid highway program which is consistent with the ceiling contained in the Department of Transportation appropriations bill and in the continuing resolution.

Mr. President, I believe the provisions in this bill will make an important contribution to improving the highway program and I urge my distinguished colleagues to pass this legislation.

Mr. RANDOLPH. Mr. President, I join with my colleagues in supporting the House amendment to the Senate amendment to H.R. 3210. This bill is an important step forward in our Federal-aid highway program. The legislation is a culmination of a year's work by the Committee on Environment and Public Works and the Committee on Public Works and Transportation of the House of Representatives.

Under H.R. 3210, as amended, a major step forward is taken toward completion of the Interstate Highway System. The cost to complete the interstate is reduced by $14 billion under the redefinition contained in section 4 of the House amendment. Further, construction on the designated Interstate System is limited to those projects which will open segments not currently constructed to traffic. Full access control, 20-year pavement life, environmental requirements, a limitation on the number of lanes and high occupancy vehicle lanes are essentially all that can be constructed with interstate construction funds authorized by section 108(b) of the Federal-Aid Highway Act of 1956, as amended. With this redefinition it is much more likely that a connected system of interstate highways can be completed in this decade.

The amendment which we are considering today also provides a new emphasis toward rehabilitation of the Federal-aid Interstate System. Many segments are beginning to reach their design life and need major rehabilitation. The Federal Government has made a substantial investment in our Interstate System by spending approximately $70 billion to build 95 percent of the designated 42,500 mile system. This investment must be maintained and this bill, while continuing the goal of completing the system, begins to provide sufficient authority to the States to do a better maintenance job on this vital highway system.

With 10 percent of the Interstate System currently in need of full rehabilitation and restoration, the Federal-aid highway program must be structured to provide the States with sufficient funds to maintain our investment. Under this bill $800 million is authorized for fiscal years 1983 and 1984 for rehabilitation (4R) work on the Interstate System. We must begin now to work on the backlog of unmet needs and provide a sufficient base for future work. This is an important emphasis and one of the major reasons why the Senate should pass this 1-year bill rather than the multiyear concept adopted on November 16, when the Senate considered S. 1024.

With respect to the 4R program, the amendment changes the formula for apportionment to 55-percent lane miles and 45-percent vehicle miles traveled. This change is necessary to reflect the increased burdens placed on our pavement because of heavy traffic volumes. Apportionments made by this formula vary greatly among the States and I will ask the committee next year to reassess this formula when it considers a multiyear extension of the highway program. A formula must be developed which distributes this money equitably among all the States.

The amendment to H.R. 3210 also adopts several other provisions relating to the Interstate System which I recommend to my colleagues.

With respect to the redefinition of the Interstate System, one other item must be discussed. Recently, the Federal Highway Administration turned down a request by the District of Columbia Department of Transportation to provide a fringe and corridor parking facility adjacent to I–295 in the southeast section of Washington, D.C. This facility is related to the completion of a Metro station and parking facility in this area. The application was rejected on the basis that the highway would not be served by such a facility.

I have examined this application and the rejection carefully. The use of Federal-aid interstate construction funds for this particular project is an acceptable use under section 142(a) of title 23 as I interpret the provision. Approximately 15 percent of the traffic on I–295 would be diverted to this parking facility during peak hours. Furthermore, a substantial number of buses would be discharging passengers at this station who would finish their commute to the central business district via Metro. Completion of this station and the parking facility is also in compliance with the District's transportation improvement plan and the SIP required by the Clean Air Act.

In approving projects under the revised definition of the Interstate System, the Federal Highway Administration on a case-by-case basis must examine projects of this type which improve our highway network by increasing its carrying capacity and provide an effective mass transportation alternative.

Mr. President, I recommend the House amendment to my colleagues and recommend its adoption.

Mr. BENTSEN. Mr. President, just 1 month ago, the Senate passed the Federal-Aid Highway Improvement Act and sent it to the House of Representatives for its consideration. That bill is an excellent bill, the product of many days of hearings and many more days of deliberations by members of the Committee on Environment and Public Works and the Senate as a whole. It is a multiyear bill that made major reforms to the Federal-aid highway program. It is a fiscally responsible bill that reflected the Senate's willingness to live within the limits of the highway trust fund as it addressed this Nation's urgent highway needs.

Unfortunately, the House decided to reject most major reforms of the bill this year, preferring to delay the implementation of major multiyear reforms until 1982. I wish it were otherwise. But, wishing does not make it so. We are forced to face the reality that if both Houses of Congress are to pass any highway bill this year that it will be the one before us now.

Mr. President, I support this bill, not because it is the best we could do. The bill we passed last month is far superior. I support this bill, Mr. President, because it does contain two of the essential reforms of our earlier bill.

First, it provides a definition of interstate completion that will reduce the current interstate cost estimate from approximately $53.8 billion to a far more realistic estimate of approximately $38.8 billion, thereby substantially reducing the level of Federal fiscal exposure. While reducing the interstate cost estimate by approximately $15 billion, this bill will still provide acceptable service for users of the Interstate System by fully incorporating all elements of the definition of cost-to-complete provided by the original Senate bill.

Second, it includes the most important reform of our earlier bill. The existing interstate 3R program is expanded to include a fourth "R"—reconstruction. Every study indicates that the deterioration of our Interstate System is acute and accelerating. This bill takes a step toward recognizing this problem by providing $800 million of interstate 4R funding in 1982. It is my hope that in the very near future that the Congress will take the next step toward resolution of this problem by providing adequate additional funding in the out-years for the interstate 4R program.

Mr. President I urge support of this bill.

Mr. BURDICK. One of the most important features of this compromise for North Dakota, as well as for my colleagues from Delaware, Vermont, New Hampshire, South Dakota, Maine, Nebraska, and Wyoming, is the inclusion of the one-half of 1 percent interstate transfer clause. I fought for this clause

several years ago in the Senate to protect States that completed their portions of the interstate early. This means that for a number of years, North Dakota which was the first State to complete its interstate, committed State funds to I–94 and I–29 before funding other projects. The interstate transfer clause provides aid to help States with necessary projects postponed to complete their portion of the Interstate System.

This clause has meant $15 to $17 million per year to North Dakota since 1977. In addition, the Federal program allows the State highway department flexibility to use funds not necessary for the interstate on primary, urban or rural road programs.

This compromise will have an enormous impact on the amount of Federal aid available to North Dakota. Federal highway funds make up to 50 percent of the North Dakota Highway Department budget.

The amount of Federal aid received from the transfer clause and the 3R program comprise a significant portion of the total State budget. Its loss would be quickly felt by State and local governments in North Dakota.

I would encourage my colleagues to join with me in supporting this compromise. It satisfies the immediate needs of our Nation's highway program by reducing costs to complete the Interstate System to a more achievable objective and extends our interstate restoration efforts to protect our interstate investment. Second, with the interstate transfer clause, States will be encouraged to complete their portion of the interstate knowing that the Federal Government will continue to provide funds for postponed State and local projects while work was done on the Interstate System.

INTERSTATE 4R PROGRAM

Mr. BENTSEN. Mr. President, I would like to commend the distinguished Senator from Idaho (Mr. SYMMS) for having favorably concluded negotiations of this Federal-aid highway bill with the House thereby providing us with a compromise bill that will enable the Department of Transportation to immediately apportion overdue interstate construction funds to the States, that will add the fourth R to the existing interstate 3R program and furthermore, when compared to the existing 3R program, will almost triple funds that will be available to the States in 1982 for the purpose of preserving, maintaining, and reconstructing that most valuable national asset, our Interstate Highway System.

However, just as I am pleased that this Congress will at last provide adequate funds in 1982 to begin to reverse the rapid deterioration of our Interstate System I am equally disturbed that the compromise does not provide adequate 4R funds in 1983. As the distinguished Senator from Idaho knows, on November 16, when the Senate amended H.R. 3210 with the language of S. 1024 and passed that bill, we provided $1.3 billion in funds for the Interstate 4R program. This was a fiscally responsible amount that had the support of the administration.

At that time, I joined with the distinguished Senator from Idaho along with my good friends and colleagues, the chairman and ranking member of the Environment and Public Works Committee in advocating this level of funding.

At that time, I said that I could think of no single provision in the highway bill that was more important. However, the bill we have before us now provides $500 million less for the interstate 4R program in 1983 than our earlier bill. This is just not enough to prevent further deterioration of our Nation's Interstate System.

I am quite sure that my colleague from Idaho agrees with me and is now reluctantly accepting the House proposal that interstate 4R funding for 1983 be only $800 million because he is convinced that the House would have it no other way, that a refusal to concede to the House on this point could leave the Congress with no compromise highway bill to pass.

Mr. SYMMS. Mr. President, the distinguished Senator from Texas is correct. I would like to add, Mr. President, that my agreement to support this funding level of $800 million for the interstate 4R program in 1983 extends only to this particular bill.

It is my plan, with the agreement of the distinguished chairman and ranking member of the Environment and Public Works Committee, to reconsider next year the question of 4R funding for fiscal year 1983 when we review the multiyear highway provisions that this Senate passed on November 16. I personally am committed to increasing 4R funding in 1983 and the other out-years to levels that are consistent with those that had been provided in S. 1024.

Finally, Mr. President, I would like to thank the distinguished Senator from Texas for the generous praise he has bestowed upon me for having favorably concluded negotiations with the House on this bill. However, I must say that the role that the distinguished Senator from Texas played in this matter was certainly equal to my own and needs to be acknowledged.

Mr. STAFFORD. Mr. President, I would like to join with the distinguished chairman and ranking member of the Transportation Subcommittee in expressing my own reservations about the inadequate level of 4R funding to be provided in 1983 by this compromise and furthermore to express resolve to rectify this matter next year.

Mr. RANDOLPH. Mr. President, I would like to associate myself with the remarks made by the distintinguished Senators from Texas, Idaho, and Vermont and also to express my intention to join with them next year in an effort to increase the 4R funding level for 1983 to that provided in the 5-year bill we passed in November.

Mr. BENTSEN. I thank my distinguished colleagues from Idaho, Vermont, and West Virginia and look forward to next year when we may work together again, as we have in the past, to develop highway legislation that includes responsible levels of funding.

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate concur in the House amendments to the Senate amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. I move to reconsider that action.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. I inquire of the Chair, does that clear that bill?

The PRESIDING OFFICER. For final action, the Senator is correct.

MULTINATIONAL FORCE AND OBSERVERS PARTICIPATION RESOLUTION

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on Senate Joint Resolution 100.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the resolution from the Senate (S.J. Res. 100) entitled "Joint resolution to authorize the participation of the United States in a multinational force and observers to implement the treaty of peace between Egypt and Israel", do pass with the following amendments: Strike out all after the resolving clause, and insert:

SHORT TITLE

SECTION 1. This joint resolution may be cited as the "Multinational Force and Observers Participation Resolution".

STATEMENT OF POLICY

SEC. 2. The Congress considers the establishment of the Multinational Force and Observers to be an essential stage in the development of a comprehensive settlement in the Middle East. The Congress enacts this resolution with the hope and expectation that establishment of the Multinational Force and Observers will assist Egypt and Israel in fulfilling the Camp David accords and bringing about the establishment of a self-governing authority in order to provide full autonomy in the West Bank and Gaza.

PARTICIPATION OF UNITED STATES PERSONNEL IN THE MULTINATIONAL FORCE AND OBSERVERS

SEC. 3. (a)(1) Subject to the limitations contained in this resolution, the President is authorized to assign, under such terms and conditions as he may determine, members of the United States Armed Forces to participate in the Multinational Force and Observers.

(2) The Congress declares that the participation of the military personnel of other countries in the Multinational Force and Observers is essential to maintain the international character of the peacekeeping function in the Sinai. Accordingly—

(A) before the President assigns or details members of the United States Armed Forces to the Multinational Force and Observers, he shall notify the Congress of the names of the other countries that have agreed to provide military personnel for the Multinational Force and Observers, the number of military personnel to be provided by each country, and the functions to be performed by such personnel; and

(B) if a country withdraws from the Multinational Force and Observers with the result that the military personnel of less than four foreign countries remain, every pos-

sible effort must be made by the United States to find promptly a country to replace that country.

(3) Members of the United States Armed Forces assigned or detailed to the Multinational Force and Observers may perform only those functions or responsibilities which are specified for United Nations Forces and Observers in the Treaty of Peace and in accordance with the Protocol.

(4) The number of members of the United States Armed Forces who are assigned or detailed by the United States Government to the Multinational Force and Observers may not exceed one thousand two hundred at any one time.

(b) Subject to the limitations contained in this resolution, the President is authorized to provide, under such terms and conditions as he may determine, United States civilian personnel to participate as observers in the Multinational Force and Observers.

(c) The status of United States Government personnel assigned to the Multinational Force and Observers under subsection (a)(1) or (b) of this section shall be as provided in section 629 of the Foreign Assistance Act of 1961.

UNITED STATES CONTRIBUTIONS TO SHARED COSTS

SEC. 4. (a) In accordance with the agreement set forth in the exchanges of letters between the United States and Egypt and between the United States and Israel which were signed on August 3, 1981, the United States share of the costs of the Multinational Force and Observers—

(1) shall not exceed 60 per centum of the budget for the expenses connected with the establishment and initial operation of the Multinational Force and Observers during the period ending September 30, 1982; and

(2) shall not exceed 33⅓ per centum of the budget for the annual operating expenses of the Multinational Force and Observers for each financial year beginning after that date.

(b)(1) There are authorized to be appropriated to the President to carry out chapter 6 of part II of the Foreign Assistance Act of 1961, in addition to amounts otherwise available to carry out that chapter, $125,000,000 for the fiscal year 1982 for use in paying the United States contribution to the budget of the Multinational Force and Observers. Amounts appropriated under this subsection are authorized to remain available until expended.

(2) Expenditures made pursuant to section 138 of the joint resolution entitled "Joint resolution making continuing appropriations for the fiscal year 1982, and for other purposes", approved October 1, 1981 (Public Law 97-51), or pursuant to any subsequent corresponding provision applicable to the fiscal year 1982, shall be charged to the appropriation authorized by this subsection.

NONREIMBURSED COSTS

SEC. 5. (a) Any agency of the United States Government is authorized to provide administrative and technical support and services to the Multinational Force and Observers, without reimbursement and upon such terms and conditions as the President may direct, when the provision of such support or services would not result in significant incremental costs to the United States.

(b) The provision by the United States to the Multinational Force and Observers under the authority of this resolution or any other law of any property, support, or services, including the provision of military and civilian personnel under section 3 of this resolution, on other than a reimbursable basis shall be kept to a minimum.

REPORTS TO THE CONGRESS

SEC. 6. (a) Not later than April 30, 1982, the President shall transmit to the Speaker of the House of Representatives, and to the chairman of the Committee on Foreign Relations of the Senate, a detailed written report with respect to the period ending two weeks prior to that date which contains the information specified in subsection (b).

(b) Not later than January 15 of each year (beginning in 1983), the President shall transmit to the Speaker of the House of Representatives, and to the chairman of the Committee on Foreign Relations of the Senate, a written report which describes—

(1) the activities performed by the Multinational Force and Observers during the preceding year;

(2) the composition of the Multinational Force and Observers, including a description of the responsibilities and deployment of the military personnel of each participating country;

(3) all costs associated with United States participation in the Multinational Force and Observers which were incurred during the preceding fiscal year and for which the United States was not fully reimbursed, with an explanation of why the United States was not fully reimbursed for each category of cost;

(4) all such costs for which the United States was fully reimbursed; and

(5) the results of any discussions with Egypt and Israel regarding the future of the Multinational Force and Observers and its possible reduction or elimination.

(c) The reports required by this section shall be as detailed as possible. The information with respect to any administrative and technical support and services provided on a nonreimbursed basis under section 5(a) of this resolution shall include a description of the types of support and services which have been provided and an estimate of both the total costs of such support and services and the incremental costs incurred by the United States with respect to such support and services.

(d) For purposes of the reports required by this section, the term "costs" means any costs, whether normal or incremental, which are incurred by the United States Government, including—

(1) contributions to the budget of the Multinational Force and Observers;

(2) the costs associated with the members of the United States Armed Forces or the United States civilian personnel who are assigned, detailed, or otherwise provided to the Multinational Force and Observers, including pay, retirement and other benefits transportation, and housing; and

(3) the costs associated with any other property, support, or services of any kind made available (by means of grant, sale, loan, lease, or any other means) by the United States Government to the Multinational Force and Observers.

STATEMENTS OF CONGRESSIONAL INTENT

SEC. 7. (a) Nothing in this resolution is intended to signify approval by the Congress of any agreement, understanding, or commitment made by the executive branch other than the agreement to participate in the Multinational Force and Observers as set forth in the exchanges of letters between the United States and Egypt and between the United States and Israel which were signed on August 3, 1981.

(b) The limitations contained in this resolution with respect to United States participation in the Multinational Force and Observers apply to the exercise of the authorities provided by this resolution or provided by any other provision of law. No funds appropriated by the Congress may be obligated or expended for any activity which is contrary to the limitations contained in this resolution.

DEFINITIONS

SEC. 8. As used in this resolution—

(1) the term "Multinational Force and Observers" means the Multinational Force and Observers established in accordance with the Protocol between Egypt and Israel signed on August 3, 1981, relating to the implementation of the security arrangements of the Treaty of Peace; and

(2) the term "Treaty of Peace" means the Treaty of Peace between the Arab Republic of Egypt and the State of Israel signed on March 26, 1979, including the Annexes thereto.

The preamble is amended as follows:

(1) In the second line of the second clause, after "responsibilities", insert: "at this time".

(2) In the first line of the third clause, strike out "initiated on July 17, 1981", and insert: "signed on August 3, 1981,".

Mr. STEVENS. Mr. President, I move that the Senate concur in the House amendments to the preamble of the resolution.

The PRESIDING OFFICER. Is there objection? Without objection, the motion is agreed to.

Mr. PERCY. Mr. President, authorization of U.S. participation in the Multinational Force in Sinai is vital to our national interest and to the promotion of peace in the Middle East. Under the Camp David agreement, our Government committed itself to help establish and participate in a multinational peacekeeping force which is to insure security along the Egyptian-Israeli border following the final Israeli withdrawal from Sinai on April 25, 1982. Approval of this resolution is an essential element in fulfilling this commitment.

The resolution provides authority for the President to assign U.S. military personnel and civilians to the Multinational Force (MFO). U.S. military participation is limited to not more than 1,200 persons. The administration also is authorized to provide up to 60 percent of the MFO budget through fiscal year 1982 and one-third the cost in subsequent years. Israel and Egypt will pay equal shares of the remaining costs. The cost for the first 15 months will be $135 million.

The resolution authorizes U.S. participation so that the MFO can provide the functions for which it was designed. At the same time, restrictions are placed on U.S. participating forces so that they may perform only that limited role.

This resolution reconciles differing House and Senate versions of the resolution. It is a substitute version of Senate Joint Resolution 100 which has been drafted with House and administration participation. Both support the resolution.

UP AMENDMENT NO. 803

Mr. STEVENS. Mr. President, I move that the Senate concur in the House amendments to the joint resolution with the further amendment, which I send to the desk on behalf of Senator PERCY.

The PRESIDING OFFICER. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS), on behalf of Mr. PERCY, proposes an unprinted amendment numbered 803.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

SHORT TITLE

SECTION 1. This joint resolution may be cited as the "Multinational Force and Observers Participation Resolution".

STATEMENT OF POLICY

SEC. 2. The Congress considers the establishment of the Multinational Force and Observers to be an essential stage in the development of a comprehensive settlement in the Middle East. The Congress enacts this resolution with the hope and expectation that establishment of the Multinational Force and Observers will assist Egypt and Israel in fulfilling the Camp David accords and bringing about the establishment of a self-governing authority in order to provide full autonomy in the West Bank and Gaza.

PARTICIPATION OF UNITED STATES PERSONNEL IN THE MULTINATIONAL FORCE AND OBSERVERS

SEC. 3. (a)(1) Subject to the limitations contained in this resolution, the President is authorized to assign, under such terms and conditions as he may determine, members of the United States Armed Forces to participate in the Multinational Force and Observers.

(2) The Congress declares that the participation of the military personnel of other countries in the Multinational Force and Observers is essential to maintain the international character of the peacekeeping function in the Sinai: Accordingly—

(A) before the President assigns or details members of the United States Armed Forces to the Multinational Force and Observers, he shall notify the Congress of the names of the other countries that have agreed to provide military personnel for the Multinational Force and Observers, the number of military personnel to be provided by each country, and the functions to be performed by such personnel; and

(B) if a country withdraws from the Multinational Force and Observers with the result that the military personnel of less than four foreign countries remain, every possible effort must be made by the United States to find promptly a country to replace that country.

(3) Members of the United States Armed Forces, and United States civilian personnel, who are assigned, detailed, or otherwise provided to the Multinational Force and Observers may preform only those functions or responsibilities which are specified for United Nations Forces and Observers in the Treaty of Peace and in accordance with the Protocol.

(4) The number of members of the United States Armed Forces who are assigned or detailed by the United States Government to the Multinational Force and Observers may not exceed 1,200 at any one time.

(b) Subject to the limitations contained in this resolution, the President is authorized to provide, under such terms and conditions as he may determine, United States civilian personnel to participate as observers in the Multinational Force and Observers.

(c) The status of United States Government personnel assigned to the Multinational Force and Observers under subsection (a)(1) or (b) of this section shall be as provided in section 629 of the Foreign Assistance Act of 1961.

UNITED STATES CONTRIBUTIONS TO COSTS

SEC. 4. (a) In accordance with the agreement set forth in the exchanges of letters between the United States and Egypt and between the United States and Israel which were signed on August 3, 1981, the United States share of the costs of the Multinational Force and Observers—

(1) shall not exceed 60 percent of the budget for the expenses connected with the establishment and initial operation of the Multinational Force and Observers during the period ending September 30, 1982; and

(2) shall not exceed 33⅓ percent of the budget for the annual operating expenses of the Multinational Force and Observers for each financial year beginning after that date.

(b)(1) There are authorized to be appropriated to the President to carry out chapter 6 of part II of the Foreign Assistance Act of 1961, in addition to amounts otherwise available to carry out that chapter, $125,000,000 for the fiscal year 1982 for use in paying the United States contribution to the budget of the Multinational Force and Observers. Amounts appropriated under this subsection are authorized to remain available until expended.

(2) Expenditures made pursuant to section 138 of the joint resolution entitled "Joint Resolution making continuing appropriations for the fiscal year 1982, and for other purposes", approved October 1, 1981 (Public Law 97–51), or pursuant to any subsequent corresponding provision applicable to the fiscal year 1982, shall be charged to the appropriation authorized by this subsection.

(c) Unless required by law, reimbursements to the United States by the Multinational Force and Observers shall be on the basis of identifiable costs actually incurred as a result of requirements imposed by the Multinational Force and Observers, and shall not include administrative surcharges.

NONREIMBURSED COSTS

SEC. 5. (a) Any agency of the United States Government is authorized to provide administrative and technical support and services to the Multinational Force and Observers, without reimbursement and upon such terms and conditions as the President may direct, when the provision of such support or services would not result in significant incremental costs to the United States.

(b) The provision by the United States to the Multinational Force and Observers under the authority of this resolution or any other law of any property, support, or services, including the provision of military and civilian personnel under section 3 of this resolution, on other than a reimbursable basis shall be kept to a minimum.

(c) The President may provide military training to members of the armed forces of other countries participating in the Multinational Force and Observers.

REPORTS TO THE CONGRESS

SEC. 6. (a) Not later than April 30, 1982, the President shall transmit to the Speaker of the House of Representatives, and to the chairman of the Committee on Foreign Relations of the Senate, a detailed written report with respect to the period ending two weeks prior to that date which contains the information specified in subsection (b).

(b) Not later than January 15 of each year (beginning in 1983), the President shall transmit to the Speaker of the House of Representatives, and to the chairman of the Committee on Foreign Relations of the Senate, a written report which describes—

(1) the activities performed by the Multinational Force and Observers during the preceding year;

(2) the composition of the Multinational Force and Observers, including a description of the responsibilities and deployment of the military personnel of each participating country;

(3) all costs incurred by the United States Government (including both normal and incremental costs), set forth by category, which are associated with the United States relationship with the Multinational Force and Observers and which were incurred during the preceding fiscal year (whether or not the United States was reimbursed for those costs), specifically including but not limited to—

(A) the costs associated with the United States units and personel participating in the Multinational Force and Observers (including salaries, allowances, retirement and other benefits, transportation, housing, and operating and maintenance costs), and

(B) the identifiable costs relating to property, support, and services provided by the United States to the Multinational Force and Observers;

(4) the costs which the United States Government would have incurred in maintaining in the United States those United States units and personnel participating in the Multinational Force and Observers;

(5) amounts received by the United States Government from the Multinational Force and Observers as reimbursement;

(6) the types of property, support, or services provided to the Multinational Force and Observers by the United States Government, including identification of the types of property, support, or services provided on a nonreimburseable basis; and

(7) the results of any discussions with Egypt and Israel regarding the future of the Multinational Force and Observers and its possible reduction or elimination.

(c)(1) The reports required by this section shall be as detailed as possible.

(2) The information pursuant to subsection (b)(3) shall, in the case of costs which are not identifiable, be set forth with reasonable accuracy.

(3) The information with respect to any administrative and technical support and services provided on a nonreimbursed basis under section 5(a) of this resolution shall include a description of the types of support and services which have been provided and an estimate of both the total costs of such support and services and the incremental costs incurred by the United States with respect to such support and services.

STATEMENTS OF CONGRESSIONAL INTENT

SEC. 7. (a) Nothing in this resolution is intended to signify approval by the Congress of any agreement, understanding, or commitment made by the Executive branch other than the agreement to participate in the Multinational Force and Observers as set forth in the exchanges of letters between the United States and Egypt and between the United States and Israel which were signed on August 3, 1981.

(b) The limitations contained in this resolution with respect to United States participation in the Mutinational Force and Observers apply to the exercise of the authorities provided by this resolution or provided by any other provision of law. No funds appropriated by the Congress may be obligated or expended for any activity which is contrary to the limitations contained in this resolution.

(c) Nothing in this resolution shall affect the responsibilities of the President or the Congress under the War Powers Resolution (Public Law 93–148).

DEFINITIONS

SEC. 8. As used in this resolution—

(1) the term "Multinational Force and Observers" means the Multinational Force and Observers established in accordance with the Protocol between Egypt and Israel signed on August 3, 1981, relating to the implementation of the security arrangements of the Treaty of Peace; and

(2) the term "Treaty of Peace" means the Treaty of Peace between the Arab Republic of Egypt and the State of Israel signed on March 26, 1979, including the Annexes thereto.

The PRESIDING OFFICER. Is there objection to the motion of the Senator from Alaska?

The motion was agreed to.

Mr. STEVENS. Mr. President, I move

to reconsider the vote by which the motion was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

LOCAL GOVERNMENT FISCAL NOTE ACT OF 1981

Mr. STEVENS. Mr. President, I move that the Committees on Budget and Governmental Affairs be discharged from further consideration of H.R. 1465, the Local Government Fiscal Note Act of 1981, and I ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The clerk will state the bill by title.

The legislative clerk read as follows:

A bill (H.R. 1465) to amend the Congressional Budget Act of 1974 to require the Congressional Budget Office, for every significant bill or resolution reported in the House or the Senate, to prepare and submit an estimate of the cost which would be incurred by State and local governments in carrying out or complying with such bill or resolution.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Alaska?

There being no objection, the Senate proceeded to consider the bill.

Mr. DOMENICI. Mr. President, I would like to concur in the statement of the distinguished acting majority leader. The Committees on the Budget and Governmental Affairs share jurisdiction in the Senate over amendments to the Congressional Budget and Impoundment Control Act of 1974. H.R. 1465, the State and Local Government Cost Estimate Act of 1981, amends the Budget Act. Under the usual Senate procedure, after being passed by the House, H.R. 1465 would be referred jointly to the Budget and Governmental Affairs Committees and, if reported by either of them, the other committee would have an opportunity to make its own report before the Senate acted on the bill. Such a bill would normally be managed on the floor by myself and/or the Senator from Delaware, by decision of the majority leader.

The Senate is considering H.R. 1465 without its being referred to either committee. Senator ROTH and I have agreed with the distinguished majority leader that the Senate should consider the legislation under a unanimous-consent agreement precluding amendments. This should not be interpreted as relinquishing the rights of the Budget and Governmental Affairs Committees to have Budget Act amendments referred to them in the future, or the rights of the chairmen of the two committees to floor manage such measures during Senate consideration of them.

The arrangement in the case of H.R. 1465 is a special one designed to expedite passage of the legislation. It should not be construed as changing our long-standing agreement in the Senate regarding jurisdiction over amendments to the Budget Act.

Mr. DURENBERGER. Mr. President, I want to thank the leadership on both sides of the aisle for their efforts to clear H.R. 1465, the State and Local Government Cost Estimate Act of 1981, for action in these closing days of the session. This legislation will provide important protection to State and local government programs, and I am sure that the Governors, mayors, county commissioners and legislators of this Nation join me in thanking the leadership for recognizing the importance of passing this bill this year.

H.R. 1465 is companion legislation to S. 43, the State and Local Government Fiscal Note Act of 1981, which was introduced by Senator SASSER and myself on January 5 of this year. S. 43 was referred jointly to the Governmental Affairs and Budget Committees of the Senate. The Subcommittee on Intergovernmental Relations of the Committee on Governmental Affairs reported S. 43 to the full committee and from there it was ordered reported to the Senate on May 21, 1981.

This legislation will require the Congressional Budget Office to prepare and each House of the Congress to consider a formal estimate of the costs incurred by State and local governments for each bill reported by a committee to the House or Senate of the United States. The Congressional Budget Act of 1974 to which this bill is an amendment, already contains a fiscal note provision for the cost of new legislation to the Federal Government. Approximately 35 States require the preparation of fiscal notes for bills and resolutions considered by their legislatures.

Under the bill as reported by the House, formal fiscal notes will be included in the reports of committees only where the likely cost impact on State and local government is more than $200 million in any fiscal year or when the legislation would impose substantial costs on a particular level of State or local government or region of the Nation. However, each bill considered by the Congress will receive a preliminary evaluation to see if the $200 million or substantial impact test is met.

At a time when Federal resources are scarce and the need to balance the Federal budget is pressing, we face a continuing reevaluation of those programs that provide Federal grant-in-aid assistance to State and local government. Fiscal notes will play a significant role in making sure that we proceed with the new federalism in an orderly way. They will also protect State and local governments from the temptation to pass on Federal responsibilities in the form of unfunded mandates.

Mr. President, Federal law and regulation includes hundreds of mandates that force expenditures by State and local governments to achieve purposes defined by the Congress. These mandates come in two forms. The first and by far most numerous is the condition attached to the specific grant program. These requirements include hearings and plans and audits and reports and other specific actions by State and local governments so that they can qualify for Federal funds.

The second kind of mandate is sometimes called the cross-cutting requirement. There have been several studies on the impact of the cross-cutting requirement completed recently. One such study done by the Office of Management and Budget identified 59 explicit provisions of law or regulation that applied to every recipient of Federal funds.

Although not nearly as numerous as the grant-specific mandate, these cross-cutting requirements impose a heavy burden on State and local governments. They include items like Davis-Bacon, equal employment opportunity, environmental protection and handicapped access. The city of New York, for instance, has estimated that complying with section 504 of the Rehabilitation Act will require an expenditure of $2.6 billion on the city subway system alone.

Mr. President, in passing the fiscal note act we do not quarrel with the need to achieve many of the objectives that are mandated by the Federal Government. But we do insist that the Congress consider the full cost implications of its actions and that as part of this consideration we understand the impact on State and local government.

Mr. President, I would again thank the leadership for the opportunity to pass this bill this year. I would also like to compliment Senator SASSER, the principal sponsor of S. 43 and Senator MOYNIHAN for bringing this concept to the Senate in the 96th Congress. Senator ROTH, as chairman of the Committee on Governmental Affairs, has also been diligent in his efforts to bring this bill to the floor.

Mr. President, we are taking a significant step on the road to a new federalism, today. I am sure that fiscal notes can and will make a significant contribution in fulfilling our obligation to be responsible partners in the federal system.

Thank you, Mr. President.

Mr. DOMENICI. H.R. 1465, the State and Local Government Cost Estimate Act of 1981, is virtually identical to S. 43, a bill reported this year by the Senate Budget and Governmental Affairs Committees. Both bills amend the Congressional Budget and Impoundment Control Act of 1974 to require the Congressional Budget Office (CBO) to submit an estimate of the costs which would be incurred by State and local governments in carrying out or complying with bills or resolutions reported in the House or Senate.

This State-local cost estimate would be in addition to CBO's current estimate of the Federal cost of legislation. The new cost estimate would only be required for legislation which, in the judgment of the Director of CBO, is likely to result in an annual cost to State or local governments of $200 million or more, or is likely to have exceptional fiscal consequences for any State or local government or geographic region.

The only difference between H.R. 1465 and S. 43 is that the Senate bill would have required CBO to prepare State and local government cost estimates on bills reported in the House or Senate beginning in fiscal year 1982, 1 year earlier

than H.R. 1465 requires. The later effective date in the bill before us reflects the legitimate concern of CBO that it be given sufficient lead time to adjust its estimating capabilities to meet the additional workload.

The Budget Committee reported S. 43 to the Senate on July 20, 1981, without recommendation as the substance of the legislation. In its report on Senate Resolution 160, a resolution waiving section 402(a) of the Budget Act with respect to the consideration of S. 43, the committee stated that S. 43 "would provide Congress with useful information about the impact of legislation on State and local governments and could enhance the budget process."

The committee also expressed the view that S. 43 would be best considered in the context of the review of the Budget Act and the budget process called for by the second concurrent resolution on the budget for fiscal year 1981. The committee stated further that floor consideration of S. 43 before the Budget and Governmental Affairs Committees have held hearings on and made recommendations regarding changes in the Budget Act could precipitously and prematurely provoke other, more wide-ranging amendments.

In light of these factors, and despite its recognition of the usefulness of State and local government cost estimates, the Budget Committee recommended unfavorably to the Senate on Senate Resolution 160, the waiver resolution. In making no recommendation to the Senate as to the substance of S. 43, the committee recommended that the Senate delay consideration of the bill until it could be considered together with other Budget Act amendments.

I would like to say to the Senators that the Budget Committee has not changed its views on these issues. The committee continues to believe that estimates of the fiscal impact on State and local governments of bills and resolutions reported in the House or Senate would enhance the budget process.

Speaking for myself, I would like to make a stronger statement: I believe such cost estimates will substantially improve our ability to make careful judgments about legislation affecting State and local governments and our federal system. In the near future, the Congress will be considering ways to return more of the control over Federal grant funds to the States, the cities, the counties, and the towns of America. This and other efforts to sort out governmental responsibilities will inevitably have a significant impact on State and local governments. It is essential that we obtain the best information we can before making such decisions. The cost estimates required by H.R. 1465 will provide the sort of information we need.

The Budget Committee also continues to believe that the Budget and Governmental Affairs Committees should complete a careful review of the Budget Act and budget process and recommend modifications thereto before the Senate takes up any legislation proposing major revisions in the act. It would be dangerous to open up the Congressional Budget Act, the statute which requires Congress to rationalize its decisions on fiscal policy, to every conceivable kind of amendment without the benefit of the prior analysis and advice of the appropriate committees.

This year the Governmental Affairs Committee, under the able leadership of the distinguished Senator from Delaware, has already held several days of hearings on the Budget Act. The Budget Committee will conduct its own hearings next year. The Budget and Governmental Affairs Committees will work together in examining the issues in this important area.

The bill before us is being considered under a unanimous-consent agreement precluding amendments. There is no possibility that Senate consideration of the bill will give rise to other, more comprehensive amendments of the Budget Act before the two committees have had an opportunity to conduct the review I have mentioned.

I, therefore, urge my colleagues to support H.R. 1465. In considering legislation that would have a significant impact on State and local governments, Congress will benefit from precise, accurate estimates of that impact. H.R. 1465 directs CBO to prepare such estimates beginning with bills and resolutions reported in fiscal year 1983. These estimates will give us a better idea of the impact our actions have on our federal system of government. If we use the information wisely, relationships between Federal and State and local governments will improve.

Finally, I must also mention the cost of this legislation. H.R. 1465 authorizes the appropriation of such sums as may be necessary to carry out its provisions. CBO estimates that the additional cost estimates required by the measure could necessitate additional expenditures for additional staff and overhead. I would like to say to the Senators that whether or not the enactment of H.R. 1465 will actually require an increase in CBO's future budgets depends on a number of factors.

CBO performs a variety of tasks and functions, some of which are of higher priority than others. It has some degree of flexibility as to how to apportion its appropriation and allocate its resources among those tasks and functions. It is my hope that CBO will be able to adjust its workload, staff and computer time to absorb most of the work required by this bill without increasing its budget requests.

Mr. ROTH. Mr. President, I rise in support of H.R. 1465; the State and Local Government Cost Estimate Act of 1981. This bill is the House counterpart of S. 43, the State and Local Fiscal Note Act of 1981, which I cosponsored with Senators DURENBERGER, and SASSER. I commend Senator DURENBERGER for his leadership of the Intergovernmental Relations Subcommittee of my Committee on Governmental Affairs in guiding this legislation through the committee and Senator SASSER who has been a leader in supporting this legislation for several years.

Mr. President, this legislation may seem at first glance to impose merely another procedural requirement on the Congress. I suggest this first impression is wrong. This legislation, if implemented effectively, can help assure that the issue of federalism is considered by the Congress whenever a major piece of legislation affecting State or local governments is reported from a Senate or House committee.

The Fiscal Note Act will provide the basis, for the first time at the Federal level, for the development of more in-depth information on the effects of proposed Federal laws on State and local governments which can be used by the Congress to minimize the often serious burdens imposed by new programs and policies on these governments.

In effect, what this legislation does is attempt to force the Federal Government to recognize the serious problems it often causes for its partners in the federal systems. When I say "partners," I mean just that. We often think of the federal system as a pyramid with us up here and them, the States and localities, down there. It is not a pyramid and State and local governments are not merely Federal appendages which can be moved from the top at will. They are governments in their own right with authorities and powers only they can exercise. I hope that the Fiscal Note Act will make the Congress more aware of that fact and that, as a result, Congress will more carefully consider the effects of its actions on the other governments in the Federal system.

Mr. President, as with many legislative initiatives we adopt here at the Federal level, this proposal originated with the State governments back in the 1950's. Now, some 47 States have procedures for the preparation of fiscal notes on important legislation. The Congress itself required a fiscal note describing the costs of proposed legislation to the Federal Government in 1974 with the passage of the Budget Act. It is time to extend this process so that State and local governments receive the consideration in our legislative process they deserve as true Federal partners.

Mr. President, there are other needed reforms in the management of Federal programs which I have proposed in S. 807, the Federal Assistance Improvement Act, that can help provide greater flexibility and reduced levels of paperwork and redtape to State and local governments. These reforms are important and I will press to see them enacted early next year. In the meantime, I believe the enactment of the Fiscal Note Act is a positive step and I urge my colleagues to support the legislation.

Mr. President, I should mention one final point. H.R. 1465 is an amendment to the Budget Act of 1974, as my colleagues know. My Committee on Governmental Affairs has jurisdiction over the act jointly with the Budget Committee. This year I have begun a major effort to reform the Budget Act and have already held several days of oversight hearings intended to lay the groundwork for future changes and improvements in the act. My good friend from New Mexico, Senator DOMENICI, the chairman of the Budget Committee, testified at those hearings and I know his commit-

tee is also reviewing the effectiveness of the Budget Act.

The result of my committee's hearings will be some major amendments to the Budget Act to remedy some of the serious problems which have become evident in the budget process. The Fiscal Note Act has been before the Congress for several years and is an important improvement in the budget process. While I support its adoption I do not believe we are ready for any additional changes in the Budget Act this year.

I intend to push hard for comprehensive improvements in the Budget Act next year but I hope my colleagues will support the Fiscal Note Act so that it may be enacted into law.

Mr. DANFORTH. Mr. President, as a cosponsor of Senate bill 43, the Senate counterpart to H.R. 1465, the State and Local Government Fiscal Note Act of 1981, I encourage my colleagues to support this legislation. H.R. 1465's paramount purpose is to make the Federal Government—and Congress in particular—mindful of the costs that many of its bills and resolutions will require of State and local governments. At a time when Congress and the administration are working ardently to gain control over the escalating costs of the Federal budget, it seems odd that we should allow ourselves to remain ignorant of what our actions demand—often without compensation—of State and local governments.

Clearly, congressional statutes and resolutions are not the only national actions which impose a financial burden upon State and local governments. The agencies of the executive branch, through the promulgation of rules and regulations, and the Federal courts, with their rulings, are also the conscious and unconscious perpetrators of State and local governmental financial strain. While the Federal Government is prohibited under the Constitution from imposing direct taxes on State and local governments, it has been able to circumvent this stricture and force them, like private industry, to shoulder the costs of complying with a wide variety of Federal requirements adopted in pursuit of national objectives.

The unconscionable aspect of this problem is that as we deliberate on legislation that requires State and local participation, we have not required for ourselves a necessary piece of information, namely, information that would tell us what these bills and resolutions would cost our State and local counterparts. And while State and local governments can theoretically avoid the costs of complying with some requirements simply by refusing some or all Federal aid, this option is—as a practical matter—an impossible recourse. Suffice it to say that this "Theory of Avoidance" is what it appears to be—a myth.

The dimensions of this problem were brought home to me through a study done in 1980 by the Missouri Office of Administration. This study estimated that it would cost the State of Missouri, excluding any county or municipal expense, $3,832,881 in fiscal year 1979; $14,345,367 in fiscal year 1980; and $38,412,716 in fiscal year 1981 to comply with Federal mandates. These totals represent the direct cost to the State of Missouri for only 13 significant—but certainly not all-inclusive—mandates, 10 of which pertained directly to legislative acts, one from an OMB Circular, and the remaining two from Federal court orders. These totals represent only the costs to one State government, for a limited number of mandates, and do not include any local or indirect compliance expenditures.

At the local level, a recent study of seven communities of various shapes and sizes, undertaken for the Joint Economic Committee, determined that general revenue-sharing payments received by these governments just about met the cost of complying with five Federal regulatory programs. To summarize these results in even more stark terms, the study concluded that this handful of local governments spent approximately $62 million in 1978 alone to meet the compliance requirements for the programs studied.

Even in circumstances where there are grants available to help defray some of the compliance costs for some mandates, the moneys available bear little relation to the number and size of grants that trigger their generation. This is a clear case of the Federal Government giving with one hand and taking away with the other. Perhaps as one great Missourian, Harry Truman, might have put it, "we could use a Federal grant-in-aid system with one less hand."

While H.R. 1465 is not a panacea, it is an important step toward making Congress aware of the potential negative impact of legislation requiring intergovernmental cooperation. This bill would require the Congressional Budget Office (CBO) to estimate the cost which would be incurred by State and local governments in carrying out, or complying with, significant bills or resolutions reported by committees of the House or Senate, that is, those estimated by the Director to result in an annual cost to State and local governments of $200 million or more, or likely to have exceptional fiscal consequences for any State or local governments or geographical region.

Cost projections would be required for the first 5 fiscal years for any bill or resolution introduced after September 30, 1981. H.R. 1465 would not be retroactive. And while it is true that the public interest groups which represent State and local governments attempt to inform Congress of the expected costs of proposed legislation, assessments made by the Congressional Budget Office would be more consistently and rigorously done without any doubt about the motives behind, or credibility of, the analyses.

Will they be feasible to do? How reliable will the estimates be? In what ways can we expect these fiscal notes to be of use—to make a difference? In answer to the first of these questions, the Congressional Budget Office has estimated that 10 percent of the bills for which they currently prepare Federal fiscal notes have some impact upon State and local governments; 5 percent of these are estimated to have a significant impact. If Congress processed 1,000 bills in a year, the Budget Office would be projecting State and local costs for 50 to 100 pieces of legislation.

Many States are currently preparing fiscal notes for 250 to 1,800 bills per legislative session. And even if Federal administrative costs for development of the notes run as high as $800,000 as the Congressional Budget Office has estimated they may, this figure pales beside the cost for federally mandated major capital improvements or service programs which must be financed by State and local governments.

In considering the relative feasibility of H.R. 1465, it would do well for us to remember that fiscal notes are a budgetary and management tool which originated with the States—not with the Federal Government. Missouri enacted fiscal note legislation in 1963, one of the first four States to do so, and later amended its laws to provide for local government analyses.

In addition, Missouri, as well as Wisconsin, now requires fiscal notes to accompany proposed administrative rules and regulations. In total, 47 States have in place—either through statute or administrative action—procedures for preparing fiscal notes on measures resulting in costs to State governments. And 35 States use fiscal notes for proposed legislation affecting local governments. The point is simply that most States have data bases and mechanisms in place which can be of immense aid to the Congressional Budget Office in selecting its sample of jurisdictions, and in validating and verifying CBO estimates.

This leads me to the second query: How reliable will the fiscal impact estimates be? The proposal before the current session of the Senate, H.R. 1465, will—by definition—lead to a conservative estimate of the true costs of congressional mandated compliance costs. That is, only the first dollar or the so-called direct costs for compliance will be allowed as grist for the CBO estimation process. It will not include the hidden costs, such as induced demand, long term operating and maintenance costs, or price effects of compliance. These are very complex and difficult matters to calculate and could not be made available in an accurate as well as a timely manner.

Further, H.R. 1465 does not require the inclusion of costs for court orders nor compliance requirements generated by the executive branch, for example, OMB circular. As a result, there seems to be little risk in having CBO provide estimates that are too high. I project that the conservative estimates may be sobering enough.

Needless to say, the generation of these estimates will, in all likelihood, stimulate a discussion by concerned public interest groups representing State and local governments, as well as individual States, local governments and regional associations that feel they may be significantly influenced by a proposed piece of legislation or a resolution. To the extent that H.R. 1465 fosters such an ex-

change of cost information, the Members of Congress will be well served.

The cooperation that will need to be generated between the States and CBO leads to the third query: What benefits can be anticipated from the enactment of H.R. 1465. Clearly the most immediate impact that the addition of State and local cost information will have on the deliberation of pending legislation will be a discussion of who should shoulder the cost of these congressionally mandated requirements. Furthermore, we will be encouraged to give a more careful consideration to how the benefits of particular proposals compare to the total governmental outlays required to meet the intent of the legislation, that is, the relationship of costs to benefits, and as such will help Congress to establish a set of priorities in the use of the intergovernmental system for carrying out national programs.

Furthermore, H.R. 1465 requires that, as part of the responsibility for developing State and local cost estimates, bills or resolutions with exceptional State, local, or regional fiscal consequence be identified in the analysis. Certainly the report prepared for the Joint Economic Committee found many of the mandates enacted by Congress in the past—that is, clean water, unemployment compensation, bilingual education, education for the handicapped, access to public transit for the handicapped—presented State and local governments with widely varying burdens. Under H.R. 1465, significant inequities or incongruities in the distributions of these regulatory costs can be brought to congressional attention as bills and resolutions are being considered.

Other benefits which are not obvious will be distilled from H.R. 1465, including the impact that the required Federal, State, and local fiscal estimates will have as part of a resolution's or bill's legislative history. Such cost projections, while only approximations, will serve as guides for agency rulemaking and court opinions.

Cost estimates required by H.R. 1465 will serve to promote the development and administration of efficiency in program implementation by providing Federal administrators and judges with a clearer idea of the financial scope, as well as the substantive scope, of Federal law. In this regard, H.R. 1465 will help make all three branches of Government more aware of the potential effects of unfunded and partially funded mandates that are often required when State and local governments attempt to comply with congressional initiatives.

Mr. President, I hope and trust that my colleagues will give this legislation their full support.

Mr. ROBERT C. BYRD. Mr. President, as the Senate proceeds to action on H.R. 1465, the House companion legislation to S. 43, the "State and Local Government Fiscal Note Act of 1981," I want to indicate my strong support for this legislation and to convey the hope that we will be able to speed this bill on its way to the President today.

The importance of this legislation was underscored by the 10 Democratic Governors who met with the Senate Democratic Conference on December 4. After that discussion, the conference agreed that the bill would be an important aid to States and localities, and therefore unanimously endorsed its passage.

I want to express my special appreciation to the distinguished majority leader who, at my request, arranged to schedule Senate consideration before sine die adjournment. Because H.R. 1465 is seen to be such an important step by State and local officials, I am confident they will view our action today as a fitting and valued holiday gift.

Since the enactment in 1974 of the Congressional Budget Act, the Congress has required the preparation of fiscal notes outlining the cost to the Federal Government of each bill that is reported from a House or Senate committee. As I believe each Member of this body would attest, this information is a vital component of the decisionmaking process: It is simply essential to sound judgments as we weigh the merits of the legislation we consider.

Yet, although Federal laws often have a pronounced effect on State and local governments—sometimes even mandating that those governments take specific actions or expend their own tax dollars—the Congress has never taken the step of institutionalizing the preparation of similar estimates of the fiscal implications for State and local governments of all bills reported from congressional committees.

I want to commend my distinguished colleague from Tennessee, Senator SASSER, for his leadership in moving this legislation toward Senate consideration—last year in the role of chairman of the Subcommittee on Intergovernmental Relations, and this year as ranking minority member. Of course, he was joined by many others on both sides of the aisle.

Particularly as State and local governments are struggling under unprecedented burdens resulting from recession-reduced revenues coupled with dramatic reduction in Federal assistance in virtually every area of governmental involvement, it is vital that they know at the earliest possible time of the potential impact of Federal legislation moving toward enactment. Certainly it also is imperative that the Congress carefully and fully considers this impact before it acts.

I mentioned previously that Governors and mayors will see our action today as a welcome holiday gift. It is that; but certainly it is much more: I believe passage of this legislation is indicative of a new congressional sensitivity to the needs, problems, and circumstances of State and local government.

Over the past several years, the Congress has grown more aware of the implications of its actions for subnational levels of government. It has become acutely aware of these implications this year, as the way in which the Federal Government relates to State and local government has been reordered drastically in virtually every sector of government operations.

H.R. 1465 is both the symbol of this new sensitivity, and the instrument of its institutionalization. If the Senate passes it today—as I have every confidence it will—this date can be marked as a milestone in the continuing development of our federal system of Government.

Mr. President, I enthusiastically support the State and Local Government Fiscal Note Act of 1981, and I urge every Senator to support its passage today.

Mr. SASSER. Mr. President, I rise in support of passage of H.R. 1465, which is the companion House bill to my State and Local Fiscal Note Act of 1981.

I am gratified that the House of Representatives, under the leadership of Congressman ZEFERETTI, has unanimously passed fiscal note legislation and that we are now going to do the same.

This much needed legislation is one of the first major amendments that has occurred since the passage of the Budget Act in 1974. And it represents a major stride in the improvement of intergovernmental relations in this time of budget austerity. Federal aid to State and local governments has been reduced by some $12 billion this fiscal year, and further budget reductions may occur. Fiscal note legislation will help our State and local governments get a more timely estimate of how Federal legislation will affect their finances, and that is an absolute necessity in a time when our Federal aid system is changing so drastically. This fiscal note legislation has received the backing of all the major State and local government groups, and I ask unanimous consent that a letter reflecting endorsement of this legislation be entered into the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DECEMBER 4, 1981.

To: Members of the House of Representatives.

Re: The State and Local Government Cost Estimate Act of 1981, H.R. 1465.

This is to advise you of the strong support of our organizations for H.R. 1465, which we understand is scheduled for floor action on the suspension calendar for Tuesday, December 8. The bill was unanimously reported by the House Rules Committee and has 101 cosponsors.

H.R. 1465 will require the Congressional Budget Office (CBO) to prepare a fiscal note on legislation that has been reported by a congressional committee and that:

1. imposes increased costs of $200 million or more on state and local governments; or

2. results in an exceptional impact on a particular geographic region or level of government.

CBO now prepares fiscal notes only on costs that would be incurred by the federal government under committee-reported bills.

Enactment of H.R. 1465 will provide members of Congress with information not currently available to them on the impact of proposed legislation. In light of the federal budget situation and public support for more effective government, new and revised programs must be carefully constructed. They must avoid wasteful duplication. They must take into account initiatives already underway. Before they are implemented, information on their full cost must be available to policymakers and taxpayers. For these reasons, we believe that H.R. 1465 provides a tool necessary for thoughtful legislating in the 1980's.

Moreover, enactment of the legislation is needed in view of the fiscal crunch which state and local governments are experiencing. In FY 1982, state operating balances are expected to drop to 1.5% of expenditures, well below the 5% most bond-raters consider to be an adequate balance. This reflects a continuing trend of tightening state resources and indicates the difficulty that new, federally imposed costs would create for state governments. Local governments, already complying with more than 1,000 federally imposed mandates, also face critical budget problems. Preparation of fiscal notes in accordance with the provisions of H.R. 1465 will help to avoid imposition of new costs on strained state and local budgets.

As you may know, thirty-five states now require fiscal notes on legislation affecting local governments. From the experience of these states, we know that the requirement is workable and that it provides useful input for decision-making.

We strongly support enactment of H.R. 1465 and urge that you vote for it when the legislation is considered on the House floor.

Sincerely,

Richard A. Snelling, Chairman, National Governors' Association; Helen Boosalis, President, U.S. Conference of Mayors; Fred Harrison, President, National of Cities; William J. Reynolds, President, Municipal Finance Officers Association; Walter A. Scheiber, President, International City Management Association; J. Richard Conder, President, National Association of Counties; Ross O. Doyen, President, National Conference of State Legislatures; S. Kenneth Howard, President, National Association of State Budget Officers; William Grannell, Chairman, Council of State Governments; and Ed Krueger, President, National Association of Towns and Townships.

Mr. SASSER. My colleagues, in supporting this legislation, are promoting truth in budgeting for all levels of Government. By the terms of this legislation the Congressional Budget Office will prepare fiscal notes or cost estimates of the fiscal impact of any proposed legislation that is reported by a House or Senate committee that would affect State and local finances by $200 million per year or that would have extraordinary fiscal consequences for any particular region or level of Government.

I expect that the Congressional Budget Office will be able to handle this legislation with their usual high degree of professionalism and that they will be able to counsel with a variety of State and local organizations in the process of putting these fiscal notes together.

Mr. President, the Federal aid system today is operating under great stress. The $12-billion reduction in Federal aid has been felt by State and local governments all across this country. In my own State of Tennessee, these funding reductions may be producing a revenue shortfall for Tennessee State government of some $120 million this year.

City and county governments are also facing a severe fiscal crunch as well.

Our major cities—Nashville, Knoxville, and Memphis—have laid off or are expecting to lay off regular city employees as a result of budget reductions. They have deferred major capital improvement programs at a time when our major highway and other public works systems are facing further deterioration. And they are facing cuts in major urban development programs as a result of possible further Federal aid reductions.

And cities and counties all over Tennessee are facing considerable fiscal uncertainty as they contemplate whether the general revenue sharing program will continue in existence. Without revenue sharing, Nashville would see its property tax rate increase by 10 percent, Memphis by 12 percent, Chattanooga by 13 percent and Knoxville by 11 percent. Also many smaller cities like Murfreesboro, Tullahoma, and Gallatin would have property tax increases of between 15 to 30 percent if the revenue sharing program were eliminated.

Now these fiscal impacts are relatively easy to estimate. But all too often we have passed Federal legislation which can raise Federal, State and local costs or reduce Federal aid programs, but State and local governments have little warning of the fiscal impact of such Federal legislation. The fiscal note legislation we are approving today will, at the very least, give State and local governments, an early warning of the fiscal consequences of Federal legislation and enable them to budget accordingly.

Mr. President, these are going to be trying times for State and local governments. Already, 30 State governments have raised taxes by some $2.5 billion in order to compensate for Federal budget cuts. And in the years ahead, State and local governments are going to have to make further hard choices about whether to fund services that are now financed partly through Federal aid.

I have every faith that State and local officials will make informed and sensible decisions about these matters. All they are asking is that we give them timely and complete information about the Federal budget changes they will have to cope with.

This fiscal note legislation, which is now cosponsored by some 27 of my colleagues, will give State and local officials that information.

Mr. President, let me end by commending several of my distinguished colleagues for their prompt action on this measure.

I would like to commend my Democratic colleagues on the Senate Governmental Affairs and Budget Committees who have cosponsored this measure with me, Senators NUNN, EAGLETON, LEVIN, PRYOR, HOLLINGS, and MOYNIHAN.

And I would especially commend Senator MOYNIHAN for his forceful advocacy of this bill during hearings that we held on this measure in the 96th Congress.

And I would thank my distinguished colleagues, Senator DURENBERGER and Senator ROTH, the chairman of the Subcommittee on Intergovernmental Relations and the chairman of the Governmental Affairs Committee. Both Senator DURENBERGER and Senator ROTH have always demonstrated a high regard for the need for improved intergovernmental relations in this country. Their support of this measure reflects their continued efforts for improved fiscal relations among Federal, State and local governments.

Mr. NUNN. Mr. President, I am extremely pleased that the Senate has now completed final congressional action on H.R. 1465, the State and Local Government Cost Estimate Act, which requires that the Congressional Budget Office estimate the cost which would be accured by State and local governments in carrying out or complying with Federal legislation.

I believe this essential legislation will provide needed protection to State and local governments and to their taxpayers as we continue to engage in a process of redefining American federalism. As Congress works to remake the budget of the National Government, significant responsibilities will be returned to the States, the cities, the counties, and the towns of America. This "sorting-out" of responsibilities will have a significant impact on the programs of State and local governments and it is essential that we all understand the capacity and machinery of each level of government to respond to the needs of our society.

Mr. President, the guiding force behind this legislation in the Senate has been my colleague from Tennessee (Mr. SASSER), and I would like to take this opportunity to express my appreciation to him for his diligent efforts in shepherding this legislation through the Congress. I am pleased to have been able to join Senator SASSER in cosponsorship of S. 43, the Senate version of H.R. 1465, and identical legislation which was passed by the Governmental Affairs Committee during the 96th Congress.

I believe that thanks to Senator SASSER's efforts the legislation which we pass today will insure that we in Washington adequately examine the financial effects of our actions on our State and local governments and remain mindful that such costs must be borne by the taxpayers just as surely as the cost of any Federal spending program.

The PRESIDING OFFICER. The bill before the Senate is open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 1465) was ordered to a third reading, was read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I move to indefinitely postpone Calendar Order No. 241, S. 43, the Senate companion bill, and Calendar Order No. 202, Senate Resolution 160, the budget waiver resolution on that bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

IMMIGRATION AND NATIONALITY ACT

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House on H.R. 4327, the Immigration and Nationality Act.

The PRESIDING OFFICER. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 4327) to amend the Immigration and Nationality Act, and for other purposes.

Mr. STEVENS. Mr. President, I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the bill will be considered as having been read twice by its title, and the Senate will proceed to its consideration.

Mr. SIMPSON. Mr. President, on October 13 the House passed by voice vote, H.R. 4327, the so-called immigration efficiency bill. That bill is now being held at the desk.

Mr. President, on September 25 I introduced on behalf of myself and the other members of the Subcommittee on Immigration and Refugee Policy a very similar bill, S. 1663.

These bills have two major purposes:

First, improving the efficiency of the Immigration and Naturalization Service; and second, eliminating the need for Congress to consider certain categories of private immigration bills.

The bills are supported by the Departments of Justice and State and I know of no current opposition by any group—public or private.

Because of the urgency of the bill and its noncontroversial nature, I requested my colleagues on the Judiciary Committee to concur that the House-passed bill should be held at the desk and then considered by this body directly, thus bypassing the usual committee deliberations.

The bill does not deal with any of the controversial areas on which the Select Commission on Immigration and Refugee Policy made recommendations in April nor with subjects covered by the administration's proposed immigration reforms announced in July. Those controversial areas are being considered carefully by the subcommittee in a series of hearings and consultations which are, and have been, continually in progress. I intend to introduce a comprehensive immigration reform bill early in the next session of Congress.

The immigration efficiency bill will enable the INS to shift over $2 million of its budget from activities with very little benefit to others which have more urgent impact.

Mr. President, at this time I briefly summarize the major provisions of the bill.

I. PROVISIONS TO INCREASE INS EFFICIENCY

Mr. President, the provisions which increase INS efficiency include:

Repeal of certain requirements of INS reports to Congress (sections 3 and 4(2) of the bill): CBO estimate of cost savings for 1982: $86,000.

Repeal of certain naturalization requirements, including the requirement that a petitioner be accompanied by two witnesses (section 15): CBO estimate of cost savings: $1.2 million.

Partial repeal of requirement that deported aliens obtain the Attorney General's consent before seeking to enter the United States (section 4(1));

Extension of time of validity of reentry permits (section 6): CBO estimate of cost savings: $89,000.

Repeal of mandatory annual alien registration (section 2): CBO estimate of cost savings: $800,000 per year. This saving will be available if the amendment which I am proposing is adopted.

Amendment of current law relating to the forfeiture of vehicles used in bringing in or harboring aliens who enter the United States illegally (section 12): CBO estimate of cost saving: $50,000.

II. PROVISIONS TO REDUCE THE NUMBER OF PRIVATE BILLS

Mr. President, provisions which would reduce the number of private bills which Congress now considers would include:

Raising of the age by which children must be adopted to be entitled to certain immigration benefits (section 2(b));

Modification of the law relating to certain drug offenses, specifically: Elimination of the absolute bar to naturalization for those who have committed certain offenses involving a single conviction for the possession of marihuana (section 2(c)); authorization for the Attorney General, in his discretion to waive exclusion or deportation based on such drug offenses for the immediate relatives of a U.S. citizen or permanent resident in cases of extreme hardship (sections 4(3) and 8); and

Exemption from numerical limitations for certain aliens who made investments in the United States before 1978 (section 19).

The bill also includes in section 5 certain provisions modifying the law with respect to foreign medical school graduates. These provisions would involve a savings of $420,000 according to CBO.

III. CONTROVERSIAL PROVISIONS DELETED

Mr. President, the bill does not include certain provisions which became controversial in the last Congress. Specifically, the bill does not provide for: "Special Immigrant" status for certain holders of G–IV visas (employees of international organizations and their immediate families); or a visa waiver system; or increased visa numbers at the present time for Mexico, or clearance of second preference backlogs. However, you may be assured that all of these latter issues will be considered and acted upon in the course of the subcommittee's development of the comprehensive immigration reform bill.

Mr. HUDDLESTON. Mr. President, a few months ago I vigorously opposed an earlier version of this bill and I did so for two reasons. First, there were parts of that bill which I had serious reservations about. However, it now appears that most of these problem areas have been cleared up and the bill is truly a noncontroversial one which will increase the efficiency of our immigration system.

My second and foremost concern was that the Judiciary Committee had reported out a bill which merely tinkered with our immigration system at a time when major alterations were called for to stop the hemorrhage at our borders. Since there were no serious efforts underway at that time to formulate these major changes, I believed that it was little more than a mockery for the Congress to spend its time approving an immigration bill which did not address any of the major immigration issues facing this country.

Although this bill does not make the substantive changes which we desperately need, there is definitely light at the end of the tunnel. Where we once faced uncertainty on the issue of immigration reform, the new Immigration Subcommittee is moving forward with speed and determination. Most of this short-term turnaround is attributable to the dedicated and able new leadership which we now have in charge of immigration legislation.

On the House side, my good friend and colleague from Kentucky, Congressman RON MAZZOLI, is now chairman of the Immigration Subcommittee. Here in the Senate this important area of responsibility now rests in the very able hands of the distinguished Senator from Wyoming, ALAN SIMPSON. With all of the wisdom and talent available in the Senate, I do not know of anyone who is better qualified to take on this responsibility than AL SIMPSON. His dedicated and untiring work on the Select Commission on Immigration and Refugee Policy gave him the experience and knowledge about immigration problems that he is now putting to such good use.

At the very beginning of this session, the Senator came charging out of the chute and has not slowed down since then. He has set a pace which I believe will assure this Congress of the opportunity of taking up a major immigration bill in the very near future.

Since the beginning of the session of Congress, he has held 16 days of hearings and has tentatively scheduled another 3 days of hearings prior to the markup proceedings. I marvel at his stamina, and I can assure the distinguished Senator that his efforts are sincerely appreciated by everyone who has a genuine interest in solving our immigration problems.

I look forward to his proposals with great anticipation. However, and there always seems to be a "however," I want to stress again that we must do something about immigration soon. This particular bill before us is not enough, and I look forward to much, much more. Therefore, I would like to inquire of the chairman when he anticipates that we will see the concrete results of his efforts.

Mr. SIMPSON. Mr. President, I thank the Senator from Kentucky for his kind remarks. For many years, Senator HUDDLESTON has been involved with this issue, and he has been one of the most important forces in this national debate. Often he seemed to be a lone voice crying in the wilderness, the only Senator really speaking out and time has shown us that he was right then and he is right now. I have appreciated his fine help, and I look forward to working with him on this issue. He has much expertise to share.

As Senator HUDDLESTON has stated, I have been heavily involved on this issue for nearly 3 years. During the course of my hearings on immigration, I have heard from all sides and then some. I have taken special measures to insure

that hispanics, blacks, and other minority groups have participated fully in our deliberations. We have talked to and accepted testimony from a varied array of businessmen, workers, growers, union officials, scholars, lawyers, and Government officials and politicians.

I have had discussions with many members of the executive branch, including conversations with the President. And, of course, both as a Member of the Senate and of the Select Commission on Immigration and Refugee Policy, I have heard from thousands and thousands of Americans, most of whom are terribly disturbed and frustrated by the current state of our immigration laws and system.

The Senator from Kentucky has set an example for us all during our understanding and education on this issue and the immigration legislation he has introduced, S. 776 has been of great guidance to us. I am concerned, just as he is, that we promptly do something about our immigration problems. And I am concerned, as he is, that what we do be right and responsible not just for today, but for many years to come. That is why I have been spending an extraordinary amount of my Senate efforts on this issue alone.

To answer the Senator's question directly, may I point out that we have not quite finished all of our hearings on immigration, but we are very close to doing so. The other members of the subcommittee and I will work with many of our colleagues and especially the distinguished Senator from Kentucky, during and after the time of our last hearings. And, we will introduce a draft comprehensive immigration reform bill in the early days of the new session of Congress.

I trust that the Members of the Senate will take the opportunity to examine the new bill in light of the 3 years of effort on my part and the many years of effort by Senators HUDDLESTON and KENNEDY, among others on both sides of the aisle, that has gone into its creation, and that they will actively support it in the weeks to come.

I assure the distinguished Senator that I will do everything within my power to have this bill reported out by March 1982 and that I will press for its consideration on the floor as early in the next session of this Congress as it can possibly be brought up. I believe that it is critical that we have this legislation enacted in the early months of the second session of this Congress.

Mr. HUDDLESTON. Mr. President, I deeply appreciate the Senator's effort and the commitment he has made to move the needed immigration legislation. I pledge to work with the Senator from Wyoming on this bill. I am confident that the legislation that emerges from the Subcommittee on Immigration and Refugee Policy, under the guidance of Senator SIMPSON and Senator KENNEDY, will be a generous and compassionate, a fair bill, but a practical and effective bill as well. I will be looking forward to the next few months and I thank the chairman for sharing his plans with us.

UP AMENDMENT NO. 804

Mr. STEVENS. Mr. President, I send to the desk an amendment on behalf of Senator SIMPSON and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS), on behalf of Mr. SIMPSON, proposes an unprinted amendment numbered 804.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3, line 12, strike "simple possession of marihuana" and insert in lieu thereof the following: "a single offense of simple possession of 30 grams or less of marihuana".

On page 3, line 25, strike "paragraph" and insert in lieu thereof "paragraphs".

On page 4, line 2, strike "simple possession of marihuana" and insert in lieu thereof the following: "a single offense of simple possession of 30 grams or less of marihuana".

On page 16, line 16, strike "simple possession of marihuana" and insert in lieu thereof the following: "a single offense of simple possession of 30 grams or less of marihuana".

On page 16, line 22, strike "son or daughter" and insert in lieu thereof "child".

On page 17, line 4, strike "son or daughter" and insert in lieu thereof "child".

On page 18, strike lines 23 through 25, and insert in lieu thereof the following:

"SEC. 11. Section 265 (8 U.S.C. 1305) is amended to read as follows:

"SEC. 265. (a) Each alien required to be registered under this title who is within the United States shall notify the Attorney General in writing of each change of address and new address within ten days from the date of such change and furnish with such notice such additional information as the Attorney General may require by regulation.

"(b) The Attorney General may in his discretion, upon ten days notice, require the natives of any one or more foreign states, or any class or group thereof, who are within the United States and who are required to be registered under this title, to notify the Attorney General of their current addresses and furnish such additional information as the Attorney General may require.

"(c) In the case of an alien for whom a parent or legal guardian is required to apply for registration, the notice required by this section shall be given to such parent or legal guardian.".".

On page 19, strike lines 1 through 5.

On page 30, after line 2, insert the following:

"SEC. 20. (a) Section 201(a) (8 U.S.C. 1151 (a)) is amended by inserting after "two hundred seventy thousand" the following: "*Provided*, That to the extent that in a particular fiscal year the number of aliens who are issued immigrant visas or who may otherwise acquire the status of aliens lawfully admitted for permanent residence, and who are subject to the numerical limitations of this section, together with the aliens who adjust their status to aliens lawfully admitted for permanent residence pursuant to subparagraph (H) of section 101(a)(27) or section 19 of the Immigration and Nationality Amendments Act of 1981, exceed the annual numerical limitation in effect pursuant to this section for such year, the Secretary of State shall reduce to such extent the annual numerical limitation in effect pursuant to this section for the following fiscal year".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended by inserting after "year" the following: ": *And provided further*, That to the extent that in a particular fiscal year the number of such natives who are issued immigrant visas or who may otherwise acquire the status of aliens lawfully admitted for permanent residence and who are subject to the numerical limitation of this section, together with the aliens from the same foreign state who adjust their status to aliens lawfully admitted for permanent residence pursuant to subparagraph (H) of section 101(a)(27) or section 19 of the Immigration and Nationality Amendments Act of 1981, exceed the numerical limitation in effect for such year pursuant to this section, the Secretary of State shall reduce to such extent the numerical limitation in effect for the natives of the same foreign state pursuant to this section for the following fiscal year".".

On page 30, line 3, strike "20" and insert in lieu thereof "21".

Mr. SIMPSON. Mr. President, the immigration efficiency bill, was passed by the House on October 13 by voice vote and is now being held at the desk.

Mr. President, on September 25 I introduced, on behalf of myself and the other members of the Subcommittee on Immigration and Refugee Policy, a very similar bill, S. 1663.

These bills amend certain provisions of the Immigration and Nationality Act, for the purpose of improving the efficiency of the Immigration and Nationality Service and eliminating the need for Congress to consider certain categories of private immigration bills. The bill would enable the INS to shift $2 million of its budget from activities with very little benefit to other activities which have more urgent functions.

Because of the urgency of the bill and its noncontroversial nature, I have asked my colleagues on the Judiciary Committee to agree that the House passed bill should be held at the desk and then considered by this body directly, bypassing the usual committee deliberations.

The amendment I am introducing would make certain improvements in H.R. 4327, and is reflective of the bill I introduced along with my colleagues on the Subcommittee on Immigration and Refugee Policy.

Each of the parts of this amendment has been cleared by the interested parties in the House and thus will not result in a House-Senate conference.

The first aspect of the amendment concerns the certain relief provisions in the bill which benefit those who have committed the offense of "simple possession" of marihuana. The bill would eliminate the absolute bar to naturalization and authorize the Attorney General, in his discretion, to waive exclusion or deportation for the immediate relatives of a U.S. citizen or permanent resident in cases of extreme hardship. I believe the amount of marihuana in possession should be only a very limited amount and be properly defined in the bill. The amendment would require that the quantity of marihuana be 30 grams or less.

It would also clarify that the amendment would cover a single offense only. Repeat offenders would not be protected.

It would also narrow the provision providing relief from deportation to cover only parents, spouses, and minor unmarried sons or daughters of U.S. citizens and permanent residents, in other words, the nuclear family. Adult or married sons or daughters would not be covered. This would make it more consistent with the suspension of deportation provisions now in the law in section 244 as well as with the general policy that it is the "nuclear family"—those who normally live together in one unit—which deserves the most generous treatment.

Mr. President, the second part of my amendment would replace section 11 of the bill. The new section 11 would repeal entirely the mandatory annual alien registration program and provide the AG discretion to require the registration of immigrants or nonimmigrants of any one or more foreign states, or of any class or group thereof. At the present time such registration forms are not adequately utilized and the INS has asked that the requirement be repealed. The savings has been estimated at $800,000 per year, less the cost of any registrations which the AG may require in his discretion. The House bill would retain the requirement with respect to nonimmigrants only. The INS prefers the approach contained in this amendment.

Mr. President, the final part of my amendment relates to certain graduates of foreign medical schools—to adjust their status without regard to numerical limitations. Section 19 of the bill would provide similar relief to certain aliens who made investments in the United States before 1978.

My amendment would simply require that the total and the per country numerical limitations for a given year be reduced in accordance with the adjustments of status made under the just described special relief provisions in the preceding year. At the present time the per country limitation in effect for a certain country is reduced by the number of nationals of that country who receive permanent resident status through private bills. My amendment would follow that policy.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 804) was agreed to.

Mr. KENNEDY. Mr. President, I am pleased to join with my distinguished colleague from Wyoming (Mr. SIMPSON), chairman of our Subcommittee on Immigration and Refugee Policy, in expediting consideration today of H.R. 4327, The Immigration and Nationality Act Amendments of 1981.

Except for a few modifications, this bill is substantially the same as the companion bill we reported unanimously out of the subcommittee (S. 1663) earlier this year, as well as to S. 1763, the immigration efficiency bill we reported out of the full Judiciary Committee last year.

I strongly support this bill because it brings some urgently needed remedial reforms to our immigration law. It improves the efficiency of the Immigration and Naturalization Service. It eliminates unnecessary paperwork. It eliminates useless reporting requirements. And it will save several million tax dollars every year.

Like my bill last year, this bill is strictly remedial in character and narrow in scope. It does not attempt to deal with the overall immigration reforms proposed by the Select Commission on Immigration and Refugee Policy or the Reagan administration—which are now under active review in our subcommittee as well as in the House Judiciary Subcommittee on Immigration.

Although this bill does not go as far as the bill I moved out of committee last year, I am confident we can deal with these additional reforms in the context of the bill we are drafting based upon the Select Commission's recommendations.

For now, Mr. President, this bill, which we are expediting today, represents important steps in the right direction. I hope the House will speedily approve the minor modifications we have made, and respond to our holding their bill at the desk by moving it now to the President's desk.

Mr. GRASSLEY. Mr. President, passage of the bill before us today which amends the Immigration and Nationality Act has been long overdue.

Similar legislation was introduced in 1979 and was reported out of the House and Senate Judiciary Committees in 1980. The bill has passed the House twice and, except for the problem of time, would probably have passed the Senate last Congress.

In this year of fiscal restraint the passage of this legislation is imperative as it is designed to save an estimated $2 million by streamlining certain alien registration and naturalization requirements.

A careful examination of the effected procedures has revealed that they are in large part superfluous, providing little real benefit for those they are designed to help.

The elimination of the two witness requirement for naturalization alone is estimated to save over a million dollars and with the advances in technology resulting in reliable methods of checking eligibility that requirement is now totally unnecessary.

The second and equally important purpose behind this legislation is to reduce the proliferation of private bills by modernizing the law to conform with the present day problems facing many citizens and aliens currently residing in the United States.

The provision regarding raising a child's age from 14 to 16 in order to be entitled to immigration benefits along with those allowing the Attorney General discretion to waive exclusionary grounds for those immediate relatives of U.S. citizens and permanent residents convicted of offenses relating to simple possession of 30 grams or less of marijuana would have eliminated the necessity for over 100 private bills in 1980 and truly demonstrates the need for such reform legislation.

The section relating to the adjustment of status for certain foreign medical graduates who have resided in the United States since 1978 will allow many communities to retain badly needed physicians and will again eliminate the necessity for the passage of a substantial number of private bills.

I think that it is important to note regarding the provisions revising the exclusionary and naturalization grounds relating to adultery that we are not, in any way, condoning the practice. We are simply placing discretion with the Attorney General to act in these cases.

The changes permit—but do not mandate—a finding of eligibility for entry or naturalization. The Attorney General must look at all factors when deciding whether a person meets the "good moral character standard" enunciated in the Immigration and Nationality Act.

Presently if a couple is legally separated and one person cohabits with another who is not his spouse he will automatically be barred from becoming a citizen. This change is designed to remedy the above situation.

If adultery is found to be the primary cause of the destruction of a viable marriage or is found to result in children becoming public charges the offender will still be found lacking the necessary moral character.

I urge my colleagues to pass this badly needed remedial legislation and remind them that this is only the initial step in the attempt to regain control of a problem which has caused great pain not only to American citizens but to those aliens effected by an outmoded, unrealistic immigration policy.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (H.R. 4327) was passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

GENERAL EXPLANATION OF THE ECONOMIC RECOVERY TAX ACT OF 1981

Mr. STEVENS. Mr. President, I send a concurrent resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 54) to provide for the printing of 3,000 copies of the General Explanation of the Economic Recovery Tax Act of 1981.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

Mr. STEVENS. Mr. President, this resolution, which has been cleared on both sides, the majority and the minority, provides for the printing of an additional 3,000 copies of the forthcoming publication by the staff entitled "General Explanation of the Economic Recovery Tax Act of 1981."

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (S. Con. Res. 54) was considered and agreed to, as follows:

S. CON. RES. 54

Resolved by the Senate (the House of Representatives concurring), That 3,000 copies of the General Explanation of the Economic Recovery Tax Act of 1981, prepared by the staff of the Joint Committee on Taxation, be printed for the use of the Joint Committee on Taxation.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TECHNICAL CORRECTIONS IN THE ENROLLMENT OF S. 884

Mr. STEVENS. Mr. President, I send a concurrent resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The concurrent resolution will be stated.

The legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 55) to authorize the Secretary of Senate to make technical corrections in the enrollment of the enrollment of the bill S. 884 to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

Mr. STEVENS. Mr. President, this resolution directs the Secretary of the Senate to make technical corrections in the enrollment of the farm bill, S. 884. The changes to be made are purely technical in nature. This has been cleared on both sides of the aisle.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (S. Con. Res. 55) was considered and agreed to, as follows:

S. CON. RES. 55

Resolving by the Senate (the House of Representatives concurring), That the Secretary of the Senate, in the enrollment of the bill (S. 884) to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes, is hereby authorized and directed to make the following corrections:

(1) In the introductory text of section 101 (a) of the bill, insert a comma after "1937".

(2) In clause (1) of the matter proposed to be inserted by section 103(1) of the bill, strike out "provision" and insert in lieu thereof "sentence".

(3) In section 107B(b)(1)(D) of the Agricultural Act of 1949, as proposed to be added by section 301 of the bill, strike out "section 1015" and insert in lieu thereof "section 1101".

(4) In section 105B(b)(1)(D) of the Agricultural Act of 1949, as proposed to be added by section 401 of the bill, strike out "section 1015" and insert in lieu thereof "section 1101".

(5) In section 105B(e)(3) of the Agricultural Act of 1949, as proposed to be added by section 401 of the bill, strike out "wheat" the first 2 times it appears and insert in lieu thereof "feed grains", and strike out "wheat-producing" and insert in lieu thereof "feed grain-producing".

(6) In subsection (g)(3)(A) of section 103 of the Agricultural Act of 1949, as proposed to be added by section 502 of the bill, insert "or paragraph (9)(A)" after "paragraph (7)".

(7) In subsection (g)(9)(A) of section 103 of the Agricultural Act of 1949, as proposed to be added by section 502 of the bill, strike out "wheat" in the fifth sentence and insert in lieu thereof "cotton".

(8) In subsection (l)(1) of section 101 of the Agricultural Act of 1949, as proposed to be added by section 602 of the bill, strike out "the preceding sentence" in the proviso and insert in lieu thereof "this sentence".

(9) In subsection (l)(3) of section 359 of the Agricultural Adjustment Act of 1938, as proposed to be added by section 704 of the bill, insert a comma after "interest".

(10) In subsection (l)(4) of section 359 of the Agricultural Adjustment Act of 1938, as proposed to be added by section 704 of the bill, strike out "office or agency of the Government or any court of law" and insert in lieu thereof "officer or agency of the Government".

(11) In section 1005 of the bill, strike out "hereinafter" and insert in lief thereof "hereafter".

(12) In section 1305 of the bill, strike out the first period following the word "reimbursement".

(13) In subsection (b) of section 14 of the Food Stamp Act of 1977, as proposed to be added by section 1320(b) of the bill, insert a comma after "Act".

(14) In section 1402 of the bill, strike out clause (1) and insert in lieu thereof "(1) striking out 'and' at the end of paragraph (8) and changing the period at the end of paragraph (9) to a semicolon; and".

(15) In paragraph (10) of section 1402 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as proposed to be added by section 1402 of the bill, strike out the period at the end thereof and insert in lieu thereof "; and".

(16) In paragraph (11) of section 1402 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as proposed to be added by section 1402 of the bill, strike out "Long-range" and insert in lieu thereof "long-range".

(17) In subsection (b)(3) of section 1411 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as proposed to be amended by section 1412 (4) of the bill, insert a comma after "agencies".

(18) In subsection (a)(1) of section 1412 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as proposed to be amended by section 1413 of the bill, strike out "cochairperson" and insert in lieu thereof "cochairpersons".

(19) In section 1476(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as proposed to be added by section 1440(a) of the bill, strike out "sections 5701 and 5707" and insert in lieu thereof "sections 5701 through 5707".

(20) In section 1447 of the bill, insert "the" immediately before "Interior".

(21) In section 1546 of the bill, strike out "section 1544(a)" and insert in lieu thereof "section 1542(a)".

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZING THE REPRINTING OF COMMITTEE PRINT ENTITLED INVESTIGATION OF SENATOR HARRISON A. WILLIAMS, JR.

Mr. STEVENS. Mr. President, I send a concurrent resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the concurrent resolution by title.

The assistant legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 56) authorizing the reprinting of the committee print entitled "Investigation of Senator Harrison A. Williams, Jr."

The PRESIDING OFFICER. Without objection, the Senate will proceed to its consideration.

Mr. STEVENS. Mr. President, this concurrent resolution would authorize the reprinting for the use of the Senate Select Committee on Ethics 300 copies of its committee print entitled "Investigation of Senator Harrison A. Williams, Jr.: Response of Senator Williams to Report of the Select Committee on Ethics on S. Res. 204," 97th Congress, first session, September 18, 1981. This resolution has been cleared by the chairman and ranking minority member of the Committee on Rules and Administration. The estimated cost of printing the 300 copies will be $3,275.01.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (S. Con. Res. 56) was agreed to, as follows:

S. CON. RES. 56

Resolved by the Senate (the House of Representatives concurring), That there shall be reprinted for the use of the Senate Select Committee on Ethics three hundred copies of its committee print entitled "Investigation of Senator Harrison A. Williams, Jr.: Response of Senator Williams to Report of the Select Committee on Ethics on S. Res. 204", Ninety-seventh Congress, first session, September 18, 1981.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXECUTIVE SESSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate go into executive session for the purpose of considering items on the Executive Calendar, with the exception of Calendar No. 3, the first item on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

RETURN OF TAX CONVENTIONS WITH THE REPUBLIC OF CYPRUS AND THE BRITISH VIRGIN ISLANDS

The PRESIDING OFFICER. The executive resolution will be stated.

The assistant legislative clerk read as follows:

An executive resolution (S. Executive Resolution 4.)

Resolved, That the Secretary of the Senate is directed to return to the President of the United States the Tax Convention With the Republic of Cyprus, signed at Nicosia on March 26, 1980, and the Convention With the British Virgin Islands for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion With Respect to Taxes, signed at Washington on February 18, 1981.

The PRESIDING OFFICER. The question is on agreeing to the executive resolution.

The executive resolution was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the executive resolution was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TREATIES

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate consider the seven treaties on the Executive Calendar, those being Executive Calendar Nos. 24, 25, 26, 27, 28, 29, and 30 en bloc.

Further, I ask that the treaties be advanced through their various parliamentary stages, up to and including the presentation of the resolutions of ratification and that all committee reservations and understandings be deemed agreed to.

Also, I ask unanimous consent that no other action occur on the resolutions, other than a vote and I ask that the seven treaties be voted en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

● Mr. PERCY. Mr. President, the Senate has before it for advice and consent a number of agreements for final action during this session.

In the State Department's list of legislative priorities, three of those treaties are included in the category of "urgent need": The Antarctic Treaty on Living Resources, the Reciprocal Fisheries Treaty with Great Britain and the Tax Treaty and Protocol with Jamaica. Senate action today would complete the committee's efforts to see that all treaties in that category of priority receive advice and consent during this session.

I am not aware that any Member of the Senate will oppose any of these agreements. They were endorsed unanimously in committee, in some cases with one or more reservations or understandings which should take care of matters which might otherwise have caused concern.

The remaining agreements, the Tax Treaty with the Philippines. the protocols extending the International Wheat Agreement and the three aviation protocols also received the unanimous support of the Committee on Foreign Relations and should encounter no opposition in the Senate.

I should emphasize, however, since there has been some confusion on this score, that the three aviation protocols for consideration today are technical amendments to the Chicago Convention on International Civil Aviation and not the Montreal Protocols, No. 3 and 4, to the Warsaw Convention dealing with airline liability. The latter protocols have been reported overwhelmingly by the committee, and a report will be filed prior to the close of the session. However, in view of the need for some debate on those particular protocols, we have not sought to bring them before the Senate during the final weeks of the session.

Mr. President, in the interest of time, I will not explain the provisions of each of these agreements in detail, unless there are Members who wish to discuss particular agreements in this group. Instead, I ask unanimous consent that a brief summary of these agreements be appended at the end of my statement for the RECORD, including an explanation of the various reservations and understandings included with the two tax treaties. All Members have available to them, of course, the more detailed reports from the committee on each treaty.

I would, however, like to insert in the RECORD on the subject of tax treaties, the text of a letter sent today by myself and Senators MATHIAS, PELL, and DODD to Secretary of the Treasury Donald Regan on the subject of tax treaties. We have made a particular effort during this 1st session of the 97th Congress to improve the process by which tax treaties are negotiated and ratified, and in particular to increase the consultation of the Foreign Relations Committee with the congressional committees responsible for tax legislation as well as with the Department of the Treasury officials who plan and negotiate these tax treaties. This letter summarizes the requests we have made to Treasury to institutionalize these improvements and we expect no difficulty in implementing them in the future.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON FOREIGN RELATIONS,
Washington, D.C., December 15, 1981.

Hon. DONALD T. REGAN,
Secretary of the Treasury,
Washington, D.C.

DEAR MR. SECRETARY: The Committee on Foreign Relations is in the process of acting upon a series of bilateral tax treaties negotiated by the Treasury Department. Assistant Secretary for Tax Policy, John Chapoton, testified before the Committee on September 24, in support of eleven of these treaties: the income tax treaties with Argentina, Bangladesh, Canada, Egypt, Israel, Jamaica, Malta, Morocco, Norway, and the Philippines, and an estate and gift tax treaty with West Germany. The large number of these agreements, as well as some of the provisions contained in them, raise important questions about the future scope and direction of the U.S. tax treaty program.

In response to inquiries from Senators Percy and Mathias, the Chairmen of both tax-writing committees of the Congress, Senator Dole and Representative Rostenkowski, as well as the Ranking Minority Member of the Ways and Means Committee, Representative Conable, raised a number of concerns about the tax treaty process. Those letters and accompanying statements have previously been made available to your staff and will appear in the Committee's published hearing record for September 24. They indicated serious reservations about the process by which tax treaty negotiations are initiated and carried forward, as well as questions about the rationale for certain treaties and provisions.

The Foreign Relations Committee and the Senate have been considering the current group of treaties and hope to have approved most of them by the end of the year. We have been dealing with the issues raised about particular provisions of these treaties in close consultation with the leadership of the tax-writing committees. However, we think it is also important to establish certain broader understandings with your department on behalf of the Administration as a whole regarding the future of the tax treaty process. We would like, therefore, to have your assurances or clarifications on the following points.

First, we would like your staff regularly to brief the appropriate staff members of the Senate Foreign Relations and Finance Committees, the House Ways and Means Committee, and the Joint Committee on Taxation with respect to negotiations currently underway or prospective. These briefings would include a clear statement of your objectives and priorities for future treaties, as well as an indication of any significant provisions which you anticipate may arise in these negotiations which might modify existing tax statutes. In particular, we would like future briefings to occur before you begin negotiations with a country where the U.S. has had no prior tax treaty relationship in order to explain your reasons for seeking such a treaty and outlining any provisions of the proposed treaty which may depart from the usual treatment.

Second, we would like to explore with you whether it may be desirable to develop guidelines for tax treaties with developing countries which could provide a frame of reference for future negotiations with developing countries. Agreement on such guidelines would simplify Senate consideration of any future treaties of this kind. The guidelines need not be published or otherwise given the same status accorded to the U.N. or OECD model treaties if the Administration thinks that this will limit it in its negotiations.

Third, we request that revenue impact estimates for each proposed treaty accompany the formal letter of submission to the Senate. We recognize that such estimates may often be difficult and highly speculative, but the Senate should have the benefit of a general estimate of revenue impacts made by those most familiar with the facts and considerations involved in each case.

Fourth, with respect to the now-standard treaty provision giving the "competent authorities" of each country the right to arrive at mutual agreements on matters not otherwise resolved by treaty provisions, we would like a clarification of the scope of such provisions. In particular, we would like an indication as to the limits of the authority implied by such provision.

Finally, we ask that you seek an understanding in all future treaties as well as existing treaties, on the matter of Congressional access to the tax information exchanged under these treaties, such that access will be accorded to the appropriate Congressional oversight committees and the General Accounting Office, as may be necessary to fulfill their responsibilities, consistent with the procedures and limitations otherwise contained in the Internal Revenue Code.

We have been adding an understanding to that effect on each of the treaties approved by the Committee.

Discussion between our respective staffs would suggest that these points will not be difficult to resolve satisfactorily. Our interest is in achieving a closer coordination and integration of the tax treaty process and the legislative process without impeding the legitimate objectives of a treaty network. We know that you generally share this objective and we look forward to working with you to insure this outcome.

Sincerely,

Charles H. Percy, Chairman, Charles McC. Mathias, Jr., Chairman, Subcommittee on International Economic Policy, Claiborne Pell, Ranking Minority Member, Christopher J. Dodd, Ranking Minority Member.

CONVENTION OF THE CONSERVATION OF ANTARCTIC MARINE LIVING RESOURCES

The Convention on the Conservation of Antarctic Marine Living Resources is a widely accepted, important international conservation agreement.

It provides for an ecosystem approach to the management of the marine living resources found in the waters surrounding Antarctica and creates the obligations and machinery necessary to implement this approach. The Convention is also an important political agreement. Its conclusion reflects creative accommodations among those states active in and around Antarctica, who have differing positions on territorial sovereignty and related maritime jurisdiction in Antarctica. The system it establishes will also permit the Parties to make the accommodations necessary to develop and implement effective management measures.

In summary, the Convention provides that:

The purpose of the regime be the conservation, including rational utilization, of Antarctic marine living resources;

The regime apply to the populations of all living resources of the Antarctic marine ecosystem, defined as all species, including birds, found in marine areas south of the Antarctic Convergence, and their relations with each other and with their physical environment;

Any harvesting of Antarctic marine living resources be conducted in accordance with a conservation standard, incorporating an ecosystem approach, and reflecting the following elements:

(a) maintenance of populations or species of Antarctic marine living resources at levels which offer maximum annual production on a continuing basis;

(b) maintenance of the balance among the species composing the Antarctic marine ecosystem, taking into account the relationships between harvested and non-harvested species;

(c) prevention of irreversible changes in the Antarctic marine ecosystem.

A commission of the Contracting Parties be established to implement the conservation standard and undertake actions necessary to ensure the effective operation of the regime;

The commission develop, adopt and revise conservation measures, including total catches in the area as a whole or in subareas defined on the basis of the range of specific populations of Antarctic marine living resources; open and closed seasons and areas, protected species; gear and effort regulation and other steps necessary to fulfill the purposes of the regime;

A scientific committee be established to provide the commission with independent and expert advice, analyses and recommendations to the commission;

The scientific committee's functions include assessment of the status and trends of the populations of Antarctic marine living resources, analysis of data on the effects of harvesting on populations of Antarctic marine living resources, assessment of the effects of changes in harvesting levels and proposed conservation measures and identification of research needs and development of proposals to meet such needs;

A secretariat be established to serve the commission and scientific committee;

Contracting parties be obligated to provide data required by the commission and the scientific committee to carry out their functions, including regular and detailed reporting on harvesting activities carried out by their nationals and vessels;

Contracting parties be obligated to ensure compliance with the provisions of the Convention and measures adopted by the commission;

A system of international observation and inspection be established to oversee compliance with provisions of the Convention and measures adopted by the commission;

The commission and scientific committee ensure close coordination between their activities and those of the International Whaling Commission and those pursuant to the Convention for the Conservation of Antarctic Seals;

The commission and scientific committee establish cooperative relationships with other international inter-governmental and non-governmental bodies which have responsibilities for Antarctic marine living resources, such as FAO, SCAR and IUCN;

The budgetary expenses of the commission and other organs of the regime be apportioned equitably among the contracting parties;

Accession to the regime be open to states engaged in research on, on harvesting of, Antarctic marine living resources;

Issues relating to the existence and nature of maritime jurisdiction be treated in such fashion as to permit and encourage participation in the regime by all states engaged in research on or in harvesting of Antarctic marine living resources and as to protect the position of the United States regarding non-recognition of claims to territorial sovereighty in Antarctica.

RECIPROCAL FISHERIES AGREEMENT WITH THE UNITED KINGDOM OF GREAT BRITAIN AND NORTHERN IRELAND

The Reciprocal Fisheries Agreement with the United Kingdom will replace a similar arrangement which was entered into in 1977 and expired on December 31, 1978. The purpose of the agreement is to permit traditional, small-scale fishing operations in the Virgin Islands area to continue at their present levels.

The following is a summary of the agreement's major provisions:

The Preamble to the Agreement recognizes that the two Governments apply the principle of equidistance in allocating exclusive fishery jurisdiction over areas where the 200 mile fishery zones of the United States and the Virgin Islands overlap. Therefore, each Government exercises jurisdiction over that portion of the area of overlap which is on its side of a line equidistant between the two coastlines.

The operative portion of the Agreement consists of seven Articles. Article I identifies the exclusive fishery zone of each Party for purposes of the Agreement. Articles II and III provide that commercial fishing by vessels of each Party may continue in the exclusive fishery zone of the other "in accordance with existing patterns and at existing levels." Each Party extends access to vessels of the other for the purpose of conducting such fishing. In order to provide a yardstick for interpreting and applying this standard, the two Parties initiated, concurrently with the Agreement, an Agreed Minute setting forth specific information that reflects the existing patterns and levels of commercial fishing by vessels of each Party in the zone of the other Party. The Agreed Minute defines the existing patterns and levels of fishing activity as a maximum of twelve United States vessels no more than 55 feet in length permitted to operate in the exclusive fishery zone of the British Virgin Islands, and a maximum of two British Virgin Islands vessels no more than 40 feet in length permitted to operate in the United States zone. It also describes specifically the areas and seasons in which such fishing operations are authorized.

Article IV provides that each Party will have exclusive authority to enforce the provisions of the Agreement and applicable national fishery regulations in its zone with respect to vessels of the other, provided that such national regulations shall not disturb existing patterns and levels of fishing. Article IV constitutes recognition by each Party of the fishery jurisdiction of the other. At the same time, Article IV reflects the understanding that each side, as its domestic management system proceeds, may apply specific regulations to commercial fishing by vessels of the other in its zone, provided that such regulations are consistent with the standard, set forth in Articles II and III, that they do not disturb existing patterns and levels.

Article V emphasizes that the Agreement does not address recreational fishing by one Party in the zone of the other.

Article VI states that circumstances under which consultations may be held at the request of either Party (e.g., whenever either Party seeks a change in existing patterns and levels of commercial fishing). Article VI also states that if such consultations result in a decision to amend the Agreement, such amendment shall enter into force through an exchange of diplomatic notes.

The consultations provided for in Article VI provide a mechanism for the Parties to work out any problems arising in the implementation of the Agreement and to coordinate efforts for effective conservation of the fishery stocks of the area. In keeping with the nature of the fisheries relationship between the United States and the British Virgin Islands, such consultations are expected to be informal and would include participation by local representatives on both sides, particularly from the Caribbean Regional Fisheries Management Council on the United States side.

Article VII is the only provision which differs from the 1977 agreement. While the 1977 agreement included a fixed expiration date, the 1979 agreement provides that the agreement shall continue in force until the expiration of a period of 90 days from the date on which either Party gives written notice to the other Party of its intention to terminate the Agreement.

TAX CONVENTION WITH THE REPUBLIC OF THE PHILIPPINES

There is presently no income tax treaty in force between the United States and the Philippines. The principal purpose of the proposed income tax treaty between the United States and the Philippines is to reduce or eliminate potential double taxation of income earned by citizens and residents of either country from sources within the other country and to prevent avoidance or evasion of the income taxes of the two countries. The proposed treaty is intended to promote closer economic cooperation between the two countries and to eliminate possible barriers to trade caused by overlapping taxing jurisdictions of the two countries.

The proposed treaty with the Philippines was signed on October 1, 1976, and was modified by an exchange of notes dated November 24, 1976. The treaty and Exchange of Notes were transmitted to the Senate for advice and consent to ratification on January 19, 1977.

The Committee on Foreign Relations approved the treaty subject to two reservations and two understandings. One reservation

deals with Article 14, relating to capital gains. The other reservation deals with Article 9, relating to shipping and air transport income. One understanding relates to Articles 9 and 11, relating to the application of the Philippine Branch profits tax. The other understanding deals with Article 26, relating to exchange of information. The Committee has also expressed certain concerns with the treaty.

GAIN ON THE DISPOSITION OF REAL PROPERTY

On November 26, 1980, Congress passed the Foreign Investment Real Property Tax Act of 1980 (FIRPTA), which generally subjects foreign persons to U.S. tax on the disposition of U.S. real estate after June 18, 1980. Foreign persons disposing of stock in a U.S. corporation having 50 percent or more of its gross asset value comprised of U.S. real property interests are subject to U.S. taxation. Also, foreign persons disposing of an interest in a partnership, trust or estate are subject to U.S. tax to the extent that entity had an interest in U.S. real property. Finally, the distribution (liquidating or nonliquidating) of the U.S. real property interest by foreign corporation is subject to U.S. tax. In general, the FIRPTA rules override existing treaties, but not until January 1, 1985.

The proposed treaty was signed in November, 1976, long before the enactment of FIRPTA. While it generally would be consistent with FIRPTA it does contain a provision, in Article 14, which would restrict the right of the United States to apply its legislation.

Under the legislation, a foreign person disposing of an interest in a corporation will be treated as disposing of U.S. real property if more than 50 percent of the gross asset value of the corporation was comprised of U.S. real property interests. The treaty, however, contains an exemption from source basis taxation for gains from the alienation of property other than those specifically provided in Article 14(1) and other than gain from the alienation of U.S. real estate. Stock of a corporation is not considered to be U.S. real estate under the provisions of Article 7 (income from real property). This exemption from tax conflicts with those Code rules that would subject the stock of a corporation to tax, and directly overrides FIRPTA. Also, the effect of the treaty on the disposition of a partnership, trust or estate owning an interest in U.S. real property is unclear.

In view of the substantial public and Congressional concern with foreign investment in U.S. real estate that led to the enactment of FIRPTA, and in view of the Congressional concern with overriding those provisions in this treaty expressed to this Committee, the Committee believes that it would not be appropriate to override FIRPTA. The Committee believes that it was clearly the intent of Congress that the U.S. should tax foreign investors when they derive gain on the disposition of an interest in U.S. real estate, even when the foreigner is a resident of a treaty partner. Accordingly, the Committee recommends the following reservation be approved by the Senate:

Reservation that, notwithstanding the provisions of Article 14 relating to capital gains, both the United States and the Philippines may tax gain from the disposition of an interest in a corporation if its assets consist principally of a real property interest located in that country. Likewise, both countries may tax gain from the disposition of an interest in a partnership, trust or estate to the extent the gain is attributable to a real property interest in one of the countries. The term "real property interest" is to have the meaning it has under the law of the country in which the underlying real property is located.

AIR TRANSPORTATION INCOME

Senator Boschwitz brought to the attention of the Committee a problem faced by the U.S. airline industry because the treaty, as submitted, permits the Philippines to tax certain income of that industry. He recommended a reservation to address this proolem.

The proposed treaty contains a provision (Article 9) that permits both countries to tax income from the operation of ships in international traffic. The tax at source is limited to one and one-half percent of the gross income or, if lower, the lowest rate of Philippine tax that may be imposed on profits of the same kind derived under similar circumstances by residents of another State. In effect, U.S. shipping companies are given most favored nation status. This provision specifically excludes from treaty coverage income derived from the operation of aircraft in international traffic. Thus, both the Philippines and the United States can continue to tax international air transport income under their internal law. At present, the Philippines imposes a tax equal to 2½ percent of the gross billings attributable to operations in the Philippines. This tax applies to both shipping and air transport income and is reduced by the above-described shipping provision.

This treaty has been before the Committee for over four years. Ratification has been delayed because of the failure to provide for a reciprocal exemption for air transport income. If ratified by the two countries, the treaty would be the first U.S. tax treaty which does not provide for a reciprocal exemption for international air transport income, and would deviate from the U.S. and OECD model tax treaties and accepted international practice. The airlines have feared that the failure to provide for a reciprocal exemption would provide precedent that would be seized upon by other countries to refuse to provide similar coverage.

The Philippines, however, have indicated that they would be unwilling to completely exempt air transport income. They have indicated that a reduction of the 2½ percent tax to 1½ percent would be acceptable.

The Committee believes that limiting Philippine taxation to 1½ percent of gross air transport revenues and insuring most favored nation status to U.S. air carriers is a reasonable compromise. This would put the air transport industry on the same footing as the shipping industry, and would accord them the same treatment that the Philippines have given to Japanese carriers in the Philippine-Japanese income tax treaty.

The Committee believes that the treaty should be ratified. The treaty would benefit a number of U.S. industries that have substantial investments in the Philippines and that derive substantial income from the Philippines. The Committee believes that the appropriate course of action is to approve the treaty subject to a reservation giving the airlines in effect the same treatment that has been accorded to the shipping industry.

The Committee wishes to make it clear that it will carefully scrutinize any future treaty that does not contain a reciprocal exemption for shipping or for air transportation income, and will be very unlikely to recommend ratification of a treaty that does not at least give U.S. shippers and air carriers most-favored nation status. The Committee recommends the following reservation be approved by the Senate:

Notwithstanding the provisions of paragraph (2) of Article 9 of the convention, the tax imposed on profits derived by a resident of one of the Contracting States from sources within the other Contracting State from the operation of aircraft in international traffic may be as much as, but shall not exceed, the lesser of one and one-half percent of the gross revenue derived from sources within that State, and the lowest rate of Philippine tax that may be imposed on profits of the same kind derived under similar circumstances by a resident of a third State.

CONGRESSIONAL ACCESS TO INFORMATION RECEIVED UNDER THE TREATY

The proposed treaty contains a provision (Article 26) found in all U.S. income tax treaties, that requires the exchange of information which is necessary to carry out the provisions of the treaty or of the domestic tax laws of the two countries. The treaty also contains a provision (Article 25), found in most U.S. income tax treaties, that authorizes the competent authorities of the two countries to consult together to attempt to alleviate individual cases of double taxation or cases of taxation not in accordance with the treaty.

The Exchange of Information Article of the treaty contains a provision that limits access to information received by the United States and the treaty partner under the treaty to persons involved in the assessment or collection of taxes. A similar provision in existing treaties has been interpreted by the IRS as precluding Congressional access, specifically General Accounting Office (GAO) access, to mutual agreement case files. The IRS has indicated that they would not change this view. Accordingly, the appropriate Congressional Oversight Committees and the GAO have been hampered in their recent attempts to audit the IRS administration of mutual agreement cases which may involve significant revenue. Treasury has stated that this problem will be taken care of in future treaties, and that they are attempting to work out the problem for existing treaties.

This issue is of significant concern to the Senate Finance Committee, the House Ways and Means Committee, and the Joint Committee on Taxation, which are charged with the responsibility for oversight of the IRS. The Committee believes that such access is permitted and that those Committees and the GAO should, pursuant to the procedures established in the Internal Revenue Code, have access to information exchanged under the treaties, including the mutual agreement case files, where they believe it is necessary to carry out their oversight functions. Accordingly, the Committee recommends the following understanding be approved by the Senate:

That appropriate Congressional committees and the General Accounting Office shall be afforded access to the information exchanged under this treaty where such access is necessary to carry out their oversight responsibilities, subject only to the limitations and procedures of the Internal Revenue Code.

The effect of this understanding is to make clear that the treaty authorizes the Finance Committee, the Ways and Means Committee, and the Joint Committee on Taxation, as well as the GAO, to have access to all information received under the treaty.

BRANCH PROFITS REMITTANCE TAX

The treaty contains a provision (Article 11) that limits the rate of withholding tax imposed by the source country on dividends paid to residents of the other country. The provision further provides that nothing in the treaty is to prevent the Philippines from imposing its additional tax on the earnings of a foreign corporation attributable to a Philippine branch of the foreign corporation. The tax is limited to 20 percent of the amount of those earnings. The provision specifically excludes Article 9 (shipping and air transport) from its scope. Article 9 limits the Philippine tax on international shipping income to one-and-one-half percent of gross billings.

The shipping industry is concerned that despite the language of the treaty the Philippines could interpret the provision as permitting it to impose its branch profits tax in addition to the tax permitted by Article 9. The Committee believes it is clear that Article 9 overrides Article 11(6) and that the Philippines may not impose its branch profits tax on income attributable to

a Philippine permanent establishment where that income is covered by Article 9. The Committee understands that the Government of the Philippines agrees with this reading. Accordingly, the Committee recommends the following understanding be approved by the Senate:

Understanding that under Article 9 and paragraph (6) of Article 11 of the treaty, the Philippines may not impose on the earnings of a corporation attributable to a permanent establishment in the Philippines, which earnings are described in Article 9 of the treaty, a tax in addition to the tax which would be chargeable on the earnings of a Philippine corporation.

NONDISCRIMINATION

Senator Boschwitz brought to the attention of the Committee the fact that a number of discriminatory excise taxes are levied against U.S. air carriers by the Philippine Government. Airlines are business enterprises within the meaning of Article 24. However, it is not clear that this Article will resolve all of the airlines' problems with discrimination. In any event, these discriminating practices conflict with the International Air Transportation Fair Competitive Practices Act of 1979 (P.L. 93-623). That legislation was enacted by Congress to bring an end to unfair and anti-competitive practices, including discriminatory tax practices. Therefore, the Committee instructs the Treasury Department and other relevant agencies such as DOT and State to immediately begin discussions with the Philippine Government to resolve these problems.

AIRLINE TICKET SALES BY PHILIPPINE GENERAL SALES AGENTS

The Philippines imposes a tax of two-and-one-half percent of airline ticket sales in the Philippines. Some concern has been expressed to the Committee that the Philippines' tax authorities may impose this tax when general sales agents sell tickets on U.S. airlines which are not for international traffic originating in the Philippines, but rather are for traffic originating in the United States or a third country.

The Committee believes that such taxation is clearly contrary to the treaty. General sales agents are independent brokers under Article 5(5) of the treaty, and accordingly are not a permanent establishment of the U.S. carrier. Therefore, when such agents sell tickets on U.S. airlines which are not for international traffic originating in the Philippines the Philippines may not tax that sale.

ANTI-TREATY SHOPPING PROVISION

The treaty does not contain the provision, found in most U.S. income tax treaties and the U.S. model, that limits the use of the treaty by third country nations. When residents of third countries can use a treaty between the United States and a treaty partner that resident can obtain a reduction in U.S. tax without reciprocal benefits accruing to U.S. residents earning income in that third country. Unintended use can erode the U.S. tax base.

While we understand that the Philippines treaty does not offer any present abuse possibilities, such possibilities may develop later. It has proved difficult to renegotiate treaties once abuses develop. Also, there is no reason why an anti-abuse provision was not included in this treaty.

The tax legislation writing committees have indicated concern with treaties that lack anti-abuse provisions, and this Committee shares that concern. The Committee could have recommended delaying ratification until an anti-abuse provision acceptable to the Senate was negotiated or it could have recommended a reservation. However, the Committee believes that ratification of this treaty is overdue and recognizes that a reservation could delay ratification by the Philippines. The Committee, however, requests the Treasury Department to negotiate an antiabuse provision that follows the principles of the provision in the current U.S. model.

TAX CONVENTION AND PROTOCOL WITH THE GOVERNMENT OF JAMAICA

There is presently no income tax treaty in force between the United States and Jamaica. The principal purpose of the proposed income tax treaty between the United States and Jamaica is to reduce or eliminate potential double taxation of income earned by citizens and residents of either country from sources within the other country and to prevent avoidance or evasion of the income taxes of the two countries. The proposed treaty is intended to promote closer economic cooperation between the two countries and to eliminate possible barriers to trade caused by overlapping taxing jurisdictions of the two countries.

The Committee on Foreign Relations approved the treaty subject to a reservation and an understanding. The reservation deals with Article 13, relating to real estate. The understanding deals with Article 27, relating to exchange of information. The Committee approved the protocol to the treaty, but expressed its concern with Article IV of the protocol, dealing with the deductibility of expenses incurred in attending a business convention in Jamaica.

GAIN ON THE DISPOSITION OF REAL PROPERTY

On November 26, 1980, Congress passed the Foreign Investment in Real Property Tax Act of 1980 (FIRPTA), which generally subjects foreign persons to U.S. tax on disposition of U.S. real estate made after June 18, 1980. Also, foreign persons disposing of stock in a U.S. corporation having 50 percent or more of its gross asset value comprised of U.S. real property interest are subject to U.S. taxation. Also, foreign persons disposing of an interest in a partnership, trust, or estate are subject to U.S. tax to the extent that entity had an interest in U.S. real property. Finally, the distribution (liquidating or nonliquidating) of a U.S. real property interest by a foreign corporation is subject to U.S. tax. In general, the FIRPTA rules to override treaties but not until January 1, 1985.

The treaty generally would be consistent with FIRPTA. However, as submitted, it contains a provision, in paragraph (5) of Article 13, that would restrict the right of United States to apply its legislation.

Under the legislation, a foreign person disposing of an interest in a partnership, trust, or estate is treated as disposing proportionately of its U.S. real property. Accordingly, a foreign person disposing of an interest in a partnership 35 percent of the assets of which consisted of U.S. real estate would be taxed on his gain equal to 35 percent of the gain of the disposition. The treaty, however, treats partnerships, trusts, and estates as entities and would only permit taxation of the gain on the disposition of an interest in those entities by a resident of Jamaica if more than 50 percent of its assets consisted of U.S. real property interests. This entity characterization of a partnership conflicts with those Code rules that treat partnerships as flow-through entities, and directly overrides FIRPTA. The two separate rules will add substantial complexity to an area of the tax law that is already complex.

In view of the substantial public and Congressional concern with foreign investment in U.S. real estate that lead to the enactment of FIRPTA, and in view of the Congressional concern with overriding those provisions in this treaty expressed to this Committee, the Committee believes that it would not be appropriate to override FIRPTA. The Committee believes that it was clearly the intent of Congress that the U.S. should tax foreign investors when they derive gain on the disposition of an interest in U.S. real estate, even when the foreigner is a resident of a treaty partner. Accordingly, the Committee recommends the following reservation be approved by the Senate:

Notwithstanding the provisions of paragraph (5) of Article 13 of the convention (which relates to the taxation of gains from the alienation of shares of a corporation or of an interest in a partnership, estate, or trust, the property of which consists, directly or indirectly, principally of real property situated in one of the countries), gain derived by a resident of a Contracting State from the alienation or other disposition of an interest in a corporation, or an interest in a partnership, trust, or estate, which has an interest in real property located in the other Contracting State, or the assets of which are considered under the domestic law of that other Contracting State to consist, in whole or in part, of real property, or an interest therein, in that other State, may be taxed by that other State to the extent provided for by its domestic law. In addition, gain derived by a corporation which is a resident of a Contracting State upon the distribution including a distribution in liquidation or otherwise (of an interest in real property in the other Contracting State as determined under the domestic law of the other Contracting State) may be taxed by that other Contracting State to the extent provided for by its domestic law.

As used in the above reservation, and in all similar reservations, the term "principally" means 50 percent or more. Thus, an interest in a corporation is taxable under this reservation only if the fair market value of its real property interests in a Contracting State equals or exceeds 50 percent of the fair market value of its world wide interests in real property plus any other of its assest used or held for use in a trade or business.

CONGRESSIONAL ACCESS TO INFORMATION RECEIVED UNDER THE TREATY

The proposed treaty contains a provision (Article 27) found in all U.S. income tax treaties, that requires the exchange of information which is necessary to carry out the provisions of the treaty or of the domestic tax laws of the two countries. The treaty also contains a provision (Article 26), found in most U.S. income tax treaties, that authorizes the competent authorities of the two countries to consult together to attempt to alleviate individual cases of double taxation or cases of taxation not in accordance with the treaty.

The Exchange of Information Article of the treaty contains a provision that limits access to information received by the United States and the treaty partner under the treaty to persons involved in the assessment or collection of taxes. A similar provision in existing treaties has been interpreted by the IRS as precluding Congressional access, specifically General Accounting Office (GAO) access, to mutual agreement case files. The IRS has indicated that they would not change this view. Accordingly, the appropriate Congressional Oversight Committees and the GAO have been hampered in their recent attempts to audit the IRS administration of mutual agreement cases which may involve significant revenue. Treasury has stated that this problem will be taken care of in future treaties, and that they are attempting to work out the problem for existing treaties.

This issue is of significant concern to the Senate Finance Committee, the House Ways and Means Committee, and the Joint Committee on Taxation, which are charged with the responsibility for oversight of the IRS. The Committee believes that such access is permitted and that those Committees and the GAO should, pursuant to the procedures

established in the Internal Revenue Code, have access to information exchanged under the treaties, including the mutual agreement case files, where they believe it is necessary to carry out their oversight functions. Accordingly, the Committee recommends the following understanding be approved by the Senate.

That appropriate Congressional committees and the General Accounting Office shall be afforded access to the information exchanged under this treaty where such access is necessary to carry out their oversight responsibilities, subject only to the limitations and procedures of the Internal Revenue Code.

The effect of this understanding is to make clear that the treaty authorizes the Finance Committee, the Ways and Means Committee, and the Joint Committee on Taxation, as well as the GAO, to have access to all information received under the treaty.

CONVENTION EXPENSE DEDUCTION

The proposed treaty, as amended by the proposed protocol, contains a provision (Article IV of the protocol, amending Article 25 of the treaty) that permits U.S. taxpayers to deduct the expenses they incur for attending a convention in Jamaica to the extent that the expenses would be deductible if the convention were held in the U.S. Under U.S. law (Sec. 274(h)) a U.S. taxpayer is not permitted to deduct expenses of attending a convention outside of the United States, Canada, or Mexico unless the taxpayer can establish that the locality and the purpose, activities or residences of the active members of the sponsoring organization, justified the foreign location.

The proposed treaty, as amended by the proposed protocol, would permit a deduction for attendance at a convention held in Jamaica provided that the normal U.S. rules (such as business purpose) for attending conventions in the United States are met. The provision covers only the expenses incurred for meals, lodging, and the personal sustenance and comfort of the traveler, the registration fees, including fees for the cost of materials, and the ground and air transportation to and from the convention site. These expenses are allowed to the extent otherwise allowable under U.S. law. A similar provision is included in the proposed Canadian treaty.

This provision is controversial, and the Committee considered recommending that the Senate reject it. In the end, however, the Committee decided that it would be preferrable to consent to the provision in this case.

The Committee is concerned generally with granting deductions to U.S. persons by treaty in cases where the Congress has chosen not to do so under the Code and where the deductions have nothing to do with relief of double taxation. The convention expense provision grants a deduction to U.S. persons and does not deal with a problem of double taxation. Moreover, the objectives sought by this provision can be accomplished through domestic law. The Committee notes that the Chairman of both the Senate Finance Committee and the House Ways and Means Committee have expressed their general view that the United States should not give U.S. persons deductions by treaty.

The Committee is also concerned because the provision changes Code rules that were themselves changed at the end of 1980. Prior to the 1980 Code amendments a deduction for attending a convention in a foreign country was denied under the Code unless the relevance tests described above were met. In 1980, the Congress extended the deduction to expenses of attending a convention in Canada or Mexico. The Chairmen of both the Ways and Means and Finance Committees have expressed concern about the further extension of granting the deduction by this protocol.

The Committee is aware that the Protocol does contain other provisions which are advantageous to the United States, in particular, a far-reaching anti-treaty shopping provision and a commitment by Jamaica to enter into negotiations for the conclusion of a treaty on mutual assistance in criminal matters. The Committee is also aware that the convention deduction provision reflects a personal assurance made to President Seaga of Jamaica by President Reagan. It is regarded by the administration as an important step in its policy of assisting a valuable Caribbean ally. Therefore, the Committee is not disposed to oppose the Protocol or to enter a reservation on this issue.

However, the Chairman of the Committee, Senator Percy, indicated that he did not favor further extensions of the convention deduction to other Caribbean countries. He noted that such extensions would not be likely to receive approval by the Senate and that other countries should not be misled into expecting such extensions.

Senator Dodd urged the Committee not to take a categorical view on further extensions of the convention deduction and to make it clear in its report that there is division within the Committee on this issue.

While expressing his strong support for the Jamaican treaty and protocol, he also stated his concern that barring the convention deduction for other nations in the Caribbean area would be seen as a discriminatory act at a time when the United States is attempting to develop closer working relations with these nations. In this regard, Senator Dodd introduced into the record a letter to him from Assistant Secretary of State Thomas Enders, which notes in part that it is Administration's view that extension of the deduction "could be a useful part of the President's Caribbean Basin Initiative. . . ." The text of this letter follows:

ASSISTANT SECRETARY OF STATE
FOR INTER-AMERICAN AFFAIRS,
Washington, D.C., December 7, 1981.

DEAR SENATOR DODD: In response to your interest in the Jamaica Tax Treaty and its implications for requests for similar treatment on conventions from other Caribbean Basin countries, I would like to summarize our current policy.

The Jamaica Tax Treaty is the only treaty currently pending which includes extension of North American treatment for business deductions while attending foreign conventions. Several countries in the Caribbean Basin have made an issue of requesting similar treatment, but we have no firm plans beyond Jamaica, nor have we made any commitments.

Extension of North American treatment to Caribbean and Central American countries in return for appropriate concessions in tax treaties could be a useful part of the President's Caribbean Basin Initiative, which is in an advanced state of development. Prior to reaching any decision on extensions to other countries, however, we would consult with appropriate Congressional committees, including the Foreign Relations Committee.

Sincerely,

THOMAS O. ENDERS.

The Committee agreed that the opposing points of view on this issue should be reflected in its report and that approval of the convention deduction in this instance should not be taken as an indication of Committee approval for any further extensions.

THREE AVIATION PROTOCOLS

The most recent Protocol, Treaty Document 97-3, provides authority for States who lease or charter aircraft to other States or the citizens of other States to transfer the functions and duties of a State Party under the Chicago Convention to that other operator. It fills a gap in the original Chicago Convention with respect to leased aircraft.

The other two Protocols, Executives N and O from the first session of the 96th Congress, concern the addition of an authentic Russian language text to the 1944 Chicago Convention on International Civil Aviation.

BACKGROUND AND PROVISIONS

The Protocol concerning aircraft leasing is the first substantive amendment to the original 1944 Chicago Convention on International Civil Aviation. It is the product of a 1971 U.S. initiative in the International Civil Aviation Organization (ICAO) which was finally concluded in late 1980 with the approval by the ICAO Assembly of a new Article 83 *bis* to the Chicago Convention.

In accordance with this new article, States Parties to the Convention may enter into bilateral agreements delegating their responsibilities as the State of registry to the leasing State under Article 12 (Rules of the Air), 30 (Aircraft Radio Equipment) 31 (Certificates of Airworthiness) and 32(a) (License of Personnel). The State of registry may delegate any or all of these obligations as it chooses.

The United States can expect to be the principal beneficiary of this new provision for years to come. U.S. companies supply a great percentage of the world's civil aircraft and lease by far the greatest number of aircraft to operators in other states.

The 1977 Protocols establishing an authentic Russian language text of the Chicago Convention are the result of a Working Group of ICAO established in 1974, in which the U.S. was an active participant. The U.S.S.R. became a party to the Chicago Convention in 1970 and Russian became a working language of ICAO in 1972, as it is of virtually all international organizations.

PROTOCOLS TO THE WHEAT AGREEMENT

These protocols would extend for two additional years the Wheat Trade Convention and the companion Food Aid Convention which together constitute the current International Wheat Agreement.

BACKGROUND

The United States has participated in a series of international wheat agreements since 1949. In 1971, the United States joined in the negotiation and ratification of a Wheat Trade Convention and a companion Food Aid Convention. Although both conventions were originally negotiated as three-year agreements, by 1980 they had been extended four times by protocols. In 1980, a new Food Aid Convention was negotiated and the Wheat Trade Convention was extended for the fifth time. The Executive Branch is now requesting Senate advice and consent to extend both agreements by two additional years, with no changes in the structure of either agreement.

MAJOR PROVISIONS

The sixth extension of the WTC, like the five previous extensions, maintains the framework for international cooperation in wheat matters. It will authorize the International Wheat Council to continue to collect, analyze, and disseminate data on the international wheat situation, with particular reference to supply, demand, trade, and prices. The International Wheat Council, which meets semi-annually, provides a unique and valuable forum for international discussions to promote trade in wheat and wheat products and to resolve problems in a cooperative manner.

Effective July 1, 1980, the original Food Aid Convention, 1971, was replaced by the FAC, 1980. This first extension maintains the parties' present commitments to provide minimum annual quantities of cereals food aid to needy developing countries. In the case of the United States, this commitment amounts to 4,470,000 metric tons, an amount well within our currently authorized food aid programs under Public Law 480, the Agricultural Trade Development and Assistance

Act of 1954, as amended. The objective of this Convention is to secure, through a joint effort by the international community, achievement of the 1974 World Food Conference target of at least 10 million tons of cereals aid annually to developing countries.

Mr. PERCY. Mr. President, finally, a word about the Tax Treaty and protocol with Jamaica. The protocol to that treaty, signed and submitted during the Reagan administration, would grant deductibility to business conventions in Jamaica. Such deductibility is generally referred to as "North American treatment" because it is presently limited in the tax codes to conventions in the United States, Canada, and Mexico. I would like to make my own views clear on this issue, since it has been the subject of some concern from some other Members of the Senate—in particular Senators DOLE and MATSUNAGA from the Finance Committee, as well as the chairman and ranking member of the House Ways and Means Committee, and the congressional delegates from Puerto Rico and Virgin Islands.

I do not think that further extensions of "North American treatment" are desirable as a policy matter. This question was debated strenuously and resolved in legislation only recently, and I would prefer not to reopen the issue by treaty so soon after that resolution of the question was made. I also question whether such extensions really do confer significant benefits on the countries concerned.

I am aware that this particular exception for Jamaica was personally offered by President Reagan to President Seaga as part of his interest in promoting the development of Jamaica. The administration had made clear that it may consider further extensions in the context of its policy of promoting economic development in the Caribbean basin. Senator DODD has argued in committee that we should not at this stage shut the door to such extensions.

Nevertheless, while I do not want to slam any doors, I do want to convey great skepticism on my part that such further extensions can be justified. Furthermore, I have great doubts that additional geographical extensions of convention deductibility would receive the necessary two-thirds approval of the Senate. I would not want this political reality to be the cause of any hard feelings in the future as a result of unfilled expectations on the part of other countries in the region. Therefore, I welcome the administration's announced intention of consulting with the appropriate congressional committees prior to any decisions or offers on further extensions of North American treatment.

Mr. President, I urge my colleagues to vote in favor of Senate advice and consent to ratification of these treaties.●

THE WHEAT CONVENTION AND FOOD AID CONVENTION

● Mr. PRESSLER. Mr. President, I rise in support of the two protocols, Treaty Document No. 97–9, for the extension of the International Wheat Agreement, now before the Senate. Recently I had the privilege to chair hearings in the Foreign Relations Committee on the proposed 2-year extension of the Food Aid Convention and the Wheat Trade Convention. Witnesses from the administration and the wheat industry both testified in favor of an extension of these conventions.

The Wheat Trade Convention and Food Aid Convention were negotiated and ratified in 1971 and were extended four times prior to 1980. In 1980, the Food Aid Convention was renegotiated and the Wheat Trade Convention was extended once again. The administration is now requesting that both conventions be extended for 2 years.

The Wheat Trade Convention includes 58 countries and provides for an International Wheat Council to conduct an annual review of the world wheat situation to provide member governments with information on wheat trade policies. Unfortunately, the convention does not contain any economic provisions for price stabilization, but does facilitate the expansion of international wheat and wheat flour trade.

The convention's function of aiding the expansion of wheat trade is important to the United States as we are the world's largest wheat exporter with a projected 47 percent of the total world wheat trade in the 1981–82 marketing year. U.S. wheat exports have increased dramatically in recent years and are essential as a positive factor in our balance of trade. In the 1980–81 marketing year, wheat exports accounted for over $7 billion in a favorable balance of trade for the United States.

Although the Wheat Trade Convention provides for no price stabilization or reserve stock, it is still a useful forum for discussions on world wheat trade. The wheat council would also be an ideal forum for negotiations on new international grain agreements which might provide some means of price stabilization and reserve stocks. I feel the United States should take a leadership position in trying to negotiate such an agreement which would increase producer returns.

Mr. President, I also recently chaired a United States-Canada Interparliamentary Group meeting on International Wheat Marketing and this issue was discussed in great detail. The Canadian delegation expressed great interest in some type of pricing and reserve holding system, but stressed the point that the United States must take the initiative for any such agreement to be reached or to succeed.

The United States has not taken such an initiative, so recent negotiations on a commodity agreement failed. The administration felt that individual country's reserve programs regulated by the world wheat market is preferable to an internationally coordinated program.

I feel this viewpoint fails to recognize that the present system is not providing an adequate return to wheat producers. The United States is exporting wheat at well below the cost of production and many wheat farmers are being forced out of business. It is time we recognized these facts and worked to increase producer returns. I strongly encourage the administration to exert leadership in the initiation of negotiations for a new wheat agreement to increase producer returns and assure consumers of an adequate supply of wheat. I would hope that negotiations or an agreement might be reached before the present 2-year extension of the convention expires.

The Food Aid Convention commits donor nations to a certain amount of food aid. Pledges under the Food Aid Convention total 7.6 million tons of grain with the United States pledging 4.47 million tons, which is proportionate to our share of the world grain trade. The United States will meet this pledge entirely under the Public Law 480 program. Food aid is essential for countries to overcome unexpected emergencies and natural disasters and the Food Aid Convention provides for such assistance.

I urge my colleagues to join me in support of extension of the Wheat Trade Convention and Food Aid Convention. The conventions are very beneficial to world wheat trade and their elimination would only hurt our wheat exports.●

JAMAICA AND PHILIPPINE TAX TREATIES

Mr. DOLE. Mr. President, I am pleased to make a brief statement in support of the tax treaties with Jamaica and with the Philippines as reported by the Foreign Relations Committee.

As with the several treaties ratified last month, the Foreign Relations Committee has, in its reports on the Jamaican and Philippine treaties, been most accommodating to the concerns of members of the Finance Committee. The new and closer working relationship between the Foreign Relations Committee, the Treasury Department, and the tax legislation writing committees, a relationship encouraged by the distinguished Senator from Illinois (Mr. PERCY), is proving most valuable in making the tax treaty ratification process relatively painless. I thank the chairman of the Foreign Relations Committee for his efforts in forging this new relationship.

In the tax treaties before us today there are several provisions that bear special scrutiny.

The most troubling provision is that section of the Jamaican protocol permitting a U.S. person to deduct the expenses of attending a business convention in Jaimaica. Just 1 year ago Congress specifically declined to permit this deduction when it amended the basic foreign convention deduction rule in the Internal Revenue Code. The decision was made in Public Law 96–608 to extend the special treatment we today propose to extend to Jamacia only to Canada, Mexico and our possessions.

It seems inappropriate to me to do by treaty today what we specifically decided not to do by statute just a year ago. I am aware, however, that the treaty contains other provisions of special advantage to the United States as a quid pro quo for this provision, most notably an appropriately stiff antitreaty shopping provision and a commitment by Jamaica to enter negotiations for a treaty on mutual assistance to criminal matters.

I am also aware that this provision reflects a personal assurance made to President Seaga of Jamaica by President Reagan. While, ordinarily, I would suggest that it is appropriate for the Senate

to enter a reservation on this issue, these circumstances prevent me from doing so.

Should a similar provision be presented to the Senate in another tax treaty, however, I anticipate that there would be considerable opposition. Like Senator PERCY, therefore I must indicate that I do not favor further extensions of the convention deduction by treaty to other countries in the Caribbean area or elsewhere.

If the administration believes the extension of this deduction to other countries is an important element of foreign policy I hope it will propose an amendment to the Internal Revenue Code to implement the change. Until such an amendment to the code is enacted no country should anticipate any further extensions of the convention deduction.

As reported, both treaties are subject to the reservation that, not withstanding two provisions to the contrary, the United States shall not be restricted in applying the provisions of the Foreign Investment in Real Property Tax Act of 1980, (FIRPTA). I am pleased that these treaties, like those ratified last month, contain reservations wherever a treaty appears to override FIRPTA.

The members of the Finance Committee took a great deal of interest in developing FIRPTA in response to popular insistence that foreign investment in U.S. real property bear at least the same tax burdens as domestic investment. It was not without some difficulty that these concerns were balanced against desires not to discourage foreign investment in the United States for unwarranted reasons.

I do not generally favor disrupting this balance through the treaty process and anticipate that tax treaties that attempt to do so would, like these two treaties, generally be ratified only with a reservation such as that contained in the report we are considering.

I am also pleased to note that the Philippine treaty is to be approved with the reservation that income from air transportation be taxed no more onerously than income from the operation of ships. While I understand that this compromise does not wholly satisfy American flag air carriers, it is, I think all agree, a reasonable compromise that will finally move this treaty out of the Senate.

I encourage the Senate to ratify these treaties with the reservations and understandings recommended by the Foreign Relations Committee.

The PRESIDING OFFICER. The question is on agreeing to the resolutions of ratification.

Mr. ROBERT C. BYRD. Mr. President, I ask for a division.

The PRESIDING OFFICER. A division is requested. Senators in favor of the resolutions of ratification will rise and stand until counted. (After a pause.) Those opposed will rise and stand until counted.

On a division, two-thirds of the Senators present and voting having voted in the affirmative, the resolutions of ratification are agreed to.

The resolutions of ratification agreed to are as follows:

RESOLUTIONS OF RATIFICATION

RECIPROCAL FISHERIES AGREEMENT WITH THE UNITED KINGDOM OF GREAT BRITAIN AND NORTHERN IRELAND, 1979

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Reciprocal Fisheries Agreement between the Government of the United States of America and the Government of the United Kingdom of Great Britain and Northern Ireland, 1979, with its agreed minute, done at London, March 27, 1979.

CONVENTION ON THE CONSERVATION ANTARCTIC MARINE LIVING RESOURCES

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the convention on the conservation of Antarctic Marine Living Resources adopted at a diplomatic conference held in Canberra, Australia, May 7–20, 1980, and signed on behalf of the United States on September 11, 1980, with a Proces-Verbal of Rectification dated March 18, 1981.

TAX CONVENTION WITH THE REPUBLIC OF THE PHILIPPINES

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Convention signed at Manila on October 1, 1976, between the Government of the United States of America and the Government of the Republic of the Philippines with Respect to Taxes on Income, and an Exchange of Notes done at Washington on November 24, 1976, subject to the following:

(1) reservation that, notwithstanding the provisions of Article 14 relating to capital gains, both the United States and the Philippines may tax gain from the disposition of an interest in a corporation if its assets consist principally of a real property interest located in that country. Likewise, both countries may tax gain from the disposition of an interest in a partnership, trust or estate to the extent the gain is attributable to a real property interest in one of the countries. The term "real property interest" is to have the meaning it has under the law of the country in which the underlying real property is located;

(2) reservation that, notwithstanding the provisions of paragraph (2) of Article 9 of the convention, the tax imposed on profits derived by a resident of one of the Contracting States from sources within the other Contracting State from the operation of aircraft in international traffic may be as much as, but shall not exceed, the lesser of one and one-half percent of the gross revenue derived from sources within that State, and the lowest rate of Philippine tax that may be imposed on profits of the same kind derived under similar circumstances by a resident of a third State;

(3) understanding that under Article 9 and paragraph (6) of Article 11 of the treaty, the Philippines may not impose on the earnings of a corporation attributable to a permanent establishment in the Philippines, which earnings are described in Article 9 of the treaty, a tax in addition to the tax which would be chargeable on the earnings of a Philippine corporation; and

(4) understanding that appropriate Congressional committees and the General Accounting Office shall be afforded access to the information exchanged under this treaty where such access to the information exchanged is necessary to carry out their oversight responsibilities, subject only to the limitations and procedures of the Internal Revenue Code.

TAX CONVENTION (AND PROPOSED PROTOCOL) WITH THE GOVERNMENT OF JAMAICA

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Convention between the Government of the United States of America and the Government of Jamaica for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Income (the Convention), together with a related exchange of notes, signed at Kingston on May 21, 1980, and the Protocol Amending the 1980 Convention, together with a related exchange of notes, signed at Kingston on July 17, 1981, subject to the following:

(1) reservation that, notwithstanding the provisions of paragraph (5) of Article 13 of the convention (which relates to the taxation of gains from the alienation of shares of a corporation or of an interest in a partnership, estate, or trust, the property of which consists, directly or indirectly, principally of real property situated in one of the countries), gain derived by a resident of a Contracting State from the alienation or other disposition of an interest in a corporation, or an interest in a partnership, trust, or estate, which has an interest in real property located in the other Contracting State, or the assets of which are considered under the domestic law of that other Contracting State to consist, in whole or in part, of real property, or an interest therein, in that other State, may be taxed by that other State to the extent provided for by its domestic law. In addition, gain derived by a corporation which is a resident of a Contracting State upon the distribution (including a distribution in liquidation or otherwise) of an interest in real property in the other Contracting State (as determined under the domestic law of the other Contracting State) may be taxed by that other Contracting State to the extent provided for by its domestic law.

(2) understanding that appropriate Congressional Committees and the General Accounting Office shall be afforded access to the information exchanged under this treaty where such access is necessary to carry out their oversight responsibilities, subject only to the limitations and procedures of the Internal Revenue Code.

THREE AVIATION PROTOCOLS

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of three aviation protocols: a Protocol Relating to an Amendment to the Convention on International Civil Aviation, done at Montreal on October 6, 1980, and Two Related Protocols, the Protocol Relating to an Amendment to the Convention in International Civil Aviation, done at Montreal on September 30, 1977, and the Protocol on the Authentic Quadrilingual Text of the Convention on International Civil Aviation, with Annex, done at Montreal on September 30, 1977.

1981 PROTOCOLS FOR THE EXTENSION OF THE 1971 INTERNATIONAL WHEAT AGREEMENT

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of Two Protocols for the Extension of the International Wheat Agreement, 1971, signed on behalf of the United States on May 8, 1981.

TAX CONVENTION WITH THE REPUBLIC OF ARGENTINA, WITH RELATED PROTOCOLS

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Convention with the Republic of Argentina for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Income, together with a related

protocol, signed at Buenos Aires on May 7, 1981 (Treaty Doc. 97-10), subject to the following:

(1) reservation that, notwithstanding the provisions of paragraph (5) of Article 13 of the convention (which relates to the taxation of gains from the alienation of shares of a corporation or of an interest in a partnership, estate, or trust, the property of which consists, directly or indirectly, principally of real property situated in one of the countries), gain derived by a resident of a Contracting State, from the alienation or other disposition of an interest in a corporation, or an interest in a partnership, trust, or estate, which has an interest in real property located in the other Contracting State, or the assets of which are considered under the domestic law of that other Contracting State to consist, in whole or in part, of real property, or an interest therein, in that other State, may be taxed by that other State to the extent provided for by its domestic law. In addition, gain derived by a corporation which is a resident of a Contracting State upon the distribution (including a distribution in liquidation or otherwise) of an interest in real property in the other Contracting State (as determined under the domestic law of the other Contracting State) may be taxed by that other Contracting State to the extent provided for by its domestic law.

Furthermore, for purposes of paragraph (5) of Article 13, the term "immovable property" includes property in which the business of the company, partnership, trust or estate described in that paragraph is carried on.

(2) reservation that, a person (other than an individual) which is a resident of a Contracting State and which derives income from sources within the other Contracting State shall not be entitled to the benefits under this convention accorded by that other Contracting State if 25 percent or more of the beneficial interest in such person is owned, directly or indirectly, by individuals who are not residents of the first-mentioned Contracting State. For purposes of this paragraph, a corporation that has substantial trading in its stock on a recognized exchange in a Contracting State is presumed to be owned by residents of that Contracting State. This paragraph shall not apply if it is determined that the acquisition or maintenance of such person and the conduct of its operations did not have as a principal purpose obtaining benefits under the convention.

(3) understanding that, appropriate Congressional committees and the General Accounting Office shall be afforded access to the information exchanged under this treaty where such access is necessary to carry out their oversight responsibilities, subject only to the limitations and procedures of the Internal Revenue Code.

STATEMENT PERTAINING TO THE CONVENTION ON THE CONSERVATION OF ANTARCTIC MARINE LIVING RESOURCES

● Mr. McCLURE. Mr. President, as chairman of the Committee on Energy and Natural Resources, I am pleased to support the Convention on the Conservation of Antarctic Marine Living Resources.

The U.S. interest in Antarctica began in the early 19th century when small private expeditions were made to explore and map the area. The years of 1896 to 1920 is considered to be the heroic era in Antarctica, the period of the romantic traverses into the interior of the continent by Amundsen, Shackelton, and Scott. Antarctic exploration then was a matter of human muscle and courage against the elements. World War I accelerated the development of the airplane, motorized surface transport, and the radio, and a new breed of Antarctic explorers who naturally employed the improved techniques. Comdr. Richard E. Byrd introduced the effective use of aircraft in the discovery and exploration of Antarctica.

From 1930, there followed a multitude of expeditions, some purely exploratory, some emphasizing science, but nearly all utilizing various types of mechanized support and with a degree of national interest in the background. World War II yielded even more sophisticated technological developments. These were employed in the U.S. Navy's 1946–47 operation highjump, the largest assault on the Antarctic. Thirteen ships and 4,000 men made up that Antarctic expedition using 25 aircraft to make sorties inland from three separate points on the coast.

Many national and international expeditions followed. This period of the 1940's and 1950's was climaxed by the Third International Geophysical Year from July 1957 to December 1958. The Antarctic portion of it included an organized scientific effort by 12 nations. Sixty-five stations were established on the continent to carry out studies in the physical sciences. There was considerable international cooperation and exchange of scientists, a pattern which set the Antarctic stage for several years.

Against this background of international cooperation and the influence of the scientific communities in the participating countries, the United States seized the opportunity to meet with representatives of the other nations participating in the Antarctic research to negotiate the fundamental principles of the Antarctic Treaty. Of the 12 countries, 7—Argentina, Australia, Chile, France, New Zealand, Norway, and the United Kingdom—maintained claims of sovereignty, occasionally overlapping, over parts of the continent. The United States, along with Belgium, Japan, South Africa, and the Soviet Union, neither assert nor recognize such claims. The international cooperation which marked the IGY made possible the Antarctic Treaty which was signed in Washington, D.C. on December 1, 1959 and entered into force on June 23, 1961. By agreeing to disagree on the question of territorial sovereignty, the Antarctic Treaty has provided an innovative legal framework for peaceful scientific research.

The Antarctic Treaty, however, is a limited purpose treaty which defines specific objectives and is limited to those objectives. Among the areas not covered by the treaty are questions of resource development—both marine living resources and mineral resources.

The two decades since the Antarctic Treaty entered into force have witnessed important changes in perceptions regarding the possibilities of resource development. The Eighth Consultative meeting in 1975 began consideration of both marine living resources and mineral resources and by 1977, the consultative parties had agreed to make conclusion of a regime for the conservation of marine living resources their first priority.

It is fitting that this convention should have been negotiated first and that the United States should so strongly support it. In 1820, the New Englander, Nathaniel Palmer, took his sloop *Hero* into the waters of the southern Drake Passage looking for new areas to harvest fur seals.

He was the first to sight the mainland of Antarctica and sealing activities, which he began, dominated the area until the end of the 19th century. The depletion of traditional fishing grounds and establishment of 200 mile fishing zones elsewhere in the world have stimulated the search for new fishing areas, especially in the Antarctic where many experts believe that the abundant levels of krill could provide a significant source of protein. The importance of this convention lies in the realization that the Antarctic marine ecosystem, in which krill play a central role as the direct or indirect food source for all higher order species, appears to be particularly vulnerable to unregulated harvesting. Such harvesting could have unforeseen and perhaps irreversible impacts. For this reason the convention applies to areas outside the limits of the Antarctic Treaty of 60° South and adopts an ecosystem approach using the Antarctic convergence as an oceanographic boundary.

The committee has been interested in Antarctica and the furtherance of scientific research there as a result of our historic concern and responsibility for the conservation and wise use of natural resources together with a deep interest in the related scientific disciplines. Several members of the committee have had the opportunity to personally review the Antarctic research program and I was impressed by my own visit and inspection. The Committee on Energy and Natural Resources conducted oversight hearings in 1979 at my request on U.S. activities in Antarctica and carefully reviewed the progress of the negotiations on both this convention and on mineral resources. The committee will continue to exercise its oversight and support for the early conclusion of a convention on mineral resources. This convention is an important step and one which I support.●

NOMINATIONS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate proceed to the nominations commencing with those under the Judiciary, on page 3, that all the nominations on the calendar be considered en bloc and approved en bloc, and that the statements of individual Members be inserted at the appropriate place in the RECORD.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the nominations. Without objection, the nominations are confirmed.

The nominations considered and confirmed en bloc are as follows:

THE JUDICIARY

David L. Russell, of Oklahoma, to be U.S. district judge for the northern, eastern, and western districts of Oklahoma.

Harold L. Ryan, of Idaho, to be U.S. district judge for the district of Idaho.

DEPARTMENT OF JUSTICE

Benjamin F. Baer, of California, to be a Commissioner of the U.S. Parole Commission for the term of 6 years.

Glenn L. Archer, Jr., of Virginia, to be an Assistant Attorney General.

Stanley S. Harris, of the District of Columbia, to be U.S. attorney for the District of Columbia for the term of 4 years.

Richard C. Turner, of Iowa, to be U.S. attorney for the southern district of Iowa for the term of 4 years.

Donald W. Wyatt, of Rhode Island, to be U.S. marshal for the district of Rhode Island for the term of 4 years.

Bruce R. Montgomery, of Tennessee, to be U.S. marshal for the eastern district of Tennessee for the term of 4 years.

Robert T. Keating, of Wisconsin, to be U.S. marshal for the eastern district of Wisconsin for the term of 4 years.

COMMODITY FUTURES TRADING COMMISSION

Kalo A. Hineman, of Kansas, to be a Commissioner of the Commodity Futures Trading Commission for the term expiring June 19, 1986.

DEPARTMENT OF COMMERCE

Peter McCoy, of California, to be Under Secretary of Commerce for Travel and Tourism. (New position.)

Mr. STEVENS. Mr. President, I move to reconsider the action taken in executive session, including the treaties and all nominations, en bloc.

Mr. THURMOND. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I ask that the President be immediately notified of the confirmation of the nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOMINATION OF KALO A. HINEMAN OF KANSAS

Mr. HELMS. Mr. President, Mr. Kalo Hineman of Kansas has been nominated by the President to be a Commissioner of the Commodity Futures Trading Commission. Mr. Hineman is a Kansas farmer and has had practical experience in the use of the futures markets.

At his confirmation hearing, Mr. Hineman demonstrated a keen knowledge of the hedging and price discovery functions of these markets and was able to identify these concepts with concrete examples. He further demonstrated a sharp awareness of the obstacles which agricultural producers face in the use of these markets and pledged to do everything possible to assist producers and other individuals in overcoming these obstacles.

Throughout his testimony, Mr. Hineman exhibited the kind of philosophy and judgment which is so important in a high Government responsibility such as this.

Some months ago, the members of the Senate Agriculture Committee sent a letter to the President asking that just such a citizen as Mr. Hineman be appointed a Commissioner at the CFTC. I commend the President on his choice of Mr. Hineman. I ask that this letter be printed in the RECORD at the conclusion of my remarks.

I also commend Senators DOLE and KASSEBAUM for their respective roles in the selection of Mr. Hineman and for their tributes to him at his confirmation.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., May 22, 1981.

THE PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: The statute establishing the Commodity Futures Trading Commission provides that in nominating persons for appointment you "shall seek to establish and maintain a balanced commission, including, but not limited to, persons of demonstrated knowledge in the production, merchandising, processing or distribution of one or more of the commodities or other goods and articles, services, rights and interests" covered by the Act.

Mr. Philip Johnson, recently nominated to be both a Commissioner and Chairman of the Commission, will bring to the CFTC an admirable store of knowledge in the area of futures trading. While we do not oppose the nomination of Mr. Johnson, we are nevertheless concerned that neither he, nor the three Commissioners with unexpired terms of service, Mr. Stone, Mr. Gartner and Mr. Martin, offer any significant expertise in agricultural issues. (Mr. Martin's term expires in June.)

One-half of the futures contracts traded on all exchanges are for agricultural commodities. Moreover, the futures markets play a vital role in the activities of farmers, processors, merchandisers and exporters of agricultural products. It is imperative that at least one member of the Commission have a demonstrated expertise in agriculture.

We strongly urge you, in considering candidates for the Commodity Futures Trading Commission, to nominate a person who meets this criterion. To ignore the vital interest of agricultural producers in the regulation of the futures industry and to deny adequate representation of agricultural interests on the Commission would violate both the spirit and the letter of the legislation establishing the Commodity Futures Trading Commission.

Sincerely,

Edward Zorinsky, Jesse Helms, Walter D. Huddleston, David L. Boren, Patrick J. Leahy, David Pryor, Alan J. Dixon, Robert Dole, John Melcher, Richard G. Lugar, Thad Cochran, Howell Heflin, Mark Andrews, Roger W. Jepsen, Rudy Boschwitz, and Paula Hawkins.

THE CONFIRMATION OF PETER M'COY TO BE UNDER SECRETARY OF COMMERCE FOR TRAVEL AND TOURISM

Mr. PRESSLER. Mr. President, I am pleased to be able to offer my wholehearted support for the nomination of Mr. Peter McCoy as Under Secretary of Commerce for Travel and Tourism.

This is a new position which was created by the National Tourism Policy Act (Public Law 97-63). As the principal sponsor of that legislation, I am most gratified by the quick action taken by the Reagan administration in filling this new post. In addition, the executive branch has demonstrated its own strong commitment to the development of a Federal tourism promotion effort by nominating Mr. McCoy, who comes to this new role from the White House.

I am confident that the combination of his managerial prowess and the support the administration is offering will result in a renewed and strengthened Federal tourism role.

As the head of the U.S. Travel and Tourism Administration, Mr. McCoy will be charged with the responsibility of maximizing the very substantial benefits which our Nation derives, both economically and socially, from a strong travel and tourism industry. In pursuing this goal, Mr. McCoy will enjoy the advantage of starting from the solid foundation layed by the current Assistant Secretary for Tourism, Frederick Bush.

Over the past year, Mr. Bush has demonstrated the aggressive and innovative qualities which the travel service has needed. The programs which he has begun appear very promising, and Mr. McCoy has indicated that he intends to build and expand from this base. It is my belief that Mr. McCoy and Mr. Bush will work well together and that we can expect to see a more positive attitude at the U.S. Travel and Tourism Administration.

For all these reasons, I ask that my colleagues join me in voting to confirm Mr. McCoy as the first Under Secretary of Commerce for Travel and Tourism.

Mr. STEVENS. Mr. President, with the exception of the one item that was reserved, which was the first item on the Executive Calendar, is there any further action necessary to clear the Executive Calendar?

The PRESIDING OFFICER. There is none.

LEGISLATIVE SESSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ESOP SAVES GENERAL MOTORS PLANT

Mr. LONG. Mr. President, on October 30, a group of New Jersey autoworkers succeeded in acquiring a General Motors roller bearing plant that otherwise would have closed. In a commendable display of cooperation between labor and management, these foresighted employees utilized an employee stock ownership plan (ESOP) as the financing vehicle for accomplishing this job-saving buyout.

In addition to saving jobs that otherwise would have been lost, this ESOP buyout also insures the existence of a U.S. supplier for auto parts that otherwise may well have been acquired from our international competitors. General Motors is also to be commended for their efforts to make this employee buyout a feasible alternative. It is my hope that this will prove to be a valuable example of how management and labor can work together to provide a more "cycle responsive" alternative to plant closings and massive layoffs.

American labor badly needs new ways to deliver victories to their members, and management needs new ways to deal with labor's demands. Employee stock ownership can serve as a fruitful new area in which these traditional foes can resolve their differences. Employee stock ownership can also serve as a new stabilizing element, an element that can encourage these adversaries to act more in the national interest by beginning to operate

more in a spirit of cooperation and compromise.

I know that my colleagues join me in wishing these employees great success. If their company is able to succeed through these difficult times, that success will be widely shared and these employees will realize a larger share in the fruits of their labor.

The following article from the December 7, 1981, issue of Pensions and Investment Age summarizes the primary elements of this recent ESOP buyout:

Mr. President, I ask unanimous consent that the article to which I have just referred be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ESOP SAVES GENERAL MOTORS PLANT FROM SHUTDOWN

CLARK, N.J.—When General Motors decided to close down a ball-bearings plant here, a committee of union leaders and management came back with a plan to buy the plant for themselves using an employee stock ownership plan.

Known as an ESOP, an employee stock ownership plan is a trust created on behalf of the employees to buy their company's stock with money borrowed from an outside source.

A company is then established which is responsible for paying off the loan, and which simultaneously allocates stock to a trust for the employees.

The newly-formed company, Hyatt-Clark Industries Inc., purchased the plant from General Motors, October 30, for approximately $53 million.

General Motors got $30 million in cash, $10 million in non-voting preferred stock for the land and buildings, and an additional $13 million in notes, said Alan V. Lowenstein, the lawyer who framed the purchase.

He said it was financed by a $15 million mortgage loan from the Prudential Insurance Company of America, and a $15 million loan from Chemical Bank, New York.

An additional $10 million credit line was provided by Fidelity Union Bank of Newark, N.J., for working capital, he said, adding that the company had only borrowed $500,000 to date (mid-November).

Hyatt-Clark will pay up to 15 percent of employees' salaries as stock into the ESOP rather than making cash payments into a pension or other type of benefit plan. As well as preserving precious cash, there are additional advantages to ESOPs.

"The whole contribution into the trust is tax deductible," he said. All the employees at the plant, both management and workforce, will get equal shares of stock paid in cash when they retire.

The actual amount of shares allotted to the ESOP is a function of the profits, said Mr. Mazzeo, personnel director.

In addition to the ESOP, employes get an incentive bonus which is paid monthly, and a semiannual profit-sharing program. The profit-sharing plan is subject to the approval of the 13-member board of directors, which includes two union representatives and a third union appointee.

Hyatt-Clark employes also get the voting rights attached to the stock in the ESOP, which means a voice in the running of the company.

Employes who were members of General Motor's pension plans before the acquisition are still members, but will not pay any further contributions, said Mr. Mazzeo.

Under the terms of the sale, General Motors also agreed to purchase approximately $100 million in goods from the company annually for the next three years. Hyatt-Clark presently produces tapered ball-bearings that are primarily used in rear-wheel drive automobiles.

Mr. Lowenstein, who is chairman of the board, said current projections indicated that the plant would be profitable in the first year because of operating improvements.

An initial feasibility study found the company could survive with fewer employes earning less. At the time of the acquisition, the payroll was cut to 900 from the 1600 employed originally.

The purchase of the company was also conditional upon the employes accepting a 25% to 30% cut in pay and benefits, said Mr. Howell, president and chief executive officer. He said this would be made up with incentive plan payments and also by a money fund type of pension plan.

Under this program, which has not yet been finalized, Mr. Mazzeo said the company will pay 50 cents in a money fund for every hour worked per employe up to a maximum of $2,000.

"Whereas we hope we can get all the pay cuts back, there is no guarantee of that," said Mr. Howell: "It will depend on performance and profitability."

He said most of the loans would be paid off within 10 years, and all within 20 years time.

According to Marshall Sokol, who operates a cash management consultancy headquartered in White Plains, N.Y., the advantages of ESOPs are giving them widespread use among corporations.

"There is every reason for Hyatt-Clark to survive better because of the improved cash flow, tax advantages, leverage, and credit-worthiness of ESOP financing techniques," he said.

Mr. LONG. Mr. President, I am pleased to see that the Senator from New Jersey is on the floor. The Senator from New Jersey discussed the matter to which I have just referred with me. I have been doing all I could to try to encourage the Government to cooperate in every way possible to help these employees to work together, to save this payroll. and also to save these jobs.'

Mr. BRADLEY. Mr. President, I say to the distinguished Senator from Louisiana that this is a very enlightened move on the part of labor and management. This ESOP plan is absolutely essential to the ultimately successful outcome. I agree with everything that the Senator has said and commend him for his continued leadership on the issue. I think if we can demonstrate more and more that employee stock ownership plays an enormously important part here, we might have a formula for increased productivity as well as increased jobs.

Mr. President, I thank the distinguished Senator from Louisiana for calling the Senate's attention to an important achievement by workers in my State. As he correctly described, the employees of a General Motors roller bearing plant in Clark, N.J., recently saved the plant from closing by buying it through an employee stock ownership plan (ESOP).

Their efforts at self-help are particularly welcome at a time when a weakening economy is placing increasing numbers of businesses on the brink of failure. If the Clark plantworkers are successful, their achievement could write a chapter in the history of industrial relations in this country. GM's chairman has called the Clark venture, "a milestone in American labor relations." I hope the administration and my colleagues will encourage at every opportunity the kind of self-help efforts made by the employees of the Clark plant.

Let me briefly review the facts concerning the employee takeover.

After GM announced plans to sell or close its rollerbearing plant in Clark, N.J., the plant's employees came up with a plan to purchase it. Each worker contributed $100 to pay for a feasibility study on purchasing the Clark plant through an ESOP. Using this study, the workers laid out a plan for raising capital to buy the company and to finance the necessary business adjustments. GM accepted the workers' offer and agreed to a continuing business relationship with the new company.

On October 31, 1981, a new employee-owned company was incorporated as Hyatt Clark Industries. Each worker holds an equal share of the stock. They plan to create Japanese-style quality control. The new worker/owners have taken an average 25-percent cut from their former salaries.

Their bold plan has saved some 800 of the plant's 1,700 jobs so far. They are trying to line up business to permit an increase of employment to 1,220 in the near future. The company has a fighting chance, largely because of the wage cuts and continued supply relations with GM. With success in the long run, employees can make up these cuts through bonuses and higher stock values. For now, at least they have jobs, they have hope and they have a goal.

But to make it work, they must make new investments and produce changes. This requires financing. They need assistance. I believe EDA, for example, can held them through its economic adjustment program. If Clark workers succeed, worker ownership could prove an important American weapon against unemployment and community disintegration. It could also serve as a tool for increasing productivity and growth.

Industries throughout this country face strong challenges from their overseas competitors. They are under great pressure to modernize their plant and equipment, invest in new technology and processes, improve productivity and product quality and lower prices. Making these changes under normal conditions is difficult; making them in the midst of a recession can be impossible. But failure to make them can lead to defeat in the marketplace. The problem is further exacerabted during recession because weak economic activity forces American industries to cutback and restructure their operations. If they do not do this successfully the alternative often is to shutdown.

Worker takeovers of companies on the brink of closure offer new hope for sustaining basically sound companies through hard times. I believe, under the proper conditions, worker takeovers can also provide a basis for making companies more competitive.

Mr. President, employee stock ownership arrangements offer a promising ap-

proach to many of our industrial problems. We should watch developments such as the Clark plant operations under worker ownership for lessons that may help us to improve our economic future. I commend the Clark workers for their courageous experiment and offer them my continuing encouragement. I also thank the Senator from Louisiana for his kind remarks and for his eminent leadership on the subject of employee stock-ownership plans.

ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, I ask unanimous consent that there now be a period for routine morning business not to exceed 20 minutes, in which Senators may speak for not to exceed 2 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNPRECEDENTED DEFENSE WASTE

Mr. HATFIELD. Mr. President, for the balance of this year I have attempted to draw to the attention of my colleagues the serious budgetary dangers involved with the massive rearmament program we have embarked upon.

The dangers are numerous. They involve, to name only a few, co-opting of credit markets by a Federal Government financing the largest long-term defense buildup in the Nation's peacetime history. They involve the insidious problem of the United States paying for increasingly sophisticated weaponry—weaponry plagued by unprecedented cost overruns, questionable technical proficiency, and a resulting dangerous loss of military preparedness.

I have argued that, because we seem mesmerized by sophisticated weaponry and willing to pay any cost for it, military procurement is slowly strangling funding for readiness, spare parts, manpower, and the other vital components which form the true heart of any nation's defenses.

Mr. President, we are about to enter the most difficult economic year this country has faced in many decades. The success of our program to bring Federal spending—all Federal spending—under fiscal control will be measured by the willingness of the President and the Congress to admit what the rest of the country is rapidly beginning to understand. We can no longer claim that budget control can be achieved without forcing the waste and inefficiency out of a belated defense budget, and cutting back on entitlement programs. If these two as yet uncontrolled areas of Federal spending are not soon leashed, we will be so desperately lost in unprecedented budgetary deficits that the economic recovery—and very stability—of the Nation will be gravely imperiled.

I ask that one of the finest, in-depth journalistic series in recent years be printed in its entirety in the RECORD. This series, published this month by the Chicago Tribune, is a fascinating and illuminating analysis of the complex military problems we must come to grips with in the coming year.

I commend it to my colleagues, and draw their particular attention to the concluding editorial which is a strong and cogent denunciation of present spending practices in the Department of Defense, practices which the Tribune calls "a scandal of appalling proportions."

I ask unanimous consent that this editorial be reprinted in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

REARMING AMERICA: IT'S GOING TO BE EXPENSIVE . . . AND IT MIGHT NOT WORK

(By James Coates and Bill Neikirk)

WASHINGTON.—President Reagan's $1.475 trillion plan to "rearm America" threatens to spawn another round of double-digit inflation and a new generation of expensive weapons that often don't work under battlefield conditions.

The buildup, averaging $15,750 for every individual taxpayer over the next five years, will force some painful trade-offs on the country—more arms and fewer consumer goods, higher prices and less productivity—according to experts.

At the same time, a Tribune investigation found, the Pentagon's weapons-producing system is beset with costly flaws and procedural disarray, raising questions about whether the new hardware will be good enough to defend the country.

The Reagan rearmament is taking place at a time when the military owns far fewer weapons than before. In 1956, the Air Force had 24,500 airplanes; today, 7,000. In the same year, it had 1,900 long-range nuclear bombers; today, slightly more than 400.

Also in 1956, the Air Force had 3,480 "air superiority" fighter jets and today has 661 F-15 and F-16s. The Navy in 1956 had 1,300 ships but today only 450. The Army produced 10,000 tanks in 1956 and only 750 this year.

Against this backdrop, some startling problems arise.

While weapons decline in number, the Pentagon has a record 200 major weapons systems under development. Deputy Defense Secretary Frank Carlucci concedes that the nation has too many weapons systems. Sen. Mark O. Hatfield (R., Ore.), chairman of the Senate Appropriations Committee, says many will never be built.

The Pentagon's notorious cost overrun problem has grown much worse in the last five years, with weapons costs doubling. If recent experience prevails, the $500 billion designated to buy weapons could easily climb to $1 trillion in five years.

Despite rising costs, the U.S. may not be getting its money's worth. Analysts in and out of the Pentagon bemoan today's emphasis on complicated weapons which they say may fail in the mud and heat of battle when outnumbered by Soviet weapons.

Many economists warn that the pressure put on the economy by heavy spending on weapons could return inflation to double-digit territory.

The defense industrial base, a collection of hundreds of firms supplying the military, is probably in its worst shape in history. Aging machinery and fewer companies will worsen cost pressures.

The buildup will accelerate purchase of foreign goods, benefiting employment in Japan and Europe and harming the balance of payments.

A severe shortage of technical manpower, especially engineers, to build weapons will raise costs.

As a direct result of the buildup, the United States will increasingly become the arms merchant of the world, with advanced weapons going to the volatile Third World in greater numbers.

The economic implications of this buildup fall into two distinct categories—one relating to its overall economic impact and the other to a weapons procurement system that almost every outside expert agrees is out of control.

How big the buildup finally will become is highly debatable. The administration contends that as a share of Gross National Product (GNP), the broad measure of economic output, defense spending is lower now than it was in 1965 before the intensification of the Viet Nam War. In addition, it says, spending is spread over five years and therefore will not be inflationary.

But the Reagan contention neglects how the buildup will occur. The Senate Appropriations Committee said it is the largest buildup since World War II when measured in terms of 1982 dollars.

Furthermore, the Reagan buildup differs fundamentally from others in the nation's history. It is a campaign to produce new and advanced weapons more than anything else, and therefore it will put a heavy strain on a specific sector of the economy.

"There is a substantial difference between the need to produce arms and pay soldiers to fight a hot war and a peacetime effort to boost defense capabilities," said Gary Wenglowski, chief economist for Goldman, Sachs & Co., in New York.

It is this difference that prompts fear of inflation.

In a study of the Reagan plan, Wenglowski said the Pentagon would increase spending on weapons by 14 percent above the inflation rate over five years.

This far surpasses Viet Nam's hardware buildup and is bound to be inflationary, especially in the high-technology areas where much of the new spending will occur.

Almost every economist agrees the Reagan plan will cause some inflation, but they don't agree on how much.

Instead, he said, the cuts will be made in standard equipment for fighting forces: ammunition, fuel for training flights, expensive weapons for combat training, and "the whole gamut of items that can be reduced quickly in the face of a budget squeeze."

The result of the Reagan rearming "may well be to leave our armed forces with too small a quantity of very high-priced weapons and with reduced readiness and less capacity to deploy, use, and maintain them in combat," he said.

Beyond that, analysts said, the entire procurement process is characterized by an institutional dishonesty designed to get extremely costly weapons systems approved before the truth is known.

Jacques S. Gansler, a former deputy assistant secretary of defense and now a vice president of the Analytic Sciences Corp., said that defense contractors are permitted to make unrealistically low estimates when bidding on weapons systems.

This practice is called "buying in," and every major contractor does it with the consent of the Defense Department. "Everyone—from the industry to the Defense Department and Congress—is aware that the numbers are overly optimistic," Gansler said.

Once the contract is won, the competition tends to stop. The prime defense contractor then turns to sole sources for material, supplies, and parts. Only in about eight percent of the cases is military contracting competitive.

This far surpasses Viet Nam's hardware buildup and is bound to be inflationary, especially in the high-technology areas where much of the new spending will occur.

Almost every economist agrees the Reagan plan will cause some inflation, but they don't agree on how much. The degree of inflation

hinges on many factors, not the least of which is whether the civilian economy is booming or in recession during the maximum buildup in 1984 and 1985.

Robert Gough's prediction of a 2.5 to 3.5 per cent inflation increase is based partly on an estimate that industry has not invested sufficiently to meet the defense requirements.

In an era of tight money and high interest rates, many economists fear the Reagan defense plan will soak up investment funds from the economy used by civilian companies. There is only so much money to go around in a tight-money market.

Many fear that the rush of capital into the defense industry will raise interest rates for others, forcing them to forgo needed investment to modernize their companies. That, in turn, will make the U.S. less competitive in world markets.

"If we're going to have an age of defense step-up, we'll lose our competitive edge, vis-a-vis Japan and Germany, if we allow them to maintain their one to four per cent share of military spending to GNP," said Otto Eckstein, a former Johnson administration economist.

In short, the analysts say, the rearmament could lead to a less productive U.S. economy with more expensive goods in the civilian sector. It is investment in civilian plants, not defense enterprises, that creates the efficiency needed to keep pace with other countries.

George Berman, president and chief executive officer of Unitrode, Inc., a military subcontractor in Lexington, said the arms buildup lowers the standard of living because the wealth poured into the weapons is not used over and over again.

Another side of the defense debate deals with cost overruns. Charles Shultze, former Carter administration economist, said the investment in huge weapons systems would ultimately weaken the nation's defenses.

When the overruns begin, Schultze said, an effort will be made to slash them in the name of controlling the budget.

Once the contract is won, the competition tends to stop. The prime defense contractor then turns to sole sources for material, supplies, and parts. Only in about eight per cent of the cases is military contracting competitive.

"Buying in" is only one of many practices that analysts say must be corrected to bring some sense back to the military procurement business.

But reform is not easy, and many analysts believe there is one good reason why.

Weapons systems often are built through efforts of the "Iron Triangle," a loose affiliation among congressmen, selected companies, and Pentagon officials who favor a given weapon for profits or political reasons rather than its military effectiveness.

House Majority Leader Jim Wright (D., Tex.), for example, bragged to his Ft. Worth constituents that he had "personally appealed" to the House Armed Services Committee and won reinstatement of the F–111 fighter and the A–7 attack plane after the panel had decided these weapons were no longer needed.

"General Dynamics, Bell Helicopter, Vought Corporation, Menasco, and others have a strong, effective advocate," read one Wright ad in the Texas Jewish Post on election eve.

"More than once both GD's F–111 and Vought's A–7 aircraft were left completely out of the defense budget," the ad said. "Jim Wright personally appealed to the House Armed Services Committee and turned the vote around, putting both weapon systems back in the budget—repeatedly."

A study of General Dynamics by the New York-based Council on Economic Priorities noted that between 1970 and 1979 there were 239 military and civilian Defense Department employees who left the Pentagon and joined the GD payroll in Ft. Worth and elsewhere. During that time 32 GD executives left the company and took jobs as top Pentagon executives.

Deputy Defense Secretary Frank Carlucci surprised many industry insiders at a meeting of the elite "Old Crows" club, made up of major arms industry executives here, when he warned the businessmen they were risking national security.

Efforts to press for favorite weapons systems are raising costs, Carlucci warned. He then told the contractors: "We must all lift our sights and think of more than our program or weapon system. We must think of national objectives."

The revolving door through which many "Old Crow" members have passed at least once from the Pentagon to the board room creates "constituencies" for weapons systems, say such experts as Norman Augustine of Martin Marietta Corp.

Dr. James Wade, the No. 2 engineer at the Pentagon, cited the Patriot missile as an example of a weapon that enjoys a constituency. The Patriot, a truck-borne ground-to-air missile, has been in research and development since 1962, Wade noted.

During that time, the missile has been designed with various guidance systems as both the technology advanced and the Soviet threat changed.

To date the Pentagon has spent nearly $8 billion developing the missile, including an additional $1.7 billion last year. In announcing additional spending, Pentagon officials said they would buy only 18 of the missiles instead of 24 this year to "stretch out" production until further tests are finished.

Meanwhile, Wade acknowledged, the Army has spent $7 billion for a missile that is not yet in use.

"We have to get the costs (of weapons) under control and demonstrate we are buying them efficiently," said Wade. "Otherwise we are going to lose the support of the American people.

"If we lose that support," he added, "we are going to lose the national security, too."

PENTAGON: GOLD GOES IN, BRASS COMES OUT

WASHINGTON.—The Pentagon, an appropriately gray and hulking behemoth of a building rising out of what once was a swamp on the Potomac River, is the nerve center to the 2 million uniformed military people and 300,000 civilians who make up the Defense Department.

From its Command Communications and Control Center, sunk deep into the Appalachian bedrock below the five-sided building, to the Pentagon's blue halls on the fourth floor, roughly 25,000 generals, admirals, privates, airmen, pilots, janitors, and others keep the world's second-largest military establishment humming.

These people will spend $208 billion next year buying weapons, designing atom bombs, training recruits, and otherwise defending the United States under the guidance of Caspar Weinberger, the current defense secretary.

And so "the Pentagon" has come to symbolize the Army, Navy, Air Force, Marine Corps, and civilian bureaucracy that administers and spends the defense budget. Over the next five years, if President Reagan's plan to "rearm" America is implemented, the average taxpayer will have contributed $15,000 to support the Pentagon.

DEFENSE OVERRUNS START WITH FAT ON PASTRAMI

WASHINGTON.—Though the causes of the Pentagon's multibillion-dollar annual cost overruns are often complex, sometimes they are as simple as a $15 pastrami sandwich or the Air Force's custom flashlight.

Rep. Les Aspin (D., Wis.), long a critic of Pentagon programs, documented the costly sandwiches served in Defense Secretary Caspar Weinberger's personal dining room.

Aspin obtained a copy of the menu at the Pentagon galley, where only Weinberger and 100 other top officials are permitted to lunch. He noted that it offered broiled Delmonico steak for $3.55, a choice of mushroom soup or "cold peach soup with limes" for 55 cents, and a hot pastrami on rye with coleslaw and potato chips for $2.

Invoking his congressional powers and the Freedom of Information Act, Aspin learned that the Pentagon had spent $313,588 for staff salaries and food at the VIP dining room.

Furthermore, reported the manager of the Secretary of Defense Mess, 26,004 meals had been served there in 1980; spending $313,588 to serve 26,004 meals averages about $12.06 a meal.

Aspin complained that "for a hot pastrami sandwich this is a wee bit steep—no matter who you get to dine with." He urged Weinberger to "start his hunt for Pentagon waste right at his own lunch table, where a meal built around a pastrami sandwich costs $15."

Aspin obtained the $15 figure by adding the average cost per meal actually paid by Weinberger and associates—$2.87—to the $12.06.

The tale of the Air Force flashlight was disclosed by James Fallows, author of the controversial book "National Defense," which an Air Force official recently charged is part of a plot to "reorder" U.S. defense policy.

Fallows recalled that when the late Gen. Curtis LeMay was Air Force chief of staff, officers decided that pilots needed a more reliable flashlight to read maps in the cockpit.

A committee was formed to design it, and one member decided that the flashlight should have a button to turn it on and off rapidly so it could double as a signal flashlight to send messages.

Another expert decided it should have a red lens as well as a clear one so pilots could read maps without lessening their night vision.

Then, Fallows said, it became necessary to design the flashlight to meet "military specifications" so it would work in the Sahara or at the North Pole.

Next, it was decided the flashlight should be a "Tri-Command Flashlight" to be used jointly by the Strategic Air Command, the Tactical Air Command, and the Air Defense Command.

"All added their requirements," Fallows said, quoting a retired colonel familiar with the program. "By that time, the thing was so huge that you couldn't fit it in your flight suit—hell, if you had to bail out, you'd never take it with you, so what was the point of all the sign flashing or the heat and cold requirements?"

Ultimately only 100 of the flashlights were produced and they were stored at Andrews Air Force base near the Pentagon.

One night, Fallows continued, LeMay himself was at Andrews and noticed the stacks of flashlights as he was preparing for a flight.

LeMay opened the airtight wrapping of one, pressed the button, and nothing happened.

"So they peeled the airtight wrapping off one of them, got out a new battery—and it just wouldn't work," the colonel told Fallows.

A third was tried, but the button wouldn't function. Finally, one was made to work "but that was the end of the Air Force flashlight," he said.

Today pilots use a $1.50 Japanese-made flashlight sold at most drugstores, several pilots said in interviews.

CHEAPER JETS SHOOT DOWN CLAIMS FOR NEW MODELS

(By James Coates and Bill Neikirk)

LAS VEGAS, NEV.—In the shimmering blue skies north of here, nine miles straight up over Dog Bone Lake, the Navy's admirals and the Air Force's four-star generals received a nasty surprise. Their "magic airplanes" let them down.

The proud "air superiority fighters," F–15s and F–14s costing upward of $30 million apiece, had been fought to all but a draw by a comparatively crude $4 million airplane, the F–5 that Northrop Corp. builds for export to small countries.

What happened above the Nevada desert in the late 1970s in hundreds of simulated-combat tests has triggered a major debate over whether the United States is sufficiently protected by its high-technology weapons.

The debate is sometimes called "quality versus quantity" at the Pentagon. At issue is whether the U.S. is choosing small numbers of very advanced and astronomically expensive devices, like the F–15 Eagle and the F–14 Tomcat, that can be overwhelmed by larger numbers of simpler and far cheaper weapons wielded by an adversary.

A growing number of critics in the Pentagon, Congress, and the defense industry warn that problems of reliability may arise from the way weapons are acquired. This procurement crisis, involving hundreds of billions of dollars, threatens to add significantly to the cost of weapons and to increased inflation pressures already caused by the administration's defense building.

The grueling battery of jet fighter tests, called ACEVAL AIMVAL, indicated that the military and its congressional supporters woefully overestimated the new airplanes' effectiveness against the cruder aircraft they probably would encounter in a pitched battle, said retired Air Force Col. Robert Fay, who helped design the test.

The implication of such tests, suggest other analysts such as warfare specialist Pierre Sprey, is that if the high-technology airplanes fail, there is an equal danger that other "state-of-the-art" weapons—modern tanks, computer-guided missiles, laser-aimed guns, and the rest—also may fail in the chaos, mud, and fear of combat.

Fay told The Tribune that when he first met at the Pentagon with commanders to plot ACEVAL/AIMVAL, the Joint Chiefs of Staff had obtained a computer study predicting that either an F–15 or an F–14 could down 74 less complicated jet fighters before itself being "killed."

That prediction became a hollow joke five years later when the mock battles were over and after many of the pilots who flew F–5s and F–15s and F–14s against each other had become lifelong enemies because of the intense competition they endured.

After flying hundreds of dogfights against inferior airplanes, the Eagles and Tomcats had averaged only 2.5 kills against F–5s before themselves being shot out of the air, Air Force reports to Congress indicates.

The Air Force is reluctant to discuss ACEVAL/AIMVAL. A Tribune reporter, originally assured that Pentagon officials would grant interviews at Nellis Air Force Base here, was turned away by base officials.

"You are really talking about something that can get a lot of people in trouble," said one former F–15 pilot. "There is a lot of debate about whether the tests were fair. We were told to expect a kill ratio of 50 or 75 to 1 and you know damn well that didn't happen," he said.

Franklin C. Spinney, author of one key ACEVAL/AIMVAL analysis, concluded that the main lesson learned in spending roughly $100 million on the tests is that human spirit and cunning are often more important than the quality of weapons.

In a briefing entitled "Defense Facts of Life," Spinney shows commanders and other audiences a series of 87 slides using the F–15 and F–14 to illustrate what can happen if the country becomes too reliant on "magic" high-technology weapons.

The point Spinney emphasizes is that regardless of whether the weapon is a tank, a ship, or even a rifle, the more complex it is, the more likely it is to fail in the "friction" of battle.

"Friction is bad weather during the Battle of the Bulge, contagious panic in France in 1940, an empty prison at Son Tay (where U.S. commandoes failed to rescue Viet Nam war prisoners), and the dominant characteristic of the Iranian rescue mission (scrapped when helicopters and planes failed)", says Spinney.

Commanders often draft plans based on absurd assumptions about the effectiveness of some weapon, the Pentagon analyst charges.

For example, Spinney ridicules a chart used by the Air Force weapons branch to persuade the Joint Chiefs to buy a missile called AIM–82. The chart asserted that an F–15 with an AIM–82 missile would enjoy an exchange ratio of 955 to 1 in combat with a Soviet MiG.

"In other words," said Spinney in his slide briefing, "for every F–15 lost, this analysis predicted that we would shoot down 955 enemy fighters. Now recall that the F–4 (a much less advanced jet) achieved 2-to-1 in Viet Nam, so 955 to 1 represents a rather revolutionary improvement."

After the claim was challenged, the Air Force decided "at the four-star level" not only that the 955 kill ratio was absurd but also that the AIM–82 wasn't worth building, said Spinney.

But Spinney warned that such exaggerations are seldom corrected before a weapon is built. "What might normally be put into the category of pure hyperbole acquires the aura of scientific reasoning and 'brilliant weapons' do seem plausible," he said.

The ACEVAL/AIMVAL test may predict the sorts of problems the rest of the military can expect, says Spinney. While the Army and Navy were decreasing the number of their weapons during the last decade, the Air Force devoted much of its energy to building the fighter wings of the tactical air branch.

So, said Spinney, the problems facing the F–15 today may be smaller to those facing the $3 million-per-copy XM–1 main battle tank, the $1.2 billion per copy Aegis fleet defense cruiser, and other "state-of-the-art" weapons in a few years.

President Reagan's $1.475 trillion, five-year arms buildup will bring the same sort of acceleration to the Army and Navy high-technology programs that the Air Force already brought to the fighters. Spinney noted that in 1980, tactical air was reeciving 58 per cent of the Air Force budget.

Since Viet Nam, spending on tactical airplanes has increased 10 per cent annually, said Spinney.

An F–15 now costs roughly $27 million, according to the latest Pentagon "program acquisition report." The F–5s, acquired by the Air Force to fly against the F–15s in ACEVAL/AIMVAL, cost $4 million each.

How did this relative bucket of bolts, the F–5, make such a good showing against the $3 million F–15 and the $35 million F–14?

"They just did not consider the human element, the man in the loop," said Fay. "Wars are fought and won not by weapons but by the decisions and sacrifices of people," he said. "Wars are also lost by people. People become terrified, confused, and lost in the horrors of battle."

Fay recalled how in arranging the tests he had difficulty finding veteran pilots willing to fly the F–5s against the new F–15s and F–14s just then coming on line at the Air Force and the Navy.

"We all believed in our airplanes, and nobody wanted to be on the losing side," recalled one flier who ultimately flew the F–5s as part of the "Red" team simulating enemies.

The F–14s and F–15s were designated the Blue team and flown by a cadre of top pilots who trained for two months at bases around the country, recalled Fay.

One "Blue team" trainer said in an interview at his West Coast home: "We got so we knew every rock, brush, and hill on that desert. We thought we were really going to be ready for those (F–5) guys.

Fay said an unorthodox pilot named Murray Sloans was persuaded to lead the "enemy" squadron of F–5s. "He was the most unlikely looking air ace you could imagine," recalled Fay fondly. "He was bald-headed, pot-bellied, and bandy-legged, but he could drive airplanes."

During the coming months and years, the pilots in the F–5s came to rely on unorthodox techniques to defeat the magic planes and missiles used in today's air wars.

One maneuver that proved particularly effective against the superplanes was a parody of the famous "thunderburst" pattern flown by such air show entertainers as the Blue Angels.

In this movement, said an F–15 pilot, the F–5s would swoop up near a group of four F–15s, and then at the last minute, each plane would veer off in a different direction.

"Now that is not the kind of flying that anybody would dare try in a real battle, where screwing around could get you killed, and it really confused the guys who were flying 15s by the book," said the pilot who helped train the Blue team.

"The trouble with tests like this is that nobody is really risking their life, so they will try things that nobody would dream of if his life were really at stake," said this expert. "Being unafraid to 'die,' Murray's guys could pull off their thunderburst pattern and 'kill' us," he said.

But Fay has concluded that the tests really illustrated that human weaknesses will always limit the effectiveness of war machines. He noted that the key to the test was complexity.

One maneuver that proved particularly the big planes," he said. "The 14s and the 15s could score a kill nearly all the time."

"But as the numbers went up, such as two F–5s against one F–15 or four F–5s against four F–15s, the picture changed dramatically," said Fay. "Suddenly all the magic weapons were failing."

Other analysts of ACEVAL/AIMVAL, such as Spinney, have concluded that the complex radars and other systems in the big planes became confused as the number of combatants increased.

As a result, the read-out on the pilot's "heads-up" display screen in the cockpit became more confusing than the flier could cope with, and the only way he could continue was simply to look out the cockpit window.

"Once you are looking out the window it doesn't matter all that much what plane you're flying. Then it comes down to two platforms carrying roughly the same missiles and other weaponry," said Fay.

So in the minds of critics such as Fay the weapons that look good in the computer runs and on paper fail to live up to their billing.

One "Red Team" flier who flew more than 600 missions in Viet Nam recalled how F–5 pilots worried that the advanced F–14 and F–15 would be devastating.

Among the devices the F–5 fliers feared was the "off-bore sight" in the F–15 that allows the pilot to fire and guide the missiles by looking through a sight built into his helmet.

This "evil eye" missile, however, proved slower than the ordinary heat seeking and radar-guided Sidewinder missiles carried by the F–5s, the flier said.

"Sometimes our 15s were killed by a missile

fired (from an F–5) after the 15 fired his," said the pilot ruefully. Spinney has noted that the Sidewinders cost as little as $10,000 apiece while the helmet guided missiles cost roughly $150,000 each.

At the Pentagon, Dr. James Wade, deputy director of research and development, discounted suggestions that the high-technology airplanes proved inefficient in the tests.

Instead, Wade argued, the tests restricted the F–15 and F–14 plots from using some of their most potent weapons, especially missiles that can be fired at an enemy plane from beyond visual range (BVR).

Using such weapons, the superplane would have fared better, said Wade. Instead, he said, the unorthodox antics of the F–5 fliers took advantage of the superplanes.

In a description of the tests prepared by the Pentagon for The Tribune officials working for Wade said:

"The Red Forces (F–5s) tended to make the decision to attack beyond visual range and without sophisticated radar thereby considerably biasing some outcomes by avoiding engagements not clearly in favor of Red Forces.

"Red tactics exploited weakness of the Blue System (F–15s)," the Pentagon experts added.

Such shortcuts would be less likely in a real battle, said Wade.

However, he acknowledged that well laid plans often go wrong when put into action.

"Yes," said Wade, "I agree that our equipment and personnel are subject to Murphy's law ('What can go wrong will go wrong'). But I would remind you that Murphy's law also works behind the Iron Curtain."

IS ARMY ON THE WRONG TRACK WITH ITS NEW TANK?

WASHINGTON.—The monster tank rolled off a truck and into an exhibit hall of the Shoreham Hotel, where proud Army officers smiled at what wonders modern technology had wrought.

All was well until the soldier operating this machine put on the brakes. The tank kept going, stopping only after it had struck a Swedish military truck nearby, said a businessman who attended the trade show.

This is the XM–1 Abrams main battle tank, the turbine-engine, laser-gun killer that is supposed to be the apple of the Army's eye. To many critics within and without the Pentagon, it is a lemon.

Such embarrassing breakdowns keep happening to the tank despite the Army's continued assurances that most of the flaws have been corrected. Critics say the tank is neither safe nor effective.

The XM–1 tank is criticized as a costly gas-guzzler that is too heavy to transport and to cross the bridges of Europe, with an engine so hot that it burns nearby trees and attracts heat-seeking missiles. Furthermore, it has a history of breakdowns that tarnishes its reputation as the world's fastest tank.

The tank's latest problem involves the hydraulic fluid in the system that turns the turret and other parts. In tests this year, the tank twice suffered fire damage after a high pressure hose burst.

The fluid was supposed to be fire-resistant, but that turned out to be false, according to a report obtained by The Tribune. Its burn point was 216 degrees and its flash point 425 degrees. The engine has temperatures anywhere from 900 to 1,300 degrees.

"Any conception that its (the fluid's) use makes the Abrams tank fireproof is in error," the report said. "A substitute, more fireproof fluid should be used. As an interim solution, this hose should be shielded to divert any spray away from the hot engine."

To the Defense Department analyst and consultant who asked not to be quoted by name, the fluid leakage incident meant that the tank's fire extinguisher system failed to do its job and put out the flames.

In the 1973 Israel-Arab war, he said 300 Israeli tankers were killed because of hydraulic fluid burns. The M–60 tank—America's current main battle tank—was involved in that war, he said, but it only points out how important the fluid is.

But this is not the only problem found in the recent operational test. The report reads like an American tragedy called the Crisis of Quality:

The knob on the gunner's primary sight fell off under normal use because the "snap rings holding the knob on are insufficent." For want of a knob, the gun can't be aimed.

Cables came loose in the commander's weapons panel, causing a short. Switches on the computer panel stuck. Indicator lights failed. Metal in the gear case cracked under normal use.

The final drive train must be disconnected with a 15MM metric wrench, which is not in any ordinary mechanic's tool kit. Without it, the tank can't be towed and the engine can't be pulled out.

"Since the bolts are countersunk, an adjustable wrench cannot be used," the report said. "This is a significant maintenance burden. . . ."

Compared with other criticism leveled at the tank, made by the Chrysler Corp., these are minor.

Although the tank is supposed to go from zero to 50 miles per hour within a few seconds, it uses 3.8 gallons per mile. In the latest operational testing, it went 43 miles before it had to undergo maintenance.

The defense analyst said it fails about five times as often as the M–60, and when it fails, it take an average of nearly three hours to fix it.

The tank had an early problem of throwing its treads. But the cure turned out to be worse than the disease. The treads were tightened, increasing the gas consumption. But when the tightened treads were thrown, they went to the inside, making the final drive fail, a much more serious problem, the analyst said.

In development tests conducted over the last summer by engineers, it was found that only 21 per cent of the tanks could survive 4,000 miles without an overhaul on the engine, the gear box, transmission, or final drive. The Army's required percentage was 50 per cent.

At the same time, in the same test, for every hour the tank operated, it took 1.7 hours for maintenance, well above Army requirements. In an operational test conducted by mechanics, it actually took 2.9 hours for maintenance for every hour of operation.

The M–60 tank, on the other hand, requires 40 minutes for maintenance for every hour of operation.

The tests also cited several hazards, including an automatic door housing the ammunition. It seems soldiers keep getting their fingers caught in the door.

The defense analyst said the Army is in the midst of an $800 million improvement program of the tank's armor because an unspecified round had penetrated it. "Remember, this is the magic armor that is supposed withstand all this stuff," he said.

He said it appears the round that penetrated the armor was a more primitive type that rams through the steel by force of velocity. More modern rounds melt their way through the armor, but the M–1 as been designed to prevent that.

"The old-type hard shots are what it doesn't work against," he said.

"The armor is thinner at the rear of the tank," he said. "That means that simple infantry rounds—hand-held rockets if you will—will go through the rear of the tank more easily than the M–60."

Further, he said, if the "new" armor is penetrated, it tends to crumple, and a whole panel has to be replaced. In other tanks, a hole in the armor can merely be plugged and the tank can go on its way.

The commander's 50-caliber machine gun is difficult to aim because of power control problems, the analyst said, and another machine gun is fixed in the same direction as the main gun. A third gun is mounted on a ring, he said, but "the mount keeps breaking off."

Machine-gun effectiveness is highly important to a tank, he said, because it "cleans" a battlefield of enemy soldiers who could otherwise disable it.

Critics claim that the M–1 tank has never been battle-tested in the sense that it has never been fired upon. That would be one good way to determine its effectiveness, they say. But testing the tank would be expensive. Each tank now costs nearly $30 million a copy.

[From the Chicago Tribune, Dec. 8, 1981]

MILITARY "MALADY" COULD ENDANGER U.S. SURVIVAL

(By James Coates and Bill Neikirk)

WASHINGTON.—They call it "the procurement sickness"—a malady that many analysts of the Pentagon's weapons-buying procedures warn is fueling inflation and endangering national survival.

It is a sickness that threatens to drain dollars from President Reagan's $1.475 trillion defense buildup into expensive weapons that often don't work under battlefield conditions, adding to the cost pressures already generated by rising defense expenditures.

The symptoms of the disease are everywhere:

The XM–1 main battle tank was supposed to cost $1 million per copy but now has increased to $3 million. It burns a gallon of fuel to travel 1,320 feet—roughly a par-four hole on a golf course.

The airplane that is supposed to deliver the fuel-guzzling XM–1 tank to the battlefield is the C5A, notorious for its $4 billion in overruns caused largely by the fact that its wings started falling off. The C5A is the only American plane large enough to carry the XM–1 tank, yet it can carry only two of the monster tanks at a time.

A new armored personnel carrier named for the late Army Gen. Omar Bradley is several inches too wide to fit through the cargo doors of the C–141 cargo plane assigned to carry it to a war zone.

The Division Air Defense Gun (DIVAD) is called the "world's most expensive gun" by Sen. Mark O. Hatfield (R., Ore.), chairman of the Senate Appropriations Committee. Yet DIVAD "failed to hit maneuvering targets" in tests of its mission to destroy Soviet helicopters and planes attacking U.S. ground troops in Europe, he said. It alone was responsible for $32 million in cost overruns last year.

The 1982 military budget sets aside $531 million to build 12 YAH–64 helicopters, designed to drop bombs and fire the yet undeveloped HellFire missile at enemy tanks. Yet, said Hatfield, the helicopter's prototype crashed.

The appropriations chairman called for cancellation of these and several other weapons, charging that building such questionable hardware threatens the economy and national security alike.

"If the proposed massive expenditures on defense are not scrutinized now, we will experience an explosion in costs in the immediate years ahead that will effectively destroy the effort to strengthen the military and balance the federal budget," he warned.

Yet the procurement sickness eats away at federal dollars without any effective reforms. That's because it is a complex ailment resistant to most ordinary measures to control costs.

For example, Hatfield said the Army's efforts backfired when it tried to make the

XM–1 the world's fastest tank by installing a turbine engine like those used in airplanes.

The problem, Hatfield said, is that although the tank can perform like a drag racer in short tests, going from zero to 50 miles per hour in a few seconds, the average tank breaks down every 43 miles and then takes 2.6 hours to repair. Those breakdowns are "making the XM–1 the slowest tank in the world," Hatfield concluded.

Another fact apparently overlooked by the Army is that the turbine engine generates tremendous heat, giving off exhaust at 900 degrees Fahrenheit and above. "Troops cannot walk behind (the tank) and (it) cannot be used in a dry woods," said Hatfield.

Furthermore, Hatfield learned the tank is too heavy for many of the bridges in Europe where it is likely to be used. Finally, he said, some bridges that can withstand the tank's weight are too narrow for it.

Another Republican, Sen. William Roth (Del.), co-author of the Kemp-Roth tax cut-balanced budget measure favored by President Reagan, has warned that U.S. military procurement is so costly and slow that the Soviets are building vast supplies of weapons while American factories turn out only a relative handful.

For example, a Roth study found that the Soviets produced 3,000 tanks in 1980 while the U.S. made only 750.

Yet the procurement sickness eats away at federal dollars without any effective reforms. That's because it is a complex ailment resistant to most ordinary measures to control costs.

The principal causes include:

A system under which contractors are permitted to submit unrealistically low bids on weapons systems, only to run up the costs once they have landed the contract.

Prolonged research and development of weapons systems, where much of the real cost lies.

An overemphasis on "gold-plated" weapons and the best technology available.

A revolving-door relationship between officials in the companies that produce the weapons and officials in the Defense Department, which designs and orders the weapons.

Powerful constituencies that protect and nurture weapons systems. They are in the Pentagon, where some officers dedicate their careers to a single weapon. They are in Congress, where senators and representatives try to protect defense contracts in their districts. And they are in business and labor, where profits and jobs are paramount.

In a written study of flaws in defense procurement, Hatfield used the XM–1 tank to illustrate the problems as the military concentrates on "wonder weapons" but neglects pragmatic questions such as whether the tank can be shipped to where it must fight.

For example, a Roth study found that the Soviets produced 3,000 tanks in 1980 while the U.S. made only 750. The Soviets turned out 11 submarines to one for the U.S.; 30 manned bombers to none for the U.S.; 1,300 Soviet fighters to 650 for the U.S.; 350 Soviet transport planes to none for the U.S.; and 700 Soviet helicopters to 175 for the U.S.

Pointing to high U.S. arms budgets and small outputs of weapons, Roth told a recent Senate hearing: "The Russians have in recent years consistently outdone us in terms of numbers of weapons produced. We have, in effect, been engaging in 'gold-plated' unilateral disarmament. . . . At least in terms of sheer numbers of weapons, we have spent more money and have less to show for it."

Furthermore, Roth said, American arms buying procedures are "too complicated, too lengthy, and, in the end, far too wasteful and expensive."

Wall Street analysts, too, are expressing concern about a dangerous national reliance on "gold-plated" weapons that can be produced only in small numbers while the Soviet war machine churns out far more copies of most hardware.

Wolfgang H. Demisch, a leading defense stock analyst with the brokerage firm of Morgan Stanley & Co., Inc., examined Pentagon buying and concluded that overruns are imperiling national security.

Demisch all but ridiculed Reagan administration officials and congressional figures who debate whether to increase arms budgets by 5 percent, 10 per cent or some other amount.

He noted that a Morgan-Stanley study of 41 major weapons being built by 21 contractors found that each weapon overran an average of 112 per cent. For every dollar the companies promised they would charge, the government was eventually billed $2.12.

"Given that the initial cost estimates are typically off by over 100 per cent, it seems unfruitful to debate at length whether 7 percent or 10 per cent is the most appropriate rate of growth for defense spending," Demisch said.

The companies stand only to profit when weapons overrun costs, he warned. "There is no penalty within the system for failing to meet your cost objectives," Demisch said in an interview.

With only a limited amount of money available to buy arms, the overruns and the trend toward building more advanced—and costlier—weapons forces a large reduction in quantity and threatens security, concede Roth, Demisch, Hatfield, and many others.

"The best illustration (of shrinkage) is the Navy, whose active fleet has fallen from 976 vessels in 1968 to 469 today, while its aircraft inventory has dropped from 9,300 to 6,200," said Demisch. "Air Force and Army reductions have been of similar magnitude," Demisch added.

Dina Rasor, director of the Project on Military Procurement, a taxpayer advocate group, said the problems underscored by today's critics have concerned Pentagon leaders since at least the 1960s when Defense Secretary Robert S. McNamara boasted that he would bring to Washington the cost-management techniques he had developed as president of the Ford Motor Co.

McNamara introduced the "total package procurement" program requiring contractors to agree to a fixed price for a weapon that would take several years to build.

A. Ernest Fitzgerald, a Pentagon analyst involved in Air Force weapons programs, has documented at length how McNamara's "reform" failed, creating the conditions that allowed the Lockheed C–5A Galaxy cargo jet to overrun by nearly $4 billion.

The day McNamara announced the C–5 project, it was hailed as the "miracle of procurement," Rasor recalled.

Fitzgerald, who gained national attention as a "whistle blower" for disclosing the C–5 overruns, has noted in his book, "The High Priests of Waste," that this project shows that weapons procurement is as flawed today as it was in 1966 when Lockheed outbid McDonnell Douglas Corp. and Boeing for the giant cargo jet.

All three companies, Fitzgerald said, set out to produce big jets. Boeing's is today known as the 747; McDonnell Douglas is the DC10. McDonnell Douglas and Boeing built their giant jets for the airlines after Lockheed won the C–5 contract for $1.4 billion.

By bidding $1.4 billion—a sum far below the roughly $6 billion ultimately spent—Lockheed was able to "buy in" on the contract with an offer far less than the real cost.

Such buy-ins are an epidemic today, according to numerous reports such as those of Morgan Stanley and the congressional General Accounting Office which show that nearly every weapon built today has overrun by at least 100 per cent.

The low buy-in bid, followed by an overrun, of course, means that for a given amount of money, fewer weapons can be built. That, in turn, means that the military becomes weaker than the commanders and Congress had promised when the project was approved.

A common reaction to these overruns is to stretch out acquisition, taking longer to build the arsenal. For example, the Army decided to stretch out the XM–1 battle tank by acquiring only 350 this year instead of more than 700 as planned when the tank was priced at $1 million instead of $2.7 million, the current overrun figure.

Analysts also emphasize that political forces play a big role in accelerating arms costs. Congressmen press for some weapons simply because they are built by factories in their home districts.

In the Pentagon and on the staffs of the House and Senate Armed Services committees, people build their careers around expertise on a weapons system.

Defense contractors often are centered in areas represented by members of Congress with authority over arms budgets. For example, it has long been noted that much of the defense industry is concentrated in the South, where states have produced several important Armed Services Committee chairmen.

The Lockheed C–5 was built in Georgia, for example, home of the late Sen. Richard Russell (D.), leading Pentagon supporter. Similarly, much shipbuilding took place in Mississippi, home state of Sen. John Stennis (D), another major Pentagon supporter.

Texas, the home of former President—and Senate Majority Leader—Lyndon Johnson and today's Armed Services chairman, John Tower, boasts the major factories where General Dynamics makes F–16 jet fighters, the Bell Helicopter company produces its wares, and Boeing performs major work on the B–52 bombers and KC–135 tankers as well as many other defense plants.

General Dynamics' corporate headquarters and those of McDonnell Douglas are in St. Louis, providing jobs for thousands in the home district of the House Armed Services Committee chairman, Melvin Price (D., E. St. Louis).

Sometimes congressmen freely admit that they support certain weapons not on their merits but to help their constituents. For example, during the debate over whether to fund the B–1 bomber this year, Rep. Lyle Williams (R., Ohio), made a speech on the House floor saying he wants the airplane "because it would mean over 16,000 jobs for Ohio."

Many defense industry executives leave companies for the Pentagon and then later return to private industry.

A study of this revolving door by the New York-based Council on Economic Priorities found that 1,641 Pentagon workers, usually lieutenant colonels or above, had been recruited to work for 10 major contractors between 1970 and 1979. During the same period, 223 executives of the 10 firms joined the Defense Department.

Such moevment creates "constituencies" for certain weapons, especially those that are extremely complex and probably will require a long time to design and produce—time during which interested parties will have jobs, Rasor said.

James Wade, deputy director of research and engineering at the Pentagon, estimated that it takes 10 years to produce a weapon. The weapon is used in the armed forces for 20 years and gradually retired over the next 10 years, he said.

Most of the jobs spawned by weapons open during the production phase, he noted. "So, yes," said Wade, "I would acknowledge there is some pressure to keep things in research and development by some parties."

"The Congress and the military bear a huge responsibility" for such slowdowns, said Demisch. "Slowing things down is the best way to have a cost overrun."

These tactics also eliminate competition among companies from the weapons-production process, said Rasor. "A lack of competition narrows the industrial base, raises the cost, and lowers the quality of our weapon systems," Rasor said.

"When procurement policies fail, the taxpayer not only loses money but also loses a measure of national security," she added. "The taxpayer has a right to expect weapons that work consistently and that are delivered on time and at cost."

WEAPONS NO BETTER BEYOND IRON CURTAIN

WASHINGTON.—The new Soviet MiG–23 jet fighter has turned out to be as sluggish and bulky as an American F–105. And the MiG's engine belches smoke, often making it a sitting duck in a dogfight.

The Russian-made T–72 battle tank isn't as fast as an old-fashioned American M–60. The Soviet armor isn't very thick, either.

For Pentagon analysts, deeply concerned about whether the United States is becoming too reliant on a small number of complex weapons, take comfort from intelligence reports that the Soviets may be moving in the same direction.

The problem of quality versus quantity apparently exists on both sides of the Iron Curtain.

Copies of one briefing being given to Pentagon officials and others, which was obtained by The Tribune, indicate, for example, that both the jet fighters and battle tanks are giving the Soviets the same type of troubles that beset American high-technology weapons.

This briefing by defense analyst Pierre Sprey focuses on the Soviet MiG–23 jet fighter—one of their best—and the new T–72 tank being built in a factory with more than 2 million square feet of space at Nizhniy Tagil.

U.S. analysts also have noticed that the Soviets are making the more complicated MiG–23 at only two-thirds the rate Russian factories produced the earlier MiG–21 fighters. The 21s now are dispersed to Third World and some Warsaw Pact countries.

The apparent cause of the MiG production problems is efforts to install better radars, more powerful engines, and new weapons including a new type of radar missile, Sprey's analysis shows.

Similar efforts to modernize U.S. fighters have greatly decreased their annual production, Sprey and others have observed.

A similar situation has been noted by U.S. intelligence regarding the Soviet T–72 battle tank. That tank was compared with the American M–60 tank, the weapon produced before the controversial XM–1 was designed.

The big new Soviet tank breaks down 50 to 75 per cent more often than the American M–60. It will only go 15 miles an hour while the U.S. model can sustain speeds of 20 miles an hour in combat. The heavy T–72 also runs out of gas substantially faster than the M–60.

Sprey argues that intelligence reports appearing here indicate these weapons may be encountering the same difficulties under battlefield conditions as the U.S. fighters and the new XM–1 battle tank.

A leading Pentagon expert on weapons design, Sprey compared the MiG's difficulties with those of the main U.S. "air superiority fighters," the F–15 and F–14 which have smoking engines.

In three interviews, pilots who asked not to be identified complained that their plane engines make combat dangerous because they emit smoke.

"Hell," said one flier, "There's a movie out now called 'Final Countdown' where the (aircraft carrier) Nimitz goes back in time to Pearl Harbor Day and all the 14s in the movie smoke."

On Nov. 1 the Air Force acknowledged that it had tried to solve the problem by "tuning down" the F–100 engine used in the fighters. This, in turn, reduced the planes' ability to execute certain aerobatic maneuvers such as entering sudden steep dives.

The "tune-downs" had occurred weeks before the announcement, and the pilots who were interviewed told a reporter they agreed to talk briefly only to express unhappiness over the lack of an announcement.

"We already had a plane they said would exceed Mach 2 just in time to run out of fuel; then they had us flying with some engineer's wish book" for an instruction manual, said one just-retired F–15 pilot.

The big new Soviet tank breaks down 50 to 75 percent more often than the American M–60. It will only go 15 miles an hour while the U.S. model can sustain speeds of 20 miles an hour in combat. The heavy T–72 also runs out of gas substantially faster than the M–60.

The T–72 also can fire only 40 rounds for every 63 fired by the M–60, the analysis concluded.

Sprey's point, also advocated by a growing group of Pentagon critics known loosely as the "military reform caucus," is "there are cheap winners and expensive losers," and a weapon that fails is of low quality no matter what it costs.

For example, Sprey lists 10 major weapons either in U.S. military service now or being developed. He compares them with cheaper weapons that have been available for some time to perform similar chores.

He contrasts, for example, the Swiss-made Oerlikon 35 mm antiaircraft gun, which costs $350,000, to DIVAD, a weapon now being acquired by the Army to fire antiaircraft rounds by radar control. DIVAD, at $10 million a gun, is 30 times as costly, Sprey says.

He also contrasts the 30 mm GAU–8 machine cannon aboard the A–10 attack fighter with the Maverick missile. It costs roughly $1,000 to fire the GAU–8 and $75,000 per Maverick missile, says Sprey.

The A–10 jet itself costs $8 million, and an F–15 E equipped with Mavericks costs $40 million, he estimates. The F–15 costs five times as much as the A–10 for the same mission.

"Are any of the expensive choices clearly more effective?" Sprey asks his Pentagon audiences.

[From the Chicago Tribune, Dec. 9, 1981]

NATION'S ARSENAL OLD, UNDERSTAFFED

(By Bill Neikirk, and James Coates)

At Northrop Corp.'s Rolling Meadows plant where they make radar-jamming devices for the B–52 bomber, an employee who refers an engineer for hiring could win a video tape recorder, a home computer, $1,000, or a snow-blower.

Such is the demand for engineers in the defense industry and such is the problem for President Reagan's $1.475 trillion plan to "rearm America" over the next five years.

Critics argue that the shortage of engineers and other technical workers is symptomatic of a creaky, outdated defense industrial base that will be put under enormous pressure to build the weapons Reagan has decreed.

According to many economists, the result will be bottlenecks, costly delays, more use of foreign goods, diversion of critically needed money away from commercial enterprises, and higher and higher prices.

The skilled-worker shortage and the aging industrial base are two more weak links in Reagan's planned defense buildup, already hampered by costly procurement and by expensive weapons that often don't work as they should.

Skilled workers and efficient machines are needed to produce high-technology weapons, but the evidence indicates the nation doesn't have enough of either. The result will be costlier weapons and intensified inflationary pressures that could spread throughout the economy.

More important, the Reagan buildup amounts to a significant tradeoff for the nation. To produce the weapons for what is considered an adequate defense, the nation may have to settle for less productivity and a less competitive economy. That means a greater reliance on imports—and a weaker dollar.

Lester C. Thurow, economics professor at the Massachusetts Institute of Technology, said the Reagan buildup will draw the nation's best minds into the military sector These people normally would be working in civilian high technology industries, he said.

Unfortunately, said Thurow, the U.S. alone among the Western allies is having a major military buildup. "This creates a major economic problem in the U.S. Its high technology industries will be facing problems not faced by their competitors."

The diversion of capital in a tight-money economy also creates a tradeoff, other economists said. Funds needed to make weapons are drained away from civilian enterprises.

The problem of domestic production going abroad has already hurt the defense industry.

From 80 to 90 per cent of military semiconductors (computer chips) are assembled in the Far East, primarily Singapore, Korea, Hong Kong, Taiwan, and Malaysia, said Jerry Jenkins, a Texas Instruments executive. If the industry were asked to double its capacity, Jenkins said, it would take 12 to 15 months. "That means continuing to do a majority of business in the Far East," he said.

Never have people and machines been called upon to meet such a national defense demand in peacetime, and never has the economy been so unprepared.

It is not merely guns versus butter. It is guns versus machines:

Machines that do a job called vacuum are remelting, essential in the production of high-purity steel, nickel-based alloys, and titanium metals used in airplanes, are already running at full capacity. A greater demand on them will merely lengthen the line and cause delays, said John E. Fogarty, president of Standard Steel Co. of Burnham, Pa.

The machine tool industry itself, deemed critical to increased defense production, has shrunk dramatically over the last few decades, largely because of foreign competition. One industry official, James Gray, president of the National Machine & Tool Builders Association, said the country is relying too heavily on Japanese and German machinery. In a war, he said, parts to fix them would be hard to find.

For the weapons required during the buildup, the Pentagon must rely on government-furnished machine tools. Yet these tools have been allowed to deteriorate and most are more than 20 years old, the Pentagon's Defense Science Board said. This will lead to "high production costs and extended lead times," the board added.

So many foundries have gone out of business over the last decade that it is questionable whether all the castings can be made for the weapons—everything from airplanes and ships to tanks. Ray Walk, executive vice president of Rayan Associates, Inc., of Park Ridge, said there are already bottlenecks in this critical industry.

The production of forgings for airplanes is also a question mark. Now, because of the recession and a slow period of the domestic airlines, this is no problem. But when the buildup begins, some analysts fear it could be. Industry officials interviewed by The Tribune say they can meet the demands.

Even in the nation's vaunted high technology area, problems are appearing. George Berman, chief executive officer of Unitrode, Inc., of Lexington, Mass., which makes computer chips for missiles, said the nation is short of the ability to build logic and memory circuits for military computers.

All these potential bottlenecks will probably bid up prices, several economists said, adding to the Pentagon's own costs and raising prices throughout the economy.

Robert A. Gough, economist at Data Resources, Inc., said he believes the Reagan buildup will add 2.5 to 3.5 percent to inflation by 1985, especially if the domestic economy is performing well at the same time.

Others have not ventured specific inflation forecasts, but almost every economist agrees that the Reagan plan will cause some inflation. The administration itself contends that the five-year buildup will hold price increases to a minimum.

But Gough said that even if the administration succeeds in reducing inflation to about seven per cent by 1984 or 1985, the military buildup threatens to return it to the double-digit range.

Gough blamed low investment in modern machinery. With continued high interest rates, he said, it is doubtful that adequate investments will be made in the next few years.

Even now, he said, "the capacity numbers (the ability of defense contractors to produce weapons) are way overstated. They don't take into account the vintage of the machinery. The quality of that is what is at issue. If you adjust the capacity for the vintage, you don't have the capacity to produce the goods."

But the shortage of labor is also driving up the price of goods.

Dr. Gail Garfield Schwartz, an economic consultant in Washington, said that in studies of small companies in New York and Maryland, a shortage of labor and high interest rates inhibited companies either from expanding their defense business or entering it at all.

"It is appropriate to consider a crash program to train workers in labor-scarce occupations and to prepare youngsters now in school to enter these occupations," she said. "There is ample precedent for such a program, most recently in the post-Sputnik National Defense Education Act."

The American Electronics Association surveyed 671 companies, one-third of the electronics industry, and found they will need 250,000 engineers and other skilled workers over the next five years.

"To meet just the needs of the electronics industry alone, the engineering schools would have to triple their output of electrical and computer-science engineers each year for the next five years," the association said. That does not take into account the needs of other defense-related industries.

Because of the engineer shortage, the Pentagon delayed launching the first military payloads aboard the space shuttle for 14 months.

The association urged the Pentagon to "strengthen the engineering education system upon which its industrial suppliers and military services depend."

Economists like Thurow believe the military's demand for engineers ultimately will take priority, leaving the civilian sector with less talent to create the new products necessary for economic health.

Already the shortage of engineers is igniting an intense "bidding war" for their talents, pushing up salaries in the process.

Not only will these salaries be reflected in the higher price for goods at the subcontractor level, but also they are pushing up engineer salaries in the civilian sector.

Bernard L. Schwartz, chairman and chief executive officer of Loral Corps., a manufacturer of electronic warfare systems, said that the engineer shortage is hurting his business.

Schwartz said the engineer shortage is causing "an inability to keep our systems on the leading edge of technology in response to the Russian threat. We have in Loral a significant number of projects we'd like to investigate, and the customers want us to investigate them, but we can't because of a shortage of electronic staff."

He said the industry will be hard-pressed to meet the challenge of the Reagan buildup.

At Northrop's Rolling Meadows plant, Wallace Solberg, general manager and vice president, said the employe referral program had proved effective in attracting new talent, with more than 1,000 skilled people joining the company in four years as a result. A California defense contractor tried another gimmick—sky-writing—to recruit engineers.

Starting salaries are well into the $20,000 range and in some cases are pushing $30,000.

To many people involved in the defense industry, one of the most worrisome aspects is that the buildup is bound to benefit employment in Japan and Western Europe at the expense of workers in the U.S.

Jack E. Moran, chairman and chief executive officer of Carlton Machine Tool Co. in Cincinnati, said his firm lost out to Mitsubishi, the Japanese firm, in bidding on machine tools for the XM-1 tank made by Chrysler Corp.

"If Japan's oil supply should be cut off and a war breaks out, where do the spare parts come from?" he asked. "There could be a serious interruption of production."

But Moran said he has a deeper worry. When the Reagan buildup produces a glut of orders for machine tools, the domestic industry will not be able to deliver, he said. "Then the government will just go overseas with those orders," he said, raising employment in foreign countries.

Already Japan is the sole source for a key component in the manufacture of semiconductors, so-called ceramic packages, "The implications of this dependence are obvious in the event of a national crisis," the Defense Science Board said.

Ironically, said James Gray of the National Machine & Tool Builders Association, the U.S. government is permitting such orders to go overseas while U.S. machine tool firms are forbidden to sell to socialist nations. Japan in particular gets around the rules and sells to Eastern European countries, he said.

Otto Eckstein, a former economic adviser to President Lyndon Johnson, said the U.S. should counter this problem by forcing Japan to spend more for defense. Otherwise, he said, the U.S. will be placed at a huge competitive disadvantage.

Rep. Les Aspin (D., Wis.), a frequent military critic, said that much of the money now going for defense should be pumped into industrial revitalization.

DRI's Gough said this is "entirely possible" if there is a booming economy, but Elliot Fried, a defense analyst for Shearson/American Express, a New York brokerage firm, said he thinks the aerospace companies can do it.

But Fried had an important addition to that. He said he expected that both Lockheed Aircraft Corp. and McDonnell Douglas Corp. will no longer be producing commercial aircraft four or five years from now. Both are having troubles selling their jumbo jets, he said, and Boeing Co. appears to have an edge with its new 757 and 767 airplanes.

With Lockheed and McDonnell Douglas out of the commercial picture, he said, it will be easier for them to concentrate on military orders.

Analysts said that if Lockheed and McDonnell Douglas lose their commercial business, the Pentagon will be dutybound to prop them up to prevent any bankruptcy. One consequence may be that orders of the C5A, the giant cargo plane that ran into huge cost overruns, will be increased if Lockheed gets into financial trouble.

Many executives interviewed by The Tribune blamed the on-again, off-again nature of military procurement for deterioration of the defense industrial base over the years.

Jack Moran, the Cincinnati machine-tool executive, said that if the Pentagon would adopt a five-year crash plan to modernize the machinery in his industry, it would make all the difference. But no such plan has been seen from the Pentagon.

Gordon Jenkins, president of Anadite Corp. in Cicero, which makes forgings for aircraft, said that "we have some old, old equipment. The problem is that if we ever got on a war footing, we would be in serious trouble to go to a buildup. It takes two or three years."

More than anything else, analysts and executives worry about the implications of the buildup on U.S. competitiveness. Sure, they say, some new technology results from defense contracting—just as the space program resulted in many "spinoffs" in the 1960s.

The production of forgings for airplanes is also a question mark. Now, because of the recession and a slow period of the domestic airlines, this is no problem. But when the buildup begins, some analysts fear it could be.

Because of the engineer shortage, the Pentagon delayed launching the first military payloads aboard the space shuttle for 14 months.

Not only will these salaries be reflected in the higher price for goods at the subcontractor level, but also they are pushing up engineer salaries in the civilian sector.

Bernard L. Schwartz, chairman and chief executive officer of Loral Corp., a Reagan buildup.

At Northrop's Rolling Meadows plant, Wallace Solberg, general manager and vice president, said the employe referral program had proved effective in attracting new talent, with more than 1,000 skilled people joining the company in four years as a result. Otherwise, he said, the U.S. will be placed at a huge competitive disadvantage.

Rep. Les Aspin (D., Wis.), a frequent military critic, said that much of the money now going for defense should be pumped into industrial revitalization.

When it comes to losing skilled workers to defense, Aspin said, "defense and space employ about 20 to 50 per cent of all the American scientists and engineers engaged in research and development work."

If 20 per cent of this talent is converted from commercial to military use, he said, that lowers the ability of American companies to produce innovative products to compete in world markets.

"In short, our scientists and engineers are inventing better missiles and space vehicles while Japanese scientists are inventing better cameras and TV sets," Aspin said. "We protect them with our defense and they beat us with their commercial products."

More than anything else, analysts and executives worry about the implications of the buildup on U.S. competitiveness. Sure, they say, some new technology results from defense contracting—just as the space program resulted in many "spinoffs" in the 1960s.

But, said Thurow, the world is different now, with the U.S. being challenged technologically by a host of countries. "Thus a price we could easily afford to pay in the 1950s and 1960s has become very difficult to pay in the 1980s."

SOVIETS PAY PIPER AS ARMS PLANTS HUM

WASHINGTON.—Almost daily, analysts at the Pentagon's Defense Intelligence Agency (DIA) receive updated photographs from American satellites showing movements around scores of Russian arms factories.

DIA's vice director for foreign intelligence, Edward Collins, recently told a congressional committee that his agency monitors 134 major final-assembly plants where the Soviets

build tanks, submarines, long-range bombers, intercontinental ballistic missiles, and other arms.

Citing the satellite photos and other data, Collins said, "Production plants appear to be continually active, suggesting that as old weapons programs are phased out, new ones are begun, leaving no downtimes or long periods of layoffs and inactivity."

On the surface, such efficiency would bring tears to the eyes of officials at United States companies such as North American Rockwell, Boeing, or Martin Marietta, which frequently lay off hundreds or thousands of people because of lost contracts, supply bottlenecks, or other setbacks.

Collins said in testimony before Sen. William Proxmire's Joint Economic Committee that even the Soviet's defense industry subcontractors appear more efficient than those in the U.S.

"We have identified over 3,500 individual installations that provide support to these (134) final assembly plants," Collins disclosed. "The growth in total floor space has averaged nearly 3 per cent in the defense industry for the past five years."

The American "eye in the sky" satellite has gazed down as activity hummed at the Severodvinsk naval shipyard, Collins said. In the last 10 years 7 classes of submarines, including the incredibly large 25,000-ton Typhoon nuclear missile submarine, have been photographed leaving the Severodvinsk shipyard, officials say.

Meanwhile, Ulyanovsk, a major new aerospace factory is turning out a new generation of Illuyshin transport planes to rival the giant American C-5A Galaxy.

Growth has been even more marked in the army's sector of the Soviet economy, which has expanded 10 per cent since about 1977, Collins said.

"For instance," said Collins, "a major Soviet tank plant, which was already nearly five times as large as the two U.S. manufacturers' total area, has again been expanded."

Defense Secretary Caspar Weinberger recently used that tank factory—at Nizhniy Tagil—to dramatize the size of the Soviet military industrial complex. Weinberger noted that if the plant were placed in an American city, it would be about 8 blocks wide and 20 blocks long.

America's two gigantic tank factories—one in Lima, Ohio, and the other in Warren, Mich.—would fit into one corner of the giant Soviet facility, according to a chart Weinberger distributed.

Like the U.S., the Soviets are driving "to improve their industrial base," Collins warned.

And, Weinberger added, their political system, unlike that of the U.S., will allow the Soviets to do this even if they must "injure their economy. Our political system will not allow us to injure our economy," the defense secretary said at a news conference.

Though Pentagon officials often deny that devoting more of the American economy to defense will increase inflation, intelligence analysts such as Collins and Gen. Richard X. Larkin, deputy DIA director, do not hesitate to assert that Soviet arms spending is damaging their economy.

Larkin and Collins said in joint testimony: "Soviet leaders, being well-aware that economic growth is hindered by military spending must carefully wend their way between the fulfillment of the conflicting goals of greater military power and an improved economic base.

"The high priority Soviet leaders place on military power has resulted in continued increases in expansion of military production facilities even as economic growth has slowed.

"There has been no significant reduction, to date, in the rate of expansion of such facilities," the intelligence officers testified, recalling a frequent theme sounded by Weinberger and President Reagan in calling for a rearming of America.

Soviet leaders have vowed to keep expanding weapons plants, even though this requires billions of dollars of profits the Soviet Union earns in selling its abundant natural gas and other energy resources abroad.

"We do not support the arms race, we oppose it," Soviet President Leonid Brezhnev said on June 9 in Kiev at ceremonies honoring their World War II casualties. "We could find a totally different use for the funds it swallows up. But if we are forced to, we will find a swift and effective response to any challenge. . . ."

American intelligence sources also noted that at a May 22 meeting in the Soviet Georgian city of Tbilisi, Brezhnev predicted, "We will have to think about extra defense measures."

The DIA study concluded, "The Soviets are prepared to allocate substantial additional resources to the military, with full recognition of the harm to the economy if Soviet national security, in their perception, is threatened."

So, Reagan insists, is the U.S.

BULLET SHOOTS HOLES IN OVERRUN PRACTICE

(By James Coates and Bill Neikirk)

WASHINGTON.—At the Pentagon, where cost overruns have become the norm, the history of GAU-8, an awesome machine cannon that spits 70 uranium-tipped bullets per second, is a rarity.

It is a major weapons program that cost less than expected and produced ammunition that works better than promised.

At a time when the General Accounting Office (GAO) has concluded that 47 major military weapons systems overran an average of 100 per cent, GAU-8 cost $30 million less than had been budgeted.

At a time when the X-M1 main battle tank tripled in cost from a projected $1 million to $3 million each, the cost of GAU-8 ammunition dropped from a projected $80 per round to an actual delivered price of only $13.

At either price, GAU-8 is a very expensive gun. Firing 4,200 rounds per minute when mounted aboard the A-10 jet attack fighter, the gun sounds like a Bronx cheer. It is impossible to hear the individual explosions. At $13 per round that's $54,000 per minute worth of Bronx cheer.

At $80 per round, it would have cost $336,000 per minute to shoot GAU-8.

By contrast, it costs $40,000 to fire a Maverick air-to-ground missile. Like GAU-8, it is designed to destroy enemy tanks when fired from attack jets. GAO noted last month that Maverick has overrun by $2.5 billion since first built in 1975.

"The approach used in the GAU-8 ammunition procurement is elegant in its simplicity," wrote Edward Elko, president of Aeroject Ordnance Co., one firm that makes the antitank bullets.

Unlike nearly every other major weapons program around, GAU-8 ammunition is produced by competing companies that try each year to underprice each other.

Also, the ammunition was designed by the outside companies—Aerojet and Honeywell—and not by the Army, as is most American ammo, said Elko and others involved in the project.

Jacques Gansler, a former assistant defense secretary, estimated this year that only eight per cent of all military contracts are performed under competitive bidding, a practice that eliminates much of the motive to hold costs to a minimum.

Until GAU-8 was offered for competitive bidding, the ammunition was supposed to be designed and built by the Army's various arsenals.

"The Army's original estimate was $80 per round," explained one senior military officer who worked on the program at the Pentagon.

"I couldn't believe it when I first examined the program," he said. "There was a book of military specifications for just that one bullet that was 1,000 pages long.

"Those specs were so ridiculous, they even stipulated how thick the east-facing walls should be in the factory where the rounds were built," he added.

"Our first step was to throw out the book," he recalled. "We stopped telling them how thick to make the factory walls and instead just told the people bidding. 'You make us rounds that will penetrate 2.11 inches of armor at 4,000 feet.' "

The engineers for Aerojet, Honeywell, and other companies designed a bizarre weapon. They decided that the shells should be roughly a foot long and that the bullets should be made from uranium depleted of most of its radioactive qualities and a by-product of refining nuclear reactor fuel.

The depleted uranium is even denser than lead and has "pyrophoric" properties on impact—that is, it generates high temperatures, bursting into flame as it penetrates a tank.

"Large quantities of this safe (very-low-radiation) metal exist in government inventories in the form of green salt, (UF4), said Aerojet's Elko.

Elko added, "Depleted uranium is also lower-cost and is a noncritical material in comparison with tungsten, which had previously been used for penetrators."

The Air Force provided funds for both Aerojet and Honeywell to buy equipment to produce the shells and proposed that each year the company producing ammunition at the lowest cost would receive the most business.

Typically, said one program manager now retired from the Pentagon, one of the companies would get 65 per cent of the Pentagon's business and the other 35 per cent.

With millions at stake, Aerojet and Honeywell put their best engineering talent to work to make the GAU-8 rounds even cheaper, program proponents explain.

Elko described the GAU-8 success story this way in the trade publication "National Defense": "According to the Air Force estimate, as presented to the Congress in February, 1981, the application of two competitive contracts of the multiyear type has saved almost 10 per cent of the cost of procuring 25 million rounds of GAU-8 ammunition."

The story of GAU-8 is frequently cited by some Pentagon analysts and other experts now pressing for reform in procurement.

Many of these insiders will discuss their views only on the condition that their names not be used because they still work in the Defense Department or as Pentagon consultants.

Several complained in interviews that the government had failed to learn the proper lessons from GAU-8.

"It is a program that had no glamour," said one. "In a world where careers are made by producing a modern jet fighter or a sexy missile or a big new shiny main battle tank, nobody wants to get involved with something dull like buying ammunition."

Top Army officials announced last month that they believe the procedures used to produce GAU-8 ammunition so successfully could be applied to much bigger programs—specifically, the troubled XM-1 main battle tank.

The tank is built by the Chrysler Corp. at factories in Lima, Ohio, and Warren, Mich. The factories themselves were provided by the Defense Department, which owns all the machinery and other equipment used to construct the tanks.

Last month, XM-1 project officers disclosed that Richard Delauer, the Pentagon's chief of weapons engineering and development, had ordered a study to determine whether the Army should bring another company into the tank program in addition to Chrysler.

As outlined by the Army's Lt. Col. J. D. Holeman, either the Ohio or the Michigan plant would be turned over to a company that would compete with Chrysler for a larger share of the Army's tank business by delivering the machines at the lowest cost.

Others in the defense industry claim to have found ways to reduce weapons costs.

On the near Southwest Side of Chicago, in a dingy factory beside the Stevenson Expressway, Nelson Carlo, a Hispanic businessman, told a reporter how he underbids some of the country's blue-chip defense contractors.

Carlo's method is to hire cheap labor, which is readily available in the recession-prone Midwest, and take advantage of federal programs designed to help cities or minorities.

For example, Carlo and a work force of about 160 inner-city residents—mainly blacks and Hispanics with a limited knowledge of English—are producing thousands of practice bombs for the F-16 jet fighter.

The F-16 itself, Carlo noted wistfully, is built in a much more lavish factory in Ft. Worth.

Carlo's factory, Abbott Products Inc., moved to its present location from much smaller quarters in Lawndale after obtaining funds through the federal Urban Development Assistant Grant (UDAG) program.

Those grants usually are used to build such businesses as shopping centers, professional office complexes or other projects in the civilian sector intended to rehabilitate cities where much commercial activity has moved to suburbs.

Taking advantage of another program, the Small Business Administration's "8-A" minority contractor project, Carlo obtained his first business after receiving bidding preferences based on his ethnic status. Since then he has moved into ordinary competitive contracting, Carlo said.

The Abbott staff produces many military products including the steel shipping cases that the Air Force uses for its Sidewinder missiles. A larger factor operated by the Ford Aerospace Corp. employs hundreds of persons in Newport Beach, Calif., to make the missiles themselves.

Carlo is blunt about why he has become one of a relative handful of Chicago area businessmen to succeed in getting the defense contracts. He bought a factory in a depressed neighborhood and pays his workers substantially less than many unions demand.

The people working with the heavy machines that cut the steel and shape it to make the practice bombs, missile boxes and other products at Carlo's plant earn roughly $5.50 an hour, he said.

Reporters visited the Ft. Worth factory where General Dynamics makes the F-16s that use Carlo's bombs. Plant manager C. N. White told them that the Texans operating machines like those used by Carlo's staff are also paid $5.50 an hour.

The low salaries, the UDAG grants and the preferential 8-A program all allowed the Chicago operation to win at least a piece of the expensive F-15 program, Carlo said with pride.

"Okay," he said, "we had a lot of help getting started, but now we know how to go about the business of defense contracts, and we are beating out a lot of companies from the Sun Belt to do it."

For example, said Carlo, Abbott Products outbid ERI Inc. of Alabama and Del Manufacturing of Southern California for contract last year to make 200,000 practice bombs for the F-16.

These bombs contain a small smoke-emitting charge and are used both by U.S. pilots and foreign nations that bought F-16 jets.

He estimated that Abbott has produced more than 250,000 of these bombs in recent years.

"It is a hell of a lot cheaper to have them made in the inner city of Chicago than in Southern California," said Carlo.

"Defense work must come into labor-surplus areas, and Chicago most definitely is a labor-surplus area," said Carlo. "This is where the dollars are at."

ARMS SPENDING HIKE BYPASSES ILLINOIS

Congressional approval of the $30 billion B-1 bomber would be good news to the folks at the Brunswick Corp. in Skokie. Brunswick uses the same plastic material that goes into its famous bowling balls to make "radome" nose cones for the bomber.

The bad news for the State of Illinois is that Skokie-based Brunswick builds the radomes in a factory in Virginia, giving jobs to 691 there.

Similarly, the Elk Grove Village-based AAR Corp. anticipates it will net $35 million to $65 million next year on military contracts, mainly because of President Reagan's $1.475 trillion program to rearm America.

Most of that work, acknowledged AAR Corp. president Ira Eichner in an interview, will be done by 2,000 workers in California, New York, New Jersey, Florida, Oklahoma, and even the Netherlands.

A study prepared by an executive of another major Chicago area defense contractor, Wallace Solberg, general manager of Northrop Corp.'s Defense Services Division headquarters in Rolling Meadows found that Illinois receives only a small fraction of the billions that will be spent to "rearm America."

Solberg, a member of a committee formed to help Mayor Jane Byrne attract defense companies and other high technology industry in Chicago, found that Illinois gets roughly 1.5 percent of the prime contracts being awarded by the Pentagon while California, the biggest benefactor of arming America, gets 20.4 percent. Solberg's own company is based in California.

Byrne was told that, counting military salaries and small contracts as well as large ones, Illinois taxpayers contributed $8.4 billion to the Pentagon budget last year, but only $2.3 billion was returned to the state in Defense contracts.

The shift from the "Frost Belt to the Sun Belt" is particularly evident in the defense industry. Furthermore, complain Midwestern leaders, the chances are that if President Reagan's plan to spend $15,000 on arms for every U.S. taxpayer during the next five years is implemented, the unbalance will become worse.

During a recent press conference, Byrne said: "Since 1950, the number of Defense Department employes in the Northeast and Midwest states fell by 52,516 while South and Southwest states won an employment rise of 567,978.

"In the 1970s alone, Illinois lost 19,000 Defense Department jobs, a loss still painfully felt by the communities that depended on these wages."

Illinois ranks only 17th among states in dollar amounts of major Pentagon contracts. But Chicago area businessmen interviewed by The Tribune predicted that they will make millions in the next five years selling arms to the Pentagon.

Eichner's AAR Corp., for example, produces the following for the Pentagon:

Costly steel cargo pallets the Air Force uses to hold jeeps and other vehicles that are airdropped from the Lockheed C-130 Skylifter aircraft.

Removable seats that can instantly transform the C-141 cargo jet into a troop transport.

Steel rails that line the floor of the gigantic C-5 Galaxy and allow the rapid loading of battle tanks.

Another AAR subsidiary designs protective coverings used on American vehicles, foodstuffs, and other items stored in forward staging areas such as Egypt.

These items and many others the Chicago-area firm produces for the military should be best sellers as the President focuses on developing a Rapid Deployment Force (RDF) capable of landing troops and equipment quickly in the Persian Gulf, Eichner said.

"We are particularly excited about RDF business," he said. AAR Corp. reported $198 million in earnings last year, and does about 25 per cent of its business with the Pentagon, he said. Eichner owns more than 400,000 shares of AAR Corp. stock.

Solberg, manager of the biggest defense contracting operation in Illinois—Northrop Corp's Defense Division in Rolling Meadows—showed reporters a bookshelf filled with a dozen volumes.

"That's the government's procurement rules," Solberg said. "There are 30,000 pages or more to it and we have teams of people who deal with it every day."

While Northrop, with 2,400 employees in Illinois and 31,000 nationwide, hires lawyers and accountants to pore over the 30,000 pages of "military specifications," Nelson Carlo does this work himself, he said. Carlo, a Hispanic community leader, owns Abbott Products Inc. on Chicago's near South Side and has netted $12 million in Pentagon contracts.

"I have made a lot of money and won a lot of business learning how to read a government contract," he said.

Philip Knox, a vice president of Sears, Roebuck & Co., said Sears decided last year that the paperwork was too troublesome. So Sears informed the federal government it was no longer interested in doing business with its agencies.

"It wasn't just the Department of Defense," said Knox. It was the whole government and we thought it was just more trouble than it was worth to do business with them."

Knox said Sears had already become angry when the federal government accused the company of violating Equal Employment Opportunity regulations. The merchandising giant decided to drop all business with the Pentagon, however, when officials from the Federal Office of Contract Compliance announced they were going to review how Sears had filled out forms required by the 30,000 pages of contract rules.

At the time, he said, the company received $20 million a year in federal contracts, mainly for supplying appliances and other merchandise to military bases.

In dropping government business, the Chicago-based Sears added to the shift of business away from the Northern states to the Sun Belt.

Lester Thurow, an economist with the Massachusetts Institute of Technology (MIT), has concluded that this shift is creating severe economic problems in some areas and prosperity in others.

"While the American economy has essentially stagnated for the last three years, the stagnation is a peculiar mixture of boom and depression," Thurow recently told the Congressional Joint Economic Committee.

"Certain geographic areas (Texas, California, Florida, Massachusetts) and industries (semi-conductors, computers) are booming while other regions (the industry Midwest) and industries (steel, autos) are in the midst of something that looks like the Great Depression.

"Unfortunately, the industries and regions (Illinois and the rest of the Midwest) are not those where military equipment is now purchased," Thurow concluded.

Instead, he found, "Military equipment is produced by the industries and regions that are now experiencing booming production and shortages of materials, equipment and manpower.

Gordon Jenkins, president of Anadite Inc., possibly the largest steel forging firm in Illinois with military contracts, agreed with Thurow.

"Let me tell you, I'm ready for President Reagan if he wants to rearm America. We have the capacity here. We're ready. We'd just love to hire back the people we had to lay off because of the current recession."

Jenkins' Cicero-based company casts, pounds and otherwise shapes steel into the basic forms it must take before being machined into the sophisticated working parts of various weapons.

For example, his workforce of 540 turns out the crude steel castings that later will be machined into the nose wheels of the new fleet of 100 B–1 bombers.

Similarly, the Anadite company makes landing gear for F–15s, F–16s, and other fighters, and components of the XM–1 main battle tank; the Bradley Armored Personnel Carrier; the C–5 air cargo jet; and scores of other massively expensive military weapons.

Anadite had sales in excess of $82 million last year, according to the company annual report.

Jenkins insisted that his company could absorb all the business President Reagan's $1.475 trillion bid to "rearm America" can generate. Currently, he said, the company is operating its forging at roughly 40 per cent of capacity.

Asked if buying billions in additional arms would overwhelm his workforce, Jenkins grinned and replied, "You are talking about problems I would love to have."

Anadite, incidentally, employs nearly the same number of people at other company plants as it does in the Chicago area. These plants are in South Gate and Santa Clara, Calif.; Tucson; and Hurst, Tex.

[From the Chicago Tribune, Dec. 11, 1981]

U.S. Is Becoming Arms Merchant of the World

(By Bill Neikirk and James Coats)

Los Angeles.—Inside the sprawling building where North American Rockwell Corp. once made the B–1 bomber, Northrop Corp. is now producing sleek new F–5G and F–18 fighter planes destined for export around the world.

More than a thousand miles away in Ft. Worth in a modernized factory owned by the Air Force, General Dynamics Corp. is busy making F–16 fighters, some of which will wind up in the world's most unstable areas.

This is more than a tale of two cities, or even of two companies. According to defense analysts, President Reagan's rearming of America will increasingly make the United States the arms merchant of the world.

Inexorably pushing the U.S. into this role is an explosive mixture of runaway arms costs, federal budget deficits, foreign competition, nationalism in Third World countries, U.S. security interests and the profit motives of defense contractors.

The President turned on the arms-sale spigot for a deliberate purpose, saying that a key aim is to "enhance U.S. defense production capabilities and efficiency."

This is what the Reagan defense buildup is all about. An aging defense industrial base, a shortage of engineers and a weapons procurement process burdened by high costs and inefficiency are raising inflationary pressures and producing weapons that often don't work.

The arms merchant role is a byproduct of all these problems.

With some of the nation's most sophisticated weaponry destined to wind up in the hands of the military of such countries as Pakistan, Venezuela, Saudi Arabia and perhaps even China, fear is beginning to emerge that the U.S. will soon be selling arms throughout the Third World, sometimes to potential adversaries.

That fear is best expressed by Woldgang Demisch, a defense analyst for the New York brokerage firm of Morgan Stanley & Co.

"We are selling front-line equipment to beggars and murderers and mendicants," he said, adding that he feared that one day a Third World country with "get-rich" ambitions could blackmail the U.S. by threatening to bomb American cities with missiles carried by F–16s.

Defense and diplomacy are two factors behind the changed U.S. policy but economics is probably the main driving force.

The U.S. government has invested enormous sums in researching, developing and building these weapons, with huge cost overruns resulting from the process. For example, the F–16 initially was estimated to cost a little over $9 million each; now it is up to $16 million.

The need to export is based on an old economic principle. To lower the ultimate cost of each fighter purchased by the Pentagon, the administration is encouraging sales of sophisticated fighters overseas. The more airplanes built from a given assembly line, the lower the cost per plane.

Jim Grafton, vice president of the Boeing Co., said the sale of six Airborne Warning and Control System (AWACS) planes to Saudi Arabia will help the company in many ways.

It will drive down costs for the U.S., Grafton said. He said it now costs $68 million for an AWACS plane in "fly away" condition. But if the cost of research and development is added in, the actual cost is $128 million, he said.

Grafton said the Saudis will "pay an apportionment of the development costs." The Air Force will try to cut the cost of 34 AWACS planes on order by charging the Saudis as much as possible, he said.

"I think they (the Air Force) will load it on the Saudis," he said.

However, H. F. Rogers, vice president and general manager of General Dynamics' Ft. Worth Division, said the prime reason for foreign military sales is to further the U.S. foreign policy interest. Cutting the cost per plane is of secondary importance, he said.

In business terms, foreign military sales provide a profitable deal for defense contractors. They are able to add up to 2.5 per cent to the price of each weapon sold to foreign countries.

In economic terms, such sales also create a new demand for the output of the contractors, keeping their assembly lines going, particularly at a time when commercial sales are soft.

Rogers said that, in 1983, the Air Force plans to reduce its scheduled purchases of F–16s. Asked how he planned to pick up the lost volume, he said, "The only way I know of is foreign military sales."

Eliot Fried, defense analyst for Shearson/American Express in New York, said McDonnell Douglas Corp. and Lockheed Corp. may be totally out of the commercial business within a few years, making them much more reliant on military sales.

Fried said the U.S. ought to engage in such sales "with gusto" because if it doesn't the French and British will rush in and grab business from American companies.

In fact, intense competition for arms sales has become a fact of life. In 1980, the U.S. sold $9.6 billion in arms to the Third World, followed closely by France with $7.9 billion and Italy with $2.7 billion. The Soviet Union sold $14.9 billion in arms to developing nations in 1980.

Reagan administration officials openly advocate increasing U.S. sales abroad in response to the big Soviet push.

The U.S. sells not only advanced airplanes but a vast array of other weapons abroad—from tanks to guns to artillery.

Jacques Gansler, a defense consultant and a Massachusetts Institute of Technology professor, said foreign military sales generated 840,000 jobs in the U.S.

Gansler said that despite former President Jimmy Carter's efforts to hold down such sales, new foreign orders for military equipment stayed in the $9 billion to $13 billion range all through the 1970s, an indication of the powerful forces behind them.

The U.S. government appears to have adopted Fried's thinking and, in addition, believes that it can use arms sales as a diplomatic and security tool to ensure "stability" in an area of the world.

Yet such a policy is widely challenged.

"The American experience in Vietnam, Iran and Ethiopa graphically illustrates that arms transfers, and even the use of American troops, do not ensure 'stability' in a country or region or guarantee the continued good will and cooperation of the recipient nation," the Congressional Research Service said in a report for the House Foreign Affairs Committee.

Indeed the report said, arms transfers could stimulate regional arms races and lead to more instability, and possibly war, between enemies in certain areas. The longstanding hostility between Pakistan and India is cited as an example.

Some of the nation's defense contractors find themselves torn between the profit motive and the wisdom of the policy.

Carter also sent a letter to all U.S. embassies, forbidding staff members from helping representatives of defense contractors sell their arms. An executive of one defense contractor said he was denied use of telephones and other assistance granted to other American businessmen. He referred to Carter's directive as the "leprosy letter."

A number of defense analysts said that the desire to have more sophisticated weaponry is indicative of national pride, just as having a steel mill is.

Although many of the sophisticated weapons produced in the U.S. have had numerous performance problems, they still are better than any weapons produced by Third World nations.

The Congressional Research Service said that in the sale of F–16 fighters to Venezuela, the U.S. Air Force may have promoted the sale of the more sophisticated fighter after Venezuela originally expressed an interest in a less advanced plane.

In the intense competition to sell arms overseas, General Dynamics and Northrop are locking horns. Northop had a leg up in the Carter years, primarily because its less sophisticated F–5E fighter could be sold easily within the guidelines.

But now Northrop executives feel that the Air Force, which is buying the F–16 for its own use, is promoting the sale of the aircraft in non-NATO nations, including many in the Third World.

Northrop executives are bitter over what they see as an obvious effort by the Air Force to discriminate in arms sales merely to lower the cost of an airplane that is a prime weapon in its arsenal.

The intensity of the competition is reflected in an incident involving the F–100 engine on the F–16 plane. Made by Pratt & Whitney, the engine tended to burn out quickly in steep climbs common to aerial combat.

To get around the problem, the Air Force quietly tuned down the engine, but didn't tell the pilots, a development that angered them when it was reported in the trade press.

Tuning down the engine increased the "stall and stagnation" experiences during climbs, a phenomenon that occurs when not enough air reaches the fuel.

A shortage of spare parts also causes concern about these sales, the service said.

The Air Force minimized both problems, saying that everything will be fine if foreign military sales are negotiated within the normal 42-month time for producing an F–16. The Congressional Research Service, however, said the administration isn't following this timetable, selling 40 F–16s to Pakistan on an accelerated basis.

Gansler of MIT said the F–16 is not the only weapon the U.S. is sharing with foreign customers before they are fully deployed in the U.S. arsenal. He cited the Maverick and Harpoon missiles as other examples.

Another major problem with the Reagan policy is cost. Because the advanced weaponry is increasingly expensive, it could strap developing countries which insist on buying them.

Although Venezuela, with its oil reserves, can afford the F–16s, other countries in Latin America could have problems paying for the more advanced weapons.

Yet, said the Congressional Research Service, "concern exists that the sale could trigger an arms race in Latin America where an inventory of F–16s is viewed as much in terms of prestige as it is in relation to real defense requirements."

Northrop, caught in a trap after Carter's policy was abandoned, also is developing more advanced planes, including the FV5G and the F–18, a plane jointly being built with McDonnell Douglas.

The F–18, after many design and mission changes, has ballooned in its original costs and now is about $33 million a copy. Despite the cost, Canada and Australia are buying the F–18.

These purchases, along with others sought by the two firms, will lower the eventual per-plane cost to the Navy and Marine Corps.

Reagan administration officials openly advocate increasing U.S. sales abroad in response to the big Soviet push.

The U.S. sells not only advanced airplanes but a vast array of other weapons abroad—from tanks to guns to artillery.

The U.S. government appears to have adopted Fried's thinking and, in addition, believes that it can use arms sales as a diplomatic and security tool to ensure "stability" in an area of the world.

Yet such a policy is widely challenged.

Some of the nation's defense contractors find themselves torn between the profit motive and the wisdom of the policy.

Bernard Schwartz, president and chief executive officer of New York-based Loral Corp., which makes radar-jamming devices for airplanes, said such sales are indeed good business.

But he wondered whether it was wise for the U.S. to sell the F–15 fighter to Saudi Arabia, a move he said raises the whole conflict in the Middle East to a higher level. The F–15 sale "is an upgrade" of the technological weaponry in that region and makes the conflict more dangerous, he said.

Schwartz's company makes much of the sophisticated "electronic warfare" weaponry that is highly sought by Third World nations today.

Reagan reversed a Carter policy on foreign military sales that prevented the U.S. from introducing a new advanced weapon into a region. An executive of one defense contractor said he was denied use of telephones and other assistance granted to other American businessmen. He referred to Carter's directive as the "leprosy letter."

Reagan specifically reversed this policy and others laid down by Carter, with the result that arms sales are expected to increase dramatically over the next few years.

The defense executive, whose company is deeply involved in foreign military sales, said "the need for foreign military sales is intrinsic. Activity by the Soviets (in selling arms) is today unbridled and unchecked. That makes competing with them in our national interest over and above the benefits that will accrue in the balance of payments."

But nationalism is also playing a big role in arms sales in addition to Soviet threat.

"Since the F–16 is viewed by many nations as a prestige aircraft, several nations may seek it over the more affordable export models such as an F–5G or F–16/79, regardless of their real requirements.

To get around the problem, the Air Force quietly tuned down the engine, but didn't tell the pilots, a development that angered them when it was reported in the trade press.

Tuning down the engine increased the "stall and stagnation" experiences during climbs, a phenomenon that occurs when not enough air reaches the fuel.

Although the Air Force and General Dynamics contend that the problem has been corrected, Northrop executives have used the engine's difficulty to their own advantage in selling overseas.

A defense industry executive said it was "cynical" for the U.S. to sell "dogs" overseas and "keep the good stuff for ourselves."

Such claims are dismissed by the Pentagon and General Dynamics, but they do show the degree of intensity in the battle over export sales.

The Congressional Research Service cited another major reason against selling F–16 fighter planes in large numbers to Third World countries at this time.

"Many U.S. squadrons designated to be equipped with the F–16 have yet to be supplied and a step-up in sales to foreign buyers could interfere with scheduled deliveries to the Air Force," it said.

These purchases, along with others sought by the two firms, will lower the eventual per-plane cost to the Navy and Marine Corps.

Taxpayers are subsidizing these foreign sales in more ways than one, all the way from the research and development costs to the actual machinery and buildings paid for by the Pentagon to build the weapons. In addition, foreign countries may apply for loans to buy their weapons.

Yet Reagan indicated in changing U.S. policy last summer that such costs are unavoidable because the Soviet Union and other arms-producing nations have shown little interest in curtailing sales activity.

"In the absence of such interest, the United States will not jeopardize its own security needs through a program of unilateral restraint," he said.

And thus the government, as well as the taxpayers, are in the arms merchandising race.

IMPORTED MACHINERY PLAYS A MAJOR ROLE

FT. WORTH.—Inside the world's largest jet fighter factory along a one-mile assembly line, huge computerized machines cut, drill and finish parts for the Air Force's F–16 airplane at a dizzying pace.

About $128 million in General Dynamics Corp. and Air Force money is tied up in these sophisticated computers that do their jobs faster, better and with fewer people than traditional assembly-line production.

Some of the best, and more expensive, machines were purchased from Japanese manufacturers. General Dynamics' vice president for production, C. N. White, said Japanese machines were purchased because they are cheaper and the quality is better. "They support their product," he said.

Although General Dynamics' effort to save money is understandable, this is yet another example of how President Reagan's $1.475 trillion program to "rearm America" is propping up employment in Japan and other countries.

A Tribune tour of several defense-related factories around the nation demonstrated how widespread that foreign influence has become in military production.

Chicago-area workers operate foreign-made machines in Northrop Corp.'s division in Rolling Meadows and in Anadite Inc.'s huge forging complex in Cicero. Foreign-made machines are found in defense shops all along Boston's prosperous ring of high-technology industries.

Gordon Jenkins, president of Anadite, tapped a $5 million machine in the noisy forging plant at Cicero and noted that it was manufactured in West Germany. "You can only buy a machine like this in Germany," he said.

Chrysler went to a Japanese manufacturer for important machinery on the XM–1 Abrams tank, leaving U.S. bidders angry and disappointed.

Partly because of defense purchases, imported machinery now commands more than 22.5 per cent of the American market, compared with less than 5 per cent in 1965.

James A. Gray, president of the National Machine Tool Builders Association, was so outraged at the development that he recently told the Industrial College of the Armed Forces:

"Honestly, there are times when I question our government's sanity. An absolutely basic American industry—machine tools—is suffering from an exploding balance-of-trade deficit. And what does the government do? They agree to purchase machine tools from other nations. . . . Our national military-industrial policies are schizophrenic. It's time we all went to the shrink."

But the story of foreign purchases is more complicated than that. Jacques Gansler, a defense analyst and vice president of the Analytic Science Corp., said agreements with American allies also are creating foreign dependencies.

"These require the U.S., when making arms sales, to commit to reciprocal purchases from the foreign ally or arrange for coproduction of some components," he said.

Here in Ft. Worth, coproduction is the name of the game. At assembly lines here and in Belgium and the Netherlands, F–16s are produced for the Air Force, NATO, and for sale around the world.

Thanks to what General Dynamics calls a "modular" style of constructing the F–16, components are made in several countries, said David Wheaton, vice president of marketing. "Everybody makes a little bit of the airplane," he said.

Because of coproduction agreements, the U.S. is dependent on West Germany as the sole source for the 120 mm. M–1 main tank gun and on England for the A–7 aircraft engine and Harrier aircraft. It relies on Switzerland for a 35 mm. gun and on the Netherlands for a key explosive.

Gansler said the U.S. would become dependent on a single foreign source for combat helmets, high purity silicon, large forgings, and hydroturbines if these were not on a list of exemptions from corporation agreements.

He named a decline of domestic firms willing and able to do business with the Defense Department and overseas relocation of U.S. manufacturing facilities.

[From the Chicago Tribune, Dec. 13, 1981]

DEFENSE SPENDING: MORE IS LESS

(By James Coates and Bill Neikirk)

WASHINGTON.—Robert Fay, a former fighter pilot decorated for his Viet Nam service, compares the Pentagon's love affair with supersophisticated weapons to the Age of Chivalry.

Then, Fay said, the concept of war revolved around the tournament and the main weapon was the lance. Knights continually perfected the lance, just as they put the best artisans of the day to work on designing expensive defenses. From that emerged the suit of armor and chain mail.

So when war came, out went the knights in shining armor, wielding the weapons that

had proven effective during the tournament. But when a heavily laden knight encountered a gang of peasant soldiers, Fay said, "they would yank him from his horse, throw up his visor, and stab him in the eye."

Is America today similarly being lulled to sleep by an overreliance on such "magic weapons" that are supposed to defend us against any and all threats?

The question is more compelling at a time when the nation will be confronted with the bills for expensive new weapons systems that often fail key tests and don't perform as they should.

Sen. William S. Cohen (R., Me.) noted that the total purchase cost of 47 weapons systems escalated by $47.6 billion in the final three months of 1980. "It is painful to realize that this one quarter's cost overrun effectively swallows up the domestic budget cuts we worked so long and hard to pass earlier this year," he said.

Why do knobs fall off a $3 million tank? Why do fighter planes costing $4 million each outmaneuver planes costing five to seven times as much? More importantly, can anything be done about it?

The roots of the problem run deep. They encompass the tragedy in Viet Nam, the decline of quality as an American ideal, the noncompetitive nature of Pentagon contracting, and the nation's own schizophrenic attitude toward defense spending.

The solution, in a word, is more competition in the defense business. But that is easier said than done, considering how complex the system has become and how huge a bureaucracy has grown around each weapon developed by contractors.

Concern that the Pentagon may be wasting millions upon millions of dollars through an overreliance on, and an overabundance of, new "gold-plated" weapons systems is beginning to emerge in Congress and even among a small minority of Pentagon experts.

Reliance on high technology in a nuclear age is understandable, and even necessary. But today's system of planning and purchasing weapons appears to have gone beyond that. Furthermore, it is riddled with politics and with a federalistic procurement system that makes controlling costs almost impossible.

Reform of this procurement process is long overdue. The Pentagon's No. 2 official, deputy secretary Frank Carlucci, has made 32 general proposals along that line, but they are so lacking in detail and enforcement that defense contractors now dismiss them with a wave of the hand.

A General Dynamics Corp. executive said the Carlucci proposals are like motherhood and apple pie. "You can't be against them," he said, "The real question is how you put them into effect."

The implications of this procurement crisis can't be dismissed lightly. The spending of a dollar here is a dollar that can't be spent elsewhere. The attempt to match the Soviet Union's spending means every dollar must be used more efficiently.

Jacques Gansler, a former Pentagon official and now a consultant, said that, since Viet Nam, the Pentagon has tried to drive each new generation of weapons to the "state of the art" in performance.

To keep a constant-strength military force relative to the Soviet Union's requires additional weapons purchases on the order of 5 per cent each year—over and above the rate of inflation, he said.

Norman Augustine, vice president of Martin Marietta Corp., a prime defense design firm, said aircraft costs alone have been increasing four times every 10 years. "If the trend continues, in the year 2054, the entire defense budget will purchase just one tactical aircraft. This aircraft will have to be shared between the Air Force and the Navy, three and a half days per week."

The Pentagon's fascination with high technology weaponry can be traced to several factors—the unpopularity of the Viet Nam War, the inability of the defense industrial base to mobilize quickly for a war, the nation's own technological lead over the Russians, and the desire of defense contractors to make a profit.

After Viet Nam, the Pentagon sank more money into research and development of new, sophisticated weapons rather than into the purchase of conventional weapons that had failed in the jungles of Southeast Asia.

At the same time, defense budgets were trimmed because of the public's unhappiness with the war. Consequently, the defense industry did not achieve the same high production rates. Some companies left the business. The industrial base shrank.

Because of that, the Defense Department came to see industrial mobilization for war as irrelevant and adopted what is called "short-war thinking."

"Because of budget stringencies over many years, our military stockpiles today could support a major conventional war for only a couple of months or so," said defense expert Fred Ikle in a 1979 article.

"This puts our planners in a quandry: Either they have to assume a short war, or envisage fighting a war without suppliers. Understandably, they choose to 'plan for a short war,' " Ikle said. When Ikle wrote that, he was a private citizen. Now he is a high Pentagon official.

In a short-war scenario, it is the "magic weapons" that are expected to do the major job.

Ikle's reference to "budget stringencies" illustrates how short-sighted defense cuts in one or two years can lead to much more expensive outlays down the road.

Defense spending as a percentage of the total economy actually declined during the 1960s and 1970s.

Within that overall pattern, military budgets suffered from another phenomenon, an increase for three years followed by a decline. The erratic spending programs were in response to the changing political fortunes of the nation.

Spending went up as the Viet Nam War escalated but fell back when the Great Society was announced. It rose during the Tet offensive but fell back again. Once again it increased during the early years of the Nixon presidency but fell back again as the war became increasingly unpopular.

Now the Nation is involved in another surge of defense spending, but the fits and starts of the past have had their impact on the thinking of defense contractors.

They are eager to squeeze as much as they can from a single weapons contract. There is a temptation to stretch out the research and development for years, to change the design and mission of weapons, and to stick on "gold-plated" additions that run up the cost.

These are understandable, self-protecting moves when defense spending is so uneven. A more sustained pattern of spending, avoiding the peaks and valleys, would help end much of the uncertainty and, analysts agree, would help save money over the long run.

Closely allied to this reform is multi-year contracting. Currently, money for each weapons system is voted annually by Congress, subjecting each weapon to constant scrutiny and injecting enormous uncertainty into the process.

The B–1 bomber is a ready example of how subjecting a weapons system to the whims of Congress can increase costs. The airplane, as designed in the early '70s, was to have cost nearly $30 million a copy. A lengthy debate about whether to build the plane stretched out procurement, so that the per-copy cost is now well over $200 million.

With multi-year contracting, Congress is forced to make an early commitment to a weapons system and stick with it until production is completed. To protect contractors, Congress would budget enough money in the first year to pay a stiff penalty should the weapons system be ultimately eliminated.

Carlucci said last week that the nation could save $283 million over the next five years by signing a multi-year agreement for the F–16 jet fighter.

Another reform is to bring some realism back into the bidding process.

Contractors have grown accustomed to obtaining business by submitting unrealistically low bids to the Pentagon, "buying in" the weapons systems for their companies.

The government became a party to this charade by agreeing to pay the added costs. Many aspects of contracts were understated, for example, the inflation rate and the need for design changes.

Carlucci's 32 initiatives to control cost overruns include proposals he says will require contractors to submit more realistic estimates of inflation and to anticipate design changes that drive up costs.

Lack of real competition in the purchase of weapons has become a national scandal. Pentagon consultant Gansler said that in only 8 percent of cases is there competitive bidding on defense contracts.

Because of a close relationship between Pentagon officials and defense contractors, efforts to introduce more competition into the system have met with strong resistance. Each branch of the armed services has its "advocates" for a particular weapons system.

Furthermore, when a contractor makes a real mistake and a weapons system fails to live up to expectations, the Pentagon does not take the ultimate step in cost discipline—canceling the weapons system or refusing to take delivery when the costs exceed estimates.

The Pentagon insists that this is going to change.

James Wade, a senior Pentagon weapons analyst on Defense Secretary Casper Weinberger's staff, said in an interview that the Reagan administration intends to cancel some weapons systems to combat overruns.

For example, Wade said he recently ordered the Army to inform Motorola Corp. that the Army could not pay for a radar weapon called SOTAS (Standoff Target Acquisition System) because it has now more than doubled in cost.

"We have to get the costs under control and demonstrate we are buying them (weapons) efficiently," said Wade. "Otherwise, we are going to lose the support of the American people. If we lose that, we lose the national security."

Because of the "buy-in" procedure and other factors, an institutional dishonesty pervades the entire weapons procurement system.

Underestimating the inflation rate in the defense area is one example of that dishonesty. The prices of weapons have been running well ahead of the inflation rate in general, yet the government insists on using the inflation rate for the whole economy when it projects future weapons costs.

Why is this so? It enables the White House to project smaller defense spending figures for the years ahead, minimizing public reaction to the size of the military budget.

Later, when the real inflation rate in the defense area drives up the cost of weapons beyond the initial underestimated projections, the White House and the Pentagon blithely say that "inflation" is to blame. The truth is that this institutional dishonesty is at fault.

One of Carlucci's initiatives calls for "budgeting weapons systems for inflation." Yet that has not been done in connection with Reagan's defense buildup.

Greater simplicity in Pentagon purchasing procedures would help reduce costs as well as guarantee more effective weapons. The Penta-

gon's regulations for acquisitions number in the thousands of pages and discourage competition in the bidding process.

That the Pentagon's large number of weapons systems requires a large bureaucracy of in-house advocates is no surprise. But as costly as that bureaucracy is to taxpayers, it's going to get bigger.

The General Accounting Office said that 14 major weapons system swill require about 23,000 more people over the next 10 years, about 9,000 of these civilians. This amounts to about a 40 per cent growth in the number of people who work in the Pentagon.

Gansler said the Pentagon's effort to push every weapon to the "state of the art" in technology results in companies bidding on how complex and fancy they can make a weapon rather than on how cost-effective it will be.

In addition, Gansler said, the Pentagon spends most of its research and development money with the large contractors, not the small, and sometimes more innovative, "venture" firms.

Thus, he said, too much research and development money is going for routine product engineering and data gathering, and for supporting the large teams of engineers and technical workers at each private defense plant.

Each service has its own "captive" suppliers for a weapons system, a practice that is aided and abetted by the revolving-door relationship between officials in the Pentagon and executives in defense plants around the country.

To turn this around would take new laws on conflict of interest and greater enforcement by the government in Washington.

Competition and steadier defense spending over the long run would help revitalize the aging industrial base, as would a determination by the government to stress more modern, automated machinery in its defense plants.

Some analysts have recommended that each weapons system be built through continuous competition between contractors from the beginning to the end of production.

The Pentagon reacts defensively to charges that it wastes money on weapons systems and resists efforts to cut its budget.

Instead, it points to the Soviet threat as the reason for increasing defense spending while keeping all the current weapons programs intact. In October, Defense Secretary Weinberger put out a slick book emphasizing the size of the Soviet military buildup and how that threatens national security.

Is this no different from the situation described by a former general?

"Our swollen budgets constantly have been misrepresented to the public. Our government has kept us in a perpetual state of fear—kept us in a continuous stampede of patriotic fervor—with the cry of grave national emergency.

"Always there has been some terrible evil at home or some monstrous foreign power that was going to gobble us up if we did not blindly rally behind it by furnishing the exorbitant funds demanded. Yet, in retrospect, those disasters seem never to have happened, seems never to have been quite real."

The speaker was the late Gen. Douglas MacArthur. He said it on July 30, 1957.

PENTAGON'S PROBLEMS RUN DEEP . . . AND REFORMS SEEK SOLUTIONS

(By James Coates)

WASHINGTON.—To many Defense Department insiders, it is a war just as grim as the one in Viet Nam—the battle between the Pentagon and "the reformers," and the Pentagon side is hurting.

"I think the American people need to be told the simple truth," said Rep. Newt Gingrich (R., Ga.), who was once a staunch Pentagon ally. "If war came tomorrow, the United States would lose."

After two turbulent decades of military debate between the Pentagon's hawks and its doves—the latter favored spending on social programs rather than on defense—the hawks of yesterday now find themselves splintered. A new group of "reform" hawks wants to make the military more responsible.

Gingrich once called himself a "cheap hawk" to voice both his pro-defense attitude and his frustration at the compelling evidence that the Defense Department is spending ever more money to acquire fewer and fewer weapons that often do not work as they are supposed to.

These reformers, who want the Pentagon to work better and cheaper, include some of the most powerful members of both parties in the House of Representatives and the Senate as well as some leading outside defense scholars. Also included are some Pentagon officials whose dissenting views about Pentagon management are just starting to be heard.

In a speech on the House floor, Gingrich laid out the common theme of these reformers:

"You can take every quote by President Reagan about bureaucracy in general, every quote about its waste, its silliness, its lack of direction and you can apply them to the Pentagon," Gingrich said.

"The reality is that the Pentagon is the largest, most sophisticated bureaucracy in this city; that for the last 35 years it has systematically and steadily developed an ability to do less and less while spending more and more with greater and greater complexity," Gingrich told his colleagues in an hour-long speech.

The reformers point out repeatedly that Pentagon and Defense industry insiders are the driving force behind today's focus on high technology weapons, often so expensive that only a relatively few of each tank, plane or ship can be bought.

As with many experts engaged in the debate, Gingrich used the highly complex F-14 and F-15 "air superiority fighters" of the Navy and Air Force to illustrate problems he sees throughout the military system.

Gingrich disclosed that despite the fact that these jets are designed to engage multiple enemy fighters at once, the services have failed to train most pilots for such complicated dogfights.

He said Pentagon officials acknowledged that only half the pilots of these planes demonstrated skills sufficient to engage two enemy craft at once in combat. Fewer than 10 percent of American pilots are capable of engaging three Soviet MIGs at once, he said.

Thus, he said, ". . . 50 per cent of your pilots are using the plane as though it were a dramatically cheaper one-on-one fighter plane.

"It is like using a Cadillac as a dump truck," charged Gingrich. "And it is done because the Air Force is focused on procuring hardware rather than on building a balanced force that has enough money to fly the airplane, to train the pilots, to buy the munitions and to maintain the entire system."

Another important conservative now sharply critical of the Pentagon is Sen. Bill Roth (R., Del.), who was propelled into the powerful chairmanship of the Senate Government Affairs Committee by the Republican victory last fall.

"The Russians have in recent years consistently outdone us in terms of weapons produced," Roth said. "We have, in effect been engaging in 'gold plated' unilateral disarmament even without a SALT agreement. At least in terms of sheer numbers of weapons, we have spent more money and have less to show for it."

Sen. William Cohen (R., Me.), echoed Roth's complaints and warned, "the constituency in this country for increased defense spending will be lost if the Defense Department is exempted from the scrutiny that is applied to other agencies in our search for waste and fraud."

Other powerful voices criticizing the Pentagon for its overly complex weapons projects have been Sen. Mark Hatfield (R., Ore.), chairman of the Appropriations Committee, Sen. Ted Stevens (R., Alaska), chairman of the Appropriations Subcommittee on Defense, and Rep. William Whitehurst (R., Va.), a member of the House Armed Services Committee, whose home district includes the giant naval yards and bases at Norfolk and Newport News, Va.

Whitehurst has joined with a more traditional Pentagon critic, Sen. Gary Hart (D., Colo.), to prepare a briefing for his colleagues emphasizing the so-called "quality vs. quantity" issue that questions the policy of spending large amounts of money on small numbers of arms.

Despite the big victories, Pentagon planners won in the recent arms votes on Capitol Hill, officials openly acknowledge they are concerned about the potential impact the reformers will soon have.

One of the bitterest attacks on the reformers came last month in the Air University Review, the publication of the National War College.

In the publication, Lt. Col. Walter Kross warned his colleagues about "the efforts of a small group of well-placed civilian analysts who want to recast the United States military in their preferred mold."

Kross describes the reformers as "small but well-placed, a few staffers in the Office of the Secretary of Defense, one in OMB (the White House Office of Management and Budget), a few in Congress, several consultants, a few think-tank intellectuals and, of course, a few journalists."

One of the "reformers," John Boyd, a retired Air Force colonel and a former fighter pilot, is particularly effective, warns Kross. Boyd's four-hour briefing about the history and dynamics of combat is a cornerstone of the Pentagon's new breed of foes, said Kross.

Like powerful members of Congress, these military reformers are making big gains in their drive to alter defense policy, warns Kross.

He warns his uniformed colleagues, "a handful of critics is close to precipitating a fundamental change in U.S. military strategy and forces—not because they are necessarily right, but because they make their case more persuasively in Congress and in the media than do the military services."

One leading member of the reform movement, Dina Rasor, an associate of Pentagon critic A. Ernest Fitzgerald, echoed Kross, saying that a fundamental change may develop from the new debate.

She said that the debate about "quality vs. quantity" in weapons has become a buzz word slogan.

"From the point of view of the soldier, you find there is no contradiction between quality vs. quantity," she said. "The true quality weapons are those that really work in combat.

"Weapons that work well in combat are almost invariably simple and austere—that is exactly the kind of weaponry that the taxpayers and the country can afford in the quantities we need," said Rasor.

LENDING AND CONSUMER FINANCE COMPANIES

Mr. JEPSEN. Mr. President, I rise in strong support of H.R. 4717, passed yesterday in the House of Representatives by voice vote. Specifically, I bring the at-

tention of my colleagues to section 103 of the Finance Committee amendment to that bill.

Section 103 is almost identical to S. 644, which I first introduced in the 96th Congress and then again some 10 months ago. It is a technical amendment to section 542 of the Internal Revenue Code of 1954 which seeks to update the current statutory criteria exempting certain closely held lending and consumer finance companies from the tax on personal holding corporations.

Specifically, the average debt maturity requirement is raised from 60 to 144 months, guidelines are set for credit transactions with indefinite maturities—revolving loans—and the qualifying sum for purposes of the business expense test is increased.

Section 103 recognizes the changes which have taken place in the consumer finance business over the past 15 years, and amends the revelant 542 provisions to reflect those changes. This measure is long overdue.

A brief history of the legislation seems appropriate.

On March 6, 1980, I introduced S. 2396. Referred to the Subcommittee on Taxation and Debt Management, it was discussed on April 25. The Department of the Treasury offered no objections to the legislation, nor did any other witness. S. 2396 was incorporated as section 5 of H.R. 7117 and approved by the Senate Finance Committee on November 20, 1980. On December 13 the Senate passed H.R. 7117 unanimously.

The House insisted on removing section 5 in conference because no hearings had been held before the Ways and Means Committee. This was a procedural matter, pure and simple. It had nothing to do with the merits of the amendment and Representative Al Ullman, chairman of the Ways and Means Committee, admitted as much.

THE BILL DIED

On March 6, 1981, identical legislation was introduced by me as S. 644. On May 18, testimony was again given before the Finance Committee's Subcommittee on Taxation and Debt Management, and again the Treasury raised no objections. A companion bill, H.R. 2397, was introduced in the House by Representative HOLLAND. Hearings were held before the Ways and Means Subcommittee on Select Revenue Measures. and the subcommittee reported the bill as section 5 of H.R. 4961. The full committee concurred and the measure passed the House unanimously.

Last night the Finance Committee reported section 5 of H.R. 4961 as section 103 of the committee amendment to H.R. 4717.

After 3 long years, final passage of this important bill is in sight. It has been a long fight. I thank my colleagues both here and in the House for their support.

CHILD NUTRITION AND WIC

Mr. LEAHY. Mr. President, the Nation is beginning to feel the full effects of the budget reductions proposed by the President and enacted by Congress. Unfortunately, one major effect of the President's initiatives on our children is that they have less food to eat. Child nutrition and related programs, including the national school lunch program, were singled out for even deeper reductions than the rest of the Federal budget. The Omnibus Budget Reconciliation Act (Public Law 97–35) cut back these programs by $1.5 billion, or over 30 percent of their Federal cost. This far exceeds the average reduction in other programs.

As millions of parents and school children nationwide now know, the child nutrition programs have suffered substantive reductions. Despite the campaign promises to reduce Government spending by eliminating waste, fraud, and abuse, this is not what has transpired. Only a minute portion of the child nutrition savings enacted this year address program accountability. The savings are being achieved primarily by scaling back eligibility for benefits and the level of benefits provided. It is becoming increasingly clear that there are no painless cutbacks. The child nutrition reductions inflict serious human costs.

Throughout the country, millions of schoolchildren are paying substantially more for less food than they received a year ago. School lunch participation is down significantly, threatening the financial viability of thousands of programs. There already are reports of hundreds of schools dropping out of the national school lunch program. This has the immediate effect in most of these schools of denying low-income children free and reduced price lunches. For these children, the President's promise of maintaining free lunches for poor children as part of his safety net has gone up in smoke.

Educators in my own State inform me that the brown bag lunch many children now bring serves as a poor substitute for the hot lunch they used to receive. While some parents are able to pack a nutritious lunch, many others cannot fully compensate for the loss of the school lunch program. This should not come as a surprise to anyone, especially given the deep reductions that have also been enacted this year in the food stamp and aid to families with dependent children programs.

Despite the serious impact of the child nutrition cuts already enacted, I have no doubt that the President will ask for more next year. Few people understand that the Congress did not enact all of the child nutrition reductions the President sought this year. Congress approved $400 million, or about 20 percent less in cutbacks than the President requested, and redesigned his proposals to minimize the adverse effect. If Congress had enacted the President's ill-conceived and hastily drawn proposals, the effect on school lunch and related programs would have been devastating.

Yet despite careful evaluation of these programs by Congress in the past year, the Reagan administration has already served notice that it will be back for deeper cuts next year. Office of Management and Budget Director David Stockman has repeatedly and publicly stated this fall that he favors additional reductions in school lunch support. There is also little reason to believe that the administration will not try again to achieve savings in programs where they had only partial success last year, such as the summer feeding program. And, there are reports of reductions being considered in other programs as well.

Certainly the recent relevations as to the budget deficits we now face in fiscal year 1982 and in future years make it even more likely that the President will seek draconian cuts in child nutrition programs. The President's economic plan has backed him into a corner. The failure of the economy to respond to the mystical impulses of Reaganomics leaves the President with few viable options.

Reluctant to change course in midstream by either raising taxes or lowering defense spending, he is likely to turn to additional cuts in social programs as a primary path toward more reasonable deficits. With social security at least temporarily immune from reductions, the President will probably go after the programs that were already deeply damaged this year. In large part, these are programs which serve the poor and near-poor and have no powerful political constituency to defend them.

Thus, the budget imperative the President faces will likely result in another round of deep social program cuts. Unfortunately, this situation will not allow for a careful evaluation of the merits of the proposals to be put forth. The President is likely to propose major cutbacks before there is even a chance to evaluate the impact of what was enacted this year.

Most of the key budget decisions appear to be in the hands of OMB, whose insulated officials are not accountable to constituency groups or the public at large. If newspaper reports are to be trusted, it appears that a ruthless numbers exercise is now underway at OMB, with little concern for real life effects. Even the other members of the President's team in the agencies seem to be taken aback by the audacity of OMB.

This will be a rough year for those of us who are concerned about human needs in our society. As ranking minority member of the Subcommittee on Nutrition, I am deeply concerned about the current status of nutrition programs. I believe that the nutrition program cutbacks enacted this year have already gone too far. I hope that the Congress will have the wisdom to refrain from further reductions in the future.

Mr. President, these nutrition programs are a worthwhile investment of public money. Each day brings new evidence of the link between nutrition and health. No one questions the fact that children who are well fed perform better in the classroom than those who are not.

Hasty action now to cut funding for child nutrition programs is shortsighted. Not only does it impose immediate human costs, but it may result in higher actual dollar costs to our society in the long run in terms of higher health care and education costs and lower worker productivity. I urge my colleagues to take a skeptical view of any proposals to cut child nutrition programs further.

The following summary and analysis of child nutrition program reductions enacted this year is provided as a resource to help evaluate any future cutback proposals which may be put be-

fore the Congress. Greatest attention is paid to the national school lunch program, the largest of these programs.

NATIONAL SCHOOL LUNCH PROGRAM (NSLP)

Federal support for the school lunch program was reduced about $1 billion by Public Law 97–35, a cut of about 30 percent. Most of these savings were achieved by reducing the reimbursement rates paid for lunches served in the program. Additional savings were achieved by lowering eligibility for free and reduced-price meals, doubling the price of reduced-price meals from 20 cents to 40 cents, and requiring greater documentation of current income as a condition of eligibility for free and reduced-price meals.

The most significant and controversial change made in the NSLP was a reduction in the reimbursement provided for each lunch served to "paid" children—children from families with incomes above 185 percent of poverty. The Reagan administration had proposed elimination of the approximately 33 cents per meal provided for lunches served to children in this category. Instead of eliminating this support entirely, Congress reduced it by about one-third to 21.5 cents in fiscal year 1982.

The Congress was convinced, and rightly so, that elimination of support for meals served to paid children would result in dramatic increases in the prices of meals served to these children. This, in turn, could have led to a massive drop in school lunch participation by these children and the collapse of thousands of school lunch programs throughout the country.

Even as stalwart a watchdog of Federal expenditures as Agriculture Committee Chairman HELMS seemed to agree that the administration had gone too far in attacking child nutrition programs. It was his amendment to the First Concurrent Budget Resolution for Fiscal Year 1982 that resulted in less ambitious savings targets for child nutrition than the President requested. Chairman HELM'S later introduced a child nutrition bill (S. 1254) that achieved the savings required in the budget process, but without eliminating support for paid lunches. This bill became the basis for the final child nutrition legislation adopted by Congress.

Despite the fact that Congress moderated the President's school lunch proposals and retained most of the support for paid meals, the budget reductions have had a significant impact.

Nationwide, school lunch prices are up by an average of 25 to 30 percent. In many areas, increases have been greater, with prices running as high as $1.50 per lunch. Daily school lunch participation is off 11 to 15 percent, or about 3 million children a day. Most of this decline is among children in the paid category, presumably because they cannot or will not pay higher lunch prices.

The American School Food Service Association (ASFSA) reports, and USDA data tend to confirm, that over 500 schools serving more than 100,000 children have left the NSLP altogether. While this does not represent a large percentage of the 94,000 participating schools, it is a very important indicator of what is likely to happen if more cuts are proposed. The administration denied that its proposed elimination of support for paid meals would lead to any schools dropping out of the NSLP. Yet this year's legislation, which reduced support for paid meals by one one-third, shows that there is a direct relationship between the level of paid support and the financial viability of school lunch programs.

Thousands of additional schools are monitoring the school lunch program very closely now to determine if they will continue in the program next year. Even if there are no additional cutbacks, more schools are expected to opt out of the program. For some school districts, an announcement by the President that he intends to seek deeper cuts could alone be enough to drive them from the program.

If the President decides to seek additional reductions in support for paid lunches, and this is being considered seriously downtown, the effect could be disastrous. When the President's child nutrition budget for fiscal year 1982 was announced earlier this year, ASFSA estimated that up to one-third of all schools across the country would be forced from the NSLP. Twenty States estimated that 50 percent or more of their schools would drop out. The initial reaction of school systems to this year's cuts indicates that these are not idle threats.

The administration itself acknowledged the danger of cutting paid reimbursements too far by publishing the controversial September 4, 1981, regulations on meal patterns, now withdrawn. The intent of those regulations was to reduce the costs of producing a lunch, so that the price increase for paid children due to the loss of Federal reimbursement would not be so steep. While this was a laudable goal, the proposed regulations went too far. They would have unnecessarily reduced program standards and undermined the public's confidence in the nutritional value of the NSLP. If the administration truly believed that an elimination of the paid subsidy would have no serious effect on the NSLP, there would have been no need to propose regulations of such a sweeping nature.

Should the President propose to cut paid meal reimbursements further, he would be doing so against the advice of key Members of Congress. In separate letters, majority members of the Senate Committee on Agriculture, Nutrition, and Forestry and minority members of the House Committee on Education and Labor have written to high-ranking administration officials urging that he refrain from further proposals to reduce NSLP funding. I will ask unanimous consent that these letters be included as part of the RECORD following my statement.

SCHOOL BREAKFAST

Reductions enacted in the school breakfast program are similar to those enacted in school lunch, in that eligibility for free and reduced price meals was curtailed and reimbursements for reduced and paid breakfasts were decreased. The charge for reduced price breakfast was nearly tripled. In addition, eligibility for "severe need" assistance, a special program that provides additional funding for certain schools with documented higher costs, was restricted. Altogether, these reductions represent a 20-percent reduction in funding.

Unlike the school lunch program, the breakfast program primarily serves children from poor and near-poor families—85 percent of all participants qualify for free or reduced-price meals. With this reduction in funding, which included a large cut in reduced price reimbursement, this program has also been pushed to its limit. While no data on school and participant dropout is currently available, this year's cutback makes the continuation of breakfast programs by financially hard-pressed school districts more difficult. Further reductions are likely to primarily affect low-income children.

Participation in the school breakfast program is, in most instances, a matter of local choice. The program can be invaluable in rural areas, where schoolchildren must rise early in the morning for long bus rides. Many children prefer not to take the bus ride on a full stomach. In addition, breakfast at school helps many to maximize academic performance throughout the morning. Particularly with the elimination of the special milk program in most schools, children who have eaten very early in the morning may find their concentration waning by midmorning.

The school breakfast program takes on added importance in light of increased participation of women in the labor force. For working wives, and especially for single mothers, the provision of an adequate breakfast may not be possible because of work demands. Parents may work shifts that require them to be out of the house or to be resting at the breakfast hour.

While breakfast most often remains a parental responsibility, various communities have opted to provide a breakfast at school. Especially in low-income areas, this breakfast may provide better nutrition than the parents can afford. Further erosion of support for the school breakfast program could have a deleterious effect on the health and school performance of many young children, primarily those from low-income families.

CHILD CARE FOOD PROGRAM

Under the child care food program (CCFP), the Federal Government provides funding to assist in the cost of serving meals and supplements—snacks—to children in child care centers and group and family day care homes. Public Law 97–35 reduced Federal funding for CCFP by about 30 percent. For programs in child care centers, eligibility guidelines and meal reimbursements were reduced to the same lower levels as in the school lunch and breakfast programs.

Reimbursement rates for snacks were reduced and lower age limits were set for CCFP eligibility. For programs in family and group day care homes, meal and supplement reimbursements and payments for administrative costs were reduced 10 percent. While no useful data on the effect of these cutbacks are yet available, these cutbacks will unquestionably make life more difficult for many working mothers and fathers, especially single working parents.

At a minimum, day care center rates

will rise to compensate for the loss in Federal funding. Combined with the decreased funding available under Title XX of the Social Security Act, CCFP reductions could result in significant rate increases. Some working parents with low wages could find the increased costs prohibitive and might have to turn to alternative, inferior child care arrangements or leave their jobs altogether to care for children. Another possibility is that the decreased Federal funding will force some child care centers to close.

The reduction in CCFP funding will also be a deterrent to the opening of additional child care centers. This, in turn, assures that the unavailability of adequate child care will continue to inhibit many parents, including welfare mothers, from finding employment and gaining financial independence. Along with many other changes in welfare policy adopted in Public Law 97–35, reduced CCFP funding results in heightening the disincentives for many people to go to work.

SUMMER FOOD SERVICE PROGRAM

The summer feeding program provides free meals in the summer months through schools or service institutions to children located in "areas in which poor economic conditions exist." In recent years, it served about 2 million children a day.

The Reagan administration had requested complete elimination of the program. Public Law 97–35 cut the summer feeding program by over half, restricting sponsorship of the program to school food authorities, local governments, and certain camps, such as fresh air camps. Eliminated from sponsorship were virtually all private sponsors, including many churches. In addition, the requirement that programs exist in poor economic areas was tightened.

For many poor children, the summer feeding program has been the summer equivalent of the school lunch program. For many of them, it has provided their best meal of the day. In addition, the mid-day meal provided by most programs has served as the focal point of the day for recreational programs, helping to keep children in organized programs throughout the day. For many low-income working parents, it has assured that their children will receive a square meal while they are at work.

Elimination of most private sponsors was justified on an accountability basis, although many private sponsors with impeccable records were eliminated from the program. A further cut cannot be justified, except as a means to save money. These savings would come directly at the expense of poor children. Although theoretically possible, there is no evidence that any children other than those from low-income families participate.

The administration appears likely to repeat its proposal of last year to eliminate the program altogether when the President's fiscal year 1983 budget is issued. Such a proposal would leave an additional 1 million children a day at loose ends to receive a nutritional lunch during the summer months.

The administration's continuing antipathy to the program was exhibited again last week. Proposed regulations for the fiscal year 1982 program were issued more than 5 weeks after statutory deadline for such issuance. If finalized in their present form, these regulations would unduly restrict the participation of sites sponsored by the local governments. There would be wholesale elimination of programs in several States, including Illinois and Michigan. And because of its own tardiness in issuing regulations, USDA limited the comment period to a less than adequate 20 days.

NUTRITION EDUCATION AND TRAINING

This program provides grants to State educational agencies to establish programs to teach children about the nutritional value of foods and the relationship between food and health. Also under this program, teachers and food service personnel are provided with nutrition education and training.

The President proposed elimination of this $15 million program. In Public Law 97–35, Congress retained a $5 million program. Thus far, in fiscal year 1982, Congress provided funding under continuing resolutions to operate the program at the $5 million level. However, USDA has spent no fiscal year 1982 money on NET, and apparently has no intention of doing so in the future. NET programs are closing down throughout the country.

The closing down of NET is shortsighted. Throughout the country, school lunch administrators are being asked to provide the same level of nutrition as before, but with fewer dollars. There is a need for as much technical assistance as possible in nutrition education and training for these people.

Furthermore, NET may well be a cost-effective program. A California study indicates that for students participating in the NET program, overall plate waste decreased 26 percent. These students also exhibited significantly increased understanding of good nutrition and their food choices reflected this understanding. Certainly education and training is a far preferable solution to the problem of plate waste than reducing portion sizes.

EQUIPMENT ASSISTANCE

Under this program, funding was available to schools and child care institutions for food service equipment to store, prepare, serve, and transport food. Public Law 97–35 eliminated this $15 million program, as requested by the President.

SPECIAL MILK PROGRAM

Until this year, the special milk program provided funds to subsidize the cost of milk served to children that was separate from, or in addition to, milk served as part of school lunch and breakfast programs. The program included all public and private nonprofit school and child care institutions wishing to participate. This milk might be served at midmorning or midafternoon, or in addition to milks provided at lunch or breakfast.

For most schools, those participating in another federally subsidized meal program, the Federal subsidy rate was 5 cents per half pint of milk for nonpoor children and the full cost of the milk for poor children. For schools not in another federally subsidized meal program, the milk subsidy for nonpoor children was and remains higher and is adjusted annually for inflation. In fiscal year 1982, the subsidy is about 9.5 cents per half pint.

Public Law 97–35 adopted the President's proposal to eliminate the special milk program in all schools and institutions that participate in another federally subsidized meal program. This change reduces the program by about 90 percent, with an annual savings of $100 million. The net effect is that in most schools and child care institutions, all children must pay full price for any milk they receive outside of the school lunch and breakfast programs.

WIC AND CSFP

The special supplemental food program for women, infants, and children (WIC) and the commodity supplemental feeding program (CSFP) are two closely related programs which provide nutritious supplemental foods for low-income women and children. The WIC program is far larger, operating at about $900 million in fiscal year 1981, compared to less than $30 million for CSFP.

WIC and CSFP were the only nutrition programs to emerge virtually unscathed from the budget reconciliation process. Public Law 97–35 would allow funding increases in these programs to allow them to serve as many persons in fiscal year 1982 to fiscal year 1984 as were supposed to be served in fiscal year 1981. In the case of WIC, Congress provided funding to serve about 2.2 million persons in fiscal year 1981.

The status of WIC and CSFP is now uncertain. Despite the fact that the conference report on agriculture appropriations (H.R. 4119) assumes full funding for these programs, WIC and CSFP may face fiscal year 1982 program cutbacks as a result of somewhat reduced funding levels in continuing resolutions. In addition, the President continues to seek a 35- to 40-percent reduction in these programs, which could be attempted through a deferral or rescission. The President did submit a deferral on WIC and CSFP following the first continuing resolution for fiscal year 1982.

The success of programs like WIC in fighting infant mortality and low birth weight among infants is well documented. Studies indicate that WIC may well be cost effective in the health care costs it averts. Time and time again this year, broad bipartisan coalitions in Congress have voted to maintain full funding for WIC and CSFP.

It would appear that the only serious opposition to WIC and CSFP lies within the Reagan administration. During fiscal year 1982, USDA allowed WIC participation to fall by over 200,000 persons, despite the availability of funding for these persons and an abundance of applications for participation. Even after Congress had rejected his proposal to lower WIC and CSFP funding from about $1 billion to $742 million, the President lowered his request for WIC and CSFP by an additional 12 percent in September. His current combined request for WIC and CSFP for fiscal year 1982 is about $652 million, or nearly $400 million below what is authorized. It would appear that the President will continue to try to cut these programs back in whatever way he can and his fiscal year 1983 budget is likely to reaffirm this intention.

CONCLUSION

The program reductions documented above indicate that child nutrition and related programs have already been subjected to more than their fair share of belt tightening. These are the types of short-term budget reductions for which we will pay for years to come. I hope my colleagues will join me in resisting further changes that would undermine these programs' effectiveness.

Mr. President, I ask unanimous consent to have printed in the RECORD a letter dated October 27, 1981, to Mr. James A. Baker III, Chief of Staff and Assistant to the President, from the Committee on Agriculture, Nutrition, and Forestry; and a letter dated October 28, 1981, to David A. Stockman, Director, Office of Management and Budget, from the House Committee on Education and Labor.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

COMMITTEE ON AGRICULTURE,
NUTRITION, AND FORESTRY,
Washington, D.C., October 27, 1981.

Mr. JAMES A. BAKER III,
Chief of Staff and Assistant to the President, the White House, Washington, D.C.

DEAR JIM: There is speculation that the Administration is planning to propose, as part of its next round of budget cuts, a total elimination of the subsidy to "paying" students in the National School Lunch Program.

When the Administration proposed this method of achieving savings in the area of child nutrition programs last time around, the input from the local level on the potential impact caused a great amount of concern among members of Congress. In marking up legislation to achieve savings called for in the First Concurrent Budget Resolution for Fiscal Year 1982, no member of the Senate Committee on Agriculture, Nutrition and Forestry even suggested the Administration's proposal to terminate the subsidy to "paying" students. As you know, Congress did agree to reduce substantially the subsidy to the paying child, but specifically rejected the Administration's proposal to eliminate it entirely.

A total elimination of the subsidy to "paying" students participating in the National School Lunch Program could have a devastating effect on the viability of the Federal program. Over 90 percent of all the schools in the country participate in the National School Lunch Program. This year, schools will receive 21.5¢ in Federal general assistance toward each lunch served (11¢ in USDA-donated commodity support and 10.5¢ in cash). This 21.5¢ represents a 40 percent reduction in Federal assistance. The 21.5¢ subsidy is not a subsidy directly to non-poor children, or the "paying" child—it is a grant-in-aid to the schools to help defray the cost based on total student participation, regardless of income.

In thousands of school districts throughout the country, less than one-third of the students are eligible for free or reduced price lunches. According to last year's figures, about 55 percent of all school lunch participants are in the "paid" category: they are children whose parents' income exceeds 185 percent of poverty (or about $15,600 for a family of four).

Those at the local level who administer the program and are most familiar with how it works argue that a complete elimination of general assistance for lunches served to "paying" children would cripple the Federal lunch program. There is substantial evidence to support their point of view. The loss of the Federal reimbursement would result in sharply rising school lunch costs for these children, with resultant high dropout rates and potential program termination. Thus needy and non-needy alike would fail to receive Federal support.

When the Administration first proposed significant reductions in school lunch funding, it also listed this as one of the seven "safety net" programs. If the Administration continues to consider this a "safety net" program, we suggest that it consider other alternatives to the elimination of the "paid" lunch subsidy in order to achieve the needed level of savings. We would like to make members of our staff readily available to discuss children, with resultant high dropout rates options with the Administration.

It seems to us that the Federal savings that would be gained by eliminating the "paid" subsidy are more than overshadowed by the severe consequences it could have for the program, and therefore the Administration. We feel certain this proposal would fail dramatically in Congress. In short, as members of the Senate Committee on Agriculture, Nutrition, and Forestry, we are deeply concerned about the program and the political consequences of such a proposal. Because more viable options are available, we wanted to share our concern with you before the Administration is irrevocably committed to an option which is certain to fail.

Sincerely,

BOB DOLE.
JESSE HELMS.
THAD COCHRAN.
S. I. HAYAKAWA.
PAULA HAWKINS.
RUDY BOSCHWITZ.
MARK ANDREWS.

COMMITTEE ON
EDUCATION AND LABOR,
Washington, D.C., October 28, 1981.

Hon. DAVID A. STOCKMAN,
Director, Office of Management and Budget, Old Executive Office Building, Washington, D.C.

DEAR MR. STOCKMAN: We have learned that a Task Force on Entitlement Programs within the Administration is considering additional reductions in the level of Fiscal Year 1982 Federal assistance to the paying child who participates in the National School Lunch Program.

Until the Administration and the Congress have an opportunity to assess carefully the full impact on the various child nutrition programs of the very recent and major reductions made under the provisions of the Omnibus Reconciliation Act of 1981, requests for additional reductions in the levels of Federal support for these vital programs would, in our judgment, be premature and inappropriate.

According to responsible and high-level Administration spokesmen within the U.S. Department of Agriculture, the data necessary for any analysis of the impact of the newly-enacted reductions in Federal support on these programs is not now available—nor will such data be forthcoming for several months. Nonetheless, it should be noted that the preliminary data which is available does suggest a decline in the number of schools continuing to participate in the National School Lunch Program, thereby eliminating thousands of youngsters who are otherwise eligible for free and reduced price lunches. Moreover, a drop in the level of participation by the so-called paying students has been experienced nationwide.

We concur in the President's objective to continue to provide a nutritious meal service to this Nation's truly needy youngsters. To this end, the role and participation of the paying students is crucial. Since free and reduced price lunches for the truly needy are only mandated when schools participate in the NSLP, any decision which results in the large scale dropout of schools from the program would mean a serious breach of the safety net. Unfortunately, it is a role which many top-level policymakers within this Administration do not fully appreciate.

Should large numbers of paying youngsters decline to participate in the school lunch program, education decisionmakers at the local level will be faced with a most difficult decision as to whether or not they can afford to continue to offer the benefits afforded through the National School Lunch Program to fewer pupils while simultaneously having to continue to meet a number of fixed costs which cannot be further reduced or eliminated.

Sizeable additional reductions in Federal support coupled with, in many cases, a further reduction in the level of State support plus an uncertain immediate future for this program will make the decision an easy one—the National School Lunch Program will be terminated in school district after school district across the country. Should this be the case, the Administration and those of us in the Congress who concur in President Reagan's stated objective to meet the nutrition needs of the Nation's truly needy youngsters will be without the only reliable and proven vehicle that will enable us to honor this commitment.

We firmly believe that the full impact of the changes called for in the Omnibus Reconciliation Act of 1981—when fully realized at the State and local levels—will be all that the traffic can bear. In short, further cutbacks in Federal assistance to the National School Lunch Program, in particular, and the child nutrition programs, in general, are simply out of the question at this time.

We regret to advise you, therefore, that we would have difficulty entertaining any further reductions in Fiscal Year 1982 Federal outlays to these important programs which may be under consideration within the Office of Management and Budget or elsewhere within the Administration. Our side of the aisle could not deliver the votes you would need.

Sincerely,

JOHN M. ASHBROOK.
TOM COLEMAN.
JAMES M. JEFFORDS.
LARRY E. CRAIG.
BILL GOODLING.
ARLEN ERDAHL.
LAWRENCE J. DENARDIS.

INFANT FORMULA/BREASTFEEDING DEBATE

Mr. LEAHY. Mr. President, of all the tragedies associated with the horror of world hunger, none is more touching than the death of newborns and infants through malnutrition. Among the many causes of infant illness, the use and misuse of infant formula raises important questions.

Who should use formula? Many argue that a woman suffering from extreme poverty and malnutrition cannot successfully breastfeed. But if a woman is that poor, she would be unable to afford formula and will resort to overdilution, resulting in the slow starvation of her baby.

How is it used? While there is no doubt that artificial formulas provide vital nutrition for millions of babies throughout the world, there is a problem when this formula is improperly prepared or stored. Unsanitary preparation and impure water can turn the baby bottle into a lethal weapon in the baby's mouth.

Earlier this year the Senate expressed strong concern over the misuse of formula and the value of breastfeeding. Specifically, the Senate expressed concern over the lone opposition of the United States to the UNICEF/World

Health Organization Infant Formula Code.

The problems of infant formula misuse are still with us, Mr. President, both in the Third World and right here in this country. In this regard, I ask unanimous consent to have printed in the RECORD an article from the New York Times.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Dec. 6, 1981]

INFANT FORMULA-BREASTFEEDING DEBATE

(By Stephen Solomon)

When the Jamaican woman brought her two babies to Alan Jackson's clinic at the University of the West Indies in Kingston, the pediatrician was shocked by their condition. Her 4-month-old son weighed only five pounds—two less than at birth—and her daughter was in even worse shape. At 18 months, she weighed only 12 pounds, and soon lost four more.

When Dr. Jackson questioned the woman, who had 10 other children, he discovered that she had never breastfed her two youngest. Their diets since birth had been infant formula. Because the family income averaged only $7 a week, the mother had to heavily dilute the expensive formula to make it last longer. "For the 4-month-old baby," Dr. Jackson later told Senator Edward M. Kennedy's Subcommittee on Health and Scientific Research, "one tin of feed should have lasted for something just under three days. She said that one tin of feed lasted two weeks to feed both of the children."

There is no third-world poverty in Cooperstown, N.Y. The big homes and manicured lawns give the aura of a town happily stalled in the security of the 1960's.

But Allan Cunningham, who had been a pediatrician for a tribe of Sioux Indians before moving to Cooperstown, became aware of something odd about his new patients at Mary Imogene Bassett Hospital: Nearly all of the sick infants he treated were formula-fed.

Dr. Cunningham's subsequent investigation, published as two studies in The Journal of Pediatrics showed that illness occurred twice as often among babies who were not breast-fed; in the first two months of life, the difference was 16-fold.

Dana Raphael was one of the first scientists to hold the formula companies responsible for high infant mortality, but then she decided it wasn't quite that simple. An anthropologist who heads the Human Lactation Center Ltd., in Westport, Conn., Mrs. Raphael changed her mind after a study team she led spent two years observing how women in 11 different cultures around the world feed their babies.

What the team found was that many poor and undernourished third-world women are physically unable to breast-feed and that others are too preoccupied with the basics of survival to find the time to do so. Though she still strongly favors breast-feeding when possible, Mrs. Raphael now believes that the general unavailability of food is responsible for high infant mortality. "Formula is good for the mothers who can afford it," she says. "If every 3-month-old baby could have a sufficient amount of formula, they'd all live. But the price is prohibitive. They're lucky if they can afford a cup of buffalo milk every day."

The controversy and confusion over opinions such as these reached the scale of global conflict earlier this year when the World Health Organization (W.H.O.) voted 118 to 1 to adopt a nonbinding code restricting the promotion of infant-formula products.

The United States' lone dissenting vote was explained, in part, by Elliott Abrams, Assistant Secretary of State for International Organization Affairs (since appointed to be the Assistant Secretary of State for Human Rights). "Despite our governmental interest in encouragement of breast-feeding," he said the W.H.O. recommendations for a complete ban on advertising to the general public of infant formula and the proposed restrictions on the flow of information between manufacturers and consumers "run counter to our constitutional guarantees of free speech and freedom of information."

In protest against this stand, two high-ranking health officials at the United States Agency for International Development (A.I.D.) resigned their positions and joined a chorus of critics at home and abroad. Lois Salisbury, for example, a lawyer with Public Advocates, a San Francisco firm that represents 14 national organizations, rejected the Reagan Administration's contention that marketing standards were not needed in the United States. "Studies have shown," she said, "that there is an epidemic of formula misuse among low-income families in cities like Houston and Los Angeles."

At the center of the increasingly bitter conflicts are babies, millions of babies with the shriveled limbs and the distended bellies that signal kwashiorkor, the Ghanian term for malnutrition that has become part of the medical literature. According to UNICEF, about 11 million infants in developing countries—more than the combined populations of New York and Los Angeles—die each year before reaching their first birthday. Most of them succumb to malnutrition or diarrheal diseases. Although estimates vary widely, Dr. Stephen Joseph, one of the A.I.D. officials who quit last May, blames reliance on infant formula for about a million of these deaths.

The formula itself is a nutritious product, and it can be an acceptable alternative to breast milk under certain conditions; when the mother can affford to buy sufficient quantities; when she has access to refrigeration, clean water and adequate sanitation, and when she can understand the directions well enough to mix the formula properly. And, as nutritionists point out, formula can save lives. Dr. Joseph remembers a cholera epidemic in Chad in 1972, when "a lot of mothers died." Fortunately, he says, "we had formula available through international agencies and we saved a number of kids."

He and many other physicians argue, however, that most third-world women cannot use formula safely and that, as a result, their babies became seriously ill and malnourished. They also charge that aggressive marketing of formula has contributed to a vast shift away from breast milk, the safest and most nutritious food for infants.

The formula companies deny that their marketing has influenced the choice of feeding methods, and they contend that misuse of their products is rare. For them, a rich global market is at stake. Formula sales in this country reached $550 million last year at the wholesale level, divided principally among Abbott Laboratories (50 to 55 percent), the Bristol-Myers Company (40 percent), and American Home Products Corporation (8 percent). In the world market, estimated to be as great as $2 billion wholesale, Swiss-based Nestlé commands a 50 percent share, while the American companies and dozens of other competitors divide the rest.

Leah Margulies, a founder of Infact (Infant Formula Action Coalition), now associated with the Interfaith Center on Corporate Responsibility of the National Council of Churches, says that many antiformula advocates are "in favor of a choice that's real; we want mothers and families to make a decision that's not based on the marketing strategy of a high-profit industry." (Among the alternatives, Infact supports suggestions by nutritionists who recommend the mixing at home of powdered milk with sugar and oil, or yogurt.)

The controvery over formula did not boil over until the publication in 1974 of a journalistic exposé. "The Baby Killer," by War on Want, a London organization. The booklet, which was widely translated and distributed, brought scores of groups, many of them church-related, into the fray. While some of them launched shareholder suits and resolutions against the American manufacturers, others began a nationwide boycott of Nestlé products. The nerve center of the protest became the Interfaith Center on Corporate Responsibility. Commenting on the boycott, Rafael D. Pagan, Jr., president of the Nestlé Coordination Center for Nutrition in Washington, says: "Nestlé, of course, is a Swiss company and does not manufacture, distribute or sell infant formula in the United States, and thus there has never been any direct impact on the company through that product."

The words that each side uses against the other are not the kind usually heard among the pews on Sunday mornings. So vituperative is the rhetoric that it is easy to imagine both sides settling the issue in a back alley after dark. It is a battle in which politics and money, not science, have come to dominate.

And yet it is the scientists who must ponder such difficult questions as: How long can a malnourished mother adequately suckle her baby? If formula is denied to mothers, will they put watery gruel or weak tea into the feeding bottles instead? Can mothers combine local foods in a nutritious mixture, eliminating the need for expensive formulas, as some international organizations and a few third-world countries have suggested might be an acceptable alternative?

Mother's milk is the world's original and best fast food, a complex recipe containing more than a hundred nutrients, many of which are different chemically from those found in formula products. In most healthy women, these nutrients are enough to sustain a baby's growth for the first four to six months of life.

Mother's milk is also a potent armament against infection. Like a soldier stripped of weapons, a baby at birth lacks many of the biological agents that fight bacteria. While its own immune system matures, an infant acquires antibodies from its mother's milk that are effective against the intestinal infections that are the leading killers of infants in developing countries. "The immune system in human milk has evolved over millions of years specifically to protect infants, and it's uniquely different from milks used as substitutes," says Dr. Armond S. Goldman, a professor of pediatrics and of human biological chemistry and genetics at the University of Texas's medical branch in Galveston.

Despite its advantages, human milk has always competed against other methods of feeding. Beginning, perhaps, with those whose mothers died in childbirth, babies have fed on the milk of cows, goats, yaks and camels, horses, reindeer and buffalo. But these milks are unlike the human variety.

Since the middle of the last century, scientists have tried to modify cow's milk to make it biologically more similar to human milk and to enhance its digestability. But actual "formulas" did not appear until close to the turn of the century. A pediatric text in 1904 offered no fewer than two and a half pages of formulas for calculating the composition of infant food. Soon after, early versions of modern formula products became available without a prescription.

The infant formula is still biochemically different from human milk. The protein components in it can cause serious allergic reactions in some infants, such as diarrhea, vomiting, abdominal pains and skin rashes. And it lacks some of the nutrients of human milk, such as taurine, which may be involved in the early development of the brain. "For us to think that in 40 years we can duplicate what has happened in four million years of human development is very arrogant," says Dr. Gerald Gaull, a pediatrics professor at Mt. Sinai School of Medicine in New York.

The companies that make formula start either with skim milk or with whole milk from cows, and remove the fat that infants find difficult to digest. After the milk has been diluted with water to reduce the level of protein, a milk sugar called lactose is added, as well as a combination of vitamins and minerals. Finally, a blend of vegetable oils is used to restore the fat, which the babies need, in a form they can digest. The formula is marketed either already mixed or in a powdered form, to which mothers add water.

The formula market did not begin its dramatic expansion until birthrates skyrocketed after World War II. Women in Western countries flocked to the feeding bottle as a "scientific" method that also liberated them from the home. The National Fertility Survey in 1965 showed that 68 percent of mothers born between 1911 and 1915 breast-fed their first baby, compared with 35 percent of mothers born in the early 1940's. Surveys by Ross Laboratories, which produces Similac, show that the incidence of breast feeding at one week of age fell from 34 percent in 1951 to 23 percent in 1971. But breast-feeding resurged to 54 percent in 1980, probably because of increasing awareness of the advantages of mother's milk and the activism of groups like La Leche League, whose insistence that nature's way is best appeals to a generation weaned on ecology.

However, a recently released study conducted by the New York City Department of Health revealed that 68 percent of the mothers who gave birth in all types of city hospitals last year planned to use infant formula; the figure rose to 82 percent in municipal hospitals, where most of the maternity patients are lower-income women. Infant formula is popular with some low-income women because they see it as "a kind of status symbol," says Judith Gordon, formerly a researcher at the city's Bureau of Maternity Services, but doctors believe that a more significant contributing factor is the need for many of these women to return to work soon after giving birth, which makes formula the simplest feeding method.

In the third world, where the controversy over formula has been the most intense, the decline in breast-feeding has been more rapid and more recent. It started among the urban elite about 20 years ago and then spread quickly throughout the population, although, for the most part, rural villagers are much less affected. While many mothers have rejected breast-feeding entirely, the biggest changes involve an earlier termination of suckling and a more widespread practice of mixed feeding, utilizing both the breast and the bottle.

A number of powerful social and economic forces have caused the shift away from the breast in developing countries. When rural mothers move to the big cities, as they have in massive numbers in recent years, the psychological stress of urban life sometimes causes a physical inability to lactate. Additionally, many of the women must take jobs outside the home, and so cannot conveniently breast-feed their children.

Aggressive promotion of formula seems to have played a large role in the decline of breast-feeding, too, although its precise impact is difficult to measure. The companies which manufacture it argue that their promotions target only urban families who have the money to buy formula in sufficient quantity and the facilities to prepare it hygienically. And they insist that they tailor their advertising campaigns in both developed and underdeveloped countries so that formula competes only with local foods, not with breast milk. "Breast milk from a well-nourished mother is a superior product to ours," says Harry Levine, a vice president of Bristol-Meyers. "The biggest market is cow's milk, and that's waht we compete against."

The companies have not always been surgically precise with their promotional activities, however. After surveying marketing practices in four underdeveloped countries during 1976 and 1977, the W.H.O. said: "The distributors themselves reported that they were not limiting the distribution of products by either geographical or socioeconomic criteria."

Until a few years ago, when they ended the practice in response to widespread protest, Nestlé and the American formula companies advertised heavily in the print and broadcast media of developing countries. In Brazil, where infant formula was the most advertised product after cigarettes and soap, the advertisements usually promised, if only subtly, that formula was the modern method of infant feeding, associated with upward mobility, and that it would produce babies with fat cheeks.

The formula companies have promoted most heavily, though, through health-care systems, both at home and abroad. As Ross Laboratories indicated in a selling manual issued to its American personnel in 1975 (and later withdrawn): "When one considers that for every 100 infants discharged from the hospital on a particular formula brand, approximately 93 infants remain on that brand, the importance of hospital selling becomes obvious." Under a contract signed in 1974 with New York City, Ross was given a guarantee that every new mother leaving a municipal hospital would be given a free one-day supply of Similac.

For a time, many companies employed "mothercraft" nurses, most of whom wore white uniforms, who visited women in maternity wards and in their homes. As they helped mothers to cope with infant-rearing problems, many of the nurses also promoted their company's formula. Dressed in traditional nurses' uniforms, they conveyed the false impression that independent health professionals—not company employees—were recommending formula feeding. The major companies finally responded to harsh criticism of these practices by eliminating first the uniforms and then the nurses who had worn them.

In many third-world hospitals, the staff routinely separates the mother and baby at birth and feeds formula to the baby during its entire stay in the pediatrics ward. On discharge, the mother receives a free tin of formula and a feeding bottle. By the time the mother has finished her free tin of formula, she may be a confirmed bottle-feeder and her baby, accustomed to the easy sucking on an artificial nipple, may rebel at the more demanding task of drawing milk from a breast. Or, says Dr. Carl Taylor, chairman of the Department of International Health at Johns Hopkins University, "the mother's milk can dry up and then the baby is hooked on formula."

In Nigeria, according to the W.H.O., the average clinic may receive as many as 8,000 free cans of baby formula each year. And about five million feeding bottles—many of them gifts of the formula companies—were distributed each year during the late 1970's in India, Nigeria, Ethiopia and the Philippines.

The companies defend these practices by pointing to the same W.H.O. study, in which none of the 23,000 women, mostly in developing countries, who were asked why they had stopped breast-feeding attributed the choice to promotional practices. But as some formula critics point out, the W.H.O. researchers were not trying to measure the effects of commercial promotion, and it seems unlikely, in any case, that questioning would have brought out the kind of subtle influence that advertising can have on decision-making.

The health consequences of the shift to bottle-feeding in the third world have been severe. Halfdan Mahler, director general of the W.H.O., says that "evidence from developing countries indicates that infants breast-fed less than six months, or not at all, have a mortality rate 5 to 10 times higher in the second six months of life than those breast-fed six months or more."

A baby who does not suckle loses the immunological protection that mother's milk provides against the bacterial assault of polluted water and primitive sanitation. In Western countries, where contamination is seldom a problem, the loss of these antibodies is not disastrous. And yet the Cooperstown, N.Y., study suggests that even infants in developed societies, when denied the immune agents in mother's milk, have higher rates of serious illness, though nutritionists caution that much more research needs to be done.

Mother's milk also provides a clean and sterile method of feeding. When babies in third-world countries feed on formula, they face myriad dangers from their bottles. Fatima Patel, a nurse who works with Peruvian Indians in the Amazon, told Senator Kennedy's committee in 1978 how villagers prepare formula in that area: "The river is used as a laundry, as a bathroom, as a toilet and for drinking water," she said. "Now, you can tell the mother to boil the water . . . but to get the fuel to boil that water, she has to go into the jungle, chop a tree trunk with a machete . . . and carry it on her back. No mother is going to use that hard-earned piece of wood to boil that water. . . . So, the babies are drinking the contaminated water."

And if the infant does not finish its bottle of formula, the mother may save the rest, unrefrigerated, until the next feeding. "Stored at room temperature in a tropical country," says Dr. Taylor of Johns Hopkins, "you have explosive bacterial growth. So the bottle becomes a lethal instrument."

Overdilution is another serious hazard of formula-feeding. A medical team from an Indonesian university analyzed the mothers at four health clinics in that country. Their study, published last year in The Journal of Tropical Pediatrics, revealed that only one in four women had mixed the milk reasonably close to its recommended strength, despite their above-average economic and educational status and the clear directions on the cans. The researchers also found "gross contamination" of the milk by fecal organisms, through the water supply, and concluded that babies fed with a bottle should be classified "high risk." In other cases, mothers who cannot sustain regular formula purchases start using cheaper mixtures such as rice water and sugared tea.

The earliest medical studies that demonstrated the benefits of breastfeeding were conducted in the United States and Western Europe more than 75 years ago, when sanitation was poorer and infant mortality higher. These studies suggest that the risks of bottle-feeding in the third world are similar to those faced by Western babies a century ago.

Contemporary reports are nearly unanimous in finding major benefits from breast-feeding. A research team at the São Paulo School of Medicine, for instance, studied a low-income population in that Brazilian city for two years. Its findings, published in 1980, indicated that 9 percent of the infants who were breast-fed up to the age of six months were suffering from malnutrition, compared with 32 percent of those who had received only artificial feeding.

Some of the best evidence comes from hospitals that have radically changed their policy on infant feeding. In Baguio City, in the northern Philippines, doctors had routinely separated mothers and babies at birth and fed the babies with formula. In 1975, however, the hospital began returning each infant to its mother within an hour of birth, and mothers began breast-feeding on demand. The results were dramatic. As the incidence of breast-feeding soared, the rate of morbidity (illness) and mortality dropped dramatically.

A similar program worked just as successfully at a hospital in Puriscal, a rural region of Costa Rica. Four years after babies began

suckling at their mother's side, the rate of diarrheal disease had dropped by 91 percent, meningitis by 92 percent, and lower-respiratory infection by 43 percent. The mortality rate for acute infection declined by 81 percent.

Most studies coming out of underdeveloped countries, however, have flaws in their methodology. Some compare breast-feeding with bottle-feeding without specifying what is in the bottle; others rely on the mother to recall what she was feeding her infant at various times during the infant's first year. But a study conforming absolutely to the classic scientific method may not even be possible. Mothers themselves choose their method of feeding, and their choice seems to reflect some inherent differences that can bias the results. In large third-world cities, mothers who choose breast-feeding, for example, are often better-educated and have greater financial means, which may affect infant-care practices. Another difficult problem is that breast-fed babies tend to be weaned at some point to the bottle, and the reason for this change in individual cases—illness of the infant, for example—may prejudice the study.

Does this mean that the studies are meaningless, that they will not support the making of public-policy decisions about the promotion of formula? With virtually every study from underdeveloped countries pointing in the same direction, most nutritionists conclude that bottle-feeding with formula or any other food places most poor third-world babies at a great risk of illness or death.

Dr. Nevin Scrimshaw, director of the M.I.T.-Harvard International Food and Nutrition Program, puts it bluntly: "The studies are conclusive. Failure to breast-feed in rural developing communities is tantamount to a death sentence."

A leading figure in international nutrition for several decades, Dr. Scrimshaw was director of the Institute of Nutrition of Central America and Panama for 12 years. He is a consultant to a new M.I.T.-Harvard project to develop supplementary foods that third-world mothers can prepare in the home from local inexpensive grains and vegetables. "Breast is best," he says, "but what comes next? The problem of infant nutrition won't be solved by emphasizing breast-feeding alone. Breast-fed children in developing countries begin to falter at four months because the milk is not sufficient. The second aspect of insuring the health of children is attention to the weaning period."

The problem of what to feed infants during the weaning period is the most difficult of all. Without human milk, a baby's prognosis is often grim. Its new menu may deliver the double whammy of bacteria and low food value, starting it on a quick slide to malnutrition.

Many babies never breast-feed at all, or are weaned in the first month or two, and for them there are few options. Some type of milk product is a necessity for the youngest infants, who are unable to digest solid food. Formula is the closest alternative to human milk, and the companies that make it, of course, strongly recommend it. "When there is no breast milk, the chances of survival are small if the baby is not formula-fed," says E. Steven Bauer, vice president of Wyeth International, a subsidiary of American Home Products that makes SMA and its international equivalent, S-26.

Nutritionists agree that formula has a role in feeding the youngest infants in developing countries, but cost is the key, and only mothers who can afford to buy enough to prepare it at the proper strength should use it, they say. The W.H.O. code on marketing recognizes this danger by permitting the distribution of formula to babies using breast-milk substitutes—but only if the distribution is free or at low cost. Since the formula companies are not charitable institutions, the likelihood of sufficient quantities being distributed under such circumstances cannot be great.

It is because so few people in developing countries can afford to buy sufficient amounts of formula—a day's feeding could cost up to one-half the average daily wage, as compared to about a dollar a day in the United States—that the United Nations subcommittee on nutrition has put if far down on its list of recommended foods. The subcommittee urges mothers to find a wet-nurse—in some cultures a relative serves this function, in others, nonrelatives will do so for an amount less than the cost of infant formula. If this is not possible, the subcommittee suggests the use of animal milk or processed animal milk, such as evaporated or powdered skim milk, or even yogurt. It also recommends the use of a cup and spoon, because they are easier to clean than a nipple and a narrow-necked bottle.

Babies who feed on breast milk, as nutritionists recommend, still need solid weaning foods added to their diet in the first year. In industrialized countries, babies can subsist on breast milk exclusively for up to six months before they need a supplemental food. But the situation is much different in the third world, where a malnourished mother may not be able to produce enough milk for a baby older than four months.

Roger Whitehead, a nutritionist at Cambridge University, who lived for a time in the small Gambian village of Keneba, found that lactating mothers there could provide good nutrition for their infants for only about the first three months. After that, the babies' weight gains began to fall behind international standards until, by one year, their average weight was only 75 percent of the standard.

In this critical period, when the mother's milk can no longer meet all the baby's needs, most nutritionists agree that for the vast majority of third-world women, a combination of breast-feeding and local foods work best.

Chosen wisely, local foods can make a nutritious supplement. Most "multimixes," as they are called, are recipes for cereal-legume blends. In many nations, multimixes are packaged and sold in stores. One of the first mixes was Incaparina, which Quaker Oats and other companies marketed in Central and South America in the early 1960s. Though some have been successful, especially those heavily subsidized by local governments, most commercial mixes have been too expensive for the poor, who need them most, and have been taken off the market.

Dr. Gretchen Berggren, an assistant professor of population sciences at the Harvard School of Public Health, coordinated a combined M.I.T.-Harvard health program in Haiti, where about two-thirds of all the children suffer from malnutrition. At Government nutrition centers, Haitian women learned how to prepare and cook mixtures made by combining beans with rice, corn or sorghum, all local foods. Nutrition educators and doctors closely monitored the children receiving these foods. In one district serving 100,000 people, hospital admissions for severe malnutrition fell more than 50 percent from 1968 to 1975, and deaths caused by malnutrition in children under the age of 4 dropped by 83 percent.

Nepal has been another target for nutrition programs. In 1971, a team of international health workers began distributing supplies of powdered milk and corn-soy-milk mixtures to mothers of undernourished children in one area of the country, but because many mothers prepared it under unsanitary conditions, this food caused diarrhea. Medical workers then discovered that even the poorest homes had an ample supply of grains. The nutritionists concocted a flour from local corn, wheat and soybean supplies, and then taught Nepalese women how to prepare it. Malnourished children were usually well on the way to recovery within five weeks of starting on the mixture.

In a recent effort to help infants in urban slums and poor rural areas of Thailand, a team of physicians from Bangkok prepared seven weaning supplements from locally available foods. Rice, the local staple, was the major ingredient in each mixture, to which physicians added combinations of vegetable oil, soybeans, mung beans, groundnuts, sesame and fishmeal. They reported that these gruellike mixes were nutritious, easy to prepare and acceptable to children's tastebuds and digestive tracts.

Only large government subsidies can bring packaged mixes within reach of the world's poor, but much smaller sums could help people to prepare the same mixtures at home. The M.I.T.-Havard project, one of the first steps in this direction, gets only $200,000 a year out of America's billion-dollar-plus food-aid package.

The same companies criticized for marketing formulas may, ironically, hold one of the keys to improving the health of infants in the third world. They possess the expertise and the financial resources to help develop weaning mixtures that women can prepare with indigenous foods in their homes. And they already have the sales personnel, distribution channels and marketing apparatus to promote packaged mixtures of the same foods.

Help from this quarter, however, may be a long time coming. Still engaged in a bitter struggle over the marketing of formulas, the companies are worried that the boycott of Nestle products may spread to their own. Others are reluctant to apply their expertise to different areas. "We're a pharmaceutical company," says Carol Emerling, secretary of American Home Products. "We can make a better contribution to infant health by doing something we do well."

Nevertheless, with the trend of scientific thinking favoring mixes of local foods, infants would profit from an alliance of the formula companies and their critics.

ENDANGERED SPECIES ACT

Mr. MITCHELL. Mr. President, over the past two decades, the United States became the world's leader in the effort to protect, preserve, and enhance the natural environment.

In America where economic growth at times involved the destruction of the fragile ecologies of woodlands, forests, rivers, and coastlines, the people urged their Government to preserve the natural environment.

From that public demand came such landmark laws as the Clean Air Act, the Clean Water Act, the Resource Recovery Act, and many others. Those statutes became models for State statutes and, in many cases, for laws enacted by other nations around the world.

The Endangered Species Act was the first law in our history, and virtually the first worldwide, which had as its goal the stopping of man's eradication of entire species from the face of the Earth.

Our 1973 act recognized for the first time that a species, once destroyed, cannot be replaced. It recognized that the reduction of the world's genetic diversity was no less a threat to mankind than to the affected species themselves.

Over the past two decades, we have developed a deeper understanding of the importance of the various parts of every ecological system. We now know that the bacteria that break down vegetation in the soil help produce fertile farmlands. We know that the teeming insect life of

the planet is a vital link in the food chain on which we ultimately depend.

The exciting technologies of genetic research are charting for us new ways to use the genetic richness of the natural world for our own needs. We can, for example, use life forms to help curb the pollution of oil spills and chemical dumps: Laboratory experiments have developed a bacteria which consumes hazardous wastes; bacteria which can digest spilled oil have been used to clean up spills in European waters.

The potential for practical and ecologically sound use of such genetic material is virtually unlimited. Research into this promising field is just on the frontier.

But the biological wealth of the plant has been put to use in countless ways already, and new uses are being developed yearly.

Biological control of crop pests and diseases uses the natural world to attack insect pests with their natural enemies, saving the Earth from artificial pesticides and lessening our dependence on finite fossils for petrochemicals.

Japan is now experimenting with a variety of spurge to produce latex, Brazil is working to use the sap from the copaiba tree for diesel fuel, and the guayule plant of our own arid Southwestern deserts may well become a valuable source of oil in future decades.

Genetic diversity for food plants and animals has barely been touched upon. Scientists today are working to develop salt-resistant forms of such crops as barley, to take advantage of water which other plants cannot tolerate. They are investigating a rare corn that grows on only a few hill slopes in Mexico which is disease resistant and perennial—an incredible boon to food-hungry Third World nations if its characteristics can be combined with crop corn.

The enormous herds of the African plains may well become that continent's major source of protein as mankind learns to domesticate and breed the abundant herbivores.

There are many other examples which dramatically demonstrate the real economic worth of preserving our world's biological richness and diversity.

But human beings do not live by economics alone.

We are part and parcel of the natural universe, and every dimunition of it affects all of us.

Who can measure the loss from the total extinction of the carrier pigeon? Or the virtual extinction of the bison? Or the near extinction of the bald eagle? Or the many other species which have now been or are about to be exterminated by man?

We cannot bring back the passenger pigeon. We may never be able to return the bison herds to the Great Plains. We may already be doomed to find that only small numbers of the majestic bald eagle can live compatibly with man in America.

But we can stop the depredation which dooms other species to a lingering extinction. We can change the direction of development which threatens other birds with extermination. We can modify the demands we make on the habitat of our remaining wolves, our mountain bighorns, and our herds of moose and elk as they wander through the twilight of the northern winters.

Between 1600 and 1900, the expanding activities of mankind on the Earth helped cause the permanent extinction of 75 mammal and bird species. Since 1900, at least another 75 have vanished—nearly one major species every year, reflecting the burgeoning world population and the often harsh impact that human activities have on the habitat of wild species.

Biologists estimate that in addition to the major species facing extinction, as many as 1 to 3 so-called minor extinctions occur each day of such life forms as plants, insects and bacteria; their appearance is not well noted, but their genetic contribution to our world and our future can never be recaptured, once destroyed.

Against this assault—real even though at times unintentional on our Earth's biological heritage, we have only one law: The Endangered Species Act, which seeks to prevent the extinction of species now threatened and to lessen the threat to species whose future survival is in doubt—those species regarded as threatened and not yet technically endangered.

This law is not onerous. It is not a wild overreaction. It does not curb economic growth for the sake of any and all natural life. Its scope is limited. Its workings are modest.

The first requirement in the law is that a species be determined endangered by scientific evidence. There is ample opportunity for public opinion to be expressed through the listing process, but the final determination to list a species as endangered is based on scientific evidence, not on public testimony.

Once a species is listed as endangered, the Federal Government may move to prohibit its destruction and to stop trade in articles made from it. Additionally, the Government can purchase habitat areas to give the species an undisturbed place to propagate. The Federal Government also provides matching funds for State-level conservation programs, and it makes certain that Federal activities do not further endanger the species.

The protection given a threatened species is substantially less, and varies with the scientific indications of what actions are best to reduce the threat.

In its most recent authorization of the law, Congress specifically spelled out a process to assure that vital development projects are not stopped because of threatened or endangered species; a criticism often levied against the act, although with little hard evidence to back it up.

The act itself is the best refutation of this inaccurate and misleading criticism.

The section which requires consultation between Government agencies whenever a Federal project may affect an endangered species has not constantly stopped much needed or essential projects in their tracks, as some critics claim. That section has resulted in 9,673 consultations between Federal agencies to find alternative ways for projects to continue—not to stop—and to protect endangered species as well.

The consultation process works. Of the more than 9,600 consultations that have occurred under the act, only 1.6 percent have resulted in even preliminary findings of jeopardy to a species. Ninety percent of the potential conflicts that the section was intended to identify have been avoided, not exacerbated, by the Endangered Species Act.

And in the few instances where projects have been delayed, the Endangered Species Act has been a minor part of that delay, not the massive roadblock its opponents like to portray.

The section which prevents development projects from endangering rare species has worked so well that the vast majority of cases are settled with no litigation, no delay, and no huge costs, and the public is not even aware that a conflict ever existed.

It is ironic that this section of the act works so well that it may become a victim of its own success, if the opponents of the act have their way.

And if the Reagan administration's policies are adopted, the opponents will have their way.

The recent administration order to the Office of Endangered Species to reduce its list of potentially endangered species to a "more reasonable number" is an obvious indication that immediate short-term economic standards are being imposed in place of the rigorous scientific standards which govern the listing of species as endangered.

An arbitrary reduction of the list of animals and birds that may be exterminated does not lessen the likelihood that they will escape extinction: It simply limits the objects of official concern.

The administration's claim that the massive budget cut in the activities needed to establish a species as endangered would be made up by an emphasis on the recovery of already identified endangered species is disingenous and misleading. For the same budget that proposes to cut the listing of newly endangered species also proposes to cut the recovery budget.

In this case, those who care about the future of species survival would do best to look at what they do, rather than listen to what they say. The current administration has listed no new species as endangered. It has tried to take credit for the paperwork involved in finalizing a listing of 44 Hawaiian tree snails. And it has tried to deflect criticism by claiming recovery, rather than identification, as its priority even while it cuts the budget for its alleged priority.

The problem is that the listing of endangered species, the study of which species are in trouble, and effective action to prevent further extinctions cannot wait. The activities of mankind work on the natural environment without concern for fiscal years and economic game plans. Actions that may irreversibly doom a species cannot be undone. And our ability to meaningfully reverse the near extinction of our Nation's birds and mammals is far less robust than our ability to destroy them.

Budget cuts are necessary, but they should be made judiciously, and with some regard to the debt we owe to future generations of Americans, as well as to the short-term political and economic stakes that face us today.

If our budgetary priorities let us gut

the Endangered Species Act, its reauthorization will be relatively meaningless. With no money to implement a law, even the best-written law is a dead letter.

If we eliminate the protection we must give to the most basic part of the natural environment—maintaining the life forms that share our world—we will be cheating future Americans of a vital part of their heritage.

Last week, the Committee on the Environment and Public Works, on which I serve, held hearings on the Endangered Species Act. From those hearings one crucial fact emerged: The Reagan administration has no commitment to the act, and if it cannot repeal it in law it will repeal it in fact by simply not enforcing it.

Although this administration has been in office for nearly 1 year, and although scientist after scientist testified that the rate of extinction of species is accelerating at a terrifying rate, the administration has proposed not a single new species for listing as endangered.

In addition, the administration has proposed a 40 percent reduction in the very modest level of funding for this program, including the complete elimination of the State grant program. If accepted, this would drastically reduce the program and centralize what is left of the effort in Washington. Both results are wrong.

Taken as a whole, the Reagan administration's actions represent an incredible and distressing abdication of responsibility for enforcement of the Endangered Species Act.

The eyes of this administration must be raised to a longer-range view of the needs of our world.

Today we face the fact that the Nation which led the world in the recognition of the value of the Earth's biological richness may be the first nation to back away from that recognition. Do we really want to return to the days when our natural environment was seen as nothing but a treasure chest for mankind to raid? I think not.

We owe our world and ourselves more than the distinction of being the most efficiently destructive species in the history of the Earth.

We are the only self-conscious species. We are the only species which can knowingly take actions to damage our world or to preserve it. We are the stewards of our natural universe. And our Government, as well as individuals, has an obligation to uphold that responsibility.

THE SUMMER FOOD SERVICE PROGRAM

Mr. DIXON. Mr. President, last Friday, USDA published proposed regulations on the operation of the 1982 summer food service program (Federal Register, December 11, 1981, p. 60592). I am deeply concerned about the timing and content of these regulations. If finalized in their present form, these regulations would have a seriously adverse effect on thousands of poor children in my State and many other States. I speak today not only to express my concern, but also to alert my colleagues to this situation. Unfortunately, there is limited time to rectify this situation.

Until this year, the summer food service program (SFSP) provided Federal funds for meals served during the summer months to children through schools or public and private nonprofit service institutions in "areas in which poor economic conditions exist." The Omnibus Budget Reconciliation Act of 1981 (Public Law 97–35) cut the SFSP by about half, effective in 1982. Most of the savings would be achieved by eliminating all private sponsors from the program. Additional savings are expected from tightening the requirement that programs be operated in poor economic areas and from a requirement that programs sponsored by local governments be operated directly by such governments. It is the manner in which this last requirement, that local governments operate programs directly, is addressed in the regulations that causes me great concern.

The regulations take the most restrictive possible approach to defining what constitutes direct operation of programs by local governments. They require that three separate, stringent criteria be met before a site can qualify for the program. Any one of these three criteria alone would be sufficient to show substantial control by the sponsor over the operation of the program site.

The net effect of these proposed regulations, if finalized, would be that hundreds, if not thousands, of sites sponsored by local governments nationwide would be eliminated from the SFSP. In my own State, preliminary estimates indicate that up to 90 percent of all such sites could be forced out of the program. I understand that a similarly dramatic effect would be felt in a number of other States.

I am certain that the December 11 regulations go much further than Congress intended in Public Law 97–35. I am aware of no Member of Congress who, at the time Public Law 97–35 was considered, contemplated the wholesale elimination of program sites sponsored by local governments. Certainly the savings estimates prepared by USDA when this legislation was under consideration did not reflect this massive an impact on sites sponsored by local governments.

I hope that, in the coming weeks, the Reagan administration, including the Office of Management and Budget, will rethink its position on these regulations and publish final regulations that are more closely in accordance with congressional intent. I would hope that the administration is not, through these regulations, attempting to achieve what they were unable to achieve through legislation—namely, elimination of the program altogether.

Hundreds of thousands of low-income children across the country have a lot riding on the decisions USDA makes on these regulations. For them, the SFSP provides a vital midday meal that is the summer equivalent of the free school lunch the President promised to protect as part of his social "safety net." These poor children have no less need for a nutritious lunch in the summer than during the school year. The "safety net" should be in place year round, not just for 9 months.

This program is also vitally important to the success of hundreds of recreational and educational summer programs located primarily in our inner cities. Without a meal at midday, it is difficult to imagine how these programs will be able to keep children in organized activities past noon. Many working parents count on these programs for supervision of their children during the workday. Both the parents and the larger community profit from involvement of these children in organized activities for most or all of the workday.

In light of the vital importance of the SFSP to low income communities and the sweeping program changes proposed by USDA, it is most unfortunate that the proposed regulations of December 11 allow only 20 days for comments to be filed. Especially since the comment period runs through the holiday season, it is hard to imagine that 20 days will provide enough time for adequate public response.

While I understand that final regulations should be published as early as possible to allow lead-time for program implementation, the Department should have the benefit of carefully prepared public comments. Since it appears that the January 1 statutory deadline for final regulations will not be met in any event, a further delay of perhaps, 2 to 3 weeks due to extending the comment period strikes me as a wise investment of the Department's time.

I am sure that program administrators around the country would rather have final regulations which reflect consideration of their comments than those that do not, even if implementation time is slightly squeezed. Especially when one considers that the administration published the proposed regulations nearly 6 weeks after the statutory deadline of November 1, it seems particularly unfair to penalize the public by unduly abbreviating the comment period.

In summary, I am deeply concerned over the SFSP regulations proposed on December 11, 1981. I believe that major revisions must be made in the approach of those regulations to determining whether local government sponsors operate programs directly. In addition, the administration should immediately announce an extension of the deadline for comments on these extremely important regulations.

MORTGAGE LOAN ASSUMPTIONS

Mr. MATTINGLY. Mr. President, I would like to voice my opposition to any attempt by the Federal Government, either by legislation or regulation, to override State laws affecting mortgage loan assumptions.

There is no doubt that assumability of mortgages has provided vast benefits for individual consumers in those States where assumptions are protected. Sellers have been able to sell homes because their buyers were able to afford the financing package which results. Buyers who otherwise would be unable to qualify because of high interest rates have been able to obtain housing to meet their needs.

Today, less than 1 American family in 20 can qualify for a mortgage on

the average home. Legislation or regulation to override State prohibition of due-on-sale clauses would, therefore, destroy one of the only practical ways of financing home sales today.

The debate on due-on-sale clauses is not new nor without controversy. In an effort to strike a balance between the problems of lending institutions and the needs of local home buyers, both State legislatures and State courts have dealt with the issue of due-on-sale clauses. In 14 States, including Georgia, the legislature has preserved the option of mortgage assumptions by placing restrictions on full implementation of due-on-sale clauses. At a time when the administration and Congress are calling for a return of decisionmaking powers to the States and decentralization of regulatory authority, efforts to preempt State laws and court decisions dealing with the due-on-sale clause appear to run 100 percent in the opposite direction.

Mr. President, it would be unfortunate if Congress enacted legislation or allowed implementation of a regulation that would make it more difficult in the future for American families to fulfill the American dream of purchasing a home. For this reason, I oppose any effort by the Federal Government to preempt State law regarding loan assumptions.

U.S. POLICY IN CENTRAL AMERICA

Mr. HELMS. Mr. President, the Subcommittee on Western Hemisphere Affairs of the Senate Committee on Foreign Relations held two hearings earlier this week concerning U.S. policy in Central America. The subcommittee received testimony from Assistant Secretary of State for Inter-American Affairs Thomas O. Enders and Under Secretary of Defense for Policy Fred Ikle, Monday and Tuesday, December 14 and 15.

Mr. President, I ask unanimous consent that these two statements be printed at this point in the RECORD.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

STATEMENT OF THOMAS O. ENDERS

THE STRATEGIC SITUATION IN CENTRAL AMERICA AND THE CARIBBEAN

There are four major developments that have come together to create what can only be described as a state of danger in the Caribbean Basin.

One is the new Cuban strategy for uniting the left in the countries of the region, committing it to violence, arming it, training it in warfare, and attempting to use it for the destruction of existing governments.

I say new because it is only three years ago that the policy was adopted. Prior to 1978—for some 10 years since the death of Che Guevara on an Andean hillside—Cuba had made a sustained effort to portray itself as a member of the international community not unlike others, carrying on state-to-state relations through embassies, emphasizing trade and cultural contacts.

Observing this pattern, many in this and other countries of the Hemisphere began to hope that revolutionary Cuba was on the way to becoming a status-quo nation. The 1970's, of course, were marked by Cuban intervention in Africa on a continent-wide scale. But, it was argued, Africa was a special case.

The turn came in 1978, when Cuba decided to back the insurrection in Nicaragua. At first it was not apparent to many that a new Cuban strategy was in operation, for Nicaragua seemed like a case all of its own. But then the same thing was tried in El Salvador, in Guatemala, in Colombia; now it is being tried in Honduras.

We have attempted to identify and illustrate the full scope of this new Cuban strategy in a research paper, which I would like to submit to the Committee for its study. The paper is based on both public and intelligence sources. It was not written to make sensational revelations, and it does not. But I wonder how many Americans are aware of the sweep and the sophistication of what is going on. In many countries of the region, Cuba is attempting no less than to construct a machine to destroy the established governments.

The pattern is always the same. For years the radical left in the area has been divided by disagreement over tactics. The old line Comintern parties argued patience: you only had to wait for Marx's famous objective conditions to emerge, and the revolution would occur. Other factions were for setting up Che Guevara-style *focos:* put some armed *guerrilleros* into the countryside and their presence will radicalize the peasants. Others were for *guerra prolongada:* discredit the regime by hitting the economy. Still others advocated spectacular kidnappings and assassinations.

Under the new strategy Cuba is approaching each of these groups, often calling them to Havana. Cuba offers to supply (or arrange for the supply of) arms and training. But there are conditions: the left must unite, it must create a single directorate for command and control, it must commit to a single strategy (which often is written out and approved by Castro personally). And that strategy is always the same: armed struggle against the established government.

It is important to be clear about the effects of this process. It enhances Cuba's role as the guide (and sometimes as the arbiter) of each revolutionary movement. It increases the pressure on democratic movements on the left to make common cause with the men with the guns, rather than face blame as the obstacle to the unity of the left. Once unity on the left has been created, democratic socialists in the Hemisphere and in Europe face the dilemma of whether or not to support it. Many have supported such movements, only to learn with bitterness that their money and political backing are welcome, their ideas are not.

This is not only history. The process goes on. In Honduras, Cuba has just now completed the same unification operation—parties have been joined together in a national directorate committed to armed struggle. A new attempt to overthrow an established government by force is underway.

Under challenge in this way, the democracies in the Hemisphere have had to break, suspend or downgrade relations with Cuba: Colombia, Costa Rica, Jamaica, Venezuela, Peru and Ecuador.

The second development is the economic and social crisis in the region. It also began in 1978, just as Castro was launching his new policy of intervention.

For the past two generations, most of the Central American countries and many of the islands compiled an enviable record of economic and social change.

But in 1978 a serious deterioration began. Prices for export commodities—coffee, sugar, cocoa—began to decline sharply. Prices for imported oil and imported capital kept going up. With slower economic growth in the industrial world, tourism stagnated. Run-on credit crunches resulted. Some countries are bankrupt. Others are threatened with bankruptcy. In two, Cuban-assisted insurrections are destroying power plants, bridges, and crops, and attempting to disrupt the tourist trade.

The result is a grave, general economic crisis, bringing with it misery and despair for many millions of people in the region. Coinciding as it does with the Cuban drive to unify the left and commit it to violence, economic crisis creates great potential political vulnerability throughout the area.

The third factor is developing the role of Nicaragua as a platform for intervention throughout Central America.

We have watched with deepening concern as Nicaragua has moved away from pledges of political pluralism toward a repressive, one-party state. At the same time it is greatly expanding its army and building up an inventory of heavy arms. It continues to be deeply involved in logistics and other support for the insurgency in El Salvador.

The United States and a number of other countries have tried to provide an alternative to these trends, notably by providing economic aid, but also by maintaining political contacts. Since 1979 the U.S. alone gave $120 million in assistance. Recently we tried by diplomatic means to achieve a rapprochement with Managua. And we don't close the door on future attempts.

But frankly there is little to show for our efforts. Indeed I wonder whether any of the democratic countries that have supported Nicaragua can claim to have slowed down, much less to have stopped the negative trends.

There are more than 1,500 Cuban military and security advisors in Nicaragua, twice as many as there were at the start of the year. More tanks are reported on their way. Preparations for the receipt of MIG's are well advanced.

A final factor is the special importance of the struggle in El Salvador for the future of the area.

El Salvador is the second largest Central American state in population, and in the past has achieved a relatively high level of economic development.

But El Salvador is important not only for itself. There are underway these two critical experiments in reform: one in land tenure, the other in the creation of democratic institutions and strengthening the political center. If these reforms are defeated by arms, prospects for peaceful change elsewhere will be seriously set back.

There is something else. If after Nicaragua El Salvador is captured by a violent minority, what state in Central America will be able to resist? How long would it be before the major strategic United States interests—the canal, sea lanes, oil supplies—were at risk?

To meet and overcome these challenges the United States must also have a comprehensive strategy. Let me summarize briefly the line of action we are now developing.

First, we must make sure that our friends have the means to defend themselves. El Salvador and Honduras are the two most threatened countries. The build-up in Nicaragua menaces both; targeting of El Salvador's economy by Nicaraguan-supported insurgents creates a situation of emergency in that country. Both need more resources—above all economic but military as well. We will be consulting with the Congress on how we can best provide help.

Second, we must join with others to help provide the Caribbean Basin countries the opportunity to achieve long-term prosperity. President Reagan is preparing for submission to the Congress early next year a far-reaching package of proposals. Because the markets in the countries of the Basin are so small, investment other than in staples is often unattractive. But if investors could be sure of unimpeded access to outside markets, particularly to the vast U.S. market, at least for a defined period of time, then investment in the area becomes more interesting. The skilled and relatively low cost labor of the area becomes an attraction. We are developing proposals for one-way free trade arrangements and for investment incentives; there will also be provision for preventing abuses.

At the same time we will present proposals for emergency financial assistance to tide countries over until they can take advantage of the new opportunities to begin earning their own way.

Third, we must not falter in our pursuit of democratic values—for they assure the legitimacy of governments we hope to help. In a free, open election with broad participation Honduras chose a new government last month. Costa Rica—whose deeply-rooted democratic institutions are helping it to weather a brutal economic crisis without violence—goes to the polls in February. El Salvador will follow with elections for a constituent assembly—the first step in creating representative, constitutionally bound government in that nation. In Central America only the Nicaraguan government refuses to go before the people.

Let me in this regard make a remark on the subject of proposals for negotiation between the government and the insurgents. Members of the Frente Democratico Revolucionario say they want to talk about "restructuring the army" and "establishing a new order." In their view such changes are conditions precedent to elections.

But the establishment of a new order and the status of the army are among the subjects for the constituent assembly to be elected in March. Why should they only be debated and decided with the insurgents, and not with the campesinos, the labor unions, and the political parties? Why shouldn't the FDR have—only have—the representation in the assembly it can get by campaigning?

In July the U.S. said it would facilitate contacts and discussions on election issues. In September we sent a group to El Salvador and talked to all interested in talking to us, including the MNR, a member of the FDR. The representative of another member of the FDR has asked to see us in Washington this week, and we are receiving him on the same basis. If there are opposition elements who believe in a democratic solution, we will help them participate in the electoral process. But it would be wrong to assist those—in negotiations or otherwise—who are committed to the destruction of democracy.

Fourth, we must continue the pursuit of justice for the countries of the area. Lawlessness from both the left and right has been a major weakness in El Salvador. But the government is making progress in bringing it under control. Violent deaths other than in combat as reported each week by our Embassy in San Salvador are down by more than a half since last year. I do not want to give you the impression that our weekly figures are complete. But the trend is significant. Progress is unmistakable. I wonder whether the insurgents have made any contribution to that progress at all. For they claim that their violence is justified by a higher goal.

Fifth, our emphasis should be on collective action. Last week the Organization of American States voted 22 to 3 with 4 abstentions in support of free elections as a means to a political solution in El Salvador. In the same forum Secretary Haig has suggested that all countries in Central America should address the arms race that now threatens in Central America as a result of Nicaraguan imports of heavy weapons and the Cuban military advisor presence in Nicaragua. Should more serious threats emerge, it is in collective security that we should seek solutions.

Finally, we must communicate to Cuba that the costs of escalating their intervention in the region will be very high. We have readied measures to prevent another Mariel sealift should Cuba again seek to utilize the longings of its own citizens to harm this country. We are tightening the economic embargo. We are preparing creation of a radio devoted to Cuba news and beamed to the island, so that Cubans can be better able to hold their government accountable for its actions. Our underlying message is clear: we will not accept, we do not believe the countries of the region will accept, that the future of the Caribbean Basin be manipulated from Havana. It must be determined by the countries themselves.

Cuba's Renewed Support for Violence in the Hemisphere

PREFACE

Any formulation of U.S. foreign policy for Latin America and the Caribbean would be incomplete without in-depth analysis of Cuba's role in the region. Some of Cuba's international activities have received publicity and attention, but much has taken place out of the public view. While understanding the full range of Cuba's activities abroad is obviously essential for governments engaged in foreign policy planning, the general public is often uninformed about the nature and extent of Cuba's involvement in other countries. This study of Cuban activities in Latin America and the Caribbean is being issued in the interest of contributing to better public understanding of U.S. foreign policy and developments in the region.

The focus of this study is Cuba's activities in the Americas. It does not attempt to give a description of conditions in the countries in which Cuba is active, or to analyze why violent groups develop, but instead examines the degree to which Cuba is directly engaged in efforts to destabilize its neighbors by promoting armed opposition movements. Cuba is clearly not the sole source of violence and instability in the region, but Cuban activities militarize and internationalize what would otherwise be local conflicts. In a region whose primary needs are for economic development, social equity, and greater democracy, Cuba is compounding existing problems by encouraging armed insurrection.

This report describes Cuban activities that are either publicly known or can be revealed without jeopardizing intelligence sources and methods. Cuban involvement is not limited to the examples contained in this study.

SUMMARY

A country-by-country examination of Cuba's activities in Latin America and the Caribbean makes clear that Cuba has renewed its campaign of the 1960's to promote armed insurgencies. In particular, Cuba has stepped up efforts to stimulate violence and destabilize its neighbors, turning away from its earlier policy of strengthening normal diplomatic relations in the hemisphere.

Since 1978, Cuba has:

Worked to unite traditionally splintered radical groups behind a commitment to armed struggle with Cuban advice and material assistance;

Trained ideologically committed cadres in urban and rural guerrilla warfare;

Supplied or arranged for the supply of weapons to support the Cuban-trained cadres' efforts to assume power by force;

Encouraged terrorism in hope of provoking indiscriminate violence and repression in order to weaken government legitimacy and attract new converts to armed struggle; and

Used military aid and advisors to gain influence over guerrilla fronts and radical governments through armed pro-Cuban Marxists.

Unlike Che Guevara's attempts during the 1960's, Cuban subversion today is backed by an extensive secret intelligence and training apparatus, modern military forces, and a large and sophisticated propaganda network. Utilizing agents and contacts nurtured over more than twenty years, the Castro government is providing ideological and military training and material and propaganda support to numerous violent groups, often several in one country.

Cuba is most active in Central America, where its immediate goals are to exploit and control the revolution in Nicaragua and to induce the overthrow of the governments of El Salvador and Guatemala. At the same time, Cuba is working to destabilize governments elsewhere in the hemisphere. Cuba provides advice, safehaven, communications, training, and some financial support to several violent South American organizations. In the Caribbean, Cuban interference in the post-election period has been blunted in Jamaica, but Grenada has become a virtual Cuban client.

Cuba's new drive to promote armed insurgency does not discriminate between democracies and dictatorships. And attempts by Cuba to destabilize governments occur in spite of the existence of diplomatic ties.

This long-range campaign is directed by the Cuban Communist Party which oversees far-flung operations that include secret training camps in Cuba, intelligence officers abroad, training programs for select foreign students, networks for covert movement of personnel and material between Cuba and abroad, and propaganda support.

Cuba's enormous investment of energy, money, and agents in this campaign would not be possible without Soviet help. Soviet assistance, now totalling over $8 million a day, enables Cuba to maintain the best equipped and largest per capita military forces in Latin America and to channel substantial resources abroad. In return, Cuba usually is careful not to jeopardize ongoing government relationships in Latin America important to the Soviet Union.

The scope of Cuba's activities in the hemisphere has prevented Cuba from always keeping covert operations hidden. For instance, during 1981 alone:

In Nicaragua, Cuba has quietly increased its presence to 5,000 personnel, including more than 1,500 security and military advisors.

In El Salvador, Cuba's key role in arming the Salvadoran guerrillas was exposed and Castro admitted supplying arms.

In Costa Rica, a Special Legislative Commission documented Cuba's role in establishing an arms supply network during the Nicaraguan civil war and found the network was later used to supply Salvadoran insurgents.

In Colombia, Cuba was discovered to have trained guerrillas attempting to establish a "people's army."

Cuba's new policies abroad and its reaction to emigration pressures at home have reversed the trend in Latin America toward normalization of relations with Cuba. During the last two years, Colombia, Costa Rica and Jamaica suspended or broke relations with Cuba. Venezuela, Peru, and Ecuador withdrew their ambassadors from Havana.

Cuban intervention is, of course, not the sole source of instability. The origins of occasional violent conflict in Latin America lie in historical, social and economic inequities which have generated frustrations among a number of people. Sustained economic growth over the past 20 years and resilient national institutions, however, have limited the appeal of radical groups. But in some countries, particularly the small nations of Central America, dislocations resulting from rapid growth compounded existing tensions, leading to the emergence of several countries of radical movements, which often originated with frustrated elements of the middle class. Subsequent economic reversals have subjected already weak institutions to additional stress, making these countries more vulnerable to the appeals of radical groups backed by Cuba.

Cuba is quick to exploit legitimate grievances for its own ends. But its strategy of armed struggle is not based on appeals to the "people." Instead, Cuba concentrates on developing self-proclaimed "vanguards" committed to violent action. Revolutions,

according to this approach, are made by armed revolutionaries.

Cuba's readiness to train, equip and advise those who opt for violent solutions imposes obstacles to economic progress, democratic development and self-determination in countries faced with growing economic difficulties. The spiralling cycle of violence and counterviolence which is central to Cuba's policy only exacerbates the suffering of ordinary people and makes necessary adjustments more difficult.

Cuba's renewed campaign of violence is of great concern to many countries, including the United States. Cuba should not escape responsibility for its actions. Exposing Cuba's efforts to promote armed struggle will increase the costs to Cuba of its intervention.

I. POLICIES

When it first came to power, the Castro regime had its own theory of how to spread revolution: to reproduce elsewhere the rural-based guerrilla warfare experience of Castro's 26th of July Movement in Cuba. In Che Guevara's words, the Andes would become the Sierra Maestra of South America.

Initial attempts to repeat Cuba's revolution elsewhere failed decisively. During the late 1960's, the Castro regime gradually reined in its zealots. Without abandoning its ties to radical states and movements or its ideology, Cuba began to pursue normal government-to-government relations in the hemisphere. By the mid-1970's Cuba's isolation in the Americas eased and full diplomatic or consular relations were reestablished with a number of countries.

But diplomacy proved unable to satisfy the Castro government's ambitions. First in Africa, and now in Latin America and the Caribbean, Cuba's policy has again shifted to re-emphasize intervention.

On July 26, 1980, Fidel Castro declared that the experiences of Guatemala, El Salvador, Chile, and Bolivia teach us that there is no other way than revolution, that there is no other "formula" than "revolutionary armed struggle."

Castro's statement was an attempt to justify publicly what Cuban agents had been doing secretly since 1978: stepping up support for armed insurgency in neighboring countries.

This study traces the development of this latest phase in Cuba's foreign policy.

Eary Failures. The original Cuban theory held that a continental Marxist revolution could be achieved by establishing armed focal points (focos) in several countries. Operating in rural areas, small bands of guerrillas could initiate struggles that would spread throughout the continent.

In 1959, Castro aided armed expeditions against Panama, the Dominican Republic, and Haiti. During the early and mid 1960's, Guatemala, Colombia, Venezuela, Peru, and Bolivia all faced serious Cuban-backed attempts to develop guerrilla focos.

In seeking indigenous groups with which to cooperate, the Cubans rejected the orthodox Latin American communist parties, which they regarded as ineffectual. Instead, they lent their support to more militant groups dedicated to armed violence even when their Marxism was not fully anticulated.

The Soviet Union was suspicious of Cuba's policy of inciting armed violence, preferring to work through established Moscow-line comunist parties. Disagreement over this issue was a serious point of friction for several years. Cuba denounced the Soviet policy of "peaceful coexistence" as a fraud, arguing that it implicity undercut the legitimacy of aiding "national liberation" struggles. At the 1966 Tricontinental Conference, Cuba sought to enlist North Vietnam and North Korea and create a more aggressive revolutionary internationalism.

None of the Latin American insurgencies fomented by Havana, however, aroused much popular support. The most severe blow to Cuba's policy during this period came in Bolivia in 1967, when Che Guevara's guerrilla band was opposed by both the peasantry and the Bolivian Communist Party.

After this maverick approach failed to establish a continental revolution, Cuban foreign policy moved into closer conformity with that of the Soviet Union. Castro endorsed the 1968 Soviet invasion of Czechoslovakia and accepted Soviet views on East-West relations. Within the hemisphere Cuba generally conformed to the Soviet approach of fostering state-to-state relations with several Latin American countries.

The Turn to Africa. In the mid-1970's, Cuba renewed its penchant for direct intervention, not in Latin America, but in Africa.[1]

In Angola, 20,000 Cuban troops, supported by Soviet logistics and materiel, assured the supremacy of the Popular Movement for the Liberation of Angola (MPLA), which had the strongest ties to Moscow of the three movements competing for power after Portugal's withdrawal.

In Ethiopia, the integration of Soviet and Cuban operations was even more complete, with the Soviets providing overall command and control, materiel, and transport for 13–15,000 Cuban troops fighting against Somali forces.

The Moscow-Havana Axis. These African operations gave evidence of Cuba's military value to the Soviet Union. In areas of the Third World where the Soviets were under constraints not binding on Cuba, Havana could portray its actions as an outgrowth of its own foreign policy of support for "national liberation movements."

Cuba's extensive and costly activities overseas would have been impossible, however, without Soviet aid. The Cuban armed forces, some 225,000 strong with new sophisticated weaponry from the Soviet Union, became a formidable offensive military machine. Soviet aid and subsidies to the Cuban economy have climbed to over $3 billion annually, or about one-fourth of Cuba's gross national product. In December 1979, at a time when Soviet oil deliveries to Eastern Europe were being cut back and prices raised, Castro announced that the Soviet Union had guaranteed Cuba's oil needs through 1985 at a price roughly one-third that of the world market. The Soviet Union also pays up to 4 and 5 times the world price for Cuban sugar.[2]

In return, Cuba champions the notion of a "natural alliance" between the Soviet bloc and the Third World in the Non-Aligned Movement. At the Cuban Communist Party Congress in December 1980, Castro explicitly endorsed the Soviet intervention in Afghanistan and defended the Soviet "right" to intervene in Poland. He also reiterated that Cuba is irrevocably committed to communism and to supporting "national liberation" struggles around the world.

Cuba's policies abroad are thus linked to its relationship to the Soviet Union. By intervening in behalf of armed struggle in Latin America, Cuba injects East-West dimensions into local conflicts.

II. METHODS

Even when pursuing an open policy in the 1970's of establishing normal diplomatic relations with a number of Latin American countries, Cuba retained its clandestine ties with remnants of the insurgents and other pro-Cuban elements in Latin America, providing asylum, propaganda, some training, and other support. Between 1970 and 1973 Cuba's security services moved arms and agents into Chile. At the same time, Cubans helped organize President Allende's personal security and trained many leaders of the Chilean Movement of the Revolutionary Left (MIR).

Cuba's renewed campaign to promote insurgencies draws on these contacts and experiences and combines several different elements.

Sophisticated Strategy. Learning from Che Guevara's failure in Bolivia, Cuban doctrine now emphasizes the need to enlist support for armed struggle through advanced training of local guerrilla cadres, sustained aid and advice, and extensive propaganda activities. The *foco* approach of the 1960's—when a Cuban-sponsored team in the field was considered enough to spark insurrection—has given way to a more sophisticated strategy involving extensive commitments and risks.

Soviet Support. A major difference from the 1960's is that, instead of throwing up obstacles, the Soviet Union generally has backed Cuban efforts to incorporate non-doctrinaire groups into broad political-military fronts dedicated to armed struggle. Particularly in Central America, Soviet ties to local communist parties and Block relationships have been used to favor insurrectionary violence. For example, a senior Soviet Communist Party functionary traveled to Panama in August 1981, to discuss strategy for Central America with Cuban officials and leaders of Central American communist parties. The Soviet Union has also used its extensive propaganda network to selectively discredit governments and build support for armed opposition groups.

Allowing Havana to take the lead in the hemisphere enables Moscow to maintain a low profile and cultivate state-to-state relations and economic ties with major countries like Brazil and Argentina.

Cuba, in turn, is generally cautious not to undercut the Soviet Union where the Soviets have established valued relationships. In Peru, for example, Cuba has been careful to exercise restraint to avoid prejudicing the status of the 300 Soviet officials there or jeopardizing the Soviet Union's arms supply arrangement.

Central Control. Most of the covert operations in support of this strategy are planned and coordinated by the America Department of the Cuban Communist Party, headed by Manuel Pineiro Losada. The America Department emerged in 1974 to centralize operational control of Cuba's covert activities. The Department brings together the expertise of the Cuban military and the General Directorate of Intelligence (DGI) into a farflung operation that includes secret training camps in Cuba, networks for covert movement of personnel and materiel between Cuba and abroad, and sophisticated propaganda support.

Agents of the America Department are present in every Cuban diplomatic mission in Latin America and the Caribbean—in at least five recent instances in the person of the Ambassador or Charge d'Affaires. America Department officials frequently serve as employees of Cuba's official press agency, Prensa Latina, of Cubana Airlines, the Cuban Institute of Friendship With People (ICAP), and other apparently benign organizations. When too great an identification with Cuba proves counterproductive, Cuban intelligence officers work through front groups, preferably those with non-Cuban leadership.[3]

Cuban military intelligence personnel selected for clandestine operations in Latin America, Africa and the Middle East go through an elaborate training program conducted by Cuban, Soviet, East German and Czech instructors in Havana with special sessions in surrounding cities. In addition to the language and customs of the area to which they are assigned and typical intelligence operations such as infiltration proce-

Footnotes at end of article.

dures and photography techniques, the Cubans are instructed in handling explosives. To disguise their true occupation, the intelligence agents are also instructed in civilian skills such as automotive mechanics, carpentry and heavy equipment operation.

Armed Struggle. The new Cuban offensive relies heavily on violence. In outline, Cuba's strategy is to:

Unite traditionally splintered radical groups behind a commitment to armed struggle with Cuban advice and material assistance;

Train ideologically committed cadres in urban and rural guerrilla warfare;

Supply or arrange for the supply of weapons to support the Cuban-trained cadres' efforts to assume power by force.

Encourage terrorism in the hope of provoking indiscriminate violence and repression, and generalized disorder in order to weaken government legitimacy and attract new converts to armed struggle; and

Use military aid and advisors to gain influence over guerrilla fronts and radical governments through armed pro-Cuban Marxists.

The application of this strategy is demonstrated in detail in the case studies that follow. It should be noted, however, that Cuba sometimes emphasizes certain tactics over others. In pursuing its long-term strategy, Cuba concentrates initially on building a network of loyal cadres. When local extremist groups are not capable of or committed to armed struggle, Cuba generally draws on them in support of active insurgencies elsewhere while developing their capacity and willingness for agitation in their homeland. In addition, foreign policy concerns may deter Cuba from promoting armed struggle in a particular country. For example, Cuba attempts to avoid activities which could jeopardize its relations with the Mexican government since Castro seeks Mexico's support to avoid isolation in the hemisphere.[4]

Propaganda. Cuba's existensive cultural exchange and propaganda activities are tailored to support covert operations and elicit support for armed struggle.[5] For example, during the past year, Cubans have used Mexico as a base for coordination of propaganda on behalf of insurgents in El Salvador, Guatemala, and Colombia. Radio Havana and other Cuban media recently have publicized statements by Chilean Communist Party leaders urging unity of the Chilean left, and calling for armed action to topple Chile's government. Radio Havana has directed broadcasts to Paraguay urging the overthrow of the Paraguayan government.

Sports competitions, youth and cultural festivals, and special scholarships to Cuba provide channels to identify potential agents for intelligence and propaganda operations. In Ecuador, Cuban Embassy officers in Quito used their ties with Ecuadorean students to try to orchestrate pro-Cuba demonstrations when the government of Ecuador threatened to suspend relations after Cuba's forcible and unauthorized occupation in February 1981 of the Ecuadorean Embassy in Havana, following its seizure by a group of Cubans seeking to leave Cuba.

Military Training. Witnesses and former trainees have described several camps in Cuba dedicated specifically to military training, including one in Pinar del Rio province and another near Guanabaco, east of Havana. The camps can accommodate several hundred trainees. Groups from El Salvador, Nicaragua, Guatemala, Costa Rica, Honduras, Colombia, Grenada, the Dominican Republic, Jamaica, Haiti, Chile, and Uruguay have been trained in these facilities during the past two years.[6]

Recruits are normally provided false documentation (sometimes Cuban passports) by Cuban agents in third countries and are flown to Cuba on civil aircraft under cover as "students" or other occupations. Panama has been used as a regular transit point for Central and South Americans to and from military training in Cuba.[7]

Once in Cuba, trainees generally are taken immediately to the guerrilla training camps where they usually are grouped according to nationality and the organization for which they are being trained in order to promote a sense of cohesiveness and esprit de corps.

Training normally lasts 3–6 months and consists of instruction by Cuban cadres in sabotage, explosives, military tactics, and weapons use. Although military training is frequently tied closely to operational requirements (the M–19 guerrillas that landed in Colombia in early 1981 did so immediately upon completion of their military instruction in Cuba), witnesses report that political indoctrination is also included in the curriculum.

Many Cuban instructors are active military officers and veterans of Cuban expeditionary forces in Africa. Soviet personnel have been reported at these camps, but they apparently do not participate directly in the guerrilla training.

Political Training. Each year Cuba offers hundreds of scholarships to foreign students. All Cuban mass organizations operate schools in organizational work and indoctrination open to carefully selected foreign students.[8] In addition, some 11,000 non-Cuban secondary school students, mostly teenagers, were enrolled in 1980 in 15 schools on the Isle of Youth alone. Cuba does not publicize complete foreign enrollment statistics, nor does it release the names of those trained. From the Eastern Caribbean alone, close to 300 students are currently in Cuba studying technical and academic subjects. The study of Marxism-Leninism is compulsory in many courses and military affairs is compulsory in some. When governments have turned down Cuban scholarship offers, as occurred recently in Belize and Dominica, Cuba has gone ahead and concluded private agreements. Local Marxist-Leninist groups with ties to Cuba play a major role in selecting those students who receive scholarships.

In sum, the infrastructure for Cuba's intensified revolutionary agitation in Latin America is a multifaceted yet carefully, coordinated mechanism. The Cuban Communist Party, through its America Department, provides cohesion and direction to a complex network that consists of intelligence officers, elements of Cuba's foreign ministry, armed forces, mass organizations, commercial and cultural entities, and front groups.

This extensive apparatus is designed to support one objective: a systematic, long-range campaign to destabilize governments.

III. CASE STUDIES

The Cuban activities described in the case studies which follow must be considered to understand developments within the particular countries in question. However, the focus of the case studies is Cuban involvement in each country. Readers should therefore guard against assuming that the cases below provide a comprehensive picture of the general situation in the country where the events described have taken place.

Central America

Nicaragua

In July 1979, internal and external factors converged to bring about the triumph of the anti-Somoza insurrection and the subsequent domination of the new Nicaraguan government by the Cuban-trained leadership of the Sandinista National Liberation Front (FSLN). These events provided a key test for Cuba's new mechanisms and strategy for promoting armed pro-Cuban movements in this hemisphere.

Opposition to Somoza's authoritarian rule in the late 1970's was widespread. The 1978 killing of Pedro Joaquin Chamorro, publisher of Nicaragua's most respected newspaper La Prensa, converted many Nicaraguans to the armed opposition of which the FSLN was the core; FSLN assurances on democracy and pluralism were accepted by newly allied political moderates and private businessmen. Internationally, sympathy for the struggle against Somoza led Venezuela, Panama, and Costa Rica to aid the insurgents, while Somoza stood practically without friends.

This environment enabled Cuba to disguise the extent of its support for the FSLN and avoid disrupting the fragile alliances between the FSLN and other opponents of Somoza. Behind the scenes, Cuba played an active role in organizing the FSLN, and in training and equipping it militarily.

Cuba had provided some training and arms to the FSLN in the early 1960's. Until late 1977, however, Cuban support consisted mainly of propaganda and safe haven.

In 1977 and early 1978, a high ranking American Department official, Armando Ulises Estrada,[9] made numerous secret trips to facilitate the uprising by working to unify the three major factions of the FSLN. Stepped-up Cuban support to the Sandinistas was conditioned on effective unity. During the XI World Youth Festival in Havana in late July 1978, the Cubans announced that the unification of the three factions had been achieved and urged Latin American radicals present at the meeting to demonstrate solidarity with the FSLN by staging operations in their own countries.

At the same time, Estrada concentrated on building a supply network for channelling arms and other supplies to guerrilla forces. International sympathy for the struggle against Somoza provided a convenient facade for Cuban operations. In preparation for the first FSLN offensive in the fall of 1978, arms were flown from Cuba to Panama, transhipped to Costa Rica on smaller planes, and supplied to Nicaraguan guerrillas based in northern Costa Rica. To monitor and assist the flow, the America Department established a secret operations center in San Jose. By the end of 1978, Cuban advisors were dispatched to northern Costa Rica to train and equip the FSLN forces with arms which began to arrive direct from Cuba. FSLN guerrillas trained in Cuba, however, continued to return to Nicaragua via Panama.

In early 1979, Cuba helped organize, arm, and transport an "internationalist brigade" to fight alongside FSLN guerrillas. Members were drawn from several Central and South American extremist groups, many of them experienced in terrorist activities. Castro also dispatched Cuban military specialists to the field to help coordinate the war efforts. Factionalism threatened Sandinista unity again in early 1979, and Castro met personally with leaders of three FSLN factions to hammer out a renewed unity pact.

When the insurgents' final offensive was launched in mid-1979, Cuban military advisors from the Department of Special Operations, a special military unit, were with FSLN columns and maintained direct radio communications to Havana. A number of Cuban advisors were wounded in combat and were evacuated to Cuba via Panama.

The operations center run by the America Department in San Jose was the focal point for coordination of Cuba's support. After the triumph of the anti-Somoza forces in July 1979, the chief of the center, Julian Lopez Diaz, became Cuban Ambassador to Nicaragua. One of his America Department assistants in San Jose, Andres Barahona, was redocumented as a Nicaraguan citizen and became a top official of the Nicaraguan intelligence service.

Castro has counseled the Sandinistas to protect their Western ties to keep the country afloat economically. But to ensure that the FSLN could move to dominate the Nica-

Footnotes at end of article.

raguan government, Cuba has acted quickly to build up Sandinista military and security forces.

Since July 1979, Cuba has provided substantial military, technical, and political assistance. Some 5,000 Cuban advisors, teachers, and medical personnel work at all levels of the military and civilian infrastructures.[10] Of this number, more than 1500 military and security advisors are actively providing military instruction and combat training; instruction in intelligence and counterintelligence activities; instruction on security protection for the FSLN leadership and advice on organization of the Nicaraguan police force. In addition, Nicaragua has received within the past year approximately $28 million worth of military equipment from the USSR, Eastern Europe, and Cuba. This has included tanks, light aircraft, helicopters, heavy artillery, SAM's, anti-aircraft weapons, hundreds of military transport vehicles, as well as tons of small arms and ammunition.

Cuba presently is using Nicaraguan territory to provide training and other facilities to guerrillas active in neighboring countries. The Cuban Ambassador to Nicaragua and other America Department officials frequently meet with Central American guerrillas in Managua to advise them on tactics and strategy. Individual Sandinista leaders have participated in such meetings and have met independently with Guatemalan and Salvadoran insurgents. The FSLN also has cooperated in a joint effort by Cuba and Palestinian groups to provide military training in the Mideast to selected Latin American extremists. Some Sandinistas were themselves trained by the PLO, which maintains an embassy in Nicaragua.

Between October 1980 and February 1981, Nicaragua was the staging site for a massive Cuban-directed flow of arms to Salvadoran guerrillas. Arms destined for Salvadoran and Guatemalan guerrillas continue to pass through Nicaragua.

El Salvador

Before 1979, Cuban support to Salvadoran radicals involved training small numbers of guerrillas, providing modest financial aid, and serving as a political conduit between Salvadoran extremists and communists outside the hemisphere.

During the Nicaraguan civil war, Cuba concentrated on support for the FSLN. After the fall of Somoza, Cuba began intense efforts to help pro-Cuban guerrillas come to power in El Salvador. When a reform-minded civil-military government was established in October 1979, Cuba's first priority was to tighten the political organization and unity of El Salvador's fragmented violent left. At first, arms shipments and other aid from Cuba were kept low as the Cubans insisted on a unified strategy as the price of increased material support. To forge unity, Cuba sponsored a December 1979 meeting in Havana that resulted in an initial unity agreement among the Armed Forces of National Resistance (FARN), the Popular Liberation Forces (FPL), and the Communist Party of El Salvador (PCES), which had itself formed an armed wing at Cuban and Soviet insistence. In late May 1980, after more negotiations in Havana, the Popular Revolutionary Army (ERP) was admitted into the guerrilla coalition.

The new combined military command assumed the name of the Unified Revolutionary Directorate (DRU). During this period, Cuba also coordinated the development of clandestine support networks in Honduras, Costa Rica, and Nicaragua, sometimes using arms supply mechanisms established during the Nicaraguan civil war.

With unified tactics and operations now possible, Cuba began to assist the guerrillas in formulating military strategy. Cuban specialists helped the DRU devise initial war plans in the summer of 1980. The Cubans influenced the guerrillas to launch a general offensive in January 1981. After the offensive failed, guerrilla leaders traveled to Havana in February 1981 to finalize a strategy to "improve our internal military situation" by engaging in a "negotiating maneuver" to gain time to regroup.[11]

Cuba provided few weapons and ammunition to Salvadoran guerrillas from its own resources, but played a key role in coordinating the acquisition and delivery of arms from Vietnam, Ethiopia, and Eastern Europe through Nicaragua.[12] After the unmasking of this network, Cuba and Nicaragua reduced the flow in March and early April. Prior to a guerrilla offensive in August an upswing in deliveries occurred. The arms flow continues via clandestine surface and air routes. In addition, the Cubans over the past year have established a network of small ships to deliver arms to Salvadoran insurgent groups.

Cuba also assists the Salvadoran guerrillas in contacts with Arab radical states and movements to arrange military training and financing for arms acquisitions. In September 1980, Cuba laundered $500,000 in Iraqi funds for the Salvadoran insurgents. In March 1981, the Salvadoran Communist Party Secretary General, Shafik Handal, visited Lebanon and Syria to meet with Palestinian leaders. Cuba also coordinates the training of a relatively small number of Salvadoran guerrillas in Palestinian camps in the Mideast.

Cuban training of Salvadoran guerrillas increased sharply in 1980 as Cuba concentrated on building a trained army able to mount major offensives. A typical three-month training program included courses in: guerrilla tactics; marksmanship and weapons use; field engineering; demolition, fortification construction; land navigation; use of artillery and mines. One observer reported seeing groups up to battalion size (250–500 men) under instruction, suggesting that some guerrillas trained as integral units.[13]

Cuba has provided selected guerrillas more intensive training on specialized subjects. A former FPL guerrilla who defected in fall 1981 reported that during 1980 he had received 7 months of military training in Cuba which included instruction on scuba diving and underwater demolition. Soviet scuba equipment was used. The group trained as frogmen called themselves "combat swimmers" and were told that their mission was to destroy dams, bridges, port facilities and boats.

Cuba also gives political, organizational and propaganda support to the guerrillas. Cuban diplomatic facilities worldwide help guerrilla front groups with travel arrangements and contacts. The Cuban press agency, Prensa Latina, has handled communications for guerrilla representation abroad. Cuba and the Soviet Union have pressed communist parties and radical groups to support the insurgency directly and through solidarity organizations with propaganda and facilities (office space, equipment, etc.).

The Salvadoran insurgents have publicly stressed the importance of solidarity groups. A member of the FPL, Oscar Bonilla, who attended the Fourth Consultative Meeting in Havana of the Continental Organization of Latin American Students (OCLAE), a Cuban front group, told Radio Havana in August 1981 that OCLAE: "has been the most important means of soladarity of all the peoples and has gotten us ready to form an anti-interventionist student front in El Salvador, Central America and the Caribbean . . . We believe that it is good to carry out immediate plans for actions which will permit us to stop an imperialist intervention in El Salvador. In this respect, the students of Latin America will have to confront and attack U.S. interests so that the United States will see how the Latin American and Caribbean student movement responds to an aggression by imperialism in El Salvador."

With Soviet assistance, Cuba has orchestrated propaganda to distort the realities of the Salvadoran conflict. Unattributed foreign media placements and efforts to organize protests against the Salvadoran government and U.S. policy, which have accompanied official propaganda, stress the theme of U.S. intent to intervene militarily in El Salvador.

Unfounded claims and accusations originated by the Salvadoran guerrillas are routinely replayed to a regional and world audience by Cuba's Radio Havana or Prensa Latina, then echoed by the official Soviet Press Agency, TASS, Radio Moscow, and Eastern European media. For example, a false report of a U.S. soldier killed in El Salvador that resounded widely in Cuban/Soviet propaganda during 1980 was traced finally to the Salvadoran Communist Party. This rumor was to support an even bigger lie: that hundreds of U.S. soldiers were in El Salvador, building U.S. bases, and herding peasants into Vietnam-style strategic hamlets.[14]

Guatemala

Castro has stepped up Cuba's support to Guatemalan guerrillas whom he has aided with arms and training since he came to power.

As elsewhere, Cuba has influenced divided extremist groups to unite and conditioned increased Cuban aid on a commitment to armed struggle and a unified strategy. During 1980, discussions about a unity agreement were held among leaders of the Guerrilla Army of the Poor (EGP), the Rebel Armed Forces (FAR), the Organization of People in Arms (ORPA), and the dissident faction of the Guatemalan Communist Party (PGT/D). At the invitation of Sandinista leaders, representatives of the four groups met in Managua under strict security to continue discussions. In November 1980, the four organizations signed a unity agreement in Managua to establish the National Revolutionary Union (with a revolutionary directorate called the General Revolutionary Command—CGR). Manuel Pineiro Losada, Chief of the America Department, and Ramiro Jesus Abreu Quintana, head of its Central American Division, represented Fidel Castro at the signing ceremony. Following the signing of the unity agreement, representatives of the CGR traveled to Havana to present the document to Castro. ORPA publicized the agreement in a communique issued November 18, 1980. All parties agreed it was significant that the unity agreement was the first such document signed on Central American soil.

After this unity agreement was concluded, Cuba agreed to increase military training and assistance. A large number of the 2,000 or more guerrillas now active have trained in Cuba. Recent military training programs have included instruction in the use of heavy weapons.

During the past year arms have been smuggled to Guatemala from Nicaragua passing overland through Honduras. The guerrilla arsenal now includes 50 mm mortars, submachine guns, rocket launchers, and other weapons. Captured M–16 rifles have been traced to U.S. forces in Vietnam. On June 26, 1981, Paulino Castillo, a 28-year-old guerrilla with ORPA, told newsmen in Guatemala that he was part of a 23-man group of Guatemalans that underwent seven months of training in Cuba, beginning around February 1980. His group was divided into sections for urban and rural combat training in explosives and firearms use. To get to Cuba, Castillo travelled to Costa Rica from Guatemala by public bus. In Costa Rica a go-between obtained a Panamanian pass-

Footnotes at end of article.

port for Castillo to enter Panama. In Panama other contacts equipped him with a Cuban passport and he continued on to Cuba. Castillo returned to Guatemala via Nicaragua to rejoin the guerrillas. He later surrendered to a Guatemalan army patrol.

Guatemalan guerrillas have collaborated with Salvadoran guerrillas. In January 1981, the EGP, ORPA, FAR and the PGT/D circulated a joint bulletin announcing the intensification of their activities in support of the general offensive in El Salvador. The Salvadorans in turn have provided the Guatemalans with small quantities of arms.

Unity has not been fully achieved, as the four groups have not yet carried out plans to establish a political front group. The joint military strategy, however, is being implemented. The guerrillas have stepped up terrorist actions in an effort to provoke repression and destabilize the government. For example, the EGP took responsibility for placing a bomb in one of the pieces of luggage that was to have been loaded onto a U.S. Eastern Airlines plane on July 2. The bomb exploded before being loaded, killing a Guatemalan airport employee.

Costa Rica

Cuba took advantage of Costa Rica's strong popular and governmental opposition to Somoza's authoritarian government and of Costa Rica's open democratic society to establish and coordinate a covert support network for guerrilla operations elsewhere in Central America. The apparatus was established during the course of the Nicaraguan civil war and maintained clandestinely thereafter. Costa Rica was well-disposed toward groups that opposed Somoza, including the Sandinista guerrillas. Aid provided by Panama and Venezuela was openly funneled through Costa Rica to the Nicaraguan rebels. Cuba, however, kept its role largely hidden.

A Special Legislative Commission established in June 1980 by the Costa Rican Legislature revealed Cuba's extensive role in arming the Nicaraguan guerrillas. The Commission determined that there were at least 21 flights carrying war material between Cuba and Liano Grande and Juan Santamaria Airports in Costa Rica.[15]

Costa Rican pilots who made these flights reported Cubans frequently accompanied the shipments. Although Cubans were stationed at Liano Grande, their main operations center for coordinating logistics and contracts with the Sandinistas was set up secretly in San Jose and run by America Department official Lopez Diaz. The Special Legislative Commission estimated that a minimum of one million pounds of arms moved to Costa Rica from Cuba and elsewhere during the Nicaraguan civil war, including antiaircraft machine guns, rocket launchers, bazookas, and mortars. The Commission also estimated that a substantial quantity of these weapons remained in Costa Rica after the fall of Somoza in July 1979.

The Special Legislative Commission concluded that after the Nicaraguan civil war had ended, "arms trafficking (began), originating in Costa Rica or through Costa Rican territory, toward El Salvador, indirectly or using Honduras as a bridge." Through 1980 and into 1981 traffic flowed intermittently through Costa Rica to El Salvador, directed clandestinely by the Cubans.

In the summer of 1979 the Cubans and their paid agent, Fernando Carrasco Illanes, a Chilean national residing in Costa Rica, (along with several Costa Ricans previously involved in the logistics effort for the FSLN) agreed to continue smuggling arms to Salvadoran guerrillas. The Cubans arranged for acquisition of some of the arms and ammunition remaining in Costa Rica from the Nicaraguan airlift to supply the Salvadoran insurgents.

This new Cuban operation was coordinated from San Jose, first from their secret operations center then later directly from the Cuban Consulate. The major coordinator, until his expulsion from Costa Rica in May 1981 following the break in consular relations between Costa Rica and Cuba, was Fernando Pascual Comas Perez of the America Department. Comas worked directly for Manuel Pineiro and had the cover title of Cuban Vice Consul in San Jose. Cuban agents made arrangements to store arms for transshipment to El Salvador, and to help hundreds of Salvadoran guerrillas pass through Costa Rica in small groups on their way to training in Cuba. Cuban operations have been facilitated by Costa Rica's three Marxist-Leninist parties, which have provided funds, safehaven, transportation and false documents.[16]

Terrorism had been virtually unknown in Costa Rica until March 1981 except for scattered incidents of largely foreign origin. The first Costa Rican terrorists made their appearance in March when they blew up a vehicle carrying a Costa Rican chauffeur and three Marine security guards from the U.S. Embassy in San Jose. In April, four terrorists from the same group were captured after machine-gunning a police vehicle. In June, the group murdered three policemen and a taxi driver. Costa Rican authorities have arrested some twenty accused terrorists and are continuing to investigate leads linking them to South American terrorist groups such as the Argentine Montoneros, the Uruguayan Tupamaros, Colombia's M–19 and to Cuba itself. Two of the accused terrorists are known to have received training in the Soviet Union.

Director of the Judicial Investigation Organization Eduardo Aguilar Bloise told a press conference August 12 that captured terrorist documents indicated that two Costa Rican peasants had been given "ideological/military training" in Cuba and returned to work in the Atlantic coastal zone of Costa Rica. The documents indicate that the two were in Cuba from 8 to 12 months—possibly in 1978—and were financed by the terrorist group known popularly in Costa Rica as "the family." Aguilar said he did not discount the possibility that others had been trained in Cuba.

While most of Costa Rica's Marxist-Leninist parties have advocated a peaceful line in respect to Costa Rica, one group with close ties to Cuba—the Revolutionary Movement of the People (MRP)—while disavowing responsibility for terrorist acts, has spoken of them as "well intentioned." Some of the arrested terrorists are known to have belonged to the MRP at one time. On November 5 the Office of National Security announced the discovery of a terrorist cell clearly connected with the MRP. Among the arms and terrorist paraphernalia confiscated was an Uzi submachinegun with silencer. Earlier, the authorities had confiscated a "plan for Guanacaste" from an MRP official which noted such objectives as "prevent the electoral process from developing in a festive atmosphere" and "the taking of power by the armed people." The head of the MRP has traveled many times to Cuba and Cuba has given training to other MRP leaders.

Honduras

Cuba provided paramilitary training to a small number of Hondurans in the early 1960's, but relations with Honduran radicals were strained until the late 1970's. Cuba then resumed military training for members of the Honduran Communist Party (PCH) and integrated them into the "internationalist brigade" fighting in the Nicaraguan civil war. After the war, PCH members returned to Cuba for additional training.

Since then Cuba has concentrated primarily on developing Honduras as a conduit for arms and other aid to guerrillas active elsewhere in Central America. In January 1981, Honduran officials discovered a large cache of concealed arms intended for Salvadoran guerrillas, which included M–16 rifles traced to Vietnam. Smuggled arms have continued to be intercepted.

While considering Honduras a useful support base for insurgencies elsewhere, Cuba is also working to develop the capacity for insurrection within Honduras. In the normal pattern, Havana has urged splintered extremist groups in Honduras to unify and embrace armed struggle. While holding back from levels of support given to Salvadoran and Guatemalan guerrillas, Cuba has increased its training of Honduran extremists in political organization and military operations. Cuba has also promised to provide Honduan guerrillas their own arms, including submachine guns and rifles.

On November 27, Honduran authorities discovered a guerrilla safe house on the outskirts of Tegucigalpa. Two guerillas were killed in the resulting shootout, including an Uruguayan citizen. Nicaraguans as well as Hondurans were captured at the house, where a substantial arsenal of automatic weapons and explosives were seized. Incriminating documents, including notebooks which indicate recent attendance in training courses in Cuba, were also confiscated. One of those arrested, Jorge Pinel Betancourt, a 22-year-old Honduran, told reporters the group was headed for El Salvador to join Salvadoran guerrillas. Two additional guerrilla safe houses located in La Ceiba and San Pedro Sula were raided on November 29, and authorities seized sizable arms caches, explosives and communications equipment. These arms may have been destined for use within Honduras.

The Caribbean

Jamaica

In the late 1970's Jamaica became a special target for Cuba. Fidel Castro and other Cuban officials developed close relationships with important members of the People's National Party (PNP) which governed Jamaica from 1973 until 1980. Cuban security personnel trained Jamaican security officers in Cuba and Jamaica, including members of the security force of the office of the Prime Minister. Cuba also trained about 1400 Jamaican youths in Cuba as construction workers through a "brigadista" program. Political indoctrination in Cuba formed part of this group's curriculum. A considerable number of these Jamaican youths received military training while in Cuba, including instruction in revolutionary tactics and use of arms.

During this same period, the Cuban diplomatic mission in Jamaica grew in size. Most of the embassy staff, including former Ambassador Ulises Estrada, were Cuban intelligence agents. Ulises Estrada, who had served as a deputy head of the America Department for five years, had a long history of involvement in political action activities and intelligence operations, and went to Jamaica in July 1979, after playing a major role in Cuba's involvement in the Nicaraguan civil war.

Cuba was instrumental in smuggling arms and amunition into Jamaica. A Cuban front corporation Moonex International, registered in Lichtenstein, with subsidiaries in Panama and Jamaica) was discovered in May 1980 to be the designated recipient of a shipment of 200,000 shotgun shells and .38 caliber pistol ammunition shipped illegally to Jamaica from Miami. Jamaican authorities apprehended the local manager of the corporation as he was attempting to leave the country, in defiance of police instructions, on a private plane accompanied by the Jamaican Minister of National Security and Cuban Ambassador Estrada. The manager subsequently paid a fine of U.S. $300,000 set by a Jamaican court.

In 1980, weapons were reported stockpiled in the Cuban embassy for possible use by Jamaicans during the elections campaign.

Footnotes at end of article.

M–16 rifles then appeared in Jamaica for the first time and were used in attacks against supporters of the opposition Jamaican Labour Party (JLP) and the security forces. Over seventy of these weapons have been found by Jamaican authorities. Some of the M–16's found in Jamaica have serial numbers in the same numerical series as captured M–16's shipped to Salvadoran guerrillas from Vietnam.

Ambassador Ulises Estrada was withdrawn from his post in November 1980, at the request of the newly-elected JLP government. In January 1981, the Jamaican government terminated the "brigadista" program and recalled Jamaican students remaining in Cuba under this program. The government decided to maintain diplomatic relations but warned Cuba to stop its interference in Jamaican affairs. Cuba continued to maintain some fifteen intelligence agents at the Cuban Embassy in Kingston. On October 29, the government broke diplomatic relations with Cuba and cited Cuba's failure to return three Jamaican fugitive criminals as the immediate cause for this action. On November 17, the government publicly detailed Cuba's role in providing covert military training under the curtailed "brigadista" program.

Guyana

In 1978, as many as 200 Cuban technicians, advisors, and medical personnel were stationed in Guyana. However, while claiming fraternal relations with Guyana's government, Cuba maintained contact with radical opposition groups. Guyanese authorities suspected the Cubans of involvement in a crippling sugar strike. In August 1978, five Cuban diplomats were expelled for involvement in illegal activities.

Cuban military advisors have provided guerrilla training outside Guyana to members of a small radical Guyanese opposition group, the Working People's Alliance. Five of the seven members of the Cuban Embassy are known or suspected intelligence agents.

Grenada

Cuban influence in Grenada mushroomed almost immediately after the March 1979 coup led by the New Jewel Movement of Maurice Bishop. Bishop and his closest colleagues were Western-educated Marxist radicals, and they turned for help to Fidel Castro, who proved willing to provide assistance.

To allow close Cuban supervision of Grenadian programs, a senior intelligence officer from the America Department, Julian Torres Rizo, was sent to Grenada as ambassador. Torres Rizo has maintained intimate relations with Bishop and other People's Revolutionary Government (PRG) Ministers, such as Bernard Coard.

The Grenadian government has followed a pro-Soviet foreign policy line. Cuban and Grenadian voting records in international organizations have been nearly identical, so much so that they alone of all Western Hemisphere nations have voted against U.N. resolutions condemning the Soviet invasion of Afghanistan.

Cuban aid to Grenada has been most intense in those areas which affect the security of its client government and the island's strategic usefulness to Cuba. Cuba has advisors on the island offering military, technical, security and propaganda assistance to the Bishop government. Many Grenadians have been sent to Cuba for training in these areas. Last year journalists observed Cuban officials directing and giving orders to Grenadian soldiers marching in ceremonies in St. George's.

Cuba is aiding the construction of a 75-kilowatt transmitter for Radio Free Grenada. Grenada's state-controlled press, enjoying a government-enforced monopoly, currently hews to a strict "revolutionary" line. Indications are that the new transmitter will continue this emphasis while providing facilities for beaming Cuban and Soviet supplied propaganda into the Caribbean and South America.

Cuba's largest project in Grenada is the construction of a major airfield at Point Salines on the southern tip of the island. Cuba has provided hundreds of construction workers and Soviet equipment to build the airfield. This airfield, according to PRG statements, is required to bring tourism to its full economic potential and will be used as a civilian airport only. Many questions have been raised, however, about the economic justification for the project. The Grenadian government has ignored requests for a standard project analysis of economic benefits. The planned 9,800-foot Point Salines runway, moreover, has clear military potential. Such an airfield will allow operations of every aircraft in the Soviet/Cuban inventory. Cuba's Mig aircraft and troop transports will enjoy a greater radius of operation. The airport will give Cuba a guaranteed refueling stop for military flights to Africa.

Bishop himself has given an implicit endorsement of future military use of the airfield. A March 31, 1980, Newsweek report quoted Bishop's comments to a U.S. reporter: "Suppose there's a war next door in Trinidad, where the forces of Fascism are about to take control, and the Trinidadians need external assistance, why should we oppose anybody passing through Grenada to assist them?"

The Dominican Republic

With its renewed commitment to armed struggle, Cuba's interest in the Dominican Republic has revived. Since early 1980, the Cubans have been encouraging radicals in the Dominican Republic to unite and prepare for armed actions. Cuban intelligence officials, like Omar Cordoba Rivas, chief of the Dominican Republic desk of the America Department, make periodic visits to the island.

The Soviet Union, Cuba and other communist countries have mounted extensive training programs for Dominican students. In July 1981 the Moscow-line Dominican Communist Party (PCD) for the first time publicized the Soviet scholarship program. Some 700 Dominican students are currently studying at Soviet universities (principally Patrice Lumumba University) with another 75 in five other communist states (Bulgaria, Cuba, the German Democratic Republic, Hungary and Romania). The PCD itself selects the more than 100 students who begin the Soviet program each year.

At the same time, the Soviet Union has been pressuring the PCD to unite with other extreme left organizations. The PCD and the pro-Cuban Dominican Liberation Party (PLD) receive funds from Cuba and the Soviet Union and send significant numbers of their members and potential sympathizers for academic and political schooling, as well as military training in communist countries. Cuba also has given military instruction to many members of small extremist splinter groups like the Social Workers Movement (MST) and the Socialist Party (PS).

South America

Colombia

Since the 1960's, Cuba has nurtured contacts with violent extremist groups in democratic Colombia. During the 1970's, Cuba established full diplomatic relations with Colombia; Cuban involvement with Colombian revolutionaries was fairly limited although Cuba provided some training to guerrilla leadership. Many leaders of the April 19 Movement (M–19), including the founder, Jaime Bateman (who also attended a communist cadre school in Moscow), were trained in Cuba. Leaders of the National Liberation Army (ELN) and the Moscow-oriented Revolutionary Armed Forces of Colombia (FARC) also received Cuban instruction.

Cuban assistance to Colombian guerrillas was stepped up after the February 1980 seizure of the Dominican Republic Embassy in Bogota. A number of diplomats, including the U.S. Ambassador, were taken hostage by M–19 terrorists. As part of a negotiated settlement, the terrorists were flown on April 17 to Cuba, where the remaining hostages were released and the terrorists were given asylum

During mid-1980, Cuban intelligence officers arranged a meeting of Colombian extremists attended by representatives from the M–19, FARC, ELN, and other Colombian radical groups to discuss a common strategy and tactics. The M–19 had previously held talks with the Nicaraguan FSLN on ways to achieve unity of action among guerrilla groups in Latin America. Although the meeting did not result in agreement by Colombian guerrillas on a unified strategy, practical cooperation among the guerrilla organizations increased.

In late 1980, the M–19 set in motion a large scale operation in Colombia with Cuban help. In November, the M–19 sent guerrillas to Cuba via Panama to begin training for the operation. The group included members who had received no prior political or military training as well as new recruits. In Cuba the guerrillas were given three months of military instruction from Cuban army instructors, including training in the use of explosives, automatic weapons, hand-to-hand combat, military tactics and communications. A course in politics and ideology was taught as well. Members of the M–19 group given asylum in Cuba after the takeover of the Dominican Republic Embassy also participated in the training program.

In February 1981, some 100–200 armed M–19 guerrillas reinfiltrated into Colombia from Panama by boat along the Pacific coast. The guerrillas' mission to establish a "people's army" failed. The M–19 members proved to be poorly equipped for the difficult countryside and the Cuba-organized operation was soon dismantled by Colombian authorities. Among those captured was Rosenberg Pabon Pabon, the M–19 leader who had directed the Dominican Republic Embassy takeover, and then fled to Cuba. Cuba denied any involvement with the M–19 landings, but did not deny training the guerrillas.[17]

Cuba's propaganda support for Colombian terrorists was impossible to deny. When a group apparently consisting of M–19 dissidents kidnapped an American working for a private religious institute, Cuba implicitly supported the terrorists' action through Radio Havana broadcasts beamed to Colombia in February 1981, which denounced the institute workers as "U.S. spies." Radio Moscow picked up the unfounded accusation to use in its Spanish broadcasts to Latin America. The American was later murdered by the kidnappers.[18]

Colombia suspended relations with Cuba on March 23, in view of the clear evidence of Cuba's role in training M–19 guerrillas. President Turbay commented in an August 13 New York Times interview: ". . . When we found that Cuba, a country with which we had diplomatic relations, was using those relations to prepare a group of guerrillas to come and fight against the government, it was a kind of Pearl Harbor for us. It was like sending ministers to Washington at the same time you are about to bomb ships in Hawaii."

Chile

After Allende's fall in 1973, Castro promised Chilean radicals "all the aid in Cuba's power to provide." Although Cuban officials maintained regular contact with many Chilean exiles, divisions among the exiles inhibited major operations. The Moscow-line Chilean Communist Party (PCCH), holding the position that revolutionary change could be accomplished by nonviolent means, was critical of "left-wing forces" like the Move-

Footnotes at end of article.

ment of the Revolutionary Left (MIR) with which Cuba had close relations.

Throughout the 1970's, members of the MIR received training in Cuba—and in some cases instructed other Latin American revolutionaries. This training ranged from political indoctrination and instruction in small arms use to sophisticated courses in document fabrication, explosives, code writing, photography, and disguise. In addition, Cuban instructors trained MIR activists in the Mideast and Africa.

With its renewed commitment to armed struggle, Cuba increased its training of Chileans beginning in 1979. By mid-1979, the MIR had recruited several hundred Chilean exiles and sent them to Cuba for training and eventual infiltration into Chile. At the same time, members of the MIR who had been living and working in Cuba since Allende's overthrow began to receive training in urban guerrilla warfare techniques. The training in some cases lasted as long as seven months and included organization and political strategy, small unit tactics, security, and communications.

Once training was completed, Cuba helped the terrorists return to Chile, providing false passports and false identification documents. By late 1980, at least 100 highly trained MIR terrorists had reentered Chile, and the MIR had claimed responsibility for a number of bombings and bank robberies. Cuba's official newspaper Granma wrote in February 1981 that the "Chilean Resistance" forces had successfully conducted more than 100 "armed actions" in Chile in 1980.

By late 1979, the PCCH was reevaluating its position in light of events in Nicaragua, where the fragmented Nicaraguan Communist Party emerged from the civil war subservient to the FSLN. In December 1980, PCCH leader Luis Corvalan held talks in Cuba with Fidel Castro, who urged Corvalan to establish a unified Chilean opposition. During the Cuban Party Congress that month, Corvalan delivered a speech which sketched a new party line calling for armed struggle to overthrow the Chilean government and for coordination of efforts by all parties, including the violent left. In January 1981, Corvalan commended MIR terrorist acts as "helpful" and stated that the PCCH was willing not only to talk with MIR representatives but to sign agreements with the group. Several days after this offer, Corvalan signed a unity agreement with several Chilean extremist groups, including the MIR.

Until January 1981 when the new PCCH policy evidently had been ironed out and validated by the agreement for a broad opposition coalition, Corvalan's statements were issued from such places as Czechoslovakia, East Germany, Cuba, and Peru—but never from Moscow. Within two weeks of the agreement, however, Moscow showed its implicit approval of the policy change and began broadcasting (in Spanish to Latin America and to Chile in particular) PCCH explanations of the new policy and calls for mass resistance and acts of terrorism to overthrow the Chilean government.

Terrorist activities by MIR commandos operating in Chile have increased substantially during the past year. These have included increased efforts by MIR activists to establish clandestine bases for rural insurgency, killings of policemen, and a number of assassination attempts against high government officials.

Argentina

The Cubans have a long history of association with, encouragement of, and active backing for terrorism in Argentina. The Cubans were linked to the two groups responsible for unleashing the wave of leftist terrorism that swept Argentina in the early and mid-1970's, the Montoneros and the People's Revolutionary Army (ERP). Cuba backed these organizations with advice on tactics and instructions on recruiting operations and with training in Cuba in urban and rural guerrilla techniques. During the height of Argentine terrorism, in the early and mid-1970's, the Cubans used their embassy in Buenos Aires to maintain direct liaison with Argentine terrorists.

The Argentine terrorists were virtually defeated by 1978. In that year, Castro permitted the Montonero national leadership to relocate its headquarters in Cuba. Today, the Montonero top command, its labor organization, its intelligence organization, among other units, are all located in Cuba. The Cubans facilitate the travel and communications of Montoneros, supplying them with false documentation and access to Cuban diplomatic pouches. Montoneros have been among the Latin American guerrillas trained in guerrilla warfare over the past year in the Mideast as part of a cooperative effort between Palestinian groups and Cuba.

Following the move of their high command to Havana, the Montoneros made repeated attempts to reinfiltrate Argentina. In late 1979, small groups of infiltrators eluded detection and were able to carry out several terrorist actions, including four murders. Subsequent attempts by the Montoneros to infiltrate terrorists in early 1980 proved unsuccessful.

With Cuban support, Montoneros are active outside Argentina. Cuban-trained Montoneros were among the members of the "internationalist brigade" that Cuba supported in Nicaragua in 1979. This connection was highlighted when Montonero leader Mario Firmenich attended the first anniversary of the July 1979 victory, wearing the uniform of a Sandinista Commander. Montoneras have been active elsewhere as well. Montoneros largely staffed and administered Radio Noticias Del Continente, which broadcast Cuban propaganda to Central and South America from San Jose until it was closed by the Costa Rican Government in 1981, after war materials were discovered on its installations.

Uruguay

After the failure of the urban insurgency organized in the early 1970's by the National Liberation Movement (MLN-Tupamaros), several hundred Tupamaros went to Cuba. During the mid-1970's Cuba provided some of them with training in military and terrorist tactics, weapons and intelligence. Several of these former Tupamaros subsequently assisted Cuba in running intelligence operations in Europe and Latin America. Some participated in the Cuban-organized "internationalist brigade" that fought in the Nicaraguan civil war.

Cuban continues to provide propaganda support for the Tupamaros and the Uruguayan Communist Party. Radio Havana reported on June 30, 1981, that the leader of the Communist Party of Uruguay attended a ceremony "in solidarity with the Uruguayan peoples' struggle" at the headquarters of the Cuban State Committee for Material and Technical Supply in Havana. Pro-Cuban Uruguayan leaders are given red carpet treatment when they visit Havana and are usually received by at least a member of the Cuban Politburo.

IV. POSTSCRIPT

Cuba's renewed campaign of violence has had a negative impact on Cuba's relations with its neighbors. Cuba's policies abroad and its reaction to emigration pressures at home have reversed the trend in Latin America toward normalization of relations. Although the Castro government has developed close ties to Nicaragua and Grenada, Cuba finds itself increasingly isolated throughout the Americas.

Peru nearly broke relations and removed its ambassador in April 1980, when the Cuban government encouraged Cubans eager to leave the island to occupy the Peruvian Embassy. After over 10,000 Cubans crowded into the Embassy compound, Castro thwarted efforts by concerned governments to develop an orderly departure program and opened the port of Mariel to emigration, also expelling many criminals and the mentally ill, and ultimately allowing over 125,000 people to leave under sometimes perilous conditions. But Cuba still refuses to issue safe conduct passes to the 14 Cubans that remain cloistered in the Peruvian Embassy in Havana today.

Cuba's neighbors were further shocked when Cuban MiG 21's sank the Bahamian patrol boat "Flamingo" on May 10, 1980, in an unprovoked attack in Bahamian coastal waters. Subsequently, four Bahamian seamen were machine-gunned while trying to save themselves after their vessel sank. Their bodies were never recovered. U.S. Coast Guard aircraft were harassed by Cuban MIG's while searching for survivors at the request of the Bahamian government.

Relations between Venezuela and Cuba deteriorated badly in 1980, principally over the asylum issue, to the degree that Venezuela removed its ambassador from Havana. In November 1980, Jamaica expelled the Cuban Ambassador for interference in Jamaica's internal affairs and in October 1981, broke diplomatic relations. Colombia suspended relations in March 1981, over Cuba's training of M–19 guerrillas. Cuba's handling of an incident in which a group of Cubans demanding asylum forcibly occupied Ecuador's Embassy in Havana, prompted Ecuador to move its ambassador from Cuba in May 1981. Also in May, Costa Rica severed existing consular ties with Cuba, expelling Cuban officials active in coordinating support network for Central American insurgents.

Today, outside the English-speaking Caribbean, only Argentina, Panama, Mexico, and Nicaragua conduct relatively normal relations through resident ambassadors in Havana. Use of Panama as a transit point for Colombian guerrillas, however, led Panama to reassess its relations with Cuba, and resulted in sharp public criticism of Cuba's "manifest disregard for international standards of political co-existence" by a high Panamanian government official.

FOOTNOTES

[1] Cuba's military and political activities in Africa are intense and wide-ranging. Cuba still maintains expeditionary forces of at least 15–19,000 in Angola and 11–15,000 in Ethiopia. Cuba has military and security advisor contingents in a number of other African countries and in South Yemen.

[2] According to the World Bank, Cuba's per capita annual growth rate averaged *minus* 1.2 percent between 1960–78. Cuban economic performance ranked in the lowest 5 percent worldwide and was the worst of all socialist countries. Only massive infusions of Soviet aid have kept consumption levels from plummeting. Cuba today depends more heavily on sugar than before 1959. The industrial sector has been plagued by mismanagement, absenteeism, and serious shortages in capital goods and foreign exchange. The economic picture is so bleak that in 1979, and again in October 1981, the Cuban leadership had to warn that 10 to 20 more years of sacrifice lie ahead.

[3] Cuba maintains some front organizations set up in the 1960's. One of these, the Continental Organization of Latin American Students, still holds irregular congresses of student leaders from Latin America and the Caribbean (the most recent was held in Havana in August 1981) and publishes a monthly journal, which is distributed by the Cuban government.

[4] Although Cuba is not involved in actions directly threatening to Mexican internal stability, Cuba has taken advantage of

Mexico's open society and its extensive presence there—Cuba's Embassy in Mexico City is its largest diplomatic mission in the hemisphere—to carry out support activities for insurgencies in other countries. Mexico is a principal base for Cuban contacts with representatives of several armed Latin American groups on guerrilla strategy, logistical support, and international activities.

[5] Prensa Latina, the press agency of the Cuban Government, has field offices in 35 countries, including eleven different Latin American and Caribbean countries, and combines news gathering and propaganda dissemination with intelligence operations. Radio Havana, Cuba's shortwave broadcasting service, transmits over 350 program hours per week in eight languages to all points of the world. Cuba also transmits nightly medium-wave Spanish-language broadcasts over "La Voz de Cuba," a network of high-powered transmitters located in different parts of Cuba. In the Caribbean alone, Radio Havana's weekly broadcasts include 14 hours in Creole to Haiti; 60 hours in English, 3 hours in French, and 125 hours in Spanish. Prensa Latina and Radio Havana, in close coordination with TASS and Radio Moscow, regularly use disinformation to distort news reports transmitted to the region, especially those concerning places where Cuban covert activities are most intense.

[6] Latin Americans are not the only trainees. In a May 1978 Reuters interview published in Beirut, Abu Khalaf, a leader of the military branch of El Fatah, confirmed that Palestinian agents have received training in Cuba since the late 1960's. Palestinian organizations have reciprocated by training various Latin American groups in the Middle East with Cuban assistance. Libya, which hosted a meeting if Latin American "liberation movements" January 25–February 1, 1979, also has trained some Latin American extremists.

[7] Public exposure in March 1981 of the use of Panama as a transit point for Colombian guerrillas trained in Cuba led to sharp criticism of Cuba by the Panamanian government. Panama imposed greater controls on activities of exiled Central and South Americans, and the transit of guerrillas through Panama appears to have ceased, at least temporarily.

[8] Courses in agitation and propaganda open to foreigners include the Central Union of Cuban Workers' Lazaro Pena Trade Union Cadre School and similar courses run by the Union of Young Communists, the Cuban Women's Federation, the National Association of Small Farmers, and the Committees for the Defense of the Revolution. Even the Cuban Communist Party offers special courses for non-Cubans in party provincial schools and in the Nico Lopez National Training School, its highest educational institution. The Cuban press reported graduation ceremonies July 17, 1981, for this year's 70 Cuban graduates and announced that 60 foreigners had also attended advanced courses at the Nico Lopez school. Foreign students represented political organizations from Venezuela, Costa Rica, Panama, Peru, Colombia, Ecuador, Jamaica, the Dominican Republic, Guatemala, Nicaragua, Chile, Grenada, Angola, Namibia, South Africa, Sao Tome y Principe, and South Yemen. Official Cuban Communist Party newspaper *Granma* labeled their presence "a beautiful example of proletarian internationalism." Courses of instruction at the Nico Lopez school, which is chaired by senior party leaders, include "political training for journalists," "political training for propagandists," economics, and ideology.

[9] Ulises Estrada was given his first ambassadorial post in Jamaica following the July 1979 victory of anti-Somoza forces (see Jamaica case study). He is currently Cuba's ambassador to South Yemen.

[10] The very quantity of Cuban advisors has caused resentment among nationalist Nicaraguans leading to sporadic outbursts of anti-Cuban feelings. On June 3, 1981, the FSLN announced that 2,000 Cuban primary school teachers presently in Nicaragua would return to Cuba in July, at the mid-point of Nicaragua's academic year. The Nicaraguan Education Minister announced on June 18 that 800 of those departing would return in September after vacations in Cuba, while Cuba would replace the other 1200 teachers in February. By November 1981, however, all 2,000 Cuban teachers had returned to Nicaragua.

[11] A guerrilla document outlining this strategy was found in Nicaragua in Feburary 1981. Guerrilla representatives later confirmed its authenticity to Western Europeans with the disclaimer that the strategy elaborately developed in the paper had been rejected.

[12] The Cuban role as arms broker to the DRU since 1979 has been documented in the Department of State's Special Report No. 80, *Communist Interference in El Salvador*, February 23, 1981. In April 1981, when Socialist International representative Wischnewski confronted Castro with the evidence in the report, Castro admitted to him that Cuba had shipped arms to the guerrillas. In discussions with several Inter-Parliamentary Union (IPU) delegations at the September 1981 IPU conference in Havana, Castro again conceded that Cuba had supplied arms.

[13] Cuban Vice President Carlos Rafael Rodriguez tacitly admitted that Cuba was providing military training to Salvadoran guerrillas in an interview published in *Der Spiegel* on September 28, 1981.

[14] At the time those reports first appeared, the U.S. was providing neither arms nor ammunition to El Salvador. In January 1981 the U.S. responded to the Cuban-orchestrated general offensive by sending some military assistance and later sent American military trainers, whose numbers never exceeded 55. There are no U.S. combatants, bases, or strategic hamlets in El Salvador. TASS continues to report falsely that "hundreds" of U.S. military personnel are in El Salvador and participate in combat.

[15] The Commission's report was issued May 14, 1981.

[16] In a recorded interview broadcast by Radio Havana on June 16, 1981, Eduardo Mora, Deputy Secretary General of Costa Rica's Popular Vanguard Party (the Moscow-line traditional Communist party, the least disposed to violence of the country's several Marxist parties and splinter groups) explained his party's position. "We establish ties with all revolutionary organizations in Central America. We have close ties and are willing to give all the aid we possibly can in accordance with the principles of proletarian internationalism because we believe that the struggle of the Central American people is the struggle of our own people."

[17] Cuban Vice President Carlos Rafael Rodriguez explained in an interview published in Der Spiegel on September 28, 1981, why Cuba had not denied training the M–19 guerrillas: "We did not deny this because in the past few years many people came to our country for various reasons to ask for training. We did not deny this desire. If a revolutionary for Latin America wishes to learn the technique and organization of resistance for his own self-defense, we cannot refuse in view of the brutal oppression. This also holds true for the Salvadorans."

[18] The U.S. citizen killed, Chester Allen Bitterman, was working for the Summer Institute of Linguistics, a religious group which develops written forms of indigenous languages.

THE SECURITY THREAT IN THE CARIBBEAN AND CENTRAL AMERICA

(By the Honorable Fred C. Ikle)

Mr. Chairman, I am gratified that you invited me to appear before your committee. You have asked me to address the military developments in the Caribbean and in Central America.

For a century and a half, Mr. Chairman, the security of this hemisphere had been protected from the reach of European imperialism, initially through the application of the Monroe Doctrine and later through the efforts of collective security of the American republics. The West European empires, against which the Monroe Doctrine had been designed, have long been dissolved. But a new Imperialism has expanded in the East and is expanding still, stretching from the center of Europe to Afghanistan and Mongolia, with its outlying colonies and military outposts scattered around the globe: Vietnam, South Yemen, Angola—and the crown colony in the Caribbean, the island of Cuba.

The suppression of the unruly subjects in this Empire, and the annexation of new territories, is a major military enterprise.

It is backed up by the largest military arsenals in the world, it is being driven forward by the greatest military build-up in history.

In the center of the Caribbean, the crown colony of this Imperialism is becoming increasingly a direct military threat to the region and an indirect threat as an arms depot and logistics base for new Imperial annexations in Africa and Central America.

The Soviet Union has provided a high level of military imports into Cuba. The total value of Soviet arms shipments to Cuba since 1960 is about $2.5 billion. Since Cuban intervention in Angola, the average yearly totals have been almost twice that of the years preceding 1975. If one considers the weight of arms delivered thus far in 1981, Cuba has received 63,000 metric tons, making this the highest yearly total since the massive buildup in 1962—the year of the missile crisis.

Cuba's military personnel strength has increased and its military capabilities have improved dramatically over the last five years. A significant trend has been the development of an effective ready reserve which gives Castro and his Soviet masters a well trained, and to a large extent, battle experienced mercenary force which can be activated on short notice. About 70 percent of Cuba's forces in Angola and Ethiopia are these ready reservists who were recalled to active duty.

The Cuban military capability is far in excess of any actual or imaginary defensive needs. Cuban armed forces include an army of over 225,000 a navy of about 11,000 and air and air defense forces of 16,000. These figures do not include hundreds of thousands of paramilitary forces which in many instances are better trained and equipped than the regular armed forces of other Caribbean countries.

Cuba has over 2.3 percent of its population in the regular armed forces. In fact, one of every twenty Cubans participates in some kind of security mission. By comparison, Mexico, with seven times Cuba's population, maintains regular defense forces half the size of Cuba's and has less than two tenths of one percent of its people in the regular armed forces.

Brazil, the largest Latin American country, with 12 times the population of Cuba, also has only about two tenths of one percent of its population in its active military. And, in the United States, we have less than one percent of our people in the regular armed forces; that is to say, Mr. Chairman, Fidel Castro maintains about a ten-to-twenty

times larger military effort than any of the other major nations in this hemisphere.

Cuba's neighbors in Central America (with the exception of Nicaragua) maintain small defense forces which vary from almost none for Costa Rica, to about 8,000 to 10,000 for Panama and 15,000 to 16,000 for Honduras and Guatemala, to about 20,000 for El Salvador, of course, has been compelled to expand its armed forces because of the totalitarian aggression against it. The Cuban army includes nine active and 18 reserve divisions. The Cubans have over 200 MIG fighter aircraft, 650 tanks, 90 helicopters, two FOXTROT attack submarines, one KONI-Class frigate, and about 50 torpedo and missile attack boats. This is clear and convincing evidence that Cuba is truly a highly militarized society with a growing military capability.

The Soviet influence in Cuba is all pervasive. The Soviet brigade with a strength of about 2,600 to 3,000 is located near Havana. In this area, the Soviets have a major intelligence collection facility which monitors U.S. communications. There are also an estimated 6,000 to 8,000 Soviet civilian advisors on the island. About 2,000 Soviet military advisors provide technical advice in support of such sophisticated weapons as the MIG's, surface-to-air missiles, and Cuba's FOXTROT submarines. Additionally, Soviet advisors are attached to Cuban ground units.

The Soviet Union has great influence on the Cuban Government for several reasons. First, the Soviets provide Cuba's principal economic support—a leverage that Fidel Castro cannot ignore. Second, the presence of Soviet personnel on the island, especially the large embassy staff and advisors in the economic and military spheres, allow the Soviet Imperial Masters to monitor closely their Caribbean crown colony.

It would be a grave mistake. Mr. Chairman, if we ignored the direct military threat that this Soviet-Cuban arsenal represents, some 90 miles to the south of Florida. This Soviet military outpost supports a massive intelligence collection center and sits astride critical sea lines of communication.

In peacetime, 44 percent of all foreign trade tonnage and 45 percent of the crude oil to the U.S. pass through the Caribbean. In addition, the Caribbean is a major refinery area in its own right. In wartime, half of NATO's supplies would transit by sea from gulf ports through the Florida Straits and onward to Europe. Much of the petroleum shipments and important reinforcements destined for U.S. forces in Europe would be originating from Gulf ports. The security of our maritime operations in the Caribbean, hence, is critical to the security of the Atlantic Alliance.

Mr. Chairman, the increased Soviet military presence on Cuban soil and in the Caribbean poses a grave threat to this vital lifeline of the Alliance. In 1970, Soviet naval vessels spent approximately 200 ship days in the South Atlantic. In 1980, this number had increased thirteen-fold to 2,600 ship days. Given this presence and the current strength and disposition of the U.S. Navy, the South Atlantic sea lines of communications are far more vulnerable today than 10 years ago as or at the time of the Cuban missile crisis.

Mr. Chairman, sometimes it seems to me our European Allies, whose most basic security depends on this South Atlantic lifeline, are much to insouciant and cavalier about the growing military threat in the Caribbean.

More disturbing, perhaps, or at least more immediately pressing than this threat to the Alliance in the event of war, is the Soviet-Cuban effort presently underway further to expand the reach of Soviet imperialism. This attempt for expansion and annexation employs all the tools of modern Empire building: propaganda and deception, the export of terrorism, massive shipments of arms, and finally, the overthrow of established governments followed by the imposition of the new totalitorian rule, which is intended to be made irreversible through the import of these clever policy exports from East Berlin.

Nicaragua is close to the final stage of this intended irreversible transition, El Salvador is fighting in the middle phase, Honduras—as Secretary Enders explained to you yesterday—is now threatened by the early phase.

There are now between four and five thousand Cuban civilian advisors and about 1,500 Cuban military and security advisors in Nicaragua. Cuban advisors are believed to be serving in key posts throughout the government in which they exert considerable influence. Cuba is also getting considerable help from East European Nations. We may soon see more East German police advisors, those efficient Gestapo's that operate in South Yemen and Angola.

There are advisors in Nicaragua from East Germany, Bulgaria, North Korea and the Soviet Union to assist in building the Sandinista Army from its currently estimated strength of 60,000 into a force of 250,000. Once achieved, this military buildup will mean one in ten Nicaraguans under arms. Even at its present strength, Mr. Chairman, the Sandinista Army represents the largest military force in the history of Central America.

Approximately 70 Nicaraguans are being trained as jet pilots and mechanics in Bulgaria. Existing landing strips in Nicaragua are being lengthened and will be able to accommodate sophisticated jet aircraft. Soviet advisors are deeply involved in directing the effort to upgrade the Nicaraguan Air Force. Although there is no evidence of MIG's in Nicaragua at present, the sighting of incoming MIG–21 crates in Cuba provides cause for concern. Arrival of MIG's would dramatically increase Nicaragua's threat to its neighbors, whose fighter inventory consists of aging World War II vintage day-fighter aircraft.

Honduras, for example, has only 20 super MYSTERE and F–86 fighters with no all-weather capability. A loss of single aircraft, such as occurred last year, will degrade this modest capability. Since Nicaragua's neighbors have no match for MIG's, one must ask why Nicaragua would want such an air buildup, which would clearly be destabilizing? And why would Nicaragua want to introduce 20 to 30 Soviet tanks?

Let us look at the cold numbers, Mr. Chairman, in all their starkness. I have a chart here that shows the present and the projected level of the Nicaraguan military buildup in terms of men under arms. This chart juxtaposes this "accomplishment of Socialism" (as Radio Moscow might call it) to the armed forces of those right-wing facist dictatorships that will be beneficiaries of so-called "national liberation movements". Some liberation. The two neighbors of Nicaragua: Honduras and Costa Rica, have armed forces so small you can barely see them on this chart.

It is important to understand the dynamics of what is going on at the outer edges of Soviet imperialism. What does this size of Nicaragua's armed forces tell you, Mr. Chairman? It tells you this: if Mexico, our good friend and neighbor, were ruled by a Sandinista regime and if such a regime followed the pattern of the Sandinista military buildup, Mexico would acquire an armed force of nearly 7 million men. That is what the per capita mobilization in Nicaragua would translate into in Mexico: almost 2 million under arms with the present Sandinista buildup, and nearly 7 million with the projected Nicaragua buildup.

Mexico, of course, is a free and independent democracy, with which we live in peace. Today, Mexico has approximately a 130,000-man military force.

What does this development lead to? Nicaragua is now regularly violating Honduran territory in supplying the Salvadoran guerrillas. The Nicaraguan military buildup is unquestionably a threat to efforts in the region to move toward pluralism and self-determination. The November 29 elections in Honduras should put the West European admirers of the Sandinistas to shame. This election stands in marked contrast to the broken electoral pledges of the Sandinistas in Nicaragua.

In El Salvador, Cuba acted as the catalyst to organize and unify the disparate groups of the far left, as Secretary Enders testified here yesterday, and helped organize a guerrilla combined military command in 1980. Cuba assisted the guerrillas in developing a military strategy and initial war plans. It was Cuba that both encouraged and assisted the guerrillas to launch the ill-fated, so-called "final" offensive in January 1981. The Cubans have played a key role in arranging for the acquisition and delivery of weapons for the Salvadoran guerrillas from Vietnam, Ethiopia, and Eastern Europe by way of Nicaragua. Guerrilla recruits have been transported to Cuba and elsewhere for extensive training in guerrilla tactics, marksmanship, demolitions, artillery and field fortifications as well as in a variety of other military skills. One observer has reported seeing groups of up to battalion size in training in Cuba, which suggests that at least some Salvadoran guerrillas probably have trained as integral units. The Soviet Union has, of course, bankrolled and assisted these efforts by underwriting its Cuban proxy at a cost of $3 billion annually and by supporting efforts to collect funds, arms, and supplies from the Communist Bloc for delivery to the guerrillas.

Cuba has not devoted its attention and resources only to Nicaragua and El Salvador, but has likewise coordinated clandestine support organizations in Honduras, Costa Rica and Guatemala. In fact, convincing evidence of Cuban subversion activities has surfaced in virtually every Caribbean Basin country. In Grenada, Cuban influence has reached such a high level that it can be considered a Cuban satellite. The Cubans are constructing air and naval facilities there that far exceed the requirements of this tiny island nation.

Mr. Chairman, the news is bad, the hour is late. What can be done? I am sure that you are interested in what is being done and can be done to deal with this serious threat to American security interests. In September, the Defense Department dispatched a team of experts to El Salvador to assist the Salvadorans in developing a national military strategy. The team spent two months in El Salvador discussing the existing military capabilities and assessing requirements. The detailed findings and recommendations of the team are currently under review but some of the recommendations are already being implemented.

The Salvadorans have requested and we have agreed to provide out-of-country training for about 500–600 officer candidates, for a light infantry battalion of about 1,000 men, and for non-commissioned officers. We hope to begin this training as early as possible in 1982. There are physical problems in simply being able to marshal the people and resources to accomplish this effort in such a short time, however, the need for better trained military leaders is compelling. As you already may be aware, the cost of Salvadoran requirements far exceed planned

fiscal year 82 foreign military assistance and training levels. Thus, we will need the support of the Congress if we are going to fund this urgent need and respond in a timely manner.

We are continuing to provide small mobile training teams to train personnel in areas that are deficient, such as maintenance and coastal patrolling. Equipment provided through Foreign Military Sales includes communications equipment, helicopters, weapons and trucks that should allow the Salvadoran forces to improve their mobility, command and control, and ability to interdict the supply lines of the insurgents to their external suppliers. This effort is being supplemented by support from other concerned Latin American countries.

If the favorable consensus that has developed at the fourteenth confernce of American Armies in November, and more recently at the OAS meeting in St. Lucia, is indicative of the awareness in the hemisphere, a more cooperative mutual security effort can evolve among concerned nations of the Americas. We will continue to nurture the concept of collective security as it applies to the Western Hemisphere. Both by longstanding policy and by the Rio Treaty, we are committed to join with our Latin American Allies in "mutual assistance and common defense of the American Republics."

In the President's words, the United States "will accord high priority to requests from its major alliance partners and to those nations with whom it has friendly and cooperative security relationships."

Considering the nature of the security interests at stake, we would be remiss if we failed to advise you that we are developing the necessary contingency plans to respond as required and appropriate to further military threats and acts of aggression. This kind of planning is the responsibility of the Joint Chiefs of Staff and must be done by them routinely in order to fulfill their responsibility to the President and to the Nation.

In closing, I would like to emphasize that our security interests in the Caribbean basin must receive higher priority and far greater resources than in the past. In order to gain time to address the underlying political, economic and social problems of the region, we must cooperate closely with our neighbors. We must halt terrorists aggression and deter further military attacks in the hemisphere. A failure to respond to the current threat would only lead to greater suffering, and far greater human and material costs in the future.

THE SPEECH GIVEN BY THE CHIEF JUSTICE AT THE UNIVERSITY OF NEBRASKA IN LINCOLN, NEBR., ON WEDNESDAY, DECEMBER 16, 1981

Mr. THURMOND. Mr. President, today the Chief Justice of the United States, Warren Burger, delivered an important address at the University of Nebraska concerning needed reform in the penal and correctional institutions of the United States.

The ideas expressed by the Chief Justice merit close attention by the public and in the Senate.

For the information of the Senate and the public, I, therefore, ask unanimous consent that the text of the address given by the Chief Justice be printed in full at the conclusion of these remarks in the RECORD.

There being no objection, the text was ordered to be printed in the RECORD, as follows:

MORE WAREHOUSES, OR FACTORIES WITH FENCES?

During my tenure in the Federal Judiciary I have spoken often on the subject of penal and correctional institutions and the policies and practices which ought to be changed. People do not get into prisons except by way of the judicial process and every judge has a concern as to the effectiveness of the correctional process even though we have no responsibility for the management. Based on observations as a judge and visiting prisons in the United States and most countries of Europe for 25 years, including the Soviet Union and recently the People's Republic of China, I have long been satisfied we have not gone about the matter in the correct way.

Today I want to discuss and propose a change in our approach to the problem, but before doing so let me suggest why the subject has special relevance—even urgency. Our country is about to embark on a multi-billion dollar prison construction program. The question I raise is this: Are we going to build more "warehouses" or should we change our thinking and build factories with fences around them where we will first train inmates and then have them engage in useful production?

One thoughtful scholar of criminal justice described the state of criminal justice in harsher terms than I have used. He wrote:

Criminal justice in the United States is in a state of spreading decay . . . The direct costs of crime include loss of life and limb, loss of earning[s] . . . physical and mental suffering by the victims and their families . . .[1]

Direct losses, he said, run into many billions of dollars annually; indirect losses, vastly more, approximate the astonishing figure of 90 billion dollars a year. In the immediate future this can be reduced only by more effective law enforcement which in turn will produce a demand for more correctional facilities. Whether more prisons is the correct solution is open to question, and I leave to another occasion to discuss the merits of more mandatory minimum sentences or more use of probation and parole. Both of those courses fail to treat the fundamental issues and the reality is that over the next decade it is likely we will spend from five to ten billion dollars in new prison construction.

Plainly, if we can divert more people from lives of crime we would benefit both those who are diverted and the potential victims. Yet all that has been done in the correctional systems up to now has not prevented this appalling increase in reported crime rates.

For many years I shared the optimism and hopes of rehabilitation programs with such distinguished penologists as James V. Bennett, long the Director of the Federal Bureau of Prisons, and Torsten Eriksson, his counterpart in Sweden. Those hopes now seem to have been based more on optimism than reality. Even with the enlightened correctional practices of Sweden and other countries, the results in terms of rehabilitation have fallen short of expectations, although some countries have long done much more than we do in the education and training of prison inmates. But the fact that the problem is far more difficult than we had thought is the very reason we must consider changes and enlarge our efforts.

On several occasions I have laid down one proposition to which I adhere today, and it is this: when society places a person behind walls and bars it has an obligation—a moral obligation—to do whatever can reasonably be done to change that person before he or she is released back into the stream of society. This is more emphatically so with respect to the repeat of recidivist prisoner. If we had begun 25, 35 or 50 years ago to develop the kinds of programs in correctional institutions that are appropriate for an enlightened and civilized society, the word "recidivist" might not have as much currency as it does today. This is not simply a matter of compassion but a hard matter of our own protection.

In the Annual Report to the ABA in February this year I urged, as I had many times before, that prisons be made places for basic education and vocational training—as only a few prison systems now do.

Later on, in May this year, I made a specific proposal which I had first advanced in 1972, that a national academy of corrections be created to focus on the training of prison personnel beginning with the guards and security level. Soon after that, Attorney General William French Smith announced the creation of the National Corrections Academy at Boulder, Colorado, under the auspices of the National Institute of Corrections and the Federal Bureau of Prisons. That is another important step forward.

It is none too soon, for during the past ten years prison population in the United States increased from just under 200,000 to approximately 350,000. In part this reflects the increase in crime and probably in part lengthened sentences. It may also mean that a larger proportion of criminal acts are being detected and result in convictions of those who are guilty.

All this aside, the reality is that if we are to fulfill one of the most fundamental obligations of government—the protection of people and homes—there must be both more effective law enforcement and a drastic change in our prison systems. Just more stone, mortar and steel for walls and bars will not solve or even improve these dismal conditions. If we are to make progress and protect the persons and property of people and make streets and homes safe from predators we must consider changes in our approach to dealing with the prison population that offer some hope of changing some of those who are confined.

It is often said that our prisons are just "warehouses" for human beings and although there is a measure of truth in this, the connotations of the bare term "warehouse" overstates the case. Many prisons deserve that name but not all. Enlightened administrators in some places, where funds were available, have demonstrated some success in vocational training of prisoners to give them a marketable skill to sell when they are released. But these are all too few.

The Federal Bureau of Prisons under excellent leadership from James V. Bennett to Norman Carlson—the present Director[2]—has performed very well given budget limitations, statutory restraints on production of goods in prisons—and archaic public attitudes.

Much credit for the improvements we have made in the Federal corrections system should be given to your former U.S. Senator, Roman Hruska, who for many years was the Ranking Member of the Senate Judiciary Committee. Many improvements in the Federal corrections system that have come about are due in part to his strong support and his efforts include: programs for work release, expansion in prison industries, furloughs, and community treatment facilities.

It is predictable that a person confined in a penal institution for two, three, five, or more years, who is then released without being able to read, write, spell or do simple arithmetic and not trained with any marketable skill will be vulnerable to returning to a life of crime. And very often the recidivism commences within weeks after release. What job opportunities are there for unskilled illiterates with criminal records? What busi-

ness enterprise could conceivably continue with the rate of "recall" of its "products" that we see with respect to the "products" of our prisons?

The best programs in the world will not cure all of this dismal problem, a problem that the human race has struggled with almost since the beginning of organized societies. But improvements in our prison systems can be made, and the improvements will cost less in the long run than the failure to make them.

Today almost one billion dollars of new prison facilities are under construction. More than 20 states have authorized construction programs approaching another billion dollars. Proposals of yet another billion and a half dollars in 33 states are being debated.

Senator Robert Dole has recognized the dimensions of this problem by introducing legislation [3] to provide grants of six and a half billion dollars to the states for improved prison facilities over the next seven years. If federal grant legislation is enacted it is important that the new standards include: (a) conversion of prisons into places of education and training and into factories and shops for production; (b) a repeal of statutes which limit prison industry production; (c) an affirmative limitation against any form of discrimination against prison products; (d) a change in attitudes of organized labor and in the leaders of business toward the use of prison inmates to produce goods or parts.

These new standards are crucial and they should be developed with the participation of representatives of the state and federal prison administrators who deal face-to-face and day-to-day with the problems and understand the needs. Representatives of labor and management should also take part. In the closing decades of the twentieth century I am confident the enlightened leaders of labor and business will not support reactionary restraints on production of goods in prisons and the movement of such products in commerce.

Of course, prison production programs will compete to some extent with the private sector. But this is not a real problem because with optimum progress, it will be three to five years before programs of this kind have a market impact, even then a small impact. I cannot believe that this great country of ours—the most voracious consumer society in the world—could not absorb the production of even as many as 100,000 prisoners—hardly a "drop in the bucket" in terms of the Gross National Product. The displacement of workers in the private sector would be insignificant in the whole scheme of things. But the benefit to the inmates—and to society—would be incalculable in the long run.

Most prison inmates, by definition, are maladjusted people. From whatever cause—whether too little discipline or too much, too little security or too much, broken homes, or whatever—they lack self-esteem, they are insecure, they are at war with themselves as well as with society. They do not share the work ethic concepts that made this country great, they are not taught at home—or in the schools—the moral values that lead people to have respect and concern for the rights of others. Place that person in a factory, whether it makes ball-point pens, hosiery, cases for watches, parts of automobiles, lawn mowers, computers or parts of other machinery; then pay that person some reasonable compensation, and charge something for room and board and keep, and we will have a better chance to release from prison a person able to secure gainful employment. Added to that it will be a person whose self-esteem will at least have been improved to a level where there is a better chance of living a normal life.

[3] The Criminal Justice Construction Reform Act, S. 186.

There are exceptions, of course—the destructive arrogance of the psychopath with no concern for rights of other people may well be beyond reach of any programs that prisons or treatment can provide. Our prison programs must aim chiefly at the others.

There is nothing really new in this concept. In my native state of Minnesota and in your neighboring Kansas there are important beginnings. Special legislation authorized pilot programs involving contracts with private companies to fabricate machinery parts. In Minnesota on my first visit to the Stillwater Prison, guiding boys from a summer camp, more than 50 years ago, prisoners were producing parts of farm machinery for nearby factories. Minnesota's current pilot program involves only a fraction of the inmates however—as of the morning, 47 out of more than 2,000. The Kansas program is of about the same dimension.

On my first visit to Sweden's prisons 25 years ago, I watched inmates constructing fishing dories and other products. On my most recent visit, four years ago, I watched prisoners make components for prefabricated houses, under the supervision of skilled carpenters. Those components could be assembled at a building site by semi-skilled workers under trained supervision. In the People's Republic of China, 1,000 inmates in one prison I visited made up a complete factory unit, producing hosiery and what we would call casual or sport shoes. This was truly a factory with a fence around it.

But it is not necessary to have prisons be self-contained factories capable of producing complete finished products. In terms of production equipment and the probable skills of most prison inmates, it makes more sense and involves far less capital investment to have prisoners produce simple machine parts rather than completed products. This can be done under contracts with private industry, as the Minnesota Prison produced parts for farm machinery 50 years ago and today produces parts of computer units for Control Data Corporation. We need not try in one leap to copy the Scandinavian model of producing fishing dories and prefabricated houses.

Nor do we need to go to the extent of some of the Scandinavian models and pay the regular union scale of wages, with a deduction for "room, board and keep." We should however, consider paying some wages for the hours worked with bonuses based on quality and volume of production and deduct some reasonable amount for "room and board."

We do not need the help of behavioral scientists to understand that human beings who are producing useful goods for the market place—who are being productive—are more likely to develop the self-esteem essential to a normal, integrated personality. In place of the sense of hopelessness that is the common lot of prison inmates, this kind of program could provide training in skills and work habits that could make many prisoners better able to cope with life on their return to freedom.

In one prison in Europe—one for recidivist juveniles age 14–18 who had committed serious felonies involving violence—the wall at the entry had four statements in large, bold script with letters a foot high. Translated they read about like this:

You are here because you need help.
We are here to help you.
We cannot help you unless you cooperate.
If you don't cooperate we will make you cooperate.

Here this prison offered to the inmates a compassionate helping hand, coupled with an assurance of the kind of discipline that, if missed early in life in homes and schools that ignored moral values, produces maladjusted, incorrigible people. My references to this prison for juveniles may have inspired one witness who testified a few weeks ago before the committee considering Senator Dole's prison industries bill,[4] to disagree. He said either that prisoners could not or should not be "coerced" into taking training.

Depending on what that witness meant by "coerced" I might be able to agree. I would say every prisoner should be induced to cooperate by the same methods that are employed in many areas. Life is filled with rewards for cooperation and sanctions for non-cooperation. Prison sentences are shortened and privileges are given to prisoners who cooperate in prison programs. Rewards and punishments permeate the lives of all free people and they should not be denied to prison inmates.

Central to the American system is the idea that good performance is rewarded and poor performance is not. We can induce inmates to cooperate and I suggest that they should not be made to study more, or work more or longer hours than, for example, the cadets at West Point and the Air Force Academy or midshipmen at Annapolis. I can hardly believe that anyone would seriously suggest that prisoners incarcerated for crimes should be treated with less discipline than those young men and women—or, I might add, be subject to less demanding schedules than students in a law school today.

To maintain a prisoner in American prisons costs the taxpayers—in the form of a subsidy—from $10,000 to more than $25,000 per year without taking into account the large capital investment in the physical facilities. That load on taxpayers should be lightened if not taken off the backs of overburdened American taxpayers. We will help both the inmates and all of society if we make it feasible for them to help support themselves.

Creating prison industries, with incentives for good performance, would accomplish the dual objective of training inmates in gainful occupations and taking off the backs of the American taxpayers the enormous load of maintaining the prison systems of this country.

We are at a fork in the road or at a crossroad on what kind of prisons we are to have as we get ready for the tax collector to reach into our pockets for as much as ten more billion dollars for new prisons. We can continue to have largely human "warehouses" with little or no education and training or we can have prisons that are factories with fences around them. That is what I propose today. The experience of older societies provides examples we should follow.

This almost intractable problem of criminal justice has baffled the human race since the beginning of the recorded history of organized societies. It is plainly in our own interest to try to make every prisoner a better human being who can cope with life when the prison term is over. If we do that more intelligently, there is a good chance that we can, in the long run, take hundreds of millions of dollars of tax burden off the taxpayers and improve the chance that released prisoners will not renew their warfare with society.

There are no guarantees of success in dealing with prisons and prisoners but the course we have been following has not produced what we hoped. On the contrary the situation grows worse.

What I advance to you today is, that since we seem to be embarked on a massive prison construction program, we should try a new approach—convert our "warehouses" into factories with fences around them.

We have no where to go but up!

[4] S. 1597: introduced in the House as H.R. 4850, by Congressman Lujan of New Mexico.

THE 1982 RESOLUTIONS BY THE ASSOCIATION OF THE U.S. ARMY

Mr. THURMOND. Mr. President, I rise to share with the Senate my thoughts regarding the 1982 resolutions of the Association of the U.S. Army (AUSA). After much deliberation and study, the AUSA has adopted on October 21, 1981, 19 resolutions that should provide the administration and Congress the considered recommendations of this organization with regard to our national security posture.

In many respects, these resolutions and recommendations, coming from an organization such as AUSA, represent some of the best judgments available. This is so because the men and women that make up AUSA are dedicated and have demonstrated high levels of integrity and professionalism. They are also intimately familiar, not only with Army affairs and issues, but also with the business of defending the Nation as a whole.

The Association of the U.S. Army should be commended for its patriotism and for the high standards which are reflected in the 1982 resolutions. I commend them to the Senate and to the Nation.

In order to share these resolutions with my colleagues, I ask unanimous consent that they be printed in the RECORD at the conclusion of my remarks.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

1982 RESOLUTIONS—ASSOCIATION OF THE UNITED STATES ARMY

FUNDING THE ARMY

1. Provide a realistic Army budget:

The Administration has recognized the need for the Army to react globally, to be structured for simultaneous engagements, and to fight wars of indeterminate length. This has immense resource implications.

Recent budgetary decisions indicate a commitment to large sustained real growth for our Defense establishment, averaging 7 percent for the next six years, to redress the military imbalance with the Soviets. In these difficult and dangerous times, the nation must have the will to persevere. Our historic lack of constancy in carrying out defense programs generates increased fiscal costs, and presents friends and potential enemies a confusing, hesitant commitment to stand by our national interests.

We therefore resolve to urge:

A national commitment to constancy in defense programs.

The Administration and Congress to provide real growth in the Defense Budget of approximately 7 percent annually over the next six years, balancing that growth equitably between conventional forces and strategic forces.

MANNING THE ARMY

2. Strength of the total Army:

In the past, this Association has supported a minimum Total Army Force of 24 Divisions (16 Active and 8 National Guard). The Administration's expressed global strategy and the ever-expanding Soviet conventional warfare capability indicate clearly the need for a properly balanced, and fully supported 28 Division Force (18 Active and 10 National Guard).

This 28 Division structure requires an Active Army strength of 870,000, a paid Army National Guard of 461,000, a paid Army Reserve of 316,000, and a highly professional civilian work-force of 425,000. This force structure should be achieved no later than Fiscal Year 87.

The problems which have prevented us from fully manning and supporting the 24 Division force still persist and must be overcome before we can move to the 28 Division structure.

Specifically, we lack 50,000 in the Active Army, 100,000 in units of the Army National Guard and Army Reserve, and 250,000 in the Individual Ready Reserve. There are no assurances that these dangerous shortfalls will be reduced significantly within the next five years.

An equally serious problem is the shortfall of 65,000 in the civilian work force. Since 1974, repeated actions have reduced civilian end strength by 12 percent. A significant impact of this reduction has required the Army to divert up to 26,000 soldiers daily to perform essential functions for which insufficient numbers of civilians have been authorized. Recent Administration initiatives should begin to relieve this situation.

We therefore resolve:

To support vigorously a force structure of 18 Active Army Divisions and 10 Army National Guard Divisions, including support forces, to meet essential national security requirements no later than Fiscal Year 87.

That the 28 Division force be provided a minimum strength of 870,000 in the Active Army; 461,000 in the paid Army National Guard; 316,000 in the paid Army Reserve; and 425,000 Department of the Army civilians.

To support maintenance of an adequate strength in the Individual Ready Reserve.

3. DA civilian work force:

One of the most pressing problems in manning the Total Army Force has been the widening gap between work requirements and the constrained strength of its civilian employees. This situation has been caused by directed reductions, hiring limitations, pay caps for senior level civilian personnel, lack of pay comparability, and unrealistic entry level standards.

Mandatory civilian reductions have forced the Army to divert as many as 26,000 soldiers daily to perform essential functions for which insufficient numbers of civilians have been authorized. This diversion of military personnel has seriously impaired Army readiness. The Administration has recognized this problem and has included an increase of 21,800 civilians in the revised Fiscal Year 81 and Fiscal Year 82 budgets. This increase will replace some troop diversions, and begin to improve critical shortfalls in the training base and logistic support area. However, it is far short of the actual requirement.

The pay cap resulting from the Civil Service Reform Act of 1978 has caused a drastic increase in the early retirement of experienced senior Department of Army civilian executives. As an example, 15.5 percent of eligibles retired in March 1977 and 94.7 percent of eligibles retired in March 1981.

Actions need to be taken to eliminate the serious restrictions which prevent the Army from successfully competing for and retaining civilian personnel with vital technical and managerial skills.

Numerical constraints on high grade levels in the civilian work force are causing a high percentage of the Army's best managers to leave government service, and at the same time discouraging many highly qualified managers from joining government service.

Pay caps and lack of pay comparability with the private sector are creating severe problems in recruiting and retaining senior civilian executives, managers, and highly skilled personnel.

Entry level standards are affecting the ability of the government to attract qualified individuals in many of the technical career positions.

The Civil Service System must be flexible enough to recognize the national demands for talent and provide the means to compete for this talent.

We therefore resolve to urge Congress and the Administration to:

Authorize an increase in the Army's civilian work force to a strength of 425,000 by Fiscal Year 87.

Remove the high grade ceiling restrictions.

Remove the executive pay level restriction from the Civil Service Reform Act of 1978.

Ensure revision of civil service entry level standards to provide the flexibility to compete for needed talent.

4. Selective Service System:

The policy of military personnel acquisition through a voluntary enlistment program, backed by improved enlistment incentives, has recently been shown feasible at the present authorized force level for the Active Army. The current manpower authorizations for both Active Army and Reserve Components, however, are insufficient to fully man a 24 Division force. The Active Army strength of 780,000 projected in the Fiscal Year 82 budget is 50,000 short of the requirements to fully man a 16 Division active force. Coupled with planned strength increases in the other Services, this shortage is formidable.

Mobilization plans rely on the immediate use of Reserve Components and the Individual Ready Reserve (IRR). The absence of an operational draft and dependence on the all volunteer force concept have resulted in the additional problems of an inadequate IRR, and an understrength Army National Guard and Army Reserve. The IRR shortage approximating 250,000 personnel precludes fully manning understrength units and providing early casualty replacements. The shortage of some 100,000 personnel in Army Reserve and National Guard units prevents their fully effective utilization under mobilization conditions.

The recently implemented registration of eligible males is an essential precondition for activation of a functional Selective Service System intended to deliver an initial contingent of inductees within 15 days of mobilization, and 133,000 inductees by M +30. Reestablishment of the President's induction authority, with ultimate resumption of a functioning induction system, is considered a necessity if the present and projected personnel shortfalls are to be stemmed and the timely response capability of the Army is to be sustained.

We therefore resolve to urge:

Continuation of the Selective Service System registration process.

The Congress to institute enabling legislation to grant the President the authority to direct induction action.

The President to order induction of sufficient personnel to fill-out the IRR, as well as shortfalls in the Active Forces, as required.

Consideration of a program whereby all entry level service members for the Armed Forces are provided through the Selective Service System.

EQUIPPING THE ARMY

5. Industrial base:

Rapid response by the nation's industrial base in the event of mobilization is essential to assuring a flow of military materiel to the Armed Forces prior to total depletion of war reserve stocks. That portion of the base now in production for modernization items, however, is relatively small and incapable of significant increases in total output for a year or longer.

Recent Army exercises reveal that only a fraction of the current hardware items can be surged to the mobilization rate in under six months. The balance will require up to two years to meet sustained combat losses. Shortages in stockpiles of some critical materials already exist, and dependence upon overseas sources for many others renders them particularly vulnerable. Long lead times

for many critical components and fabricated materials hamper assembly and delivery of key hardware items.

Although DOD and the Army have taken initiatives to improve the industrial mobilization posture, significant and lasting improvement in preparedness is contingent upon a clear national policy emphasizing the need for an industrial base totally responsive to national security interests. Appropriated resources, clearly stated procurement authority, and top level leadership are key to continuing this improvement.

We therefore resolve to urge the Administration and Congress to fully endorse and support the initiatives already underway to improve the industrial base and to identify and correct those deficiencies which limit responsiveness.

6. Research, development and acquisition:

The Army is moving toward exciting and dramatic changes in the 1980's as the recent intensified research nad development programs and the force structure changes necessary to implement those programs come to fruition. The increased funding proposed by the Administration can be expected to move the Army toward regaining a qualitative edge over the Soviet Union.

Looking to the future, realistic and increased funding for the continued development of existing technology must be provided by the Congress. Simultaneously, research on advanced technologies must be aggressively pursued.

Many of the research projects, as well as development and production needs, have become more dependent on the use of critically scarce materials. While stockpiling these critical materials can provide a temporary solution, the foreign sources of many of these materials are not sympathetic to our government and their reliability as suppliers must be questioned in a national emergency. It is important to seek alternate sources, and conduct basic materials research in our own country intended to develop new technology and alternate materials that will reduce our dependence on foreign sources.

Timely delivery of the many new systems demands improved procedures for acquisition. Studies are in progress to accelerate the administrative and management techniques required.

The Congress must recognize the need for funding and emphasis on research, development and acquisition to avoid relegating the Army to another period of near obsolescence.

We therefore resolve to support:

Increased funding for research and development projects oriented to new technologies and alternate materials, and the resulting force structure studies necessary to maintain qualitative advantages.

Continued effort to improve the administrative, management and cost control procedures designed to accelerate the acquisition process.

7. Modernization:

While Army responsibilities are complex and worldwide, its size and weaponry have been constrained by inadequate funding. The Army's Reserve Components have been given unprecedented responsibilities but limited resources.

The Army has developed a family of weapons and supporting equipment which, if fielded in adequate numbers, would permit it to achieve at least qualitative parity with the Soviet Union. However, despite planned accelerated production rates and renewed recognition that conventional warfare confrontations are the most likely threat, the Army again finds itself cut back to only modest improvements and in fierce competition for defense dollars.

Unless the Active Army is permitted to completely outfit its current 16 divisions with new equipment on a reasonable time schedule it will continue to be outpaced by the ground forces of the Soviet Union. Further. unless the Army Reserve and Army National Guard are permitted to share in the availability of modern equipment, they will not be able to perform their missions. The Army Reserve, for example, has on hand only 33 percent—by dollar value—of its wartime required equipment. The Army National Guard has 69 percent of its required equipment. Much of the equipment for both the Army Reserve and Army National Guard is old and less technologically sophisticated.

We therefore resolve to urge:

A reassessment of the emphasis being placed on strategic weaponry at a time when conventional confrontations are far more likely to occur.

A production program to equip expeditiously the Active Army with the latest materiel while at the same time, providing for the procurement and/or refurbishment of adequate modern equipment for the Army Reserve and Army National Guard.

8. Chemical warfare capability:

The significant capability and apparent willingness of the Soviet Union to employ chemical agents dictates that the United States reassess its policies on chemical warfare, and achieve parity with the Soviets as soon as possible.

It is naive to assume that any potential enemy with a chemical warfare superiority capability would fail to employ that capability in the heat of battle. Soviet tactical doctrine dictates the use of nerve agents or other anti-personnel chemicals whenever they could make the difference between success or failure in an attack.

The ability of the United States to wage offensive chemical warfare has been seriously impaired by humanely inspired, but militarily unrealistic, policies. The defensive chemical warfare capability of the military is extremely limited.

A rapid chemical decontamination capability, such as that in use by Soviet units, is virtually unavailable to the United States Army. Furthermore, the inventory of individual protective equipment is insufficient to support the forces.

Effective training requires realistic training aids and facilities. Soldiers must learn to perform missions in a chemical environment to gain confidence in ability and equipment.

New binary weaponry will allow handling and stockpiling of chemical munitions with relative safety. Continued research and development in this technology should be accelerated, and production implemented at the earliest possible date.

We therefore resolve to support:

Research, development and acquisition of chemical munitions to achieve military parity with the Soviets in chemical warfare.

Acquisition of defensive equipment and the conduct of training necessary for military survival in a hostile chemical environment.

DEPLOYING THE ARMY

9. Strategic mobility:

To support U.S. foreign policy, the Armed Forces of the nation must be capable of rapid deployment to any area of the world. Each deployment demands the capability to sustain and reinforce the deployed force.

For five years this Association has urged the expansion of mobility and support capability necessary to provide adequate rapid deployment. The need to provide fully for this expansion continues to persist though modest steps are being taken to remedy the shortfall, to include prepositioning of equipment and supplies, and broadening host nation support.

The Air Force's part in the strategic mobility program needed by the Army involves completing the C–141 stretch and refueling capability programs, as well as the C–5A wing modifications and increases in utilization rates and spares which are underway. Acceleration of the modification of Civil Reserve Air Fleet cargo aircraft is essential, as is early full-scale initiation of the C–17 (C–X) Program.

Sealift is the most efficient means available to move and sustain large heavy forces overseas. There are approximately 50 Navy owned and Navy chartered sealift ships. In addition, the National Defense Reserve Fleet of 170 ships is in varying states of readiness, without designated crews. The relatively small U.S. Merchant fleet includes new ships which are very efficient for use between highly developed ports, but are of questionable value for supporting operations in undeveloped areas or through damaged or destroyed ports. The Navy has barely sufficient amphibious sealift to move one of the three active Marine divisions.

The Navy's effort in enhancing strategic deployability revolves around the vigorous pursuit of the SL–7 modification program so that these fast ships can also carry roll-on/roll-off cargo. The Navy also needs additional such ships along with an increase in research and development on surface effects ships which can significantly reduce sailing times, all of which the Navy has been reluctant to fund.

Railroads are the most energy-efficient mode of transportation to move personnel, equipment and supplies overland to air and sea ports of embarkation. Unfortunately, the number of operating rail lines in the U.S. is shrinking and much of the system is poorly maintained. Rolling stock of the right kinds may not be available in sufficient quantity.

We therefore resolve to reiterate our deep concerns about the inability of our strategic mobility resources to deploy and sustain our combat forces to any area of the world.

We further resolve to urge the Administration and Congress to support:

Modifying of the Air Force C–5A fleet, the upgrading of the C–141 fleet, and moving rapidly toward a new generation of airlift aircraft capable of transporting the outsized cargoes of the mid-1980's.

Adding more wide-bodied military cargo capable aircraft to the Civil Reserve Air Fleet.

Expanding Navy sealift capability to deploy the Rapid Deployment Force.

Expanding the U.S. Merchant fleet with sufficient roll-on/roll-off and self-contained cargo handling capacity.

Improving the condition of our domestic rail systems including both rail lines and rolling stock.

10. Forward deployment:

It is essential that U.S. armed forces deployed throughout the world be prepared to perform their missions and be provided with necessary support.

In the European area, Warsaw Pact forces possess significant numerical advantage over NATO forces. Weaknesses which affect the ability of NATO forces to defend Western Europe include:

Insufficient progress in achieving the goals of supply commonality and equipment interoperability among the multi-national forces.

Inability of some military communications networks to intermesh, compounded by language differences and a highly sophisticated Warsaw Pact electronic jamming capability.

Inadequacy of ammunition and war reserve stocks needed to sustain NATO forces over an extended period of time.

Distance from the German home stations of U.S. Forces to assigned defense sectors.

Insufficient transportation to move U.S. reinforcements, replacements and supplies into and within the theater of operations with sufficient speed after the onset of hostilities.

The slow rate at which NATO countries are modernizing.

The inadequate air/missile defense in view of the growing Soviet air and missile threat.

In the Pacific area, it is crucial that U.S. Army Forces in Korea be maintained at a

high level of readiness. Reinforcements must be capable of rapid deployment to assist threatened U.S. Forces or friendly nations.

It is vital to the Army that the Navy be able to perform its mission to protect the essential sea lines of communication.

We therefore resolve that the Administration and Congress support:

NATO efforts to improve commonality, interoperability and communications, and to increase ammunition and war reserve stocks.

Increased U.S./NATO modernization efforts, and efforts to restation NATO forces close to general defense sectors and to improve NATO air defense forces.

Maintenance of Army forces overseas at a high level of readiness, including the needed provisions for resupply and reinforcement.

Greater emphasis on the Navy's role in protecting vital sea lines of communication.

CARING FOR SOLDIERS AND THEIR FAMILIES

11. Bill of Rights for those who serve:

The life of a service member is recognized to be one of sacrifice, dedication, honor and devotion to duty. The enactment of a "Bill of Rights" for service members is deemed essential because different Administrations have been inconsistent concerning service members' benefits and rights. It should include:

A formal acknowledgement of the federal government's responsibility to adequately pay, house, feed, transport and provide medical and dental health care to active duty service personnel and their family members.

A pay and allowance system which recognizes the special nature of military service to include:

Basic pay to compete with other employment systems; that equitably rewards progressive advancement in the military system.

Housing or a quarters allowance for all single service personnel, and family housing or quarters allowance for all personnel with dependents. The basic allowance for quarters should be set on a standard of total housing costs, varied by grade and locale.

A tamper proof system to adjust pay/allowance for all personnel authorized to mess separately.

Cost-Of-Living Allowances for both married and single soldiers to offset exceptionally severe living expenses in high cost locales, worldwide.

A tamper proof system to adjust pay/allowances annually.

A fully funded G.I. Bill Education Program.

Recognition by the Administration and Congress of their responsibilities for a fully funded quality education of dependent children.

Complete commissary and exchange systems, with continued current levels of appropriated fund support.

An expense reimbursement system which compensates all personnel for expenses of official travel, to include family separation allowances, dependent travel, and shipment of household goods for all personnel with families.

Appropriated fund support of essential military recreation programs.

A full range of medical and dental care provided by military health care facilities, or through CHAMPUS, for active duty service personnel, retirees, and their family members.

A retirement system which provides for retired pay levels modeled on the previously proposed Retirement Modernization Act, which places a premium on longer service, while retaining 20-year separation at lower rates; providing equity in the form of separation pay for enlisted and officer personnel involuntarily separated without prejudice prior to reaching retirement eligibility; and not integrated with the Social Security program. A description of the basis for adjustments to the level of retired pay and survivor's benefits in order to maintain purchasing power, based on the full Consumer Price Index should be included. When changes are necessary, they should provide protection for those already serving, including a save-pay clause, as appropriate. An equitable Survivor Benefit Plan with Social Security offset reduced to 50 percent of the benefit attributable to military service; the offset to be eliminated when the beneficiary is entitled to equal, or greater benefits due to his or her own employment. Free and equal access to the entire job market for which retirees are qualified upon honorable separation from service should be available without forfeiture of earned benefits.

A commitment to ensure the well-being of family members of deceased active duty service members and retirees.

Provisions that no single element of the military compensations system should be studied or modified outside the context of the entire system.

We therefore resolve to reiterate our strong conviction that the Congress, which is charged with raising and maintaining the Armed Forces of the United States, support by appropriate legislation the described elements for a "Bill of Rights for Those Who Serve".

12. Quality of life:

The Army's Quality of Life Program for the soldier and his family continues to be of prime importance. Military duty places great strain on family ties and cohesiveness.

Army Child Support Services Program and child care centers are needed for military families. Many of the physical facilities at child care centers are in deplorable condition and do not meet minimal fire, health, and safety standards. Professional staffs are needed to provide child care at the lowest possible rates.

A major disincentive to overseas service is the separation of family members for schooling, with the inherent financial burden. The lack of government funded, space-required travel for full-time student dependents of military personnel assigned overseas adversely affects the desirability of overseas assignments. Authorizing one round trip per year space-required government air transportation for full-time students would significantly reduce the financial burden and strengthen family ties.

An additional concern relating to the quality of life overseas is the lack of recreational facilities. Present facilities are considered inadequate for the number of personnel which they serve. This, coupled with inadequate school facilities and poor living and working conditions, has seriously impacted on morale and retention.

We therefore resolve to urge the Administration and Congress to provide:

Safe, well-staffed child care centers at reasonable rates.

Space-required travel for one round trip per year for dependent full-time students of military personnel assigned overseas.

Funds necessary to upgrade or build overseas recreational facilities commensurate with those found in CONUS installations.

Support for actions which will enhance the cohesiveness and stability of military family life.

13. School impact aid:

The Bill of Rights for Those Who Serve, recommended by this Association in 1978, requires recognition by the Administration and Congress of their responsibilities to assure quality primary and secondary education of dependent children.

School Districts impacted by the presence of federal employees and military personnel are facing serious financial constraints because of recent Administration attempts to reduce the level of federal aid. Several school boards located near military installations in CONUS have billed parents of students living on-post for tuition or threatened school closings; thereby causing serious morale problems.

We therefore resolve to:

Strongly oppose termination of impact aid to school districts for students who live on federal property (no real estate tax base) or where the district operates schools on federal property solely for the benefit of children of military personnel or federal employees.

Oppose any local measure that will require military families to pay tuition to have their children attend public schools in the locality where they are assigned.

14. Military health care:

A fundamental obligation to soldiers and their families is to provide adequate health care. Improved pay and the Army Graduate Medical Education Program will help recruiting and retaining military doctors and will improve health care, but further improvements are needed.

If the Army Graduate Medical Education Program is allowed to proceed at the planned high level, the number of active duty physicians should meet the minimum peacetime requirement of 5,456 by end Fiscal Year 87. However, a shortage of nearly 47 percent (over 2,000) in the availability of Reserve doctors will prove critical upon mobilization.

Deficiencies created by the shortage of professional military medical personnel, compounded by the change from a basically bachelor Army to an Army with family members, highlight changes which must be made in the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) program:

Reduce out-of-pocket expenses incurred in cases of catastrophic illness.

Expand CHAMPUS to include dental care.

Eliminate the annual deductible for outpatient care.

Continue CHAMPUS for beneficiaries attaining eligibility for Medicare.

We therefore resolve to continue our support for a comprehensive health care program to include:

Required Reserve service for all newly qualified doctors as payback for Federal support of medical education programs.

Retention of all Army Medical Centers as teaching hospitals.

Retention of the Army Surgeon General's program of attracting doctors through graduate medical education incentives.

Improvement in the Armed Forces Health Professions Scholarships Program to exempt the total value of the scholarship from Federal income tax for both present and future participants.

Increased hospital families and equipment modernization funding.

Legislation to upgrade CHAMPUS benefits to:

Limit individual expenses incurred in cases of catastrophic illness.

Provide dental care.

Eliminate the annual deductible for outpatient care.

Continue coverage for beneficiaries attaining eligibility for Medicare.

Include physical exams/immunizations for routine, annual, employment related, and educational system requirements.

15. Military compensation:

The Administration and the Congress in the Uniformed Services Pay and Benefits Act of 1981 have recognized the adverse effects of inflation, past pay caps, and pay adjustment reallocations on the retention of career military personnel. As long urged by this Association, comparability of pay has been reestablished and a beginning made to provide, within the pay tables, incentives for promotion and retention.

A review of the overall adequacy of military compensation is needed to:

Make military pay competitive with the civilian sector with emphasis on critical skills, jobs performance and level of responsibility.

Create a flexible system of special and incentive pays, including bonuses for overseas tour extensions in imbalanced MOS's, to meet changing manpower needs.

Compensate service members fully for the cost of permanent changes of station.

Equitable tax treatment of U.S. government personnel, including service members, as compared with individuals in the civilian sector, would assist in overcoming the financial burdens which result from successive overseas assignments. Service members and DoD civilian employees in an overseas assignment who earn less than $10,000 per year, and who would be otherwise eligible, are excluded from the Earned Income Tax Credit provided similarly qualified taxpayers residing in the United States. Non-government U.S. civilians working overseas are provided significant tax benefits to encourage continuation of their overseas business enterprises. Similar individual income tax benefits for U.S. government personnel, military and civilian, would provide an incentive for voluntary overseas assignments and reduce turbulence by encouraging extensions of overseas tours.

We therefore resolve to urge the Administration and the Congress to:

Maintain military pay comparability.

Review the adequacy of military compensation to include consideration of skill requirements, responsibility, flexible special/incentive pays and reimbursement for costs incident to official travel.

Amend section 43(c)(1)(B) of the Internal Revenue Code of 1954 to permit service members and DoD employees serving overseas to qualify for the Earned Income Tax Credit.

Provide similar individual income tax treatment for U.S. military and government employees serving overseas as authorized other U.S. citizens employed overseas.

16. Educational incentives:

Educational opportunities within the Army are perceived by the soldier as an important aspect of military service. Recent tests have shown that educational incentives increase the number of quality high school graduates who enlist in the Army.

On 31 December 1976, the G.I. Bill was terminated and was replaced by a less attractive contributory program, the Veterans Educational Assistance Program (VEAP). Following testing, the Army has established ULTRA VEAP which adds $8,000 to $12,000 bonus to the basic VEAP program. This has increased enlistments but is limited to quality high school graduates entering critical skills.

Since 1979, this Association has urged that a total educational incentive package be developed to aid in recruiting quality enlisted personnel and retaining mid-career soldiers. This new education package cannot compete with existing federally funded loan and grant programs having assets in excess of nine billion dollars. Therefore, funding for this package should come from these federally funded programs where no service obligation is incurred.

The new educational incentives should include as a minimum the following key features:

Non-contributory educational benefits to be made available to all military personnel as a reward for honorable service.

In-service use to be authorized after one year of service.

Basic benefit earned on a basis of one month of education for one month of active service or four months of reserve service, up to a maximum entitlement of 36 months.

Benefits to consist of monthly stipend of $400 with an automatic cost-of-living adjustment.

Secretaries of the Military Departments be granted authority to add additional incentives for recruiting and retention purposes for critical specialties and hard to fill assignments.

Benefit allowance increased to monthly stipend of $600 for six (6) or more years of active service after date of enactment.

Transfer of earned entitlement to dependent children after ten years of active service.

Basic entitlement for Reserve and National Guard members at half the Active Army rate.

Termination date to be 10 years from the date the service member is finally separated from the service.

In view of the quality constraints imposed by Congress, the Fiscal Year 83 recruitment goals cannot be met without these educational incentives.

We therefore resolve to call upon Congress to immediately enact legislation for a non-contributory G.I. Bill benefit package for current and future members of the Total Army Force.

We further resolve that the termination date of the Vietnam era G.I. Bill be extended to 10 years after individual's separation from the service.

17. Reserve component incentives:

Reserve Component forces are essential to the Army's peacetime mission of deterrence and to reinforce and sustain the force should deterrence fail. To achieve the required high state of readiness for Reserve Component forces, Congress and the Department of Defense must resolve serious understrengths and skill shortages which exist within the Reserve Component units and the individual Ready Reserve (IRR). To attract high quality first-term enlistees and to retain qualified Reserve Component personnel, incentives and benefits must be increased.

We therefore resolve to:

Continue to support bonuses for enlistment and reenlistment in critical military occupational specialities.

Support inclusion of IRR members in the Servicemen's Group Life Insurance Program on an optional basis.

Support recognition of voluntary efforts by members of the Reserve Components by increasing the annual ceiling on inactive duty retirement points from 60 to 75.

Support granting commissary pivileges to active Reserve Component personnel on a one time per month basis.

Aggressively encourage continued employer support for Reserve Component participation.

Support educational benefits for Reserve Component personnel, contingent on continued satisfactory service.

Encourage actuarially reduced retirement benefits for members at age 55.

Support granting full retired benefits and rights (minus pay entitlements) to Reserve Components Personnel, who have earned their 20-year retirement certification letters but who have not reached age 60, and to their family members.

18. Retired pay and benefits:

As a budget balancing measure, the 97th Congress reduced the frequency of Federal retiree cost-of-living adjustments (COLA) from semi-annual to an annual basis. The lost pay has been accepted by the majority of retirees as their individual contribution to national belt-tightening.

Additional proposals to reduce the total dollar amount in the military retired pay program have surfaced in both the Office of Management and Budget and the Congress. These include an additional delay, beyond 1 March 1982 now mandated by Public Law 97-35, for the 1982 pay adjustment; various suggestions on limiting the amount and method of computing the annual adjustment, and changes in the basis for computing military retirement pay from a member's final pay to his/her high three years without a grandfather clause for individuals in service prior to 6 September 1980. Current and future retirees view such proposals as a breach of contract following so rapidly the elimination of 1 percent add-on to the COLA—designed to maintain purchasing power by compensating for adjustment delay—and the deletion of the replacement semi-annual adjustment. The uncertainty of retiree pay and benefits discourages military careerists.

The Department of Defense recently obtained passage of a bill in Congress that increases the Servicemen's Group Life Insurance (SGLI) for active duty personnel to $35,000. However, there is no provision to permit personnel within a five year period after separation, the option to increase their Veterans Group Life Insurance (VGLI).

In the wake of the Supreme Court ruling that retired military pay could not be considered community property, there have been several legislative proposals introduced into the 97th Congress which would entitle an ex-spouse to a specified portion—dependent on duration of marriage during active service—of a military retiree's retired pay, generally without regard to the circumstances of the divorce. This Association believes the federal government should not determine what portion, if any, of a retired service member's income should be granted to the former spouse. This determination is properly the role of the civil court system of the various states.

We therefore resolve to:

Oppose further delay in complying with Public Law 97-35 regarding the annual adjustment of federal military and civilian retired pay.

Oppose change in the method of computing the annual cost-of-living adjustment.

Oppose proposals which would change the basis of computation of retired pay for currently serving military personnel without a grandfather clause or save-pay provision.

Seek authorization to increase the maximum amounts of Veterans Group Life Insurance within five years after separation.

Urge the Congress to defeat attempts to legislate federal entitlements to ex-spouses of retired service personnel.

19. Housing:

The Army recognizes that all personnel should be accommodated in adequate housing. Unfortunately, housing for soldiers and their families is often inadequate in quantity and quality. Although progress has been made in improving allowances to those unable to occupy government quarters, there is a definite lack of progress in constructing, maintaining, and upgrading housing assets.

Specifically:

The worldwide deferred maintenance backlog for family housing repairs and maintenance was $523 million at the end of Fiscal Year 81; of which $366 million was in Europe. The Fiscal Year 1982 budget request will include $60 million for deferred maintenance, most of which will be allocated to Europe. The expected backlog remaining at the end of Fiscal Year 82 will still be more than $300 million in Europe alone.

Approximately 38% of the eligible USAREUR soldiers with families do not live in government-controlled housing units. USAREUR has identified a need for additional leases in Fiscal Year 82 and in excess of 3000 in Fiscal Year 83.

Seventy-five percent of enlisted and officer bachelor housing is over 25 years old, and 30 to 40 percent of the quarters located overseas are substandard.

We therefore resolve to urge the Administration and Congress to provide:

Funding for adequate housing worldwide and maintenance and repair of all related facilities for our soldiers.

Additional lease authority and housing and community facilities construction in USAREUR.

ERISA

Mr. HAYAKAWA. Mr. President, in 1974 the Federal Employment Retirement Income Security Act (ERISA) became law. The purpose of the legislation was to establish mandatory rules and regulations regarding pension plan coverage and eligibility. Two of its provisions included vesting, to insure that an employee receives the benefits promised for specific service, and creation of the Pension Benefit Guaranty Corporation (PBGC) which guarantees basic pension benefits in covered private plans if they terminate with insufficient assets. The Corporation administers two benefit insurance programs: Single employer and multiemployer insurance plans.

However, ERISA made it more difficult to terminate an ailing pension plan by requiring employers to pay up to 30 percent of their net worth and permitting PBGC to pay the balance of the guarantee. Even though many people thought there was little chance of multiemployer plans terminating, PBGC paid out over $20 million in unfunded benefit obligations from 1974 to 1978 as the result of the termination of a few plans. Unfortunately, PBGC's receipts for the period totaled only $4 million.

In an effort to correct the problem, in 1980 Congress enacted the Multiemployer Pension Plan Amendments Act of 1980 requiring an employer who wholly or partially withdraws from a pension plan—for example, sells his business or moves facilities from the jurisdiction of one pension plan to another—to pay his pro rata share of unfunded vested liability to the plan. This payment, known as withdrawal liability, is not limited. In fact, it may exceed the company's net worth.

An excellent article outlining the financial burdens that the Multi-Employer Pension Plan Amendments Act of 1980 has placed on contractors in southern California appeared in the November 1981 newsletter of the southern California chapter of the Associated Builders & Contractors (ABC). Its author is Michael E. Merrill, an ABC chapter attorney and a partner in the law firm of Merrill, Schultz & Hersh of Newport Beach. While Mr. Merrill's figures apply only to southern California, the impact is being felt by businesses everywhere in the United States, and I believe his message is important enough to bring to the attention of my colleagues. I shall therefore request that Mr. Merrill's article be reprinted in full in the RECORD.

I am pleased to mention that Senator HATCH, my distinguished colleague from Utah, has introduced legislation (S. 1748) to amend the Multi-Employer Pension Plan Amendments Act of 1980 and the Employee Retirement Income Security Act of 1974. This bill will remove employers who have only negotiated contribution levels in their collective bargaining agreements prior to April 29, 1980, from the withdrawal and plan termination insurance provisions of title IV of ERISA. This will be accomplished by redefining such plans as fixed contribution multiemployer plans.

I have added my name to the list of cosponsors of this important legislation and I urge all my colleagues who have not done so to give the matter their serious consideration.

Mr. President, I ask unanimous consent to have printed in the RECORD the article to which I have made reference.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ARMAGEDDON FOR THE CONSTRUCTION INDUSTRY

(By Michael S. Merrill)

In the March 1981 IMPACT ("Contractors Harpooned by ERISA Amendments"), contractors were alerted to the dramatic impact of the Multiemployer Pension Plan Amendments Act of 1980, which amended the Employee Retirement Income Security Act (ERISA), and created the prospect of debilitating and unforeseen financial liability for signatory contractors who withdrew from multiemployer pension plans as a result of bargaining their way to open shop status.

Prior to the 1980 ERISA amendments, an employer was free to withdraw from a pension plan without incurring any continuing obligation to contribute to the pension plan unless the plan went bankrupt within five (5) years. The new ERISA amendments, however, obligate all employers upon cessation of participation in a multiemployer pension plan to continue to make contributions to the plan to cover their so-called "share" of the plan's unfunded vested liability. Such unfunded vested liability is the product of increased benefit levels mandated by trustees without providing for a corresponding increase in fringe benefit contribution revenues sufficient to satisfy vested pension benefits for plan beneficiaries. This is obviously deficit spending at its worst, which participating employers have had no hand in creating or controlling.

The legislative history of the 1980 ERISA amendments plainly reveals that the withdrawal liability provisions were the work of the construction trades designed to stem the flourishing Merit Shop movement. The chief lobbyist of the ERISA amendments was the National Coordinating Committee for Multi-Employer Plans, chaired by Robert Georgine, president of the AFL–CIO Biulding Trade Department.

Locally, the Laborers, Operating Engineers, Painters and Carpenters Pension Trust Funds have recently commenced distributing withdrawal liability notices to contractors throughout Southern California calling for immediate payment of millions of dollars of alleged withdrawal liability from contractors who terminated their collective bargaining agreements and thereby withdrew from multiemployer pension plans prior to the passage of the Multiemployer Pension Plan Amendments Act of 1980 by Congress in September of 1980, but subsequent to the retroactive April 29, 1980, effective date of the ERISA amendments. All employers who terminated their collective bargaining agreements last summer are subject to withdrawal liability demands from the various pension trust funds and can expect to receive their withdrawal notices from the various pension funds.

Thus far, the Southern California Carpenters Pension Fund has distributed 42 withdrawal liability notices totaling $8.5 million. These liability demands ask of the contractor, in many cases, amounts greater than the actual net worth of the business itself. In many other cases, exiting contractors are finding themselves in a situation where they are being required to assume withdrawal liability payments far in excess of the actual amount of pension contributions they made on behalf of their workforce. Not only does this spell financial disaster for our new Merit Shop brethren, but the enormous amounts of withdrawal liability sought to be collected by pension trust funds pose a debilitating obstacle in the path of the accelerating Merit Shop movement.

Additionally, while the ERISA amendments are designed to bolster pension plans' revenues, many plan administrators are already complaining that the amendments are wreaking havoc with the financial stability of their pension funds by discouraging new employers from executing labor agreements.

Contractors who are faced with unfathomable liability demands must act now in order to avoid default and thereby jeopardize their businesses. Avenues are available whereby exiting contractors can contest the withdrawal liability assessments by the pension plan. Moreover, many exiting contractors across the nation have instituted actions in Federal district courts contesting the constitutional validity of the ERISA withdrawal liability amendments, and have met with surprising success in obtaining temporary restraining order against enforcement of the withdrawal liability provision of ERISA by the Pension Benefit Guaranty Corporation and pension trust funds.

For Merit Shop contractors, the experience of those who are faced with debilitating withdrawal liability payments as a result of their terminated union affiliation should serve to make them even more wary of signing a union contract and of the consequences of doing so, notwithstanding the assurance of business agents that their union's pension plan is financially sound and that they are only obligated to tender fringe benefit contributions as specified in the collective bargaining agreement; i.e., no unfunded liability.

The horror stories that are heard about contractors who have severed their collective bargaining relationship with unions should make contractors contemplating union affiliation think twice about affixing their signature to a union contract. As bad as the situation is now, it appears that things are only going to deteriorate dramatically. The Pension Fund Guaranty Corporation, the Federal agency charged with administering ERISA, recently estimated that the total unfunded vested liability of the 2,000 multiemployer pension plans subject to ERISA will approach $70 billion by 1986.

The Laborers Pension Fund for Southern California is a striking example. It reported an increase in unfunded vested liability of some $45 million in one year alone, and the total unfunded vested liability of the Laborers Pension Fund for Southern California now amounts to more than $514 million. Such an increase in unfunded vested liability translates directly into increased withdrawal liability for signatory contractors who defer abandoning what appears to be a rapidly sinking ship about to be further ravaged by the exacerbating effects of inflation, dwindling membership, an exodus of signatory contractors, restrictive investment regulation, higher administrative costs, constantly proliferating benefits to pension beneficiaries, diminishing pension benefit revenue, and an aging workforce fast approaching retirement.

The longer signatory contractors wait, the greater their potential withdrawal liability by virtue of the escalating unfunded vested liability of the various pension plans and the reduced number of signatory contractors remaining after the exodus of signatory contractors. As more and more signatory contractors leave the union fold, the pension funds' unfunded vested liability can only increase as a consequence of greatly diminished contribution revenue. Additionally, a

reduction in the number of signatory contractors participating in multiemployer pension plans will result in their being forced to subsidize lost contribution revenues in addition to absorbing the pension plans' escalating unfunded vested liability.

The economic survival of many contractors is threatened by the impact of the withdrawal liability provisions of ERISA. No single piece of Federal legislation has represented such an enormous peril to the financial security of the construction industry. At a time when the country is calling for economic efficiency, individual productivity, and reduced governmental interference in business affairs, the ERISA amendments represent a dramatic return to the days of Federally-sponsored socialism. The serious problems as posed by the ERISA amendments represent yet another major entry on the long list of reasons for the enormous growth and strength of the Merit Shop movement.

COMMUNICATION

Mr. HAYAKAWA. Mr. President, communication is an important ingredient in any society whose government successfully represents the citizenry. Unfortunately, State and local governments in the United States have acted to hinder this important citizen-government communication process in two ways.

First, the language of government itself—what we call bureaucratese—has widened the gap between the average citizen and his government. It seems as though we have come to believe that a law or document is not really official unless it is capable of confusing the typical citizen.

Second, the National Government has allowed the growth of bilingual policies that send confusing signals to Americans. While naturalization and education requirements mandate proficiency in the English language, we have created bilingual election policies that seem to tell our people that knowledge of English is really not a requisite to full participation in American society.

Those of us in positions of power should work to break down—not build up—the barriers of confusion that impair positive citizen-government dialog.

Mr. President, I recently read an interesting column by Charles McCabe of the San Francisco Chronicle. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the column was ordered to be printed in the RECORD, as follows:

December 1, 1981.

HIMSELF

(By Charles McCabe)

POLYLINGUAL?

Marin Architect Francisco Centurion just shook his head. He was shaking his head "in disbelief regarding what these bureaucrats in Sacto, are doing."

He adds, "I say this as an immigrant myself. If someone is coming to this country, why can't they learn English? I did.

He was looking at a piece of paper which said that if he had any complaints about discrimination he should forthwith file with the Civil Rights Officer, Department of Rehabilitation. What particularly caught the architect's eye was the following declaration:

"This publication can be made available in Braille, large print, and tape cassette, English, Spanish, Japanese, Tagalog, Korean, Chinese (Mandarin and Cantonese), and Vietnamese. Requests should be made to Department of Rehabilitation, Mobility and Communications Barriers."

This is really carrying language in politics to the point of absurdity. It makes the notorious San Francisco voting forms, which include at least three languages look sensible by comparison.

Has the word not gone out that this is a free country, and that if you have any complaints about anything, all you have to do is go down to city hall and voice your beef? Someone who probably speaks your language will do whatever he or she can to help you.

And what does all this literature mean to those large numbers of immigrants who are illiterate in their own language? Wouldn't it be cheaper in the long run to have Vietnamese advisers for listening to complaints and putting in motion the process of righting them? Such a plan would impoverish the state much less than those huge printing bills which come from putting out large texts (and some of them are large indeed).

Who is this Department of Rehabilitation? Let them define themselves in good bureaucratic English: "The Department of Rehabilitation, as a recipient of federal and state funds, is covered by Section 504 of the Rehabilitation Act of 1973, Title VI and VII of the Civil Rights Act of 1964, California Administrative Code Title 22, CGC Section 11135 Et. Seq., other federal and state laws, and Executive Orders which prohibit discrimination.

"Client services, as well as employment practices and benefits, of the Department of Rehabilitation are provided to qualified persons without regard to ethnic group identification, race, color, national origin, religion, sex, creed, age, sexual orientation, physcal or mental disability, medical condition, marital status or ancestry."

These are all admirable aims. But why all this literature, why this plethora of language? Cannot the word be put out to a Cuban or Chinese or whatever: "If you have been fired, or can't get hired, and you believe the reason is that you weren't born in this country, let us know and we'll try to help.

Of course the better course would be to insist on a knowledge of English as a condition of employment (and there are some places in the country where this is near enactment, notably in Texas along the Mexican border). But in California we are a distance from that, and it probably would be unconstitutional anyhow.

But the idea of printing in Mandarin what is already enacted into law in English gives me a headache merely to contemplate. If bilingualism in schools is bad, and I believe it is, how about this comedy of "Communication Barriers."

CONCLUSION OF MORNING BUSINESS

Mr. STEVENS. Mr. President, I ask unanimous consent that time for morning business be terminated.

The PRESIDING OFFICER. Without objection, it is so ordered.

DELAY OF EFFECTIVE DATE OF CERTAIN TAX PROVISIONS

Mr. STEVENS. Mr. President, the Senator from Kansas has a matter to call up. May I inquire what that is?

Mr. DOLE. Mr. President, H.R. 4717.

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate proceed to consider the bill just referred to by the Senator from Kansas.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The clerk will state the bill.

The assistant legislative clerk read as follows:

A bill (H.R. 4717) to delay for one year the effective date of certain provisions recognizing gain on certain dispositions of LIFO inventories, to make adjustments in the net operating loss carryback and carryforward rules for the Federal National Mortgage Association, and to require information returns with respect to safe harbor leases.

The PRESIDING OFFICER. Without objection, the bill will be considered as having been read twice and the Senate will proceed to its immediate consideration.

The Senator from Kansas is recognized.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

Mr. PROXMIRE. Mr. President, if the Senator will yield, I have great respect and admiration for the chairman of the Committee on Finance. but I am troubled about the pattern, although I think this is better than it has been in last years, where we bring up tax bills on the very last day of the session. We do not have reports on them, at least formal committee reports. I wonder why it is necessary that this bill or the contents of this bill be passed on the last day of the session. Is there any urgency to these measures? Would it make any difference if they were postponed for a month?

Mr. DOLE. Mr. President, there are some where the provision expires at the end of the year.

Let me say, not in a defensive way, that the fact that the Finance Committee acts in advance of having any House bill to look at is because the House Ways and Means Committee did not act until about a week ago. We held a meeting last Thursday to go over all the House provisions that had not yet passed the House, plus provisions—in fact, the Senator from Kansas put a notice in the CONGRESSIONAL RECORD about a month ago that we would consider noncontroversial items—those where hearings had been held, there was no real revenue loss, no opposition from Treasury, and approval by the joint committee staff and the Finance Committee staff. Those are the only amendments that we reported out to the Senate, plus we rejected a couple in the bill passed by the House.

There may be one or two exceptions, but we believe that for the most part, there is no real revenue loss. It is not a Christmas tree, if that is what the Senator was wondering.

Mr. PROXMIRE. Mr. President, I commend the Senator on all those things, except the one fundamental procedural safeguard we have is that we know what we are doing. If we have a report from the committee, in which we know what the bill does, we know whether there is any controversy on the bill, we know who the beneficiary is. If the Treasury may support it, we want to know why. That is the kind of material that we do not seem to have.

Mr. DOLE. Mr. President, we tried to make available as quickly as we could the committee documents available to the staff. I understand that they do have a copy of the report which has not yet been printed. I know that is not much advance notice. That is why we did not include

any matter that we felt was controversial.

In addition, I understand that a member of the Senator's staff has gone over each of the amendments with a member of the committee staff. Certainly, we are here now for the purpose, if further explanation is needed, to have it furnished by the Senator from Kansas, the Senator from Louisiana or the sponsor of the amendment. Before we act on any amendment, I certainly want the Senator from Wisconsin to be fully satisfied.

Mr. PROXMIRE. Mr. President, we are not asking about the amendments, but the bill itself, as I understand it, has three provisions; is that correct?

Mr. DOLE. The bill itself had three provisions. It now has two provisions.

Mr. PROXMIRE. May I ask the Senator, then, in connection with those particular provisions in the bill, is there urgency involved in this matter? Would it make any difference if we put this over for a month in any of those particular cases?

Mr. DOLE. It would make a great deal of difference, I understand, as far as the LIFO recapture is concerned. Also, we are told by certain people that it would make a difference as far as FNMA is concerned.

On some of the other amendments—I would have to go down and double check them—some of the amendments that will be added to that proposal also have expiration dates.

Mr. PROXMIRE. What is the total amount of revenue loss, if there is any at all, in the bill that is before us?

Mr. DOLE. In the total package?

Mr. PROXMIRE. That is right. I am not talking about the amendments to be offered. I shall go over those individually.

Mr. DOLE. The FNMA provision would involve a loss of about $14 million in fiscal year 1982.

I might add that the loss originally was projected to be over $400 million. The House Ways and Means Committee offered an amendment which was adopted and which we kept. The LIFO recapture in 1982 is about $15 million and in 1983, about $260 million.

Mr. LONG. Mr. President, if the Senator from Kansas will yield, I believe it is important to point out that some of these provisions—for example, there is a provision that has to do with the withholding of income tax for fishermen that expires at the end of this year. If we wait until next year to act, that will be regarded as retroactive legislation.

The Senator, I am sure, well knows that when we act in 1981 with regard to 1981 taxes, we have never regarded that as retroactive legislation. But if we wait until 1982 to act on 1981 tax liabilities that is regarded as retroactive tax legislation. That being the case, if we are going to do it, we ought to do it this year.

I urge the Senator to take a careful look at these particular amendments, because I know with regard to almost everything here, it was discussed with the full membership there. I think there were 14 Senators present. Those who had not attended the hearings carefully inquired into the matter. We had a very full committee room, representing all the media as well as all the others. There is so little controversy, Senator, that I believe the Wall Street Journal wrote an article about it and it did not even rate enough interest to make the front page. I think that was somewhere back in the middle of the Wall Street Journal.

So that there is no real controversy in it. If it is meritorious legislation and has no basis of controversy, I think it would be wrong to wait until next year, which would force us to act retroactively, when the bill should be passed while it is still regarded as current legislation in the taxable year.

Mr. PROXMIRE. As I understand it, then, the big revenue loss is in the LIFO inventory recapture.

Can the Senator generalize at all and tell me who would benefit from that—last in, first out? Is there any particular industry?

Mr. DOLE. The extension postponement is supported by all the small business groups in the country, from what I understand. So they benefit from it.

Mr. PROXMIRE. Is there a particular taxpayer who would benefit?

Mr. DOLE. No. This amendment affects a broad class of taxpayers. I say to the Senator that the groups that spoke to our committee staff were the NFIB and the bar association.

Mr. PROXMIRE. And the Treasury Department supports it?

Mr. DOLE. Yes.

Mr. PROXMIRE. I thank the Senator.

Mr DOLE. I am sorry. I am advised by the committee staff that that is the one provision the Treasury does not support. It was put in the House bill without their support.

Mr. PROXMIRE. What provision is that?

Mr. DOLE. The LIFO.

Mr. PROXMIRE. Why do they oppose it—on the ground of revenue loss?

Mr. DOLE. I think their feeling was that the rule is correct and it should be implemented, that we should not wait any longer. But that is not the view of the small business community.

So their opposition is based not on revenue pickup but on what they feel——

Mr. PROXMIRE. Is there a letter or a statement of any kind that would be available to us on what the Treasury objection is?

Mr. DOLE. Let me try to find that for the Senator.

I am certain that they appeared at the House hearing, and I will get that record.

Mr. President, I propose that we offer the amendment, which would include the amendments agreed to in the committee; and then, if there are any questions on any particular amendment, we would reserve the right of everyone to strike that amendment, or whatever.

I suggest that, first, we let everyone speak generally on the measure.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 805

(Purpose: To make various changes in the Internal Revenue Code of 1954)

Mr. DOLE. Mr. President, I send to the desk a committee amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes an unprinted amendment numbered 805.

Mr. DOLE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the enacting clause and insert the following:

SECTION 1. SHORT TITLE; AMENDMENT OF 1954 CODE.

(a) SHORT TITLE.—This Act may be cited as the "Miscellaneous Revenue Act of 1981".

(b) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 101. DELAY IN PROVISIONS RECOGNIZING GAIN ON CERTAIN DISPOSITIONS OF LIFO INVENTORIES.

Paragraph (3) of section 403(b) of the Crude Oil Windfall Profit Tax Act of 1980 (relating to effective date for recognition of gain on certain dispositions of LIFO inventories) is amended by striking out "December 31, 1981" and inserting in lieu thereof "December 31, 1982".

SEC. 102. ADJUSTMENTS TO NET OPERATING LOSS CARRYBACK AND CARRYFORWARD RULES FOR FEDERAL NATIONAL MORTGAGE ASSOCIATION.

(a) 10-YEAR CARRYBACK AND 5-YEAR CARRYFORWARD FOR LOSSES OTHER THAN MORTGAGE DISPOSITION LOSSES.—Paragraph (1) of section 172(b) of the Internal Revenue Code of 1954 (relating to net operating loss carrybacks and carryovers) is amended by redesignating subparagraphs (H) and (I) as subparagraphs (I) and (J), respectively, and by inserting after subparagraph (G) the following new subparagraph:

"(H) In the case of a net operating loss of the Federal National Mortgage Association for any taxable year beginning after December 31, 1981—

"(i) such loss, to the extent it exceeds the FNMA mortgage disposition loss (within the meaning of subsection (ii)), shall be—

"(I) a net operating loss carryback to each of the 10 taxable years preceding the taxable year of the loss, and

"(II) a net operating loss carryover to each of the 5 taxable years following the taxable year of the loss, and

"(ii) the FNMA mortgage disposition loss shall be—

"(I) a net operating loss carryback to each of the 3 taxable years preceding the taxable year of the loss, and

"(II) a net operating loss carryover to each of the 15 taxable years following the taxable year of the loss.".

(b) RULES RELATING TO FNMA MORTGAGE DISPOSITION LOSS.—Section 172 of such Code is amended by redesignating subsections (i) and (j) as subsections (j) and (k), respectively, and by inserting after subsection (h) the following new subsection:

"(i) RULES RELATING TO FNMA MORTGAGE DISPOSITION LOSS.—

'(1) FNMA MORTGAGE DISPOSITION LOSS DEFINED.—

"(A) IN GENERAL.—For purposes of subsection (b)(1)(H) and this subsection, the term 'FNMA mortgage disposition loss' means for any taxable year the excess (if any) of—

"(i) the losses for such year from the sale or exchange of mortgages, securities, and other evidences of indebtedness, over

"(ii) the gains for such year from the sale or exchange of such assets.

"(B) FNMA MORTGAGE DISPOSITION LOSS CANNOT EXCEED THE NET OPERATING LOSS FOR THE YEAR.—The amount of the FNMA mortgage disposition loss for any taxable year shall not be greater than the net operating loss for such year.

"(C) FORECLOSURE TRANSACTIONS NOT INCLUDED.—In applying subparagraph (A), any gain or loss which is attributable to a mortgage foreclosure shall not be taken into account.

"(2) COORDINATION WITH SUBSECTION (b)(2).—In applying paragraph (2) of subsection (b), a FNMA mortgage disposition loss shall be treated in a manner similar to the manner in which a foreign expropriation loss is treated.".

(c) CONFORMING AMENDMENTS.—

(1) Subparagraph (A) of section 172(b)(1) of such Code is amended by striking out "(H), and (I)" and inserting in lieu thereof "(H), (I), and (J)".

(2) Subparagraph (B) of section 172(b)(1) of such Code is amended by striking out "and (I)" in the second sentence and inserting in lieu thereof "(H), and (J)".

(3) Subparagraph (I) of section 172(b)(1) of such Code, as redesignated by subsection (a), is amended by striking out "subsection (i)" and inserting in lieu thereof "subsection (j)".

(4) Paragraph (3) of section 172(j) of such Code, as redesignated by subsection (b), is amended by striking out "subsection (b)(1)(H)" each place it appears and inserting in lieu thereof "subsection (b)(1)(I)".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to net operating losses for taxable years beginning after December 31, 1981.

SEC. 103. TREATMENT OF CERTAIN LENDING OR FINANCE BUSINESSES FOR PURPOSES OF THE TAX ON PERSONAL HOLDING COMPANIES.

(a) REMOVAL OF LIMITATION ON AMOUNT OF ORDINARY GROSS INCOME FROM LENDING OR FINANCE BUSINESS TAKEN INTO ACCOUNT.—Clause (ii) of section 542(c)(6)(C) (relating to exceptions from definition of personal holding company) is amended by striking out "but not $1,000,000".

(b) CHANGES IN DEFINITION OF LENDING OR FINANCE BUSINESS.—Clause (i) of section 542(b)(1)(B) (relating to exceptions from definition of lending or finance business) is amended to read as follows:

"(i) making loans, or purchasing or discounting accounts receivable, notes, or installment obligations, if (at the time of the loan, purchase, or discount) the remaining maturity exceeds 144 months; unless—

"(I) the loans, notes, or installment obligations are evidenced or secured by contracts of conditional sale, chattel mortgages, or chattel lease agreements arising out of the sale of goods or services in the course of the borrower's or transferor's trade or business, or

"(II) the loans, notes, or installment obligations are made or acquired by the taxpayer and meet the requirements of subparagraph (C), or".

(c) INDEFINITE MATURITY CREDIT TRANSACTIONS.—Paragraph (1) of section 542(d) (relating to special rules) is amended by adding at the end thereof the following new subparagraph:

"(C) INDEFINITE MATURITY CREDIT TRANSACTIONS.—For purposes of subparagraph (B)(i), a loan, note, or installment obligation meets the requirements of this subparagraph if it is made under an agreement—

"(i) under which the creditor agrees to make loans or advances (not in excess of an agreed upon maximum amount) from time to time to or for the account of the debtor upon request, and

"(ii) under which the debtor may repay the loan or advance in full or in installments."

(d) EFFECTIVE DATES.—

(1) SUBSECTION (a).—The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1981.

(2) SUBSECTIONS (b) AND (c).—The amendments made by subsections (b) and (c) shall apply to taxable years beginning after December 31, 1980.

SEC. 104. BUSINESS DEVELOPMENT COMPANIES

(a) IN GENERAL.—Subsection (a) of section 851 (defining regulated investment company) is amended—

(1) by striking out "or" at the end of paragraph (1),

(2) by striking out the period at the end of paragraph (2) and inserting in lieu thereof ", or", and

(3) by adding at the end thereof the following new paragraph:

"(3) which is a business development company within the meaning of section 2(a)(48) of the Investment Company Act of 1940 (15 U.S.C. 80a-2(a)(48)), as amended.

(b) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending after the date of enactment of this Act.

SEC. 105. ROLLOVER OF GAIN ON SALES OR EXCHANGES MADE UNDER F.C.C. ORDERS.

(a) IN GENERAL.—Subsection (a) of section 1071 (relating to gains from sale or exchange to effectuate policies of the F.C.C.) is amended—

(1) by striking out "radio broadcasting stations" in the first sentence thereof and inserting in lieu thereof "radio or television broadcasting stations", and

(2) by striking out "radio broadcasting stations" in the second sentence thereof and inserting in lieu thereof "radio or television broadcasting station or newspaper".

(b) EFFECTIVE DATE.—The amendments made by this section shall apply to any sale or exchange of property with respect to which there is a Federal Communications Commission certification described in section 1071(a) of the Internal Revenue Code of 1954, but only if the taxpayer has reinvested the proceeds in, or exchanged such property for, other qualifying property after June 24, 1981.

SEC. 106. EXCLUSION OF CERTAIN RESEARCH EXPENDITURES FROM THE LIMITATION ON CERTAIN INDUSTRIAL DEVELOPMENT BONDS.

(a) IN GENERAL.—Subparagraph (F) of section 103(b)(6) (relating to exclusion of certain capital expenditures) is amended—

(1) by striking out "or" at the end of clause (ii),

(2) by adding "or" at the end of clause (iii), and

(3) by adding at the end thereof the following new clause:

"(iv) described in clause (i) or (ii) of section 44F(b)(2)(A) for which a deduction was allowed under section 174(a),".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply with respect to expenditures made after the date of the enactment of this Act.

SEC. 107. TREATMENT OF CERTAIN SHALE OIL PROPERTY AS ENERGY PROPERTY.

(a) IN GENERAL.—Paragraph (7) of section 48(l) (relating to energy property) is amended to read as follows:

"(7) SHALE OIL PROPERTY.—The term 'shale oil equipment' means property used in the production or extraction of oil from oil-bearing shale rock, including property used for hydrogenation (or for a similar process subsequent to retorting), but not including property used for refining.".

(b) EFFECTIVE DATE.—The amendments made by this section shall apply to periods beginning after December 31, 1980, and before January 1, 1983, under rules similar to the rules of section 48(m) of the Internal Revenue Code of 1954.

SEC. 108. SUBSIDIZED ENERGY FINANCING.

(a) IN GENERAL.—Subparagraph (C) of section 44C(c)(10) (defining subsidized energy financing) is amended to read as follows:

"(C) SUBSIDIZED ENERGY FINANCING.—For purposes of subparagraph (A)—

"(i) IN GENERAL.—The term 'subsidized energy financing' means financing provided under a Federal, State, or local program a principal purpose of which is to provide subsidized financing for projects designed to conserve or produce energy.

"(ii) CERTAIN PROGRAMS NOT INCLUDED.—The term 'subsidized energy financing' shall not include financing provided by any lending institution which receives a State tax credit for the making of such financing.".

(b) EFFECTIVE DATE.—The amendments made by this section shall apply to financing made after December 31, 1980.

SEC. 109. DEFERRED COMPENSATION PLANS FOR STATE JUDGES.

(a) IN GENERAL.—Paragraph (2) of section 457(e) (relating to tax treatment of participants where plan or arrangement of State is not eligible) is amended by striking out "and" at the end of subparagraph (D), by striking out the period at the end of subparagraph (E) and inserting in lieu thereof ", and", and by adding at the end thereof the following new subparagraph:

"(F) a qualified State judicial plan.".

(b) QUALIFIED STATE JUDICIAL PLAN DEFINED.—Paragraph (3) of section 457(e) is amended by adding at the end thereof the following new subparagraph:

"(C) QUALIFIED STATE JUDICIAL PLAN.—The term 'qualified State judicial plan' means any retirement plan of a State for the exclusive benefit of judges or their beneficiaries if—

"(i) such plan has been continuously in existence since December 31, 1978,

"(ii) under such plan, all judges eligible to benefit under the plan—

"(I) are required to participate, and

"(II) are required to contribute the same fixed percentage of their basic or regular rate of compensation as judge,

"(iii) under such plan, no judge has an option as to contributions or benefits the exercise of which would affect the amount of includible compensation,

"(iv) the retirement payments of a judge under the plan are a percentage of the compensation of judges of that State holding similar positions,

"(v) judges participating in the plan are not eligible to participate in any eligible State deferred compensation plan (within the meaning of subsection (b)) on the basis of judicial service covered by the plan, and

"(vi) the plan during any year does not pay benefits with respect to any participant which exceed the limitations of section 415(b).

Paragraph (1) of subsection (d) shall not apply for purposes of this subparagraph.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1978.

TITLE II—ESTATE TAX PROVISIONS

SEC. 201. PROCEDURE FOR BINDING DETERMINATION OF FAIR MARKET VALUE OF SPECIAL VALUATION PROPERTY

(a) IN GENERAL.—Part IV of subchapter C of chapter 76 (relating to declaratory judg-

ments) is amended by adding at the end thereof the following new section:

"SEC. 7479. PROCEDURE FOR BINDING DETERMINATION OF FAIR MARKET VALUE OF SPECIAL VALUATION PROPERTY.

"(a) ADMINISTRATIVE AUDIT.—

"(1) DESIGNATION BY EXECUTOR.—An executor may request the Secretary to audit the fair market value of any special valuation property which is shown on the return of the tax imposed by chapter 11. Any such request shall be made on such return. Any request so made may be withdrawn only with the consent of the Secretary.

"(2) AUTHORITY OF THE SECRETARY.—For purposes of examining the correctness of the fair market value of any special valuation property, the Secretary shall have the same authority to initiate an audit of the fair market value of such property as if he were determining the liability of any person for a tax imposed by this title.

"(b) JUDICIAL REVIEW.—

"(1) BRINGING OF ACTION.—If the executor and the Secretary have not entered into an agreement described in subsection (c)(3) with respect to any special valuation property, the executor may bring an action in the Tax Court with respect to such property.

"(2) DECLARATION BY TAX COURT.—Upon the filing of an appropriate pleading in an action brought under paragraph (1), the Tax Court may make a declaration of the fair market value of property with respect to which such an action is brought. Such declaration shall have the force and effect of a decision of the Tax Court and shall be reviewable as such.

"(3) TIME FOR BRINGING ACTION.—

"(A) DURING FIRST 18 MONTHS.—No action may be brought under this subsection with respect to any property during the 18-month period which begins on the date on which the executor made a request under subsection (a)(1) with respect to such property unless the pleading is filed on or after the notification date.

"(B) PLEADING MUST BE FILED WITHIN THE 90-DAY PERIOD BEGINNING ON NOTIFICATION DATE.—No action may be brought under this subsection relating to any property with respect to which a notification date has occurred unless the pleading is filed within the 90-day period beginning on the notification date.

"(C) NOTIFICATION DATE DEFINED.—For purposes of this paragraph, the term 'notification date' means the day on which the Secretary sends by certified or registered mail a notification of his disagreement with the fair market value of the property shown on the return of the tax imposed by chapter 11.

"(c) BINDING EFFECT OF DETERMINATIONS.—

"(1) NOTICE FROM SECRETARY.—If—

"(A) an executor makes a request under subsection (a)(1) with respect to the fair market value of any property, and

"(B) before the date 3 years after the day on which such request is made, the Secretary sends to the executor by certified or registered mail notice of his disagreement with the fair market value of such property shown on the return of the tax imposed by chapter 11,

then the fair market value so shown shall be binding and conclusive on the Secretary and on any qualified heir unless any such qualified heir establishes a different fair market value to the satisfaction of the Secretary.

"(3) AGREEMENT BETWEEN SECRETARY AND EXECUTOR.—If the executor and the Secretary sign a written agreement as to the fair market value of any special valuation property, such agreement shall be binding and conclusive on the Secretary and on any qualified heir in the same manner as if such agreement were a closing agreement under section 7121 between the Secretary and such qualified heir.

"(4) COURT DECISION BINDING ON HEIRS.—Any declaration of the fair market value of any property made under the provisions of this section by any court which has become final shall also be binding on any qualified heir.

"(d) INTERVENTION.—Any qualified heir shall be allowed to intervene in any judicial proceeding under this section.

"(e) DEFINITIONS.—For purposes of this section—

"(1) FAIR MARKET VALUE.—The term 'fair market value' means fair market value on the date of the decedent's death (or the alternate valuation date under section 2032 if the executor of the decedent's estate elected the application of such section).

"(2) SPECIAL VALUATION PROPERTY.—The term 'special valuation property' means any real property to which an election under section 2032A applies.

"(3) QUALIFIED HEIR.—The term 'qualified heir' means any person who is a qualified heir (within the meaning of section 2032A(e)(1)) with respect to the estate of the decedent.".

(b) CONFORMING AMENDMENTS.—

(1) Subsection (c) of section 7456 (relating to Tax Court commissioners) is amended by striking out "and 7478" and inserting in lieu thereof "7478, and 7479".

(2) The table of sections for part IV of subchapter C of chapter 75 is amended by adding at the end thereof the following new item:

"Sec. 7479. Procedure for binding determination of fair market value of special valuation property.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to the estates of decendents dying after December 31, 1981.

SEC. 202. DECLARATORY JUDGMENTS RELATING TO SECTION 6166.

(a) IN GENERAL.—Part IV of subchapter C of chapter 76 (relating to declaratory judgments) is amended by adding at the end thereof the following new section:

"SEC. 7480. DECLARATORY JUDGMENTS RELATING TO SECTION 6166.

"(a) IN GENERAL.—In the case of an actual controversy involving—

"(1) the extent, if any, to which an estate is eligible for the extension of time for payment of the estate tax provided by section 6166, or

"(2) whether there is an acceleration of the time for payment under subsection (g) of section 6166,

upon the filing of an appropriate pleading, the Tax Court may make a declaration with respect to such issue. Any such declaration shall be final and conclusive and shall not be reviewed by any other court.

"(b) LIMITATIONS.—

"(1) PETITIONER.—Any pleading may be filed under this section only by the executor of the decedent's estate.

"(2) EXHAUSTION OF ADMINISTRATIVE REMEDIES.—The Tax Court shall not issue a declaratory judgment under this section unless it determines that the petitioner has exhausted all available administrative remedies within the Internal Revenue Service.

"(3) TIME FOR BRINGING ACTION.—If the Secretary sends by certified or registered mail notice of his determination of an issue described in subsection (a), no proceeding may be initiated under this section with respect to such issue unless the pleading is filed before the 91st day after the date of such mailing.".

(b) CONFORMING AMENDMENTS.—

(1) Subsection (c) of section 7456 (relating to Tax Court commissioners) is amended by striking out "and 7479" and inserting in lieu thereof "7479, and 7480".

(2) The table of sections for part IV of subchapter C of chapter 75 is amended by adding at the end thereof the following new item:

"Sec. 7480. Declaratory judgments relating to section 6166.".

(c) EFFECTIVE DATES AND SPECIAL RULE.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply with respect to the estates of decedents dying after December 31, 1981.

(2) ACCELERATION.—In the case of an actual controversy with respect to whether there is acceleration under section 6166(g) or 6166A(h) of the Internal Revenue Code of 1954, the amendments made by this section shall apply with respect to dispositions and withdrawals made after December 31, 1981.

(3) EXTENSIONS UNDER SECTION 6166A.—For purposes of applying section 7480 of such Code, an actual controversy involving acceleration of the time for payment under section 6166A(h) of such Code (as in effect with respect to estates of decedents dying before January 1, 1982) shall be treated as an actual controversy involving acceleration of the time for payment under section 6166(g) of such Code.

SEC. 203. INSTALLMENT PAYMENT OF ESTATE TAX.

(a) NO DISQUALIFICATION IN CASE OF SUBSEQUENT DEATHS.—

(1) IN GENERAL.—Subparagraph (D) of section 6166(g)(1) is amended by striking out the second sentence thereof and inserting in lieu thereof the following new sentence: "A similar rule shall apply in the case of subsequent transfers of the property by reason of the death of such person or of a subsequent transferee.".

(2) COORDINATION WITH SECTION 6166A.—Subparagraph (D) of section 6166A(h)(1) (as in effect with respect to estates of decedents dying before January 1, 1982) is amended by adding at the end thereof the following new sentence: "A similar rule shall apply in the case of subsequent transfers of the property by reason of the death of such person or of a subsequent transferee.".

(b) EFFECTIVE DATES.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendment made by subsection (a)(1) shall apply with respect to dispositions and withdrawals made after December 31, 1981.

(2) SECTION 6166A.—The amendments made by subsection (a)(2) shall apply to estates of decedents dying before January 1, 1982, with respect to dispositions and withdrawals made after December 31, 1981.

TITLE III—ADMINISTRATIVE PROVISIONS

SEC. 301. AWARDING OF COSTS AND CERTAIN FEES.

(a) IN GENERAL.—Subchapter B of chapter 76 (relating to proceedings by taxpayers and third parties) is amended by redesignating section 7430 as section 7431 and by inserting after section 7429 the following new section:

"SEC. 7430. AWARDING OF COURT COSTS AND CERTAIN FEES.

"(a) IN GENERAL.— In the case of any civil proceeding which is—

"(1) brought by or against the United States in connection with the determination, collection, or refund of any tax, interest, or penalty under this title, and

"(2) brought in a court of the United States (including the Tax Court),

the prevailing party may be awarded a judgment for reasonable litigation costs incurred in such proceeding.

"(b) LIMITATIONS.—

"(1) MAXIMUM DOLLAR AMOUNT.—The amount of reasonable litigation costs which may be awarded under subsection (a) with respect to any prevailing party in any civil proceeding shall not exceed $25,000.

"(2) REQUIREMENT THAT ADMINISTRATIVE REMEDIES BE EXHAUSTED.—A judgment for reasonable litigation costs shall not be awarded under subsection (a) unless the court determines that the prevailing party has exhausted the administrative remedies available to such party within the Internal Revenue Service.

"(3) ONLY COSTS ALLOCABLE TO THE UNITED STATES.—An award under subsection (a) shall be made only for reasonable litigation costs which are allocable to the United States and not to any other party to the action or proceeding.

"(4) EXCLUSION OF DECLARATORY JUDGMENT PROCEEDINGS.—

"(A) IN GENERAL.—No award for reasonable litigation costs may be made under subsection (a) with respect to any declaratory judgment proceeding.

"(B) EXCEPTION FOR SECTION 501(C)(3) DETERMINATION REVOCATION PROCEEDINGS.—Subparagraph (A) shall not apply to any proceeding which involves the revocation of a determination that the organization is described in section 501(c)(3).

"(c) DEFINITIONS.—For purposes of this section—

"(1) REASONABLE LITIGATION COSTS.—

"(A) IN GENERAL.—The term 'reasonable litigation costs' includes—

"(i) reasonable court costs,

"(ii) the reasonable expenses of expert witnesses in connection with the civil proceeding,

"(iii) the reasonable cost of any study, analysis, engineering report, test, or project which is found by the court to be necessary for the preparation of the party's case, and

"(iv) reasonable fees paid or incurred for the services of attorneys in connection with the civil proceeding.

"(B) ATTORNEY'S FEES.—In the case of any proceeding in the Tax Court, fees for the services of an individual (whether or not an attorney) who is authorized to practice before the Tax Court shall be treated as fees for the services of an attorney.

"(2) PREVAILING PARTY.—

"(A) IN GENERAL.—The term 'prevailing party' means any party to any proceeding described in subsection (a) (other than the United States or any creditor of the taxpayer involved) which—

"(i) establishes that the position of the United States in the civil proceeding was unreasonable, and

"(ii) (I) has substantially prevailed with respect to the amount in controversy, or

"(II) has substantially prevailed with respect to the most significant issue or set of issues presented.

"(B) DETERMINATION AS TO PREVAILING PARTY.—Any determination under subparagraph (A) as to whether a party is a prevailing party shall be made—

"(i) by the court, or

"(ii) by agreement of the parties.

"(3) CIVIL ACTIONS.—The term 'civil proceeding' includes a civil action.

"(d) MULTIPLE ACTIONS.—For purposes of this section, in the case of—

"(1) multiple actions which could have been joined or consolidated, or

"(2) a case or cases involving a return or returns of the same taxpayer (including joint returns of married individuals) which could have been joined in a single proceeding in the same court,

such actions or cases shall be treated as one civil proceeding regardless of whether such joinder or consolidation actually occurs, unless the court in which such action is brought determines, in its discretion, that it would be inappropriate to treat such actions or cases as joined or consolidated for purposes of this section.

"(e) RIGHT OF APPEAL.—An order granting or denying an award for reasonable litigation costs under subsection (a), in whole or in part, shall be incorporated as a part of the decision or judgment in the case and shall be subject to appeal in the same manner as the decision or judgment.

"(f) TERMINATION.—This section shall not apply to any proceeding commenced after May 31, 1987.".

(b) PENALTY FOR USING TAX COURT PROCEEDINGS FOR DELAY; PENALTY FOR FRIVOLOUS OR GROUNDLESS PROCEEDING.—The first sentence of section 6673 (relating to damages assessible by instituting proceedings before the Tax Court merely for delay) is amended to read as follows: "Whenever it appears to the Tax Court that proceedings before it have been instituted or maintained by the taxpayer primarily for delay or that the taxpayer's position in such proceedings is frivolous or groundless, damages in an amount not in excess of $2,500 shall be awarded to the United States by the Tax Court in its decision.".

(c) APPLICATION WITH TITLE 28.—Section 2412 of title 28, United States Code, is amended by adding at the end thereof the following new subsection:

"(e) The provisions of this section shall not apply to any costs, fees, and other expenses in connection with any proceeding to which section 7430 of the Internal Revenue Code of 1954 applies (determined without regard to subsection (b)). Nothing in the preceding sentence shall prevent the awarding under subsection (a) of section 2412 of title 28, United States Code, of costs enumerated in section 1920 of such title (as in effect on October 1, 1981).".

(d) CONFORMING AMENDMENTS.—

(1) The table of sections for subchapter B of chapter 76 is amended by striking out the item relating to section 7430 and inserting the following new items:

"Sec. 7430. Awarding of court costs and certain fees.
"Sec. 7431. Cross references.".

(2)(A) The section heading of section 6673 is amended by striking out "Merely for Delay." and inserting in lieu thereof "Primarily for Delay, Etc.".

(B) The table of sections for subchapter B of chapter 68 is amended by striking out "merely for delay." in the item relating to section 6673 and inserting in lieu thereof "primarily for delay, etc.".

(3) Section 722 of the Revised Statutes (42 U.S.C. 1988) is amended by striking out immediately after "Public Law 92-318" the clause "or in any civil action or proceeding, by or on behalf of the United States of America, to enforce, or charging a violation of, the United States Internal Revenue Code,".

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to civil actions or proceedings filed after May 31, 1982.

SEC. 302. ANNUITIES FOR SURVIVORS OF TAX COURT JUDGES.

(a) COMPUTATION OF ANNUITIES.—Subsection (m) of section 7448 (relating to computation of annuities) is amended—

(1) by striking out "5 consecutive years" and inserting in lieu thereof "3 consecutive years", and

(2) by striking out "37½" and inserting in lieu thereof "40".

(b) COST-OF-LIVING ADJUSTMENTS.—Section 7448 (relating to annuities to surviving spouses and dependent children of judges) is amended by redesignating subsection (s) as subsection (t), and by inserting after subsection (r) the following new subsection:

"(s) INCREASES ATTRIBUTABLE TO INCREASED PAY.—Whenever the salary of a judge under section 7443(c) is increased, each annuity payable from the survivors annuity fund which is based, in whole or in part, upon a deceased judge having rendered some portion of his or her final 18 months of service as a judge of the Tax Court, shall also be increased. The amount of the increase in such an annuity shall be determined by multiplying the amount of the annuity, on the date on which the increase in salary becomes effective, by 3 percent for each 5 percent by which such salary has been increased. In the event that such salary is increased by less than 5 percent, there shall be no increase in such annuity.".

(c) CATCH-UP FOR SURVIVORS ANNUITIES IN PAY STATUS ON DATE OF ENACTMENT.—If an annuity payable under section 7448(h) of the Internal Revenue Code of 1954 (relating to entitlement to annuity) to the surviving spouse of a judge of the United States Tax Court is being paid on the date of the enactment of this Act, then the amount of that annuity shall be adjusted, as of the first day of the first month beginning more than 30 days after such date, to reflect the amount of the annuity which would have been payable if the amndment made by subsection (a) applied with respect to increases in the salary of a judge under section 7443(c) of such Code taking effect after December 31, 1963.

(d) EFFECTIVE DATE.—

(1) SUBSECTION (a).—The amendment made by subsection (a) shall apply to annuities payable with respect to judges dying after the date of the enactment of this Act.

(2) SUBSECTION (b).—The amendment made by subsection (b) of this section shall apply with respect to increases in the salary of judges of the United States Tax Court taking effect after the date of the enactment of this Act.

SEC. 303. TAX COURT PROCEDURES.

(a) DISPUTES INVOLVING CERTAIN EXCISE TAXES.—

(1) IN GENERAL.—Subsection (a) of section 7463 (relating to disputes involving $5,000 or less) is amended—

(A) by striking out "or" at the end of paragraph (2),

(B) by adding "or" at the end of paragraph (3), and

(C) by inserting after paragraph (3) the following new paragraph:

"(4) $5,000 for any one taxable period or taxable event, as the case may be, in the case of any tax imposed by subtitle D which is described in section 6212(a) (relating to a notice of deficiency),".

(2) EFFECTIVE DATE.—The amendment made by this subsection shall apply with respect to petitions filed after the date of enactment of this Act.

(b) ORAL FINDING OF FACT OF OPINIONS.—Subsection (b) of section 7459 (relating to inclusion of Findings of Fact or Opinions in Report) is amended—

(1) by striking out the period at the end thereof and inserting in lieu thereof a comma, and

(2) by inserting at the end thereof the following: "subject to such conditions as the Tax Court may by rule provide. The requirements of this section and section 7460 are met if findings of fact or opinion are stated orally and recorded in the transcript of the proceedings."

(c) HEARINGS AND OPINIONS BY COMMISSIONERS IN REGULAR CASES INVOLVING DE-

FICIENCIES OF $5,000 OR LESS.—Subsection (c) of section 7456 (relating to Commissioners) is amended—

(1) by striking out "and" after "7477", and

(2) by inserting after "7478" the following: "and any proceeding involving a deficiency which does not exceed $5,000,".

(d) DESIGNATION OF JUDGES WHO ARE RECEIVING RETIRED PAY.—Subsection (b) of section 7447 (relating to retirement) is amended by adding at the end thereof the following sentence: "Any judge who retires shall be designated 'senior judge'.".

SEC. 304. WITHHOLDING STATEMENTS FOR TERMINATED EMPLOYEES.

(a) IN GENERAL.—Subsection (a) of section 6051 (relating to receipts for employees) is amended by striking out "on the day on which the last payment of remuneration is made" and inserting in lieu thereof "within 30 days after receipt of a written request from the employee if earlier than such January 31".

(b) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to employees whose employment is terminated after the date of enactment of this Act.

SEC. 305. WITHHOLDING OF STATE INCOME TAX FROM THE WAGES OF CERTAIN SEAMEN.

Section 12 of the Act of March 4, 1915 (38 Stat. 1169; 46 U.S.C. 601), is amended by inserting before the period at the end of the second proviso the following: ", but nothing in this section shall prohibit any such withholding of the wages of any seaman who is employed in the coastwise trade between ports in the same State if such withholding is pursuant to a voluntary agreement between such seaman and his employer".

TITLE IV—MISCELLANEOUS PROVISIONS

SEC. 401. ADDITIONAL REFUNDS RELATING TO REPEAL OF EXCISE TAX ON BUSES.

(a) TIME FOR FILING CLAIM.—Subparagraph (C) of section 231(c)(2) of the Energy Tax Act of 1978 (relating to refunds with respect to certain consumer purchases) is amended by striking out "the first day of such 10th calendar month" and inserting in lieu thereof "December 31, 1982".

(b) PROCEDURE FOR PASSING THROUGH REFUND.—Subparagraph (A) of section 231(c)(2) of such Act is amended by inserting before the semicolon ", or, in lieu of evidence of reimbursement, he makes such reimbursement simultaneously with the receipt of such a refund under an arrangement satisfactory to such Secretary which assures such simultaneous reimbursement.".

SEC. 402. EXCLUSION OF CERTAIN SERVICES FROM THE FEDERAL UNEMPLOYMENT TAX ACT.

Subsection (b) of section 822 of the Economic Recovery Tax Act of 1981 is amended by striking out "during 1981" and inserting in lieu thereof "after December 31, 1980, and before January 1, 1983".

SEC. 403. REFORESTATION TRUST FUND.

(a) IN GENERAL.—Paragraph (1) of section 303(b) of the Act of October 14, 1980 (94 Stat. 1991) is amended to read as follows:

"(1) Subject to the limitation in paragraph (2), the Secretary of the Treasury shall transfer to the Trust Fund 65 percent of the amounts received in the Treasury during any fiscal year ending before October 1, 1985, from any sale made after December 31, 1981, by the Secretary of Agriculture under section 14(a) of the National Forest Management Act of 1976 (90 Stat. 2958; 16 U.S.C. 472a(a)).".

(b) EFFECTIVE DATE.—The amendment made by this section shall take effect on January 1, 1982.

SEC. 404. ELIGIBILITY REQUIREMENTS FOR TRADE ADJUSTMENT ASSISTANCE.

Section 2514(a)(2)(A) of the Omnibus Budget Reconciliation Act of 1981 (95 Stat. 889) (relating to the effective date of amendments relating to group eligibility requirements for adjustment assistance for workers under the Trade Act of 1974) is amended by striking out "the 180th day after the date of the enactment of this Act" and inserting in lieu thereof "October 1, 1983".

SEC. 405. COMPLETION DATE FOR STUDY ON OIL SUPPLY DISRUPTION.

The Secretary of the Treasury shall submit to the Congress no later than June 15, 1982, the report of the interagency task force evaluating the alternative fiscal policies which could be used to help mitigate the adverse economic effects of an oil supply disruption.

Mr. DOLE. Mr. President, this committee amendment contains several important measures for which there is a great deal of support from the Finance Committee. All of these measures have been subject to public hearings, have very limited revenue loss and have been approved by the Treasury Department. Our committee worked hard on these measures, and I think they go a long way to correct a number of inequities in our tax laws.

Before introducing a more detailed statement of these measures into the RECORD, I would like to take this opportunity to describe the principal features of these amendments.

DEFERRAL OF LIFO RECAPTURE EFFECTIVE DATE

In the Crude Oil Windfall Profit Tax Act of 1980, Congress included a provision which requires certain liquidating corporations to pay ordinary income taxes on tax benefits gained from using the LIFO method of inventory accounting. The effective date was delayed until January 1, 1982, to allow time for congressional hearings on the provision. Neither the Finance Committee nor the Ways and Means Committee has held hearings on the substantive effect of this provision. In order to allow time for congressional hearings, the Finance Committee bill will delay the effective date until January 1, 1983.

Mr. President, at this point Senator SYMMS will describe the other features of the amendment.

Mr. SYMMS. Mr. President, the next part of the amendment is the net operating loss treatment of the Federal National Mortgage Association.

Under present law, taxpayers generally may carry back a net operating loss (NOL) for 3 years and carry forward an NOL for 15 years. Banks and certain other financial institutions are permitted to a special 10-year carryback and 5-year carryover.

The committee amendment will provide a 10-year carryback and a 5-year carryover for NOL's of the Federal National Mortgage Association (FNMA). Thus, the carryback period will be lengthened by 7 years and the carryover period will be shortened by 10 years. This special rule will apply only to that portion of an NOL of the FNMA that is not an FNMA mortgage disposition loss—the excess of losses over gains from the sale or exchange of mortgages, securities, and other evidences of indebtedness.

The third part of the amendment is treatment of certain lending or finance business for purposes of the tax on personal holding companies.

Under present law, a tax is imposed on the undistributed personal holding company income of a personal holding company—code section 541. A corporation actively engaged in a lending or finance business is exempt from this tax if the corporation has qualifying business expenses equal to 15 percent of the first $500,000 of ordinary gross income from its lending or finance business, plus 5 percent of such ordinary gross income from $500,000 to $1 million. The term "lending or finance business" is defined to include the business of making loans with maturities of not more than 60 months.

Effective for taxable years beginning after 1980, the committee amendment increases the 60-month limitation of present law to 144 months, and amends the definition of a lending or finance business to include the business of making loans in indefinite maturity credit transactions.

Beginning with taxable years after 1981, the committee amendment also amends the business expense test of present law to require a lending or finance business to have qualifying business expenses equal to 15 percent of the first $500,000 of ordinary gross income from the lending or finance business, plus 5 percent of such ordinary gross income in excess of $500,000. Thus, 5 percent of ordinary gross income in excess of $1 million will be added to the qualifying business expense test.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. SYMMS. I yield.

Mr. PROXMIRE. I am trying to follow this. We have a great deal of material given to us by the Finance Committee. Will the Senator identify this provision? I take it this is a new amendment that is being offered now as an additional part of the bill that Senator DOLE previously explained. Is that right?

Mr. SYMMS. I say to the Senator from Wisconsin that this came over from the House of Representatives, from the other body, in another bill, and it is my understanding that this same amendment did pass the Senate last year.

Mr. PROXMIRE. This was in H.R. 4961, the treatment of certain lending or finance businesses for holding company tax purposes.

Mr. SYMMS. The Senator is correct.

Mr. PROXMIRE. Do we have any kind of report on this?

Mr. SYMMS. Yes, I say to the Senator, we do. We will get a Xerox of it and give it to the distinguished Senator.

Mr. PROXMIRE. Has the amendment been printed?

Mr. SYMMS. It is an unprinted amendment.

Mr. PROXMIRE. Does the Treasury support it?

Mr. SYMMS. That is correct.

Mr. PROXMIRE. Will there be any revenue loss?

Mr. SYMMS. I say to the Senator it will be less than $5 million per year.

Mr. PROXMIRE. Who would benefit from the amendment? Is there a particular taxpayer who will get the principal benefit?

Mr. SYMMS. Dial Finance and several other financial institutions.

Mr. PROXMIRE. What finance company?

Mr. SYMMS. Dial Finance would be one and there would be others similar in nature.

Mr. PROXMIRE. I thank the Senator.

Mr. SYMMS. I thank the Senator.

Mr. President, the next portion of our committee amendment is investment company status for certain business development companies.

The amendment permits venture capital companies which qualify for tax treatment as regulated investment companies to continue to qualify for such "flow through" treatment even though the companies elect, as an alternative to full scale regulation under the Investment Company Act of 1940, regulation under the Small Business Incentive Act of 1980.

Mr. PROXMIRE. Mr. President, I apologize for interrupting.

Mr. SYMMS. Yes.

Mr. PROXMIRE. If the Senator will tell us these amendments that are proposed by particular Senators that will be very helpful to us. We have a list here of some 13 amendments proposed by different Senators, and that is the way the material is identified to us. Perhaps these are amendments that came over from the House of Representatives. If so that will be helpful also.

Mr. SYMMS. This amendment, I say to the distinguished Senator from Wisconsin, was offered by Senator CHAFEE. There were hearings held. It is primarily a technical conforming amendment for business development companies.

Mr. PROXMIRE. That is the technical conforming amendment for business development companies by Senator CHAFEE.

I thank the Senator.

Mr. SYMMS. That is correct.

The next amendment of the committee amendment is rollover of gain on FCC-ordered disposition of broadcast property.

Currently, section 1071 does not provide nonrecognition treatment to gain realized by a taxpayer in an FCC-ordered divestiture of a radio, television, or newspaper followed by reinvestment, within the meaning of section 1033, in a newspaper.

The amendment expands the coverage of section 1071 to include FCC-ordered divestitures where the divested property is replaced by a newspaper.

And that would be on the list, I say to the Senator from Wisconsin, Senator MOYNIHAN's amendment on rollover of gain on the FCC ordered disposition of broadcast property, and we do have other staff.

Mr. PROXMIRE. Mr. President, I am concerned about that particular amendment. That is an amendment that provides for one station, it seems to me, in Watertown, N.Y. It is $10 million lost. Of course, it may affect other stations in the future as a precedent. But it is $10 million annual loss. Is that correct?

Mr. SYMMS. It will be less than $10 million.

Mr. PROXMIRE. Not to exceed $10 million annually, but there would be apparently an annual loss for some time.

The report I have from the Finance Committee says it is $10 million annually.

Mr. SYMMS. That is correct.

Mr. PROXMIRE. And it would be retroactive for 2 years.

Mr. SYMMS. That is correct.

Mr. PROXMIRE. It will go back to January 1, 1980. This seems to be an extraordinary benefit to a particular taxpayer. What is the justification for it?

Mr. SYMMS. I say to the Senator that the justification in the present law would allow one to dispose of a newspaper and then reinvest in a TV or radio station without paying but he cannot go the other way around.

What this does is it conforms, because of quirk in the statute—this would make it conform. You can invest in a radio station, sell it, and then invest in a newspaper, so it would make it equal.

Mr. LONG. The point is in certain situations the FCC will make you divest either the radio station or the newspaper, and you get the benefit if you go in one direction and not in the other way.

You have to divest something, so you sell the newspaper and buy a radio station, and that is all right, that is a tax-free rollover. But if they order you to divest yourself of the radio station and you sell the radio station and put the proceeds of it in the newspaper that is not permitted. That is taxed.

So the rule ought to be the same either way. If you are forced to divest of one or the other, either the newspaper or the radio station, then to be fair about it if they order that and feel that is in the public interest to require you to divest yourself of the one or the other, you should not be taxed when you give up either the newspaper to buy the radio station or the radio station to buy the newspaper, and the rule should be the same in either event.

Mr. PROXMIRE. It sounds logical and I can see considerable merit. I just wonder if, in view of the fact that it is a change in policy and it does affect right here a very large station with a very large loss, why this could not be considered when we have the report before us, and all Members can review it and take it up next year? Why do we have to take it up now? What is the urgency?

Mr. LONG. Well, in this case the people have been ordered to divest, they are required to do so by law or by the law and the rules that we permit the regulatory bodies to make, and so it is one of those things where if you are going to do it you ought to do it while it is current.

Mr. PROXMIRE. You are making it retroactive for 2 years to January 1, 1980, and under those circumstances I cannot see that there would be——

Mr. LONG. No, it is for purchase after June 24, 1981, so what you are doing is doing it this year, and it is not retroactive at all.

Mr. PROXMIRE. Well, the effective date of the proposal is January 1, 1980. That is the way the legislation reads.

Mr. LONG. That changed, Senator, making it 1981.

Mr. PROXMIRE. It is still retroactive.

Mr. LONG. No, it is not. If we pass a law that affects your taxes in 1981, if we pass it now in 1981 we will never regard that as being retroactive legislation. You do not pay the tax until the end of this year. In other words, we have never regarded it as being retroactive if they pass a tax law, if it affects your tax liability this year.

Mr. PROXMIRE. I have this material given to me by the Finance Committee yesterday, only 24 hours old, and this says it will be effective January 1, 1980.

Mr. LONG. The amendment as drafted says this, reading from line 21:

> But only if the taxpayer had reinvested the proceeds or exchanged such property for other qualifying property after June 24, 1981.

Mr. PROXMIRE. You do not consider that retroactive?

Mr. LONG. No, because it is an event that occurs this year.

Mr. PROXMIRE. Giving that precise date is certainly for a particular, specific taxpayer.

Mr. LONG. Well, Senator MOYNIHAN had brought this issue up at an earlier date and he was given a commitment that if he would defer bringing it up at that point we would consider it at a subsequent date, and that this would be the date, the effective date of it, when we considered it which, incidentally, was the date the Senator brought the matter up and discussed the problem. So as far as the time that the proposal was made it was not retroactive.

Mr. PROXMIRE. I see.

I thank the Senator. I just want to make it clear that my position is to oppose this particular part of the overall amendment. I realize there will be a bloc vote, and I do not want my vote to be attributed against any other part. I want it to show that I am opposed to this particular portion as being special legislation.

Mr. SYMMS. The next amendment is the exclusion of certain research expenses from capital expenditure limitations on interest exemption for small issues, IDB's.

This is another Moynihan amendment. We did hold hearings on this amendment, and the purpose of it is that interest on certain State and local industrial development bonds is exempt from Federal income tax pursuant to an exemption under the present law for small issues where the aggregate amount of outstanding exempt small issues, plus capital expenditures financed otherwise than out of small bond proceeds, does not exceed $10 million.

Because research expenditures are considered to be capital expenditures, such expenses are to be taken into account in determining whether the $10 million limitation is exceeded.

Under the amendment expenditures after the enactment for research wages and research supplies, which the taxpayer elects to deduct currently, are not taken into account for purposes of the $10 million expenditure limitation on small issue industrial development bonds.

Mr. President, I ask unanimous consent to lay aside the pending amendment temporarily to allow Senator THURMOND to introduce an amendment.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

UP AMENDMENT NO. 806

(Purpose: To provide loan guarantees for municipal waste energy projects)

Mr. THURMOND. Mr. President, I send an amendment to the desk and ask that it be reported.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from South Carolina (Mr. THURMOND) proposes an unprinted amendment numbered 806:

At the end of the substitute amendment add a new section: "SEC. . LOAN GUARANTEES FOR MUNICIPAL WASTE ENERGY PROJECTS.

(1) The Secretary of Energy is directed and authorized under this act and the Energy Security Act of 1980, Public Law 96-294, to provide loan guarantees for municipal waste energy projects, the aggregate amount of which shall not exceed $15 million, including principal and interest. Such funds as may be necessary are hereby appropriated for this purpose.

Mr. THURMOND. Mr. President, as our Nation continues to grapple with high energy costs which, along with high interest rates, have slowed the growth of the economy, I am greatly concerned that the Federal Government may be overlooking valuable yet inexpensive means of assisting the private sector in coping with these problems.

Specifically, the utilization of alternative energy sources could be a real benefit for American industry and would represent a substantial investment in our Nation's future energy needs. One example of such a potential alternative energy source is municipal waste energy plants.

However, I understand that there is currently no funding available for loan guarantees for these types of projects. This amendment would rectify that situation, and would provide $15 million for the Secretary of Energy to use in providing loan guarantees for these type plants. Such a program would, in my opinion, prove extremely valuable to our country's energy needs, and I urge the adoption of this amendment.

Mr. HATFIELD. Mr. President, I very reluctantly rise to oppose this amendment for two reasons: I have consistently attempted to avoid legislating on appropriation measures, and I think the reverse should be just as carefully observed, that is, trying to appropriate on a nonappropriation bill.

In effect, that procedure is what is offered in this amendment to appropriate $15 million for a project in South Carolina on a Finance Committee bill.

I would say, second, that I assure the Senator from South Carolina I am totally in sympathy with the program that is represented in his amendment. Many of us have been attempting to get energy conservation money not only appropriated but expended under the legislative intent for some time, and we feel a growing frustration that there is so little attention given and so little priority given to energy conservation in the fiscal year 1982.

But I do want to indicate that this is a multibillion dollar loan guarantee program, and if we should adopt this kind of an amendment here at this time we would be inviting many such projects from all over this country of equal importance and significance.

I am a strong supporter of this kind of project, and I want to say to my good friend from South Carolina that I recognize his very great interest in this project in South Carolina. It is a $15 million project, which means being one of the smaller projects. We certainly will assure him that we will give it very serious and very important consideration on a vehicle out of the Appropriations Committee that will be considered in the fiscal year 1983 period, that is, beginning next February and March when we return to the second session of this Congress.

But I think it will be a very bad practice to begin hanging appropriations on this Finance Committee bill at this time. With that assurance on my part, I will be a personal advocate, as I have been, for this kind of energy development, alternative energy program, and I will look forward to working with the Senator from South Carolina not only to advance this project, but to advance the whole realm of that field of energy conservation and energy development.

Mr. THURMOND addressed the Chair.

The PRESIDING OFFICER (Mr. GORTON). The Senator from South Carolina.

Mr. THURMOND. Mr. President, in view of the assurance of the distinguished Senator from Oregon, I will withdraw the amendment at this time and we will pursue it further next year.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. HATFIELD. I appreciate the Senator from South Carolina's cooperation.

Mr. SYMMS. Mr. President, I ask unanimous consent that we may continue with the Dole amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

OIL SHALE CREDITS

Mr. SYMMS. Mr. President, the next portion of the Dole amendment, the committee amendment, is that under the present law is the expansion of oil shale credits for 1982 and 1983. This is an amendment that was offered by the distinguished Senator from Wyoming, Senator WALLOP.

Under present law there is a 10-percent energy tax credit for equipment for producing or extracting shale oil from oil-bearing shale rock. Eligible equipment does not include equipment for hydrogenation, refining, or other process subsequent to retorting.

The amendment will expand the defintion of shale oil equipment eligible for the energy credit to include hydrogenation equipment used to upgrade the shale oil to a pipeline quality liquid. However, refining equipment will be excluded as under present law. The provision will apply to periods after December 31, 1980, and before January 1, 1983.

Mr. PROXMIRE. Will the Senator yield?

Mr. SYMMS. I am happy to yield.

Mr. PROXMIRE. This was an expansion of oil shale credit for 1982 and 1983?

Mr. SYMMS. For 1981 and 1982.

Mr. PROXMIRE. For this year and next year, is that right?

Mr. SYMMS. It is for this year, yes, for 1981 and 1982. After January 1, 1983, a new set of rules will apply, it is my understanding.

Mr. PROXMIRE. Why is that necessary, in view of the fact that there has been a tremendous explosion in the price of oil and the incentives seem to be greater than ever? The world price has gone up enormously in the last few years. Why do we have to provide this additional credit?

Mr. SYMMS. It is my understanding—and I see that the distinguished Senator from Wyoming is not here on the floor at the present time—that when they started into this process, they did not anticipate that the material and the finished product would have to be hydrogenated at the end process to put in a liquid form so it could be transported by a pipeline. This action is a necessary part of the process. The reason for this is there is a very large reserve of oil shale in this country and in order to get us off of the OPEC dependence, this is a way of encouraging development of energy here in this country.

Mr. PROXMIRE. I am all for developing oil shale. For many years I remember Paul Douglas, when he was in this body, was an enthusiastic advocate of developing oil shale and I certainly favor it. I just wonder, however, why this particular provision comes up on the last day, without a report from the committee on it and without our having an opportunity to study it.

Mr. SYMMS. Well, I would just say to my friend from Wisconsin that it is my understanding that the primary reason for this is because it is essential, if these projects are going to be economically competitive with other forms of energy, to have the completion of the entire process so they do have the complete circuit completed in the process and have equality of the tax credit treatment in order to help them be economically feasible projects.

Mr. PROXMIRE. Is this a matter of equality or a matter of increasing these substances? Does this put it on the same basis as all other competing sources of energy?

Mr. SYMMS. What it does, as I stated earlier, is it would add the final phase of the process to put the product in a liquid form to pipeline quality. So it would put the entire project under the same treatment as the earlier stages.

Mr. PROXMIRE. Then there is a loss of $10 million?

Mr. SYMMS. I think it is $10 million in 1981 and $9 million in 1982.

Mr. PROXMIRE. What firms would benefit from that loss; Occidental?

Mr. SYMMS. They probably will not, although there would be a potential there.

Mr. PROXMIRE. Well, who would benefit?

Mr. SYMMS. It is my understanding—and I will check this out for the Senator

when we get a chance for confirmation—that it might be Union and Tosco.

Mr. PROXMIRE. Well, it seems to be a kind of a private relief bill with two or three firms being the principal beneficiaries. I thank the Senator.

Mr. SYMMS. I thank the Senator very much. I think it is primarily, as I stated earlier, a matter of a national effort for energy independence. I would hope that it would be viewed that way, rather than a private relief bill.

The next amendment is the subsidized energy financing rule for residential energy tax credit. That was an amendment offered by Senator Packwood.

Under present law, the residential energy credit is not available for expenditures made from subsidized energy financing provided under a Federal, State, or local program, a principal purpose of which is to provide subsidized financing for projects designed to conserve or produce energy.

Under the amendment, subsidized energy financing, for purposes of the residential energy credit, will not include loans made by financial institutions under such programs for which the financial institution receives a State tax credit.

We have held hearings on this and the revenue loss would be nominal.

Mr. PROXMIRE. Mr. President, I missed that. Would the Senator inform us as to which one this was?

Mr. SYMMS. This is Senator PACKWOOD's amendment.

Mr. PROXMIRE. That is the Reforestation Trust Fund transfer provision?

Mr. SYMMS. No, that is not correct. It is the subsidized energy financing rule for residential energy tax credit.

Mr. PROXMIRE. I do not see that on the list. The only Packwood amendment on the list is the Reforestation Trust Fund transfers.

Mr. SYMMS. I would say to the distinguished Senator from Wisconsin that this is another Packwood amendment that was raised after that list had been completed. It is No. 8 in the longer explanation.

Mr. PROXMIRE. Mr. President, I say to the Senator that he may go right ahead and we will try to catch up.

STATE JUDGES DEFERRED COMPENSATION PLAN

Mr. SYMMS. The next amendment is an amendment that was brought to the committee by Senator BENTSEN, the State judges deferred compensation plan under code section 61, and that is in the attached staff document C.

Under the amendment, benefits payable under a qualified State judicial plan will not be taxed to a participant judge or a beneficiary merely because the benefits are nonforfeitable. However, a qualified State judicial plan may not pay benefits with respect to a participant which exceed the overall limitations on benefits permitted under tax-qualified plans and may not provide an option to plan participants as to contributions or benefits, the exercise of which would affect the amount of the participant's currently includible compensation.

Mr. PROXMIRE. Mr. President, as I understand it, this is a State judicial deferred compensation plan.

Mr. SYMMS. That is correct.

Mr. PROXMIRE. And this is certainly sharply retroactive. It goes back to December 31, 1978. Is that correct?

Mr. SYMMS. Yes, that is correct.

Mr. PROXMIRE. Why is it that we have had this extraordinarily long retroactive period?

Mr. LONG. It is my understanding that this provision has to do with regulations that were published this year. The bill was enacted in 1978. The regulations have just been published. This is to correct an error that was made in 1978. Therefore, it appears to be retroactive but the error was made then. It is to correct the error which exists.

Mr. PROXMIRE. And it applies only to one State?

Mr. LONG. It also applies to Maryland and a couple of other States. I am not sure which States they are.

Mr. PROXMIRE. Correct me if I am wrong, but it seems to me that the amendment would only cover the Texas situation. Is that correct?

Mr. LONG. It covers the other States as well.

ESTATE TAX AMENDMENT

Mr. SYMMS. The next amendment is the estate tax amendment which deals with declaratory judgment for special use valuation.

If certain requirements are met, present law allows family farms and real property used in a closely held business to be included in a decedent's gross estate at the real property's current use value rather than its full fair market value. If this special provision is elected, both the fair market value and the current use value of the specially valued property must be determined. Under present law, if the fair market value is the only unresolved issue in an estate, there is no opportunity for judicial review of the issue unless the entire use valuation election is disallowed.

The amendment provides a procedure for obtaining a declaratory judgment by the tax court with respect to the fair market value of specially valued property.

The declaratory judgment for installment payment of the State tax, the "second death" exception, is the second part of this.

Mr. PROXMIRE. Will the Senator yield at that point?

Mr. SYMMS. I yield.

Mr. PROXMIRE. Will the Senator identify this as an amendment offered by a particular Senator?

Mr. SYMMS. It is No. 11, offered by the Senator from Idaho, Senator SYMMS, myself.

Mr. PROXMIRE. The declaratory judgment for special use evaluation?

Mr. SYMMS. Yes.

The second part of the amendment is the declaratory judgment for installment peyment of the State tax; "second death" exception.

If certain requirements are met, estate tax attributable to interests in closely held businesses may be paid in installments over up to 14 years—annual interest payments for 4 years followed by up to 10 installments of principal and interest. Because the decision of the Treasury Department to deny an election to pay all or a portion of the estate tax attributable to interests in closely held businesses in installments or to accelerate the remaining unpaid tax involves a dispute as to the timing of estate tax payments rather than the amount of tax, the decision is not presently subject to judicial review.

The amendment provides a procedure for obtaining a declaratory judgment by the U.S. Tax Court with respect to an estate's eligibility for installment payment of estate taxes by closely held businesses and whether there is an acceleration of unpaid installments.

If more than a specified fraction of the business interest is disposed of or withdrawn during the 14-year period all unpaid tax is accelerated. The Economic Recovery Tax Act of 1981 provided that the transfer of interests from an heir—or subsequent transferee—at his death to a family member of the heir—or transferee—is not considered a disposition for purposes of the acceleration rules.

Under the amendment subsequent transfers caused by the death of an heir or subsequent transferee by eliminating the requirement that the interest in the closely held business pass to a family member of the heir or subsequent transferee are not considered dispositions.

Mr. PROXMIRE. Is there a revenue loss?

Mr. SYMMS. I think it is negligible.

Mr. PROXMIRE. Is there Treasury support?

Mr. SYMMS. Yes. Treasury supports this, and we did hold hearings on the subject.

Mr. PROXMIRE. And there were no objections?

Mr. SYMMS. We had hearings, I might say, on all of the issues that the Senator from Idaho is bringing up. We had hearings on all of these issues, and they were acted upon unanimously by the Finance Committee.

The next amendment is the award of attorneys' fees in tax litigation, which was offered by Senator BAUCUS. It is listed as No. 2 in the list, I say to the Senator from Wisconsin.

AWARD OF ATTORNEY'S FEES IN TAX LITIGATION

Last year Congress enacted the Equal Access to Justice Act which authorizes awards to a prevailing party of fees and other expenses incurred in any civil action, unless the position of the Government was substantially justified. This provision applies to civil tax actions brought in Federal district courts and the U.S. Court of Claims. However, it does not apply to cases in the U.S. Tax Court.

The Finance Committee bill provides for an award of reasonable court costs, up to a maximum of $25,000, to a prevailing party in any civil tax action, if the position of the Government was unreasonable. This provision will apply to civil tax actions commenced on or after June 1, 1982 and before June 1, 1987.

In addition, the Finance Committee's bill will increase the penalty which the Tax Court can assess a taxpayer for instituting proceedings merely for delay from $500 to $2,500 and will expand the

penalty to include frivolous or groundless action brought by the taxpayer.

I would say to the Senator the cost is less than $5 million.

The next part is the Tax Court judges' survivors annuities and procedural rules.

This amendment is offered by Mr. BAUCUS also. Senator GRASSLEY may wish to comment on the attorney fees. I yield to the Senator from Iowa.

Mr. GRASSLEY. I thank the Senator for yielding.

Mr. President, this is a very important piece of legislation for all taxpayers who feel they have been treated unreasonably by the Internal Revenue Service. This measure allows a taxpayer to recover the cost of litigating his or her claim with the Internal Revenue Service if he or she can establish that the Service acted in an unreasonable manner.

Mr. President, H.R. 4961, as amended by the Baucus-Grassley substitute in the Committee on Finance, is a very important measure to all taxpayers who feel they have been treated unreasonably by the Internal Revenue Service. This measure allows a taxpayer to recover the costs of litigating his or her claim with the Internal Revenue Service if he or she can establish that the Service acted in an unreasonable manner. The maximum amount a taxpayer may recover in costs is $25,000.

The Baucus-Grassley substitute also includes a provision that makes the award of attorney's fees in all tax cases subject to this act as of June 1, 1982. This provision is important because tax cases filed after October 1 of this year in the Court of Claims or the U.S. district court will be governed by the attorney's fees provisions in the Equal Access to Justice Act. This change in the bill will require that all tax cases receive identical attorney fee treatment to prevent confusion and forum shopping among various taxpayers.

Senator BAUCUS has been an innovator in this area since the 96th Congress and I am grateful to him for letting me join in this effort. I regard this bill as an important new right for taxpayers and I am proud of my efforts in helping to perfect this legislation. This will truly give the average taxpayer a tool in redressing grievances against an arbitrary government.

Mr. BAUCUS. Mr. President, this is a measure on which several of us have been working in various capacities and covering various situations. I am happy to see that our efforts are reaching fruition.

Mr. President, I am pleased by the action of the full Senate Finance Committee in recently adopting my bill to provide uniform, reasonable rules for the recovery of attorney's fees by taxpayers in all tax cases, whether they were brought in the Tax Court, in the district court or in the Court of Claims. In my view, Mr. President, this legislation, which we are about to adopt today on the Senate floor, provides an important, crucial protection to taxpayers who are dealt with unfairly by the Internal Revenue Service.

On October 1, 1981, the Equal Access to Justice Act came into effect. This act provides the payment of taxpayers' attorneys' fees in district court and Court of Claims cases. But it does not provide for similar payment in Tax Court cases. As a result, there is now an inconsistent set of rules in place which need to be rationalized and made uniform.

In addition, the administration, the Congress and the American people are demanding that all agencies of the Federal Government operate efficiently and fairly. Because the Internal Revenue Service deals directly with so many of our citizens, it is vital that taxpayers have meaningful protection against unreasonable actions by that agency.

With this legislation, fees would be awarded to a taxpayer who prevailed in a tax case where the Government was unreasonable in taking a position. This legislation would not penalize the IRS or impair its performance when it acts reasonably and fairly.

Without legislation permitting awards of attorney's fees in tax cases, taxpayers would often have to settle with the Government notwithstanding the unreasonableness of the Government's position, because the cost of litigation might exceed the tax dollars involved in a controversy. Even if the tax amounts are large enough to merit the litigation expense, the taxpayer's court victory over an unreasonable Government position does not make him whole. A significant part of the court recovery must go to pay legal expenses which the taxpayer would not have incurred had the Government been fair and reasonable.

Taxpayers who lose money in this way as a result of unreasonable Government actions justifiably feel that they are not being treated fairly.

This legislation will ease the financial burden imposed on taxpayers who win in court against an unreasonable IRS position. Second, this legislation will discourage the IRS from forcing taxpayers to litigate against unreasonable IRS positions. Finally, by providing fair and uniform rules, this legislation will increase respect for our tax system by placing taxpayers on a more equal footing with the IRS.

I want to thank Senator GRASSLEY, the chairman of the Finance Subcommittee on the Oversight of the IRS, for his support and assistance in seeing this measure through to adoption.

Again, Mr. President, I am pleased that we are about to adopt this provision into law.

Mr. SYMMS. The amendment generally increases annuities payable to survivors of judges of the U.S. Tax Court and adjusts such annuities for cost-of-living increases. The amendment also revises certain procedural rules for the Tax Court, including the rules for the Tax Court. and the rules for small tax cases. Generally, the amendment applies after the date of enactment.

In general, that is the Baucus amendment. listed as No. 2 on our agenda, Mr. President.

The next amendment is listed as No. 5, the Danforth amendment, modification of requirements for providing the form W-2 to terminated employees.

Present law generally requires an employer to provide form W-2 to employees no later than January 31 of the year following the year in which wages are paid. However, in the case of an employee whose employment terminates during the year, form W-2 must be supplied with the final payment of wages.

Under the amendment, the employer of an employee whose employment terminates during the year will be required to furnish the employee with a form W-2 no later than January 31 of the following year, unless the employee requests earlier receipt.

The next amendment is the withholding of State income tax from seamen's wages on a voluntary basis. This amendment was offered by the Senator from Hawaii (Mr. MATSUNAGA) on the voluntary withholding of tax for certain fishermen.

Mr. MATSUNAGA. If the Senator will yield, not fishermen, but seamen, seamen who are aboard vessels going from port to port within the State itself.

Mr. SYMMS. I ask the distinguished Senator, is this the amendment, where the State withholding of income taxes is generally authorized but the withholding of State taxes from the wages of seamen or fishermen is prohibited? Under the amendment, a seaman or fisherman may ask on a voluntary basis for withholding of State income tax?

Mr. MATSUNAGA. That is correct.

Mr. President, here we have a case of taxpayers wanting to have their taxes withheld from wages, but where the Federal law forbids the employer from withholding taxes.

Federal law allows seamen to have Federal income tax withheld on an elective basis, but Federal law prohibits withholding for State income tax. The rationale behind the prohibition is to prevent over-withholding where several States might seek to tax a seaman's wages.

My amendment would allow withholding for State income tax where only one State can lay claim to taxing a seaman's wages—that is where the seaman is engaged on a vessel plying between ports within the same State. Withholding would be voluntary at the seaman's election.

Hearings were held on this proposal on May 22, 1981. The proposal has no revenue effect on the budget and enjoys the approval of the Finance Committee and the Department of the Treasury.

Mr. President, I urge the adoption of my amendment.

Mr. SYMMS. I thank the Senator very much.

Mr. President, as the Senator said. under the amendment. a seaman or fisherman employed in the coastwide trade between ports of the same State may enter into a voluntary agreement with an employer for withholding of State income taxes.

The next amendment is the Mitchell amendment, which deals with a 1-year extension of an existing 1-year FUTA exemption for certain fishermen.

Services performed by fishermen are exempt from FICA tax in their remuneration is a share of the boat's catch—or cash proceeds from the sale of a share of the catch—and if the crew of such boat normally is made up of fewer than 10 individuals. In addition, the remuneration received by those fishing boat crew members whose services are exempt for purposes of FICA is not considered to be wages for purposes of income tax withholding. Furthermore, wages paid during 1981 to fishing boat crew members who are self-employed for purposes of FICA are not subject to FUTA taxes, section 822 of the Economic Recovery Tax Act of 1981.

The amendment extends for 1 year, through 1982, the FUTA tax exemption for wages paid to fishermen whose remuneration is exempt for purposes of FICA.

Mr. MITCHELL. Will the Senator yield?

Mr. SYMMS. I am happy to yield to the Senator from Maine.

Mr. MITCHELL. Mr. President, the Miscellaneous Revenue Act of 1981 (H.R. 4717) contains an amendment which I offered in the Committee on Finance. My amendment simply extends through calendar year 1982 a provision applying only to 1981 contained in the Economic Recovery Tax Act, which was enacted last summer. This provision exempted from the Federal Unemployment Tax Act crew members on fishing vessels who receive a share of the catch as their remuneration and labor on vessels carrying fewer than 10 people.

The purpose of my amendment is to insure that in 1982, fishing vessel owners and operators do not have to pay unemployment taxes on vessel crew members who consider themselves to be self-employed. I have been asked if my intent is to exempt union crew members. At this time I wish to state definitively that the exemption which I propose for 1982 is intended only to cover those who are self-employed, who consider themselves to be independent contractors. My amendment is clearly not intended to change in any way the status of persons who, by virtue of their membership in a collective bargaining unit, are clearly employees.

Mr. President, this will, in effect, standardize tax treatment for fishermen. Under existing law, as I have said, the definition of self employment for income and social security tax purposes is different than the definition for unemployment tax purposes. This amendment, in effect, provides a standard treatment. The definition of self employment would apply for all Federal taxes to all fishermen. I urge its adoption.

Mr. SYMMS. The next amendment listed on the agenda as No. 10 is Senator PACKWOOD'S, the financing of the Reforestation Trust Fund.

Mr. President, under present law, the Reforestation Trust Fund is funded by tariffs on imported plywood and lumber. Under the amendment, effective January 1, 1983, in place of the tariffs, the trust fund would be funded by up to $30 million of revenues derived from the sale of timber and forest products on Federal lands.

Mr. METZENBAUM. Mr. President, would the Senator be good enough to repeat what this amendment on the timber does?

Mr. SYMMS. This amendment on the timber, Mr. President—first, I say to my friend from Ohio, under the present law, the Reforestation Trust Fund is funded by tariffs.

Mr. METZENBAUM. This is the matter of shifting the funds to the Reforestation Trust Fund?

Mr. SYMMS. That is correct.

Mr. METZENBAUM. I have no objection, Mr. President.

Mr. SYMMS. The next amendment is listed as No. 13 on the committee agenda, trade adjustment assistance.

Mr. President, under the changes to this program made in the Omnibus Budget Reconciliation Act the causation standard was changed to be a "substantial cause" standard—a cause which is important and not less than any other cause—effective February 9, 1982. The committee amendment to the Trade Adjustment Assistance Act would provide that the "contribute importantly" causation standard currently in the law be maintained through the life of the program, the end of fiscal year 1983.

Mr. PROXMIRE. Will the Senator yield?

Mr. SYMMS. Mr. President, I am happy to yield to my friend from Wisconsin.

Mr. PROXMIRE. On this amendment, Mr. President, the information I have says that the Congressional Budget Office, the staff of CBO can make no estimate of the cost of this change. If they cannot make an estimate, how do we know whether this will cost a substantial amount? Is there any way we can make a judgment on the loss to the Treasury?

Mr. SYMMS. Mr. President, it is my understanding that there is virtually no way of estimating what the cost would be. It may be higher or it may be lower.

Mr. PROXMIRE. Can they not give us some kind of top or bottom limits within which the losses would be likely to fall?

Mr. SYMMS. I say to the distinguished Senator from Wisconsin that the change was made in the reconciliation bill. At that time, they could not give us the cost estimate. It is my understanding that they still have not been able to.

Mr. PROXMIRE. Mr. President, is there any indication of who would benefit primarily from this change in the law?

Mr. SYMMS. No, there is not, Mr. President.

Mr. PROXMIRE. Mr. President, would the effect be general?

Mr. SYMMS. I see the distinguished chairman of the committee is on the floor. Maybe he will want to comment.

Mr. DOLE. Mr. President, I might say to the Senator from Wisconsin that this amendment was offered by Senator DANFORTH and Senator MOYNIHAN. We concluded that whether it is "substantial cause" or "contribute importantly" really makes little difference because of the changes which have already been made in the trade adjustment assistance program. This amendment is primarily supported by the AFL–CIO and the United Auto Workers. It is at their urging that we have considered the amendment. I do not think there is any revenue cost. When the Congressional Budget Office requested to the Committee on Finance on this provision when we were considering it during the reconciliation process they stated that:

No budgetary impact is shown for this provision because of the complete absence of data relating to the alternative certification standard. Moreover, Department of Labor (DOL) personnel have no impressionistic studies of the impact of such a proposal. In any case, due to the proposed requirement that individuals exhaust their UI benefits before being eligible for TAA, the proposal's impact would be miniscule.

Mr. SYMMS. I thank the distinguished Senator from Kansas.

Mr. President, I ask unanimous consent that a more detailed technical explanation of the committee amendment be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TECHNICAL EXPLANATION OF COMMITTEE AMENDMENT

A. INCOME TAX PROVISIONS

1. Deferral of LIFO recapture effective date

(Sec. 101 of the amendment and secs. 336 and 337 of the Code).

Present law

Inventories

In calculating taxable income for the year, the determination of year-end inventories is necessary in order to compute the cost of goods sold during the year. The computation of the cost of goods sold is made by adding the cost of goods on hand at the beginning of the year to the cost of purchases made during the year and subtracting the cost of goods on hand at the end of the year. The resulting cost is the cost of goods that were disposed of during the year and are presumed sold.

The cost of the ending inventory determined by actually counting the goods on hand at the end of the year and then assigning a value to those goods. The method of assigning a value to the ending inventory is extremely important because a high value assigned to the ending inventory will result in a low cost of goods sold and thus a high taxable income. Conversely, a low value assigned to the ending inventory will result in a high cost of goods sold and a low taxable income.

There are several methods that can be used to assign a value to ending inventories. The first-in, first-out ("FIFO") method presumes that the earliest acquired goods are sold first and that the ending inventory consists of the most recent purchases. The last-in, first-out ("LIFO") method presumes that the goods most recently purchased are sold first and that the ending inventory consists of the earliest acquired goods. Other inventory methods are the average cost method, where the cost of all goods owned during the year are averaged, and the specific identification method, where the individual price of each item in inventory is determined.

Typically, in times of rising prices the LIFO method of accounting for inventories results in the lowest taxable income whereas use of the FIFO method generally results in the highest taxable income.

Liquidation rules

Under present law, gain or loss is generally not recognized to a liquidating corporation on the exchange of its assets for the stock held by its shareholder (Code sec. 333). Additionally, under section 337, a corporation which adopts a plan of complete liquidation and sells its assets within 12 months from the date such plan was adopted, also will not recognize gain or loss on the disposition of its assets.

(The nonrecognition rule of sec. 337 applies to the sale of inventory only if the inventory is sold in bulk rather than piecemeal.)

There are several exceptions to the nonrecognition rules of sections 336 and 337. These exceptions include recapture of depreciation (secs. 1245 and 1250), certain mining exploration expenditures (sec. 617), excess deduction accounts with respect to certain farm property (sec. 1251), certain deductions with respect to farm land (sec. 1252), and certain intangible drilling and development costs with respect to oil and gas properties (sec. 1254). In general, under these provisions, part or all of the deductions previously taken would be included in income upon liquidation.

In either a section 336 or section 337 liquidation, if the liquidating corporation uses LIFO, any gain attributable to the corporation's LIFO reserve (i.e., the excess of the inventory's LIFO basis over its LIFO basis) will not be subject to corporate tax. However, if a subsidiary corporation liquidates into a parent corporation and the adjusted basis of the subsidiary's assets, including inventory, carry over to the parent corporation, the LIFO reserve will be subject to corporate taxation only if the inventory is disposed of in a taxable sale or exchange. Also, if a corporation makes a nonliquidating distribution of LIFO inventory, it is required to include the inventory's LIFO reserve in income in the year the distribution is made (sec. 311(b)).

In Rev. Rul. 74-431, 1974-2 C.B. 107, the Internal Revenue Service held that a corporation liquidating under section 337 did not recognize income in the amount of its LIFO reserve under the tax benefit rule. The ruling held that the use of LIFO does not create a deduction that can be recovered.

The IRS has also issued private rulings which held that there was no recognition of the LIFO reserve under the tax benefit rule on a section 336 liquidation. However, these private rulings did provide a caveat that the Service was reconsidering its position regarding the recognition of the LIFO reserve.

Although a liquidating corporation does not recognize gain (other than certain items of recapture) on the disposition of any of its assets (including inventory) under a section 336 or section 337 liquidation, the shareholder of the corporation generally recognizes gain on the disposition of the stock in the liquidating corporation. The shareholder recognizes gain equal to the excess of the amount received for the stock over his adjusted basis in the stock. Generally this gain is taxed as capital gain. Thus, with respect to a corporate liquidation, the general rule has been that there will only be a capital gain tax at the shareholder level and there will be no tax at the corporate level.

LIFO Reserve Recapture

In the Crude Oil Windfall Profit Tax Act of 1980 (Public Law 96-223), Congress included a provision which required that a corporation which distributes its LIFO inventory in a partial or complete liquidation must recognize the inventory's LIFO reserve as ordinary income (sec. 336). Also, a corporation that sells its LIFO inventory in the course of a 12-month liquidation (sec. 337) must recognize the inventory's LIFO reserve as ordinary income. The provision does not require the recognition of the LIFO reserve on corporate liquidations where the adjusted basis of the LIFO inventory in the hands of the acquiring corporation is carried over from the liquidating corporation.

Congress believed that the LIFO reserve of a corporation's inventory should be subject to a tax upon a corporate liquidation unless the LIFO reserve is preserved in the corporation's inventory by virtue of a carryover basis. Otherwise, corporations could convert the tax deferral provided by LIFO into an outright exclusion from tax.

This provision was made applicable to distributions and dispositions which are made pursuant to plans of liquidation adopted after December 31, 1981. The effective date was postponed to allow time for Congressional hearings on the provision. Also, the delayed effective date would permit transactions in the planning stage to be completed.

Reasons for Change

Hearings on the substantive effect of the LIFO recapture provisions were not held prior to the December 31, 1981, effective date. Therefore, the committee believes that the effective date of these provisions should be delayed for one additional year, to December 31, 1982, to allow the committee time to review the impact of the provisions.

Explanation of Provision

The committee amendment defers for one year (i.e., to December 31, 1982) the effective date of the provisions in the Crude Oil Windfall Profit Tax Act which require the recapture of LIFO reserves in certain corporate liquidations.

Effective Date

The amendment will be effective on enactment.

Revenue Effect

The amendment is estimated to reduce fiscal year budget receipts by $15 million in 1982, $260 million in 1983, and by a negligible amount thereafter.

2. *Net operating loss treatment of the Federal National Mortgage Association*

(Sec. 102 of the amendment and sec. 172 of the Code):

Present Law

Prior to enactment of the Economic Recovery Tax Act of 1981, taxpayers could carry back a business net operating loss (NOL) against income for the 3 taxable years preceding the loss year and carry forward any remaining unused losses to the 7 years following the loss year (sec. 172). The 1981 Act generally increased the carryover period to 15 years and retained the 3-year carryback.

There are a number of exceptions to the general 3-year carryback and 15-year carryover rule for certain industries or categories of taxpayers. One exception allows a 10-year carryback and a 5-year carryover for NOL's of financial institutions to which section 585, 586, or 593 (relating to the bad debt treatment of commercial banks, small business investment corporations, and savings and loan associations and certain other thrift institutions, respectively) applies (sec. 172(b)(1)(F)).

Since the Federal National Mortgage Association (FNMA) is not described in section 585, 586, or 593, it is not eligible for the 10-year carryover treatment, and thus must use a 3-year carryback and a 15-year carryover. The FNMA is a corporation chartered by Congress to provide assistance, liquidity, and stability to the home mortgage market.[1]

Reasons for Change

The FNMA typically provides a secondary market for mortgages by borrowing on a short-term basis and investing in long-term mortgages. In this respect, the FNMA operates similarly to certain of the financial institutions which are eligible for the 10-year carryback of net operating losses.

The committee believes that operating losses which are involuntarily incurred by the FNMA should receive 10-year carryback and 5-year carryforward periods similar to the rule that applies to certain other financial institutions. Accordingly, the committee believes that, with respect to the portion of an NOL of the FNMA which consists of net losses from the sale or exchange of mortgages, securities, and other evidences of indebtedness as distinguishable from normal operating losses incurred by the FNMA, the present law 3-year carryback and 15-year carryforward periods should continue to apply to the extent that an NOL consists of such losses.

Explanation of Provision

The committee amendment amends section 172(b) to provide a 10-year carryback and a 5-year carryover of that portion of an NOL of the FNMA which is in excess of the FNMA mortgage disposition loss (hereafter called the "nondisposition loss"). The FNMA mortgage disposition loss is the excess of losses over gains from the sale or exchange of mortgages, securities, and other evidence of indebtedness to the extent that such excess is not greater than the NOL for the taxable year in which the excess occurs. The FNMA mortgage disposition loss will continue to be carried back 3 years and carried forward 15 years as under existing law. The 10-year carryback and 5-year carryforward periods will be applicable only to the nondisposition loss. Gains and losses attributable to mortgage forceclosures will not be taken into account in determining the amount of a FNMA mortgage disposition loss. For this purpose, securities do not include stock.

The order in which the portions of an NOL consisting of both an FNMA mortgage disposition loss and nondisposition loss will be absorbed will be determined under provisions similar to those of existing law that apply when a net operating loss consists in part of a foreign expropriation loss which, under existing law, has a different carryover period from the remainder of the loss. In determining the extent to which a nondisposition loss is absorbed by taxable income under these rules, the FNMA mortgage disposition loss will not reduce taxable income of any taxable year to which such loss may not be carried. In years to which both portions of an NOL are carried, the FNMA mortgage disposition loss and the nondisposition loss will each be treated as separate NOL's incurred in the same taxable year. Thus, the FNMA mortgage disposition loss is to be applied against taxable income after reduction by any nondisposition loss. Under this rule, the FNMA mortgage disposition loss will be preserved for carryover to years after the expiration of the 5-year carryfoward period applicable to the nondisposition loss if the total NOL had not been fully absorbed by taxable income.

Effective Date

The amendment is effective for NOL's for taxable years of the FNMA beginning after December 31, 1981. Thus, for example, an NOL for calendar year 1982 in excess of the FNMA mortgage disposition loss could be carried back as far as 1972.

---

[1] The FNMA serves two related functions. First, it helps housing by providing a secondary market for mortgages. Also, where mortgage bankers are concerned, FNMA generally functions as a primary source of financing, since mortgage bankers are not depository institutions and generally make loans only if they have commitments from FNMA or other purchasers to buy them.

The FNMA also offers mortgage lenders a way to hedge against changes in interest rates. It does this by making commitments to buy mortgages at a fixed price 4 months in the future.

Revenue Effect

Given expected interest rate levels for future years, the amendment is estimated to reduce fiscal year budget receipts by $14 million in 1983 and to increase fiscal year budget receipts by $14 million in 1984.

3. Treatment of certain lending or finance businesses for purposes of the tax on personal holding companies

(Sec. 103 of the amendment and sec. 542 of the Code):

Present Law

In general

Section 541 of the Code imposes a tax on the undistributed personal holding company income of a personal holding company. This provision is intended to prevent individuals from avoiding the graduated individual tax rates (up to 70 percent before the effective date of the Economic Recovery Tax Act of 1981 (ERTA)) by holding investments through corporations, which are subject to a maximum tax rate of 46 percent. Prior to the effective date of ERTA, undistributed personal holding company income was subject to a 70 percent tax rate. However, pursuant to section 101(d)(2) of ERTA, the applicable tax rate is 50 percent for taxable years beginning after December 31, 1981.

A corporation constitutes a personal holding company if 60 percent of its adjusted gross income is personal holding company income and if 50 percent of its stock is owned by five or fewer shareholders at any time during the last half of the taxable year. Personal holding company income generally is defined as interest, dividends, royalties, rents, and certain other types of passive investment income.

Exclusion for lending or finance companies

Certain types of corporations, actively engaged in a trade or business which produces income that usually would be considered passive investment income, are excluded from the personal holding company tax provisions. Among the corporations excluded from these provisions are lending or finance companies.

A corporation qualifies as a lending or finance company if 60 percent of its ordinary gross income is derived from the active and regular conduct of a lending or finance business and certain other requirements are satisfied. The term "lending or finance business" is defined, in part, to mean a business of making loans, or purchasing or discounting accounts receivable, notes, or installment obligations, which at the date of the loan or acquisition have a remaining maturity of no more than 60 months. An exception to the 60-month rule is provided for loans, notes, or obligations secured by a security interest in personal property where the security interest arose out of the sale of goods or services in the course of the borrower's or transferor's trade or business.

The personal holding company provisions also apply a business expense test in determining whether a corporation is engaged in the active and regular conduct of a lending or finance business. Under this requirement, a corporation does not qualify as a lending or finance company exempt from the personal holding company provision unless the sum of its business expenses[1] directly allocable to its lending or finance business equals or exceeds 15 percent of the first $500,000 of its ordinary gross income derived from a lending or finance business plus five percent of such ordinary gross income from $500,000 to $1 million.[2]

Reasons for Change

The committee has been informed that the nature of the loans made by lending or finance companies has changed since 1964 (when the rules relating to lending or finance companies were last amended). First, some companies have been making loans of longer maturities, including second mortgages on real estate and also financing mobile homes. Some of these loans have maturities of up to 144 months. Notwithstanding the length of the loans, the making of these loans by these companies is often done not as part of an investment activity, but rather as part of the active conduct of a trade or business. Second, these companies have made increasing use of loans made in indefinite maturity transactions (e.g. revolving credit loans) which technically may have a maturity which does not meet the "no more than 60 months" requirement. Furthermore, due to the passage of time, the maximum amount needed to satisfy the business expense test has become outdated.

Accordingly, the committee believes that the definition of the term "lending or finance" business should be modified to include the business of making revolving credit loans and loans with maximum maturities of 144 months and that the business expense test of present law should be modified by increasing the maximum amount needed to satisfy the test.

Explanation of Provision

The committee amendment modifies both the 60-month maturity limitation and the business expense requirement of the lending or finance company exception to the present personal holding company provisions.

The amendment broadens the definition of a lending or finance business to include the business of making or acquiring loans with maturities of up to 144 months and to include the business of making or acquiring loans, notes, or installment obligations made in indefinite maturity credit transactions. Indefinite maturity credit transactions qualifying under the amendment are such loans, notes, or installment obligations made under an agreement which provides that the creditor will make loans or advances (not in excess of an agreed upon maximum amount) from time to time for the account of the debtor upon request and which provides that the debtor may repay the loan, or advance, in full or in installments. Thus, under the amendment, the definition of a lending or finance business includes the business of making or acquiring agreements which underlie indefinite maturity credit transactions such as line-of-credit transactions or revolving credit arrangements.

The amendment also modifies the amount of business expenses required in determining whether a corporation with more than $1 million in ordinary gross income from a lending or finance business is a lending or finance company. Under the amendment, a corporation satisfies the business expense test only if its qualifying business expenses equal or exceed 15 percent of the first $500,000 of ordinary gross income derived from a lending or finance business, plus five percent of such ordinary gross income in excess of $500,000.

Effective Date

The provisions of the amendment which expand the definition of a lending or finance business to include the business of making or acquiring loans with maturities of up to 144 months and the business of making or acquiring notes made in indefinite maturity credit transactions apply with respect to taxable years beginning after December 31, 1980.

The provisions revising the business expense test apply with respect to taxable years beginning after December 31, 1981.

Revenue Effect

The amendment is estimated to reduce budget receipts by less than $5 million annually.

4. Allowance of regulated investment company status to certain business development companies

(Sec. 104 of the amendment and sec. 851 of the Code):

Present Law

Under present law, a regulated investment company (commonly called a "mutual fund" or "money market fund") is treated, in essence, as a conduit for tax purposes. This treatment is achieved by allowing a regulated investment company a deduction for dividends paid to its shareholders. Congress provided conduit treatment for regulated investment companies so that small investors could obtain the advantages of a diversified portfolio of investments and expert investment management without the imposition of a second level of tax generally applicable to corporations.

In order to qualify as a regulated investment company, several requirements must be met. First, the company must distribute at least 90 percent of its income. Second, the company must meet several tests designed to insure that most of its income is from passive sources and that its assets are diversified. Third, a regulated investment company must be a domestic corporation other than a personal holding company. Finally, if either must be registered with the Securities and Exchange Commission at all times during the taxable year as a management company or unit investment trust under the Investment Company Act of 1940, or it must be a common trust fund or similar fund which is not included in the term "common trust fund" under the Internal Revenue Code and which is excluded by the Investment Company Act from a definition of investment company (Code sec. 851(a)). In order to register under the Investment Company Act of 1940, a corporation must have at least 100 stockholders or must be making or presently proposing to make a public offering (the "public offering requirement").

Under these rules, a number of companies that provide capital and managerial assistance to small businesses have been able to register under the Investment Company Act because they have at least 100 stockholders or satisfy the public offering requirement and, as a result of this registration, have qualified as regulated investment companies.

Under the Small Business Incentive Act of 1980 (P.L. 96-477), certain investment companies providing capital and management assistance to small businesses (called "business development companies") may elect an alternative form of regulation specifically designed for these types of organizations in lieu of registering under the Investment Company Act. However, any business development company electing this alternative form of regulation would be prevented from qualifying as a regulated investment company because the company did not register under the Investment Company Act.

Reasons for Change

The committee believes that those business development companies that were eligible to be treated as regulated investment companies because they could register as an investment company under the Investment Company Act of 1940 should be able to continue their status as regulated investment companies even though they elected the alternative form of regulation provided by the Small Business Incentive Act of 1980. This change will allow those companies that presently qualify as regulated investment companies to elect the

[1] Business expenses include only (1) deductions which are allowable only by reason of sections 162 or 404 and which do not represent compensation for personal services rendered by shareholders or members of their families and (2) deductions for depreciation and real property taxes to the extent that the property with respect to which such deductions are allowable is used directly in the active and regular conduct of the lending or finance business (sec. 542(d)(2)).

[2] Thus, the maximum amount of expenses necessary to meet this test is $100,000 (15 percent of $500,000 or $75,000 plus 5 percent of $500,000 or $25,000, for a total of $100,000).

alternative form of regulation provided by Congress without loss of their present tax status.

Explanation of Provision

The committee amendment enables a "business development company" electing the alternative form of regulation under the Small Business Incentive Company Act of 1980 to qualify as a regulated investment company in those cases where the company could qualify for registration under the Investment Company Act of 1940. Thus, only companies which have at least 100 stockholders or which satisfy the public offering requirement can qualify as regulated investment companies.

Effective Date

The amendment applies with respect to taxable years ending after the date of enactment.

Revenue Effect

The amendment will not have any effect on budget receipts.

5. Rollover of gain on FCC-ordered disposition of broadcast property

(Sec. 105 of the amendment and sec. 1071 of the Code):

Present Law

Present Code section 1071 provides for nonrecognition gain realized on the sale or exchange of property (including stock in a corporation) if (1) the sale or exchange is certified by the Federal Communications Commission (FCC) as necessary or appropriate to effectuate a change in a policy of, or the adoption of a new policy by the FCC with respect to the ownership and control of "radio broadcasting stations," and (2) if the taxpayer elects to treat the sale or exchange as an involuntary conversion within the meaning of section 1033. Pursuant to such an election, gain is not recognized to the extent that the taxpayers purchases replacement property that is similar or related in service or use to the property sold or exchanged (sec. 1033(a)). To the extent section 1033 is inapplicable to render any gain realized on the sale or exchange nontaxable, the taxpayer may nonetheless avoid recognition of that gain to the extent the taxpayer elects to reduce the adjusted basis of depreciable property held at the time of the sale or exchange or acquired before the end of the taxable year of the sale or exchange.

In Rev. Rul. 78–269, 1978–2 C.B. 210, the Internal Revenue Service held that gain is not recognized under sections 1071 and 1033 when a corporation divests itself, pursuant to an FCC order and certification of stock in a newspaper publishing company, and reinvests in stock of a television broadcasting station. In a later private letter ruling, the Service held that gain must be recognized when a corporation, pursuant to an FCC order and certification, divests itself of a television station and reinvests in a newspaper. In the private letter ruling, the Service distinguished its holding in Rev. Rul. 78–269 on the basis that a reinvestment in a newspaper did not constitute an investment in broadcast property within the meaning of section 1071 or in any property similar or related in service or use to the television station sold or exchanged.

Under present law, the FCC may order a taxpayer who owns multiple communication properties—for example, two television stations, a television station and a radio station, or a television station and a newspaper—within the same broadcast area to dispose of all but one of the properties. The FCC generally does not order the taxpayer to dispose of a particular property within the area of its multiple broadcast ownership. Rather, the taxpayer generally may decide which property is sold or exchanged pursuant to such an FCC order.

Reasons for Change

The committee believes that it is inappropriate to distinguish between an FCC-ordered divestiture of, for example, a newspaper followed by the divesting taxpayer's acquisition of a radio or television station, which would be qualified for treatment under current section 1071, and an FCC-ordered divestiture of a radio station followed by an acquisition by the taxpayer of a newspaper, which would not qualify under section 1971 as currently interpreted by the Treasury. Although the statute does not refer to businesses other than radio broadcasting, this distinction appears to result from the fact that the statute was enacted prior to the emergence of television as a major communications medium and at a time when the FCC was primarily concerned with radio stations and not newspapers or television.

Explanation of Provision

The committee amendment expands section 1071 to provide nonrecognition of gain in FCC-ordered divestitures where the taxpayer reinvests in a newspaper. Thus, in the second sentence of section 1071(a) the amendment inserts "radio or television broadcasting station or newspaper" in place of the phrase "radio broadcasting station." The amendment also makes a technical change to section 1071 by amending the first sentence of that section to refer to FCC-ordered dispositions of television broadcasting stations as well as radio broadcasting stations. The amendment's references to television broadcasting stations are not intended, however, to limit the coverage of the section only to radio or television stations. For example, radio broadcasting has been defined by the regulations to include "telecasting." It is intended under the amendment that the Treasury should continue to interpret section 1071 so that appropriate relief is provided to those taxpayers making FCC-ordered divestitures accompanied by reinvestments, pursuant to section 1033, in property (including stock in a corporation) similar or related in service or use to that disposed of.

Effective Date

The amendment applies to any sale or exchange of property with respect to which there is a Federal Communications Commission certification described in code section 1071(a) but only if the taxpayer has reinvested the proceeds in, or exchanged such property for, other qualifying property after June 24, 1981.

Revenue Effect

The amendment is estimated to reduce budget receipts by less than $10 million annually.

6. Exclusion of certain research expenses from capital expenditure limitation on interest exemption for small issue IDBs

(Sec. 106 of the amendment and sec. 103(b)(6) of the code):

Present Law

Industrial development bonds

Interest on State and local government obligations generally is exempt from Federal income tax (Code sec. 103(a)). However, subject to certain exceptions, interest on State and local issues of industrial development bonds is taxable (sec. 103(b)). An obligation constitutes an industrial development bond if (1) all or a major portion of the proceeds of the issue are to be used in any trade or business of a person other than a governmental unit or tax-exempt organization and (2) payment of principal or interest is secured by an interest in, or derived from payments with respect to, property or borrowed money used in a trade or business (sec. 103(b)(2)).

Present law provides an exception for certain "small issues" to the general rule of taxability of interest paid on industrial development bonds (sec. 103(b)(6)). This exception applies to issues of $1 million or less if the proceeds are used for the acquisition, construction, or improvement of land or depreciable property.

At the election of the issuer, the $1 million limitation may be increased to $10 million. If this election is made, the exception is restricted to projects where the aggregate amount of outstanding exempt small issues and capital expenditures (financed otherwise than out of the proceeds of an exempt small issue) made over a six-year period [1] does not exceed $10 million. The combined issue amount/capital expenditure limitation of $10 million has the effect of precluding availability of an interest exemption where industrial development bonds would have a face amount not exceeding the $10 million limitation but would be used in connection with large scale, high cost projects.

Both the $1 million and $10 million limitations are determined by aggregating the face amount of all outstanding related issues, plus, in the case of the $10 million limitation, certain capital expenditures for all facilities used by the same or related principal users which are located within the same county or same incorporated municipality. Under Treasury regulations, expenditures are treated as capital expenditures for this purpose if they are properly chargeable to the capital account of any person or State or local governmental unit. This determination is to be made without regard to any rule of the Internal Revenue Code that permits expenditures properly chargeable to capital account to be treated as current expenses (Reg. § 1.103–10(b)(2)(ii)(e)).

Treatment of research expenditures

As a general rule, business expenditures to develop or create an asset which has a useful life that extends substantially beyond the taxable year must be capitalized and cannot be deducted in the year paid or incurred. For example, research expenditures to develop a new consumer product must be capitalized, because such expenditures relate to an asset which will have a useful life exceeding one year. Such capital costs usually may be recovered on a disposition or abandonment of the asset, or through depreciation or amortization deductions over the useful life of the asset.

However, present law permits a taxpayer to elect to deduct currently the amount of research or experimental expenditures incurred in connection with the taxpayer's trade or business, even if such expenses are treated as capital account charges or deferred expenses on the taxpayer's books or financial statements (sec. 174(a); Rev. Rul. 58–78, 1958–1 C.B. 148). In the case of research expenditures resulting in property which does not have a determinable useful life (such as secret processes or formulae), the taxpayer alternatively may elect to deduct the costs ratably over a period of not less than 60 months (sec. 174(b)).[2]

---

[1] The relevant six-year period beginning three years before the date of the issue and ending three years after that date.

[2] If expenditures relating to development of a product are not eligible for these elections or if the taxpayer chooses not to elect either current deduction or amortization for qualifying research costs, such expenditures must be capitalized. If the capitalized expenses relate to depreciable property, deductions may be taken in the form of depreciation allowances spread over the property's useful life. If the capitalized expenses relate to nondepreciable property, those costs cannot be recovered until disposition or abandonment of the property.

Because research expenditures constitute capital expenditures, such expenses are taken into account for purposes of determining whether the exempt small issue limitation of $10 million is exceeded, whether or not the taxpayer elects to deduct its research expenses currently or to amortize them over a period of 60 months or more (Rev. Rul. 77-27, 1977-1 C.B. 23).

In addition to the favorable deduction treatment provided under Code section 174 for research expenditures, the Economic Recovery Tax Act of 1981 provides a 25-percent tax credit for certain research expenditures paid in carrying on a trade or business of the taxpayer to the extent exceeding the amount of such expenditures during a base period (Code sec. 44F).

Reasons for Change

The committee believes that expenditures for research should be encouraged. For example, the Economic Recovery Tax Act of 1981 provides a new 25-percent tax credit for certain research expenditures (Code sec. 44F). The committee also recognizes the difficulty in allocating certain expenditures for research among the assets such expenditures benefit. This difficulty particularly arises where some such expenditures benefit both facilities where capital expenditures are counted toward the $10 million limitation as well as facilities where expenditures are not counted toward the limit. Thus, the committee believes that certain research expenditures, specifically those which are incurred for research wages and research supplies (and which are deducted currently by a taxpayer) should not be considered for purposes of the capital expenditure limitation on small issue industrial development bonds.

Explanation of Provision

Under the committee amendment, expenditures for research wages and research supplies (as defined in secs. 44F(b)(2)(A)(i) or (ii)) which the taxpayer elects to deduct currently (under sec. 174(a)) are not taken into account for purposes of the $10 million capital expenditure limitation on small issue industrial development bonds.

Effective Date

The amendment applies to research expenditures made after the date of enactment of the amendment.

Revenue Effect

The amendment is estimated to reduce fiscal year budget receipts by $1 million in 1982, $4 million in 1983, $8 million in 1984, $13 million in 1985, and $18 million in 1986.

7. Expanion of oil shale credits for 1981 and 1982

(Sec. 107 of the amendment and sec. 48(1) of the Code):

Present Law

Equipment for producing, extracting, processing, transporting, and refining shale oil generally qualifies for the 10-percent investment tax credit (Code sec. 48(a)(1)). In addition, the Energy Tax Act of 1978 provided a 10-percent energy investment tax credit for certain "shale oil equipment" (Code sec. 48(1)(7)). For this purpose, the term "shale oil equipment" means equipment for producing or extracting shale oil from oil-bearing shale rock. The term, however, specifically excludes equipment for hydrogenation, refining, and other processes subsequent to retorting. The term "shale oil equipment" includes qualifying equipment without regard to whether it is used in an above-ground or *in situ* process. In the latter instance, shale oil equipment includes equipment used to create the underground cavity. In either case, equipment for supplying water and for treating and handling spent oil shale rock is included in the definition of shale oil equipment.

The energy investment credit generally is available for the acquisition or construction of property through December 31, 1982. In addition, the energy investment credit for shale oil equipment is available after 1982 and before 1991 if the following specified affirmative commitments are undertaken with respect to qualified property that involves long-term projects of two years or more: (1) complete all engineering studies for the project, and apply for all Federal, State, and local environmental and construction permits necessary for commencement of construction, prior to 1983 and (2) binding contracts have been made prior to 1986 to acquire or construct at least 50 percent of all equipment that is especially designed for the project (sec. 46(a)(2)(C)(iii)).

Under present law, there are several other benefits available for oil shale production. A deduction for percentage depletion is allowed for 15 percent of the gross income from the extraction of shale oil. (Gross income, for this purpose, is based on the value of the oil after retorting but before hydrogenation.) Shale oil producers are allowed an income tax credit for the production of shale oil (Code sec. 44D(c)(1)(A)). The credit is equal to $3 a barrel, and phases out as the annual average wellhead price of uncontrolled domestic oil rises from $23.50 to $29.50 a barrel. (Both the credit and the phaseout adjusted for inflation occurring after 1979, and the credit will be about 75 cents per barrel for shale oil produced in 1981.)

Reasons for Change

The committee understands that hydrogenation is a post-retort process necessary to upgrade viscous hydrocarbons extracted from the oil shale into pipeline quality liquids. The committee also understands that a hydrogenation process is a component of refining. The committee believes that the energy credit should apply to the extent hydrogenation equipment is used to make shale oil less viscous so that it may be transported, but that no credit should be allowed for any equipment used for refining; including hydrogenation equipment.

Explanation of Provision

The committee amendment extends the definition of shale oil equipment for purposes of the energy investment tax credit to include equipment used in hydrogenation or other similar processes subsequent to retorting that are necessary to bring about the chemical change in the hydrocarbons necessary to make the shale oil less viscous so that it may be transported to the refinery. However, the amendment does not expand the definition of shale oil equipment to include equipment, including hydrogenation equipment, used to refine shale oil.

Effective Date

The provisions of the amendment apply to periods beginning after December 31, 1980, and before January 1, 1983. The special affirmation commitment rule applicable to other oil shale property eligible for the energy credit under present law does not apply to hydrogenation equipment eligible under this proposal. Thus, the credit for hydrogenation equipment will not apply to any construction or acquisitions after December 31, 1982.

Revenue Effect

The amendment is estimated to reduce fiscal year budget receipts by $10 million in 1982, $9 million in 1983, and less than $5 million in 1984.

8. Modification of the residential energy tax credit subsidized financing rules

(Sec. 108 of the amendment and sec. 44c (10) of the code):

Present Law

Present law provides a residential energy tax credit equal to the sum of the energy conservation credit plus the renewable energy source credit.

Credit for Energy Conservation Expenditures

Under present law, a nonrefundable credit equal to 15 percent of the first $2,000 of energy conservation expenditures (i.e., a maximum credit of $300) is available for installations of eligible insulation and other energy conserving items. To be eligible for the credit, the expenditure must be made in, or on, the taxpayer's principal residence before January 1, 1986. The residence must have been in existence or substantially completed on April 19, 1977. The maximum limit on allowable expenditures is the total amount available to the taxpayer for any principal residence through December 31, 1985. For any year, this limit is reduced by expenditures for which the energy conservation credit was taken in prior years by the taxpayer for the same residence.

The credit is allowed for expenditures to install (1) insulation, (2) a replacement burner for an oil- or gas-fired furnace, (3) a device to modify flue openings, (4) an electrical or mechanical furnace ignition system, (5) a storm or thermal door or window, (6) an automatic setback thermostat, (7) caulking or weather-stripping for an exterior door or window, (8) a meter that displays the cost of energy use, and other items which the Secretary of the Treasury specifies by regulations as increasing the energy efficiency of the dwelling.

Credit for Renewable Energy Source Expenditures

Present law provides a tax credit equal to 40 percent of the first $10,000 of qualified renewable energy source expenditures (i.e., a maximum credit of $4,000). Qualified expenditures include:

(1) The installation of solar, wind, or geothermal energy equipment;

(2) Expenditures for equipment to produce electrical energy from solar or geothermal energy source property installed with respect to a residence;

(3) Expenditures for labor costs properly allocable to the onsite preparation, assembly or original installation of renewable energy source property eligible for the credit and expenditures for an onsite well drilled for any geothermal deposit, unless the deduction for intangible drilling costs has been claimed for any portion of these expenditures; and

(4) The cost of a solar roof panel installed as a roof (or a portion of a roof) even though a roof by itself is a structural component. Renewable energy source property does not include other structural components of a residence even though they also may play an ancillary role related to renewable energy source property.

Rules to Prevent Double Benefits

Under present law, expenditures financed by Federal, State or local grants which are exempt from Federal income tax are not eligible for the residential energy tax credit. Further, any portion of qualified expenditures financed by subsidized energy financing is not eligible for the credit. Lastly, the expenditure limits for energy conservation expenditures ($2,000) and for renewable energy source expenditures ($10,000) are reduced by the portion of expenditures which is financed by subsidized energy financing or by nontaxable Federal, State or local government grants.

Subsidized energy financing means financing provided under a Federal, State or local government program, a principal purpose of which is to provide subsidized financing for projects designed to conserve or produce energy. The term includes, but is not limited to, the direct or indirect use of bonds which are exempt from Federal income tax and which provide funds under such a program. Subsidized energy financing, however, does not include loan guarantees.

Reasons for Change

The present law "double dipping" rules are designed to preclude an individual from receiving a Federal residential energy tax credit with respect to amounts financed through tax-exempt bonds, nontaxable government grants, or subsidized energy financing. These rules do not prevent an individual from claiming individual energy tax credits for both Federal and State income tax purposes. However, where a State provides a tax credit for financial institutions which provide energy loans to individuals at below market rates rather than providing an energy tax credit to the individual, the individual taxpayer is denied the Federal tax credit because the below-market rate loan is considered subsidized energy financing. Although the committee generally believes it appropriate to preclude "double-dipping", it does not believe it appropriate to provide differing tax treatment for individuals who directly receive State income tax benefits through individual energy tax credits and those who indirectly receive State income tax benefits through low interest energy loans encouraged by tax credits granted to institutions who offer such loans.

Thus, when a State provides a corporate tax credit for lending institutions which offer low interest energy loans, an individual securing such a loan should also be allowed to claim Federal residential energy tax credits.

Explanation of Provision

The committee amendment provides an exception to the definition of subsidized energy financing applicable to the residential energy credit. Specifically, subsidized energy financing will not include loans under a program which provides a State tax credit to a financial institution in order to provide residential energy loans to individuals at a below market rate of interest. Thus, an individual who receives financing under such a program will also be eligible for any applicable Federal residential energy tax credit.

Effective Date

The amendment applies to subsidized energy financing made after December 31, 1980.

Revenue Effect

The amendment is estimated to reduce fiscal year budget receipts by $5 million in 1982, $6 million in 1983, $6 million in 1984. $7 million in 1985, and $8 million in 1986.

9. Certain State judicial retirement plans

(SEC. 109 of the amendment and sec. 457 (e) of the Code):

Present Law

Under present law (Code sec. 457(a)), employees of a State or local government are permitted to defer compensation under an eligible State deferred compensation plan if the deferral does not exceed prescribed annual limits (generally the lesser of $7,500 or 33⅓ percent of includible compensation). Amounts of compensation deferred by a participant in an eligible plan, plus any income attributable to the investment of such deferred amounts, are includible in the income of the participant or the participant's beneficiary only when paid or otherwise made available under the plan. These rules also apply to the employees of a rural electric cooperative.

If a deferred compensation plan fails to meet the requirements of an eligible plan, then all compensation deferred under the plan is includible currently in income by the participants unless the amounts deferred are subject to a substantial risk of forfeiture (sec. 457(e)). If amounts deferred are subject to a substantial risk of forfeiture, then they are includable in the gross income of participants or beneficiaries in the first taxable year in which there is no substantial risk of forfeiture.

This rule for the tax treatment of participants in an ineligible plan does not apply, however, if the tax treatment of a plan participant is governed by tax rules for the plan that are set forth elsewhere in the Internal Revenue Code. For example, the rule does not apply if the ineligible plan is a tax-qualified pension plan (sec. 401(a)), a tax-sheltered annuity program (sec. 403(b)), or includes a trust forming a part of a nonqualified pension plan (sec. 402(b)).

Reasons for Change

Present law provides an annual limit on the amount of compensation which a participant can elect to defer under eligible plans which provide a retirement benefit equal to the accumulated deferrals and earnings. The committee believes it is inappropriate to apply these annual deferrals limits to State judicial retirement plans which specify a retirement benefit which does not depend on the amount of the participant's accumulated deferrals.

Explanation of Provision

Under the committee amendment, participants in a qualified State judicial plan will not be subject to the rule requiring participants in an ineligible plan to include plan benefits in gross income merely because there is no substantial risk that the benefits will be forfeited.

A State's retirement plan for the exclusive benefit of its elected or appointed judges or their beneficiaries will be a qualified State judicial plan if (1) the plan has been continuously in existence since December 31, 1978, (2) all judges eligible to benefit under the plan are required to participate and to contribute the same fixed percentage of their basic or regular rate of compensation, and (3) a judge's retirement benefit under the plan is a percentage of the compensation of judges of the State holding similar positions. Under the provision, a judge employed by a political subdivision of a State is considered to be a judge of the State.

In addition, the plan may not pay benefits with respect to a participant which exceed the limitations on benefits permitted under tax-qualified plans, and may not provide an option to plan participants as to contributions (deferrals) or benefits the exercise of which would affect the amount of the participant's currently includible compensation. Further, a State's judicial retirement plan will not be a qualified State judicial plan if judges participating in the plan are also eligible to participate, on the basis of their judicial service, in any eligible State or local deferred compensation plan.

Effective Date

The amendment applies to taxable years beginning after December 31, 1978.

Revenue Effect

The amendment is estimated to have a negligible effect on budget receipts.

B. ESTATE TAX PROVISIONS

1. Declaratory judgment for current use valuation (sec. 201 of the amendment and new sec. 7479 of the Code)

Present Law

If certain requirements are met, present law allows family farms and real property used in a closely held business to be included in a decedent's estate at the real property's current use value, rather than its full fair market value, provided that the gross estate may not be reduced by more than a specified amount (Code sec. 2032A).

If, within 10 years of the decedent's death, the property is disposed of to nonfamily members or ceases to be used for the farming or other closely held business purposes on which its value was based in the decedent's estate, all or a portion of the Federal estate tax benefits obtained by virtue of the reduced valuation are recaptured by means of a special "additional estate tax" imposed on the qualified heir. A special lien is imposed on the real property for the amount of the additional estate tax.

To compute the amount of the reduction in estate tax value from current use valuation and the maximum amount of the potential "additional estate tax," and to determine the amount of the special estate tax lien required where an estate elects current use valuation, both the current use value and the fair market value of the qualified property must be established as of the date of death. Since the issue of the fair market value of specially valued property may not affect any presently assessable amount of tax if it is the only unresolved issue in an estate, there is no opportunity for judicial review of the issue under present law unless the use valuation election is entirely disallowed.

Reasons for Change

The committee believes that judicial review of Treasury Department determinations of the fair market value of qualified property should be available without the use of valuation election being entirely disallowed.

Explanation of Provision

In general, the committee amendment provides for Tax Court review of Treasury Department determinations of the fair market value of specially valued property. The amendment permits an executor to request the Treasury Department to audit the fair market value of the specially valued property and thereby finally determine that value for all purposes. The amendment further provides that the Treasury can initiate such audits without the executor's request.

If the Treasury Department determines the fair market value of the specially valued property is different from that value as reported by the executor (either pursuant to an audit requested by the executor or an audit initiated by the Treasury), a notice of the Treasury's determination is to be sent to the executor by registered or certified mail. If the executor and the Treasury agree on the fair market value after the notice is sent, that value is binding on all parties in future actions. If the executor does not agree with the Treasury Department's determination, the executor has ninety days from the date on which notice of the Treasury's determination is sent to petition the Tax Court to review the fair market value of the property. A decision of the Tax Court is binding on all parties in future actions in which the fair market value of the specially valued property on the date of the decedent's death is at issue. The decision of the Tax Court is reviewable in the same manner as other decisions of that court. In cases where the determination is requested by the executor and the executor fails to petition the Tax Court within the ninety-day period, the value as determined by the Treasury Department is binding on all parties in any future actions where that value is an issue.

Because the fair market value of the specially valued property determines the maximum amount of the recapture tax for which a qualified heir is personally liable, the heir is granted a right to intervene in any action before the Tax Court brought by an executor.

In cases where the executor does not request the Treasury Department to determine the fair market value of specially valued property, if (1) the Treasury does not determine that the fair market value of the property is different from that value as reported by the executor on the decedent's estate tax return, within the period of limitations for assessment of estate tax or (2) the executor fails to agree to the value as determined by the Treasury Department or to petition the Tax Court within the time provided, the value as reported by the executor is not binding on the executor, the qualified heirs, or the Treasury Department in any future actions involving any matters arising under the use valuation provision, the special lien un-

der section 6324B, or with respect to the qualified heir's income tax basis in the specially valued property. If, however, the executor requests a Treasury Department determination of the fair market value of specially valued property and the Treasury fails to make that determination, that value as shown on the decedent's estate tax return is binding on all parties in any future actions in which it is an issue.

Effective Date

The amendment is effective for estates of decedents dying after December 31, 1981.

2. Declaratory judgment for installment payment of estate taxes

(Sec. 202 of the amendment and new sec. 7480 of the Code):

Present Law

For estates of decedents dying after December 31, 1981, section 422 of the Economic Recovery Tax Act of 1981 ("ERTA") combined the provisions of sections 6166 and 6166A which permit installment payment of estate tax attributable to interests in closely held businesses. New section 6166 is available to all estates in which the value of an interest in a closely held business exceeds 35 percent of the adjusted gross estate. If the estate qualifies, estate taxes attributable to interests in closely held businesses can be deferred for up to 14 years (annual interest payments for four years, followed by up to ten annual installments of principal and interest). A special four-percent interest rate applies to tax on the first $1 million of value of an interest in a closely held business (sec. 6601(j)).

Because the decision of the Treasury Department to deny an election to pay all or a portion of the estate tax atributable to interests in closely held businesses or a decision to accelerate the remaining unpaid tax involves a dispute as to the timing of estate tax payments rather than the amount of tax, no deficiency is involved and, therefore, the decision is not subject to judicial review.

Reasons for Change

Under present law, the decision of the Treasury Department to deny an election to pay all or a portion of the estate tax attributable to closely held businesses generally is not subject to judicial review because no deficiency is involved. The committee believes that taxpayers should be provided with a judicial forum to resolve disputes involving an estate's eligibility for the deferral of estate tax attributable to interests in closely held businesses.

Explanation of Provision

The committee amendment provides a procedure for obtaining a declaratory judgment with respect to (1) the extent of an estate's eligibility for installment payment of estate taxes attributable to interests in closely held businesses under section 6166, and (2) whether there is an acceleration of unpaid installments. Under this provision, for example, the Tax Court can determine whether the proprietorship, partnership, or corporation, all or part of the value of which is included in the decedent's estate, is carrying on a trade or business within the meaning of the installment payment provision.

Because this declaratory judgment procedure only applies where there is an actual controversy, no declaratory judgment will be available prior to decedent's death (with respect to eligibility for the installment payment provision) or prior to a transaction involving dispositions or withdrawals of an interest in a closely held business (with respect to whether there is an acceleration). Jurisdiction to issue a declaratory judgment is limited to the United States Tax Court and the determination of that court is final and conclusive and is not reviewable by any other court.

This remedy is available only if the petitioner (i.e., the executor of the decedent's estate) has exhausted all available administrative remedies within the Treasury Department. Thus, the executor must demonstrate that the Internal Revenue Service has acted adversely to the decedent's estate, and that he has appealed any adverse determination by a district office to the appeals division of the Internal Revenue Service, or has obtained through the District Director technical advice of the National Office. To exhaust his administrative remedies, a party must satisfy all procedural requirements of the Service.

In addition, no petition to the Tax Court may be filed after 90 days from the date on which the Secretary or his delegate sends notice to the executor of his determination as to the estate's eligibility for the installment payment provision or the occurrence of an accelerating event.

Effective Date

In the case of controversies concerning an estate's eligibility for installment payment of estate tax, the amendment applies to estates of decedents dying after December 31, 1981. In the case of controversies concerning acceleration of unpaid tax, the amendment applies to transactions occurring after December 31, 1981, as they relate to section 6166 as amended by ERTA, sections 6166 or 6166A as they existed before ERTA, or section 6166 as it existed prior to the Tax Reform Act of 1976.

3. Change to section 6156 "Second Death" provision

(Sec. 203 of the amendment and sec. 6166 of the Code):

Present Law

For estates of decedents dying after December 31, 1981, section 422 of the Economic Recovery Tax Act of 1981 ("ERTA") combined the provisions of sections 6166 and 6166A which permit installment payment of estate tax attributable to interests in closely held businesses. New section 6166 is available to all estates in which the value of an interest in a closely held business exceeds 35 percent of the adjusted gross estates. If the estate qualifies, estate taxes attributable to the interest in closely held businesses can be paid in installments over up to 14 years (annual interest payments for four years, followed by up to ten annual installments of principal and interest). A special four-percent interest rate applies to tax on the first $1 million of value of an interest in a closely held business (sec. 6601(j)).

Under section 6166, the remaining unpaid tax balance is accelerated if there is a disposition of a specified fraction of the value of a decedent's interest in the business. For purposes of the acceleration rules, the transfer of the decedent's interest in a closely held business from his estate to his heirs is not considered a disposition. This exception applies whether or not the interest passes to family members.

With respect to transfers made after December 31, 1981, ERTA provided that the transfer of an interest in a closely held business from an heir (or subsequent transferee) at his death to a family member (within the meaning of sec. 267(c)(4)) of the heir (or subsequent transferee) will not be considered a disposition.

Reasons for Change

The committee believes that the acceleration rules should not apply because of the death of an heir regardless of whether the heir's legatees are family members.

Explanation of Provision

The committee amendment further expands the exception from the acceleration rules for subsequent transfers caused by the death of an heir or subsequent transferee by eliminating the requirement that the interest in a closely held business pass to a family member of the heir or subsequent transferee. In addition, the amendment applies the rule to estate taxes deferred under sections 6166 and 6166A as those sections existed prior to their amendment by ERTA, and section 6166 as that section existed prior to its amendment by the Tax Reform Act of 1976. Thus, under the amendment, a transfer of an interest in a closely held business caused by the death of the heir (or subsequent transferee) does not result in acceleration of the unpaid tax.

Effective Date

The amendment is effective for transfers occurring after December 31, 1981.

Revenue Effect

The three estate tax provisions described above (sec. 201–203 of the amendment) are estimated to reduce budget receipts by less than $5 million annually.

C. ADMINISTRATIVE PROVISIONS

Awarding of reasonable litigation costs to taxpayer

(SEC. 301 of the amendment and new sec. 7430 and sec. 6673 of the Code):

Present Law

The Civil Rights Attorney's Fees Awards Act of 1976

The Civil Rights Attorney's Fees Awards Act of 1976 (42 U.S.C. sec. 1988) provides, in part, that in any civil action or proceeding brought by or on behalf of the United States to enforce, or charging a violation of, a provision of the Internal Revenue Code, the court in its discretion may allow the prevailing party, other than the United States, reasonable attorney's fees as part of the costs. This provision has limited applicability to tax litigation and results in very few fee awards, because the provision is limited to actions brought by or on behalf of the Federal Government (that is, to cases in which the taxpayer is the defendant). Most civil tax litigation is initiated by the taxpayer who brings suit against the Government. In the United States Tax Court, the taxpayer is the petitioner in a deficiency proceeding. In the Federal district courts and the U.S. Court of Claims, the taxpayer is the plaintiff suing the Government for a refund.

The Equal Access to Justice Act

In 1980, as part of Public Law 96–481, the Congress enacted the Equal Access to Justice Act (28 U.S.C. sec. 2412) which, in part, authorizes awards to a prevailing party, other than the United States, of fees and other expenses incurred by that party in any civil action (other than tort cases) brought by or against the United States in any court having jurisdiction of that action, unless the court finds that the position of the United States was substantially justified or that special circumstances make an award unjust. This provision applies, specifically, to cases in Federal district courts and the United States Court of Claims. However, the provision is not applicable to cases in the United States Tax Court.[1]

Because this provision applies to cases in which taxpayers are plaintiffs, and not merely to cases brought by the Government, it creates a greater potential for fee awards in tax cases than does the Civil Rights Attorney's Fees Awards Act of 1976. The provision became effective on October 1, 1981, and will continue to apply through final disposition of any action commenced before October 1, 1984. The provision repealed the applicability

[1] This is because the Equal Access to Justice Act is contained in Title 28 of the United States Code, which deals with courts created under Article III of the United States Constitution. The United States Tax Court was established under Article I of the United States Constitution.

of the Civil Rights Attorney's Fee Awards Act of 1976 to tax litigation.

Under the Equal Access to Justice Act, fees and other expenses that may be awarded to a prevailing party include the reasonable expenses of expert witnesses, the reasonable cost of any study, analysis, engineering report, test, or project which is found by the court to be necessary for the preparation of the party's case, and reasonable attorney's fees. In general, no expert witness may be compensated at a rate that exceeds the highest rate of compensation for export witnesses paid by the United States. Attorneys' fees in excess of $75 per hour may not be awarded unless the court determines that a higher fee is justified.

In general, fees and expenses may be awarded under the Act only to individuals, corporations, and sole owners of businesses satisfying limitations on their net worth and their number of employees.

Damages assessable for instituting proceedings before the Tax Court merely for delay

Under present law, if it appears to the Tax Court that proceedings before it have been instituted by a taxpayer merely for delay, then the court may award damages to the United States. Such damages may not exceed $500.

Reasons for Changes

The committee believes that taxpayers who prevail in civil tax actions should be entitled to awards for litigation costs and attorneys' fees up to $25,000 when the United States has acted unreasonably in pursuing the case. Fee awards in such tax cases will deter abusive actions or overreaching by the Internal Revenue Service and will enable individual taxpayers to vindicate their rights regardless of their economic circumstances.

Moreover, the committee is concerned because the Equal Access to Justice Act, which provides for litigation costs awards in tax cases brought in the Federal district courts and the U.S. Court of Claims, does not apply to proceedings in the U.S. Tax Court. Since most tax litigation occurs in the U.S. Tax Court, few taxpayers could obtain fee awards under that statute. In addition, the availability of awards in some courts but not in others encourages a taxpayer to choose the forum in which to pursue litigation based on whether awards of litigation costs are available. Furthermore, the committee believes that one set of rules should apply to awards of litigation costs in tax cases whether the action is brought in a U.S. district court, the Court of Claims, or the U.S. Tax Court.

Finally, the committee is concerned with the ever-increasing caseload of the Tax Court and the impact that this legislation may have on that caseload. Thus, the committee decided to limit the awarding of litigation costs to only those cases in which the government has acted unreasonably. This will reduce any incentive to avoid settlement and pursue litigation in the hope of winning an award of litigation costs. In addition, the committee decided to increase the damages, i.e., penalty, that may be assessed against a taxpayer when proceedings are instituted for delay, and to expand the circumstances under which the Tax Court may assess those damages.

Explanation of Provision

In General

The committee amendment generally provides that taxpayers who prevail in civil tax actions in which the position of the United States was unreasonable may be awarded reasonable litigation costs (including attorney's fees) up to a cap of $25,000. An award of reasonable litigation costs to the prevailing party in a civil tax action is discretionary with the court hearing the case.

Litigation costs may be awarded in civil actions or proceedings brought by or against the United States (or any agency, officer, or employee of the United States acting in his or her official capacity) in any United States court,[1] including the Tax Court, in connection with the determination, collection, or refund of any tax, interest, or penalty. Civil actions and proceedings include proceedings to enforce a summons, jeopardy assessments, wrongful levies, and interpleaders.

Thus, parties who are plaintiffs or defendants in suits in connection with the determination, collection, or refund of any tax, interest, or penalty imposed by the Internal Revenue Code may be eligible for these awards. However, under the amendment, no award can be made to the United States or to any creditor of the taxpayer. Thus, for example, awards would not be made to creditors of a taxpayer in interpleaders, wrongful levy actions, and lien priority cases.

Under the amendment, the determination of whether the position of the United States was unreasonable is to be made by the court or by agreement of the parties. While the House bill on awards of litigation costs in tax cuts implies that the taxpayer must go forward with evidence of unreasonableness, the committee has explicitly placed the burden of establishing the unreasonableness of the position of the United States on the taxpayer. The committee intends that the determination by the courts on this issue is to be made on the basis of the facts and legal precedents relating to the case as revealed in the record.

Other factors the committee believes might be taken into account in making this determination include (1) whether the government used the costs and expenses of litigation against its position to extract concessions from the taxpayer that were not justified under the circumstances of the case, (2) whether the government pursued the litigation against the taxpayer for purposes of harassment or embarrassment, or out of political motivation, and (3) such other factors as the court finds relevant. Generally, the pursuit of litigation by the government to establish a conflict among the United States Circuit Courts of Appeals would not be unreasonable.

The committee expects the courts to develop procedures or take action, by court rule or otherwise, concerning the time and manner in which taxpayers' claims for awards of litigation costs are to be made. These procedures would prevent the introduction of evidence on the question of litigation costs until after completion of the trial on the substantive tax issues. In such cases, the court may direct the parties to make further submissions to the court, setting forth the details upon which the claims for litigation costs are based, either before or after the court renders its decision in the case. If such submissions are not made or merely restate a claim based on general allegations, such claim may be dismissed without necessity of any further action.

The amount that may be awarded for litigation costs in any proceeding may not exceed $25,000. This limitation applies regardless of the number of parties to the proceeding or the number of tax years at issue. The amendment provides that actions which could have been joined or consolidated are to be treated as one action for purposes of awarding litigation costs. The committee intends that the courts will reduce the amount of any award, if the taxpayer (and other parties) pursues multiple actions when a single action could have been pursued to decide the controversy. This reduction should be made without regard to the motivation for pursuing mutliple actions.

Under the amendment, the new Code provision for awards of litigation costs is the exclusive provision for such awards (other than certain costs described in 28 U.S.C. sec. 1920) in any civil action or proceeding to which this new provision applies. Thus, taxpayers eligible for an award of litigation costs in tax actions must seek an award under new Code section 7430 and will be denied awards under the Equal Access to Justice Act (P.L. 96-481).[2]

Limitations

(a) Exhaustion of administrative remedies

The amendment provides that no award of reasonable litigation costs shall be made unless the court determines that the prevailing party has exhausted the administrative remedies available within the Internal Revenue Service. This provision of the amendment is intended to preserve the role that the administrative appeals process plays in the resolution of tax disputes by requiring taxpayers to pursue such remedies prior to litigation. A taxpayer who actively participates in and discloses all relevant information during the administrative stages of the case will be considered to have exhausted the available administration remedies. Failure to so participate and disclose information may be sufficient grounds for determining that the taxpayer has not exhausted administrative remedies and, therefore, is ineligible for an award of litigation costs. This rule will prevent taxpayers from recovering litigation costs when the litigation might have been avoided or reduced in scope through use of administrative remedies.

The committee recognizes that the exhaustion of remedies requirement may be inappropriate in some cases. For example, if a notice of deficiency is issued to a taxpayer in connection with an issue which the Internal Revenue Service has identified as one which it will litigate in all cases, then it would be inappropriate to require an administrative appeal. Therefore, taxpayers are required to exhaust available administrative remedies unless the court determines that, under the circumstances of the case, such requirement is unnecessary.

(b) Costs allocable to the United States

The amendment allows awards of reasonable litigation costs up to $25,000 only to the extent the costs are allocable to the United States and not to any other party to the action or proceeding.

(c) Excluded actions

No award for costs may be made with respect to declaratory judgment proceedings except for a proceeding involving the revocation of the determination that an organization is tax-exempt under section 501(c)(3). The excluded actions in which no awards for costs may be made include:

(1) declaratory judgments with respect to the status and classification of organizations as tax-exempt organizations, qualified charitable donees, private foundations, or private operating foundations (unless the action or proceeding involves the revocation of the determination as to the tax-exempt status of a charitable organization);

(2) declaratory judgments with respect to the initial or continuing qualification of certain retirement plans;

(3) declaratory judgments with respect to whether a transfer of property from a United States person to a foreign corporation has the avoidance of Federal income taxes as one of its principal purposes; and

(4) declaratory judgments with respect to the status of certain governmental obligations for purposes of the income tax exclusion for interest under section 103(a).

Reasonable litigation costs

The amendment provides that reasonable litigation costs include (1) court costs, such as docket fees, fees of the court reporter, and fees for printing, (2) the reasonable expenses of expert witnesses in connection with

[1] A United States court is any court described in 28 U.S.C. § 451 or the Tax Court.

[2] The bill does not affect the recovery under section 2412(a) of Title 28 of the court costs enumerated in 28 U.S.C. 1920, as in effect on October 1, 1981.

the civil proceeding, (3) the reasonable cost of any study, analysis, engineering report, test, or project which is found by the court to be necessary for the preparation of the party's case, and (4) reasonable fees paid or incurred for the services of attorneys in connection with the civil proceeding. In the case of Tax Court proceedings, fees for the services of an individual (whether or not an attorney) who is authorized to practice before the Tax Court are to be treated as fees for the services of an attorney.

Recoverable litigation costs include only the reasonable amount of costs which are incurred in the litigation of a civil tax action or proceeding. For example, the reasonable amount of fees incurred by a taxpayer for an accountant's study or analysis which is found by the court to be necessary for the preparation of the taxpayer's case is recoverable under an award of litigation costs. Also, the reasonable amount of fees paid by an attorney to another professional for services rendered in connection with the tax litigation may be recoverable. The committee intends that the costs of preparing and filing the petition or complaint which commences a civil tax action be the first of any recoverable attorney's fees. Fees paid or incurred for the services of an attorney during the administrative stages of the case could not be recovered under an award of litigation costs.

Reasonable litigation costs include only those costs incurred by the taxpayer or the taxpayer's representative. Thus, costs incurred by a creditor of the taxpayer or a party to a transaction that gives rise to the substantive tax issue could not be awarded. However, the committee does not expect the court to examine the particular payment arrangement between a taxpayer and his attorneys. Thus, if an attorney is employed on behalf of the taxpayer by a third party such as a 501(c)(3) organization, that attorney's fees may be recovered by the taxpayer even though the organization initially incurred the expense of retaining the counsel.

The determination of what constitutes a reasonable amount for the expenses, costs, and fees actually incurred by a taxpayer in a civil tax action is to be made by the court hearing the action. The court's determination of the amount of reasonable litigation costs may be made on the basis of detailed affidavits submitted to the court, which state the actual time expended and the rate at which fees and other costs and expenses were computed, without a separate evidentiary hearing on the issue of costs. However, the court, in making its determination as to the reasonable amount of such expenses, costs, and fees, may consider any party's failure to comply with the court's rules requiring stipulation of all facts which fairly should not be in dispute. This consideration is relevant because the committee does not intend to permit awards for litigation costs which the taxpayer could have reduced or avoided through full disclosure of all relevant facts.

Prevailing Party

A taxpayer must be the prevailing party in a civil tax proceeding in order to receive an award of litigation costs. The amendment provides that a prevailing party is a party (other than the United States or any creditor of the taxpayer involved) which (1) has substantially prevailed with respect to the amount in controversy, or (2) has substantially prevailed with respect to the most significant issue, or set of issues, presented. Thus, for example, individuals, estates, trusts, corporations, and section 501(c)(3) organizations may be awarded litigation costs. Generally, the provision on the amount in controversy will be determinative; however, tax litigation often involves multiple issues cases. In such cases one issue may involve a smaller dollar amount than the other issue or issues but may be the most significant issue for the government or for the taxpayer. This may occur because of the importance of the issue in other transactions or future years. To accommodate this possibility, the amendment provides that a prevailing party may be one that prevails on such an issue.

Appeals procedure

An order granting or denying an award of litigation costs, in whole or in part, is to be incorporated as part of the decision or judgment in the case. The committee intends that the order granting or denying an award be appealable in the same manner, and to the same extent, as the decision or judgment in the case. Therefore, when a taxpayer prevails on the merits of the case but is denied an award of litigation costs, the order denying such costs is not separately appealable. The committee expects that when a case is appealed the appellate court will not substitute its judgment for that of the trial court as to the reasonableness of the amount of the award unless the decision of the trial court is clearly erroneous. Also, when a taxpayer loses in the trial court and obtains a reversal of that decision in the appellate court, the appellate court would not normally award attorney's fees to the taxpayer since the trial court, by definition, had found the government's position to be reasonable.

Increase in penalty for instituting proceedings for delay, etc.

The amendment also provides that if it appears to the Tax Court that proceedings have been instituted or maintained by a taxpayer primarily for delay or that the taxpayer's position in proceedings before the Tax Court is frivolous or groundless, then damages, i.e., a penalty, may be awarded to the United States in an amount not in excess of $2,500.[3]

Effective Date and Termination

The provisions of the amendment apply to civil tax actions or proceedings in United States courts (including the U.S. Tax Court) commenced after May 31, 1982. The provisions of the amendment are the exclusive provisions under which taxpayers in civil tax cases commenced in United States courts after May 31, 1982 may seek an award of litigation costs (other than certain costs described in 28 U.S.C. sec. 1920).

The litigation costs provisions of the amendment will not apply to any proceeding commenced after May 31, 1987. However, the provisions will apply through final disposition of any action or proceeding commenced before June 1, 1987.

Revenue Effect

The amendment is estimated to increase budget outlays by less than $5 million annually.

2. Tax Court judges' survivors annuities Tax Court procedural rules

(Secs. 302 and 303 of the amendment and secs. 7448, 7463(a), 7459(b), 7447(b), and 7456(c)):

Present Law

Annuities for survivors of Tax Court judges

Present law provides that, at the election of a judge of the United States Tax Court, three percent of the judge's salary is withheld and credited to the "Tax Court judges survivors annuity fund." If a judge electing coverage under the survivors annuity fund dies while a judge and after completing at least five years of service for which salary was withheld for the fund (or for which salary was withheld under the civil service retirement laws), a surviving spouse or surviving dependent child is entitled to an annuity from the fund. If the surviving spouse has not attained age 50 at the date of the judge's death, the annuity commences when the surviving spouse attains age 50. The annuity payable to a surviving spouse terminates upon the spouse's remarriage or death. The annuity payable to a child generally terminates when the child attains age 18.

The annuity payable to a surviving spouse of a judge is equal to a stated percentage (generally 1¼ percent) of the average annual salary (whether judge's salary or compensation for other allowable Federal service) for the five consecutive years for which the judge received the largest average annual salary, multiplied by the sum of the judge's years of judicial or other allowable Federal service. However, the annuity for the surviving spouse cannot exceed 37½ percent of such average annual salary. The amount of the annuity payable to a surviving dependent is based upon the annuity payable to a surviving spouse (subject to certain dollar limits).

Certain Tax Court procedural rules

Under present law, the Chief Judge of the Tax Court may assign "small tax cases" (i.e., certain cases in which the deficiency is not more than $5,000) and certain declaratory judgment action to commissioners (special trial judges) for hearing and decision. Special procedural rules apply to small tax cases. Present law also requires a judge of the Tax Court to report in writing the Court's findings of fact and opinion.

Reasons for Change

The committee believes that annuities payable to survivors of judges of the Tax Court should be increased to be substantially equal to annuities for survivors of other Federal judges. The committee also believes that certain procedural rules for the Tax Court should be revised to promote the efficient operation of the Court.

Explanation of Provision

Annuities for survivors of Tax Court judges

The committee amendment generally increases the amount of an annuity payable from the Tax Court judges survivors annuity fund by (1) basing such amount upon the judge's average annual salary for the three (rather than five) consecutive years for which the judges received the largest average annual salary, and (2) increasing the maximum annuity for a surviving spouse from 37½ percent to 40 percent of the judge's average annual salary. The amount of an annuity first payable to a surviving dependent child upon the death of a judge remains subject to the present-law dollar limit.

The amendment also adjusts an annuity payable to a surviving spouse or a surviving dependent of a Tax Court judge for cost-of-living increases by increasing the amount of the annuity when the salary of judges of the Tax Court is increased. The amendment affects each annuity payable from the survivors annuity fund which is based in whole or in part upon a deceased judge having rendered some portion of his or her final 18 months of service as a judge of the Tax Court. Under the amendment, each such annuity is increased by three percent for each five percent increase in the salary of judges of the Tax Court. If the salary increase is less than five percent, the increase is disregarded in computing current and future survivor annuities.

The amendment includes a catch-up provision for survivor annuities in pay status on the date of enactment. Under this provision, such an annuity would be immediatey increased to reflect increases in the salary of judges of the Tax Court after December 31, 1963.

Certain Tax Court Procedural Rules

The amendment provides that commissions (special trial judges) may hear and

[3] Under Rule 38 of the Federal Rules of Appellate Procedure, the courts of appeal may award, "just damages and single or double costs to the appellee" if the appeal is determined to be frivolous.

decide regular cases (i.e., cases that are not small tax cases) if the deficiency is not more than $5,000. In addition, subject to the $5,000 limitation, small tax cases are expanded to include cases involving the excise tax on excess contributions to individual retirement accounts, the excise taxes relating to public charities, private foundations, qualified pension, etc. plans and real estate investment trusts, and the crude oil windfall profit tax. The amendment also provides that judges of the Tax Court may, in appropriate cases, orally state, and record in the transcript of the proceedings, their findings of fact or opinion on the issues presented.

Under the amendment, a retired judge of the Tax Court will be known and designated as a Senior Judge.

Effective Date

Annuities for Survivors of Tax Court Judges

The annuity provisions of the amendment generally apply with respect to annuities payable to survivors of judges of the Tax Court dying after the date of enactment. Except as described in the catch-up provision for survivor annuities in pay status, the provision relating to cost-of-living increases applies with respect to salary increases taking effect after the date of enactment.

Tax Court Procedural Rules

The provisions of the amendment amending Code section 7463(a) apply with respect to Tax Court proceedings commenced after the date of enactment of the amendment. The other provisions of the amendment relating to Tax Court procedural rules will be effective on enactment of the amendment.

Revenue Effect

The provisions of the amendment relating to annuities for survivors of judges of the Tax Court are estimated to increase budget outlays by less than $50,000 annually.

3. Time for furnishing forms W–2 to terminated employees

(Sec. 304 of the amendment and sec. 6051 of the Code):

Present Law

Under present law, every employer who pays wages from which Federal income tax or FICA (Social Security) tax must be withheld is required to furnish each employee a statement (Form W–2) which sets forth: the names of the employer and employee; the amount of wages subject to income tax withholding and the amount withheld; and the amount of FICA wages and FICA tax withheld. In the case of most employees, W–2 Forms for the calendar year must be furnished no later than January 31 of the following year. However, if an employee terminates employment prior to the close of the calendar year, that employee must be furnished with a Form W–2 on the day on which his or her last salary payment is received.

Treasury Regulations provide that the employer may furnish a Form W–2 to an employee whose employment terminates prior to the close of the calendar year at any time after the termination but no later than January 31 of the following year. However, if an employee who terminates employment prior to the close of the calendar year requests earlier receipt of a Form W–2, and if there is no reasonable expectation on the part of the employer and employee of further employment during the calendar year, then the employee must be given a Form W–2 on or before the later of the 30th day after the request or the 30th day after the last salary payment (Treas. Reg. § 31.601–1(d)(1)).

Reasons for change

The committee believes that the present law requirement that a terminating employee be provided a Form W–2 on the date of his or her last salary payment may be unduly burdensome to many small employers. Moreover, the committee feels that this requirement serves no useful purpose in many circumstances. For example, many employees who terminate with one employer often begin work with another employer prior to the close of the calendar year. Since this category of individuals must wait until they receive W–2's from subsequent employment before they can file tax returns, it would not seem necessary to require the former employers to provide W–2's with the last salary payment. Furthermore, it has come to the committee's attention that some individuals in this category are likely to misplace W–2's they have received from a former employer during the year. This imposes additional expense on the employer who then must issue duplicate W–2 Forms.

Because of these concerns, the committee has decided that the general approach of the recently revised Treasury regulations should be codified. Under this general approach, employees who terminate employment during the calendar year would be provided with Forms W–2 at the same time as all other employees. However, a terminating employee would be given the option to receive his or her Form W–2 at an earlier date.

Explanation of Provision

Under the committee amendment, the employer of an employee who terminates employment prior to the close of the calendar year will be required to furnish the employee with a Form W–2 no later than January 31 of the following year (the same time all other employees must be provided a W–2), unless the employee requests early receipt. If a terminating employee makes a written request for early receipt of a Form W–2, then the employer will be required to furnish the employee with a W–2 no later than 30 days after the receipt of the written request (rather than with the last salary payment).

Effective Date

The amendment will apply to employees whose employment is terminated after the date of enactment of the amendment.

Revenue Effect

The amendment will not have any effect on budget receipts.

4. Withholding of State income tax from seamen's wages on a voluntary basis (Sec. 305 of the amendment and sec. 601 of 46 U.S.C.):

Present Law

Under present law, employers must deduct and withhold Federal income and social security taxes from wages paid to employees (Code secs. 3402 and 3102). In general, employers are permitted (and may be required by State law) to deduct and withhold State income taxes. However, present law prohibits withholding from wages of a seaman or fisherman of any amounts for taxes imposed by a State, including a territory, possession, commonwealth, or a subdivision thereof (46 U.S. Code sec. 601).

This prohibition prevents several States from requiring withholding on the wages of a seaman or fisherman, as could happen if the vessel on which the seaman or fisherman is employed regularly operates between ports in those States. The prohibition also applies in the case of seamen and fishermen employed on vessels operating exclusively between ports of the same State. It is not clear under present law whether this prohibition extends to withholding that is voluntary as well as to that which is mandated by State income tax laws.

Reasons for Change

The committee believes that State income tax withholding is a convenient way in which to discharge State income tax liability and that it should be encouraged where it makes sense. Seamen who are employed in the coastwise trade between ports of the same State are basically the same as other types of employees who perform services within a single State. Thus, the committee decided that those seamen should be given the option to have Sate income tax withheld from their wages.

Explanation of Provision

The committee amendment provides that a seaman or fisherman employed in the coastwise trade between ports of the same State may enter into a voluntary agreement with employers for withholding from wages of amounts as State income taxes.

Effective Date

The amendment will be effective on enactment.

Revenue Effect

The amendment will not have any effect on budget receipts.

D. MISCELLANEOUS PROVISIONS

1. Additional refunds relating to repeal of the excise tax on buses

(Sec. 401 of the amendment and sec. 231(c)(2) of the Energy Tax Act of 1978):

Present Law

Before enactment of the Energy Tax Act of 1978, a 10-percent manufacturers excise tax was imposed on buses sold by a manufacturer, a producer, or an importer. The Energy Tax Act repealed that manufacturers excise tax on buses sold after November 9, 1978.

The Energy Tax Act also contained provisions which effectively allowed, under certain conditions, exemption from the excise tax for buses sold to ultimate purchasers after April 19, 1977, and before November 10, 1978. Under these provisions, a manufacturer, a producer, or an importer was allowed a credit or refund (without interest) for the tax paid on a bus if—

(1) the manufacturer, etc., possessed evidence of sale to the ultimate purchaser and of reimbursement of tax to that purchaser;

(2) the manufacturer, etc., filed a claim for credit or refund with the Secretary of the Treasury before September 5, 1979; and

(3) the manufacturer, etc., reimbursed the ultimate purchaser for the tax paid on qualified sales of buses before September 5, 1979.

Reasons for Change

In enacting the Energy Tax Act of 1978, the Congress sought to encourage the use of energy efficient transportation through repeal of the manufacturers excise tax on buses. In effect, this repeal was to apply to all sales of buses made to ultimate purchasers on or after April 20, 1977, the date on which the repeal was proposed.

The committee is aware, however, that at least one importer who otherwise complied with the requirements for refund of excise tax paid on buses sold between April 20, 1977, and November 9, 1978, was financially unable to refund the excise tax to the ultimate purchasers in advance of receipt of a refund from the Treasury Department. As a result, the ultimate purchasers of buses from that importer were deprived of their refunds of the excise tax. The committee believes these refunds should be made to a manufacturer, etc., provided that the ultimate purchasers of the buses actually receive the refunded amounts.

Explanation of Provision

In general, the committee amendment changes section 231(c) of the Energy Tax Act of 1978 to broaden the conditions under which a manufacturer, a producer, or an importer is eligible for a credit or refund of the manufacturers excise tax paid on buses that were sold to ultimate purchasers after April 19, 1977, and before November 10, 1978. Under the amendment, the date before which the ultimate purchasers must have been reimbursed is extended from September 5, 1979, to January 1, 1983. The amendment does not, however, change the requirement of present law that a manufacturer, etc. have filed a

claim for credit or refund with the Secretary of the Treasury before September 5, 1979.

In addition, the amendment relaxes the present law requirement that the manufacturer, etc. possess evidence of reimbursement of the tax to the ultimate purchaser. Under the amendment, the manufacturer, etc. may make reimbursement at the same time it receives the refund. Such simultaneous reimbursement must occur under an arrangement, such as an escrow, satisfactory to the Secretary of the Treasury.

Effective Date

The amendment will be effective on the date of enactment of the amendment.

Revenue Effect

The amendment is estimated to reduce budget receipts by less than $1 million for fiscal years 1982 and 1983.

2. One-year extension of existing one-year FUTA tax exemption for certain fishermen

(Sec. 402 of the amendment and sec. 3306 (c) of the Code):

Present Law

Services performed by members of the crew on boats engaged in catching fish or other forms of aquatic animal life are exempt from the tax imposed by the Federal Insurance Contributions Act (FICA) if their remuneration is a share of the boat's catch (or cash proceeds from the sale of a share of the catch) and if the crew of such boat normally is made up of fewer than ten individuals (sec. 3121(b)(20)). In the case of an operation involving more than one boat, the exemption applies if the remuneration is a share of the entire fleet's catch or its proceeds, and if the operating crew of each boat in the fleet normally is made up of fewer than ten individuals.

In addition, the remuneration received by those fishing boat crew members whose services are exempt for purposes of FICA is not considered to be "wages" for purposes of income tax withholding (sec. 3401(a)(17)), and those individuals are considered to be self-employed for purposes of the Self-Employment Contributions Act (sec. 1402(c)(2)(F)).

Furthermore, remuneration paid during 1981 to fishing boat crew members who are self-employed for purposes of FICA are not subject to FUTA taxes (sec. 822 of the Economic Recovery Tax Act of 1981).

Reasons for Change

As part of the Economic Recovery Tax Act of 1981, the Congress decided that fishing boat crew members who are treated as self-employed for purposes of FICA and income tax withholding also should be treated as self-employed for purposes of the unemployment tax provisions. However, the Congress decided to make this provision effective only for a one-year period (1981), in order to determine the best long-term solution to the problem.

The committee believes that the FUTA tax exemption should be extended for one more year (through 1982) in order to give the Congress additional time to determine the best long-term solution.

Explanation of Provision

The committee amendment extends for one year (through 1982) the FUTA tax exemption for wages paid to fishermen whose remuneration is exempt for purposes of FICA.

Effective Date

The amendment applies to remuneration paid during 1982.

Revenue Effect

The amendment is estimated to reduce fiscal year budget receipts by a negligible amount in 1982, and by less than $1 million in 1983.

3. Financing of Reforestation Trust Fund

(Sec. 403 of the amendment):

Present Law

Funds appropriated to the Reforestation Trust Fund from certain forest product import duties are used to supplement congressional appropriations for reforestation and timber stock improvement on publicly owned national forests. Funds for this trust fund are derived from import duties on plywood and lumber. The Secretary of the Treasury is required to transfer receipts from these tariffs to the Reforestation Trust Fund in amounts up to $30 million for each fiscal year during the six-year period from October 1, 1979, through September 30, 1985.

For each of the five fiscal years from 1981 through 1985, appropriations have been authorized from the trust fund to the Secretary of Agriculture to pay estimated necessary direct costs and properly allocable administrative costs for reforestation and related programs (under section 3(d)(2) of the Forest Rangeland Resources Planning Act of 1974 (16 U.S.C. 160(d)(2)), but only to the extent these estimated costs exceed amounts appropriated out of the general fund for these purposes.

Reasons for Change

The committee believes that it is better public policy to appropriate to the trust fund a portion of the revenues received from the sale of forest products and timber from forests under the jurisdiction of the Secretary of Agriculture in order to carry out national reforestation and forest management programs, which are also under the Secretary's jurisdiction.

Explanation of Provision

In place of the present law requirements for the transfer to the Trust Fund of up to $30 million from revenues attributable to tariffs on timber and plywood, the committee amendment would transfer revenue received from sales of timber and forest products from forests managed by the National Forest Service.

Specifically, the Secretary of the Treasury will transfer to the trust fund, up to $30 million, derived from 65 percent of the amounts received from sales made by the Secretary of Agriculture of trees, portions of trees, or forest products located on National Forest System lands. This amendment does not affect existing commitments for uses of these funds. This change applies to sales made after December 31, 1981.

Effective Date

The amendment is effective on January 1, 1982.

Revenue Effect

The amendment has no effect on budget receipts.

4. Due date for energy task force study

(Sec. 405 of the amendment)

Present Law

The committee understands that there is an interagency task force studying the threat of a petroleum supply disruption on the nation's economy and ways of limiting the effects of any such disruption. There is no provision in current law, however, which would require this task force to submit a report on its study to the Congress at any particular date.

Reasons for Change

The committee believes that it is desirable that a date certain be fixed by which the Congress is to receive the report on the interagency task force study.

Explanation of Provision

The committee amendment directs the Secretary of the Treasury to submit to the Congress by June 15, 1982 the report of the interagency task force evaluating the alternative fiscal policies which could be used to help mitigate the adverse economic effects of an oil supply disruption, including possible recycling to consumers of increased Federal revenues resulting from such a disruption.

Effective Date

The amendment will be effective on enactment.

Revenue Effect

The amendment will not have any effect on budget receipts.

Mr. SYMMS. The next amendment is the energy task force study. This amendment directs an interagency task force, formed by the President, to report to Congress in June 1981 on the means of ameliorating the effect of a severe petroleum disruption. This was an amendment by the Senator from New Jersey (Mr. BRADLEY).

Mr. PROXMIRE. It is not on the list. Is there a number for the technical explanation where we could find this?

Mr. SYMMS. It is at the very end of the technical explanation.

Mr. DOLE. This is a study.

Mr. SYMMS. I yield to the Senator from New Jersey.

Mr. BRADLEY. This is simply a study. You could recycle tax dollars, but until you have studied how you can recycle tax dollars, you do not have that alternative. This simply asks the Treasury, by June 15, to submit a study saying, in several supply disruption scenarios what they think would be the best way to recycle tax dollars and what complementary fiscal and monetary policy they must have. There is no revenue impact.

Mr. SYMMS. Mr. President, the next amendment is one from the other body. It is about additional funds.

The 10-percent manufacturers excise tax on buses which had been imposed under prior law was repealed by the Energy Tax Act of 1978 for buses sold after November 9, 1978. The act also established conditions under which a manufacturer was eligible for a credit or refund—without interest—for the excise tax paid on a bus sold to an ultimate purchaser after April 19, 1977, and before November 10, 1978.

The committee amendment liberalizes these conditions for eligibility to allow additional refunds of the bus excise tax.

I say to the Senator from Wisconsin that it is my understanding that there is one particular bus company in Pennsylvania that, because of bankruptcy of the company, was not able to obtain the refund. The refund will be given to the school district which purchased the buses from the bankrupt bus company. They will be the beneficiary of this.

Mr. PROXMIRE. How much of a benefit will they receive, and what will be the total loss to the Treasury?

Mr. SYMMS. It is my best information that it is about $250,000.

Mr. PROXMIRE. I thank the Senator.

Mr. DOLE. Mr. President, as I understand it, that concludes the amendments reported by the Senate Finance Committee, including those amendments on H.R. 4961, with two exceptions, and they are all added to H.R. 4717, with the exception of the leasing reporting require-

ments, which was included in the black lung bill.

The Senator from Kansas understands that there are a very few noncontroversial amendments that some Members feel are necessary to be added to this bill, because of expiration dates or because hearings have been held in some cases.

I say to the Members who have those amendments that the House is about to take up the farm bill, and I understand that is the last thing they will do. Earlier this afternoon, I talked to the chairman of the Ways and Means Committee, and he was willing to go to conference on this bill if we got it over there in time to go to conference.

I am not trying to shut anyone off. I am just suggesting that the amendments that Senators have brought to the floor are not controversial, for the most part—I think the Senator from Wisconsin will agree—with no real revenue loss. There have been public hearings. We are not trying to deceive anyone. They are all in the open.

I have talked to the Senator from Arizona, who has a technical amendment which deals with an expiration date. Others are the Senator from Washington, the Senator from Iowa, the Senator from Nevada. There may be others who feel compelled to offer amendments, but I hope not.

Mr. HART. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. HART. Mr. President, it is my intention to offer an amendment which is not specifically a tax-related measure. It is related to another amendment which I have offered in the past, urging the President to terminate oil imports from Libya.

The Senator from Colorado does not want to complicate this bill. This would be a sense-of-the-Senate resolution, and it is my hope that the managers could accept it. It seems to be the only vehicle with which the Senate can put itself on record on this issue for the remainder of the session.

I just want to put the Senator on notice. I will be glad to agree to a reasonable limitation of time for debate.

Mr. DOLE. I do not want to discourage the Senator from Colorado, but it gets into a policy discussion, as to whether the President's policy is correct in first bringing the Americans home before there is a determination of whether the Senator's proposal is advisable.

If the Senator wants to offer the amendment on this bill, it is the Senator's right. But I hope that all those who are troubled by killing this bill will vote against that amendment, because otherwise there will not be a bill.

I yield to the Senator from Idaho.

MUTUAL FUND WRAP-AROUND ANNUITIES/ REVENUE RULING 81–225

Mr. SYMMS. Mr. President, the Treasury and the IRS have been on a 5-year program to substantially restrict annuities as a base for retirement security. In 1977, the IRS released a revenue ruling that was quickly and decisively overturned by a Federal district court. However, due to a technical device, that decision was overturned.

The Treasury has continued in its attempts to do administratively what they unsuccessfully tried to get Congress to legislate in 1978. On September 25, 1981, the Treasury issued Revenue Ruling 81–225, which changed the tax treatment of variable annuity contracts funded with mutual fund shares.

This most recent Treasury ruling is grounded on a public access policy argument; that is, a person who invests in mutual fund shares through an annuity should not achieve tax deferral if a person who invests directly in the same mutual fund shares is taxed currently. The Treasury ruling is designed to prevent the use of annuities in situations where the capital used to purchase the annuity is invested in an asset that could have been purchased directly without the use of an annuity. This latest theory of Treasury's has never been stated anywhere in the more than 50-year history of the rules governing annuity taxation.

While I do not agree with the direction that Treasury has taken on the issue of taxing wrap-around annuities, I am willing to delay the discussion of the substance of this issue until next year when the Senate Finance Committee and the Senate, as a whole, are expected to review the taxation policies impacting on the insurance industry.

However, for the present, it has been essential that the retroactive application of the ruling be reviewed before the end of this taxable year because it was clearly impossible for the companies and individuals adversely impacted by this ruling to be able to comply with the ruling as written.

I ask unanimous consent to have printed in the RECORD a letter written to me by the Assistant Secretary of the Treasury for Tax Policy, Mr. Buck Chapoton, indicating the agreement that has been reached thus far.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE TREASURY,
Washington, D.C.

Hon. STEVEN SYMMS,
U.S. Senate,
Washington, D.C.

DEAR STEVEN: I want to let you know that the Treasury Department has had discussions with certain life insurance companies that are required to issue Forms 1096 and 1087 to comply with the requirements of Revenue Ruling 81–225. As a result of these discussions, we have decided that for the period ending September 25, 1981, to the extent that authority exists to do so, both the companies and the policyholders may compute both the policyholder's and company's income by treating capital gains and unrealized appreciation in the same manner as asset values were computed.

Moreover, to the extent that the ability of individual taxpayers to file timely returns is not unduly prejudiced, we will consider requests for deferral of the due dates of the required Forms.

Sincerely,

JOHN E. CHAPOTON,
Assistant Secretary.

Mr. SYMMS. Mr. President, there are several items in the above-mentioned letter that I would like to clarify and/or stress. First, it is the understanding of the Senate that the Secretary of the Treasury has the authority to make the necessary and appropriate changes in the ruling by administrative action, otherwise the Senate would have legislated on this particular issue at this time.

Second, the agreements that have been made are not binding on those firms who are able and wish to comply with Revenue Ruling 81–225 as originally written.

Third, it is the understanding of the Senate that the information forms, IRS Form 1087, IRS Form 1096, and IRS Form 1099, can be mailed as late as March 15, 1982, if the companies find it necessary, and to the extent that the ability of individual taxpayers to file timely returns is not unduly prejudiced, the Department of the Treasury will consider requests for deferral of the due dates of the required forms.

Fourth, the Department of the Treasury has agreed that for the period ending September 25, 1981 both the companies and the policyholders may compute both the companies' and policyholders' income by treating capital gains and unrealized appreciation pursuant to Revenue Ruling 81–225 or in the manner such capital gains and unrealized appreciation were treated prior to the ruling. Fifth, the Department of the Treasury has agreed to review on a case by case basis as to when the optional treatment of capital gains and unrealized appreciation mentioned above should be allowed to continue through December 31, 1981 to facilitate the reporting requirements of the ruling.

In addition, I would like to mention that the Department of the Treasury has agreed to the accuracy of the text of my clarification of the letter that was sent to me by the Assistant Secretary for Tax Policy.

I am very pleased that the Department of the Treasury has cooperated in reviewing the ability of the taxpayers to comply with this revenue ruling and I am hopeful that next year when the Senate reviews the tax treatment of insurance companies that the Treasury will be as cooperative in reviewing the economic merits of their current position.

UP AMENDMENT NO. 807

(Purpose: Delaying the effective date for 3 years of the amendments made by the Bankruptcy Tax Act of 1980 relating to discharge of indebtedness)

Mr. DECONCINI. Mr. President, I send an amendment to the desk and ask for its consideration.

The PRESIDING OFFICER (Mr. SYMMS). The amendment will be stated.

The legislative clerk read as follows:

The Senator from Arizona (Mr. DECONCINI) proposes an unprinted amendment numbered 807:

At the appropriate place, insert the following new section:

SEC. . 3-YEAR DELAY IN DISCHARGE OF INDEBTEDNESS PROVISIONS.

Paragraph (2) of section 7(a) of the Bankruptcy Tax Act of 1980 is amended by striking out "1982" each place it appears and inserting in lieu thereof "1983".

Mr. DECONCINI. Mr. President, I modify my amendment to read a 1-year delay in the discharge indebtedness provision.

The PRESIDING OFFICER. The amendment is so modified.

The modified amendment is as follows:

At the appropriate place, insert the following new section:

SEC. . 1-YEAR DELAY IN DISCHARGE OF INDEBTEDNESS PROVISIONS

Paragraph (2) of section 7(a) of the Bankruptcy Tax Act of 1980 is amended by striking out "1982" each place it appears and inserting in lieu thereof "1983".

Mr. DOLE. Mr. President, with that change, from 3 years to 1 year, this is one of those expiring provisions. It would otherwise expire at the end of this year. If we are going to do anything in this area, we should act now. If it is made retroactive, it is cumbersome.

I have discussed the amendment with the Senator, as well as the Senator from Louisiana, the Senator from Ohio, and the Senator from Wisconsin. I know of no objection.

Mr. PROXMIRE. I ask the Senator from Arizona whether there have been hearings on this matter.

Mr. DECONCINI. There have not been hearings on this.

The 1979 Bankruptcy Tax Act, which was passed in 1980, did not address this particular problem. There has been a failure to get the attention in Congress to make a decision. Last year, we gave a 1-year extension, with the hope that there would be hearings, and that did not happen.

On January 1, 1982, this will expire, and we will go back to the old law, and not with this short provision.

There is no monetary loss that is known, and it is a stopgap measure, there is no question about it, for the information of the Senator from Wisconsin.

Mr. PROXMIRE. How much revenue loss is there?

Mr. DECONCINI. I am advised there is no revenue loss, at least no one here knows of any.

Mr. PROXMIRE. Does the Treasury have a position on that?

Mr. DECONCINI. I do not know that they do.

Mr. PROXMIRE. The Senator does not have a report from them or from the committee?

Mr. DECONCINI. No, we do not.

Mr. PROXMIRE. Mr. President, may I say to the distinguished Senator from Kansas that this does not meet the test. We set certain tests on this bill. We asked for hearings and approval by the Treasury and knowledge by the Treasury of what we are doing.

I hope the Senator will stand by that position.

I hesitate to oppose my good friend from Arizona. This may have merit, but on the very last day of the question when we have so little time I think it is a mistake for us to move ahead on a tax matter where we do not have any information either from our committee or from the Treasury Department.

Mr. DECONCINI. If the Senator from Wisconsin will yield, I appreciate his concern. I would not be here if we had had the time in this body both in the Finance Committee and even the Judiciary Committee does have jurisdiction over the Bankruptcy Act, to hold hearings and address this problem.

But quite frankly, due to the nature of the tax cut and budget cuts and defense appropriations, this is one of those items that has fallen through the cracks and I am advised there is no monetary loss here.

The ABA Subcommittee on Bankruptcy gives us that information, that there is not any revenue loss according to what they say that the Treasury reports to them. We have not had an opportunity. We are only asking for a short extension.

Mr. DOLE. Mr. President, will the Senator from Arizona yield?

Mr. DECONCINI. I yield.

Mr. DOLE. I did indicate to the Senator from Wisconsin that I do not want to have a double standard, and I did spell out the guidelines earlier. Of course, the Senator knows anyone can offer an amendment.

I wonder if we might make certain we are not violating anyone's rights and protecting the rights of those who may be involved and agree that we extend the effective date for 90 days during which time the Senator from Kansas will promise the Senator from Arizona we will have hearings and in that way we would have about 60 days after we come back to address the problem.

Mr. PROXMIRE. I appreciate that. I think that is an excellent suggestion.

I realize the Senator from Arizona has a problem.

Mr. DECONCINI. If the Senator from Kansas will yield, 90 days will be really pushing it because we could hold hearings and could not get it. But in the spirit that the chairman of the Finance Committee is attempting to do it and that is not shut this off on January 1 when we do not have any opportunity to do it, I am more than happy to modify the amendment.

I ask unanimous consent that the amendment be modified to reflect 90 days.

The PRESIDING OFFICER. The amendment is so modified.

The modified amendment is as follows:

At the appropriate place, insert the following new section:

SEC. . NINETY-DAY DELAY IN DISCHARGE OF INDEBTEDNESS PROVISIONS.

Paragraph (2) of section 7(a) of the Bankruptcy Tax Act of 1980 is amended by striking out "January 1, 1982" each place it appears and inserting in lieu thereof "April 1, 1982".

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified, of the Senator from Arizona.

The amendment (UP No. 807), as modified, was agreed to.

Mr. DECONCINI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 808

Mr. GORTON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Washington (Mr. GORTON), for himself and Mr. JACKSON, proposes an unprinted amendment numbered 808 to the Dole unprinted amendment numbered 805.

Mr. GORTON. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

MEDICARE ENROLLMENT PERIOD FOR INDIVIDUALS FORMERLY ELIGIBLE FOR BENEFITS UNDER THE PUBLIC HEALTH SERVICE ACT

SEC. . (a)(1) In the case of an individual who—

(A) was entitled to benefits under section 322(a) of the Public Health Service Act at any time during the period beginning March 10, 1981, and ending September 30, 1981, and

(B) was eligible to enroll (but was not enrolled) in the program under part B of title XVIII of the Social Security Act (hereinafter in this section referred to as the "medicare part B program") as of September 30, 1981,

there shall be a special enrollment period under section 1837 of the Social Security Act beginning on April 1, 1982, and continuing through December 31, 1982.

(2) Notwithstanding section 1838(a)(2)(E) of the Social Security Act, in the case of an individual who enrolls in the medicare part B program pursuant to the special enrollment period provided for under paragraph (1), the individual's coverage period under such program shall begin on the first day of the month in which the individual files the written request for such enrollment or, in the case of an individual who files the written request for such enrollment in April 1982, such coverage period shall begin on January 1, 1982.

(b)(1) In the administration of section 1839(d) of the Social Security Act, any month (before October 1981) in which an individual can establish that he was entitled to benefits under section 322(a) of the Public Health Service Act (including such entitlement on the basis of continuing medical care under 42 C.F.R. 32.17) shall not be counted as a month in which the individual could have been enrolled under the medicare part B program. This paragraph shall apply to premiums beginning with the premium for the month in which the individual applies for the benefit of this paragraph, subject to paragraph (3).

(2) Paragraph (1) shall not apply to an individual—

(A) if the individual has filed a written request for enrollment in the medicare part B program before March 10, 1981, unless the enrollment pursuant to such request was terminated solely because the individual lost eligibility to be so enrolled, or

(B) unless the individual applies for the benefit of such paragraph before March 31, 1983.

(3) Any individual who is eligible to enroll in the medicare part B program pursuant to the special enrollment period provided for under subsection (a)(1) may enroll in such program during the general enrollment period which begins on January 1, 1982 and ends on March 31, 1982, but such enrollment shall be subject to the provisions of section 1839(d). Such individual may subsequently reenroll during the special enrollment period, and any additional premium amount paid by such individual by reason of section 1839(d) which he would not have been required

to pay if paragraph (1) applied to the first such enrollment, shall be refunded.

(c)(1) The Secretary of Health and Human Services, as soon as possible (but not later than April 1, 1982) after the date of the enactment of this Act, shall provide for the dissemination of information—

(A) to unions and other associations representing or assisting seamen,

(B) to offices enrolling individuals under the medicare part B program and to carriers administering such program under section 1842 of the Social Security Act, and

(C) to such other entities and in such a manner as will effectively inform individuals eligible for benefits under this section,

concerning the special benefits provided under this section and concerning the evidence of potential retroactive coverage under part B which the Secretary may issue to beneficiaries eligible therefor.

(2) An individual may establish that the individual was entitled to benefits under section 322(a) of the Public Health Service Act for a period by providing—

(A) documentation relating to the status under which the individual was provided care in (or under arrangements with) a Public Health Service facility during that period,

(B) the individual's seamen's papers for that period, or

(C) such other reasonable documentation as the Secretary may require.

(3) Entities which have responsibility for the records of hospitals and other stations of the Public Health Service under subtitle J of title IX of the Omnibus Budget Reconciliation Act of 1981 or otherwise shall assist individuals in expeditiously providing documentation described in paragraph (2)(A).

Mr. GORTON. Mr. President, the amendment which I am offering today on my behalf and on behalf of the senior Senator from Washington is intended to mitigate an undue hardship that has been inadvertantly imposed on many of the elderly merchant seamen of this country.

Earlier this year the President proposed the repeal of the entitlement to free medical care for the Nation's merchant seamen. That entitlement had existed since 1798. That proposal was accepted by the Congress and included in the Omnibus Reconciliation Act. Unfortunately, many of the merchant seamen who lost this entitlement had forgone enrollment in the medicare system when they were otherwise eligible because they had the benefits of the merchant seamen entitlement. Now these individuals face what, in some cases, will be substantial penalties in the level of their premiums because of the delay in their enrollment in the medicare program.

I submit that in repealing the entitlement for merchant seamen, Congress did not intend to put these individuals in a more disadvantaged position than they would have been faced with had the entitlement never existed.

This amendment does no more than require that the Government deal with these individuals equitably by providing a period in which they may enroll in the medicare program without the application of the penalty provisions. It is my understanding that the Department of Health and Human Services will be able to administer this open enrollment period without difficulty.

While it may have been more appropriate to have accomplished this change earlier, the problem had not been brought to our attention. Now that it has, I hope that my colleagues will allow us to correct this inequity.

In anticipation of the type of question asked in connection with the previous amendment by the distinguished Senator from Wisconsin, the number of people affected by this is approximately 2,000. The revenue expense in connection with it is approximately $500,000.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. GORTON. I yield.

Mr. DOLE. This is another one of these amendments that, unless we take some action on it, is going to cause hardship for about 2,000 people.

Mr. GORTON. That is correct.

Mr. DOLE. We have checked with the Department of Health and Human Services as well as the House Energy and Commerce and Ways and Means Committees and we find no objection to the amendment. In fact, it is going to be, I understand, in the HHS budget proposal for fiscal year 1983.

I do not know if the Senator has cleared it with other Members. I know the Senator from Louisiana has no objection.

This amendment affects merchant seamen and will cost about $500,000 at the outside.

I hope we might be willing to accept the amendment.

Mr. GORTON. I thank the distinguished Senator for his support.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Washington.

The amendment (UP No. 808) was agreed to.

UP AMENDMENT NO. 809

(Purpose: To amend the Internal Revenue Code to limit the use of tax-exempt industrial development bonds)

Mr. METZENBAUM. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Ohio (Mr. METZENBAUM), for himself, Mr. DECONCINI, and Mr. LEAHY, proposes an unprinted amendment numbered 809.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place add the following new sections:

(a) Section 103 of the Internal Revenue Code of 1954 (relating to interest on certain governmental obligations) is amended by redesignating subsection (j) as subsection (k) and by inserting after subsection (i) the following new subsection:

"(j) SPECIAL RULES RELATING TO SMALL-ISSUE EXEMPTIONS OF SUBSECTION (b)(6).—

"(1) RESTRICTIONS ON USE OF PROCEEDS.—

"(A) IN GENERAL.—Paragraph (6) of subsection (b) shall not apply to any issue if any portion of the proceeds of such issue is to be used for a nonqualified purpose.

"(B) NONQUALIFIED PURPOSE.—For purposes of subparagraph (A), the proceeds of an issue shall be treated as used for a nonqualified purpose if such proceeds are used for any private or commercial—

"(i) golf course,

"(ii) country club,

"(iii) massage parlor,

"(iv) tennis club,

"(v) skating facility (including roller skating, skateboard, and ice skating),

"(vi) ski resort,

"(vii) racquet sports facility (including handball and racquet ball courts),

"(viii) hot tub facility,

"(ix) suntan facility, or

"(x) racetrack.

"(2) REPORTING REQUIREMENTS.—Not later than March 1 of each calendar year, any person who during the preceding calendar year issued obligations with respect to which subsection (b)(1) did not apply solely by reason of subsection (b)(6) shall report to the Secretary with respect to each such issue the following:

"(A) any purchasers of more than 25% of the face value of the issue;

"(B) the underwriter (if any);

"(C) the interest rate;

"(D) the issue's rating (if any);

"(E) the face amount;

"(F) a description of any facility to be financed from the proceeds of such issue and its location;

"(G) each user of a facility described in subparagraph (F);

"(H) bond counsel; and

"(I) any other information the Secretary determines appropriate.".

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply to obligations issued after the date of the enactment of this Act.

Mr. METZENBAUM. Mr. President, this amendment has been discussed with the managers of the bill. It relates to further reporting of tax-exempt industrial development bonds, and other small items.

It is an amendment that has been cleared on both sides. I am certain the Treasury will have no objection to it.

Mr. DOLE. Mr. President, will the Senator from Ohio object if the Senator from New York (Mr. D'AMATO) joined in the amendment?

Mr. METZENBAUM. I have no objection. I am delighted to have him as a cosponsor.

Did the Senator ask if I would object?

Mr. DOLE. I am doing that without his request, but he has been very active in this.

Mr. METZENBAUM. I am happy to have the Senator from New York as a cosponsor of the amendment and so ask unanimous consent.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. I ask unanimous consent also that the Senator from Arizona (Mr. DECONCINI) and the Senator from Vermont (Mr. LEAHY) be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, has my amendment been accepted?

The PRESIDING OFFICER. Not at this point.

Mr. CANNON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I indicated to the Senator from Ohio that the Senator from New York (Mr. D'AMATO) might wish to be a cosponsor. I am advised that will not be the request. I ask unanimous consent to withdraw that request.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GORTON). Without objection, it is so ordered.

Mr. LEAHY. Mr. President, I was in error on which amendment was up before. I ask unanimous consent that my name not be listed as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. The question in on the amendment.

Mr. PROXMIRE. Mr. President, is this on the Metzenbaum amendment? I have no objection to the Metzenbaum amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Ohio.

The amendment (UP No. 809) was agreed to.

Mr. METZENBAUM. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. D'AMATO. Mr. President, I rise in support of the amendment to this bill which would exclude certain research and development expenditures from the capital expenditure limits now imposed on the industrial development bond program. This amendment serves a laudable purpose. It would bring section 103(b)(6)(D) into conformity with the rest of the Internal Revenue Code with respect to those research and experimentation expenditures which the taxpayer elects to expense.

This amendment, which has been cleared by the Treasury Department, will help small firms in nearly every State which are currently unable to issue industrial development bonds solely due to the fact that their extensive R. & D. spending boosts them over the $10 million capital expenditure limit. R. & D. expenses should clearly be differentiated from other capital expenditures. This amendment will rectify this oversight which has existed in the law for far too long.

I would like to point out, however, that this amendment does not go far enough in rectifying the problems that currently plague the industrial development bond program. This amendment is important, but it is equivalent to a doctor stitching up a small cut on a patient's arm while ignoring a major, bloody wound in the patient's chest.

The major wound to the IDB program, of course, is Revenue Ruling 81–216. This ruling has, since August 24, arbitrarily wiped out approximately one-half of the $8 to $10 billion in IDB's which would have been issued this year. Over $4 billion in economic development has been forfeited. Countless additional economic activity which would have resulted from this development has been lost forever. In an era of oppressive interest rates and high unemployment and rising numbers of failures among small businesses, Revenue Ruling 81–216 has been a major roadblock in our quest for a healthier economy.

Very simply we must revoke 81–216. In the continuing resolution recently signed by President Reagan, this Congress did include a section to prohibit the enforcement of this disastrous regulation until at least next April 1. But this is not enough. We must change substantive law so that the IRS will never even consider imposing such an adverse ruling again.

An amendment to this bill to accomplish this purpose, although likely to pass, would hold up the enactment of this legislation by necessitating a conference with the other Chamber. Since I have no desire to impede the legislative process, I will not offer such an amendment at his time. However, I wish to make it clear that such a change in the Internal Revenue Code is vital and, therefore, a bill or amendment to accomplish this purpose will be forthcoming early next session.

Senators DOLE, WEICKER, STEVENS, and I, among others, are all committed to working together on enactment of this necessary legislation. I am grateful both for their support and their efforts on this matter. It is my hope that we can mark up the necessary corrective legislation before the Finance Committee early next year as Senator DOLE has indicated in his intention.

In the interim, of course, we have passed the nonenforcement provision contained in section 112 of the continuing resolution and have thrice expressed the sense of the Senate that Revenue Ruling 81–216 must be vitiated. We will also have the technical improvement in the IDB program made by this amendment. I urge its adoption.

UP AMENDMENT NO. 810

(Purpose: To provide that the occupational tax on wagering shall not apply in any State in which wagering is permitted by law)

Mr. CANNON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Nevada (Mr. CANNON) for himself and Mr. Laxalt proposes an unprinted amendment numbered 810.

Mr. CANNON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, insert the following:

SEC. . WAGERING PERMITTED UNDER STATE LAW.

(a) TAX ON WAGERS.—Section 4402 (relating to exemptions) is amended—

(1) by striking out "or" at the end of paragraph (2),

(2) by striking out the period at the end of paragraph (3) and inserting in lieu thereof a comma and "or", and

(3) by adding at the end thereof the following new paragraph:

"(4) STATE-AUTHORIZED WAGERS.—On any wager authorized under State law.".

(b) OCCUPATIONAL TAX.—

(1) IN GENERAL.—Subchapter B of chapter 35 (relating to occupational tax) is amended by redesignating section 4414 as section 4415, and by inserting after section 4413 the following new section:

"SEC. 4414. TAX NOT TO APPLY TO WAGERING AUTHORIZED UNDER STATE LAW.

"The tax imposed by section 4411 shall not apply in the case of a person authorized under the law of any State or political subdivision thereof to engage in the business of accepting wagers or to receive wagers for or on behalf of any such person.".

(2) CONFORMING AMENDMENT.—The table of sections for such subchapter is amended by striking out the last item and inserting in lieu thereof the following items:

"Sec. 4414. Tax not to apply to wagering authorized under State law.

"Sec. 4415. Cross references.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to taxable periods beginning after December 31, 1981.

Mr. CANNON. Mr. President, this amendment incorporates S. 483 which I introduced earlier this year along with my distinguished colleague Senator LAXALT. It cleared the Finance Committee last year in identical form and was ready for passage in the 96th Congress. There was some obection at that time, however, so I withdrew it to avoid any last-minute delays which might have hindered other legislation.

This year, S. 483 has been considered favorably by the Finance Subcommittee on Taxation and Debt Management and has been cleared by both Senator DOLE and Senator LONG. Also, and this is very important for my colleagues to note, the Treasury Department supports repeal of the two taxes covered by this amendment.

John Chapoton, assistant secretary for tax policy, testified before the Taxation Subcommittee in March. He urged the outright repeal of the 2-percent wagering tax and the $500 occupational tax on the grounds that, in his own words, "these taxes do not raise a significant amount of revenue."

That is an understatement, Mr. President. When these taxes were proposed in 1951 it was claimed they would produce revenues of $400 million annually. As Mr. Chapoton testified, however, they have accounted for only a small percentage of that amount. The amount in 1980 was approximately $12 million.

There is further justification for removing these taxes, Mr. President. The $500 occupational tax, imposed on every employee of a legal betting establishment in Nevada, is simply a tax on the right to work. I know of no similar situation anyplace in our country where salaried employees are required to pay a tax to the Government just because they have a certain job.

Mr. Chapoton pointed out in his testimony that the original justification for this tax—to aid in the fight against illegal gambling activities and the collection of taxes from those activities—no longer exists. That is because a later statute was enacted which gives law enforcement authorities a better tool. Let me quote Mr. Chapoton again on his strong feelings about repeal of this tax:

We view the commitment of federal resources to maintain this taxing structure for such a limited purpose to be wasteful and inefficient.

I might add, Mr. President, that these taxes are also discriminatory and unfair. Passage of this amendment will take the Senate further along the road we started on in 1974 when we reduced the betting tax from 10 percent to 2 percent. I urge my colleagues to finish the job today.

Mr. President, I may say that I served, had the privilege of serving, on the Commission on National Policy on Gambling which was appointed by the Senate, designated by the Senate, and we carried out the duties assigned to us for a period of 3 years, and this was the unanimous recommendation of that Commission. I may say one of the stalwarts on that Commission was Senator John McClellan.

So I submit, Mr. President, and I may point out, that as far as tax revenue is concerned, which I know the Senator from Wisconsin has always been concerned about, the highest revenue at any time that has been involved in this particular issue is $12 million a year.

If that tax is done away with, it will then eliminate the flock of people who go to the illegal bookies, who obviously do not pay any Federal tax at all, in many cases not even income tax, and it will result, in our judgment, in a net gain of revenue to the Federal Treasury.

To satisfy the Senator's questions that he usually raises here on Capitol Hill, hearings were held again this year. The distinguished Senator from Virginia (Mr. HARRY F. BYRD, JR.), who chaired some of those hearings, came to the same conclusion.

The Finance Committee has come to the same conclusion. This year the hearings were chaired by the distinguished Senator from Oregon (Mr. PACKWOOD), and they came to the same conclusion. So this matter has had hearings running out of our ears, and that has been the unanimous conclusion.

Mr. HARRY F. BYRD, JR. Mr. President, will the Senator yield?

Mr. CANNON. I would be delighted to yield.

Mr. HARRY F. BYRD, JR. As chairman of the Subcommittee on Taxation I held hearings last year, and the Senator from Nevada correctly stated that the present Treasury Department favors the repeal, and it was brought out, I think I might say at this point, that the Treasury Department of the previous year, the previous administration, likewise favored its repeal because there is no useful purpose being served by it and, indeed, some problems being created by it.

Mr. CANNON. The Senator is exactly right. The Treasury Department in 2 successive years under two successive administrations favored repeal of the tax.

Mr. PROXMIRE. Mr. President, may I ask the Senator from Nevada, I am not precisely sure what this does. It does not apparently affect withholding taxes, it is that?

Mr. CANNON. No, it has no effect on withholding taxes.

It currently provides that on places—and this is only where betting is legal or whether it is legal or illegal, that there is a 2 percent tax, and the illegal bookies do not even pay it.

Mr. PROXMIRE. How about reporting, is there any change in the reporting requirement?

Mr. CANNON. It does not change the reporting requirement, does not change the withholding requirement, and it removes a very onerous burden that puts a $500 head tax on a person for the right to be employed in that occupation, a $500 tax.

Mr. PROXMIRE. It repeals the excise tax?

Mr. CANNON. The excise tax is 2 percent. It repeals that 2 percent tax.

Mr. PROXMIRE. Well, the Senator from Nevada says that in his judgment this would increase rather than decrease revenue. What is the position of the Treasury Department on it?

Mr. CANNON. The Treasury Department supports repeal.

Mr. PROXMIRE. I know they support it. But do they make an estimate as to the revenue?

Mr. CANNON. They said that the highest revenue that has been obtained from that was $12 million in 1980.

Mr. PROXMIRE. Do they maintain that this is of no use in enforcing the income tax statutes?

Mr. CANNON. Yes, and I will read the statement, if I may, from the Treasury Department:

Although not significant for their revenue effect, some might argue that these taxes are justified as a means of raising revenue from an activity perceived to be socially undesirable. We believe that judgments as to the social utility of an activity are not properly a matter of federal tax concern. Thus, we reject the notion that the excise taxes can be justified on this basis.

A final justification for this tax structure may be that it operates as an aid to the fight against illegal gambling activities and the collection of income taxes from persons engaged in such activities. We do not believe that this justifies retention of these taxes. The amount of excise tax collections from illegal, as opposed to legal, gambling activities has been minimal. We view the commitment of Federal resources to maintain this taxing structure for such a limited purpose to be wasteful and inefficient. The Federal government possesses a more direct tool which can be used against significant illegal gambling operations.

Then they go on to point out:

Pub. L. 91-452, enacted in 1970, makes it a Federal criminal offense to engage in a gambling business in violation of state or local law if the operation involves 5 or more principals or managers and continues in operation for more than 30 days, or has gross receipts of $2,000 in any single day.

Mr. PROXMIRE. This would abolish the $500 tax on legal bookmaking?

Mr. CANNON. The head tax on individuals who have to pay $500 to engage in that legal activity.

Mr. PROXMIRE. And would abolish the 2-percent excise tax?

Mr. CANNON. That is right.

Mr. PROXMIRE. And that is it?

Mr. CANNON. To continue:

The Commission on the Review of the National Policy Toward Gambling, in its final report, reached the conclusion that the wagering tax had not been an effective deterrent to illegal gambling. Moreover, experience with the tax on wagers, and with the since repealed tax on coin operated gambling devices, does not indicate any substantial benefits to enforcement of the income tax as a result of the existence of these excise taxes.

Mr. PROXMIRE. I thank the Senator.

Mr. BIDEN. Mr. President, will the Senator yield for a question? My impression of the purpose of this tax—and I realize it was just read—indicates the Treasury Department's position as it relates to revenue. But in holding extensive hearings on organized crime and illegal gambling and bookmaking throughout the country, I am told that this is one of the enforcement mechanisms available.

In short, one of the ways they nail the illegal bookie is to prove, in fact, that he or she has not paid these taxes.

I realize you have indicated that the Treasury Department says that that is really none of their business, and that may be. But it is the business of the Justice Department, and it is of great concern to me.

I wonder if the Senator can speak to that point for a moment, has the Justice Department commented on this, and is it not a fact that it has been a useful tool in the hands of prosecutors in the Justice Department in nailing illegal gambling ventures?

Mr. CANNON. Mr. President, I say to my colleague that there is a very serious debate on that particular issue. The Justice Department did not testify to that effect before the Commission on National Policy on Gaming, on which I serve. We came out with a unanimous report.

Mr. BIDEN. What did the Justice Department say to you?

Mr. CANNON. I do not recall precisely what they said. It has been some time. I know that Senator McClellan was a member of that Commission and the report was signed by all the Commission members.

Let me read, if I may, from a letter that Senator LAXALT and I wrote in response to that issue last year:

Regarding the "deep personal concerns" expressed by the Department of Justice and the Internal Revenue Service, let me say that I have contacted the individuals who are responsible for official Department policy in both Justice and Treasury. I am informed that neither Justice nor Treasury has any record of these "deep personal concerns." In fact, the Department of Treasury has supported repeal of this tax for some time and its support was clearly indicated in writing to the Finance Committee last session.

That was last year, and they have again restated their position this year.

Mr. BIDEN. I do not claim to be an expert in this area, but I am under the

impression, not officially from the Justice Department, but from prosecutors, that, in fact, one of the more useful tools they have had to crimp national bookmaking syndicates has been the availability of both this excise tax and the tax on wages.

I, in the late hours of this session, for one would not want to make a judgment otherwise, without longer debate on this. I am certainly not going to extend the debate on this. But if the manager of the bill is going to accept this amendment, I would ask that we have a rollcall vote. I want to make it clear that I oppose this amendment, even though if I had more information and time to query the Justice Department on this matter, I might not.

But we have so few tools available to us dealing with national gambling syndicates, organized crime operations, and major criminal operations that I am reluctant to relinquish any one, notwithstanding the fact that it is arguable how important it is. I do not think it is arguable that, in fact, it can be used and has been used. To the degree to which it is an essential tool, I am not prepared to make that argument.

Mr. CANNON. If I may respond, apparently the Senator was not here when I read this part a minute ago from the Department's testimony. I said that the laws that we refer to are the useful tools that can be used.

The Federal Government possesses a more direct tool which can be used against significant legal gambling operations. Public Law 91-452, enacted in 1970, makes it a Federal criminal offense to engage in a gambling business, in violation of State or local law, if the operation involved five or more principals or managers and continues in operation for more than 30 days or has gross receipts of $2,000 in any single day.

So that is what we are saying; that they have a more effective tool.

Mr. BIDEN. I understand that. I think it is a more effective tool in the sense that it is one that if they have enough proof to establish all of the elements of that offense, that it is very effective in knocking out the whole operation. But it is not, I would argue, a more effective tool in the amount of proof necessary. All you have to do here, in order to nail someone, is show that they, in fact, have not paid that tax. The burden shifts to them to point out that it was a legal operation. So it is easy to prove they have not paid it. You produce their income tax statement and you say, "Did you pay it or didn't you pay it?"

The defense to that is "Well, I paid it and I am a legal bookie, a legal operation." Well, if they are legal and they did not pay it they violated the law. If they are illegal, obviously they would not pay it—as a matter of fact, there was a Supreme Court case, I believe in 1968, that struck down this provision, arguing that it was so damaging to the defense that it was, in fact, self-incrimination. Consequently, the Congress then came back and said "Well, what we are going to do is we are going to modify it so that we get around the problem of self-incrimination."

The beauty of the provision is not that it is so complicated and complex, but that it is on its fact that you produce your income tax statement if they can force you to have to produce the statement. And if you have not paid it, you are in a world of hurt. You are either, in fact, an illegal bookie or you are bumping the taxes.

The manager of the bill is giving me the wind-down sign.

If we are going to proceed with this, I would ask for the yeas and nays on this amendment or continue to debate the amendment. I do not want to hold the Senate here, but I cannot support it.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER (Mr. ABDNOR). Is the Senator requesting the yeas and nays?

Mr. DOLE. Mr. President, I wonder if we could set aside this amendment and take care of a couple of other amendments.

Mr. BIDEN. I am happy to withhold that request.

Mr. DOLE. We could temporarily set this amendment aside. I ask unanimous consent that we do that and recognize the Senator from Iowa.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT No. 811

(Purpose: To provide that certain amounts transferred to State unempolyment funds will continue to be available for payment of administrative expenses; to remove the age limitation on the exemption from the Federal Unemployment Tax Act on wages for certain services performed by students; and to extend the exemption from Federal Unemployment Tax Act on wages paid to certain alien farmworkers)

Mr. GRASSLEY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Iowa (Mr. GRASSLEY) proposes an unprinted amendment numbered 811.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

TITLE —UNEMPLOYMENT COMPENSATION PROVISIONS

SEC. 01—USE OF CERTAIN AMOUNTS TRANSFERRED TO STATE UNEMPLOYMENT FUNDS.

(a) GENERAL RULE.—Paragraph (2) of section 903(c) of the Social Security Act is amended—

(1) by striking out "twenty-four" each place it appears and inserting in lieu thereof "thirty-four", and

(2) by striking out "twenty-four" in the second sentence and inserting in lieu thereof "thirty-fourth".

(b) RESTORATION OF AMOUNTS USED TO PAY BENEFITS.—Subsection (c) of section 903 of such Act is amended by adding at the end thereof the following new paragraph:

"(3)(A) If—

"(i) amounts transferred to the account of a State pursuant to subsections (a) and (b) of this section were used in payment of unemployment benefits to individuals, and—

"(ii) the Governor of such State submits a request to the Secretary of Labor that such amounts be restored under this paragraph, then the amounts described in clause (i) shall be restored to the status of funds transferred under subsections (a) and (b) of this section which have not been used by eliminating any charge against amounts so transferred for the use of such amounts in the payment of unemployment benefits.

"(B) Subparagraph (A) shall apply only to the extent that the amounts described in clause (i) of such subparagraph do not exceed the amount then in the State's account.

"(C) Subparagraph (A) shall not apply if the State has a balance of advances made to its account under title XII of this Act.

"(D) If the Secretary of Labor determines that the requirements of this paragraph are met with respect to any request, the Secretary shall notify the Governor of the State that such requirements are met wtih respect to such request and the amount restored under this paragraph. Such restoration shall be as of the first day of the first month following the month in which the notification is made."

SEC. 02. TREATMENT OF CERTAIN SERVICES PERFORMED BY STUDENTS.

(a) GENERAL RULE.—Subparagraph (C) of section 3306(c)(10) of the Internal Revenue Code of 1954 (defining employment is amended by striking out "under age 22".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply with respect to services performed after the date of the enactment of this Act.

SEC. 03. TREATMENT OF CERTAIN ALIEN FARM WORKERS.

Subparagraph (B) of section 3306(c)(1) of the Internal Revenue Code of 1954 (defining employment) is amended by striking out "January 1, 1982" and inserting in lieu thereof "January 1, 1984".

Mr. GRASSLEY. Mr. President, I rise to offer an amendment to H.R. 4717, which deals with unemployment compensation. My amendment would extend the Reed Act for 10 years and allow States to restore funds to Reed Act accounts that have been used to pay unemployment benefits; allow student intern wages to be exempt from the Federal Unemployment Tax Act—FUTA—regardless of the age of the student; and extend for 2 years the temporary exclusion in present law that exempts employers from paying FUTA taxes on wages paid to certain alien farmworkers. My understanding is that this amendment is supported by the administration and is noncontroversial. There are no costs associated with any of the amendments.

Section 903, commonly referred to as the Reed Act, was added to the Social Security Act in 1954. It provides for the transfer of Federal unemployment tax funds to individual State accounts when all other FUTA accounts have reached their statutory limits, all advances have been repaid, and an excess is available. There have only been excess funds three times since passage of the Reed Act—in 1956, 1957, and 1958. Deposits totaling $138 million were distributed among the States on June 30 of each of those years. Currently, approximately $25 million is available among the Reed Act accounts of 33 States. I ask unanimous consent that a table showing Reed Act balances by State appear at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. GRASSLEY. Reed Act funds may be used by the States either to pay unemployment benefits, or, with the approval of the State legislatures, for administrative purposes. Many States have used Reed Act funds for major capital purchases, primarily of premises.

The expenditure of Reed Act funds for administrative purposes has resulted in substantial cost savings to the employment security system.

Originally, the use of Reed Act funds for administrative expenses was limited to 5 years from the date of distribution. Congress has extended the time limit three times. Until legislation is passed to extend the time limit again, funds credited to State Reed Act accounts on June 30, 1956, will no longer be available for administrative purposes. Extension of the Reed Act is also necessary so that amounts credited to State accounts in 1957 and 1958 will remain available for administrative purposes.

My amendment would also allow States to restore Reed Act funds used to pay unemployment benefits. The original legislation contained no provision to allow States who use Reed Act funds to pay benefits to restore those funds to Reed Act accounts. Under my amendment, States could only restore Reed Act funds after repaying all debts to the Federal Government incurred by their unemployment accounts.

Over the years, Reed Act funds have been an important source of discretionary funds for the States. This amendment will make it possible for the States to continue to exercise that discretion, but will not affect Federal budget totals, since the funds remain a part of trust fund accounts wheher they are used to pay benefits or for administrative purposes.

Mr. President, this amendment also makes a minor change in current law to allow student intern wages to be exempt from FUTA regardless of the age of the student. As the law stands now, wages paid to a student under age 22 who is a full-time student enrolled in a work-study or internship program are excluded from FUTA, if the work performed is an integral part of the student's academic program.

When the existing exemption was first enacted in 1970, Congress did not explain the age limitation. Logically, however, one assumes that it was based on the presumption that most students are under the age of 22. This age limitation is sufficient to cover most undergraduate students. It does not, however, cover most graduate-level programs. In addition, school attendance at all educational levels by students over age 22 has increased substantially in recent years.

Mr. President, the reason for removing the age limitation is simple. Many schools and educational institutions combine outside work experience with formal study. The work performed by a student, when it is an integral part of his educational program, does not involve the sort of employer-employee relationship envisioned by the unemployment insurance system. Difficulties associated with the age 22 limitation have resulted in reluctance on the part of employers in at least two States—Wisconsin and Massachusetts—to hire student interns.

Finally, Mr. Prsident, my amendment would extend, for years—from January 1, 1982, to January 1, 1984—the temporary exclusion in present law that exempts employers from paying the FUTA tax on wages paid to H–2 workers.

Under current law, Federal Unemployment Tax is imposed on farm operators who employ 10 or more agricultural workers in 20 weeks, or have a quarterly payroll of at least $20,000. A temporary provision in Federal law excludes from FUTA wages paid to alien farmworkers admitted to the United States pursuant to sections 214(c) and 101(a)(15)(H)(ii) of the Immigration and Nationality Act. The present exemption from FUTA expires on December 31, 1981.

Sections 214(c) and 101(a)(15)(H)(ii) of the Immigration and Nationality Act pertain to residents of foreign countries who do not intend to abandon such residency and who are admitted to the United States to work for a temporary period of time during peak agricultural crop seasons. They are admitted only after the Secretary of Labor has determined and certified to the Secretary of State and the Attorney General that there are not sufficient workers in the United States who are available to do the specific work the nonresident workers are admitted to perform.

Because these workers do return to their countries, they are not able to collect any unemployment compensation to which they might be entitled as a result of their employment in the United States. I am aware, Mr. President, that some people argue that excluding such workers from the Federal unemployment tax might provide an incentive for farmers to use these nonresident workers rather than U.S. workers for whom the Federal unemployment tax would be payable.

It seems to me, however, that the fact that the Secretary of Labor has to determine and certify that there are not sufficient workers in the United States to do the specific work that such nonresident workers are permitted to perform works as a safeguard against displacement of U.S. workers. In addition, Mr. President, I would point out that Congress will be considering the administration's immigration and guest worker proposals in the near future. It would seem to me that the temporary exclusion should be continued at least until they can be evaluated in light of the administration's proposals.

Source: U.S. Department of Labor records available March 31, 1981.

Mr. DOLE. Mr. President, I rise in support of Senator GRASSLEY's amendments dealing with the unemployment compensation program. These provisions were passed by the House Ways and Means Committee last week as a part of H.R. 4717, a miscellaneous revenue bill.

The Grassley amendment excludes from Federal unemployment taxes the wages paid to student interns, regardless of age, for work that is an integral part of their academic program. Under current law, wages paid to a full-time student under the age of 22 who is enrolled in a work-study or internship program are excluded from the Federal Unemployment Tax (FUTA), if the work is performed as an integral part of the student's academic program.

The Grassley amendment would merely remove the age limitation so that student intern wages would be exempt from the FUTA regardless of the student's age. Today, many students, both graduate and undergraduate, are over the age of 22. Also, an increasing number of schools are instituting programs which combine outside work experience with traditional classroom study.

Because the work programs are limited and are integrated with the regular school curriculum, there is no true employer-employee relationship that should be covered by the unemployment insurance system. Therefore, the Grassley amendment, by removing the present age

22 limitation, more accurately reflects the study nature of such intern programs.

The Grassley amendment also extends for 2 years the exclusion from the FUTA wages paid to aliens admitted to the United States to perform agricultural work, pursuant to the Immigration and Nationality Act. The present exemption expires on December 31, 1981.

Under current law, the Federal Unemployment Tax is imposed on farmers who employ 10 or more workers in 20 weeks, or have a quarterly payroll of $20,000 or more. The exclusion for alien farmworkers was enacted as a part of the Immigration and Nationality Act and recognizes the fact that the alien workers return to their own countries and do not collect unemployment compensation. Therefore, farmers should not be required to pay FUTA taxes for such workers.

Finally, the Grassley amendment extends the so-called Reed Act (section 903(c)(2) of the Social Security Act) for 10 years.

The Reed Act, enacted in 1954, requires that any excess FUTA receipts be credited to the individual's State accounts in the unemployment trust fund. Each State's share is proportionate to its share of wages subject to FUTA taxes. Prior to 1954, FUTA revenues had frequently exceeded the obligations against the tax and excess tax collections were transferred to general revenues. However, excess funds have occurred only three times since passage of the Reed Act—1956, 1957, and 1958. Current unobligated balances of the States total $25 million, as of June 30, 1981.

These funds are used for the payment of benefits or the payment of expenses involved in the administrative expenses and a specific State appropriation must be made outlining the amount and intended use of the funds. Authority for the States to use the 1956, 1957, and 1958 portions of the Reed Act funds will totally expire on July 1, 1983. In fact, the 1956 authority expired on July 1, 1981, and the 1957 authority expires this summer.

Extension of the Reed Act is supported by the States and will strengthen the Federal-State unemployment system. The administration also supports the Reed Act extension.

I urge my colleagues to support the Grassley amendment which makes a needed change in FUTA coverage as well as two timely extensions of current law.

Mr. GRASSLEY. Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Iowa (Mr. GRASSLEY).

The amendment (UP No. 811) was agreed to.

Mr. DOLE. Mr. President, as far as the Senator from Kansas knows, there are two outstanding amendments, one on mortgage revenue bonds, which I understand is in the process of clearance—if it is not cleared, it will not be offered—and the other is an amendment of the Senator from Colorado, and then the Cannon amendment is still pending. The Senator is discussing that with the distinguished Senator from Delaware.

I wonder if the Senator from Colorado might withhold his amendment a second to see how the other one is progressing.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. I ask unanimous consent that the pending amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 812

Mr. DOLE. I send an amendment to the desk on behalf of Senator DURENBERGER, Senator BRADLEY, Senator DANFORTH, Senator CHAFEE, and a host of others, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Kansas (Mr. DOLE), for himself, Mr. DURENBERGER, Mr. BRADLEY, Mr. DANFORTH, Mr. CHAFEE, Mr. ROTH, Mr. PELL, and Mr. MITCHELL proposes an unprinted amendment numbered 812.

Mr. DOLE. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the amendment add the following:

MORTGAGE SUBSIDY BONDS

(a) Increase in Amount of Mortgage Interest Limitation.—

(1) IN GENERAL.—Paragraph (2) of section 103A(i) (relating to effective rate of mortgage interest) is amended by striking out "1 percentage point" and inserting in lieu thereof "the applicable percentage".

(2) CONFORMING AMENDMENTS.—

(A) Paragraph (2) of section 103A(i) is amended—

(i) by adding at the end thereof the following new subparagraph:

"D) APPLICABLE PERCENTAGE POINTS.—For purposes of this subsection the term 'applicable percentage points' means with respect to any issue 1.0625 percentage points increased (but not in excess of 1.125 percentage points) by 0.01 percentage points for each $10,000,000 by which the aggregate authorized face amount of such issue is less than $100,000,001."; and

(iii) by striking out the caption and inserting in lieu thereof the following:

"(2) LIMITATION ON EFFECTIVE RATE OF MORTGAGE INTEREST.—".

(B) Subparagraph (C) of section 103A(i)(4) of such Code is amended—

(i) by striking out "1 percentage point" in clause (ii) and inserting in lieu thereof "the applicable percentage points", and

(ii) by striking out "1 percentage point" in the caption and inserting in lieu thereof "percentage points".

(b) DISPOSITION OF NONMORTGAGE INVESTMENT IN CASE OF LOSS.—Paragraph (3) of section 103A(i) (relating to nonmortgage investment requirements) is amended by adding at the end thereof the following new subparagraph:

"(D) NO DISPOSITION IN CASE OF LOSS.—This paragraph shall not require the sale or disposition of any investment if such sale or disposition would result in a loss which exceeds the amount which would be paid or credited to the mortgagors under paragraph (4)(A) (but for such sale or disposition) at the time of such sale or disposition.".

(c) INDUSTRIAL DEVELOPMENT BONDS FOR CERTAIN RESIDENTIAL RENTAL PROPERTY.—

(1) IN GENERAL.—Subparagraph (A) of section 103(b)(4) (relating to certain exempt activities) is amended to read as follows:

"(A) projects for residential rental property if each obligation issued pursuant to the issue is in registered form and if at all times during the qualified project period—

"(i) 15 percent or more in the case of targeted area projects, or

"(ii) 20 percent or more in the case of any other project, of the units in each project are to be occupied by individuals of low or moderate income,".

(2) DEFINITIONS.—Subsection (b) of section 103 (relating to industrial development bonds) is amended by adding at the end thereof the following new paragraph:

"(11) PROJECTS FOR RESIDENTIAL RENTAL PROPERTY.—For purposes of paragraph (4)(A)—

"(A) TARGETED AREA PROJECT.—The term 'targeted area project' means—

"(i) a project located in a qualified census tract (within the meaning of section 103A(k)(2)), or

"(ii) an area of chronic economic distress (within the meaning of section 103A(k)(3)).

"(B) QUALIFIED PROJECT PERIOD.—The term 'qualified project period' means the period beginning on the first day on which any of the units in the project are occupied and ending on the later of—

"(i) the date which is 10 years after the date on which 50 percent of the units in the project are occupied,

"(ii) the date which is a qualified number of days after the date on which any of the units in the project are occupied, or

"(iii) the date on which any assistance provided with respect to the project under section 8 of the United States Housing Act of 1937 terminates.

For purposes of clause (ii), the term 'qualified number' means, with respect to an obligation described in paragraph (4)(A), 50 percent of the number of days which comprise the term of the obligation with the longest maturity.

"(C) INDIVIDUALS OF LOW AND MODERATE INCOME.—Individuals of low and moderate income shall be determined by the Secretary in a manner consistent with determinations of lower income families under section 8 of the United States Housing Act of 1937 (or if such program is terminated, under such program as in effect immediately before such termination), except that the percentage of median gross income which qualifies as low or moderate income shall be 80 percent.".

(3) CONFORMING AMENDMENT.—Paragraph (4) of section 103(b) is amended by striking out the second sentence thereof.

(d) EFFECTIVE DATE.—The amendments made by this section shall apply as if included in the amendments made by the Mortgage Subsidy Bond Tax Act of 1980.

Mr. DOLE. This is an amendment to the Mortgage Subsidy Bond Tax Act.

May we have order?

The PRESIDING OFFICER. The Senate will please be in order.

Mr. DOLE. Mr. President, so that the record will be clear, so that everybody who has a question on this particular legislation will understand, when we met last Thursday in the Senate Finance Committee, the Senator from Minnesota, the Senator from New Jersey, and others, raised this amendment. The Senator from Kansas objected to it because of Treasury opposition.

Finally, in an effort to permit the possibility of compromise on all the differences, the Senate Finance Committee, by a vote of 18 to 0, voted to give the chairman the authority to add it or not add it, depending on whether or not we could work it out with Treasury.

In the meantime, the Senator from Kansas last evening met with Treasury officials. I was told that there may be someone in the White House who opposed the amendment. There is a lot of pressure from different people, from different States, with reference to this amendment.

The only area of real controversy is the first section dealing with arbitrage. The other three provisions are supported by Treasury. There have been all kinds of concerns expressed by Senators, by others, and by Governors. I indicated earlier today that if in fact there was no objection to the amendment, I would offer it on behalf of Senator DURENBERGER and others.

Mr. METZENBAUM. I wonder if the Senator would permit us to temporarily lay aside his amendment.

Mr. DOLE. Could I explain it first? Maybe Senator BRADLEY would like to discuss it, too.

I would just say there are four provisions in the amendment.

SINGLE-FAMILY MORTGAGE BONDS

First. Arbitrage limitations on mortgage investments. Under present law, the maximum amount by which the interest rate on mortgages financed with tax-exempt mortgage bonds can exceed the yield on the bonds is one (1.0) percentage point. The proposal would replace the 1.0 percentage point with a rate which varies with the size of the issue, beginning at 1 1/8 percentage points but not to exceed 1 1/8 percentage points. The limitation would be 1.0625 percentage points plus 0.01 percentage points, not to exceed 1.125 percentage points, for each $10,000,000 that the aggregate face amount of the issue was less than $100,000,000.

Second. Loss on reserve liquidations. Under present law, the dollar amount of reserves must be reduced as mortgages are paid off since higher reserves are no longer needed to secure these mortgage amounts. The proposal would provide that this rule would not require the disposition of any asset which would result in a loss to the extent of the excess of arbitrage profit on nonmortgage investments.

INDUSTRIAL DEVELOPMENT BONDS FOR MULTIFAMILY RENTAL PROJECTS

First. Definition of "low or moderate income." Under present law, tax-exempt industrial development bonds can be used for multifamily rental projects only if 20 percent of the units, 15 percent in targeted areas, must be occupied by individuals of low or moderate income. The definition of "low or moderate income" is defined by reference to the meaning of that term under section 8 of the United States Housing Act of 1937.

The proposal would adopt the definition of "low or moderate income" under the section 8 program, except that the applicable percentage will be 80 percent of the area median income, regardless of the percentage used under the section 8 program.

Second. Duration of targeting requirement. Under present law, the 20-percent requirement, 15 percent in targeted areas, must be met for 20 years with respect to any bonds issued before January 1, 1984. The proposal would provide that the 20 percent, 15 percent in targeted areas, requirement must be met until the later of, first, 10 years after more than one-half the project is first occupied, second, a date ending when 50 percent of the maturity of the bond has gone by, or third, the date on which any section 8, or comparable assistance, terminates.

EFFECTIVE DATE

The amendments would be effective as if they were included in the Mortgage Subsidy Bond Tax Act of 1980.

Mr. President, the revenue loss would be $1 million in 1982, $4 million in 1983, $9 million in 1984, $15 million in 1985, and an estimated $22 million in 1986.

Mr. President, I know of absolutely no objection to this amendment. I understand that most State housing agencies think this amendment will greatly improve their ability to float these bonds. I also understand somebody would like to speak on it but I urge that person to come to the floor and speak if we intend to go to conference yet tonight.

I yield to the Senator from New Jersey.

Mr. BRADLEY. Mr. President, I thank the Senator from Kansas. I think this is an important amendment to pass. It gives a one-quarter percent to a 16-percent incentive for housing, it is targeted for low-income people, the multifamily sector. I think it is timely. It is something we should adopt. Every Senator on the Finance Committee voted for it, 18 to 0. I think it is important that we accept the provision.

Mr. DOLE. Mr. President, I ask unanimous consent that, following my statement, a detailed, technical explanation of the amendment be added.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

(Detailed, Technical Explanation of Amendments to the Mortgage Subsidy Bond Tax Act (Amendment to Sections 103 and 103A of the Code))

PRESENT LAW

Single-family mortgage bonds.

Arbitrage limitations on mortgage investments.—Under present law, the maximum amount by which the interest rate on mortgages financed with tax-exempt mortgage bonds can exceed the yield on the bonds is one (1.0) percentage point.

Loss on reserve liquidations.—Under present law, the dollar amount of reserves must be reduced as mortgages are paid off since higher reserves are no longer needed to secure these mortgage amounts.

Industrial development bonds for multifamily rental projects.

Definition of "low or moderate income".—Under present law, tax-exempt industrial development bonds can be used for multi-family rental projects only if 20 percent of the units (15 percent in targeted areas) must be occupied by individuals of "low or moderate income." The definition of "low or moderate income" is defined by reference to the meaning of that term under section 8 of the United States Housing Act of 1937.

Duration of targeting requirement.—Under present law, the 20-percent requirement (15 percent in targeted areas) must be met for 20 years with respect to any bonds issued before January 1, 1984.

REASON FOR CHANGE

The Mortgage Subsidy Bond Tax Act of 1980 placed a number of restrictions on the use of tax-exempt bonds for single- and multi-family housing. Several modifications of the rules relating to multi-family housing are necessary to make the provisions work properly. The committee believes that an increase to the limit relating to arbitrage is necessary to allow the issuer to recover the cost of issuance.

EXPLANATION OF PROVISION

Single-family mortage bonds.

Arbitrage limitations on mortgage investments.—The amendment will replace the 1.0 percentage point with a rate which varies with the size of the issue, beginning at one and one-sixteenth (1 1/16) percentage points but not to exceed one and one-eighth (1 1/8) percentage points. The limitation is 1.0625 percentage points plus 0.01 percentage point (not to exceed 1.125 percentage points) for each $10 million that the aggregate face amount of the issue was less than $100 million.

Loss on reserve liquidations.—The amendment provides that the rule of present law requiring liquidations of reserves will not apply to the extent it requires the disposition of any asset at a loss in excess of the amount of undistributed arbitrage profits on nonmortage investments at such time. However, the rule will continue to apply if there are assets in the reserves which are not in loss positions and which can be sold to meet the liquidation rule. Similarly, the rule will cease to apply where loss assets appreciate so that they no longer are in a loss position.

Industrial development bonds for multifamily rental projects.

Definition of "low or moderate income."—The amendment provides a separate definition of individuals of "low or moderate income" by adopting the definition of "low or moderate income" under the section 8 program except that the applicable percentage will be 80 percent of area median income (regardless of the percentage used under the Section 8 program).

Duration of targeting requirement.—The amendment also provides that the requirement that 20 percent of the housing units be occupied by individuals of low or moderate means (15 percent in targeted areas) applies from the date the project is first occupied and continues until the later of (1) 10 years after over one-half the project is first occupied, (2) a date ending when 50 percent of the maturity of the longest bond in this issue has gone by, or (3) the date on which any section 8 (or comparable) assistance terminates.

EFFECT DATE

The amendment is effective as if included in the Mortgage Subsidy Bond Tax Act of 1980.

REVENUE EFFECT

The amendment is estimated to reduce fiscal year budget receipts by $1 million in 1982, $4 million in 1983, $9 million in 1984, $15 million in 1985, and $22 million in 1986.

Mr. SASSER. Mr. President, I want to make my position very, very clear on a matter of great importance to me, and to quite a few other Members of this body. The mortgage revenue bond program, which has the potential to spur the production or resale of hundreds of thousands of units of housing in this country, is still mired in legal and regulatory redtape. And this bill, this appro-

priate and available vehicle for addressing those problems, does not redress the problems of the 1980 mortgage subsidy bond program.

All of us here are aware of the disastrous condition of the housing and realty industries. All of us know that it is virtually impossible for first-time buyers to purchase a home. Many of us are aware of the ability of the mortgage revenue bond program, when it works, to provide at least a minimal safety net for the homebuying market.

There are 40 cosponsors on my bill (S. 1348) to make this program work. Forty percent of the Senate have taken an initiative in meeting an increasingly desperate economic, commercial and social need, and it was my hope and belief that the Finance Committee could have found the means and the will to reach agreement.

Now, I want to commend my friend from Minnesota Senator DURENBERGER for his role in working within the Finance Committee to try to make the mortgage bond program work, at least in a few States, to demonstrate the value of this approach. A number of other members of the committee also spoke out in favor of a partial remedy. There was so much support for a remedy, in fact, that the Finance Committee voted 18 to 0 in favor of resolving the very difficult issues that affect the mortgage revenue bond program.

Those issues, most unfortunately, have not been fully resolved. There are a number of them that should be addressed, and that I fully expect will be addressed early in the next session of Congress. The key issues are the limitations on arbitrage and yield on the bonds. In essence, the spread between the bond sale price and the mortgage interest rate, and the use of those proceeds, are the key determinant of whether or not a State or local government will be able to structure a sound and secure bond issue. This is what arbitrage and yield are all about: Enabling the issuer to create and operate a solvent, dependable mortgage bond program.

It has been clearly demonstrated in case after case that the limitations under current law are inadequate. Documentation provided to me, regarding a significant proportion of potential issuers in States all across the country, indicate that even the modest increases in arbitrage and yield proposed by Senator DURENBERGER are inadequate.

I am looking forward to working further with the Senate Finance Committee and with the Department of the Treasury and with the Joint Tax Committee, and with any other interested parties in bringing this matter to a succesful resolution. We—and I mean the economy, the home buyers, the State and local authorities trying to house their populations, and the entire range of housing and realty industries—need an effective mortgage bond program.

It is in the spirit of constructive compromise that I am seeking to bring this very important matter to the attention of my colleagues. The time for constructive action is now, in this calendar year, in this phase of allocations, in this continuing trough of the deepest and most prolonged housing recession since the Second World War.

Finally, Mr. President, I ask unanimous consent that a statement from the Tennessee Building Material Association in support of my mortgage bond legislation (S. 1348) be entered into the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TENNESSEE BUILDING MATERIAL ASSOCIATION,
Nashville, Tenn., December 7, 1981.

To: All Managing Officers: National Lumber and Building Material Dealers Association; National Ready Mixed Concrete Association; National Concrete Masonry Association.

From: Stan Owens, Executive Vice President.

Subject: Pending Housing Bond Legislation.

Enclosed is a copy of a Status Report on the "Pending Housing Bond Legislation" in Congress from Grady Haynes, Chairman of the Tennessee Housing Development Agency, which is self-explanatory.

As you will note from the Report, 34 Senators and 107 Representatives have signed S 1348 and HR 3614, with both of our Tennessee Senators and all eight Members of the House from Tennessee Sponsoring or Co-Sponsoring the Bill.

Since this pending Legislation is so important to our industry, we hope you will immediately contact your Delegation(s) to cosponsor or at least support and use their influence to help pass this Legislation as soon as possible.

Many thanks for your cooperation.

STATUS REPORT ON THE PENDING HOUSING BOND LEGISLATION

(By Grady R. Haynes, Chairman, Tennessee Housing Development Agency)

In view of the fact that the Treasury Department has sufficiently modified its position regarding the tax exempt status of housing bonds to enable THDA and a few other state agencies to make a bond issue, I have been asked to update our position on the need for the passage of H.R. 3614 sponsored by John Duncan of Tennessee and S. 1348 sponsored by Senator Jim Sasser of Tennessee.

After a thorough discussion with our bond council, bond underwriters, the THDA staff, and based on the problems encountered in the preparation for the pending THDA bond sale, our consensus opinion is as follows:

(1) H.R. 3614 and S. 1348 needs to be passed intact—with the possible addition of a suitable multifamily amendment.

(2) The arbitrage restrictions could be reduced to a minimum of 1¼ percent. Any further reduction would require a front end subsidy and agencies who are not in a position to subsidize will simply be unable to issue bonds.

(3) The passage of this Legislation intact would result in at least a 1-percent reduction in interest rates for qualified home buyers (included in this figure is the one-half-per cent expense for registering bonds).

(4) The fact that state housing finance agencies have been able to create some surpluses recently (which can be used as subsidy money) is possible because short term interest rates have been unusually high. Obviously as short term rates fall this ability to earn on arbitrage will be reduced—in fact, negative arbitrage earnings are very likely to occur in the near future.

(5) Because the recent ruling by Treasury came too late for most agencies (including THDA) to use all of their 1981 allocation—the deadline for states to use their 1981 allocation should be extended until July 1, 1982.

In addition to the above views, I would like to submit some personal observations of my own.

I am somewhat puzzled and disappointed that this bill has not already passed—in view of the fact that 34 Senators and 107 members of the House have signed this bill and very little opposition or criticism has been offered by any member of Congress on the merits of this bill.

It is quite obvious that the bureaucratic Treasury Department is opposed to any changes in legislation that would make the tax exempt revenue bond program for housing workable. In fact, their ruling on the tax exempt status of housing bonds stopped short of completely clarifying this issue and has made it necessary for bond counsel to include a disclosure in their legal opinion that under certain circumstances these bonds could become taxable.

The additional paper requirements and staff work that has been necessary to prepare the present bond sale for THDA as compared with the issue THDA made last year is ridiculous—when you consider that the end result is virtually the same—except for the substantial added cost.

To achieve the objectives of limiting the amount of housing bonds to be issued and establishing the maximum income of families to receive the benefits could have been achieved by a simple short bill—properly leaving the implementation details to the states. Since this end result is apparently impossible to achieve at this time—at least we should expect our elected representatives in Congress to make these unnecessary federal regulations as simple and workable as possible. I submit that this is exactly what the Duncan-Sasser Bill does.

I applaud the efforts being made by Congress to cut bureaucratic federal regulations and red tape. So, what's wrong with applying a little front end surgery on housing bond regulations and help reduce interest costs to thousands of deserving moderate income families.

The Duncan-Sasser Bill deserves to be passed—based on its own merits.

Mr. CHAFEE. Mr. President, I want to express my support for Senator DURENBERGER's amendment affecting mortgage revenue bond programs. He has worked diligently and is certainly to be commended for drafting an effective compromise on this complex issue.

For the past several years, a majority of Rhode Island homebuyers has benefited from from reduced rate mortgages provided through bonds issued by the Rhode Island Housing & Mortgage Finance Corp.

As a result of the highly restrictive mortgage subsidy bond legislation enacted last year and, of course, as a result of sky-high interest rates, the housing market in my State and other States has literally collapsed.

Given this devastating situation confronting prospective homebuyers, homebuilders, and realtors, it is extremely important that we adopt these modest changes that will help State housing agencies, such as RIHMFC, get back into the business of supporting housing.

Mr. DOLE. Mr. President, it is my understanding that the Senator from Tennessee (Mr. SASSER) is on his way to the floor. We would like to proceed. I might say to my colleagues, if we are going to go to conference with this bill, we are going to have to do it rather quickly. I wonder if anybody has been able to contact Senator SASSER. I do not want to deny anybody the right to speak.

Mr. President, I know the majority leader is getting nervous. There is only one other amendment, one by the Sen-

ator from Colorado (Mr. HART). I know it will be short.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Kansas (Mr. DOLE).

The amendment (UP No. 812) was agreed to.

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from Nevada.

Mr. DOLE. Mr. President, I ask unanimous consent that that amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 813

Mr. HART. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Colorado (Mr. HART), for himself and Mr. KENNEDY, proposes an unprinted amendment numbered 813.

Strike everything after the word "because" on line 2 and at the appropriate place in the bill, insert the following:

Because the Congress finds that it is in the interest of the United States to combat international terrorism, and

Because, the present regime in Libya is aiding and abetting international terrorism, and

Because, the President is in the process of considering appropriate measures against Libya that could include a prohibition on the import of Libyan oil,

Therefore, it is declared the sense of the Senate that the President should now act to impose a ban on the import of Libyan oil into the United States. It is further the sense of the Senate the President should (1) actively urge all nations, including our European allies and Japan, to strengthen their cooperation against international terrorism and (2) coordinate international measures to establish and maintain a total prohibition of all imports of Libyan oil, in order to bring to the earliest possible end the international terrorist practices of the current Libyan regime.

The PRESIDING OFFICER. The Senate will be in order.

The Senator from Colorado.

Mr. HART. Mr. President, over the past 3 or more months, the Senator from Colorado as well as others have joined in an effort to educate the U.S. Senate, our colleagues, and the American people to the degree of support which our country has been lending over the past number of years, financially, to the regime of Colonel Qadhafi, described by many as the most terrorist-oriented regime in the world.

During that time, the Senate has voted once, some 2 months ago, on an amendment which would have banned the import of oil from Libya into this country within a 90-day period. That amendment was proposed by the distinguished Senator from Kansas (Mrs. KASSEBAUM), the Senator from Massachusetts (Mr. KENNEDY), and me.

As recently as last week, the Senator from Colorado offered a variation of that amendment which would have placed the Senate on record, in the form of a sense-of-the-Senate resolution, in support of the President if he chose to take action to impose an embargo or a ban on oil being imported from Libya.

After the strong urging of our very esteemed and respected majority leader, the Senator from Tennessee, it was the decision of the sponsors of that resolution to withdraw it, to give the administration time which it seemed to desire to formulate and propound a policy toward the regime in Libya.

The Senator from Tennessee, the majority leader, at that time asked for some 24 to 48 hours, stating—I believe on behalf of the White House and the administration—that that was the time necessary to announce the President's decision.

As we know, based upon the President's statements and actions since then, the White House and the President have taken steps to urge Americans in Libya, some 1,500 to 2,000, to withdraw, in the interest of their own safety and our own national interests.

Mr. President, it seems to this Senator as well as others that in addition to that step, others must now be taken.

We are well aware that, through financial means, weapons, and other means at Colonel Qadhafi's disposal, including the harboring of criminals and terrorists in his own country, that this regime and this individual have alined themselves with almost every separatist and terrorist organization, one way or another, in the world.

It is the position of our own intelligence community that Colonel Qadhafi has been responsible for ordering the deaths of almost a dozen dissident Libyans living abroad. There has been an assassination attempt on a Libyan student residing in my State. Happily, it failed, but barely. The perpetrator of that effort has gone to trial in my State during the last few weeks.

Mr. President, I believe the time has come for responsible Members of the Senate to place this body on record as opposing continued financial support by this country, through the purchase of Libyan oil, of this kind of activity.

Members of the administration have stated at great length how inimical to the interests of the United States the actions of Colonel Qadhafi and his regime are.

The President of the United States has gone on record in recent days as discussing the possibility—I think he has gone beyond saying it is a possibility; he said it is a fact—that agents of the Libyan Government have come to this country for the purpose of assassinating high-level Government officials, including perhaps even the President of the United States.

Yet, Mr. President, in spite of the actions which the White House has taken and in spite of the rhetoric of Members of the U.S. Congress and the White House and the administration, our support for Colonel Qadhafi and international terrorism continues. We are still importing close to 200,000 barrels of Libyan oil a day, even though the Government of the United States finally, as recently as this September, terminated its own purchases of Libyan oil for the strategic petroleum reserve.

There is nothing in the world that, given international market forces, might not bring our own Government back to a position of itself being a principal importer of terrorist oil. It has been argued that an embargo would not be effective. There are some strong arguments, given the status of the world marketplace, that that is not the case; that, given decreased demands, given the high price of Libyan crude and refined products, and given the fact that the Libyan exports have not followed market trends, our own withdrawal of purchases would have a very serious effect.

Even if that were not the case—and this is the fundamental point the Senator from Colorado should like to make here—it is the right thing to do. I think there are times in a Nation's history when great nations have to do what is right, in spite of whether it is in fact politically effective.

I invite the attention of my colleagues to a quotation from our own Secretary of State, which was published in the New York Times on December 12, within the last few days. It was remarked by the reporter, in that front page story, that "Mr. Haig seemed to deviate from the official explanation for the American action"—being the movement toward getting international support for withdrawal of the purchase of Libyan oil—"by attributing it more to moral outrage than to the safety of Americans." The Secretary is quoted as saying:

Each nation is entitled to draw its own conclusions with respect to Libyan activity, he said, "but for our part we no longer believe that a double standard with respect to international lawlessness and terrorism, especially when it is targeted on American officials, is a contributor to international peace and stability and the rule of law which we all seek to espouse. And therefore we've taken these minor steps."

Mr. President, if the moral argument which the Secretary of State makes is a sound one, and I firmly believe it is—and I made that argument 2 or 3 months ago—then it should extend beyond these minor steps which the Secretary of State commented on—namely, the American withdrawal—and extend to the actual purchase of Libyan oil by American interests.

This is the fundamental point. Whether it ever has any impact on the activities of Colonel Qadhafi or not, it is fundamentally wrong for American public or private interests to be financing terrorism conducted by the Libyan Government or by anyone else.

Therefore, I offer this sense of the Senate resolution to put the U.S. Senate on record as urging the President to impose an embargo, a total ban, on the importation of oil from Libya, as an adjunct to and supplement to the steps he already has taken.

I say to my distinguished friend, the Senator from Kansas, the floor manager of the bill, that I wish it were not necessary to raise this issue on the final day and the final hours of this session, particularly on a Finance Committee bill. This proposal has been forced upon the Senator from Colorado by the urgings of the Senator from Tennessee, the majority leader, to withhold, last week or the week before, and by the failure of any other appropriate vehicle to emerge

here in the closing hours of this session of the Senate.

I believe that this measure can be taken to conference and, given the persuasiveness of our colleagues who will be representing the Senate in the deliberations, they can urge their House counterparts to accept this rather modest proposal. I hope my colleagues will agree to support this sense-of-the-Senate resolution.

Finally, Mr. President, I make one observation: Last night, the Senate put itself on record overwhelmingly—I think unanimously—in support of a resolution supporting Solidarity in Poland and putting the U.S. Senate on record, morally, as opposing Soviet intervention in that country. I believe—and I think other colleagues and the American people will believe—that similar proposals apply in this instance.

For those reasons, I hope that my colleagues will see fit to support and adopt this resolution in the closing hours of this session of the Senate.

After high-level deliberations, the administration has decided to reconsider the nature of American relations with Libya. Last week, the administration announced the United States would no longer issue passports to Americans going to Libya. In addition, the administration urged all Americans in Libya to leave that country.

I welcome the administration's attention to this matter. But I am afraid the administration's policy does not go far enough. It does not impose an embargo on American imports of Libyan oil.

American support for Libya is unconscionable. The facts are simple and straightforward. So long as the U.S. imports Libyan oil, our petrodollars replenish Qadhafi's treasuries. So long as we import Libyan oil, we help to finance international terrorism. If the United States is to have any meaningful policy on international terrorism, it must end the embarrassing spectacle of condemning Qadhafi with words while supporting him with petrodollars.

For that reason, I am offering a resolution calling on the President to impose a ban on all American imports of Libyan oil.

From the day Qadhafi sheltered the murderers of the 1972 Israeli Olympic team, his name has been an international synonym for violence, terror, and murder. With words, money, and arms, he has supported nearly every violent separatist movement of the last decade. Qadhafi has plotted assassinations and other forms of subversion in Gambia, Niger, and Senegal. His hit teams have killed at least 10 Libyan dissidents living abroad. And now Federal officials are looking for the latest Libyan hit squad—this one reportedly sent by Qadhafi to assassinate the President and other prominent administration officials.

Qadhafi's military ventures are equally notorious. He foments violence and instability throughout northern Africa and the Middle East. He has threatened the security of nations friendly to the United States such as Mali, Niger, Sudan, Egypt, and Saudi Arabia. He trained and supported the invaders of Chad, Libya's southern neighbor. And last August, Qadhafi's planes attacked American jets flying over international waters in the Mediterranean.

Libya's neighbors have been close to unanimous in their condemnation of Qadhafi. Not only have Senegal, Gambia, and Ghana severed diplomatic relations with Libya, but also some nations have hinted that military assistance from France to defend themselves against Libya would be welcome.

An even more serious threat to world peace concerns Qadhafi's efforts to make Libya a nuclear power. He has spent—and will continue to spend—considerable amounts of money to persuade governments with nuclear technology, such as Pakistan, to enter agreements for nuclear cooperation. He has purchased large quantities of yellow-cake uranium from Niger, passing these on to Pakistan in further support of the latter's nuclear program. Through judicious use of financial payments, he hopes to buy technology enabling Libya to enrich uranium to weapons-grade material.

The day may soon arrive when terrorists play a deadly game of nuclear blackmail; a Libya armed with nuclear technology would be an all-too-likely ally of nuclear terrorism. To further its nuclear ambitions, Qadhafi needs financial resources. The United States must use every means available to insure that Libya's income is further reduced, thereby forcing a reduction of Qadhafi's freewheeling activities in the nuclear arena.

The threat is clear. Qadhafi is, in the words of Anwar Sadat, a "certified lunatic." He is a man with whom the United States should not be doing business. But in this case, expediency has ruled.

Importing Libyan oil has been economically expedient for the United States. Despite its high cost, Libya's light, sweet crude is prized for its refining qualities. It is easier and less expensive to refine into light petroleum products like gasoline than heavier oils. Even the U.S. Government has not been able to resist. Among the 32 importers of Libyan oil to the United States, the Federal Government ranks fifth, a policy that makes a travesty of American policies on international terrorism.

In recent months, the United States has been the greatest single importer of Libyan oil. In August, we bought 275,000 barrels of Libyan oil every day—almost 40 percent of all Libyan oil exports. At $40 a barrel, that is more than $11 million a day.

In September, American imports from Libya fell to 154,000 barrels but we still ranked as the largest importer of Libyan oil.

Many Senators have questioned the efficacy of proposals to ban American imports of Libyan oil. They contend that by prohibiting the import of Libyan oil to the United States we bring greater hardship on ourselves than on the Libyans. But this is clearly not the case, especially if the embargo is imposed now while there is a surplus in world oil markets.

At present, the Libyans are having a hard time finding markets for their oil. Since last year, Libyan oil exports have fallen from 1.8 million barrels per day to 600,000 barrels a day. Even with a lower price, it is not certain the Libyans will be able to find new markets for their oil. With the current surplus in world oil markets, oil-importing nations like the United States can buy from other exporters, including Nigeria who offers a light, sweet crude comparable to the one sold by Libya.

In August, Nigeria was pumping only 648,000 barrels of its light, sweet crude, compared to an average 2 million barrels per day in 1980. Nigeria would be a ready supplier of crude to importers who would otherwise be tempted to buy Libyan crude. In fact, it could more than make up the loss of crude on world markets, if all importers decided to pass over Libyan crude.

Libya poses a direct threat to world peace and security. If the United States is serious about combating international terrorism it must cut off the flow of American petrodollars to Libya. It is not only a morally responsible policy but there is a good chance such a policy will curb Libyan-sponsored terrorists.

Mr. President, one more point. I ask unanimous consent to modify my amendment to say, "At the appropriate place in the substitute," just to make it conform with the pending measure.

Mr. DOLE. Mr. President, I certainly appreciate the desire of the distinguished Senator from Colorado to make the point on Libya. I also have a dual responsibility. If we are going to go to conference on this tax bill, and there are about 20 Members who would wish to do that in this Chamber, but we cannot put on extraneous even though they are only sense-of-the-Senate resolutions.

So I just suggest to my colleagues that I believe the President has a policy. I believe that ordering the Americans home, and they are coming home, should be the first step. Without getting into that, I just hope that we could, if the Senator wants a vote, to permit me to move to table the resolution and then, as far as I know, there will be no other amendments to the tax bill, and we could go to final passage and try to go to conference yet this evening.

Mr. LONG. Mr. President, will the Senator yield at that point?

Mr. DOLE. I yield.

Mr. LONG. Mr. President, it was the understanding of Senators on the committee that we were not going to accept controversial amendments to this bill. As far as this Senator is concerned, this is a controversial amendment. I heard the Senator's statement and he eloquently states his side of the argument. On the other hand, it could very well be that the evidence that has been provided the President might not stand up under the kind of test that the American system of justice insists upon, and it may be that people who provide this information might have some reason that some of us might not know anything about, that it might not be the kind of evidence that could meet the test that Americans would demand under the provision that calls for a fair trial, for example.

I do not think that Senators would want to feel that they acted impulsively or by their action caused the Libyan

Government to confiscate the investments of Americans who are already being told they cannot be over there, they have to come back.

If the President wants to cut off shipments from Libya it seems to me he is the one who should ask for it. Short of that, I think this Nation ought to speak with one voice and we ought to have the leadership of the President and we should not grab the bit in our teeth and go charging off ourselves with our own separate foreign policy unless the President sees fit to ask us for his support in this matter. If he wants to ask for it, I will support it.

Otherwise, I do not think we should get engaged in all this.

May I point at this stage that if we get into matters of this sort, for all I know, someone will next be on his feet wishing to offer an amendment taking the attitude of the New York Times and the Washington Post for Mr. Begin to annex this additional territory to Israel and might get us into a warlike situation that we do not like.

There are all kinds of things that we would get involved in on foreign policy and other things on what is supposed to be a bill, that has no controversy to it, to correct a few inequities in the tax law.

Mr. President, I hope that the Senator's motion to table will be agreed to.

Mr. HART. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HART. Mr. President, let me respond in just 1 minute.

First of all, the Senator from Kansas and the Senator from Louisiana, both I think on occasion have attached so-called extraneous amendments to bills particularly in the closing hours of the session when no other option was available.

Second, the Senator from Colorado is not charging off nor is he urging the Senate to charge off in creating some independent foreign policy. The Constitution gives this body certain authority and certain responsibility in the foreign policy area. I see no reason why not to exercise it in a restrained, modest, and thoughtful way which is to urge the President to take certain action in which a majority of Senators may believe.

So I only hope that Senators will exercise their own judgment, whether in the closing hours of the session or some other time, whether it is seemly for the United States of America to be buying oil from the world's principal terrorist, period.

Mr. KENNEDY. Mr. President, I join my friend and colleague, Senator HART, in offering this amendment calling for action to prohibit the importation of oil from Libya. In October Senator HART and I sponsored a similar amendment to the 1982–83 foreign assistance authorization bill. Today, I remain as firmly convinced, as I did then, that our Government must take such an action.

The administration claims that the United States is opposed to state supported terrorism. Yet this administration continues to permit American oil companies to import Libyan oil—for which Americans paid more than $7 billion in 1980. Among other things this money was used to aid and abet international terrorism. Colonel Qadhafi used this money to finance hit squads to eliminate Libyans who disagreed with this policies. And in recent weeks, we have all seen the reports that these hit squads may have been dispatched against officials of our own Government.

It is time for our energy policy to be consistent with our foreign policy. If we truly oppose the terrorism and aggressive policies of the Qadhafi regime, then we should not pay that regime billions of dollars to import oil and thereby subsidize those policies to which we strenuously object. Without an end to this unseemly commercial relationship with Libya the United States will lack the necessary moral basis to organize the broader international political and, if necessary, military response to put an end to gross Libyan violations of international law.

Further Colonel Qadhafi has used this money to make massive purchases of Soviet military equipment. Let us be clear about his objectives.

First, he is committed to obstruct efforts for peace in the Middle East: Libya is in the forefront of the rejectionist states—states adamantly opposed to the Camp David peace process. Qadhafi provides extensive financial support to the PLO and to other radical terrorist groups in the area. He applauds the success of assassinations against such men as President Sadat and those moderate West Bank leaders who dare to strive for peace.

Second, Libya promotes revolution in the states of North Africa and the Middle East. From Gambia in West Africa to North Yemen in the Middle East, Libya has sponsored attempts to overthrow the existing governments.

Third, he uses Libya's military to interfere in the affairs of other nations. In Chad, Libyan military forces intervened directly in the civil war, violating one of the most fundamental principles of the United Nations and the Organization of African Unity. And in Egypt, Libya has allegedly sent teams and funded organizations having as their sole purpose the overthrow to the Government of Egypt.

Libya is the country and Qadhafi the man who carry out these policies committed to violence, assassination, and other acts of terrorism. We should not continue to buy Libyan oil and thereby provide them with the revenue to pay for their terrorist agents and to commit aggression against their neighbors.

Mr. President, I ask unanimous consent to include in the RECORD the text of the letter which I wrote Secretary Haig on November 23, setting forth my views and recommendations on this subject. I also request unanimous consent to include the text of my letter to the New York Times on December 10.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., November 23, 1981.

Hon. ALEXANDER M. HAIG, JR.,
Secretary of State,
Washington, D.C.

DEAR MR. SECRETARY: I have long believed that the United States should disassociate itself from the terrorist regime in Libya. At this time of tension in the Middle East and North Africa, the United States should not conduct itself in any way that contributes to a regime committed to violence, assassination, and other acts of international terrorism.

Each day, however, the United States pays vast amounts to Libya for oil—over $7 billion in 1980, over $4 billion through July of 1981. It is unconscionable that dollars from the United States are used to finance the worldwide campaign of terrorism and violence conducted by the Government of Libya. For this reason, on October 21, I co-sponsored an amendment to the 1981 Foreign Assistance Authorization bill which would have prohibited all purchases of oil from Libya by the United States, by U.S. firms or by U.S. citizens.

Although that amendment was narrowly defeated, the Senate condemned the Libyan government and called for an immediate review of the concrete steps the United States could take to bring economic and political pressure on Libya to cease its efforts to support international terrorism, to obstruct the search for peace in the Middle East, and to destabilize and control governments in neighboring states.

I continue to believe it is inexcusable for the United States to be the world's largest customer for Libyan oil. Colonel Qadhafi and his lieutenants are working with the PLO and other terrorists to destroy the State of Israel. They are sponsoring and funding assassination attempts in the Middle East, in Europe, and even in the United States. In this regard, it has come to my attention that Colonel Qadhafi may well have been behind the assassination of President Sadat. The secret organization which carried out this act of terrorism is reportedly named Jihad and is the same Libyan-backed organization that was implicated in a raid on a police station in Alexandria, Egypt, in January 1980.

In short, Libya today stands condemned by the actions and words of its own leader. It is time for us to sever the oil pipeline that pours billions of American dollars into the Qadhafi arsenal. I was pleased to read reports that you, too, believe we should move toward an embargo of Libya. As you are aware, Exxon has already announced it is closing its operations in Libya, and Mobil is reviewing its situation in that country.

I strongly urge the Administration to act immediately to embargo Libya to demonstrate our opposition to international terrorism and to policies which seek to undermine the stability of friends in the area such as Israel, Egypt, Tunisia, and the Sudan. I would also urge that the Administration persuade our friends and allies to join us in this embargo to underscore clearly that any regime, which is behind irresponsible actions such as those taken by the Qadhafi-led government, will be isolated internationally.

I look forward to hearing your views on both an immediate embargo and on other actions that could be taken against Libya to protect U.S. interests.

Sincerely,

EDWARD M. KENNEDY.

PUT AN EMBARGO ON ALL LIBYAN OIL

To the Editor: In your Dec. 10 editorial "Fighting Qadhafi With a Wet Noodle," you state that "the unhappy truth is that an oil embargo can't work" as a counter to Libyan terrorism.

As a co-sponsor of Senate legislation to end all oil imports from Libya, I believe that it is unconscionable for the United States and other countries to spend billions of dollars for Libyan oil, which will then be used to finance acts of aggression and terrorism, including assassination attempts against our leaders and our representatives overseas.

Without an end to this unseemly commercial relationship with Libya, the United States will lack the necessary moral basis to organize the broader international political and, if necessary, military response to put an

end to gross Libyan violations of international law.

I therefore welcome President Reagan's decision to call upon all Americans to leave Libya and all American companies to scale down their operations, but I believe that a complete embargo is the necessary next step if our policy on Libya is to achieve credibility at home and abroad.

EDWARD M. KENNEDY,
U.S. Senator from Massachusetts.

Mr. KENNEDY. I also ask unanimous consent to have printed in the RECORD an important editorial, "Time to Boycott Libyan Oil," which appeared in the Oil Daily on December 11, 1981.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Oil Daily, Dec. 11, 1981]

TIME TO BOYCOTT LIBYAN OIL

The escalating war of words between Tripoli and Washington entered dangerous territory this week when leaders of the United States and Libya accused each of plotting to assassinate the other. The open hostility between the nations naturally brings questions about why the United States continues to do business with so hostile a government as Libya—particularly under the present circumstances.

Those questions are fueling calls for a U.S. trade embargo of Libyan goods similar to that invoked by the Carter administration against Iran at the beginning of the hostage crisis. And since Libya, like Iran, has only one concrete export commodity to the U.S.—oil—this would amount to a Libyan oil boycott by the United States.

The direct impact of such a boycott on this country's supplies would be minimal. The United States depends on Libya for only about 5 percent of its total crude oil imports and less than 2 percent of total crude supplies. Exxon Corp. has already left the North African country, while two of the three remaining U.S. firms, Mobil and Conoco, are watching the situation day-by-day. But neither has lifted any Libyan oil since summer. Only Occidental, which reportedly lifts 78,000 barrels daily, is still buying Libyan crude.

Libya is already feeling pressure from the worldwide oil surplus. Its production, which still topped more than 1 million b/d last summer, dropped to around 600,000 b/d by September, due mostly to its defiantly high prices. Failure by the Organization of Petroleum Exporting Countries to seriously consider a long-term pricing and production strategy is mostly due to Libya and other pricing hawks having to adjust premiums to more realistic levels.

So Libya's economic isolation has already begun. The question the Reagan administration is probably asking as it considers the boycott option is whether such a move will deepen that isolation. Without cooperation from other major consuming countries, it can't succeed as an economic sanction since Libya could merely sell its crude elsewhere.

Moreover, the administration must be considering what reaction a boycott would have within OPEC: The pricing moderates are undoubtedly miffed at the Qadhafi government not only over resistance to long-term strategy proposals but also because of its running political and territorial disputes with neighbors, many of which are producing countries themselves. The question is whether such key producers as Saudi Arabia would accept economic moves against Libya or choose instead to preserve the cartel, reduce oil revenues for a time and halt production.

Once these long-term questions are resolved, however, and the companies doing business in Libya given time to evacuate personnel and line up alternative supplies, an end to U.S. purchases of Libyan oil seems likely. Given the current market conditions and the small role Libyan crude actually plays in the U.S. energy picture as well as the demonstrated hostility of the Qadhafi government, it's a step worth taking.

Otherwise, we're in the quite peculiar situation of doing business with a nation led by a man who President Reagan himself says has probably ordered the assassination of leaders of our own nation—a prospect that is not an acceptable alternative for the leader of the free world.

ACTION AGAINST LIBYA IS WARRANTED NOW

Mr. MITCHELL. Mr. President, for almost 2 weeks, our Government has operated on the dreadful assumption that the President of the United States and other high officials have been targeted for assassination by teams of terrorists under the direction of Libya.

There is now a consensus in this country that the United States should take action against Libya, a nation whose leadership appears determined to continually violate accepted international law and to disrupt and—in some cases—overthrow, states which it opposes or wishes to dominate.

Direct action by the United States against Libya must be taken.

Every Member of this Congress, regardless of party, should in his or her own way, condemn Libya for its continued involvement in terrorist activities. All peace-loving nations of the world must apply the influence they possess to stop the kind of destabilizing activity which has become the hallmark of Libya and its President, Colonel Qadhafi, a man characterized by the late Anwar Sadat as "* * * 100 percent sick and possessed of the demon."

As distressing as the report of the Libyan terrorist squad is, it is only the latest chapter in a continuing saga of terrorist activity sanctioned by Colonel Qadhafi. He is reported to have lent substantial support to separatist groups in the Basque region of Spain and in Italy; to have infiltrated fundamentalist hit squads into Egypt; to have actively sought the overthrow of Sudanese President Numeiri, a friend of the United States; to have ordered and obtained the elimination of Libyan dissidents outside of Libya; and to have permitted a raging mob to sack and burn the U.S. Embassy in Tripoli in 1979.

Under 12 years of Qadhafi's rule, Libya has gained world recognition as an exporter of two things: Terrorism and petroleum. The former is financed by the revenues from the latter. Only in recent weeks have the American people become aware that the United States is the primary buyer of the Libyan petroleum which generates the cash for Qadhafi's illegal, immoral, and destabilizing plots.

We paid Libya $7 billion for oil in 1980. By July of this year, we had sent to Libya an additional $4 billion. Each day, over 350,000 barrels of Libyan petroleum enters the United States.

Though the United States is economically vital to the prosperity of the Qadhafi regime and the maintenance of Libya's reputation as the "Patron Saint" of terrorists, Libyan crude is not crucial to the economic future of the United States. In fact, Libya provides just 2 percent of all the petroleum which we consume, and only 5 percent of the petroleum which we import.

If the United States is seriously concerned about the terrorist activities which Western intelligence agencies indicate could not be conducted without Libya's cooperation and financial support, why does not this country, in cooperation with its allies, phase out the importation of Libyan petroleum? By so doing, the United States could substantially curtail Libyan-sponsored adventurism and could do so without crippling American interests.

The Reagan administration is being presented with a foreign policy option which it should not pass up. The administration has spoken at great length about its commitment to halt the spread of terrorism. By instituting a prompt phaseout of Libyan oil imports, President Reagan would be backing up his administration's words with concrete action.

Seven weeks ago, during the Senate's consideration of the foreign assistance authorization bill for fiscal year 1982, I cosponsored an amendment offered by Senator HART which would have resulted in a complete phaseout of Libyan oil within 90 days. Ironically enough, the Reagan administration urged Senators to oppose Senator HART's proposal, and to support a mere study of the ways in which pressure could be brought to bear against Libya. I believe now, as I did then, that the time for studies is past and that firm action is urgently required.

I hope that the reports of Libyan hit men searching for their American targets here in the United States are sufficient to convince the President that he should act quickly to stop the flow of American dollars to Libya by taking immediate steps to terminate the U.S. importation of Libyan oil.

Mr. DOLE. Mr. President, I yield to the distinguished majority leader.

Mr. BAKER. Mr. President, before we go to a vote on this amendment, it is almost 5 o'clock and honestly I had thought, and it is my fault, but I thought we would finish this bill much, much before this.

We have the identities bill yet to do. We have the Nuclear Regulatory Commission yet to do. We may have a communications bill yet to do and other matters.

Mr. President, I wonder how the distinguished minority leader and others might respond to a request, and I shall not put the request at this moment, that no other amendments be in order to this bill except a technical amendment to be offered by the manager and I am advised that Senator MELCHER has an amendment that he wishes to offer.

If we could limit that I think it might move us on toward getting this matter underway.

As I say, I shall not offer this request at this time, but I urge Senators to consider that. I shall make that request as soon as I have had opportunity to consult with the minority leader.

Mr. DOLE. Mr. President, will the majority leader do that now?

Mr. BAKER. Yes.

Mr. President, as soon as we dispose of the pending amendment, I will make that request. I will not make it at this moment.

Mr. DOLE. Mr. President, let me first thank the majority leader and I hope we do not have a Melcher amendment.

We put a notice in the RECORD a month ago that we were going to have a meeting and going to follow certain guidelines, and we had that meeting and we worked on it 3 hours last Thursday. I do not quarrel with anyone's right to offer amendments, but we are in the last hours of the session and there are about 20 Senators, about 10 on each side, who have a real interest in what we are doing here.

I hope that their colleagues do not trot in at the last minute and foul up a number of amendments that are not controversial, not real revenue losers, and not opposed by Treasury, I think with two exceptions, and they have had hearings, which may be one exception.

We have tried to be above board, lay it out on the table, and now there are about eight Republicans and eight Democrats who have rather vital interests in the amendments they have offered. Let us not kill it all in the last minutes of the session.

Mr. President, I move to table the pending amendment, and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Colorado.

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from Minnesota (Mr. DURENBERGER), the Senator from Arizona (Mr. GOLDWATER), the Senator from Idaho (Mr. MCCLURE), the Senator from Illinois (Mr. PERCY), and the Senator from Texas (Mr. TOWER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Oklahoma (Mr. BOREN), the Senator from New York (Mr. MOYNIHAN), and the Senator from Mississippi (Mr. STENNIS) are necessarily absent.

I further announce that the Senator from West Virginia (Mr. RANDOLPH), is absent on official business.

I further announce that, if present and voting, the Senator from New York (Mr. MOYNIHAN), and the Senator from West Virginia (Mr. RANDOLPH), would each vote "nay."

The PRESIDING OFFICER. (Mr. WARNER). Are there any Senators in the Chamber desiring to vote?

The result was announced—yeas 57, nays 34, as follows:

[Rollcall Vote No. 495 Leg.]

YEAS—57

Abdnor	Burdick	Danforth
Andrews	Byrd,	Denton
Armstrong	Harry F., Jr.	Dole
Baker	Chafee	Domenici
Bentsen	Cochran	East
Boschwitz	D'Amato	Garn
Glenn	Kasten	Rudman
Gorton	Laxalt	Schmitt
Grassley	Leahy	Simpson
Hatch	Long	Specter
Hatfield	Lugar	Stafford
Hawkins	Mathias	Stevens
Hayakawa	Matsunaga	Symms
Heflin	Mattingly	Thurmond
Heinz	Murkowski	Wallop
Helms	Nickles	Warner
Humphrey	Nunn	Williams
Jepsen	Packwood	Zorinsky
Johnston	Pressler	
Kassebaum	Roth	

NAYS—34

Baucus	Eagleton	Mitchell
Biden	Exon	Pell
Bradley	Ford	Proxmire
Bumpers	Hart	Pryor
Byrd, Robert C.	Hollings	Quayle
Cannon	Huddleston	Riegle
Chiles	Inouye	Sarbanes
Cohen	Jackson	Sasser
Cranston	Kennedy	Tsongas
DeConcini	Levin	Weicker
Dixon	Melcher	
Dodd	Metzenbaum	

NOT VOTING—9

Boren	McClure	Randolph
Durenberger	Moynihan	Stennis
Goldwater	Percy	Tower

So Mr. DOLE's motion to lay on the table the amendment (UP No. 813), as modified, was agreed to.

Mr. DOLE. I move to reconsider the vote by which the motion was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. I yield to the Senator from Oregon.

Mr. HATFIELD. Mr. President, in 1972, I testified before the Republican Party Platform Committee on behalf of tax simplification and reform. In each Congress thereafter I have introduced a comprehensive reform proposal that eliminated all deductions and credits and substituted instead a drastically lower rate of taxation for all individuals.

According to the Congressional Budget Office, the number of special benefits and deductions has grown from 50 in 1967 to 104 in 1982. The cost of these benefits has grown from $36.6 billion in 1967 to $266.3 billion in 1982. By 1986, the cost of these benefits will exceed $465 billion.

The perception of unfairness among our constituents about the way our Tax Code is administered is growing every day. It is becoming more difficult to explain to my constituents who are devastated by a 2-year depression in housing that Chrysler, Ford, Eastman Kodak and Occidental Petroleum deserve to get tremendous new tax breaks through newly enacted leasing laws.

I urge my colleagues to make 1982 a year in which we begin to carefully scrutinize the special tax breaks in the Tax Code with the same intensity that we scrutinize domestic appropriations. It is time to consider tax reform and the enactment of meaningful supply side tax cuts. If we eliminate every special tax break, we could enact low rates of taxation that will spur investment and reward hard work. The problem with supply side economics, as we know it, is the reluctance that we have in repealing special benefits.

Mr. President, in 1929 the top tax rate was 24 percent, levied on net taxable income in excess of $100,000. Nearly 15,000 people reported income above that figure. With inflation and the growth in population, the 1977 counterpart to 1929's 15,000 returns reporting more than $100,000 would have been 27,000 returns reporting taxable income in excess of $1 million. However, only 1,785 returns reported income greater than $1 million. As Milton Friedman has stated, this 15-fold difference between 1929 and 1977 reflects the success of taxpayers in riddling the tax laws with loopholes.

I intend to reintroduce the simpliform proposal early next year and I welcome any help from my colleagues in working out an acceptable bill. I have also asked the Department of Treasury to provide me with some revenue projections on how low we could get the tax rates if all special benefits were repealed. A simplified Tax Code is getting much more attention in the press and I ask unanimous consent that the following six articles be placed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SUPPORT GROWING FOR A FLAT-RATE INCOME TAX LEVY

(By Peter Brimelow)

Is there life after Kemp-Roth?

Admittedly, as President Reagan's economic package moves through Congress, some of its suppy-side tax-cut advocates are beginning to question whether it is really what they had in mind. The interaction of continuing inflation and progressive marginal tax rates means that the Administration has just stepped in to hold apart the crocodile's closing jaws. Federal tax receipts will still run approximately 19.6 per cent of GNP in 1984, roughly where they were in 1977. For most middle-income earners, the marginal relief will be slight.

Inflation can disrupt the best-laid plans of politicians and publicists. Perhaps that's why University of Southern California economist Arthur B. Laffer, the astute intellectual entrepreneur, supply-side mogul and father of the famous cut-justifying Curve, is now concentrating on the need to restore financial integrity via the gold standard. ("And Reagan's going to do it.")

"But Laffer's laboratory is also readying another economic cure: a proposal to reform the tax system radically, so that federal expenditures are financed out of a tax based on consumption. And this is just one of several ideas now being widely, if fleetingly, discussed in Washington in seconds snatched from day-to-day combat."

No consensus has yet emerged. New York's Jack Kemp, for example, is talking in terms of further rate reductions. But there is one surprising development: a feeling that a flat rate "proportional" income tax may be an idea whose time, if it hasn't come, is at any rate near. " It's clearly preferable to what we have now," says Laffer.

Under current tax law, of course, the federal government claims a proportion of the individual's earnings that rises steadily in line with his income. A flat-rate tax would simply set the share at the same proportion for everyone. Everyone would pay, say, 20 cents out of his first taxable dollar, and on every succeeding dollar. The rich would still pay more than the poor—20 per cent of a high income is more than 20 per cent of a low income.

How high would such a flat-rate tax have to be? One rough guide is that tax revenues raised from income tax in 1978 totaled $188.6 billion—17.7 per cent of the $1,063.3 billion taxable income Americans fessed up to the IRS. This suggests a flat-rate tax of maybe 18 per cent. The rate could be lower if fewer

loopholes were permitted. Thus, 1978 tax revenues were only 14.5 per cent of that year's total of what the IRS calls Adjusted Gross Income—before itemized deductions. And even that figure contains some exempted income. If taxes had been levied on what the National Income Accounts consider personal income, 1978's revenue could have been raked in with a flat rate of a mere 11 per cent.

"Everything's changed since November," says a civil servant when asked why a research project is contemplated on such an outlandish idea. Flat-rate taxes are "the single most common tax proposal suggested by the American public at large," writes Thomas F. Field of Tax Notes publication in the July 6 issue.

Sen. Charles E. Grassley (R-Iowa) quizzed Internal Revenue Commissioner Roscoe Egger about it during his nomination hearings. Former Treasury Secretary William E. Simon endorses flat rates in his current American Enterprise Institute pamphlet, Reforming the Tax System, but, with the same conventional judgment as made his career in office so much less interesting than his books, assumes that it is politically impractical.

The Wall Street Journal flirted with the concept in two recent editorial-page articles. Rep. Philip Crane (R-Ill.) will introduce a bill shortly calling for 19 per cent flat rates and a $1,500 personal exemption. And Jack Anderson wrote a recent agonized column urging flat rates as he wrestled with his tax returns in the shadow of the April 15 filing deadline. What more could anyone ask?

"A single, fundamental truth underlies all the recent eruptions of tax-cut agitation, from Proposition 13 and the Steiger Amendment to Proposition 2½ and the 1980 election. It is that the political economy of the welfare state is ultimately unstable."

In 1929, when total government expenditures were a mere 10 per cent of GNP (of which only a quarter was spent by Washington), it was perfectly possible to organize an electoral coalition around the strategy attributed to FDR adviser Harry Hopkins: "Tax and tax—spend and spend—elect and elect." The income tax simply did not affect many people. But by the late 1970's, government spending was over three times as high. It could not be primarily supported by the top income earners for the melancholy reason that there weren't enough of them.

Accordingly, the IRS' preliminary Statistics of Income Report for 1978 show that 60 per cent of total income tax was paid by Americans whose adjusted gross income was $15,000–$50,000; they also comprised 45 per cent of all the taxable returns. In even as low as the $7,000–$8,000 bracket, an average of $519 income tax was paid—a remarkable figure given that some people at this level probably were taking deductions for dependents.

Income distribution in America is not a pyramid, from which the government can conveniently bite off the point. It is shaped like a candle-flame. The long, tapering tip is particularly evanescent: As Milton Friedman has pointed out, less than a fifteenth of the number of $1-million-plus annual incomes were reported in 1977 as would have been suggested by extrapolating figures from 1929, when the top marginal rate was 25 per cent. In order to get tax revenues of any real magnitude, the government must reach into the wide heart of the flame. Eventually, the flame may snuff out, or the government may be burned. Until then, the fact remains: Most of the people pay most of the taxes. And, not surprisingly, they don't like it.

The corollary to this is that the average tax rate paid by the pivotal $15,000–$50,000 category is already quite high. In 1978, this group parted with from 14.4 per cent to 21.7 per cent of its taxable income and 11.9 per cent to 18 per cent of its adjusted gross income. Most flat-rate proposals generally come down in this area.

"A flat-rate income tax, in other words, might not increase the average burden on the American tax system's swing voters as much as is popularly supposed. And it would dramatically reduce their marginal rates, the tax paid on each dollar of additional income."

In fact, at the $7,000 taxable-income level, the marginal rate is (pre-Reagan) already at 18 per cent for singles and 16 per cent for a joint-filing married. At these levels, of course, the flat-rate tax could raise the average tax burden by relatively significant amounts. But the scheme's advocates have ways to finesse that problem

The political dynamic behind tax reform is paralleled by internal logic of the supply-siders' case, which is compelling them to think about flat rates. The essence of the supply-side case is to focus attention on (a) incentives—the marginal impact of taxation; (b) more covertly taxation—solely as a means of raising revenues. Previously, economists and politicians tended to view taxation as a way to fine-tune the economy and to subsidize various deserving or threatening groups, as well as to raise the money to pay the government's bills, more or less.

The levy that would claim the least from an individual's increased production would be the toll tax. The marginal rate would be zero. But this is unconstitutional in the U.S. for a variety of historical reasons. A flat-rate tax is the best alternative, offering the maximum encouragement to taxpayers to earn their way into the wild blue yonder unimpeded by any gathering fiscal drag.

The value of the supply-siders' stress on incentives is easily overlooked. Only in 1972, for example, Joseph A. Pechman and Benjamin A. Okner of the Brookings Institution, in a paper called "Individual Income Tax Erosion by Income Classes," printed a table purporting to show the impact of various hypothetical tax schedules calculated to produce the 1971 revenue total. Their analysis was entirely static. They failed to even discuss the possibility that their 16 per cent flat rate option might galvanize those in the top bracket who found their marginal rate suddenly reduced by some three-quarters.

At the same time, the apparently imposing intellectual rationale for progressive taxes proves upon a kick to be as brittle as a worm-eaten door. As long ago as 1953, Walter Blum and Harry Kalven titled their study of the question, The Uneasy Case for Progressive Taxation. "Although there are numerous economic arguments in favor of progressivity, based on ability to pay, equal sacrifice, the diminishing marginal utility of money, etc., in the end, equity is the only justification worth considering," writes Bruce R. Bartlett, deputy director of the Joint Economic Committee, in his new book, Reaganomics: Supply-Side Economics in Action.

This justification is somewhat undermined by disputed academic claims that the American system, after deductions, is not as progressive as it appears. It is severely shaken by the realization that such progressivity as it has achieved may be at the expense of economic activity on the part of upper-income earners—investment—which would ultimately benefit everyone, particularly lower-income earners.

"The tax system is not a zero-sum game. Progressive taxation is an inefficient way of raising and redistributing revenue."

Key points of the flat-rate case as it is sketched out on the proverbial Washington restaurant table napkin are:

1. Reduction of the tax collection regulatory burden. Few estimates of this have been made, and insiders note darkly that Vice President Bush's Regulatory Task Force seems to have retreated from the topic after a visit from John Chapoton, the Treasury's assistant secretary for tax policy and himself a tax lawyer. But, in terms of direct outlay by taxpayers on compliance (and avoidance), and of the indirect impact of opportunity cost and misallocation, it is obviously huge. An astonishing 43 per cent of taxpayers paid for professional help with their tax returns in 1977.

One common rule of thumb for guessing regulatory economic impact is that the private sector's expenditure in meeting regulations is 20 times the state's outlay in promulgating and enforcing them. In 1980, the Internal Revenue Service's budget was some $4.3 billion. Nearly 70 per cent of the resulting receipts is from taxes on individual income. Assuming that this means 70 per cent ($3 billion) of the IRS' costs pertain to individual income taxes, this would suggest $3 billion x 20, or $60 billion in direct costs alone

2. Incentive effect of uniformly low marginal rates. There is some evidence that academic opinion is now beginning to confirm the validity of the supply-side stress on the discouraging effects of taxation. Jerry Hausman of the Massachusetts Institute of Technology recently attempted to assess tax induced overall loss in terms of "deadweight loss." This is the hypothetical cost to the economy of the behavior induced by taxation. His calculations show loss equal to 22 percent of income at the average wage level in 1975 and 54 percent at higher levels. Prof. Hausman also estimated that this loss would be reduced by up to 53 percent under a flat-rate system.

3. Finesse loopholes. All plans to simplify the tax system by broadening the income base face the problem that the loopholes—actually tax bases left unseared by the government for various policy reasons—are fiercely defended by militant interest groups.

There is widespread agreement, for example, that the tax deductibility of mortgage interest has caused massive national overoverinvestment in housing, particularly at the upper-income levels where taxpayers might otherwise be buying productive assets. But for the middle-income American, houses have been the same sort of comforting safeguard against inflation as owning handguns has been against crime. Consequently, the most that seems possible is a stealthy move towards narrowing the loophole, perhaps by disqualifying vacation property.

Under flat rates, this problem largely solves itself. Tax shelters will not be as attractive when only 15–20 cents of the taxpayer's dollar would be exposed to the IRS' beady eye.

4. Reduced distortion. All taxes distort optimal functioning of the economic system by introducing considerations other than those of efficiency and profitability. But these are reduced to a minimum under the flat-rate system.

5. Increased equality. Flat rates do not exclude income redistribution. That can be done more efficiently through the expenditure side of the budget. Revenue once raised can be redirected enough to warm the heart of any liberal Democrat via a variety of targeted social programs. There could even be a negative income tax if desired. Additionally, the impact of flat rates upon lower-income earners could be substantially lessened by the simple expedient of raising the basic exemption, say, $3,000. This could reduce their tax burden by the relatively large but absolutely small amount that flat rates might raise it—usually a few hundred dollars.

6. Improved treatment of interest income. In periods of high inflation, nominal interest rates contain a high inflation premium. In effect, they represent not merely a return on capital but also a return of capital. The value of the principal in real terms is steadily eroding. Any tax on interest income under these circumstances represents a partial confiscation of capital.

(Investors implicitly recognize this and try to compensate for it. That's why tax-exempt municipal bonds generally offer yields 30 per cent or so below taxable instruments. This feature is differentially valuable to high-income investors, creating further distortions in allocation.)

A flat rate tax would not solve this problem. But it would help. The confiscation of capital is obviously more acute where inflated incomes are subject to higher rates.

7. End bracket creep. The ability of inflation to carry taxpayers into higher brackets ultimately nullifies efforts to slash rates. From the government's point of view, bracket creep makes inflation not only tempting but relatively safe, since its deficit financing becomes self-correcting at the taxpayer's expense. Inflation under a flat-tax regime would simply mean that its victims pay the same proportion of their higher incomes.

Is There Life After Taxes?

(By Jack Anderson)

Like millions of Americans at this time of year, I find myself staring in exasperation once again at the hopelessly confusing instructions the Internal Revenue Service sends with its income tax forms.

There are forms for this and forms for that, and pages of incomprehensible directions that supposedly explain how to figure out the tax I should pay if I don't want to go to prison. Though I fancy myself as functionally literate and reasonably intelligent, the IRS instructions frankly leave me bewildered. Like one out of every four Americans who file income tax returns, I throw in the towel and pay a professional tax expert to guide me through the arcane rules and regulations.

No one but a lawyer or accountant who has devoted his life to the tax laws can feel even remotely confident that he has mastered all the rules. Even these career experts frequently run afoul of the government clerks in their cubicles, who may interpret an exemption or deduction differently.

Under the present complex system, the rich get loopholes, the poor get exemptions and the middle-class get stuck.

Clearly, there is something terribly wrong. Congress pays lip service to the sanctity of family life, for example, but passes legislation that makes married couples pay more income tax than those who choose to live together out of wedlock. And a government that supposedly offers equal opportunity to poor and rich alike still countenances a system that gives tax breaks to those with enough money to buy a home. They take deductions on their mortgage interest and property taxes that are not available to those who rent their homes.

Critics of the tax system include conservative fiscal experts who recognize that the long-term effect on the nation's economy is counterproductive.

"It is a system that encourages consumption more than saving and discourages investment and enterprise," former Treasury Secretary William Simon told my reporter Deborah Latish.

Incentive has always been the basis of the free enterprise system. But with our cockamamie tax setup, the investor who makes money finds he is penalized by confiscatory taxes, instead of being rewarded for his initiative. A laborer who sweats more than his fellow workers suddenly realizes that his efforts have simply put him in a higher tax bracket.

So instead of plunging into enterprises that might increase productivity, the rich put their money into tax shelters that don't do a thing for the stagnant economy. The working class has little incentive to climb up the economic ladder when taxes are going to push them back one step for every two they climb.

The resulting lack of productivity and lack of productive investment lead to the remorseless march of inflation. When savings or investment are penalized by the government, everyone spends, giving inflation another nudge. Surely there must be a better way.

And there is. By eliminating all the loopholes and exemptions for rich and poor alike, and instituting a straight across-the-board tax rate on everyone. Treasury experts estimate that the same amount of revenue could be raised as under the present insane system. Their guess is that the tax rate could be reduced to 14 percent or 15 percent, still letting the poor avoid taxation they obviously cannot afford. Some of the tax-sheltered wealthy would lose under such a program—but not very much. And the rest of us would save a bundle of money and an inestimable amount of aggravation.

Instead of taking hours to prepare your tax return, the job could be done in a matter of minutes. Taxpayers who would lose deductions would more than make up their loss through the lower rate they paid. And a flat rate, applicable to everyone, would do what Reagan promised to do—get the government off our backs.

Perhaps more important, the IRS would no longer feel compelled to poke into every aspect of taxpayers' lives—religion, marital status, education, home ownership—to decide which deductions are valid and which are not.

Would such a system work? A version of the flat-rate tax system is in use in Hong Kong. After a basic exemption of about $2,200, the tax rate goes from 5 percent to 15 percent. The government provides many assistance programs for the needy and the elderly, as well as the usual public services like education and public works—all paid for out of the simplified tax structure.

The only opposition to a simple title would come from those who benefit most by the present incredibly complex system—tax lawyers, accountants and the tax-sheltered rich.

But for the rest of us, it would be a relief almost beyond imagining.

A Proposal To Simplify Our Tax System

(By Robert E. Hall and Alvin Rabushka)

Despite recent progress in lowering rates, the tax system remains a disgrace. It is in dire need of simplification and reform. The tax system is inordinately big, filling volumes of codes, complicated by hundreds of credits, exemptions and special provisions. Many taxpayers need expensive professional help to fill out their returns. Each act of the Congress complicates the system further. Widespread evasion is apparent on interest, dividend and other forms of household or professional income. Tax shelters are commonplace. Estimates of the size of the underground economy range from tens of billions of dollars to several hundred billion. In short, we have a system that fosters contempt for the law, and simultaneously discourages productive economic activity.

We have recently worked out the details of a simple income tax, imposed at a low uniform rate on a comprehensive measure of income. The tax would be founded on the following principles:

1. All income should be taxed only once, as close as possible to its source.

2. All types of income should be taxed at the same rate.

3. The poorest households should pay no income tax.

4. Tax returns for both households and businesses should be simple enough to fit on a postcard or on a single page.

A major problem with the current system is its helter-skelter taxation of business income. Corporate income is taxed first under the corporate tax and again under the personal tax on dividends. Income from proprietorships and partnerships often evades tax, or is taxed lightly. We propose a single business tax on all types of income other than wages.

THE CURRENT RANGE OF RATES

A uniform rate of 19 percent would replace the current range of rates. The current rates now stretch from actual subsidy of highly leveraged tax shelters with large interest deductions to rates as high as 80 percent that are imposed on income earned by stockholders.

The proposed new 19 percent business tax applies equally to all forms of business—corporate, partnership, professional, farm and rentals and royalties. The base for the tax is gross revenue less purchases of goods and services and compensation paid to employes. In addition, a capital recovery allowance is deducted for investment in plant and equipment. No deductions are permitted for depreciation, interest or payments to owners in any form.

Even for a multibillion-dollar corporation, the business tax return would fit easily on a single page. It would look like this:

1. Gross revenue from sales.

Costs

2. Purchases of goods and materials.
3. Compensation paid to employes.
4. Other direct costs.
5. Total costs (lines 2, 3 and 4).
6. Net revenue (line 1 less line 5).
7. Purchases of capital equipment and structures.
8. Taxable income (line 6 less line 7).
9. Tax (19 percent of line 8).
10. Tax carry-forward from losses in previous years.
11. Net tax (line 9 less line 10).
12. Tax payment (amount on line 11 if positive).
13. Carry-forward to next year (amount on line 11 if negative).

In place of the hodge-podge of investment incentives in the tax system now, we propose the use of straightforward first-year write-off of all business investment. First-year capital recovery is a great simplification over the complicated depreciation deductions and investment credits in present law.

The net revenue of U.S. business in 1980 was $803 billion. Under the new business tax we are proposing, capital recovery allowances would have been $317 billion, leaving net taxable business income at $486 billion. A tax rate of 19 percent would have yielded $92 billion; that would be about half again the revenue from the actual corporate income tax in 1980 of $64 billion. Despite a much lower tax rate, the extra revenue comes from the much wider tax base, including unincorporated business, and from taxing business income at the source.

Under the simple tax system, all business income would be taxed only once, at its source. Household receipts of interest, dividends and capital gains would be aftertax income. Though wealthy households might receive large amounts of these types of income, it is important to understand that the taxes on such income have already been paid. Taxing business income at its source has the important practical benefit of taxing the large amounts of interest and dividend income that escape taxation under the current system.

With comprehensive taxation of business income, taxation of capital gains should be eliminated at the level of the individual. The value of a security or other interest in a business is the capitalized value of its aftertax income, and so already embodies the appropriate tax when business income is taxed at its source.

Our simplified tax system also includes a comprehensive tax on the earnings of individuals.

Most income in the U.S. is compensation for work. In the proposed tax, compensation is broadly defined as anything of value received by workers from employers, including cash wages and salaries, the market value of fringe benefits and contributions to public and private pension plans.

A SET OF PERSONAL ALLOWANCES

To limit the tax burden of poor families, we propose a set of personal allowances. Taxes would be 19 percent of compensation in excess of the following allowances:

Married couple	$5,000
Single	3,000
Single head of household	4,500
Each dependent	600

Except for the personal allowances, no deductions of any kind would be permitted, including interest deductions.

1000A Individual Compensation Tax 1981

Your first name and initial (if joint return, also give spouse's name and initial)	Last name	Your social security number	
Present home address (Number and street, including apartment number, or rural route)		Spouse's social security no.	
City, town or post office, State and ZIP code	Your occupation ▶ / Spouse's occupation ▶		

1 Compensation (including fringe benefits) as reported by employer	1		
2 Other wage income, including pensions paid directly by employer	2		
3 Total compensation *(line 1 plus line 2)*	3		
4 Personal allowance			
(a) ☐ $5,000 for married filing jointly	4(a)		
(b) ☐ $3,000 for single	4(b)		
(c) ☐ $4,500 for single head of household	4(c)		
5 Number of dependents, not including spouse	5		
6 Personal allowances for dependents *(line 5 multiplied by $600)*	6		
7 Total personal allowances *(line 4 plus line 6)*	7		
8 Taxable compensation *(line 3 less line 7)*	8		
9 Tax *(19% of line 8)*	9		
10 Tax withheld by employer	10		
11 Tax due *(line 9 less line 10, if positive)*	11		
12 Refund due *(line 10 less line 9, if positive)*	12		

Individual tax returns would fit on a postcard.

The individual tax return for the compensation tax would look very much like the illustration accompanying this article. It would fit on a postcard.

In 1980, total compensation in the U.S.—including fringes and pension contributions—was $1,596 billion. We estimate that personal allowances in 1980 would have been $420 billion, leaving taxable compensation of $1,176 billion. At a rate of 19 percent, tax revenues would have been $223 billion. By comparison, the personal income tax in 1980 yielded about $255 billion.

At the outset, the simple income tax with common flat rates of 19 percent on business income and compensation, would raise revenue equal to about 12 percent of GNP, the same as the current combination of corporate and personal income taxes. Though our system would stabilize revenue as a fraction of GNP, it would probably produce more revenue than the government needs to maintain existing programs.

Low marginal tax rates would draw economic activities from the underground economy into the formal market, where they are recorded as part of GNP. Businesses and individuals would spend less time worrying about the tax consequences of their actions and concentrate instead on earning higher incomes. On these grounds, we believe that the revenue needs of the federal government could be met with tax rates as low as 16 percent or 17 percent, rather than the 19 percent needed to reproduce current revenue at current levels of GNP.

The benefits of tax reform are not merely economic. The complexities of the federal tax system now foster contempt for government and make petty criminals out of a large fraction of the population. A simplified tax with low marginal rates would help restore confidence in government and would support the basic honesty of the American people.

TOP-HEAVY TAX SYSTEM ITS OWN WORST ENEMY

(By Robert J. Samuelson)

The temptation is to say that Jim Jones has crossed the thin line between crusader and crackpot.

Jones—not to be confused with the chairman of the House Budget Committee or the fanatical cult leader—is an amiable, retired Texas businessman who thinks the U.S. tax system stinks. He's been poking around Washington for the past few years, telling anyone who will listen. Too much paperwork, too many contradictions. Junk it, he says. Replace it with a flat tax.

Any practical politician will tell you that Jones is a fool. You can't simply scrap the whole system and replace it with a nice simple tax. That would cause rebellion. We live in a complex society. The tax system reflects the complexity. Its provisions—complicated though they may be—respond to the peculiar needs of all the diverse groups that comprise America, which is precisely Jones' insight. We have lost sight of the essential purpose of any tax system: to raise money for legitimate public purposes.

Instead, it has become a vehicle for social engineering and political favoritism. It's tinkered with and twisted to satisfy the gripes and self-pleading of any group that can hire a clever tax attorney and publicist to make its case. Responding to some bad causes and a lot of good ones—individually worthy—has produced a top-heavy system that is becoming its own worst enemy.

All this is worth pondering as Congress prepares to write another tax bill. For no public program is bigger and affects more people than the tax system. Whether people respect the system—no one expects them to like it—determines to a considerable extent whether they respect government. And the evidence is beginning to show that public respect is on the wane.

For years, Americans' high rate of voluntary tax compliance has been the envy of the world. But anecdotal and statistical evidence is now challenging this reassuring cliche. A public opinion survey commissioned last year by the Internal Revenue Service found that as many as one-quarter of the taxpayers may have under-reported their income deliberately at one time or another. A more thorough IRS investigation a few years ago estimated that perhaps 9 percent to 12 percent of income goes unreported.

Of course, there always has been unreported income—from crime, for instance. But the hunch of specialists is that chiseling and cheating are on the rise and, more important, have gained increasing respectability. The system's very complexity—making everyone believe that someone else is benefiting from a special tax break, so why not me?—encourages it.

Jones' description of the tax system as grotesque is hardly unique. Here is Aaron Wildavsky, a well-known political scientist at the University of California (Berkeley), writing in a recent issue of the Washington newsletter Tax Notes:

"Practically everyone I know believes that other people take unfair advantage of the tax code. . . . Those who benefit sneer at how easy it is or feel guilty at taking advantage of provisions presumably designed to do good. There is a pervasive sense that moral values are being subordinated to strategies for minimizing taxes, so that financial gain is suspect—because it appears to be derived more from special privilege than from unusual talent. Consequently, the legitimacy afforded to government by the people, the respect that supports the authority to govern, is being undermined."

And here is the conclusion of a special study commission established by the Chamber of Commerce of the United States:

"The primary conclusion of the commission is that massive tax simplification is urgently required. . . . The Internal Revenue Service is generally an efficient and well-run agency, but no organization can administer so grossly complicated a tax system without gradually assimilating some of the problems of the system it represents. The myriad social policy decisions currently being enforced through the tax system also turns the IRS into a 'lightening rod' for all manner of citizen complaints about their government, whether or not connected with revenue matters."

We have come to this in barely a generation's time. Thomas F. Fields, a lawyer with Tax Notes, recalls that, before the early 1940s, a lot of people "were proud to pay income tax." Rates were low, and a relatively small part of the population paid taxes; it was a sign of distinction, of "having made it." But during the war the government adopted withholding, and then the bite of government spending and taxes increased sharply.

The result is a system so riddled with deductions, credits and income exclusions that tax rates (what government actually takes out of the economy) diverge substantially. How much?

Look at it this way. Government spending constitutes about 22 percent to 23 percent of the nation's gross national product. Roughly, a tax of slightly more than one-fifth of what we produce will cover that. But the top corporate tax rate is 46 percent. And the in-

dividual rates run from 14 percent to 50 percent (for earned income, such as wages) and to 70 percent for so-called unearned income (such as dividends and interest).

All this produces collective gamesmanship on two levels.

First, there's the individual and the firm. Everyone strives to find the maximum combination of credits, deductions and exclusions to reduce taxes. For this reason—or simply because the system is so complicated—two-fifths of all individual returns are prepared by professional accountants or tax services according to the IRS.

Second, there is the political gamesmanship. At the moment, groups are exhorting Congress to enact, among other things, the following: tax credits for college and private school tuition, tax credits for firms engaging in research and development, liberalized deductions for charitable contributions, and refundable investment tax credits for firms that have large losses. The list goes on.

The upshot is a remarkable centralization of political and economic power. The tax system tells people and firms to do some things, not to do others—and many of the commands represent inefficiencies. At the same time, an increasingly large army of lawyers, accountants, lobbyists and economists now dedicates itself to manipulating the system or (as with economists) simply trying to understand its effects.

Talk about paperwork. The Office of Management and Budget estimates that about half of all government-created paperwork stems from tax forms, to the tune of about 650 million hours annually.

Undoing this mess won't be easy, precisely because tax provisions satisfy broad constituencies, and most were enacted (as Wildavsky puts it) "to accomplish a good purpose." But we need to acknowledge the destructive logic of the process; that every special provision means that general tax rates go higher and that more groups, seeing others with tax breaks, are encouraged to seek similar treatment.

What this requires is a change in mood.

More than ever, every part of the political spectrum believes that the tax system is to be used for special purposes. Liberals, conservatives, unions, corporations, charitable organizations all are chanting for their own pet proposals. The paradox is that the politicians who encourage and respond to these pressures think they're upholding the worth of the political system and the public's confidence in government. In fact, they may be slowly destroying both.

A Proposal To Cap Marginal Tax Rates at 24 Percent

(By Edward Moscovitch)

A key purpose of President Reagan's supply-side economic program is to stimulate output and productivity. This is to be accomplished in great part by a 30 percent reduction in personal tax rates over three years—the Kemp-Roth approach. But this plan and most compromise proposals now being discussed leave in place our present tax structure (at a lower level, to be sure), with all its complexities, loopholes and perverse incentives.

A program that simplifies the tax code and reduces high marginal rates will bring about far greater increases in productivity than Kemp-Roth, and do so at a substantially lower cost. Specifically, I propose:

That the tax structure be changed so that no income is taxed at greater than a 30 percent marginal rate.

That the standard deduction be set at 20 percent of income, with no upper limit.

That preferential treatment for capital gains be ended.

That the personal exemption be doubled to $2,000.

With these changes, most taxpayers would take the standard deduction and would, in effect, pay a top rate of 24 percent (every extra dollar of income would generate 20 cents of additional deduction, and the remaining 80 cents of income would be taxed at 30 percent, or 24 cents of tax on a dollar of income). These changes would cost the same $129 billion of forgone revenue in 1983 as would a fully implemented Kemp-Roth cut.

To find out how much the plan would cost and how it would affect taxpayers in different groups, I started with IRS data for 1977 and 1978 on the number of taxpayers by income bracket, the percentage who took itemized deductions and the average itemized deduction. A forecast of the economy was then used to drive this data ahead to 1983. The accompanying table shows the impact on taxes paid as a percent of income.

Who pays more? For those with income between $20,000 and $100,000 taxes would be higher, but the extra amounts small. Take a family filing a joint return, with an income of $58,000. Kemp-Roth cuts their taxes to 16 percent of income from the current 23 percent; this plan cuts them to 17 percent. Currently, such families face a marginal rate of 49 percent on additional income, so that after state taxes and work expenses they bring home less than half of every dollar. Mr. Reagan would cut their marginal rate to 34 percent; I would cut it to 24 percent.

Most such families would accept a slightly smaller tax-cut for the assurance that they could keep 76 percent of additional income. As upwardly mobile families, they will be more interested in the lower marginal rates on the income gains they hope to achieve in the future. Those who would pay a bit more now have the most to gain in the long run from lower marginal rates. Every taxpayer, no matter what his income, would keep three-fourths of every extra dollar earned.

Increasing the standard deduction and ending the upper limit on its use would make almost all taxpayers indifferent to itemized deductions, while avoiding the kind of bloody battle a direct attack on specific deductions might mean. Reducing high marginal rates would in any case substantially reduce the importance of deductions. And there would be no need to plan fancy gimmicks to shelter income.

1983 FEDERAL INCOME TAXES PAID AS PERCENTAGE OF INCOME

Average income in class	Current law filing status		Kemp-Roth filing status		Alternative filing status	
	Single	Joint	Single	Joint	Single	Joint
$4,649	3.4	0.0	2.4	0.0	0.0	0.0
$8,770	8.5	1.8	5.9	1.2	5.2	.0
$11,121	11.3	5.3	7.9	3.7	8.6	.7
$14,322	13.7	7.5	9.6	5.2	10.5	3.4
$17,034	15.7	9.4	11.0	6.5	12.0	5.8
$20,885	17.3	11.1	12.1	7.8	13.2	7.4
$23,567	19.3	12.4	13.5	8.7	14.9	8.7
$26,339	20.4	13.5	14.3	9.5	15.9	9.8
$30,080	21.4	14.7	15.0	10.3	16.8	10.9
$35,724	23.1	16.4	16.2	11.4	17.6	12.2

$57,858	29.6	23.1	20.7	16.1	20.1	17.0
$103,663	37.7	31.5	26.2	22.0	21.7	20.3
$207,118	45.6	41.6	31.6	28.9	22.7	22.4
$439,855	47.4	48.7	32.7	33.7	23.7	24.0
$1,050,916	48.3	49.6	33.3	34.1	25.1	24.7
$3,057,492	49.4	49.5	33.8	33.7	26.0	25.5

Thousands of most talented and highly trained people in America spend their time worrying not about how to be more productive, but how to shield income from taxation. Writing in a recent issue of the Washington Monthly, Robert Reich divided Americans into what he called pie slicers and pie enlargers and argued that an ever larger share of America's productive imagination and intelligence is going into pie-slicing.

Whatever the case for favorite capital gains treatment when tax rates run to 70%, there is no need for such treatment with taxes at 24%. How much of our entrepreneurial energy goes into real estate speculation because capital gains are taxed at less than half the rate on ordinary income??

An examination of the impact of the plan on taxpayers in different income groups suggests that the plan should command wide support. Like the Reagan plans, this proposal would mean lower taxes for all taxpayers. But with its higher personal exemption, the new plan would give larger cuts to those who need them most—single taxpayers with income less than $10,000 and married taxpayers with income under $20,000. For a married taxpayer at $11,000, the Reagan plan would cut taxes from 5% of income to 4%; I would cut them to 1%. With the Reagan budget cuts likely to fall hardest on the near poor, the relief afforded by doubling the exemption is particularly welcome.

The President and the supply-siders should support a tax change along these lines because it brings about even bigger cuts in marginal rates. The Democrats should welcome this change because it makes possible greater cuts for those hurt most by the proposed spending cuts.

Once Upon a Supply-Side Theory

(By Robert J. Samuelson)

The whole episode of David Stockkman's humiliation speaks to the fairyland mentality and rhetoric that surround serious political discussion of the economy. Stockman's sin was to admit that he no longer believes in fairy tales. It would not have been a sin if the nation's major political leaders—including the president and most prominent members of Congress—were not themselves such peddlers of economic fantasies.

Major political figures in this country invariably talk about the economy in absolutist terms. Something is either utopia or hell; there isn't much in between. Few, if any, attempt to explain our economic choices, in part because understanding them is genuinely difficult. And they are still more difficult to explain, because the choices are often complicated and unpleasant.

The result is that although economic issues dominate politics, discussion of them proceeds at an infantile level. The news media gladly promote the simplified morality tale, because a good story requires antagonists flailing at each other. Understandable as it is, it ultimately leads to public disillusion with economic doctrines and political figures. No one believes anyone or anything, because every idea and every leader is seen to have failed.

The slogan that brought Stockman to grief and is now threatened with being discredited is, of course, "supply-side" economics. Stripped of the exaggerated claims made on its behalf, supply-side economics offers important—though hardly novel—lessons about how the economy operates. But it has been oversold and abused by its most ardent advocates.

Most administrations come to office promising more than they can deliver. Ronald Reagan pledged to balance the budget, to lower taxes and to increase defense spending while reducing inflation and unemployment. The only way to reconcile these inconsistent objectives was to project high economic growth. Supply-side economics provided the rationale. Between 1982 and 1986, the White House initially projected annual growth between 4 percent and 5 percent.

Although the label was new, the ploy was not. When Jimmy Carter took office, he had a laundry list of objectives even longer and more inconsistent than Reagan's. Aside from the usual ones of lowering inflation and unemployment, he wanted to increase spending for social programs without raising taxes. The Congressional Budget Office estimated that achieving these goals would have re-

quired sustained annual growth in excess of 5 percent.

Boiled down to its essentials, supply-side economics holds that government is discouraging useful work and investment with excessively high tax rates. Bring down tax rates, then, and work and investment will expand. The economy, therefore, will be better off. Common sense suggests that this might work, and there is some evidence that it does.

One of the first supply-side proposals involved cutting the tax rate on capital gains—the profits from the sale of stocks and other investments. The argument was that high capital gains tax rates suppressed investments in stocks, especially of new high-technology firms. If people gambled to back these risky enterprises, they wanted the reward if the companies succeeded, so the argument went.

In 1978, Congress cut the maximum capital gains rate from 49 percent (as a practical matter, it was more like 40 percent) to 28 percent. The number of new firms selling stock to the public rose from 46 (and $250 million) in 1978 to 237 (and $1.4 billion) in 1980. At the same time, venture capital investments in firms too new and too small to go public increased from $550 million in 1978 to more than $1 billion in 1980.

No one really knows whether the cut in the capital gains rate caused these increases. Economist Joseph A. Pechman of the Brookings Institution thinks the general state of the economy was a more important factor. Morton Collins, president of the National Venture Capital Association and a supporter of the cut, points out, nevertheless, that much new venture capital money came from pension funds and university endowments, which aren't taxed.

This experience suggests cautious conclusions. Despite the qualifications, it seems probable that the capital gains cut had something—perhaps a great deal—to do with the increased investment. But tax rates aren't the only force affecting the economy. Moreover, beneficial results don't materialize immediately. It will be years before new products or technologies appear from the higher investment.

But supply-side economics isn't a cautious theory. It has been blessed and cursed with energetic propagandists such as Jude Wanniski, a former editorial writer for The Wall Street Journal, and Arthur B. Laffer, an economist at the University of Southern California. They not only popularized it but also imbued it with mystical, almost cultlike qualities: Embrace supply-side policies and utopia lies just over the ridge. The administration tempered this extravagant outlook only slightly.

Much of the supply-side rhetoric is also hypocritical. Supply-siders argue that marginal tax rates—those on the last dollar of income—are critical to people's work and investment decisions. Yet, most supply-side advocates don't support measures that would reduce marginal rates dramatically.

What has driven up marginal rates is the vast array of deductions, credits and exclusions that erode the tax base and raise rates on the remaining income. Just incidentally, they also riddle the tax code with economic distortions. Eliminate these tax preferences, and top tax rates could be dropped to between 20 and 30 percent. The conspicuous silence of most supply-siders on this issue is a glaring inconsistency that leaves them open to the criticism that their doctrine is simply a guide for redistributing income to the rich.

To the White House, Stockman sinned by mentioning these shortcomings. Maybe the public now will dismiss supply-side ideas. But maybe not. At their best, they ought to offer the vision of a more liberated economy served by a less cluttered tax system. If Stockman's confessions make the theory more plausible, he may turn out to have been its best friend. Otherwise, supply-side economics will have fallen victim to the old cycle of overpromotion, disappointment and repudiation.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I ask unanimous consent that I may proceed for 1 minute on another matter.

The PRESIDING OFFICER. The Chair asks for order in the Chamber so that the majority leader may be heard.

The majority leader is recognized.

Mr. BAKER. I ask unanimous consent that I may proceed for 1 minute on another matter and then return to the pending matter.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOTIFICATION TO THE PRESIDENT OF PROPOSED ADJOURNMENT OF THE SESSION

Mr. BAKER. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

S. RES. 271

Resolved, That a committee of two Senators be appointed by the Presiding Officer to join a similar committee of the House of Representatives to notify the President of the United States that the two Houses have completed their business of the session and are ready to adjourn unless he has some further communication to make to them.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

Mr. BAKER. Mr. President, in the past it has been customary, at least on certain occasions, to pass this resolution after the adjournment resolution. It is clear now that both Houses of Congress will be in session a little longer than they had originally anticipated. If the resolution is agreed to, it would be my hope that the committee would notify the President that as soon as we have completed the necessary action this day, that the Senate then will entertain a resolution of adjournment sine die. But I propose this resolution at this time, I believe with the concurrence of the minority leader.

Mr. SARBANES. Will the majority leader indicate what he expects to transpire today?

Mr. BAKER. Mr. President, earlier I had hoped we could get an agreement that no other amendments would be in order to this bill. We have already run hours past the time I thought would be necessary to complete action on this bill. In addition to that, we have the Nuclear Regulatory Commission bill to consider and the agents identities bill to consider. The House of Representatives, I am advised, will not conclude their activities on necessary legislation for a little while, perhaps another hour or so. But I would expect that the Senate would be able to do the work that is required of it before sine die adjournment by perhaps 7 o'clock.

The PRESIDING OFFICER. Without objection, the resolution is considered and agreed to.

The Presiding Officer will read the following:

Pursuant to the resolution just agreed to, the Chair appoints the majority leader and the minority leader of the Senate to join a similar committee of the House.

DELAY OF EFFECTIVE DATE OF CERTAIN TAX PROVISIONS

The Senate continued with the consideration of the bill.

Mr. BAKER. Mr. President, referring once again to the tax bill under consideration, is it possible to get an agreement that no other amendments would be in order except a technical amendment by the distinguished Senator from Kansas, the chairman of the Finance Committee?

Mr. ROBERT C. BYRD. Mr. President, I canvassed this side earlier and at that time I found there was no agreement.

Mr. BAKER. Mr. President, I will not put the request at this time, but, Mr. President, we are really running out of time. I hope we can complete action on this measure very quickly.

The PRESIDING OFFICER. The Chair is advised by the Parliamentarian the question recurs on the amendment of the Senator from Nevada.

Mr. BIDEN. Mr. President, I had indicated earlier that I was going to ask for the yeas and nays. I am not going to do that now. If we can beg the Senate's indulgence for a few more moments, what I am going to do, with the acquiescence of the Senator from Nevada, is that we are going to amend the present law to reduce the tax and the percent, the dollar amount to $550 and the percentage from 2 to one-quarter of 1 percent. We are in the process of physically drafting that now. Once it is drafted, I will not ask for the yeas and nays. I see no need for them at all. That meets the objections that I was concerned about earlier, and it brings some equity into the situation. That is what we are going to do. We will have that ready any moment now.

UP AMENDMENT NO. 814

Mr. DOLE. Mr. President, I ask that the pending amendment be be temporarily laid aside so that I might offer a technical amendment.

The PRESIDING OFFICER. Is there objection?

Mr. DOLE. This corrects a drafting error on the Packwood amendment. It has been cleared on both sides. I send a technical amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the pending amendment is temporarily set aside.

The amendment will be stated.

The bill clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes an unprinted amendment numbered 814.

On page 26, strike lines 31 through 33 and insert in lieu thereof, "percent of the amounts received in the Treasury after December 31, 1981, during any fiscal year ending before October 1, 1985 from any sale made by the Secretary of Agriculture".

The PRESIDING OFFICER. The Chair requests that order be restored in the Chamber.

The Senator from Kansas.

Mr. DOLE. Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. The quesion is on agreeing to the amendment of the Senator from Kansas.

The amendment (UP No. 814) was agreed to.

Mr. DOLE. Mr. President, could we have order?

The PRESIDING OFFICER. The Chair respectfully requests Senators to return to their seats and refrain from conversation so that the Senator from Kansas may be heard.

Mr. DOLE. Mr. President, let me again urge my colleagues. I know that evening is falling and a lot of people are coming to the floor. They may be dreaming up amendments at this very moment. We have been on the floor for several hours. I would again repeat that unless this amendment has had hearings and unless it has been signed off by Treasury, with one or two exceptions where we have made exceptions and cleared it all the way around, we have no choice but to oppose the amendment. I would say to my colleagues on both sides there are about an equal number of Republicans and Democrats who have rather important amendments in this bill. We still need to go to conference. The Senator from Kansas is willing to do that, or I am willing to drop the whole bill and wait until next year.

I would urge my colleagues, unless it is something they feel strongly about and something which has been approved by Treasury and you have had hearings on it, and there is no objection on the committee, I would hope you might defer it until January so we can complete this bill and go to conference yet tonight. As soon as the House adjourns, I am certain it is going to be difficult to find enough House Members with whom to go to conference.

Having said that, Mr. President, I yield to the Senator from Rhode Island.

The PRESIDING OFFICER. The pending business is the amendment of the Senator from Nevada.

Mr. DOLE. I ask unanimous consent that that amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Rhode Island.

MISCELLANEOUS TAX PROVISIONS

Mr. CHAFEE. Mr. President, I support this miscellaneous tax bill reported by the Finance Committee, and I want to congratulate our chairman, Senator DOLE, for putting together a package of provisions, all of which have had hearings and have support of the Treasury.

Occasionally, we have a situation where nontax legislation enacted by Congress will require conforming amendments to the Tax Code so that consistency in tax policy is maintained. Such a situation arose last year when the Small Business Incentive Act of 1980 was reported from the Banking Committee and passed into law.

This legislation created a new, simplified regulatory structure for venture capital firms known as small business development companies. However, those companies electing to register under this new act will lose their tax deduction for dividends passed through to shareholders—a deduction which continues to be available to other investment companies.

Clearly, Mr. President, the new Small Business Incentive Act will not be fully utilized or effective until a technical conforming amendment is added to the Tax Code providing the same passthrough tax treatment to companies which elect regulation under its provisions.

Earlier this year I was joined by Senators DURENBERGER, BAUCUS, and SARBANES in introducing S. 1304 which provides this passthrough treatment. I appreciate the fact that Senator PACKWOOD held a hearing on this measure in the Tax Subcommittee on July 24, 1981, and that the full committee has approved it without a single objection. I also want to thank the Treasury for giving its approval.

I am certain the Senate will agree we should provide every reasonable incentive to investors willing to put money and management assistance into small, high risk ventures. Therefore, I urge the adoption of H.R. 4717.

Mr. DOLE. Mr. President, may I inquire of the Senator from Nevada if he is prepared to proceed or does he need more time?

Mr. CANNON. I need about 2 minutes, Mr. President.

Mr. DOLE. Maybe we can go on with the amendment of the Senator from Montana, which we cannot accept and which we shall move to table.

The PRESIDING OFFICER. The Senator from Montana.

UP AMENDMENT NO. 815

(Purpose: To cap the amount of interest that can be imputed by the Internal Revenue Service under Section 483 of the Code on certain qualified property)

Mr. MELCHER. Mr. President, I send my amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The bill will be stated.

The bill clerk read as follows:

The Senator from Montana (Mr. MELCHER) proposes an unprinted amendment numbered 815.

At the appropriate place add the following new section:

"SEC. . MAXIMUM RATE OF IMPUTED INTEREST.

(a) IN GENERAL.—Section 483 of the Internal Revenue Code of 1954, as amended, is amended by adding at the end thereof the following new subsection:

(g) MAXIMUM RATE OF INTEREST ON CERTAIN TRANSFERS BETWEEN RELATED PARTIES.—

(1) IN GENERAL.—In the case of a sale or exchange of qualified non-depreciable property to a U.S. person, the maximum interest rate used in determining the total unstated interest under the regulations under subsection (b) shall not exceed 7 percent, compounded semiannually.

(2) QUALIFIED NON-DEPRECIABLE PROPERTY.—For purposes of this subsection, the term 'qualified nondepreciable property' means any property which is not subject to an allowance for depreciation or amortization in the hands of the person holding the property after the sale or exchange.

(3) $2,000,000 LIMITATION ON QUALIFIED NON-DEPRECIABLE PROPERTY.—Property shall not be considered qualified non-depreciable property to the extent the sales price of all property sold or exchanged by the parties during a 12-month period exceeds $2,000,000.

(4) SPECIAL RULE FOR LIQUIDATIONS.—In the case of a sale or exchange of stock in a corporation which is liquidated (in a transaction to which part II of subchapter C applies) within 2 years of the sale or exchange, paragraph (1) shall be applied, by treating the sale or exchange as a sale or exchange of the assets of the corporation. The Secretary shall prescribe regulations for the application of this paragraph.

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to payments made after June 30, 1981, pursuant to sales or exchanges occurring after such date.".

Mr. MELCHER. Mr. President, this is an amendment that has had hearings and this is an amendment that the Treasury Department agreed to. In fact, it is an amendment that we passed in the Senate 100 to zero. I understand that is the second time in the Senate's history that such a vote was cast for any amendment.

Mr. President, the amendment I am offering limits the amount of interest that the Internal Revenue Service can impute on the sale of nondepreciable property up to $2 million in value. The cap would be 7 percent.

This amendment is no stranger to the Members of the Senate. I offered this amendment to the tax bill and it was approved 100 to nothing. This amendment was a carefully worked-out compromise between myself and other supporters of the proposal, Secretary of the Treasury Regan, and the leadership of the Finance Committee. Everyone signed off on it.

It was also my understanding that the conferees from the Ways and Means Committee had no objection to the compromise we had worked out. However, during the Senate and House conference on the tax bill, my amendment was gutted. In its final form it only applied to transactions of $500,000 between family members.

I want family members to be able to sell property at lower interest rates. That is important to the protection of the family farm, ranch, and small business.

But that is not the only problem that taxpayers face in dealing with imputed interest rates under section 483 of the Code.

I want to see that young people have a chance to start out in farming, ranching, and business, whether they have the opportunity to purchase the farm, ranch, or business from a family member or not. To give them this chance, we must insure that we do everything possible to hold down the cost of getting started. Every percent that interest rates increase makes it harder for young people to get started. That is what we are talking about here, and that is why my amendment was passed unanimously by the Senate.

In 1975 the IRS set imputed interest rates at 7 percent. They set a minimum interest rate on a contract purchase made between two parties. In effect IRS stuck their nose in on a private deal where they have no business. The Treasury states there is no revenue gain or loss, and it should not be any of their business to interfere in a private contract between a willing seller and a willing buyer. My amendment does not repeal

their regulation, but it does freeze for now IRS at the June 30 level on imputed interest rates.

Mr. President, we have done very little in the past few months except talk about the devastating effects that high interest rates are having on the American people. The imputed interest rate increases that the IRS has put into effect are just another example of high interest rates becoming institutionalized. As the law now stands, higher interest rates feed higher imputed interest rates, and higher imputed interest rates, in turn, lead to still higher market interest rates.

It is a vicious circle and it is leading to the loss of an entire generation of young farmers, ranchers, and business people. I thought we had taken a very reasonable step toward breaking part of this circle in approving my amendment as part of the tax bill. I was very disappointed that my amendment did not survive the conference in tact. I still believe this amendment is vital, and I hope that the Senate will approve it unanimously once again to make it clear that this is the change we want in the law.

Mr. DOLE. Mr. President, I am certainly sympathetic with some of the statements made by the Senator from Montana. We attempted to take care of this problem in the Economic Recovery Tax Act. We did effect a compromise.

(1) In general. In case of any qualified sale, the maximum interest rate used in determining the total unstated interest rate under the regulations under subsection (b) shall not exceed 7 percent, compounded semiannually.

(2) Qualified sale. For purposes of this subsection, the term "qualified sale" means any sale or exchange of land by an individual to a member of such individual"s family (within the meaning of section 267(c)(4)).

We also put on a $500,000 limitation.

(3) $500,000 limitation. Paragraph (1) shall not apply to any qualified sale between individuals made during any calendar year to the extent that the sales price for such sale (when added to the aggregate sales price for prior qualified sales between such individuals during the calendar year) exceeds $500,000.

So, Mr. President. I suggest that we made a good-faith effort.

Again, I suggest that, as far as this Senator knows, there have not been any hearings on this legislation. I know the Treasury strongly opposes it. I know in the heat of the efforts on the Economic Recovery Tax Act, there was a lot of discussion of this amendment. It was compromised in the conference and I think fairly dealt with. If in fact the Senator from Montana wants to bring it up again next year and have hearings on it, that is fine, but I am under a lot of pressure to get this bill to conference tonight.

I move to lay the amendment on the table, Mr. President. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The question occurs on the motion to table the amendment submitted by the Senator from Montana. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Minnesota (Mr. DURENBERGER), the Senator from Arizona (Mr. GOLDWATER), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Idaho (Mr. MCCLURE), the Senator from Illinois (Mr. PERCY), and the Senator from Texas (Mr. TOWER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Oklahoma (Mr. BOREN), the Senator from Mississippi (Mr. STENNIS), and the Senator from New York (Mr. MOYNIHAN) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 48, nays 43, as follows:

[Rollcall Vote No. 496 Leg.]

YEAS—48

Armstrong	Domenici	Mathias
Baker	East	Mattingly
Bentsen	Garn	Murkowski
Boschwitz	Gorton	Nickles
Bumpers	Grassley	Packwood
Byrd, Harry F., Jr.	Hatch	Quayle
	Hatfield	Rudman
Cannon	Hawkins	Schmitt
Chafee	Hayakawa	Simpson
Cochran	Helms	Specter
Cohen	Huddleston	Stafford
Cranston	Humphrey	Stevens
D'Amato	Johnston	Symms
Danforth	Kassebaum	Wallop
DeConcini	Laxalt	Weicker
Denton	Long	
Dole	Lugar	

NAYS—43

Abdnor	Heflin	Pressler
Andrews	Hollings	Proxmire
Baucus	Inouye	Pryor
Biden	Jackson	Randolph
Bradley	Jepsen	Riegle
Burdick	Kasten	Roth
Byrd, Robert C.	Kennedy	Sarbanes
Chiles	Leahy	Sasser
Dixon	Levin	Thurmond
Dodd	Matsunaga	Tsongas
Eagleton	Melcher	Warner
Exon	Metzenbaum	Williams
Ford	Mitchell	Zorinsky
Glenn	Nunn	
Hart	Pell	

NOT VOTING—9

Boren	Heinz	Percy
Durenberger	McClure	Stennis
Goldwater	Moynihan	Tower

So the motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. BIDEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 816

(Purpose: To reduce the excise taxes on wagering authorized under State law)

Mr. BIDEN. Mr. President, I ask unanimous consent that we move back to the amendment that was laid aside, the amendment of the Senator from Nevada.

The PRESIDING OFFICER. Without objection, it is so ordered. The pending matter is the amendment of the Senator from Nevada.

Mr. BIDEN. Mr. President, the Senator from Nevada and I have talked at length on this and I think we have worked out a compromise, the essence of which is to keep the law as it is, with two exceptions, and that is reducing the amount and the percentage that is paid in tax.

I believe the Senator has a substitute for his own amendment.

Mr. CANNON. Mr. President, the Senator is correct. I send to the desk a modification or I ask that my amendment be withdrawn and that this amendment be substituted in its place.

The PRESIDING OFFICER. The amendment is withdrawn, without objection.

The clerk will report the new amendment.

The assistant legislative clerk read as follows:

The Senator from Nevada (Mr. CANNON) for himself and Mr. LAXALT proposes an unprinted amendment numbered 816.

Mr. CANNON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place add the following:

SEC. . WAGERING PERMITTED UNDER STATE LAW.

(a) TAX ON WAGERS.—Subsection (a) of section 4402 (relating to wagers) is amended to read as follows:

"(a) WAGERS.—

"(1) STATE AUTHORIZED WAGERS.—There shall be imposed on any wage authorized under State law an excise tax equal to 0.25 percent of the amount of such wager.

"(2) UNAUTHORIZED WAGERS.—There shall be imposed on any wager which is not authorized under State law an excise tax equal to 2 percent of the amount of such wager.".

(b) OCCUPATIONAL TAX.—Section 4411 (relating to imposition of tax) is amended to read as follows:

"SEC. 4411. IMPOSITION OF TAX.

"(a) IN GENERAL.—There shall be imposed a special tax of $500 per year to be paid by each person who is liable for the tax imposed under section 4401 (a) (2) or who is engaged in receiving wagers for or on behalf of any person so liable.

(b) AUTHORIZED PERSONS.—In the case of a person authorized under the law of any State or political subdivision thereof to engage in the business of accepting wagers or to receive wagers for or on behalf of any such person, subsection (a) shall be applied by substituting "$50" for "$500".".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to taxable periods beginning after December 31, 1981.

Mr. CANNON. The amendment which has now been worked out does two things: It reduces the excise tax on wagering in States where wagering is legal from 2 percent to a quarter of 1 percent, and it reduces the occupational tax in States where wagering is legal from $500 to the amount of $50. It leaves the taxes exactly as they are in States where wagering is illegal.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Nevada.

The amendment (UP No. 816) was agreed to.

GROUP ELIGIBILITY FOR TRADE ADJUSTMENT ASSISTANCE

Mr. METZENBAUM. Mr. President, I rise to express my strong support for the amendment to retain the current standard for group eligibility for trade adjust-

ment assistance. This amendment is urgently needed to prevent a proposed change in eligibility criteria that would impose new sacrifices upon American workers made jobless by foreign competition.

The proposed change, scheduled to go into effect in February, would sharply curtail the number of unemployed workers who could qualify for important trade adjustment assistance benefits. It would require that for purposes of group eligibility, imports must be shown to be a "substantial cause" of unemployment. Under current law, imports have to "contribute importantly" to unemployment for the workers to be certified as eligible for trade adjustment.

Mr. President, the "substantial cause" test is unnecessarily harsh and restrictive. It will be virtually impossible to implement. As the Congressional Budget Office noted recently in a report to the Senate Finance Committee:

> The Secretary of Labor would be required to examine all possible causes of job separations and compare their relative contribution to layoffs in order to decide whether or not imports were less important than any other cause. This change presumes a level of sophisticated economic analysis that may not have been developed yet.

Through severe budget cutbacks and substantive changes in the law, the current administration has already succeeded in reducing sharply the scope of the trade adjustment program. As part of the Omnibus Budget Reconciliation Act, Congress has already gone along with the administration's request to cap TAA, income maintenance benefits to State unemployment compensation levels. This has slashed benefits for unemployed workers from a maximum of $289 per week to an average benefit level of $150 per week. The duration of TAA benefits has also been reduced. Currently, a worker cannot receive more than 52 weeks of a combination of State unemployment compensation extended benefits, and trade adjustment assistance. Furthermore, TAA is now payable only after State benefits are exhausted.

These and other changes have been used by the Reagan administration to deny critically needed assistance to thousands of workers. Under the current "contribute importantly" standard, the Secretary of Labor is already rejecting all but 10 percent of the TAA petitions being filed today. A 10-percent approval rate. And it does not take much imagination to see what would happen with a more stringent test of eligibility.

I do not believe that it is fair or equitable to impose disproportionate burdens on the backs of those who can least afford to bear them. But that, unfortunately, is not the philosophy of those who are proposing this cruel and callous change.

Mr. President, this unfair and restrictive rule is directed against thousands of working people and against thousands of families whose breadwinners are, through no fault of their own, unemployed. And it is another step toward dismantling the entire trade adjustment program. I urge my colleagues to accept the amendment which will preserve the current group eligibility standard for this important program.

FNMA INCOME AND LOSS AVERAGING TREATMENT

Mr. President, I express my strong support for the amendment to provide the Federal National Mortgage Association the same income and loss averaging treatment for tax purposes which is currently available to other financial institutions.

The FNMA, or Fannie Mae, is essential to the stable flow of money into this Nation's hard-pressed home mortgage market. During the worst period for this industry since the Great Depression, Fannie Mae has been the one institution that has contributed a degree of stability to the housing market. Its aggressive presence in the housing finance market has sustained what little movement there has been in the area, and by buying up mortgages held by other financial institutions, Fannie Mae has helped provide funds for new mortgages. This year alone, Fannie Mae purchased more than 90,000 home mortgage loans worth more than a total of $5 billion.

But Fannie Mae is not immune to the high interest rates that have crippled so many of our financial institutions. And today, the organization that holds one out of every 20 mortgages in this Nation with a value of more than $60 billion is also losing money.

Like other financial institutions, Fannie Mae has been forced to borrow funds at rates in excess of 18 percent, while holding onto mortgages with an average rate of return of less than 10 percent. Unlike other financial institutions, however, Fannie Mae is not permitted to carry its losses back 10 years. Instead, it may only carry losses back three years and forward fifteen.

This is unfair and wrong.

Fannie Mae is comparable to other financial institutions. It is essentially a bank chartered by Congress to invest in home mortgages. The economic conditions which affect the thrifts and other financial institutions affect Fannie Mae as well. It should not be treated differently for tax purposes.

The amendment before us will correct this inequity. It will permit Fannie Mae to treat its losses generated by its long-term investment in mortgage loans in the same manner as other financial institutions. And it will maintain for this country a strong force for stability in an absolutely essential segment of our economy.

I urge my colleagues to support this constructive amendment.

Mr. DENTON. Mr. President, the Senate Finance Committee has produced a good measure that I support. But there is one issue on which I would like to comment.

Mr. President, I rise in support of Senator D'AMATO's efforts to suspend enforcement of IRS Revenue Ruling 81–216, which greatly restricts the issuance of revenue bonds by State and local governments. In these times of high interest rates and cutbacks in Federal loan and guarantee programs, State-sponsored programs may be the only affordable or available source of credit.

The Treasury has enormous power over the fate of IDB's not only in proposing legislation but also through rulings under the Internal Revenue Code which determine which bonds are actually tax exempt. If Revenue Ruling 81–216 stands, it could eliminate vital sources of funds for community and business development. The effect would be nationwide.

To be sure, there are abuses that should be eliminated. But, on the other hand, for every dollar of IDB's issued, the Federal Government receives back more money in taxes than it loses through the tax exemption.

Senator D'AMATO's amendment would merely prevent enforcement of a specific interpretation of the law for a limited period. Since the amendment would not change the Internal Revenue Code, Revenue Ruling 81–216 would remain the prevailing interpretation of substantive law until the law itself is revised.

The policy implication of administrative rulings of this nature should be carefully considered by the congressional committees charged with dealing with tax laws. If changes are to be made in the rules governing IDB's, they should be reviewed by the Congress. We all, I am sure, agree on the necessity of keeping the IDB program viable.

I, therefore, urge the Senate Finance Committee's immediate consideration of Senator D'AMATO's proposed amendment to suspend enforcement of Revenue Ruling 81–216.

INCREASING CONCERN OVER THE NATIONAL DEBT

Mr. BAUCUS. Mr. President, as we debate this tax bill, I want to express my increasing concern about our national debt.

As nearly everyone in America knows, the national debt exceeded $1 trillion for the first time this year.

When President Reagan took office at the beginning of this year, he was presented with a budget left by his predecessor, President Jimmy Carter, for a national debt that was less than $1 trillion. At that time, it was estimated that for the current fiscal year interest on the national debt would be $89.9 billion. In the past year that estimate has risen nearly $30 billion. The most recent estimate was provided by the Senate Budget Committee in the second budget resolution for fiscal year 1982. According to the Senate Budget Committee, interest on the national debt will be $118.9 billion.

Mr. President, I find it absolutely extraordinary that we have allowed the economy to deteriorate to a point where we are paying nearly $120 billion just for interest on debt.

There may be many things wrong with our economy and with the way we handle Government, but there can be no excuse for allowing a Federal budget to fall further and further into deficit.

Just 2 months ago, President Reagan said in an address to the National Federation of Republican Women that "this administration is committed to a balanced budget, and we will fight to the last blow to achieve it by 1984 * * * we will not sit on our hands and watch helplessly as the deficit swells and

swells." Yet despite this encouraging promise, let us take a look at the record. According to the most recent projected budget deficits, our national debt will be swelling by 1984 by as much as $400 billion more than it is today. Let me put that a different way. When President Reagan inherited this Government from President Carter, the Federal debt stood at less than $1 trillion. Now, it looks as though within a 4-year period, the Federal debt may balloon from less than $1 trillion to more than $1.4 trillion.

Let me insert at this point in the RECORD a table specifying some of the details for these projected deficits.

Projected budget deficits/surpluses (excluding future budget cuts)

[In billions]

March 1981:	
Fiscal year 1982	−$45.0
Fiscal year 1983	−52.7
Fiscal year 1984	−43.7
July 1981:	
Fiscal year 1982	−42.5
Fiscal year 1983	−52.7
Fiscal year 1984	−43.7
September 1981:	
Fiscal year 1982	−56.1
Fiscal year 1983	−54.9
Fiscal year 1984	−47.8
November 1981:	
Fiscal year 1982	−96.7
Fiscal year 1983	−126.5
Fiscal year 1984	−145.7
December 1981:	
Fiscal year 1982	−109.1
Fiscal year 1983	−152.3
Fiscal year 1984	−162.0

Mr. President, I am not the only person in the United States concerned about the problems of our national debt. I am sure that nearly all of my colleagues join me in despairing about this problem. But we can do something about it. We are not helpless.

One thought recently suggested was offered to me by one of my constituents, Mrs. Althie L. Schmid. Mrs. Schmid wrote to me just 5 days after President Reagan told the National Federation of Republican Women that his administration would not sit by and allow the deficit to "swell and swell." Let me read to you what Mrs. Schmid said:

DEAR SENATOR BAUCUS: As I was listening to President Reagan's latest speech, I was struck by one figure . . . that it was necessary to budget $96 billion for interest on the national debt. This, I gather, is everyone's debt; so maybe everyone can do something about it.

As a fellow American, I am suggesting we all start paying on this debt. Rich or poor, honest or dishonest, men and women, we can all make an effort. To this end I am going to make a beginning . . . I am enclosing a check for half a day's pay, and I want you to present it to the Treasury Department on my behalf. I am making a similar check to President Reagan with a similar request.

Then if enough people respond, and you don't need the $96 billion for interest, apply the usual portion to the principal. Think what this can do to the interest rate and to our image abroad and our self-respect at home . . .

Yours sincerely,

ALTHIE SCHMID.

In a PS to her letter, Mrs. Schmid said:

If the Senate will be inspired that will make a great beginning.

Now for the interesting part. Mrs. Schmid enclosed a check made out to the U.S. Government in the amount of $30. As I looked at that check, I was struck by the nobleness of her gesture. And then I began to do some calculations.

What if every person in the United States who is gainfully employed sent in a like amount? How much would that raise to pay off the interest on the national debt? The answers to these questions are really quite discouraging. When you consider that there are roughly 100 million people in the United States who are gainfully employed, a $30 contribution by each of them would raise just $3 billion. Even if we could get everyone to send in $30 each month for the next year, that would hardly pay off the additional debt service incurred for the increased deficits experienced during the 12 months of the Reagan administration.

Mr. President, there may be some good reasons for increasing the national debt at this time. However, there cannot always be good reasons every year for increasing this debt. The run on the U.S. Treasury must stop. We must have the courage to face up to the fact that deficits occur either because we do not raise enough money or because we spend too much. Either way we must pull together the next year to stop the continuing drain on the Federal Treasury.

Mr. President, I am today transmitting to Secretary Regan a copy of Mrs. Schmid's letter and her attached check with the request that it be applied to pay off our national debt. I am also enclosing my own check in the same amount with a similar request.

I know $60 to pay off a debt of $1 trillion is a small gesture. However, I believe all Americans, whether they are U.S. Senators or just plain Americans slugging it out trying to make a living, must make their own commitment to pay off the national debt. Otherwise, our grandchildren will only be left with a bankrupt nation, a future that I do not wish to bestow on succeeding generations of Americans.

The PRESIDING OFFICER. The question is on agreeing to the amendment in the nature of a substitute, as amended.

The amendment in the nature of a substitute was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendments and third reading of the bill.

The amendments were ordered to be engrossed, and the bill to be read a third time. The bill was read the third time.

The PRESIDING OFFICER. The question is, Shall the bill pass?

The bill (H.R. 4717), as amended, was passed.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

Mr. DOLE. Mr. President, I move that the Senate insist on its amendments and request a conference with the House, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer (Mr. WARNER) appointed Mr. DOLE, Mr. PACKWOOD, Mr. WALLOP, Mr. LONG, and Mr. HARRY F. BYRD, JR., conferees on the part of the Senate.

The PRESIDING OFFICER. The majority leader is recognized.

ORDER OF LEGISLATIVE PROCEDURE

Mr. BAKER. Mr. President, I will ask the Senate to turn to the consideration of the foreign operations conference report, and then turn to the consideration of the Nuclear Regulatory Agency reform bill, and then to the identities bill.

FOREIGN ASSISTANCE APPROPRIATIONS—CONFERENCE REPORT

Mr. KASTEN. Mr. President, I submit a report of the committee of conference on H.R. 4559 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4559) making appropriations for Foreign Assistance and related programs for the fiscal year ending September 30, 1982, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of today, December 16, 1981.)

Mr. KASTEN. Mr. President, the committee of conference on the foreign assistance appropriation bill met yesterday, and after 8 hours of hard-fought negotiation, came to agreement on this legislation. Thus, subject to passage here in the Senate in a few minutes, we have a regular foreign assistance appropriations bill for the first time in 3 years.

Mr. President, before I say just a few brief words about the conference agreement, I would like to express my deep appreciation to the senior Senator from Hawaii, who has been an invaluable partner with me in our common efforts to secure passage of this legislation which is so badly needed in order for the administration to carry out its foreign policy.

I cannot emphasize enough what it has meant to me to have the cooperation of Senator INOUYE in this endeavor. I also want to pay tribute to the committee staff, Jim Bond, Jane McGhee, Richard Collins, and Jane McMullan, who have worked so hard on this matter over the last several months.

As an indication of their hard work, and this is not an exceptional example, after our negotiations were completed at 6:30 p.m. yesterday, they worked until

4 a.m. this morning in order to get this matter before the House and Senate today.

Mr. President, I should like to emphasize two aspects of the conference agreement. First of all, for the foreign assistance programs, titles 1, 2, and 3 of the bill, we are $280 million below the administration's September request. In other words, we have bettered the President's recommendation for a 12-percent reduction which was contained in his September request.

The other aspect of this conference agreement which I would like to emphasize is that we have succeeded in redirecting U.S. foreign assistance policy, in line with the Reagan administration's desires, to more of an emphasis on the security related assistance portion of this package. This does not mean that we have abandoned commitments for purely developmental related assistance, but we have, rightly I believe, put the proper emphasis on security and political related programs.

Mr. President, for the Export-Import Bank, the conference agreed to the House level on direct credits $4.4 billion, rather than the $4.7 billion in the Senate bill, which is nonetheless more than $500 million over the administration's request. The very strong consensus in the Senate, and for the most part in the House, was that this particular item is very important for American jobs and for a healthy American export posture.

In line with this consensus, the conference agreed to the higher Senate level for Export-Import Bank guarantees. Mr. President, I am about to move adoption of the conference report, but first I would like to yield to the distinguished Senator from Hawaii for whatever remarks he may wish to make.

Mr. INOUYE. Mr. President, I want to thank the chairman of the Foreign Operations Subcommittee for his kind words of praise. I am not going to speak at length on this conference agreement. but I do not want this moment to pass without giving recognition to the superb accomplishment of the Senator from Wisconsin. In this, his first year in the Senate, he has achieved what few in this Chamber thought possible. If the Senate adopts this conference report, and it is my hope that it would be adopted by a substantial margin, we will have set the foreign policy of this Nation back on track. In no small measure that achievement is the responsibility of my good friend and colleague, BOB KASTEN.

Mr. President, I believe that the bill which emerged from the conference represents a substantial improvement over the bill as passed by the Senate, and as passed by the House. Recognizing the necessity of passing a regular foreign assistance bill, the conferees on this measure acted in a most responsible manner and have brought before their respective bodies a bill which is deserving of support. It is a well reasoned measure which holds in delicate balance the complimentary programs of economic and security assistance.

In addition, it provides, under title IV, funding for the Export-Import Bank and maintains the U.S. competitive position in international trade. And that, Mr. President, means jobs.

Mr. President, I strongly urge Members on both sides of the aisle to support this conference agreement.

In closing, Mr. President, I wish to join my chairman in expressing the gratitude and commending our staff members, Mr. Richard Collins, Mr. James Bond, Miss Jane McGhee, and Miss Jane McMullan.

Mr. HEFLIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. HEFLIN. Mr. President, I ask for the yeas and nays on this conference report.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. KASTEN. Mr. President, I yield as much time as he may desire to the Senator from Pennsylvania.

Mr. SPECTER. Mr. President, I wish to commend the distinguished Senator from Wisconsin, the chairman of the Foreign Operations Subcommittee on Appropriations for a truly outstanding job in a very difficult legislative matter.

The conference committee, which met yesterday, was the final portion of a long, arduous task that Senator KASTEN performed with great distinction. For those of us who serve with him on the subcommittee and were present during at least part of the conference committee session, it was obvious that it took diplomacy and patience and great skill in the face of tremendous obstacles which were presented to have an agreement with the House of Representatives in the Senate's version of a very complicated piece of legislation.

I also join in commending the distinguished Senator from Hawaii (Mr. INOUYE) for his cooperation, and for his guidance, experience, and seniority. I think that the conference report, as presented to this body, is a good product which ought to be accepted.

I yield the floor.

Mr. KASTEN. Mr. President, I thank the Senator from Pennsylvania and also the Senator from Hawaii for their kind comments and for their help.

Mr. DANFORTH. Mr. President, I wish to comment on the conference report on the foreign aid appropriations bill (S. 1802).

As is often the case, the legislative process has produced something of a mixed blessing. On the positive side, the conferees agreed to include $700 million for the World Bank's IDA—a considerable improvement over the $532 million provided in the Senate bill. I would like to compliment the Senate conferees on this item, even though the $700 million figure falls below the $820 million in the revised administration request.

On the down side, I am extremely disappointed that the Senate conferees were unwilling to provide a reasonable fiscal year 1982 U.S. contribution to the International Fund for Agricultural Development (IFAD). The money was requested by the administration. The foreign aid authorization bill moves in that direction by authorizing a $180 million U.S. contribution for IFAD's replenishment. The House appropriations bill included $40.5 million, the Senate bill—and the conference report—nothing.

When the appropriations bill was on the Senate floor, Senators HATFIELD, LEAHY, EAGLETON, PERCY, and PELL joined me in stressing the view that the United States should look for ways to be supportive of IFAD and to help it to strengthen its effectiveness as a development agency. Since that time, I understand there is reason to believe that many of the concerns expressed by the Senate Appropriations Subcommittee are being resolved: The OPEC countries are actively seeking a means to provide an additional $20 million, which would bring the OPEC contribution to IFAD's replenishment to a full $450 million. IFAD is itself taking steps, I am told, to deal with the issue of professional staff size.

In view of this progress; in view of support for IFAD expressed in the Senate; in view of moneys appropriated by the House for IFAD; and in view of the administration's support—albeit not as active as I would have hoped—I regret that the appropriations conference was not able to find a way of making a significant U.S. payment to IFAD in 1982.

Without belaboring the issue further, let me conclude by expressing the hope that the administration and the Congress will be more successful in 1982 in providing a significant U.S. contribution to IFAD. With $450 million from OPEC and $40 million from other developed countries, IFAD will warrant, it seems to me, an initial payment against the $180 million U.S. replenishment pledge.

Let me also express the hope that other countries, in the absence of a timely U.S. contribution this year, will not retrench on their own payments but will continue to support IFAD's work with small farmers in the poorest countries.

Senator LEAHY, as a conferee, fought hard to see included in S. 1802 a fiscal year 1982 payment for IFAD. I commend him for his efforts. I know he joins me in these sentiments.

TRIBUTE TO SENATOR KASTEN

Mr. HATFIELD. Mr. President, the passage of the fiscal year 1982 foreign operations appropriations bill is a landmark event. Not since fiscal year 1979 has a regular foreign operations appropriations bill been passed by Congress and sent to the President for his signature.

This could not have occurred, Mr. President, without the leadership of Senator BOB KASTEN. As a freshman Senator, he has taken on a most difficult and thankless job in chairing the Foreign Operations Subcommittee of Appropriations. He has pursued his responsibilities with alacrity and creativity, bringing before the Senate an original foreign operations appropriations bill in order to underscore the Senate's interest in passing a regular bill, and prompt the House into action. It is because of his enduring patience, diligence, and leadership that we are at last able to enact a regular bill and give our foreign assistance programs the imprint of congressional priorities.

Mr. President, in extending these sincere congratulations to Senator KASTEN, I do not wish in any way to denigrate the leadership of the former subcommittee chairman, Senator INOUYE. It has certainly not been his fault that we have had this 3-year hiatus in securing passage of a regular bill. All of us on the committee well remember his eloquent defense of our foreign assistance programs, and his unyielding but unfailingly courteous determination to press forward with the regular appropriations process. I am sure Senator KASTEN will join with me in thanking Senator INOUYE for the benefit of his experience and the bipartisan cooperation he has always practiced.

Mr. President, with adoption of this conference report, all but three regular appropriations bills will have cleared Congress—Treasury, Commerce, and Labor-HHS. Those three will remain covered by the continuing resolution signed into law yesterday. I am sure those associated with the programs funded under the foreign operations bill can tell us all hair-raising stories about the perils of funding under continuing resolutions—those programs have been under a CR for the past 3 years. It is my earnest hope, and I am sure it is the firm intention of the leadership, to finish those remaining three bills before the expiration of the continuing resolution on March 31.

Mr. KASTEN. Mr. President, I move adoption of the conference report on H.R. 4559.

The PRESIDING OFFICER. The question is on agreeing to the conference report. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Minnesota (Mr. DURENBERGER), the Senator from Arizona (Mr. GOLDWATER), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Idaho (Mr. MCCLURE), the Senator from Illinois (Mr. PERCY), and the Senator from Texas (Mr. TOWER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Oklahoma (Mr. BOREN), the Senator from New York (Mr. MOYNIHAN), the Senator from Mississippi (Mr. STENNIS), the Senator from Delaware (Mr. BIDEN), and the Senator from Louisiana (Mr. LONG) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 55, nays 34, as follows:

[Rollcall Vote No. 497 Leg.]

YEAS—55

Baker	Dixon	Jackson
Baucus	Dodd	Kassebaum
Boschwitz	Dole	Kasten
Bradley	East	Kennedy
Bumpers	Glenn	Leahy
Chafee	Gorton	Levin
Chiles	Hart	Lugar
Cochran	Hatch	Mathias
Cohen	Hatfield	Matsunaga
Cranston	Hawkins	Metzenbaum
D'Amato	Hayakawa	Mitchell

Domenici	Laxalt	Zorinsky
Eagleton	Mattingly	

NOT VOTING—11

Biden	Heinz	Percy
Boren	Long	Stennis
Durenberger	McClure	Tower
Goldwater	Moynihan	

So the conference report was agreed to.

Mr. KASTEN. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. JEPSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. KASTEN. Mr. President, I believe the clerk has some amendments in disagreement.

The PRESIDING OFFICER. The clerk will state the amendments in disagreement.

The bill clerk read as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 22 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum inserted by said amendment, insert: "$215,438,000: *Provided*, That no funds shall be available for the United Nations Fund for Science and Technology or the United Nations Decade for Women".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 23 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: ": *Provided further*, That not less than $126,750,000 shall be available only for the United Nations Development Program".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 24 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: ": *Provided further*, That not more than $41,500,000 shall be available for the United Nation's Children's fund".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 25 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: ": *Provided further*, That not more than $7,850,000 shall be available for the United Nations Environment Program".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 38 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: $4,000,000 of this amount shall

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 62 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: : *Provided further*, That not less than $100,000,000 shall be available for Sudan, not less than $5,000,000 for Poland, not less than $5,000,000 for Tunisia, and not less than $20,000,000 for Costa Rica

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 63 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: : *Provided further*, That not more than $15,000,000 shall be available for Cyprus

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 89 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum inserted by the said amendment, insert: "$503,000,000: *Provided*, That $30,000,000 of this amount shall be transferred to the Agency for International Development to be used only for resettlement services and facilities for refugees and displaced persons in Africa"

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 138 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: 513. None of the funds appropriated or otherwise made available pursuant to this Act shall be obligated or expended to finance directly any assistance or reparations to Libya, Iraq, or South Yemen.

Mr. KASTEN. Mr. President, I move that the Senate concur en bloc to the amendments of the House to the amendments of the Senate Nos. 22, 23, 24, 25, 38, 62, 63, 89, and 138.

The PRESIDING OFFICER. Is there objection?

Without objection, the motion of the Senator from Wisconsin is agreed to.

Mr. KASTEN. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. KASTEN. Mr. President, I move to reconsider the vote by which the amendments in disagreement were agreed to.

Mr. INOUYE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. KASTEN. Mr. President, I yield the floor.

ORDER OF PROCEDURE

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, I propose now, with the minority leader's agreement, to do 10 or 15 minutes of calendar work. After that, we shall go to the Nuclear Regulatory Commission.

Mr. ROBERT C. BYRD. Mr. President, I have no objection.

Mr. BAKER. Mr. President, I have a number of items that have been cleared and rather than ask the minority leader to consider them separately, let me put them as I have them on my desk and invite his attention to the request.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate go

into executive session to consider the nomination of Anthony J. Calio, of Maryland, to be Deputy Administrator of the National Oceanic and Atmospheric Administration, which was reported out of the Commerce Committee today.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The clerk will state the nomination.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

The assistant legislative clerk read the nomination of Anthony J. Calio, of Maryland, to be Deputy Administrator of the National Oceanic and Atmospheric Administration.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified that he Senate has given its consent to this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ERECTION OF CERTAIN STRUCTURES AT THE WEST FRONT OF THE CAPITOL.

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of House Concurrent Resolution 231, a concurrent resolution authorizing the erection of certain structures at the west front of the Capitol.

The PRESIDING OFFICER. The clerk will state the resolution by title.

The assistant legislative clerk read as follows:

A House concurrent resolution (H. Con. Res. 231) authorizing the erection of certain structures at the west front of the Capitol in connection with a rally to be held on January 15, 1982, in commemoration of the birth of Doctor Martin Luther King, Junior.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the concurrent resolution was considered and agreed to.

Mr. BAKER. I move to reconsider the vote by which the House concurrent resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DEAUTHORIZATION OF CERTAIN CORPS OF ENGINEERS PROJECTS

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1493.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 1493) entitled "An Act to deauthorize several projects within the jurisdiction of the Army Corps of Engineers", do pass with the following amendment:

Strike out all after the enacting clause, and insert: That (a) section 204 of the Flood Control Act of 1965 (Public Law 89-298) is amended as follows: "The Dickey-Lincoln School Lakes project, Saint John River, Maine, is hereby modified to deauthorize that component of the project known and referred to as the Dickey Dam and its associated transmission facilities.".

(b) No Federal agency or department shall consider any license application relating to hydropower projects above the site of the Lincoln School Dam on the Saint John River and its tributaries, Maine, for a period of two years after the enactment of this Act.

SEC. 2. (a) The authorization for the Meramec Park Lake (hereinafter in this section referred to as the "project") contained in that portion of the general comprehensive plan for flood control and other purposes in the Upper Mississippi River Basin, which plan was authorized by section 4 of the Act entitled "An Act authorizing the construction of certain public works on rivers and harbors for flood control, and for other purposes", approved June 28, 1938 (52 Stat. 1218), as modified by section 203 of the Flood Control Act of 1966 (Public Law 89-789), is hereby terminated.

(b) The Secretary of the Army, acting through the Chief of Engineers (hereinafter in this section referred to as the "Secretary"), shall immediately undertake interim management and maintenance of works, structures, and interests in lands related to the project pending the implementation of the subsequent provisions of this section.

(c) The Secretary shall dispose of works, structures, and interests in lands related to the project as follows:

(1) To the State of Missouri, all right, title, and interest in and to not less than three thousand three hundred and eighty-two acres nor more than five thousand one hundred and twenty-two acres, as determined by the Governor of the State of Missouri.

(2) A perpetual easement sufficient to safeguard for the river user the natural, cultural, and visual resources of the Meramec River and Huzzah and Courtois Creeks shall be conveyed to the State of Missouri. The Secretary is hereby directed to establish such easements in conjunction with the State of Missouri. Said easements shall be not less than one hundred feet nor more than one-quarter mile as measured from the normal highwater mark of said river and creeks, taking into consideration the varying terrain of such lands and the best public interest. Said easement shall be available for the development of the Ozark Trail, which will be constructed and maintained by the State of Missouri.

The Secretary shall submit to the State of Missouri before January 6, 1982, an offer to convey the lands authorized by this section. If the State, by statute, disapproves such conveyance on or before April 30, 1982, the Secretary shall immediately offer all the works, structures, and interests in lands for sale to the previous owners in accordance with paragraph (2) of subsection (d) of this section. If the State fails to disapprove such conveyance on or after April 30, 1982, solely because of a veto by the Governor, the offer to convey by the Secretary shall remain valid until such time as the veto is sustained or overridden in accordance with State law.

(d)(1) Within ninety days of the date a conveyance is made to the State of Missouri in accordance with subsection (c) of this section, the Secretary shall offer the remainder of the works, structures, and interests in lands related to the project for sale to the previous owners at the current appraised value. Such previous owners shall have a period of one year in which to enter into a contract for the repurchase of such properties, after which any remaining works, structures, and interests in lands shall be sold at a public auction, or a series of public auctions, to be conducted following reasonable public notice and advertising of the time and place of such auction or auctions, until such time as all remaining works, structures, and interests in lands have been disposed of.

(2) If the State of Missouri disapproves such conveyance in accordance with subsection (c) of this section, the Secretary shall offer all the works, structures, and interests in lands related to the project for sale to the previous owners at the current appraised value. Such previous owners shall have a period of one year in which to enter into a contract for the repurchase of such properties, after which any remaining works, structures, and interests in lands shall be sold at a public auction, or a series of public auctions, to be conducted following reasonable public notice and advertising of the time and place of such auction or auctions, until such time as all remaining works, structures, and interests in lands have been disposed of.

(3) For purposes of this subsection, in any case in which the previous owner of any interest in land is dead, the surviving spouse or, if there is no surviving spouse, the heirs at law of such previous owner shall be deemed to be the previous owner of such interest.

(e) The Secretary is authorized either to comply with or to enter into a mutual agreement to cancel any executory contract the United States has entered for the purchase of lands for the project at the request of any landowner who is a party to such a contract, within six months after the date of enactment of this Act.

(f) Nothing in this section shall terminate the authority or responsibility of the United States to satisfy, pursuant to the provisions of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (49 U.S.C. 4601 et seq.) and any other applicable provision of law, all relocation assistance, and other obligations arising out of the acquisition, prior to the date of enactment of this Act, of any interest in real estate for the project.

(g) Funds authorized prior to enactment of this Act for the project specified in this section may be utilized by the Secretary, as necessary, to carry out the provisions of this section to deauthorize the project.

(h) The Secretary of the Army, acting through the Chief of Engineers, is authorized and directed to undertake such structural and nonstructural measures as he determines to be economically and engineeringly feasible to prevent flood damage to communities along the route of the Meramec River in Saint Louis and Jefferson Counties, Missouri. Such structural measures shall not include the construction of any dams or reservoirs. There is authorized to be appropriated for those fiscal years which begin on or after October 1, 1982, not to exceed $20,000,000 to carry out the provisions of this subsection.

(i) The Secretary of the Army, acting through the Chief of Engineers and in consultation with the Governor shall conduct a cooperative water supply study with the State of Missouri for the Meramec River Basin, Missouri, with particular emphasis on St. Louis and Jefferson Counties, Missouri. In preparing such study, the Secretary of the Army, acting through the Chief of Engineers, and the State of Missouri shall coordinate with appropriate units of local government and shall consult with other individuals and organizations having a direct interest in water supply problems in such river basin. The report required by this section shall be submitted to Congress not later than January 1, 1983. The views of the Governor shall accompany the report of the Secretary of the Army.

SEC. 3. The authorizations for the projects described in this section, at the locations described, are terminated upon the date of enactment of this Act:

(a) ILLINOIS: HELM RESERVOIR.—The project for Helm Reservoir, Skillet Fork of the Wabash River, Illinois, authorized by section 203 of the Flood Control Act of 1968 (Public Law 90-483), as part of the Wabash River Basin comprehensive plan.

(b) ILLINOIS: LINCOLN DAM.—The project for Lincoln Dam and Reservoir, Wabash River, Illinois and Indiana, authorized by section 204 of the Flood Control Act of 1965 (Public Law 89-298).

(c) INDIANA: BIG BLUE DAM.—The project for Big Blue Dam, Big Blue River, Indiana, authorized by section 203 of the Flood Control Act of 1968 (Public Law 90-483).

(a) ILLINOIS: ILLINOIS RIVER DUPLICATE LOCKS.—The project for the Illinois Waterway, Illinois and Indiana, authorized by section 101 of the River and Harbor Act of 1962 (Public Law 87-874).

(e) VIRGINIA: NANSEMOND RIVER.—The portion of the project for the Nansemond River, Virginia, from the United States Highway 640 Bridge at Suffolk, Virginia, to the upstream project limits at river mile 18.66, a distance of approximately two thousand five hundred feet, authorized by the first section of the Act entitled "An Act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and other purposes", approved August 11, 1888 (25 Stat. 410), and modified by the first section of the Act entitled "An Act authorizing the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes", approved July 3, 1930 (46 Stat. 922).

(f) INDIANA: CLIFTY CREEK DAM.—The project for the Clifty Creek Dam, Clifty Creek, Indiana, authorized by section 204 of the Flood Control Act of 1965 (Public Law 89-298).

(g) DELAWARE-MARYLAND-VIRGINIA: INTRACOASTAL WATERWAY.—The project for the Delaware Bay, Delaware, to Cape Charles, Chesapeake Bay, Virginia, Intracoastal Waterway, authorized under the terms of section 201 of the Flood Control Act of 1965 (Public Law 89-298).

(h) MARYLAND: SIXES BRIDGE.—The project for Sixes Bridge Dam and Lake, Maryland, authorized by section 85 of the Water Resources Development Act of 1974 (Public Law 93-251).

SEC. 4. (a) The consent of Congress is hereby given to the City of Boston to construct, maintain, and operate a fixed-span bridge in and over the water of the Fort Point Channel, Boston, Massachusetts, lying between the northeasterly side of the existing Summer Street Bridge and the northeasterly side of the existing Northern Avenue Bridge.

(b) Work shall not be commenced on such bridge until the location and plans therefor are submitted to and approved by the Secretary of Transportation.

(c) Any project heretofore authorized by an Act of Congress, insofar as such project relates to the above described portions of Fort Point Channel, is hereby abandoned.

(d) In approving the location and plans of any bridge, the Secretary of Transportation may impose any specific conditions relating to the maintenance and operation of the structure which may be deemed necessary in the interest of public navigation.

SEC. 5. The project for the Sandridge Dam and Reservoir, Ellicott Creek, New York, for flood protection and other purposes as authorized in section 201 of the Flood Control Act of 1970 is hereby modified to authorize the Secretary of the Army, acting through the Chief of Engineers, to construct a combination of channel enlargement work and diversion channels along Ellicott Creek mostly in the town of Amherst in accordance with the report of the Chief of Engineers dated April 2, 1979, except that cost sharing for such project shall be as provided in the report of the Board of Engineers for Rivers and Harbors dated July 20, 1978, at an estimated cost of $13,200,000.

SEC. 6. (a) The lock authorized by section 114 of the Water Resources Development Act of 1976 (Public Law 94-587), as a replacement for Vermilion Lock, Louisiana, shall hereafter be known as Leland Bowman Lock. Any law, regulation, map, document, or record of the United States which refers to such lock shall hereafter be held and considered to refer to such lock as "Leland Bowman Lock".

(b) The dam and reservoir on the Salt River, Missouri, known as the Clarence Cannon Dam and Reservoir, authorized by section 203 of the Flood Control Act of 1962 (Public Law 87-874) as the Joanna Reservoir, shall hereafter be known as the Clarence Cannon Dam and Mark Twain Lake. Any law, regulation, map, document, or record of the United States in which such dam and reservoir are referred to shall be held and considered to refer to such dam as the Clarence Cannon Dam and to such reservoir as the Mark Twain Lake, respectively.

SEC. 7. (a) The consent of Congress is hereby given to the city of Tampa, Florida, or its designee to construct and maintain two fixed-span bridges in and over the waters of the Garrison Channel, Tampa, Florida; one bridge to be at or adjacent to the site of the existing bascule railroad bridge and the other bridge to be at the site of the southerly extension of Franklin Street. Work shall not be commenced on such bridges until the location and plans therefor are submitted to and approved by the Secretary of Transportation.

(b) In the case of any project authorized before the date of enactment of this Act which relates to that portion of Garrison Channel from the point of intersection of the easterly right-of-way line of the existing railroad bridge with the existing pierhead and bulkhead line on the north side of Garrison Channel, westward to, but not to include the turning basin at the junction of Garrison and Seddon Channels, the authorization relating to such portion of Garrison Channel shall be terminated upon approval by the Secretary of Transportation of the location and plans for the first of the bridges referred to in subsection (a) of this section.

(c) Any project authorized before the date of enactment of this Act as it relates to the construction and maintenance of Seddon Channel, is hereby modified to provide for a channel two hundred feet wide by twelve feet deep from the junction of Sparkman and Seddon Channels northwesterly to its intersection with the Federal navigation project for the Hillsborough River.

(d) In approving the location and plans of any bridge under this section, the Secretary of Transportation may impose any specific conditions relating to the maintenance and operation of the structure which the Secretary deems necessary in the interest of public navigation.

SEC. 8. No houseboat, floating cabin, marina (including any with sleeping facilities), dock, cabin, or other structure of a permanent nature shall be required to be removed before December 31, 1989, from any Federal water resources reservoir or lake project administered by the Secretary of the Army, acting through the Chief of Engineers on which it was located on the date of enactment of this Act, if such property is maintained in usable condition.

● Mr. ABDNOR. Mr. President, on November 19, the Senate passed the committee-reported version of S. 1493, which was a noncontroversial bill deauthorizing several water resources projects. A few days later, the House took S. 1493 off the desk, amending it in several substantial ways.

It altered the language of section 2, deauthorizing Meramec Park Lake, Mo., potentially providing less project land for a State park, authorizing the State legislature to veto the transfer, and adding language that authorizes up to $20 million in downriver flood levees.

Section 3 was changed, dropping the Senate's deauthorization of Lafayette Dam in Indiana.

The language of section 5 was changed regarding Ellicott Creek, N.Y., dropping the Senate's deauthorization of a portion of the project in favor of language authorizing an alternative at $13,200,000 in 1978 prices.

A new section 7 was added regarding development in Tampa Harbor, Fla.

A new section 8 was added, providing an 8-year moratorium on removing any houseboat, cabin, dock, encroachment, and so forth, from any corps lakes.

Mr. President, my colleague on the Committee on Environment and Public Works believe that some of these alterations and additions are ill advised. Nevertheless, on balance, I urge the passage of the bill. If the Senate does not pass the House language, it is highly probable that the amended bill will be killed in the House. Because I believe it is important to deauthorize the other projects contained in the bill, I shall move the passage of S. 1493, as amended by the House.

First, however, I want to set the record straight regarding the problems that one specific provision will create. Section 8 establishes a precedent that I believe is unwise regarding houseboats, piers, cabins, and docks located on Corps of Engineers lakes. It makes them immune from legal action for 8 years, even if they are there illegally.

There appears to be at least 49 corps lakes affected by this section, where there are houseboats, cabins, boat piers, or where the corps has identified illegal encroachments.

For a number of years, the corps has had a program to gradually phase out live-in houseboats, cabins, et cetera, on corps project property because they represent private, exclusive use of taxpayer-built facilities.

I understand that there are currently 6 corps lakes where there are a total of 166 houseboats with sleeping accommodations or docks with cabins on them. The corps informs me there are another 6,119 private cabins, with leases, located on corps property. A little more than 10 years ago, the corps began to tell cabin and houseboat owners that they would eventually have to remove their facilities from the lakes.

A third category is the so-called encroachment, where private dwellings and piers exist on corps property without any permit or other legal basis. As of the beginning of 1980, there were 6,160 such encroachments. The corps identified an additional 1,945 during calendar year 1980, for a total of 8,105. During 1980, the corps resolved 3,343 of these encroachments, in many cases giving the owner a future time certain for the removal of the enroachment.

This bill will, in effect negate more than 10 years of existing policy with respect to floating houseboats, cabins and docks. It will strip the corps of its enforcement authority with respect to illegal encroachments.

I think that a more reasonable approach would be to reduce the provision to 3 years, allowing Congress to review this policy within a shorter period of time and proceed after the policy has been reviewed. I also believe it is ill advised to exempt illegal structures from enforcement actions.

As I said before, despite my concerns, I have been persuaded by my colleagues to accept the House language. Earlier today, the Senate passed amendments to H.R. 779, which included a new section 6. That section would at least restrict the exemptions to those structures which were lawfully installed. By lawfully installed, we mean facilities which have had a permit or lease. Docks which were permitted at one time, but modified in a modest way, such as an extension of a few feet, would still fall within this definition, as would a dock on which a roof might have been installed after the permit was granted. I would anticipate that if a permit for a dock had been permitted and subsequently a $100,000 boathouse constructed, this would not fall within the definition of "lawful."

Because this provision addresses my major concerns, I am going to move that we adopt S. 1493 as amended by the House. When the House passes the amended version of H.R. 779, this bill is intended to supercede the language in S. 1493. I will write the President requesting that he sign S. 1493 before he signs H.R. 779 to provide that the proper language becomes the later law.

Nevertheless, I recognize that a good deal of ambiguity may remain. If that occurs, I intend to see if we can't resolve it in further, clarifying legislation early next year.

Mr. President, I find this a difficult and troublesome issue, one that should be resolved in a fair manner that does not endorse illegal encroachments on public lands.●

Mr. BAKER. Mr. President, I move that the Senate concur in the House amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion of the majority leader.

The motion was agreed to.

BRANDON MARSH WILDLIFE REFUGE

Mr. BAKER. Mr. President, I move that the Committee on Energy and Natural Resources be discharged from further consideration of H.R. 2241, the Brandon Marsh Wildlife Refuge, and I ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 2241) to provide for the establishment of the Brandon Marsh National Wildlife Refuge, Coos County, State of Oregon, and for other purposes.

The motion was agreed to, and without objection, the bill was considered, ordered to a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZATION OF APPROPRIATIONS FOR THE COAST GUARD

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 831.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 831) entitled "An Act to authorize appropriations for the Coast Guard for fiscal year 1982, and for other purposes", do pass with the following amendment:

Strike out all after the enacting clause and insert:

That funds are authorized to be appropriated for necessary expenses of the Coast Guard for fiscal year 1982 as follows:

(a) for the operation and maintenance of the Coast Guard, including expenses related to the Capehart housing debt reduction: $1,450,000,000;

(b) for the acquisition, construction, rebuilding, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto: $425,000,000;

(c) for the alteration or removal of bridges over navigable waters of the United States, constituting obstructions to navigation: $17,500,000; and

(d) for research, development, test, and evaluation: $33,000,000, of which sufficient funds shall be made available to continue in operation a Coast Guard research and development center through the end of the 1982 fiscal year: *Provided*, That the Coast Guard submits its research, development, test, and evaluation program plan, including the continuation or operation of a research and development center, for Fiscal Year 1982 to the Committee on Merchant Marine and Fisheries of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate for approval prior to implementation.

SEC. 2. For fiscal year 1982, the Coast Guard is authorized an end-of-year strength for active duty personnel of 42,224. This end-of-year strength shall not include members of the Ready Reserve called to active duty under the authority of section 712 of title 14, United States Code.

SEC. 3. For fiscal year 1982, average military training student loads for the Coast Guard are authorized as follows:

(a) recruit and special training: 3,660 student-years;

(b) flight training: 118 student-years;

(c) professional training in military and civilian institutions: 655 student-years; and

(d) officer acquisition: 1,038 student-years.

SEC. 4. The Act of March 4, 1915, c. 143, § 1 (38 Stat. 1084), as amended (31 U.S.C. 686), is amended by inserting "United States Coast Guard," in the first proviso after "Federal Aviation Administration," and before "and".

SEC. 5. Title 14, United States Code, is amended as follows:

(a) Subsection (a) of section 41a is amended to read as follows:

"(a) The Secretary shall maintain a single active duty promotion list of officers of the Coast Guard on active duty in the grades of ensign and above. Reserve officers on active duty, other than pursuant to an active duty agreement executed under section 679 of title 10, United States Code, retired officers, and officers of the permanent commissioned teaching staff of the Coast Guard Academy shall not be included on the active duty promotion list.".

(b) Subsection (d) of section 41a is amended by striking the word "extended".

(c) Section 41a(b) is amended by striking the period at the end of the second sentence and substituting ", except that the rear admiral serving as Chief of Staff shall be the senior rear admiral for all purposes other than pay.".

(d) Section 290(a) is amended by inserting "or in the position of Chief of Staff" in the second sentence immediately after the words "vice admiral".

(e) Section 711 is amended by striking the first sentence.

(f) Item 711 in the analysis of chapter 21 is amended to read as follows:

"711. Exclusive of service.".

(g) Section 93(p) is amended by inserting the following clause after the phrase "of such lines and cables,": "including the installation and use of telephones in residences leased or owned by the Government of the United States when appropriate to assure efficient response to extraordinary operational contingencies of a limited duration,".

SEC. 6. The Act of October 3, 1980 (94 Stat. 1509) is amended as follows:

(a) In paragraph (1) of the first section by striking "$1,248,367,000;" and substituting "$1,337,207,000;".

(b) In section 2 by striking "39,600:" and substituting "39,819:".

SEC. 7. Before the close of fiscal year 1982, the Commandant of the Coast Guard shall carry out a study to determine if the use of cycloidal propulsion systems in appropriate types of Coast Guard vessels will result, at reasonable cost, in operating characteristics that are superior to those that can be obtained with propeller systems. The Commandant shall submit a copy of such study to the Committee on Merchant Marine and Fisheries of the House of Representatives together with his recommendation re-

garding whether vessels equipped with cycloidal propulsion systems should be considered for future Coast Guard procurement.

SEC. 8. (a) The original and periodic inspections or examinations of a vessel documented or to be documented as a vessel of the United States, both in the United States and in foreign countries, may be delegated to the maximum extent practicable by the Secretary of the department in which the Coast Guard is operating to the American Bureau of Shipping, or similar American classification society, or agent thereof, who may issue certificates of inspection, attesting to compliance with existing Coast Guard regulations, and such other certificates as are essential to documentation.

(b) The Secretary of the department in which the Coast Guard is operating may also contract or enter into agreements with or utilize the American Bureau of Shipping, or similar American classification society for the review and approval of vessel hull, machinery, piping, and electrical plans.

(c) The Secretary of the department in which the Coast Guard is operating shall report to the Congress in the implementation of the foregoing provisions within 6 months of the date of enactment of this Act and annually thereafter for 3 years. Such report shall include the views of the affected industry on the implementation of these provisions.

SEC. 9. Nothing in this Act shall be construed to authorize or provide funds for removing facilities of Coast Guard Group Port Angeles from Ediz Hook.

SEC. 10. Paragraphs (1) and (2) of section 104 of the Vessel Documentation Act (Public Law 96–594, 94 Stat. 3453) are amended to read as follows:

"(1) an individual who is a citizen of the United States, or an association, trust, joint venture, or other entity capable of holding title to a vessel, under the law of the United States, or any State, territory, or possession thereof, or of the District of Columbia, or the Commonwealth of Puerto Rico, all of the members of which are citizens of the United States;

"(2) a partnership whose general partners are citizens of the United States, and the controlling interest in the partnership is owned by citizens of the United States."

SEC. 11. (a) The third sentence of section 707(a) of title 14, United States Code, is amended to read as follows: "For benefit computation, regardless of pay or pay status, the member is considered to have had monthly pay of the monthly equivalent of the minimum rate of basic pay in effect for grade GS–9 of the General Schedule on the date the injury is incurred.".

(b) The amendment made by subsection (a) shall apply only with respect to payments for benefits under section 707(a) of title 14, United States Code, for months beginning on or after the date of the enactment of this Act.

SEC. 12. Subsection (a) of section 475 of title 14, United States Code, is amended by inserting after the first sentence thereof the following new sentence: "The Secretary is also authorized to lease housing facilities for assignment as public quarters, without rental charge, to military personnel who are on sea duty or duty at remote offshore Coast Guard stations and who do not have dependents; and such authority shall be effective for any fiscal year only to such extent or in such amounts as are provided in appropriation Acts.".

SEC. 13. (a) The Congress, in recognition of the heroic efforts that resulted in the saving, under extremely adverse conditions, of the lives of all 510 passengers aboard the motor vessel Prinsendam which caught fire off the coast of Alaska on October 4, 1980, hereby honors and expresses its thanks to the members of the United States Coast Guard, the individuals of the United States and Canadian Air Forces, and the crew of the tanker Williamsburg and all others who participated directly in this valiant undertaking, as well as the crew of the Prinsendam.

(b) The Commandant of the United States Coast Guard shall determine the names and addresses of those individuals honored under section (a), and provide the names and addresses to the Clerk of the House who shall convey in appropriate language the appreciation of Congress to each such individual for his or her actions in connection with the Prinsendam rescue.

SEC. 14. Notwithstanding any other provision of law, the fiscal 1982 end of year civilian personnel strength of the Coast Guard shall be at least 5,484.

Mr. STEVENS. Mr. President, I rise to offer my support for the Coast Guard authorizing legislation which, in addition to providing for the continued existence of the vital "small service with a big job," authorizes a helicopter to be based in Cordova, Alaska.

You may all remember my statement of October 7, 1981, about the four coastguardsmen who lost their lives in a rescue attempt near Cordova, Alaska. I pointed out in that statement that Cordova is 320 miles by air from the nearest Coast Guard air station at Kodiak, across the open waters of the Gulf of Alaska. The weather in the gulf is not pleasant—another boat just sank in the area when rescue efforts were hampered by visibility of only one-fourth to one-half a mile, heavy rain and fog, 40- to 60-knot winds and 25-foot seas.

Search and rescue missions in Alaska are truly life threatening for the Coast Guard personnel carrying out those missions. The time delays resulting from the vast distances to be crossed present an unnecessary peril to the fishermen and others in need of assistance. Locating a helicopter in Cordova will improve the chances for survival when problems develop for those at sea.

I realize that providing for a helicopter will not completely alleviate the danger, but it is a good interim step toward saving more lives and more vessels. I will work to secure additional funding for an appropriate ground facility in Cordova once the helicopter is authorized.

Mr. BAKER. Mr. President, I move that the Senate concur in the House amendments with a further amendment of the Senate, which I send to the desk on behalf of the distinguished Senator from Oregon (Mr. PACKWOOD).

UP AMENDMENT NO. 817

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER), on behalf of Mr. PACKWOOD, proposes an unprinted amendment numbered 817.

Mr. BAKER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the matter proposed to be inserted by the House amendment, insert the following:

That funds are authorized to be appropriated for necessary expenses of the Coast Guard for fiscal year 1982 as follows:

(1) For the operation and maintenance of the Coast Guard, including expenses related to the Capehart housing debt reduction, $1,404,800,000.

(2) For the acquisition, construction, rebuilding, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto, $537,200,000.

(3) For the alteration or removal of bridges over navigable waters of the United States, constituting obstructions to navigation, $17,500,000.

(4) For research, development, test, and evaluation, $29,730,000 of which sufficient funds shall be made available to continue in operation a Coast Guard research and development center through the end of the 1982 fiscal year: *Provided*, That the Coast Guard submits its research, development, test, and evaluation program plan, including the continuation or operation of a research and development center, for fiscal year 1982 to the Committee on Merchant Marine and Fisheries of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate for approval before implementation.

SEC. 2. For fiscal year 1982, the Coast Guard authorized an end-of-year strength for active duty personnel of 42,224. This end-of-year strength shall not include members of the Ready Reserve called to active duty under the authority of section 712 of title 14, United States Code.

SEC. 3. For fiscal year 1982, the Coast Guard is authorized average military training student loads as follows:

(1) For recruit and special training, 3,660 student-years.

(2) For flight training, 118 student-years.

(3) For professional training in military and civilian institutions, 655 student-years.

(4) For officer acquisition, 1,038 student-years.

SEC. 4. Notwithstanding any other provision of law, the fiscal 1982 end-of-year civilian personnel strength of the Coast Guard shall be at least 5,484.

SEC. 5. The Act of October 3, 1980 (Public Law 96–376; 94 Stat. 1509), is amended—

(1) in paragraph (1) of the first section, by striking out "$1,248,367,000" and substituting "$1,337,207,000"; and

(2) in section 2, by striking out "39,600" and substituting "39,819".

SEC. 6. (a) (1) Subsection (a) of section 41a of title 14, United States Code, is amended to read as follows:

"(a) The Secretary shall maintain a single active duty promotion list of officers of the Coast Guard on active duty in the grades of ensign and above. Reserve officers on active duty, other than pursuant to an active duty agreement executed under section 679 of title 10, retired officers, and officers of the permanent commissioned teaching staff of the Coast Guard Academy shall not be included on the active duty promotion list.".

(2) Subsection (b) of such section is amended by striking out the period at the end of the second sentence and substituting ", except that the rear admiral serving as Chief of Staff shall be the senior rear admiral for all purposes other than pay.".

(3) Subsection (d) of such section is amended by striking out "extended".

(b) Section 290(a) of such title is amended by inserting "or in the position of Chief of Staff" in the second sentence after "vice admiral".

(c) (1) Section 711 of such title is amended by striking out the first sentence.

(2) The heading of such section is amended to read as follows:

"§ 711. Exclusiveness of service.".

(3) The item relating to section 711 in the analysis of chapter 21 is amended to read as follows:

"711. Exclusiveness of service.".

(d) Section 93(p) of such title is amended by inserting "including telephones in residences leased or owned by the Government of the United States when appropriate to assure efficient response to extraordinary operational contingencies of a limited duration," after "of such lines and cables,".

SEC. 7. Section 475(a) of title 14, United States Code, is amended by inserting after the first sentence thereof the following new sentences: "The Secretary is also authorized to lease housing facilities for assignment as public quarters, without rental charge, to military personnel who are on sea duty or duty at remote offshore Coast Guard stations and who do not have dependents. Such authority shall be effective in any fiscal year only to such extent or in such amounts as are provided in appropriation Acts."

SEC. 8. (a) The third sentence of section 707(a) of title 14, United States Code, is amended to read as follows: "For benefit computation, regardless of pay or pay status the member is considered to have had monthly pay of the monthly equivalent of the minimum rate of basic pay in effect for grade GS–9 of the General Schedule on the date the injury is incurred.".

(b) The amendment made by subsection (a) shall apply only with respect to payments for benefits under section 707(a) of title 14, United States Code, for months beginning on or after the date of the enactment of this Act.

SEC. 9. The Act of July 5, 1884 (46 U.S.C. 2 et seq.), is amended by adding at the end thereof the following new section:

"SEC. 8. (a) The original and periodic inspections or examinations of a vessel documented or to be documented as a vessel of the United States, both in the United States and in foreign countries, may be delegated to the maximum extent practicable by the Secretary of the department in which the Coast Guard is operating to the American Bureau of Shipping, or similar American classification society, or agent thereof, who may issue certificates of inspection, attesting to compliance with existing Coast Guard regulations, and such other certificates as are essential to documentation.

"(b) The Secretary of the department in which the Coast Guard is operating may also contract or enter into agreements with or utilize the American Bureau of Shipping, or similar American classification society for the review and approval of vessel hull, machinery, piping, and electrical plans.

"(c) The Secretary of the department in which the Coast Guard is operating shall report to the Congress on the implementation of subsections (a) and (b) within 6 months of the date of the enactment of this section, and annually thereafter for 3 years. Such report shall include the views of the affected industry on the implementation of those subsections.".

SEC. 10. Paragraphs (1) and (2) of section 104 of the Vessel Documentation Act (Public Law 96–594; 94 Stat. 3453) are amended to read as follows:

"(1) an individual who is a citizen of the United States, or an association, trust, joint venture, or other entity capable of holding title to a vessel, under the law of the United States, of any State, territory, or possession of the United States, of the District of Columbia, or of the Commonwealth of Puerto Rico, all of the members of which are citizens of the United States;

"(2) a partnership whose general partners are citizens of the United States, and the controlling interest in the partnership is owned by citizens of the United States;".

SEC. 11. Section 7 of the Act of May 21, 1920 (31 U.S.C. 686), is amended by inserting "Coast Guard," in the first proviso of subsection (a) after "Federal Aviation Agency,".

SEC. 12. Nothing in this Act shall be construed to authorize or provide funds for removing facilities of Coast Guard Group Port Angeles from Ediz Hook.

SEC. 13. (a) The Congress, in recognition of the heroic efforts that resulted in the saving, under extremely adverse conditions, of the lives of all 510 passengers abroad the motor vessel Prinsendam which caught fire off the coast of Alaska on October 4, 1980, hereby honors and expresses its thanks to the members of the Coast Guard, the individuals of the United States and Canadian Air Forces, and the crew of the tanker Williamsburg and all others who participated directly in this valiant undertaking, as well as the crew of the Prinsendam.

(b) The Commandant of the Coast Guard shall determine the names and addresses of those individuals honored under subsection (a), and provide the names and addresses to the Clerk of the House of Representatives who shall convey in appropriate language the appreciation of Congress to each such individual for his or her actions in connection with the Prinsendam rescue.

SEC. 14. The Coast Guard shall deploy at least one helicopter for search and rescue, as well as other missions of the Coast Guard, at each of the following sites: Newport, Oregon; Cordova, Alaska; and Charleston, South Carolina.

SEC. 15. The Rogue River station in Oregon operated by the Coast Guard shall remain in operation until at least October 31 of each year.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

S. 1957—INDEFINITELY POSTPONED

Mr. BAKER. Mr. President, I move to indefinitely postpone calendar No. 419, S. 1957.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, there are certain conversations and consultations going on at this moment about other pieces of legislation that may be taken up in the Senate tonight.

While we await that, I ask unanimous consent that there now be a brief period for the transaction of routine morning business, not to extend past 7 p.m., in which Senators may speak for not more than 5 minutes each.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXPRESSIONS OF THANKS, APPRECIATION, AND PRAISE

Mr. ROBERT C. BYRD. Mr. President, the work of the Senate staff has a direct and important impact on the quality of legislation that is produced by Congress.

Few staffs in Congress have a broader mandate of responsibility, more pressure, or longer hours than does the staff of the Democratic Policy Committee in the Senate. Abbey Reed, Charles Kinney, and Pat Griffin are well known to all Senators for their thorough and effective and courteous work on the Senate floor. Although they serve the Senators on my side of the aisle on scheduling and floor matters, they are a vital part of the bipartisan mechanism of the Senate which allows for a timely flow of legislation.

I particularly single out Abbey Reed and Charles Kinney and Pat and refer to the work they do for all of us. I commend them on the closeness with which they work with Elizabeth Baldwin and Howard Greene and John Tuck, who ably perform similar duties for the majority.

I have found Elizabeth Baldwin to be especially courteous and very understanding, always extremely cordial and considerate, and I take this occasion to express my personal appreciation for those attributes. Democratic Senators are grateful for this cooperative relationship.

This has not been an easy year for those of us on this side of the aisle who have become accustomed to the benefits of majority status. In our role as the minority, our staffs on committees have been slashed. The issues staff of the Policy Committee, led by Dick McCall, the Policy Committee's deputy staff director, has stepped into this void and consistently has provided extremely useful issue-related information and coordination to all Democratic Senators.

Most Senators are familiar with the very accurate and thorough Democratic legislative bulletins, the analyses of Senate voting histories, individualized voting records, and indexes of Senate votes, which are prepared under the direction of the Policy Committee and especially under the direction of Beth Shotwell, the committee chief clerk.

This year, the Policy Committee has initiated several new publications, including a weekly legislative update, a weekly economic data review, special reports, and other publications designed to provide Senators with information useful to them in analyzing public policy issues and the history and record of the Senate.

I believe that the Senate Democratic Policy Committee is one of the finest staffs ever assembled in Congress and I, for all my Democratic colleagues, thank Robert Liberatore, who is the staff director, and all the members of the staff for their dedication, their long, long hours, and their deep commitment to the highest standard in public policymaking.

Robert Liberatore is a fine, dedicated, bright young individual who puts his heart and soul into the work of the Policy Committee. He is extremely capable and I am personally deeply grateful to him

79-059 O-85-34 (Pt. 24)

for his perserverance, his dedication, and his conscientious service on that staff.

I thank Terry Sauvain, the new secretary for the minority, for his hard work for Democratic Senators. He, too, does an outstanding job. He follows in the footsteps of the very able secretary for the Democrats, Mr. Joe Stewart, who has left the service of the Senate, but Terry is following in those footsteps in an admirable and competent way.

I also thank Patrick Hynes and the clockroom staff for their unending good cheer and helpfulness. I especially thank Lynwood Hall who has worked in the Democratic cloakroom for 2½ years and who will be moving on to other pursuits early next year.

The Senate's work is facilitated by many people, but few people are more associated with the day-to-day important work of the Senate than are those gentlemen who man the desk below the Presiding Officer. I speak of Bob Dove, Alan Frumin, and Joseph Strickland, the Parliamentarians, Bill Farmer, the legislative clerk, Jim Thorndike, the journal clerk, Vince Del Bazo, the bill clerk.

Russ Walker, Editor in Chief of the CONGRESSIONAL RECORD for the U.S. Senate, does an outstanding job and is always most courteous to all Members of the Senate and so accommodating to all of us.

I also wish to express appreciation to the other Official Reporters of Debates who are tireless public servants whose specialized skills allow the deliberations of the Senate to be shared by the American people.

Bill Hildenbrand, the Secretary of the Senate, and Howard Liebengood, the Sergeant at Arms, have fulfilled their new responsibilities this year with dignity, efficiency, and good cheer. They have helped to make the transition for some of us somewhat more gentle.

I particularly thank the Chaplain for the good cheer which he always spreads among us, for his spiritual overview of the Senate, and for his prayers which constantly give us strength, succor, and comfort.

Finally, I thank my colleague, the distinguished senior Senator from Tennessee, the majority leader, HOWARD BAKER. Although I have from time to time disagreed with him and he with me this year on some very substantive issues and although those issues have more and more begun to break down on a party-line basis, I express wholeheartedly my personal appreciation and my admiration for the majority leader. He is a fair man. He is a judicious man. And he is a very bright man. His guidance of the Senate is steady handed, and I could not hope to work with a better majority leader than HOWARD BAKER, and there are very few who could equal him.

I also wish to express appreciation for his able assistant, the distinguished Republican whip, TED STEVENS, who for many years worked with me on the Appriations Committee on the Department of the Interior.

The friendship that I formed with these two eminent gentlemen is a friendship which I cherish and one which makes our daily work all the more enjoyable.

So for all those who labor in the vineyards of the great policy forum of the U.S. Senate, Senators, the officials of the Senate, the staff of the Senate, policemen, all of the security officers, the press, the pages, the doorkeepers, those many, many people who serve both the public and the Senate employees, I extend my best wishes and prayers for a joyous holiday and for a new year rededicated to the pursuit of a world at peace and a nation of renewed prosperity and economic growth.

Mr. BAKER. Mr. President, may I take this opportunity to express my deep appreciation to the distinguished minority leader for his remarks about me, about Senator STEVENS, and his general remarks just concluded.

I have often said, Mr. President, and I will repeat now, that I am a fortunate man indeed not only to have the opportunity to serve in this role, as I am, but also to have a man as minority leader of the caliber who sits as my counterpart across the aisle and who has such a detailed and commanding knowledge of this body and its traditions, precedents, and rules.

So much of what I have learned about the procedure of the Senate, the sensitivities and the power of the Senate has come from observing the example and the conduct of the minority leader during his tenure as majority leader and even now during these past several months as minority leader.

I owe him a great debt of gratitude for many things, and most especially for setting an example that I was pleased to try to follow in rendering the best service I could to the Senate as he did for so long as majority leader.

Mr. President, I have further remarks to make in the nature of a summary year-end statement, and rather than do it at this time, may I say to the distinguished minority leader there are other remarks I have thought about more carefully, and which express my genuine sentiments and true respect and affection for him and for other Members. I ask unanimous consent that my year-end statement may appear appropriately placed in the RECORD prior to the time of the adoption of the resolution for sine die.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEFLIN addressed the Chair.

The PRESIDING OFFICER (Mr. MATTINGLY). The Senator from Alabama.

JUDGE JOSEPH M. HOCKLANDER

Mr. HEFLIN. Mr. President, it is with a great deal of pride that I ask my colleagues to join me in praise of the presiding judge of the 13th judicial circuit in Mobile County, Ala., Judge Joseph M. Hocklander, who recently retired, climaxing a distinguished career in public service. Judge Hocklander, however, plans to remain on active duty as a trial judge, but, "without the responsibility of managing a docket" and without additional compensation beyond retirement pay.

One of Alabama's most respected and honored jurists, Judge Hocklander launched his public service career in 1958 when he was elected to represent Mobile County in the State legislature where he served with distinction. He was appointed a circuit judge in 1961 while still in the legislature, and in 1970 after the late Robert T. Ervin retired he was elected presiding judge by his colleagues on the bench.

Earlier, the native of Tuscaloosa had served as city attorney for Chickasaw, Mount Vernon, and Satsuma, thriving municipalities of Mobile's outskirts. He is a graduate of the University of Alabama Law School and Murphy High School in Mobile.

While I was serving as chief justice of the Alabama Supreme Court I found Joe Hocklander to be a most effective administrator and one of Alabama's best judges.

Hocklander was an early advocate of the unified court system, and his support and wise counsel proved instrumental in the final passage of the judicial article in Alabama. During the hectic transition to the new system, we frequently called for his advice in solving many of the complex problems which developed before enactment of the judicial article.

Quickly, after his appointment to the Mobile bench, Hocklander won a well-deserved reputation as a "no-nonsense" judge, who was careful to keep his backlog of criminal cases at a minimum. In 1973, he achieved what in baseball is called the perfect season when he cleared his docket of all pending cases. At that time, Mrs. Myrtle Trott, who retired this year after spending 58 years in charge of the court's criminal division, commented:

> That's the first time in my memory such a feat has been accomplished.

For a number of years, Hocklander, as a member of the Permanent Legislative Study Commission, has been a spokesman for State judges and is credited with a leading role in the passage of legislation which vastly improved the judiciary in Alabama.

While closely monitoring and supervising the State's second largest circuit—averaging over 1,500 civil and criminal cases a year—Hocklander nevertheless found time to serve in numerous other judicial and civic activities. He has served in the following capacities: President of the Alabama Association of Circuit Judges, chairman of the Alabama Supreme Court Advisory Committe on Judicial Ethics, chairman of the Personnel Board of Mobile County Supervisory Committee, president and a longtime member of the board of regents of the International Academy of Trial Judges, State-Federal Judiciary Commission, the Supreme Court Advisory Committee on Rules of Civil Procedure, the American Bar Association, the Advisory Council on Criminal Justice Administration at the University of South Alabama, judicial advisory of the Alabama State Bar Section on Practice and Procedure of Law, chairman of the Alabama Bar Standing Committe on Judicial Selection and Tenure—Federal Courts, chairman of the Supreme Court standing committee on rules of conduct and Can-

ons of Judicial Ethics, Executive Committee National Conference of State Trial Judges, the faculty of the National College of State Trial Judges from which he graduated in 1965.

I am indeed privileged to have had the opportunity to know and work with such a dedicated and conscientious individual as Judge Hocklander. The contributions he has made to judiciary in the State of Alabama are beyond reproach. Judge Hocklander, my colleagues join me in wishing you the very best in the future. And we thank you for your continued service to the judiciary.

Mr. President, I ask unanimous consent that the Alabama Court News, December 1981, concerning Judge Hocklander be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ALABAMA COURT NEWS, DECEMBER 1981

President Judge Joseph M. Hocklander of the 13th Judicial Circuit (Mobile County) retired in November, climaxing a distinguished career in public service spanning nearly three decades.

Governor Fob James appointed Mobile Attorney Robert L. Byrd, Jr., 45, as his replacement. The appointment was effective December 1.

Actually, Hocklander is not fully retiring as he has requested, and Chief Justice C. C. "Bo" Torbert has granted, he be allowed to serve as an active retired judge. An office has been renovated in the Mobile County Courthouse for his use, and he plans to be available as a trial judge "without the responsibility of managing a trial docket." He will receive no additional compensation other than his regular retirement.

One of Alabama's most respected and honored jurists, Hocklander launched his public service career in 1958 when he was elected to represent Mobile County in the State Legislature where he served with distinction as a influential member of the powerful Ways and Means Committee. Another member of this committee was Chief Justice Torbert and the two formed a strong friendship which has existed to this day.

Hocklander was appointed a circuit judge in 1961 while still in the legislature, and in 1970 after the late Robert T. Ervin retired he was elected presiding judge by his colleagues on the bench.

Earlier, the native of Tuscaloosa had served as city attorney for Chickasaw, Mt. Vernon and Satsuma, thriving municipalities of Mobile's outskirts. He is a graduate of the University of Alabama Law School and Murphy High School in Mobile.

Quickly, after his appointment to the Mobile bench, Hocklander won a well deserved reputation as a no "nonsense" judge, who was careful to keep his backlog of criminal cases at a minimum. In 1973, he achieved what in baseball is called "the perfect season" when he cleared his docket of all pending cases. At that time, Mrs. Myrtle Trott, who retired this year after spending 58 years in charge of the court's criminal division, commented "that's the first time in my memory such a feat has been accomplished."

For a number of years, Hocklander, as a member of the Permanent Legislative Study Commission, has been spokesman for the state judges and is credited with a leading role in the passage of legislation which vastly improved judicial pay and benefits. As a lay member of this committee once said "the judges of Alabama don't realize how lucky they are to have Judge Hocklander speaking for me. Like E. F. Hutton when Hocklander talks, people listen.

Hocklander was an early advocate of the Unified Court System, and his support and wise counsel proved instrumental in the final passage of the Judicial Article which made it possible. During the hectic transition to the new system, the Administrative Office of Courts frequently called for his advice in solving many of the complex problems which developed before it became one of the nation's finest.

While closely monitoring and supervising the state's second largest circuit, Hocklander nevertheless found time to serve in various other judicial activities. He has been or is currently the member of:

President of the Alabama Association of Circuit Judges.

Chairman of the Alabama Supreme Court Advisory Committee on Judicial Ethics.

Chairman of the Personnel Board of Mobile County Supervisory Committees.

President and a longtime member of the Board of Regents of the International Academy of Trial Judges.

State-Federal Judicial Commission.

The Supreme Court Advisory Committee on Rules of Civil Procedure.

The Advisory Council on Criminal Justice Administration at the University of South Alabama.

The American Bar Association.

Judiciary Advisory of the Alabama State Bar Section on Practice and Procedure of Law.

Chairman of the Alabama Bar Standing Committee on Judicial Selection and Tenure—Federal Courts.

Chairman of the Supreme Court standing committee on rules of conduct and Canons of Judicial Ethics.

Court of Judiciary.

Executive Commitee National Conference of State Trial Judges.

The Faculty of the National College of State Trial Judges from which he graduated in 1965.

Also he has been lecturer, moderator or panelist at seminars conducted by the Alabama Circuit Judges Association, Department of Court Management, the Alabama Bar Association, The National College of the State Judiciary, the Alabama Defense Lawyers Association, the Virginia Department of Court Management, American Academy of Judicial Education and the National Center for State Courts.

Despite this heavy schedule, plus administering a trial docket averaging over 1,500 civil and criminal cases a year, Hocklander never neglected civic responsibilities. These included:

Director of the Mobile Mental Health Center; the American Red Cross; Mobile Junior Chamber of Commerce; First President and Chairman of the Board of the Greater Gulf State Fair, Chairman of the Eagle Scouts Court of Honor, Commissioner of Youth Football, and member of the Advisory Board of the S. D. Bishop State Junior College.

He is a veteran of World War II, serving as a corporal in the famous 82d Airborne Division. After the war, he became President of the Francis C. Myers Post of the American Legion.

Hocklander's many talents are not confined to the legal field. His business ability is widely recognized and he has been invited to participate in numerous business enterprises. He has been a director of several corporations and chairman of Doctors Hospital in Mobile.

However, it is in the political arena Hocklander is best known. His guidance and counsel is vigorously courted, and he enjoys an envied reputation for his uncanny knack to pick future leaders in our state and federal governments.

Reminiscing recently on his years on the Mobile bench, Hocklander could recall no one outstanding event but a whole series of highlights.

"Everytime I participated in a trial that brought a just result, I considered it a highlight.

"The satisfaction comes from giving the litigants the feeling that they had their day in court and were treated courteously and received justice, not from the magnitude of the case or the importance of the issues involved."

While health forced a reduction in his favorite sport of tennis, he plans to spend more time fishing near his Gulf Shores home and an occasional round of golf.

FUTURE LEADERSHIP OF AMERICA

Mr. HEFLIN. Mr. President, I stand today in praise of the outstanding young people of my home State of Alabama who have displayed such an active interest in the political future of our great Nation. It is indeed refreshing to see these young and dedicated leaders of tomorrow organize for the purpose of discussing and exchanging ideas on the major issues confronting our country today. Such interaction can only prove to be instrumental in the quest for sound solutions to both present and future issues that our Government must address as we meet the increasing complexities challenging the political leaders of our Nation.

Active involvement in the political process of our Nation by our Nation's youth is indeed a symbol of the strength and stability inherent in our democracy. The inspiration and dedication displayed by these young people will indeed develop into the leadership of tomorrow for our Nation.

I am particularly proud of Roger Bedford who is presently serving as national treasurer of the Young Democrats of America. I am equally proud of those who joined Roger at the 1981 National Young Democrats Convention for the outstanding service rendered on behalf of Alabama as they work diligently to adopt a national platform for this organization.

I am proud to enter the names of these dedicated young Alabamians into the RECORD: Rodney K. Anderson, Gardendale; Roger H. Bedford, Jr., Russellville; Benjamin Edward Carswell, Montgomery; Patricia R. Clem, Birmingham; Lorianne Danley, Montevallo; Regina B. Edwards, Birmingham; Ann W. Flowers, Bay Minette; Timothy Mark Hermetz, Cullman; Geri Anita Horn, Birmingham; Karen Andrea Horn, Birmingham; Randall V. Houston, Tuscaloosa; Patrick Allen Jones, Gurley; Russ McDonald, Madison; John Carroll Meehan, Birmingham; J. Russell Moore, Montgomery; Alfred Seawright, Montgomery; Frances H. Smiley, Montgomery; Freida E. Stewart, Decatur; Mark Raymond Tygielsky, Huntsville; Oakley Kevin Vincent, University; Baron Larue Walker, Montgomery; Sam Welch, Monroeville; Dennis L. Wills, Birmingham; Beverly Ruth Wilson, Florence; E. Beatrice Wilson, Birmingham.

RETIREMENT OF DR. TURNER W. ALLEN

Mr. HEFLIN. Mr. President, it is with mixed emotions that I recently learned of the impending retirement of Dr. Turner W. Allen, senior vice president of the University of North Alabama.

Although Dr. Allen has more than earned this opportunity to relax and enjoy a leisurely life, I am sad because he will be so sorely missed by UNA, and by education in Alabama in general.

Turner Allen has had a great impact on the University of North Alabama, since first joining the faculty there 27 years ago. During his service as academic dean, vice president for academic affairs, and senior vice president for institutional research and planning, UNA has grown and developed into a truly outstanding institution of higher learning. The contributions of Dr. Allen have been no small part in this expansion.

For more than a quarter of a century, Dr. Turner Allen has been a leader among educators in Alabama. He is to be congratulated upon his retirement, but, without a doubt, this learned, dedicated, and talented scholar will be sorely missed by his university and all those who have worked with him.

I ask unanimous consent that an article from the Florence (Ala.) Times concerning Dr. Turner W. Allen be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

UNA VICE PRESIDENT TO RETIRE DEC. 31

University of North Alabama President Dr. Robert M. Guillot has announced that Senior Vice President Dr. Turner W. Allen will retire from his post on Dec. 31.

Allen joined the UNA faculty in 1954 as a history and political science professor. In 1957, he was named UNA's academic dean. In 1971, Allen was named vice president for academic affairs and in 1976, senior vice president for institutional research and planning.

A native of Greensboro, Allen received his undergraduate degree from Centre College and his master's degree from Indiana University. In 1953, Allen received his Ph.D in European history and political science from the University of Kentucky. He attended the University of Paris in 1950 as a Fulbright research scholar.

Allen served as a member of the U.S. Air Force in Europe during World War II before turning to teaching. His first teaching post was at Lincoln Memorial University in Harrogate, Tenn. Allen left that position to join the UNA faculty.

While at UNA, Allen participated in the growth and expansion of UNA, assisting with the planning of such buildings as Floyd Science Building, Flowers Hall, Kilby School and many more.

Allen is listed in "Who's Who in American College and University Administration" and "Leaders in American Education." He is a member of the National Society for Collegiate Journalists and Omicron Delta Kappa.

Allen has served as Alabama's representative on the Southern Association of Colleges and Schools Commission on College and has served on the National Council for the Accreditation of Teacher Education.

Other professional affiliations include membership in the National Council of University Research Administration, American and Alabama Associations of University Administrations and as a director of the Lincoln Educational Foundation of New York.

Allen said of his forthcoming retirement, "I have been very privileged to be a part of this institution and of its growth and development across the years. I am equally grateful for the support, considerations and associations that this relationship has entailed for me and my family."

Dr. Guillot said, "On behalf of the University, I wish to express our sincere appreciation to Dr. Turner Allen for the untold contributions he has made to this institution for more than a quarter of a century. Words are totally inadequate to express the high esteem in which Dr. Allen is held by students, faculty, staff and alumni. He will be sorely missed by one and all."

NUCLEAR REGULATORY COMMISSION REFORM BILL

Mr. BAKER. Mr. President, as I announced a couple of times today, I had hoped to go to the Nuclear Regulatory Commission reform bill at this time. I believe that may have hit a snag. I see the distinguished Senator from Wyoming on the floor. He chairs the subcommittee having the primary responsibility for this measure.

Could I inquire of him if it is possible to proceed with this measure?

Mr. SIMPSON. I would say to the majority leader that "snag" would be an understatement. I might say that the "snag" would look like a Sequoia root.

Where we are is regrettable. I think there has been a bit of misunderstanding. I thank the majority leader for his patience and for his cooperation in moving this item forward.

The ranking minority member (Mr. HART) has been more than helpful. There is a misunderstanding which has arisen which I do not believe can be resolved this evening because the participants are just not available. At this late hour, the NRC authorization bill must be withdrawn. We have no other choice. Otherwise, we would be here until the wee hours. At this late date it cannot be properly processed. I would ask the majority leader if early in the next session we might receive early consideration of this measure, knowing the agenda which is before the majority leader. There are issues of real reform in this measure.

I would inquire of the majority leader what his position might be on that matter.

Mr. BAKER. Mr. President, I thank the Senator for his remarks. I can assure him that it is my intention to return to this bill and to take it up as soon as possible, as soon as practical, after we reconvene in January. I am personally sorry that this bill could not be handled tonight. While it is not one of those measures which was on the "must" list, it was one high on the list of those that I had hoped we could complete action on before the session ended.

As the Senator from Wyoming has pointed out, however, that is not possible at this time.

Therefore, Mr. President, I wish to announce that I will not ask for the consideration of that measure at this time. Senators will be on notice that as soon as practical, after consulting with the distinguished minority leader, the distinguished chairman of the subcommittee, and the dstinguished ranking minority member of the subcommittee after we return in January, it will be scheduled for early action.

Mr. SIMPSON. Mr. President, I wish to thank the majority leader for that information, for his patience, his good grace, and his cooperation. I assure the majority leader that we will be prepared to proceed with the measure. I am going to suggest to the staff that they proceed with the House of Representatives to see if we can let them know that certainly something generally on this measure will be coming their way very soon in the new session.

Mr. BAKER. Mr. President, I wish to express my appreciation to the Senator from Wyoming and my thanks for his cooperation in this regard.

Mr. President, the only other matter to be dealt with now is the National Security Act of 1947, more often referred to, I believe, as the agents identities bill. Before I turn to that, however, there are other matters which we will address.

SINE DIE ADJOURNMENT OF THE 97TH CONGRESS, FIRST SESSION

Mr. BAKER. Mr. President, I send to the desk a concurrent resolution and ask for its immediate consideration.

The concurrent resolution (S. Con. Res. 57) was read, considered by unanimous consent, and agreed to, as follows:

S. CON. RES. 57

Resolved by the Senate (the House of Representatives concurring), That the two Houses of Congress shall adjourn on Wednesday, December 16, 1981, and that when they adjourn on said day, they stand adjourned sine die.

Mr. BAKER. Mr. President, I observe in the eyes of the Presiding Officer a look of regret that this session may be drawing to an end.

CONVENING OF THE SECOND SESSION OF THE 97TH CONGRESS

Mr. BAKER. Mr. President, there is a joint resolution at the desk, House Joint Resolution 377, relating to the reconvening of the Congress on January 25. I ask for its immediate consideration.

The PRESIDING OFFICER. The joint resolution will be stated.

The legislative clerk read as follows:

A joint resolution (H.J. Res. 377), providing for the convening of the Second Session of the 97th Congress.

Resolved by the Senate and House of Representatives of the United States of America in Congress Assembled, That the second regular session of the Ninety-seventh Congress shall begin at 12 o'clock meridian on Monday, January 25, 1982.

Without objection, the joint resolution will be considered as having been read the second time by title.

Is there objection to the present consideration of the joint resolution?

There being no objection, the joint resolution (H.J. Res. 377) was considered, ordered to a third reading, read the third time, and passed.

Mr. BAKER. I thank the Chair.

Mr. President, I yield to the distinguished minority leader.

AUTHORITY TO MAKE CERTAIN APPOINTMENTS AFTER THE SINE DIE ADJOURNMENT OF THE PRESENT SESSION

Mr. ROBERT C. BYRD. Mr. President, I submit a resolution and ask for its immediate consideration.

The resolution (S. Res. 273) was read, considered by unanimous consent, and agreed to, as follows:

S. RES. 273

Resolved, That notwithstanding the final adjournment of the present session of the Congress, the President of the Senate and the President pro tempore be, and they are hereby, authorized to make appointments to commissions or committees authorized by law, by concurrent action of the two Houses, or by order of the Senate.

AUTHORITY FOR THE PRESIDENT OF THE SENATE TO SIGN ENROLLED BILLS AND RESOLUTIONS

Mr. BAKER. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The resolution (S. Res. 274) was read, considered by unanimous consent, and agreed to, as follows:

S. RES. 274

Resolved, That notwithstanding the sine die adjournment of the two Houses, the President of the Senate and the President pro tempore be, and they are hereby, authorized to sign enrolled bills and joint resolutions duly passed and found truly enrolled.

THANKS OF THE SENATE TO THE VICE PRESIDENT

Mr. BAKER. Mr. President, I send a resolution to the desk at this time.

The resolution (S. Res. 275) was read, considered by unanimous consent and agreed to, as follows:

S. RES. 275

Resolved, That the thanks of the Senate are hereby tendered to the Honorable GEORGE BUSH, Vice President of the United States and the President of the Senate, for the courteous, dignified, and impartial manner in which he has presided over its deliberations during the first session of the Ninety-seventh Congress.

THANKS OF THE SENATE TO THE PRESIDENT PRO TEMPORE

Mr. ROBERT C. BYRD. Mr. President, I send to the desk a resolution and ask that it be immediately considered.

The resolution (S. Res. 276) was read, considered by unanimous consent, and agreed to, as follows:

S. RES. 276

Resolved, That the thanks of the Senate are hereby tendered to the Honorable STROM THURMOND, President pro tempore of the Senate, for the courteous, dignified, and impartial manner in which he has presided over its deliberations during the first session of the Ninety-seventh Congress.

Mr. BAKER. Mr. President, I observe that the distinguished President pro tempore has been most faithful indeed in his attendance on the opening of the Senate sessions. I am sure every Member will join me in congratulating the President pro tempore in that of the session days we have been here, 153 days, the President pro tempore has opened the Senate on 129 of those days, which surely must be a record indeed. It is a measure and mark of his diligence and attentiveness to duty.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I have a number of unanimous-consent requests that I believe have been submitted to the distinguished minority leader for his consideration. Let me state them now for the consideration of the minority leader.

AUTHORITY FOR THE SECRETARY OF THE SENATE TO RECEIVE MESSAGES FROM THE PRESIDENT OF THE UNITED STATES

Mr. BAKER. Mr. President, I ask unanimous consent that during the adjournment of the Senate sine die, the Secretary of the Senate be authorized to receive messages from the President of the United States and the House of Representatives, and that such may be appropriately referred.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORITY FOR COMMITTEES TO REPORT BILLS DURING THE SINE DIE ADJOURNMENT OF THE SENATE

Mr. BAKER. Mr. President, I ask unanimous consent that during the sine die adjournment of Congress all Senate committees have authority to report bills with printed reports thereon and special reports on January 19, 1982, between the hours of 9 a.m. and 3 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORITY FOR CERTAIN ACTIONS BY THE SENATE FOLLOWING SINE DIE ADJOURNMENT

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate reconvenes following its adjournment sine die, the reading of the Journal be dispensed with, no resolutions come over under the rule, the call of the calendar be dispensed with, and following the recognition of the two leaders under the standing order, there be a period for the transaction of routine morning business not to extend beyond 30 minutes in length, with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

SUSPENSION OF PARAGRAPH 6 OF RULE 31 OF THE STANDING RULES OF THE SENATE RELATING TO PROCEEDINGS ON NOMINATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that paragraph 6 of rule 31 of the Standing Rules of the Senate relating to proceedings on nominations be suspended with respect to nominations unacted upon during the present session, and the status quo shall not be affected by the final adjournment of the first session of the 97th Congress, with the following exceptions: Mr. Maurice H. Stans, to be a member of the Board of Directors of the Overseas Private Investment Corporation; Mr. Frederic V. Malek, to be a Governor of the U.S. Postal Service; the nominations of Mr. John R. Van de Water, to be a member of the National Labor Relations Board; the nomination of Mr. William Bell, to be Chairman of the Equal Employment Opportunity Commission; the nomination of F. Keith Adkinson, to be a Federal Trade Commissioner; and the nomination of Eugene V. Lipp, to be a member of the National Transportation Safety Board.

Mr. ROBERT C. BYRD. Mr. President, that request has been cleared on this side of the aisle. There is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

● Mr. DENTON. Mr. President, I would like to address briefly the merits of one of the nominations that now must be resubmitted by the President, but will not be considered until the next session of this Congress. Specifically, I would speak to the merits of the nomination of John R. Van de Water to be Chairman of the National Labor Relations Board.

Mr. President, I believe that Mr. Van de Water is one of the most outstanding nominees sent to the Senate by President Reagan. He has many years of experience in labor relations. Because I have had the good fortune to become well acquainted with Mr. Van de Water, I can also assure you that he is a man of great integrity and fairness.

Mr. President, the Van de Water nomination is being opposed by the AFL–CIO and others. These groups have leveled numerous charges that Mr. Van de Water, none of which is supported by law or evidence. To those of you unfamiliar with the details of the Van de Water debate, much of the objection to his nomination rests on the fact that he served as a management attorney; yet I find the most telling pieces of evidence to be the strong endorsements received by Mr. Van de Water from numerous union leaders who have actually seen him in action during his career in this capacity. It is a difficult task for those accusing Van de Water of being antiunion to reconcile these facts with their rhetoric.

Despite Mr. Van de Water's impressive credentials and his support from both labor and management representatives, eight members of the Senate Labor and Human Resources Committee voted against reporting Mr. Van de Water's nomination to the Senate. Mr. President, I wish to emphasize that these same Senators also refused to support a motion to report the nomination without recommendation and voted against a motion to report the nomination unfavorably.

Mr. President, the logical question that any Senator must ask is why eight committee members decided to oppose any and all motions to report the nomination. The answer to that question was given by one of our colleagues at the committee's executive session. In explaining his opposition to all motions to report, that Senator acknowledged that no questions had been raised concerning

Mr. Van de Water's qualifications or integrity. However, the Senator stated that he would oppose all motions to report the nomination since he was sure that the nomination would be confirmed if reported.

Senator BAKER has filed a resolution to discharge the Labor and Human Resources Committee from consideration of the Van de Water nomination. Because of the press of business, Senator BAKER has not been able to bring the resolution to the attention of the Senate. Mr. Van de Water's nomination will now have to be resubmitted by the President.

Mr. President, the nomination will be resubmitted and referred to the Labor and Human Resources Committee. I am hopeful that my colleagues on the committee who opposed Mr. Van de Water will abandon the obstructionist tactics that have been used to deny the Senate its constitutional authority to advise and consent on Presidential appointments.

The committee system is integral to the Senate's ability to perform its constitutional duties. However, it is the Senate, Mr. President, not any particular committee, which is vested with the constitutional authority to approve or reject Presidential nominees. It is my opinion that committees have been delegated authority by the Senate to report and make recommendations about the fitness of those nominees referred to them. I believe that a committee misuses that delegated authority when it refuses to report back to the Senate on a referred nomination.

Some Senators may argue that the approval of a discharge resolution would serve to undermine the committee structure of the Senate. Mr. President, the committee structure is threatened much more grievously when members of a committee deny the Members of the Senate their right to engage in the advise and consent process.

Mr. President, I request those members of the Labor and Human Resource Committee to rethink their tactics. I support their right to oppose Mr. Van de Water. However, I ask them to reconsider the serious implications of their action if they refuse to report the Van de Water nomination. If the committee again fails to report the nomination, it will have usurped a prerogative granted by the Constitution to the Senate, not to the committee. Under such circumstances, a discharge resolution is not only appropriate, but also necessary to maintain the integrity of the advise and consent process.●

SUPPLEMENT TO YEAREND REPORT

Mr. BAKER. Mr. President, as a matter of informaton, this is a supplement to the yearend report which contained some of this information given by me earlier in the day. The following information may be of some interest to the Senators: The Senate has been in session for a total of 165 days during its first session. One hundred and fifty-three days have been business sessions and 12 days have been pro forma sessions. As of 7 p.m., 25 minutes ago, the Senate will have been in session for 1,077 hours and 25 minutes.

Mr. President, as of this moment, there have been 450 legislative record votes and 47 Executive Calendar rollcall votes, for a total as of this moment of 497 rollcall votes for this session of Congress.

UNANIMOUS CONSENT REQUEST

Mr. BAKER. Mr. President, there may be other business that can be transacted. I believe, indeed, there are other measures that can be dealt with and other matters that must be addressed. No matter, however, of other than routine importance will be taken up if the wishes of the leadership are taken account of, with the exception of calendar order No. 293, S. 391, the agents identity bill. If the minority leader is prepared at this time, Mr. President, I ask that the Chair lay before the Senate S. 391, the agents identities bill.

Mr. BRADLEY. Mr. President, reserving my right to object—I have discussed this with the majority leader prior to this moment—unless the majority leader could assure me that through a unanimous-consent agreement, the first committee amendment would not be subject to a tabling motion or to a substitute or to a perfecting amendment until there has been time to fully debate the issue, I might be forced to object to proceeding to S. 391.

Mr. BAKER. Mr. President, I thank the Senator. If he will give me just a moment, I may be able to give him an answer.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I cannot agree to the request of the distinguished Senator from New Jersey.

INTELLIGENCE IDENTITIES PROTECTION ACT OF 1981

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate the item just identified.

Mr. BRADLEY. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. BAKER. I move that the Senate proceed to the consideration of S. 391, calendar No. 293.

Mr. BRADLEY. I object.

Mr. BAKER. Mr. President, I do not believe the Senator can object. The motion is subject to debate, I believe. If the Senator wishes to do that, I am prepared to receive his comments on the subject.

Mr. President, is the pending motion the motion to proceed to the consideration of the measure?

The PRESIDING OFFICER. The Senator is correct.

Mr. BRADLEY addressed the Chair.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. BRADLEY. Mr. President, we have begun a process which I think will give us an opportunity to clearly debate the issues here between the intent provision and the reason-to-believe provision, and it is my expectation that this will continue for a number of hours, because I believe this is a very critical measure.

Before we move to proceed or before we take a vote on any provision, I think the Senate should have the benefit of a full airing of this issue.

Mr. MATHIAS. Mr. President, will the Senator yield for a question?

Mr. BRADLEY. I will yield for a question, without losing my right to the floor.

Mr. MATHIAS. Is it not true that there is a very serious question of constitutionality which surrounds the whole issue that is represented by this legislation?

Mr. BRADLEY. I would agree with that.

Mr. MATHIAS. Therefore, the specific issue to which the Senator from New Jersey has addressed his interests this evening is, in fact, one that will be of enormous importance as we progress with the constitutional issues that are inherent in the bill. If we are not prepared to give very careful attention to the first committee amendment, which includes within it the intent question, we then may neglect the fundamental constitutional issue and put in jeopardy the bill in any form.

So those who wish to see some legislation pass in the field of agent identity would be well advised, I think, to pay very careful attention to the issue that has been identified by the Senator from New Jersey; because until that is carefully considered, we may run the risk of passing a bill which will not pass constitutional muster.

Mr. BAKER. Mr. President, will the Senator yield to me, without losing his right to the floor?

Mr. BRADLEY. I am prepared to yield to the majority leader, without losing my right to the floor, and so long as yielding does not count as a first speech.

Mr. BAKER. Mr. President, I ask unanimous consent that the Senator may yield to me, without losing his right to the floor and without the resumption of his speech being counted as a second speech during this day.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I said earlier that no matter would be taken up other than routine and regular matters. I must make one exception to that. I do not anticipate this, but in the event there were problems in the House of Representatives with the farm bill, for example, or with other matters not anticipated, and it were necessary for the Senate to act on some unexpected matter of an emergency nature, I would ask the Senate to proceed to the consideration of such an item.

What I had in mind was that no other calendar items at this time that I am aware of, other than routine matters that can be taken up and dealt with by unanimous consent or only after brief debate, will be within the contemplation of the leadership.

I thank the Senator for yielding.

INTELLIGENCE IDENTTTIES PROTECTION ACT OF 1981

Mr. BRADLEY. Mr. President, the bill we are presently debating is one of the most important pieces of legislation to come before Congress. It deals with the national security and the constitutional rights of all Americans. The issues the bill raises merit extensive, reasoned debate. And they deserve the careful scrutiny of every Senator.

This bill is responsive to a grave problem the U.S. intelligence community faces in fulfilling its foreign intelligence responsibilities. In recent years, a small number of Americans, including some former CIA employees, have been engaged in a systematic effort to undermine our clandestine intelligence operations by disclosing the names of agents. Yet so far, none of the people responsible for these disclosures has been indicted under the espionage laws or any other law.

The failure to prevent these wanton acts underscores the need for a new law that specifically addresses this problem. Until we pass such a law, our intelligence agents will become less and less effective while at the same time they will be exposed to increasing danger. In addition, our relations with foreign sources of intelligence will continue to deteriorate because of the fear these sources feel for their own safety. Unless we can protect U.S. agents and their foreign sources from malicious disclosure, our foreign intelligence activities will be severely impaired. And because we will have diminishing access to intelligence information that is timely and accurate, our national security will suffer.

Accordingly, I support the bill that the Judiciary Committee has reported. This bill makes criminal the disclosure of intelligence identities in certain specified circumstances. It applies to three well-defined and limited classes of individuals. The first consists of those who have had authorized access to classified information identifying undercover agents. These are primarily U.S. Government officials who have a need to know the identity of CIA operatives. Because their access to the identities of covert agents derives from a position of trust, the bill penalizes their disclosure of this information most heavily.

The second class also consists of individuals who have had authorized access to classified information, but not necessarily information directly identifying covert agents. In order for members of this class to be penalized under the bill, it must be shown that they learned an intelligence identity as a result of their access to classified information.

The third class of individuals affected by the bill are those who may have never had authorized access to classified information but who, in the course of an effort to expose covert agents and with an intent to impair or impede the foreign intelligence activities of the United States, disclose information to unauthorized persons that identifies an individual as a clandestine agent.

Mr. President, I believe the bill as reported has been carefully considered and skillfully drafted. It affords appropriate protection to intelligence agents by making criminal those disclosures which clearly represent a conscious and pernicious effort to identify and expose covert agents with the intent to damage the national security.

At the same time, the bill avoids infringing the constitutional rights of innocent Americans and unduly impeding the public's right to know. In particular, it is drafted so that casual discussion, political debate, the legitimate activities of journalists, or the disclosure of illegality or impropriety in Government will not be inhabited by enactment of this legislation.

Mr. GORTON. Mr. President, will the Senator yield for a question?

Mr. BRADLEY. I am prepared to yield for a question without losing my right to the floor.

Mr. GORTON. I thank the distinguished Senator from New Jersey.

As the Senator is well aware by reason of his own participation in this debate, it revolves around whether or not a specific intent should be required in order to sustain a conviction for a violation of the act or, as proposed by Senator CHAFEE, a considerably lower standard of proof should be adopted pursuant to which the act would be violated if the accused person had acted with reason to believe that his activities would impair or impede the foreign intelligence activities of the United States of America.

Persons from both sides of this debate have discussed the matter with me for some time. I had tentatively at least reached the conclusion that the language which will be proposed at some point in the future by the Senator from Rhode Island might well fail to protect adequately the constitutional or free speech rights of a number of persons. Among other things it does not require that any actual harm take place to the intelligence activities of the United States in order to sustain a conviction.

While their fears may or may not be unfounded, many persons concerned with freedom of the press are concerned that there would be a chilling effect with the passage of a statute as it was passed by the House of Representatives. On the other hand, as the Senator from New Jersey knows, proof of intent beyond a reasonable doubt when that intent is highly subjective is exceedingly difficult.

Therefore, when we return from the recess I will propose the following compromise amendment and I ask both the Senator from Rhode Island and the Senator from New Jersey to consider over the recess whether it meets the appropriate expectations of both, as both have the same goal, that is, to see to it that legitimate intelligence activities are protected. My amendment would take the structure of the Biden amendment itself. It would require a proof of intent in order for a conviction. But it would go on to include the following language in the way of definition of intent:

"For purposes of this subsection intent to impair or impede the foreign intelligence activities of the United States shall be—

"(1) established by proof of subjective intent to impair or impede such activities; or

"(2) inferred from the acts of an individual which impair or impede such activities where the impairment or impediment of such activities is found to be a natural consequence of such acts.".

In other words, it authorizes the normal proof of subjective intent but it also states that where the Government can prove, first, that actual impairment or impediment of intelligence activities has taken place and, second, that the individual has with the source of that information an intent to impair or impede intelligence activities of the United States can be inferred from the very fact of disclosure itself.

I believe it to be a middle ground. I believe that it should meet the concerns of each party to this.

And my question to the Senator from New Jersey at this point is simply whether or not he and other defenders of the Biden amendment are willing to consider such a middle ground during the course of the next month while this bill is laid aside and would the Senator from Rhode Island be willing to consider such a proposed response?

Mr. BRADLEY. Let me say to the Senator from Washington that I think his suggestion is constructive and it is a perfect example of why we should not rush this bill through in the dying hours of a session.

I think precisely it is something that could be considered over the next few weeks, that we manage to defer action on this issue until the next session, and I would expect that to be the case. I thank the Senator very much for his thoughtful question that he put to the Senator from New Jersey and in his usual thoughtful manner it merits further and lengthy discussion and evaluation.

Mr. QUAYLE. Mr. President, will the Senator yield for a question?

Mr. BRADLEY. I am prepared to yield for a question without losing my right to the floor or without having it count as a first speech.

Mr. QUAYLE. I thank the Senator.

I shall follow up on the line of questions that the distinguished Senator from Washington presented. He has talked about a compromise version between the intent language and the reason-to-believe language. I would certainly hope that many of us who have been involved in discussing this language would take a very thorough look.

The Senator from Washington has shown me this language and my first reaction to it is that perhaps this is something that many of us have been looking for.

Is there any inbetween language between the intent standard, that has been

adopted by the Senate Judiciary, and the reasonable belief standard, that has been adopted by the House of Representatives?

As we all know, if the Senate will adopt the intent language that will probably prevail in the conference, though no one knows for sure how the conference committee would go.

I would certainly encourage many of us who have been involved and those who want to see the completion of this legislation to take Senator GORTON'S suggestion. It is one that is very thought provoking, one that I know as he always does has taken a great deal of time and so that is probably another reason I would suggest that if we will go over the holidays we will have more time to discuss this and then to return.

I will at this time yield back the floor to the Senator from New Jersey.

Mr. BRADLEY. The answer to the Senator's question is yes. I think that this time could be used valuably. I would expect that to be the case.

Mr. President, as I was saying I believe the bill as reported has been carefully considered and skillfully drafted. It affords appropriate protection to intelligence agents by making criminal those disclosures which clearly represent a conscious and pernicious effort to identify and expose covert agents with the intent to damage the national security.

At the same time, the bill avoids infringing the constitutional rights of innocent Americans and unduly impeding the public's right to know. In particular, it is drafted so that casual discussion, political debate, the legitimate activities of journalists, or the disclosure of illegality or impropriety in government will not the inhibited by enactment of this legislation.

Mr. CHAFEE. Mr. President, I wonder if the Senator from New Jersey will yield for a question.

Mr. BRADLEY. I am prepared to yield for a question. I wish to get through my opening statement before I yield for a question if the Senator from Rhode Island does not mind. I am sure he will have plenty of time to answer questions.

Mr. CHAFEE. Could he give us some indication how long the opening statement is?

Mr. BRADLEY. The opening statement will be somewhat short of 4 hours and 15 minutes.

Mr. CHAFEE. Do I understand him to say he is not prepared to yield for a question until we have 4½ hours of opening statement?

Mr. BRADLEY. No, the Senator is incorrect. I will be prepared to yield for a question at some point after I finish the opening statement and at least read into the RECORD some of the thoughts that many of the leading newspapers of this country expressed.

I think at that time I would be prepared for a number of questions. But I think the record should reflect the broad base of support of the Judiciary Committee bill. Once that is in the record we can deal with the Senator from Rhode Island's questions. I have no problem with that. I welcome his questions. I think, in fact, the more fully this issue is debated and discussed after the record has been made clear, the better it will be for the Senate in its final resolution of this issue.

Mr. President——

Mr. CHAFEE. Was the question, Is that satisfactory, was the Senator about to say?

Mr. BRADLEY. Mr. President, I think that is satisfactory, and I know the Senator from Rhode Island will be poised with any number of questions to ask at the appropriate time.

Mr. President, it is essential that this last feature of the bill be preserved, and that feature is that it is drafted so that casual discussion, political debate, legitimate activities of journalists and disclosure of impropriety in Government will not be prohibited. It is very important that this feature be preserved. There is no doubt that we need effective prohibitions on malicious disclosures of the identity of intelligence agents.

But there is similarly no doubt that we must preserve the fundamental right of free speech guaranteed all Americans by the first amendment, and we must jealously guard the important role played by the press in exposing the truth.

Let me reemphasize those two points: There is no doubt that we must preserve the fundamental right of free speech guaranteed all Americans by the first amendment, and we must jealously guard the important role played by the press in exposing the truth.

S. 391 strikes a proper balance between protecting the men and women who risk their lives as covert agents and guarding the interest all of us have in freedom of speech and a free press. Because S. 391 does the job, I am concerned that this attempt to substitute language from the House-passed bill would upset this balance.

In the case of individuals who may never have had access to classified information, the House bill requires only proof of reason to believe that disclosures would impair or impede intelligence activities. The bill before us requires intent. I am concerned that substituting the reason to believe for the intent test would chill significant public debate on government activities even where the purpose of the debate was to expose serious impropriety.

It also risks imposing criminal sanctions on those who disclose information of a purely factual nature which they believe the public has a right and a need to know. The penalty would apply to situations in which the identification derives entirely from published U.S. Government documents and where the disclosure would not place any lives in jeopardy.

Finally, it would apply not only to those in the business of naming names, but also to publishing activities fully protected by the first amendment.

Mr. President, there is no need for us to substitute reason to believe for intent. The administration is on record as stating either version of the bill is acceptable and will be enforceable. In a letter to Chairman BOLAND of the House Intelligence Committee, CIA Director Casey stated he could support the Senate Judiciary Committee version, the "intent" version. The Justice Department has indicated their agreement with Mr. Casey's position and the hearing record on this bill fully confirms that either version will do the job.

Mr. CHAFEE. Has the Senator read those complete letters in the RECORD or has he extrapolated parts of them?

Mr. BRADLEY. I would be pleased—Mr. President, I have not yielded for a question.

The PRESIDING OFFICER (Mr. QUAYLE). The Senator from New Jersey has the floor.

Mr. BRADLEY. Mr. President, if both versions are acceptable to the agencies, they are intended to protect, why then should we risk needlessly infringing freedom of speech and freedom of the press?

We have been told that the reason-to-believe version affords ample protection for the press because of the other protections of the bill. In fact, these conditions simply describe the activities of an investigative journalist. Consider each in turn:

First. Pattern of activities. This is exactly what an investigative reporter engages in when on a story such as the current New York Times effort to find out whether any CIA officials worked with Wilson and Terpil in providing training and recruiting for terrorists.

Second. Reason to believe. The CIA asserts that identifying any covert agents makes it harder to recruit agents and hence a reasonable person would conclude that any disclosure would harm intelligence. Moreover, most journalists would check with the CIA before publishing and would be told that disclosure would cause injury, and therefore would not publish.

Third. In fact identity. This simply requires that the story be factual.

Fourth. Unauthorized disclosure. Repeating an identity to an editor or printing would constitute such disclosure.

Fifth. Knew that a covert agent was being identified. This element would be met by the story that the individual was an undercover CIA agent.

Sixth. Affirmative measures to conceal. Any reporter would know that the CIA was trying to conceal the identity of all covert agents.

Thus, the "reason-to-believe" standard would cover all disclosures by an investigative reporter.

We have also been told that it is not necessary to name names, that responsible journalists do not name names. That is simply not the case. I have here on the floor with me articles and books by responsible journalists and authors, which include the names of covert agents as defined in the bill, and I would like the proponents of the "reason to believe" approach to explain to me whether the authors of these articles, which seem to respond to legitimate concerns of the public and their right to know, would be criminally liable under the terms of the amendment.

Specifically I would like the proponents of the reason-to-believe version to answer questions regarding each of the articles. Do they believe that the article

or book should be published with the names included, first of all? Second of all, do they believe the publication would be covered by S. 391 with the reason-to-believe standard and if they do not why not?

Mr. President, this is a very serious issue.

Mr. CHAFEE. Is that a question the Senator is addressing?

Mr. BRADLEY. It is a question that I am addressing in a rhetorical sense, and I hope that at some point later—I have been into this for only 25 minutes—that the Senator would have adequate time. I am sure he wants to hear the articles before he responds to them. I am sure he does not presuppose he is going to respond generically to all activities of the press. I am sure he wants to be precise in his response to a particular article and, therefore, for the Senator's benefit and the Senate's benefit I feel we ought to hear some of these articles, and I am prepared to read these articles at the appropriate time.

Mr. CHAFEE. Is the Senator ready to receive an answer immediately?

Mr. BAUCUS. Mr. President, if the Senator will yield before he cites those articles——

Mr. BRADLEY. Will the Senator withhold the request until a later time? I know the Senator is generous spirited and wants to be helpful, and I would welcome a statement or a question at a later moment.

Mr. President, before I begin to read the articles about which I propounded the questions that I have mentioned to the proponents of the reason-to-believe standard, I think the Senate should benefit from what a number of leading journalists and newspapers have stated about this issue.

The first editorial comes from the Pittsburgh Post-Gazette. The title of the editorial is "An Unsound Spy Law."

I will quote the editorial:

Like other human beings, journalists are sometimes tempted to exaggerate the dangers to society of measures that might limit their freedom of operation. So there is undoubtedly some hyperbole in dire predictions that investigative journalism will be fatally crippled by a bill in Congress that would punish the publication of CIA agents' names. It will take more than one clumsily drafted (or even unconstitutional) law to prevent journalists from investigating abuses by any government agency, the CIA included.

Still, that is no argument for the enactment of a bill that might needlessly interfere with journalistic investigation of the sort of illegal CIA spying on Americans that the agency would like to have the nation forget. And a bill passed last week by the House fits just that sorry description.

Designed to deal with the identification of CIA agents by agency renegades like Philip Agee, the bill as it emerged from the House Intelligence Committee would have made it a crime to identify intelligence agents only if the person making the relevation did so with the "intent to impair or impede the foreign intelligence activities of the United States." That careful language obviously was designed to deal with the discrete problem that prompted legislation in this area in the first place—the deplorable campaign by avowed opponents of U.S. foreign policy to cripple the CIA abroad.

Unfortunately, on the House floor, conservative Republican Rep. John Ashbrook succeeded in having that qualifying language stricken and replaced with a less precise provision making persons criminally liable if they "had reason to believe" that disclosure of an agent's name would harm the national interest.

The difference between the two formulas might seem a matter for legal hairsplitters. But the Ashbrook language, endorsed by the Reagan administration could be used against not only the Philip Agees of the world but also journalists who happened on CIA activities directed (illegally) against American citizens or in contravention of presidential or congressional directives.

Depressingly, similarly broad language has been adopted by framers of a Senate version of the spy bill. That makes it unlikely that a conference committee will take the—admittedly speculative—fears of journalists into account when writing a compromise measure. But those senators and representatives who believe that seemingly fine distinctions can be important should press for a defeat of the broader bill in their respective chambers.

Mr. President, that is from the Pittsburgh Post Gazette of September 28. Basically, I think it makes a very clear statement that, of course, we want to protect our covert agents but we also want to protect freedom of the press and the right of the public to know.

The next editorial comes from the Indianapolis News. It is entitled "Saving Freedom Two Ways." I will read the editorial.

The Reagan administration appears to be passing up a good opportunity to take a stand on behalf of freedom of the press and still establish firmer protection for U.S. intelligence operations.

The issue is a law to make it a crime to identify undercover U.S. intelligence agents. The House of Representatives, with the support of the Reagan administration, has approved a sweeping version of legislation to make it illegal to identify agents. The Senate Judiciary Committee, on the other hand, has approved similar legislation, but with a provision designed to protect freedom of the press.

The difference between the two bills appears on an ordinary reading to be a matter of splitting hairs. The House bill would make it a crime for anyone to identify an agent or informer "in the course of a pattern of activities intended to identify and expose covert agents and with reason to believe that such activities would impair or impede" foreign intelligence operations. The proposal approved by the Senate Judiciary Committee would make exposure illegal when it is done "with the intent to impair or impede" foreign intelligence activities "by the fact of such identification or exposure."

Sen. Joseph R. Biden, Jr., D-Delaware, offered this amended version of the legislation to avoid putting a damper on legitimate investigative reporting. A reporter could be prosecuted, for example, for uncovering and naming a Soviet spy in the CIA or for naming former CIA operatives engaged in narcotics smuggling.

A Reagan Justice Department official, Richard K. Willard, acknowledged before the Senate Judiciary Committee that the House legislation could be used to thwart ordinary news media reporting, but he said it probably would not be used that way in practice.

That's nice. The Reagan administration, we keep hearing, is made up of pretty nice guys who mean no harm to anyone. But the Reagan administration will not be around forever, and a future administration might not see things quite the same way.

Why legislate a potential threat to a basic constitutional principle? The amended version of the bill should serve just as well to prosecute persons such as Philip Agee, a former Central Intelligence Agency agent, and others who have published lists of agents for the stated intent of hindering intelligence operations.

The Reagan administration has already established a disturbing pattern of efforts to close off the free flow of information required by the Freedom of Information Act. Lining up on the side of the Senate Judiciary Committee version of this bill would offer a chance to reverse that pattern. The Biden amendment also provides a way to protect intelligence agents as well as freedom of the press.

Mr. President, that is from the Indianapolis News of October 12.

I now would like to read into the RECORD, and for the benefit of all of my colleagues who are listening, an editorial from the Baltimore Sun entitled "CIA Agents and Ex-Agents."

This editorial reads as follows:

CIA AGENTS AND EX-AGENTS

If the latest version of the proposed rules for the CIA is as bad as some of the critics who have seen it say—allowing agents to infiltrate organizations and spy on American citizens at home—it certainly ought to be killed by the president of Congress.

The House of Representatives has already passed one bad, dangerous bill the CIA wants—protecting intelligence agents. It won't deter the principal exposers of the CIA's secret employees. But it will threaten many legitimate critics of foreign policy and foreign operations. Specifically, the bill would make it a criminal offense for anyone to identify a covert agent—intentionally or unintentionally.

This started out as a pretty good bill making it a crime for anyone with access to classified information to identify agents. In a House committee this was turned into a pretty bad bill making it a crime for any private citizen to use information from the public record that identified agents, if the intent of that citizen was "to impair or impede" foreign intelligence activities. That was changed on the House floor to a very bad bill making it a crime for a private citizen to use public information to identify agents if there were "reason to believe" that this would impede or impair foreign intelligence activities.

The First Amendment guarantees Americans the right to "impair or impede" foreign policies they object to. A law barring public statements that might have even an inadvertent impact on American foreign policy—which is what the law forbidding reporting on covert activities would do—is grotesque. Naturally, journalists feel this threat with special intensity, but any critic of foreign operations as well as churches, universities and businesses with international interests will feel the threat. For example, it is possible that missionaries working as spies could not be publicly disciplined or even removed by their church if such actions exposed the priest-spies or were thought to impair the U.S. government's foreign policies. That's how much the bill overreaches.

This proposal would be unconstitutional if enacted into law, and most members of Congress know it. A majority of the members of the House chose to approve the bill anyway, though, sending the matter to the Senate. Surely the senators won't pass the buck now to the courts.

The stated goal of those who drafted the agents-protection bill is to prevent a few critics of the CIA from naming names in internationally circulated magazines and

books. But these critics can do their work elsewhere. They can still expose and thus threaten the agents, and the law can't deal with them. The solution actually lies in doing a better job of keeping secrets secret. As one congressman pointed out during debate on the bill, disclosures stem from "sloppy secrecy procedures," which the KGB is aware of with or without magazine articles.

In this regard, the CIA must review its procedures for dealing with former agents. Some of them use their special status and, perhaps, special knowledge to make lucrative business deals with foreign governments. It is shocking to learn that an ex-CIA deputy chief, Vernon Walters, was soliciting business with Moroccan officials within a year after he left the agency, despite the fact that even in his own view this was improper.

Mr. President, that is an editorial from the Baltimore Sun, dated October 11.

I now would like to read an editorial from the Nevada State Journal. The title of this editorial is "Slamming Shut Another Door."

SLAMMING SHUT ANOTHER DOOR

Here they come again, closing public doors faster than the public can turn around to see the doors slam shut.

"They" are our Washington representatives. And what they are closing, steadily, surely, and with increasing speed, is access to government.

In the latest instance, the House rode roughshod over its own Intelligence Committee Sept. 23 and voted to make it a federal crime to disclose the identity of a U.S. intelligence operative even if the operative's name is a matter of public record. And the act would be a crime no matter what the circumstances involved.

The committee had recommended making disclosure a crime only when there was "intent to impair or impede the foreign intelligence activities of the United States." But the House would have none of this, and voted 354 to 56 to install a sudden floor amendment to make disclosure a crime even if the news media were reporting the names of agents engaging in illegal activities, or trampling on citizens' rights.

The penalty: 10 years in prison and a $50,000 fine for past or present government officials, and three years in prison and a $15,000 fine for journalists.

This bill of course arose from a legitimate concern about the safety of agents. Former CIA officer Philip Agee has made a new and despicable career out of exposing agents, endangering their lives, and damaging the overseas operations of the CIA. And publications such as the Covert Action Information Bulletin and Counterspy routinely print the names of overseas CIA agents with the avowed intent of hindering their work. One would be hard pressed to defend any of these activities; and, in fact, few have—while many have quite properly condemned them.

Yet, the House of Representatives, in its concern about these revelations, is creating an equal danger. It has declared that public records are not public, that intent is no factor, and that constitutionality does not matter.

For make no mistake about it—the House bill's constitutionality is clearly questionable, according to legal scholars and other experts who testified before the committee.

What the floor amendment did was make the disclosure of an identity a crime whenever the government has reason to believe it might impair or impede foreign intelligence activities. This makes the government the accuser, the witness and the judge; i.e., it places the government in the role of dictator, able to conceal its own mistakes as well as disclosure of agents, without let or hindrance.

But there is more: Rep. Ted Weiss, D-N.Y., complained that this bill "presents an incursion on the First Amendment unparalleled in the history of the nation during peacetime. Never has the publication of information in the public domain by private citizens been made an offense."

Mr. CHAFEE. Mr. President, will the Senator yield for a question?

Mr. BRADLEY. I would be prepared to yield for a question as soon as I have located the Rhode Island newspaper editorial.

Mr. CHAFEE. When does the Senator think that might be?

Mr. BRADLEY. If the Senator is inquiring regarding the time, I have only had a chance to read four of the editorials into the RECORD. I think the entire Senate should benefit from what the leading editorial writers of the country have to say about this prior to yielding for a question.

(Mr. RUDMAN assumed the Chair.)

Mr. CHAFEE. Do I understand the Senator's answer to be that he will not yield for a question?

Mr. BRADLEY. At this time I will not yield for a question. I feel it is important that the Senate have the benefit of this information. I know that the distinguished Presiding Officer, the Senator from New Hampshire, is anxious to have the benefit of this information, and that the entire Senate is.

Therefore, I would like to continue reading this editorial from the Nevada State Journal dated Monday, October 5, 1981.

It goes on:

In all intellectual modesty, one must ask how "secret" agents whose names are already in the public domain are endangered by the publication of their names. Certainly the "enemy," whomever that might be at a given time, would already have ferreted out this information. Under this bill as it stands, it really seems that it is the bureaucracy which is the main object of protection, rather than CIA agents. And it is the public which is most injured.

The Senate Judiciary Committee is scheduled to vote tomorrow on a similar bill, containing the same "reason to believe" language. Nevadans should object vigorously to the bill in its present form. Time is short, but the bill can be defeated even now, if the public shows it knows the dangers created by the bill.

Let us protect overseas agents adequately. But let us do so through constitutional means which protect our control of government as well as the agents.

Mr. President, that is the editorial from the Nevada State Journal.

I see the distinguished Senator from Kentucky on the floor. I thought he might be interested to know what the Louisville Times had to say about this matter. The Louisville Times, on Wednesday, October 21, said, in an editorial under the headline, "Bad Bill, Better Bill, Senate Should Resist House CIA Measure."

I now quote what the Louisville Times had to say on October 21. I am sure the Senator from Kentucky has read the editorial.

Mr. HUDDLESTON. The Senator is right.

Mr. BRADLEY. The editorial states:

If there's a lesson to be learned from the government's lethargic reaction to the disclosure that former CIA agents helped Libyan terrorists, it's that public scrutiny of the intelligence agency is more necessary than ever.

Yet the House of Represenatives, urged on by the Reagan administration, has passed a bill that could severely penalize newsmen and other researchers who disclose names of spies when reporting on intelligence activities.

Senators Huddleston and Ford can help head off this ill-conceived measure by backing a much tighter Senate version, which could come to the floor as early as this week. Mr. Huddleston has a special interest since he helped draft a charter designed to keep the CIA within constitutional bounds.

Both bills have the worthy goal of protecting undercover agents stationed abroad. On two occasions, CIA employees were attacked after anti-agency zealots disclosed their identities.

The trouble is that reporters and scholars and, for that matter, all private citizens, could be fined and jailed even if they "reveal" names gleaned from unclassified sources.

One result, whether intended or not, would be to discourage legitimate, necessary discussion of CIA failures, blunders and abuses, of which there have been plenty. Under the House bill, a prosecutor would only have to prove a reporter had "reason to believe" his investigation would impair or impede intelligence activities. Well documented stories often "impair or impede" misguided government programs.

Defenders of this approach argue lamely that newsmen and other citizens could report intelligence misdeeds to Congress, the CIA director or the Justice Department. These, of course, are the same folks who have been less than eager watchdogs in the past.

Or, goes the argument, critical material could be published without the names of wayward agents. In many cases, however, such self-restraint would simply contribute to a cover-up.

The Senate Judiciary Committee has come up with a better bill, and the Kentucky senators should join those who hope to fend off amendments. Under the Senate version, a citizen could be successfully prosecuted only if he disclosed names with malicious intent to disrupt intelligence work. That language could not easily be stretched to cover legitimate reporting.

President Reagan has given the senators another excellent reason to resist changes in tehir bill. He is considering a plan to allow the CIA to spy on American citizens, open mail, infiltrate legal groups and all the rest. This is not the time, in short, to relax surveillance of the intelligence community.

Mr. President, that is the editorial from the Louisville Times of October 21, 1981.

The next editorial comes from the Richmond Times Dispatch on the 15th of October. It is called "Protecting U.S. Spies."

Philip Agee, a former CIA agent, indulged in the despicable practice of publishing the names of U.S. intelligence agents abroad in an effort to destroy their effectiveness. In the process, he gravely endangered the lives of these persons.

A law is needed to enable the government to move forcefully against anyone who intentionally puts our secret agents in jeopardy by revealing their identities. Congress is in the process of enacting such legislation.

The House of Representatives passed a bill designed to achieve that goal, but many people worry that while the bill's intent is laudable, its wording runs afoul of the First Amendment's protection of free speech. The bill would make it a crime for anyone to

publish such names if he had "reason to believe" it could endanger the persons named. The fear is that a newspaper or broadcasting station or an individual writer might effectively be prevented from making public information about government corruption involving an intelligence agent if a government representative warned in advance that the publication could damage the agent.

So the Senate Judiciary Committee has voted 9-to-8 to narrow the bill to the extent that a person could be prosecuted for revealing agents' names only if he acted with specific "intent to impair or impede" the nation's intelligence activities. There was not the slightest doubt that Philip Agee acted from such a motive.

It is not easy to draft a bill that attains the proper balance between protecting agents' identities, on the one hand, and First Amendment rights, on the other. The most effective protection of the agents might be provided by making it illegal to publish their names under any conditions, but that would do violence to the principle of free speech, since there could be unusual situations in which such publication would be justified in the overall national interest.

The Senate committee amendment appears to represent a reasonable effort to strike the proper balance.

Mr. President, that is the editorial from the Richmond Times Dispatch on October 15 of this year.

The next editorial comes from the Philadelphia Inquirer and it is entitled "Agents Disclosure Bill Must Address Intent Issue."

I now read the editorial.

Tomorrow, the Senate Judiciary Committee is expected to consider legislation that would make it a crime to disclose the names of agents of the Central Intelligence Agency or other U.S. intelligence operatives working abroad even if that disclosure was completely innocent and unintentional. Despite the fundamental challenge to the First Amendment, the measure as now written has widespread support in Congress and the backing of the Reagan administration.

Given the inevitability of passage by the Judiciary Committee of some sort of agent identity disclosure bill, those senators who see the dangers to the Constitution it raises must act to clarify the intent and purposee of the legislation through an amendment. Key votes will be cast by Sens. Arlen Specter (R., Pa.) and Charles McC. Mathias Jr. (R., Md.). The Democratic minority on the committee, led by Sen. Joseph R. Biden Jr. of Delaware, needs both Mr. Specter's and Mr. Mathias' votes to amend the measure.

The bills pending in the Senate and House are aimed at a small, Washington-based publication called Covert Action Information Bulletin. . . .

Mr. President, I say parenthetically that the "Covert Action Information Bulletin" has ceased publishing the names of our covert agents until this law, if it is passed, in whatever form, is tested for its constitutionality.

I ask unanimous consent to have printed in the RECORD, following the editorial from the Philadelphia Inquirer, the statement from the Covert Action Information Bulletin, saying, "this will be our last naming of names column until such time as the constitutionality of the act has been decided by the courts."

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. BRADLEY. Mr. President, I continue reading from the Philadelphia Inquirer editorial:

The bills pending in the Senate and House are aimed at a small, Washington-based publication called Covert Action Information Bulletin, which previously has printed the names of CIA agents working abroad. The bulletin is the work of a renegade, ex-CIA agent Philip Agee, who has vowed to disrupt and destroy U.S. intelligence operations around the world by exposing agents' identities. In a related matter, the U.S. Supreme Court recently upheld the authority of the secretary of state to revoke passports of citizens whose activities abroad the secretary believes pose a threat to national security. The decision grew out of revocation of Mr. Agee's passport.

In the official haste to address the legitimate threat posed by Mr. Agee's activities, the Supreme Court and the Congress have chosen to weaken the First Amendment rights of every American citizen. Unless amended, the bill being voted on by the Senate Judiciary Committee tomorrow carries that process inexorably forward.

The bill must not leave the committee without a clear and carefully worded amendment that addresses the issue of the intent of those who disclose agents' identities. In the House, a subcommittee recently voted out a similar bill with an amendment that makes disclosure a crime if the purpose was to impair or impede intelligence activities. While proving intent in this instance would raise complicated legal questions, the amendment at least offers some First Amendment protection. The Senate version, however, is silent on intent.

Without an amendment similar to that approved in the House subcommittee, the Senate version as now written is so broad that it could even make negligent disclosure a crime.

Sponsors of the agents' disclosure measures in the Congress insist their only intent in enacting the legislation is to protect covert intelligence activities that are necessary for national security. They assert the bills in no way are an attempt to restrict First Amendment guarantees of all Americans. If that is the case, they, as well as moderates in the Congress who see the threat to free speech posed by the bills, should accept amendments that made that intention clear and straightforward.

That is the editorial from the Philadelphia Inquirer.

The problem they point out—that is, the need to protect covert agents and at the same time provide a right for the public to know and to protect freedom of the press—was addressed in the bill that came from the Senate Judiciary Committee.

EXHIBIT 1

COVERT ACTION INFORMATION BULLETIN

NAMING NAMES

Because of the imminent passage of the Intelligence Identities Protection Act, this will be our last "Naming Names" column until such time as the constitutionality of the Act has been decided by the courts. Although we continue to believe that the Act's application to the research which generates this column is unconstitutional—since our sources are not classified material—we believe it would be counter-productive to make the publication of this column under the new law the sole basis for a legal challenge. Much other research work is affected, and many other publications are involved. Moreover, we intend to continue to publish the Bulletin, the balance of which remains, we believe, extremely valuable, and to continue our struggle against covert operations and U.S. secret intervention around the world.

Mr. BRADLEY. Mr. President, as I stated in my initial statement, the Justice Department and the CIA have said time and time again that the bill that came from the Senate Judiciary Committee is enforceable and is constitutional.

It seems to me that it will be necessary to continue reading some of these editorials and to reassert that this is a very tough call. It is a call between the public's right to know, freedom of the press, and the need to protect covert individuals with the CIA operating abroad. The Senate Judiciary Committee bill does that very well.

As I have said, the list of articles written in the last several years, in which agents have been named, is quite lengthy. The articles deal directly with illegality and impropriety.

In my view, when this amendment is debated fully, I think it will be necessary for the proponents of the reason-to-believe standard to respond to such articles on domestic spying as those by Seymour Hersch, in the New York Times of December 22, and by Jerry Larder in the Wall Street Journal of March 1, 1977, to say why or why not—why these do or do not violate the purpose of this legislation.

Mr. ROBERT C. BYRD. Mr. President, will the distinguished Senator yield so as to allow the distinguished majority leader and me to proceed with the routine matters at this time? I do not presume to speak for the distinguished majority leader, but perhaps the majority leader and the Senator could indicate what may be the prospects for termination of further debate on this motion today.

Mr. BAKER. Mr. President, if the Senator will permit me, I think it is clear now that the Senator from New Jersey does not intend to let us go this evening to final disposition of even the motion to proceed. I understand that. I do not see any point in belaboring the issue.

I acknowledge that, at this late date in the session, the Senate can stop that, and I do not intend to ask the Senate to spend a great deal more time on this measure at this time.

I will say to the Senator from Rhode Island, who is a sponsor of the principal amendment, and the manager of the bill, the Senator from Alabama, that I continue to feel that this is an important measure and that the differences of Members in respect to our approach to this subject must be reconciled at some point, and that it would be my intention to return to the consideration of this measure early next session.

For the time being, Mr. President, I am prepared to take the bill down and to proceed to other matters.

In further answer to the question of the minority leader, there is a conference report at the desk on water pollution which must be dealt with at this time, the conference report on H.R. 4503, together with a file of routine matters that have been cleared on his side.

So if the Senator from New Jersey is willing to do so, and I have no desire to stop him if he wishes to keep going, but if he is prepared to do so I am prepared at this time to withdraw my motion to proceed with the assurance of my colleagues here that we will find an early

place for this in the scheduling of the session next year.

Mr. PROXMIRE. Mr. President, will the majority leader yield to let me insert in the RECORD a statement on the identities bill?

Mr. BAKER. I am happy to but I guess the floor really belongs to the Senator from New Jersey.

The PRESIDING OFFICER. The Senator from New Jersey has the floor.

Mr. BRADLEY. Mr. President, I will yield without losing my right to the floor.

Mr. PROXMIRE. Mr. President, I ask unanimous consent to——

Mr. CHAFEE. Mr. President, is the request by the Senator from Wisconsin subject to objection or is that solely under the control of the Senator from New Jersey? In fair play here the remainder of us have statements. The Senator from New Jersey has not permitted anyone to ask him a question yet on this side in opposition to his position throughout this debate. It semes to me this is a one-sided operation he is operating here.

He suggested earlier that he wanted to debate here but debate has consisted of him talking all evening and now permitting statements favorable to him to come in.

My question is, Are other written statements to be permitted from others? I admit we will not have time to debate it.

The PRESIDING OFFICER. The Chair advises the Senator from Rhode Island that the Senator from New Jersey has the floor, and he yielded to the Senator from Wisconsin for the purpose of inserting under unanimous-consent request a statement into the RECORD. If the Senator from Rhode Island objects then of course the statement will not be inserted.

Mr. CHAFEE. Unless that same privilege is to be accorded to others I do indeed object.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. BRADLEY. I thank the majority leader for his consideration on this issue and I have no need to continue laying the groundwork for the real debate on this issue which I hope will take place.

Mr. BAKER. Mr. President, if the Senator will yield to me, I am prepared to withdraw my motion.

Mr. BRADLEY. I yield.

Mr. BAKER. Mr. President, I withdraw my motion to proceed to the bill at hand.

The PRESIDING OFFICER. The motion is withdrawn.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I inquire of the distinguished minority leader if he is prepared at this time to proceed to the consideration of the conference report on H.R. 4503.

Mr. ROBERT C. BYRD. Yes, Mr. President, we are prepared on this side.

MUNICIPAL WASTEWATER TREATMENT CONSTRUCTION GRANT AMENDMENTS OF 1981—CONFERENCE REPORT

Mr. BAKER. Mr. President, I submit a report of the committee of conference on H.R. 4503 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4503) to amend the Federal Water Pollution Control Act to authorize funds for fiscal year 1982, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of December 14, 1981.)

● Mr. STAFFORD. Mr. President I am pleased to be able to commend to the Senate the conference report on H.R. 4503 the Municipal Wastewater Treatment Construction Grant Amendments of 1981. Under the able and diligent leadership of my friend from Rhode Island Senator JOHN CHAFEE, the conferees have produced an agreement that merits the support of the Senate. Furthermore, it is a bill worthy of the approval of the President.

I would like to take a few minutes to explain why I think this agreement is good for the country in general, and, on a more parochial note, also good for the smaller, rural areas like those I am privileged to represent.

The bill we are sending to the President represents a genuine reform in the municipal wastewater treatment construction program operated by the Environmental Protection Agency. The principal objectives of the legislation proposed by the administration last April will be achieved in this bill.

The most significant difference is that, whereas the administration's proposals were to take effect on enactment, our bill provides a period of transition from the old rules to the new. Let me be specific.

The administration proposed three major changes in the current program. First, only projects that provide actual treatment of wastewater, either secondary or more stringent treatment, and related interceptor sewers would continue to be eligible for Federal cost-sharing assistance. Other categories of construction, such as new sewer collection systems or correction of combined sewer overflows, or sewer maintenance or rehabilitation, would no longer be eligible.

Second, the costs of providing reserve capacity needed to serve populations beyond those existing in 1980 would no longer be eligible. Only backlog treatment needs would receive Federal assistance. Communities would finance their own growth.

Finally, the administration proposed that highest project priority be given to those directly benefiting areas of urban-industrial concentrations, arguing that this would insure that Federal funding is focused on projects that yield the most pollution abatement for the money.

Except for this last item, which creates an undesirable urban bias in the program, the conferees agreed that these changes are needed.

Without them the program is inconsistent with the budget restraint policy proposed by the administration and adopted by Congress.

EPA's 1980 survey of State-identified needs estimated that the total capital costs of constructing projects that are currently eligible for grant assistance is $120 billion (expressed in January 1980 dollars). At 75 percent Federal cost sharing, the long-term Federal commitment to this program would need to be $90 billion. This amount is in addition to the $35 billion that Congress has appropriated under this program since fiscal year 1973.

The administration's proposal to reform the construction grant program is designed to fit within a budget framework of $24 billion; $2.4 billion for 10 years. This level is what would be needed to provide a 75-percent Federal share of the total cost of funding only projects for treatment plants plus interceptor sewers and only those needed to serve the existing population.

Throughout our deliberations, the Senate conferees pursued an agreement that would achieve the following:

First, establish the program reforms (with respect to eligibility, Federal cost-sharing and reserve capacity) within the period of reauthorization and allotment;

Second, provide for transition into the new program;

Third, permit flexibility in State program management; and

Fourth, reduce the remaining potential cost to the Federal Government over the life of the program from the present estimate of $90 billion to about $30 billion.

In my judgment the conference agreement satisfactorily accomplishes these aims. On the major points, we agreed to a reform program that includes:

First. A 3-year transition period during which all construction project categories (treatment plants, interceptors, collectors, infiltration or inflow correction, combined sewer overflows, et cetera) and planned reserve capacity continue to be fully eligible for a 75 percent Federal grant.

Second. Thereafter, beginning October 1, 1984, the new program requirements would take effect. That is, the Federal share for construction would go to 55 percent, reserve capacity costs would no longer be eligible, and only projects for secondary or more stringent treatment, for interceptor sewers and infiltration/inflow correction would continue to be

eligible for Federal assistance after the 3-year transition.

Third. Except that, certain projects that begin construction before October 1, 1984, will continue to be eligible for the 75 percent cost share and the planned capacity, to completion.

Where a treatment system—consisting of a secondary or more stringent treatment facility and its related interceptor—receives a step III construction grant award prior to October 1, 1984, subsequent phases or segments necessary to complete these portions of the treatment works continue to be eligible for 75 percent Federal funding, and for the 20-year reserve capacity as planned for these portions of the system. In the case where an interceptor project received a step III construction grant award prior to the date of enactment of these amendments that provided a larger reserve capacity—but not to exceed 40 years—that reserve capacity shall continue to be eligible for funding.

Fourth. In addition, beginning October 1, 1984, a Governor has discretion to divert up to 20 percent of the State's annual allotment to project categories that are otherwise no longer eligible as of that date—new collection systems, for instance. The grant amount for such projects shall be 55 percent, the prevailing Federal share beginning October 1, 1984.

Fifth. A 4-year authorization and State allocation formula—to October 1. 1985. This is essential to both achieve the new program within the period of reauthorization and facilitate a 3-year transition.

This approach relies heavily on the State process for establishing project priorities, and is intended to encourage the advancement of a State's most important projects. On the other hand, the fact that certain project segments or phases may continue to receive reserve capacity and 75 percent Federal assistance until completion, where construction of a treatment system begins before October 1, 1984, should not be interpreted to encourage the practice of project segmenting or phasing.

The Administrator of the Environmental Protection Agency is expected to develop clear definitions and criteria for funding grants for such projects, particularly those initiated after the date of enactment of these amendments. Consideration should be given to the cost of the entire treatment works in relation to the size of a State's annual allotment, the construction time needed to complete eligible treatment works, and whether funding can be provided for a logical portion of a project each year. Consideration should also be given to whether court orders have imposed construction and funding schedules based on project segmenting.

EPA is also expected to encourage and assist in the timely completion of ongoing phased and segmented treatment works projects that have received a portion of their construction funding prior to enactment of these amendments. We do not intend to encourage the initiation of new projects unless there is reasonable expectation that Federal funds will be available to complete projects already begun, old and new.

On a more parochial note, speaking now as the Senator from Vermont, I would like to comment on several other provisions of the conference agreement which particularly concern the smaller rural communities of the Nation. The conference agreement preserves and improves several important aspects of the existing Clean Water Act, which the administration's bill had proposed to eliminate:

First. The minimum allotment of appropriated funds to any State remains at one-half of 1 percent. Assuming the full appropriation of $2.4 billion, Vermont and other minimum States would receive about $12 million annually.

Second. The mandatory set-aside of 4 percent of a rural State's allotment for alternatives to conventional treatment technology is preserved.

Third. The innovative and alternative technology program, is extended as a permanent part of the construction grant program, and funds for the bonus are increased.

Fourth. The priority emphasis on projects serving "urban-Industrial concentrations" is not included. Instead, the establishment of priorities continues to be based on meeting the goals of the Clean Water Act and is determined by the States.

Other features of particular interest to small communities include raising the limitation for projects eligible for combined step II design and step III construction grants to $8 million. Also, the conference agreement mandates the advancement of planning and design grant assistance to small communities which cannot otherwise undertake these costs. The administrator is expected to establish regulations or provide guidance to States to implement this provision, including the determination of what communities qualify for such assistance.

In addition to the matters I have just discussed, I have taken a particular personal interest in another matter which I would like to discuss at this point.

One issue that arose in the conference was the provision in the Senate-passed bill clarifying that the Clean Water Act does not displace or limit other Federal or State law, including common law. This provision was stimulated by the Supreme Court's decision in City of Milwaukee against Illinois, in which the Court incorrectly interpreted Congress intent to displace Federal common law with the regulatory scheme of the Clean Water Act.

The House had not held hearings or considered this matter, and felt that would be necessary to properly craft a response to the Supreme Court's decision. Accordingly, the Senate receded on the provision with the understanding among the conferees that failure to include the provision is without prejudice, and with an agreement to examine further in the next session the best means to accomplish their intent not to displace remedies other than those under the Clean Water Act.

Milwaukee is an extraordinarily troublesome decision for three reasons.

First, because of its implications for the Clean Water Act.

Second, because of its implications for other Federal statutes.

Third, because of its implications for State common law. The premise of the Milwaukee decision is that a comprehensive scheme of regulation displaces the related Federal common law. I do not agree that the Clean Water Act is a comprehensive scheme of regulation.

The Milwaukee case itself was restricted by its terms to only the Clean Water Act and Federal common law with respect to water pollution. However, the rationale of Milwaukee was quickly extended to other substantive areas. In Middlesex County Sewerage Authority against National Seaclammers Association, the Court held that the existence of the Marine Protection, Research, and Sanctuaries Act (which regulates ocean dumping) displaced Federal common law in that field as well.

Clearly, the rationale of Milwaukee could be extended to a virtual universe of problems. Schemes of Federal regulation exist for water, air, toxics, noise, hazardous waste, and other of environmental media. Again, while I do not believe any of these schemes are nearly as comprehensive as the Clean Water Act, a court might find one to be so.

Further, there is the great risk that the decision might not be restricted just to environmental regulation or just to Federal common law. Whatever Federal common law might exist regarding securities, transportation, communications, food purity, drug efficacy, and the like, could, under unwise extensions of the Milwaukee rationale, be displaced.

Moreover, if Federal common law is to be displaced, there is the unacceptable risk that State common law might be displaced as well. In fact, in a recent Massachusetts case—McMahon against Amoco Oil Co.—the State sued for contamination of ground water caused by waste oil. This was not covered by the Massachusetts water pollution control act, so the suit was based on State common law. The defendant, Amoco, raised as a defense the Milwaukee case, asserting that State common law had been displaced. This was rejected by the court, but illustrates the dangerous potential of the Milwaukee decision.

In another case—this one closer to home for this Senator—residents of Vermont have filed suit against International Paper for water pollution originating in upstate New York. International Paper has said it is not liable because Federal common law is displaced pursuant to Milwaukee.

Section 23 of the Senate-passed bill would have restored the situation to what Congress intended, and indeed expected until the Supreme Court's surprising decision.

Until 6 months ago, the present state of affairs with regard to Federal common law did not exist. There was a Federal common law which applied to cases of interstate water pollution. It was the same Federal common law which had

applied for decades and probably longer. It was the same Federal common law which had applied since the first Federal Clean Water Act in the late forties. And it was the same Federal common law which had applied since the expansion of the regulatory program in 1972, articulated by the Supreme Court in Illinois against Milwaukee and other cases.

Of course, some details changed. But the principle that there was a Federal common law remained applicable. Businesses were not bankrupted. Court time and resources were not consumed by frivolous lawsuits. And, helpless defendants were not subjected to judicial blackmail.

I do not believe my fears regarding the potential damage of the Milwaukee decision are misplaced. As I stated, it has already been brought up as a defense to a suit based on State common law. And, based on information from the office of the attorney general of the State of New York, I understand that it has been raised as a defense in a suit involving the Clean Air Act. Thus, two of my fears—an extension to other Federal laws and an extension to State common law—have already begun to materialize. Yet the decision is only 6 months old.

I stress in the dearest possible words that the Senate passage of section 23 and the conferees agreement with its intent, and commitment to examine in the next session the best means to accomplish this intent, should be read to discourage any extension of the Milwaukee rationale.

I do not believe the Congress has yet addressed the issue of displacement, generally. There is, however, one recent law which explicitly addressed the problem. That is the superfund. And, I might note, it expressly preserved both Federal and State common law, even in cases of compliance with Federal permits under the Clean Water Act or other statutes.

The Supreme Court has construed our silence in the Clean Water Act to mean that we intended displacement. I do not believe that is true. I believe that compliance with the statutes is merely evidence—though it might be compelling evidence—that a person is fulfilling his legal obligations under the common law. But I do not believe it was ever our intent to say that the existence of a regulatory scheme means an injured party is out of court.

As I said, my amendment was an attempt to remedy this problem. Milwaukee casts a shadow over our entire system of jurisprudence.

The exact language of my amendment may require additional crafting. What is important are not so much the specific words or phrases, but the intent, which our two committees support, and the Congress endorsed as recently as last year's superfund law.

Mr. President, these amendments are but the first step in a more comprehensive review that the Committee on Environment and Public Works plans to undertake on the Clean Water Act and the operation of EPA's water quality program. It is our intention to begin our review as soon as practicable after the second session of the 97th Congress convenes in January.

This effort will be largely directed by the chairman of the Subcommittee on Environmental Pollution, Senator JOHN CHAFEE. I know that he will continue to receive the excellent cooperation and participation by other members of the subcommittee, both majority and minority, that characterized the work on the construction grant reauthorization amendments. I want to take this opportunity to commend Senator CHAFEE personally for his leadership in the Senate, and in his capacity as chairman of the conference committee on this legislation.

It is not always glamorous work, but it is vital work, for the protection of our natural environment, for the health and well-being of the public and for the benefit of our cities and towns which must undertake the construction of waste treatment facilities.

I also thank my friend and colleague, the ranking minority member of the committee, Senator JENNINGS RANDOLPH for his helpfulness and faithfulness throughout the development of this legislation. A special mention should also be made of the committee staff which assisted so helpfully, as always: Bailey Guard, John Yago, William Corcoran, Philip Cummings, Jacqueline Schafer, Curtis Moore, Ann Garrabrant, and our thanks too to the staff of the other committee members who participated in this effort.

Mr. CHAFEE. Mr. President, I am pleased to report that the House and Senate conferees have reached agreement on amendments to the Clean Water Act and those amendments are before us today. The amendments address just those portions of the act concerning the construction of municipal sewage treatment facilities. Other portions of the act are not affected.

Many of you may remember that earlier this year Congress eliminated funding for this program during the reconciliation process. Quite frankly, this was done because the program had gotten out of control. Eligibilities were expanding, costs were skyrocketing and the overall Federal commitment to the program was ballooning to a total in excess of $100 billion.

The new administration recognized this and decided it was time to address the difficult questions—should we reform the program and emphasize water quality, or should we let the program continue as is, at the expense of water quality. The administration proposed some excellent amendments to the act, many of which are reflected in the final product. Some others were not accepted.

A case in point is the reimbursement section of the Clean Water Act, section 206. The conferees believe strongly that States and local governments should be encouraged to proceed with construction of needed facilities with the expectation of Federal reimbursement at a later date. As a group, Mr. President, the conferees still believe that in the long run reimbursement will save the Federal Government money and improve water quality. We urge the administration to carefully review their policy toward section 206.

The thrust of the administration proposal, and the package before you today, is reducing the Federal exposure or more appropriately bringing expectations in line with something that is fiscally achievable. We have done that. I do not know, nor does anyone, what the Federal exposure of the conference agreement is, but I know and so does the administration, that the reduction in the exposure level is real and it places achievement of water quality goal of the act within our grasp over the next decade.

Our compromise is a fair one. For the next 3 years the program remains as is but in the fourth year all the rules change. Essentially each Governor must decide his priorities and put them into place quickly in order to qualify for continued funding and reserve capacity under the present rules. If a treatment facility receives any portion of a I, II, or IVb grant prior to October 1, 1984, that facility will qualify for a 75-percent Federal grant for the I, II, and IVb portion of the plant until its completion, as well as sufficient reserve capacity as currently defined in regulations.

Additionally, any infiltration-inflow correction work, category IIIA, on such a facility would also receive a 75-percent grant if the initial grant was made prior to October 1, 1984. The EPA should use infiltration and inflow correction as an alternative to funding reserve capacity.

I have not mentioned collector sewers, which were an important component of the conference. Collector sewers will continue to be eligible for Federal assistance until October 1, 1984. What happens to them after that date I will address later. It is not the intention of the Senate conferees that there should be a great rush on the part of States to build collector sewers.

On the contrary, there are legitimate situations in which collector sewers are inseparable from public health. An example of this is the South Valley project in New Mexico. Without adequate collector sewers, public health and ground water are both endangered. This is a compelling example of the type of collectors which should be built.

We are placing a great burden on the EPA. We expect that regulations promulgated pursuant to this conference agreement will discourage any funding of collector sewers that encourage growth. Federal assistance should be available to alleviate pollution problems, not create them. Additionally, the regulations should establish a clear policy on reserve capacity.

As I mentioned earlier, we have a provision which allows some projects which were begun prior to October 1, 1984, to complete treatment portions of these under the old rules for both the Federal share and reserve capacity. The conferees intend that this window is narrow and not wide open. Segments of projects that will qualify to continue operations under existing rules should be discrete and major segments.

The grant application for a segmented step III should include all portions of the facility that are expected to qualify for the grandfather even if the particular application is for a portion of that overall project. The agency's emphasis should be on completing systems, not on making certain that the grandfathering provision is overly generous.

Beyond October 1, 1984, other important changes occur which cannot be minimized. Building reserve capacity with Federal assistance is eliminated after October 1, 1984. Projects which are not eligible for the grandfather provisions will only receive Federal assistance for the portion of the treatment works necessary to treat existing flows on the date the step III construction grant is awarded.

Coupled with the elimination of reserve capacity is the continued eligibility of infiltration-inflow correction work. I have always believed that infiltration and inflow correction is a significant cost-saving measure.

However, because reserve capacity has always been eligible for Federal funding, I never thought that infiltration-inflow correction was carried out as it should be. It is a lot more attractive to get a big grant for a mammoth new sewer than it is to obtain a small grant to do some real nuts and bolts things.

The conference report makes infiltration-inflow correction a meaningful component of the program for the first time. I wouldn't be the least surprised if many communities, which are on a 1986 or 1987 time schedule for receiving a grant for sewer construction, reassess their position and go forward with infiltration-inflow correction work instead.

A major change in the program, on par with reserve capacity, is the reduction in the Federal share in fiscal year 1985 to 55 percent for all now grandfathered projects. The Federal Government has been generous with its share of project costs and we simply have to change that policy. We have to spread fewer dollars further.

I also believe that while the large Federal share was necessary in getting the program moving, it was responsible for some poor decisionmaking at the State and local level. Unfortunately, many treatment facilities are oversized and unnecessarily complex simply because of generous Uncle Sam. This will change. From now on difficult choices will have to be made at the local level because communities will have more at stake than previously. The emphasis will be on well designed and energy efficient treatment plants. This can only benefit water quality.

After October 1, 1984, the Governors will have more flexibility than has previously been the case. After that date Governors can use up to 20 percent of their annual allotment to address no longer eligible categories. They may choose to only use 5 percent or none at all, but it is their decision. Anything funded out of the discretionary fund will receive a maximum 55-percent Federal, regardless of whether or not it ever received a large Federal grant share. Categories which cannot be funded out of the discretionary fund are I, II, IIIa, and IVb.

I am pleased to report that the provisions in the Senate bill regarding combined sewer overflows have been maintained. They are key provisions insofar as ever achieving our water quality goals are concerned.

Some have mentioned that the Senate bill has kept in place all needs for combined sewer overflow corrections. That is simply not the case. The legislative history is clear. The universe of projects affected by the provision giving each Governor discretion to deal with combined sewer overflows is much smaller than what is presently eligible. Section 5 contains a very difficult water quality test that not every project will be able to pass. The same is true of the program established for overflows into marine bays.

The other significant point included in the conference report is a 4-year authorization and 4-year funding. This program has no shortage of critics. Newspapers and magazines have called attention to the unfulfilled promise of clean water for everybody. The conclusion is always the same, the program has been a bust. Simply put, I think that charge is hogwash.

The problems with the program are as easily discovered as saying that all our waters are not clean so the program is a failure. After spending the last year working on the problem, I can tell you that the program was well designed, even if it was too generous, but the major problem—nobody leaves it alone to run smoothly.

The Congress and the Federal EPA always seem to be tinkering with some portion of the program, always disrupting program continuity. This 4-year authorization is crucial to removing institutional instability. It is a clear signal that Congress has acted and will not meddle again for several years. It is also a clear signal to Governors and mayors to make their plans based on a firm commitment of $2.4 billion per year for each of the next 4 years. This is the figure that was requested by the President.

Other provisions in the agreement will also help to make this a better program. We have increased the incentive for communities to utilize the innovative and alternative waste water treatment programs. We have reopened the opportunity for some cities which discharge into the ocean to obtain waivers for secondary treatment of municipal wastes.

We did not change any of the environmental tests which had to be met by a discharger before a waiver could be granted. Also, explicitly, the agreement prohibits any waivers which would allow the introduction of sewage sludge into the marine environment. The entire question of ocean disposal will be carefully examined in the next session by the subcommittee.

Because of all the attention the term "Federal exposure" has received this year, the first question that anyone asks about the conference report is, what is its Federal exposure? The only accurate answer is that I do not know what the Federal exposure is, and I am sure anyone else who attaches a number to it is picking those numbers out of the dark.

The reason why any estimate is no more than guesswork is that these amendments will force State and local governments to rethink their plans. The priority projects will be started and finished while marginal or less environmentally needed projects will simply be dropped from priority lists. For that reason, engaging in a numbers game is simply a fruitless exercise.

Those who are concerned about the numbers should first look at what the conference report will accomplish. It will eliminate Federal funding of reserve capacity, it will reduce the Federal share and improve project selection and design. It will limit the categories of treatment that Federal assistance will be available for. It will give each Governor some discretion over a part of his allotment to deal with priority pollution problems.

Lastly and most importantly, the conference report emphasizes completing projects and putting Federal dollars where the need is greatest.

Lastly, I want to thank the conferees from the Senate, particularly Senators STAFFORD, RANDOLPH, GORTON, and DOMENICI. Each of them was extremely helpful in achieving true reforms on this effort. The staff of the committee, Bill Corcoran, Jackie Schafer, Phil Cummings and Ann Garrabrant did an excellent job of moving this process forward. The chairman of the House conferees, BOB ROE and the ranking member JOHN PAUL HAMMERSCHMIDT were well informed, fair, and strong advocates for their positions.

I would also like to put in a word for the administration. John Hernandez, from EPA, and the director of the construction grants program, Henry Longest, were always available with expert advice. The subcommittee appreciated their cooperation. As the conference agreement is put into place by the agency, it will be of great benefit to the program that their involvement was so substantial.

I expect that when Congress looks at the municipal program 3 years from today it will be viewing an efficient and smooth-running operation.

● Mr. GORTON. Mr. President, I add my comments to those of my distinguished colleagues in support of this conference report. In my view, this report represents a sound approach toward the difficult goal of restructuring the construction grants program. Such a restructuring is critical if we are ever to make significant progress in cleaning the Nation's waters.

The Federal Government can no longer proceed as if it has unlimited resources to allocate to this program. The difficult task facing the conference committee was to determine the most effective manner in which to utilize the $2.4 billion this bill would authorize for fiscal year 1982, as well as to reduce the total future exposure of the Federal Government. That task has been accomplished by several significant provisions of this bill. The bill provides a reduced Federal share of

funding for those categories of projects that remain eligible.

This approach allows the use of Federal funds in a larger number of cases while at the same time funding only those categories directly related to water quality. Because it is a multiyear bill it will add a measure of predictability to the program. And, the bill also allows the State the flexibility to address water quality problems not otherwise eligible, through the use of a discretionary fund. Each of these aspects of the bill will add to the likelihood that we will more efficiently and effectively deal with our water quality problems in the future.

I would like to offer my personal congratulations to Senators CHAFEE and RANDOLPH for their hard work and tenacity in developing this conference report. I know that many States have been anxiously awaiting the outcome of this conference. The result is one which should please most of the affected parties. The Senate members of the conference committee will continue their efforts to assure that an appropriation for this program will be forthcoming from Congress as soon as possible following our return in January. Again, my congratulations to Senators CHAFEE and RANDOLPH for this fine result.●

● Mr. DOLE. Mr. President, I wish to address these remarks to the distinguished floor manager of the bill, Mr. CHAFEE, in the hope that he might clarify for me the limitation this legislation imposes on future appropriations action.

My concern in this area is due to an accounting error in EPA's region VII office which resulted in the loss of $4 million of municipal sewage treatment grant funds for the State of Kansas. As a result of this accounting error, projects which should have been credited during 1980 to the Talmadge-Nunn account, rescinded in 1981, were incorrectly credited to fiscal year 1980 and 1981 accounts not subject to the rescission order.

This error was acknowledged by OMB Director David Stockman in a letter to me dated October 29, 1981. That acknowledgement was received after H.R. 4503 had been passed by both the Senate and the House and gone to conference. Consequently, the conference report before us today does not address the issue of restoring funds that should not have been rescinded.

I ask the distinguished chairman if it is his understanding that nothing in the conference report should be construed as limiting the Congress in making future appropriations to rectify this error?

Mr. CHAFEE. That is my understanding. The conference report does not address the issue of rectifying past accounting errors and would not preclude Congress from taking that action.●

Mr. RANDOLPH. Mr. President, I am gratified to rise in strong support of this conference report, which is the product of long and arduous efforts on the part of both House and Senate Public Works Committees.

While the background of this legislation is well known to many Members of this body, I think it appropriate to briefly outline the rationale for this bill.

With the Clean Water Act of 1972, this Nation launched a massive campaign to stem the increasing degradation of our waters. The goals of that act were twofold: to clean up existing pollution and to prevent further contamination. With the 1972 legislation, a Federal effort second only in magnitude to the Federal-aid highway program was begun. A primary focus of that act was title II, the construction grant program. Title II mandated that all municipal wastewater treatment facilities in the United States achieve secondary treatment by 1977.

The Federal share for funding wastewater treatment plan construction was set at 75 percent. Complex and specific requirements were stipulated by Congress as prerequisites for Federal grants.

From its inception, the construction grant program has had major difficulties in accomplishing its goals. The costs of the program were greatly underestimated, as were the technological problems associated with achieving clean water. The primary goal of the act, secondary treatment by 1977, was extended by subsequent legislation to 1983.

By the end of 1980, $34.8 billion had been appropriated for the construction grant program and $29 billion had been obligated. The remaining needs were estimated by the Environmental Protection Agency to be in the neighborhood of $100 billion. The program has been under attack by the General Accounting Office and in a number of newspaper articles from the standpoint of cost, possible mismanagement, and inadequate maintenance and operation of completed facilities.

The current administraton recommended no funding for the program in fiscal year 1982 unless reforms were enacted which reduced the scope and the eligibilities of projects. While appropriations in fiscal year 1981 were $3.4 billion before the rescissions enacted in June, in accordance with today's budget constraints, the administration indicated a support for only $2.4 billion for the current fiscal year if such reforms were enacted.

Mr. President, the conference report on H.R. 4503 represents those reforms. In essence, this reform legislation authorizes $2.4 billion annually for fiscal years 1982 through 1985. At the beginning of fiscal year 1985, the current 75 percent Federal share of new construction projects drops to 55 percent. Projects which have received either a partial or entire step 3 construction grant by October 1, 1984, will continue to receive 75 percent Federal funding for treatment facilities and interceptors until completion.

After October 1, 1984, eligible project categories will be limited to secondary or more stringent treatment or any cost-effective alternative, new interceptors and appurtenances, and infiltration-inflow. After that date, projects no longer eligible can be funded at the discretion of the Governor, from a fund consisting of up to 20 percent of a State's allotment.

In addition to these major points, the legislation continues existing incentives for innovative and alternative systems. The percentage of allotted funds which a State must expend for the incentive bonus on projects employing innovative or alternative systems is raised from the current 3 percent to a minimum of 4 percent and a maximum of 7½ percent.

A new procedure is established whereby new plants will remain under the supervision of their builders for 1 year in order to assure that their performance complies with the standards established under the act.

In recognition of the impact of reduced Federal funding the statutory deadline of 1983 for the achievement of municipal secondary treatment is extended to 1988.

Mr. President, in the Senate version of this legislation, I was able to persuade the Committee on Environment and Public Works to include a provision which extended authority for small communities to construct collector sewers with construction grant funds for 1 additional year, under restricted circumstances. I am pleased to report that the conference substitute retains eligibility for collector sewers for an additional 3 years for all communities. This is particularly important for small communities such as in West Virginia, where collectors are necessary to treatment systems.

I sincerely believe that this legislation is good. It perhaps does not accomplish all the reforms the President has sought, as quickly as he would like. But a massive scaledown of a large program such as construction grants cannot be achieved on an immediate basis without grave hardship to communities and States. This bill serves clear notice that the Federal Government can and will no longer shoulder the giant's share of the bill to clean up our waters. States will have 3 years to determine their priorities and plan how to fund an increased share of what will be needed to obtain clean water. I have every confidence that they will be able to do so.

We intend to seek $2.4 billion in fiscal year 1982 funding in an urgent supplemental appropriations bill shortly after the reconvening of the 97th Congress. It would be devastating if a hiatus were created in the continuous funding this program has received over the past decade.

Mr. President, there was some confusion about what the allotment for West Virginia would be under this bill. The conference report as printed in the RECORD of December 14 was incorrect, as was House Report 97–408. Under this legislation, West Virginia will receive $42.4 million in fiscal year 1982, and $38.1 million in each of fiscal years 1983. 1984, and 1985. This is an allotment factor of 0.015890. not 0.013890 as shown in the incorrect document. Therefore, West Virginia can expect $156.7 million over the next 4 years. when annual appropriations of $2.4 billion are made.

Mr. President, I want the RECORD to show my agreement with Senator STAFFORD's remarks on section 23 of the Senate-passed bill. In deference to the fact that the House had not held hearings on how to draft an amendment of this kind, we agreed to not include the provision

in the conference report. It was the explicit understanding of the conferees that failure to include this provision is without prejudice, and the conferees agreed to examine further in the next session the best means to accomplish their intent not to displace remedies other than those under the Clean Water Act.

As one Senator who took an active part in drafting the 1972 Clean Water Act, I know that the Congress did not intend to displace any previously existing remedies under Federal or State law, including common law, when that act was passed. It has always been the intent of Congress, and in particular the Senate Committee on Environment and Public Works, to leave in place other statutory and common law remedies when enacting environmental laws, unless such remedies are explicitly addressed and preempted. The Supreme Court incorrectly interpreted congressional intent in the Milwaukee case, and any extension of that decision would be unwise.

A related issue is whether a federally issued permit is a bar to liability actions where a discharge or emission causes damages. In the so-called Sea Clammers case, the Supreme Court appears to say that even the existence of a permit which is being violated gives immunity to liability for damages caused. This has never been congressional intent or understanding.

The most recent expression of Congress on these points came in last year's enactment of the Comprehensive Response, Compensation, and Liability Act. Section 302(d) of that act says:

> Nothing in this Act shall affect or modify in any way the obligations or liabilities of any person under other Federal or State law, including common law, with respect to releases of hazardous substances or other pollutants or contaminants. The provisions of this Act shall not be considered, interpreted, or construed in any way as reflecting a determination, in part or whole, of policy regarding the inapplicability of strict liability, or strict liability doctrines, to activities relating to hazardous substances, pollutants, or contaminants or other such activities.

In explaining the intent behind this provision, the Senate report accompanying this bill (S. Rept. 96–848) states:

> By explicitly stating liability rules in this statute, the Committee does not intend that S. 1480 in any way preempt or weaken any other law. All other remedies are to continue to exist after enactment of this bill, including those under common law, admiralty law, and Federal and State statutory law. This is important to note in that while S. 1480 in many respects generally codifies existing law, in some specific respects its liability rules are more limited than those under existing law. For instance, while the Fund is precluded from using the rules of section 4 to seek recovery for cleanup costs or payment of damage claims for certain categories of releases, other remedies or provisions of the common law or any other law are available to the Fund and the Fund should use them to recoup its expenses.

In that report the Committee on Environment and Public Works also made the following observations about Federal permits and potential liability of permitholders to damage suits and abatement action under other authorities:

> The rule of common law is that compliance with a permit is not a defense to liability. Moreover, the Congress has never said or suggested that a Federal permit amounts to a license to create threats to public health or the environment with legal immunity.

The philosophy of the Senate-passed bill's amendment to section 511 of the Clean Water Act continues to be the intent of this Senator and, in my understanding, of the Congress. I look forward to perfecting legislation which makes sure that this intent is carried out in the Clean Water Act, as in other Federal environmental laws.

Mr. President, I compliment those who labored long and hard—on several occasions well into the night—on this legislation.

I specifically commend Senator JOHN CHAFEE, Environmental Pollution Subcommittee chairman, who served as chairman of the conference; Senator ROBERT STAFFORD, our full committee chairman; Senator GEORGE MITCHELL, ranking minority member of the subcommittee; and all the other members of the conference committee.

Our colleagues on the other side of the Hill joined with us in extensive efforts to resolve the differences between two very different pieces of legislation.

Representative ROBERT ROE, chairman of the House conferees, was diligent in his efforts to help develop a bill acceptable to both bodies, as was his minority counterpart, Representative JOHN PAUL HAMMERSCHMIDT.

It has been a long, often rocky road since we first began consideration of this legislation. We are now at the end of that road. I urge favorable consideration of this conference report by the Senate. I then fully expect the President to sign the legislation and support an appropriation so that this vital program will proceed in a timely fashion.

Mr. President, I will speak very briefly in further reference to the conference report.

As conference chairman, Senator CHAFEE had not a difficult time but that period of discussion which often leads to misunderstandings between the House of Representatives and Senate and certain points of view expressive of the Senate legislation and of comparable House legislation.

I feel, I say to the majority leader who I am looking at at the present time, that in connection with what we have done on the committee of which he is a member, in reference to clean water, we pinpoint 1972 and 1976 as landmarks in connection with the legislation.

Let us realize that what we are now doing is a transition bill to revise the scope of this vital program.

It reduces the funding, and that is understandable. Funding has been reduced in practically every program in which Federal aid is matched by States and local political subdivisions.

But those changes in the program are responsive to the needs of the men, women, and children, who throughout America live in larger and smaller communities, in the prevention of pollution of our water.

We work, of course, now not with the sum of money we were working with before. We are working under this bill over a period of 4 years at the rate of $2.4 billion on an annual basis.

This is important legislation. Of course, the conference agreement comes in the closing hours of the 1st session of the 97th Congress, but we are conscious of the need for this continuing program out there in America.

I remember when I talked with the capable Governor of Utah, Scott Matheson, when he was in Washington, D.C., recently. He said "the priority for us in the State of Utah is the wastewater treatment plants, the sewage systems; that is the priority that I have as a Governor of the State of Utah.

"I am not unmindful," he said, "of the need to cut back on the Federal funding, but whatever we can do, joined by the Federal and the local community and other political subdivisions to bring clean water to the communities of Utah is something in which I am intensely interested and I desire to know what you are doing."

So we talked with him and others talked with him. I think he went home from his visit here feeling that we were not unmindful of our need to address these problems, not only in 1972 and 1976, but also in 1981 and in the years that are out there ahead of us.

I thank those who have given me the opportunity here to speak these words which I feel very strongly.

Mr. CHAFEE. Mr. President, I wish to take this opportunity to express my deep appreciation and thanks to all those on the Environment and Public Works Committee and especially to our chairman who is unable to be here this evening and the man we always call chairman who served as chairman of that committee for so many years, the distinguished senior Senator from West Virginia. He attended our conference sessions with great faithfulness. He was a tower of support and understands this legislation.

He recognizes what we are attempting to achieve and he has supported us with great vigor and consistency throughout those long sessions that we had with the House conferees.

Like any conference, we did not achieve everything that the Senate conferees sought. But nonetheless we believe that this legislation that emerged, the conference report we are voting on now, was a fair one to both sides and indeed fair to the citizens of our Nation.

It authorizes some $2.4 billion a year for 4 years, as the senior Senator from West Virginia said, for the waste water treatment plants.

Some 35 States now are out of funds. Without the passage of this legislation and without the passage of the legislation of course with the appropriations which must follow, the programs in those 35 States will come to a stop.

So, as I mentioned, most of the reform we sought, and the administration

sought, has been included in this legislation.

So I urge the Senate to adopt the conference report.

Mr. BAKER. Mr. President, I will not take very long. I wish to once again pay my respects to the distinguished chairman from West Virginia (Mr. RANDOLPH), who was my chairman when I had the opportunity to be active on that committee, and where he served with great distinction for so long in that role, and now serves with equal distinction as the ranking Democratic member of the committee. Some of us who served on that committee think JENNINGS RANDOLPH invented that committee.

In any event, we salute him for the good work he has done in the past and for the good work he has done tonight, and I join with my colleague from Rhode Island and others in offering these words of congratulation to the Senator, and to Senator STAFFORD as well, the present distinguished chairman of the committee, who carries on in great tradition.

I urge my colleagues to adopt the conference report.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TOXIC SUBSTANCES CONTROL ACT AMENDMENTS—CONFERENCE REPORT

Mr. BAKER. Mr. President, I submit a report of the committee of conference on S. 1211 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1211) to extend the Toxic Substances Control Act for one year, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of December 9, 1981.)

Mr. GORTON. Mr. President, it is with pleasure that I rise to seek the Senate's approval of S. 1211 as it was reported by the conference of the House of Representatives and Senate on December 9, 1981. This bill makes authorizations to the Environmental Protection Agency for its regulatory program under the Toxic Substances Control Act. That act, when originally passed in 1976, established a program to stimulate the development of adequate data on the effects of chemical substances on health and the environment. Those chemicals which present an unreasonable risk of injury to health or the environment are regulated to reduce that risk.

The act's coverage is broad, affecting more than 55,000 chemicals currently in commerce. Up to 1,000 additional new chemicals are introduced each year. About 115,000 manufacturers and processors are subject to the act. The fundamental purpose of the act is to provide a comprehensive approach to controlling toxic substances which may be introduced into the environment as a result of human activities. President Reagan's request for authorization to the Environmental Protection Agency for 1982 was $60,146,000. The agreement of the House and Senate conference, now reflected in this bill, authorizes that amount. This amount constitutes a decrease of $8.3 million from the 1981 authorization for the same programs. Though President Reagan has yet to make a specific authorization request for the 1983 fiscal year, the agreement of the House and Senate conference authorizes $63 million for that year.

The regulation of toxic substances in the environment of our American cities and towns is an important and appropriate governmental activity. It, like others for which we will authorize lesser expenditure than the Congress has in prior years, is no less important because of the smaller funding. We must place a significant priority on controlling the use of substances which can be harmful to the physical well-being of persons. It is important that we know as much as possible about any substance which has that potential. The Environmental Protection Agency's activity under the toxic Substances Control Act has been valuable in producing the information we need to know how to respond to the use of these toxic substances. It is my hope that the agency's activity under the funding authorized by this bill will be as valuable.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ESTABLISHMENT OF A UNIFORM LAW ON THE SUBJECT OF BANKRUPTCIES, APPROVED NOVEMBER 6, 1978

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate H.R. 4353.

The PRESIDING OFFICER. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 4353) to amend the Act entitled "An Act to establish a uniform Law on the Subject of Bankruptcies, approved November 6, 1978."

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. Without objection, this bill will be considered to have been read twice by title.

Mr. HEFLIN. Mr. President, I urge the passage of H.R. 4353, a bill intended to correct technical oversights and make minor changes in the Bankruptcy Reform Act of 1978.

The provisions of this legislation have previously been approved unanimously by the Senate this Congress, on July 17, 1981, as section 308(e) of Senate bill 863, the Bankruptcy Amendments Act of 1981. The House Judiciary Committee was unable to deal with the entire range of technical corrections in S. 863 this session. However, the House committee did consider as a separate bill several of the technical issues in S. 863.

H.R. 4353 is such a bill. This measure, which has been passed by the full House, would limit the fees payable into the referee's salary and expense fund in certain pending bankruptcy cases under section 40c of the Bankruptcy Act. H.R. 4353 would insure that fees in excess of $100,000 will not be charged under section 40c(2)(b) of the Bankruptcy Act in a case in which the final determination as to the amount of the fee is made after September 30, 1979, notwithstanding an earlier confirmation date.

Such treatment will be identical to that already provided cases confirmed after September 30, 1978, and will be fully consistent with Congress earlier action in limiting fees in such large-asset cases. Thus, the H.R. 4353 $100,000 fee cap will apply to a chapter XI case where, for example, the confirmation order was approved on December 31, 1977, but the court order fixing the precise amount payable to the fund was entered by the court subsequent to September 30, 1979.

I would like to thank the majority leader, Democratic leader, chairman, Senator STROM THURMOND, and ranking minority member, Senator JOE BIDEN, and their able staff for their assistance in expediting this important legislation.

Mr. President, I urge immediate adoption of this bill.

Thank you, Mr. President.

The PRESIDING OFFICER. If there be no amendments to be proposed, the question is on third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. HEFLIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MELVIN PRICE LOCK AND DAM

Mr. BAKER. Mr. President, I move that the Committee on Environment and Public Works be discharged from further consideration of H.R. 4506, the Melvin Price lock and dam bill, and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 4506) to name the lock and dam authorized to replace locks and dam 26, Mississippi River, Alton, Illinois, as "Melvin Price Lock and Dam".

The PRESIDING OFFICER. If there

are no amendments to be proposed, the question is on the third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DESIGNATING THE JOHN ARCHIBALD CAMPBELL U.S. COURTHOUSE

Mr. BAKER. Mr. President, I move that the Committee on Environment and Public Works be discharged from further consideration of H.R. 2494, a bill to designate the John Archibald Campbell U.S. Courthouse, and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 2494) to designate the John Archibald Campbell United States Courthouse.

Without objection, the motion was agreed to and the Senate proceeded to consider the bill.

Mr. HEFLIN. Mr. President, I would like to add my words to advocate the passage of this bill.

The PRESIDING OFFICER. If there be no amendments to be proposed, the question is on the third reading of the bill.

The bill was ordered to be read a third time, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. HEFLIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STAFFORD. Mr. President, I support the passage of these two bills H.R. 2494 and H.R. 4506. Both bills rename Federal structures, and, in effect, meet the rules of the Committee on Environment and Public Works.

H.R. 2494 names a Federal building and courthouse in Mobile, Ala., in honor of John Archibald Campbell. Mr. Campbell, who was from Mobile, served as a Justice of the Supreme Court of the United States from 1853 until 1861.

H.R. 4506 names the new locks and dam 26 on the Mississippi River for our good friend, Representative MELVIN PRICE of Illinois.

Rule 14 of the Committee on Environment and Public Works states:

No building, structure or facility authorized by the Committee, shall be named for any living person, except former Presidents or former Vice Presidents of the United States, or former Members of Congress over 70 years of age.

Congressman PRICE, the distinguished chairman of the House Committee on Armed Services, has served in the House since 1945. He is 76 years old. And while we are all pleased that he intends to run for reelection, I must note that the provisions of H.R. 4506 state that this name change will take effect only after Mr. PRICE's retirement from the House of Representatives.

Mr. PRICE is from East St. Louis, which is located a few miles downriver from Alton. He has long been a strong proponent for sound waterway development. Mr. President, I am sure that the Senate shares my belief that this name change is most fitting and appropriate.

LOW-INCOME ENERGY ASSISTANCE AND WEATHERIZATION

Mr. CHAFEE. Mr. President, I would like to have the following letter entered into the RECORD on behalf of myself and Senator MITCHELL. The letter is addressed to President Reagan and it expresses the concern that Senator MITCHELL and I share about the future of funding for the low-income energy assistance and weatherization programs. The letter urges the President to sign the Department of the Interior appropriations bill, H.R. 4035, into law and asks that the President insure that the funding for the weatherization program contained in that appropriation be transferred to the States as expeditiously as possible.

The letter also requests that the President transfer funds for low-income fuel assistance contained in the continuing resolution to the States as quickly as possible. In my home State of Rhode Island, last year over 30,000 families received aid from the fuel assistance program. This year nearly 34,000 will be eligible to receive aid. Weatherization program funds have enabled the insulation of over 7,300 homes in Rhode Island since 1977.

Mr. President, delay in the transfer of funds to the weatherization and fuel assistance programs would have a severe impact on State programs, particularly in the colder States like Rhode Island and Maine, and that is why we are asking that President Reagan act quickly to insure that the funds for these programs are distributed in an expeditious manner.

Mr. President, I ask unanimous consent that the letter dated December 16, 1981, be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COMMITTEE ON FINANCE,
Washington, D.C., December 16, 1981.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: We are writing to request that the funding for the low-income weatherization program and low-income fuel assistance be transferred to the States in an expeditious manner. The immediate transfer of funds for these programs is absolutely essential particularly in the cold weather States where virtually all of the energy assistance funds are needed during the Winter months.

As you know, the Department of Interior Appropriations Bill, H.R. 4035, was forwarded to you for your signature on December 10, 1981. The bill contains the appropriations for the low-income weatherization program. To date, this program has resulted in the weatherization of over 900,000 households across the country and results in an average savings of 25% in fuel costs per family. The $144 million weatherization appropriation figure is consistent with the fiscal discipline to which all federal programs must be subject since this amounts to a 22% reduction in funding as compared with the 1981 funding level. This program has considerable support in this Congress. Therefore, we urge you to sign H.R. 4035 and insure that weatherization funds are transferred to the States as expeditiously as possible.

We are also concerned about the availability of funds to the States under the Low Income Energy Assistance Program. Most States require fuel assistance funds in a concentrated period during the Winter. Thus, as Congress clearly expressed in the Continuing Resolution, "the Department of Health and Human Services should be aware of the critical nature of the program and make certain that States are awarded their portion of funds on an as needed basis." We, therefore, request that you insure that the Department heeds this mandate and administers the program in a flexible manner which allows States to receive fuel assistance when they need it most.

Furthermore, we would like to reiterate the position of Congress that all funds appropriated for the low-income energy assistance under the Continuing Resolution and weatherization under the Department of Interior appropriation be spent. These programs are of vital importance and the actions we have requested are essential to the continued survival of these programs.

Thank you for your attention to these important issues.

Sincerely,

GEORGE J. MITCHELL,
JOHN H. CHAFEE,
U.S. Senators.

UPDATE ON AGENT ORANGE ISSUE

Mr. CRANSTON. Mr. President, I have had a long and deep involvement with the agent orange issue—first, as the chairman of the Committee on Veterans' Affairs and now as that committee's ranking Democratic member. During the course of this involvement, I have made a concerted effort to keep my colleagues and the public up to date on developments on this very difficult and troublesome issue through oversight hearings, statements in the RECORD, and by other means.

I am very gratified that my successor as chairman, my good friend from Wyoming (Mr. SIMPSON), is continuing our committee's activities in this area. I believe that our oversight hearing on this issue on November 18 made an important contribution to keeping the public informed on this very important issue.

Mr. President, I have two documents regarding the agent orange issue that I will ask be printed in the RECORD and one other matter that I will discuss briefly.

Mr. President, the first such document entitled "Health Effects of 'Agent Orange' and Dioxine Contaminants" is an executive summary, prepared by the American Medical Association's Council on Scientific Affairs Advisory Panel on Toxic Substances, of the panel's technical report on that subject. I understand that that report was submitted on December 8, 1981.

Although this document is quite technical in certain respects, it contains a succinct summary and certain analyses that should be useful to Vietnam vet-

erans and others concerned about the health effects of exposure to agent orange. Because this report was prepared earlier this year, some of the figures cited under the heading "Current Studies" are outdated, and we have added more current data in footnotes.

Mr. President, the second item that I will ask be printed in the RECORD is a letter from the recently confirmed Deputy Administrator of Veterans' Affairs, Mr. Charles T. Hagel, to my colleague on the Veterans' Affairs Committee and good friend from Pennsylvania (Mr. SPECTER). Enclosed with this letter are written responses from Mr. Hagel to Senator SPECTER's questions relating to agent orange at Mr. Hagel's confirmation hearing on November 25, 1981.

In light of Mr. Hagel's position as Deputy Administrator as well as Chairman of the agency's Policy Coordinating Committee on Agent Orange, I believe that his responses to Senator SPECTER's questions are particularly significant as a reflection of the VA's views on the current status of efforts related to agent orange.

Mr. President, as I noted earlier, I also want to mention briefly another important item related to agent orange. In Public Law 96–151, the Congress mandated two significant studies—first, an epidemiological study to determine the health effects in Vietnam veterans of exposure to dioxin as found in agent orange and, second, a review of the scientific literature on the health effects in humans of exposure to dioxin. Although there have been many problems with the first of these studies—much of the committee's oversight hearing on November 18 focused on the problems associated with that study—I am very pleased to note that the literature review was completed by an independent contractor and submitted to the VA on October 1, 1981.

Early response to this two-volume literature review has been very positive, and I believe that it should serve as a valuable tool in the ongoing efforts to resolve the agent orange issue. It is my understanding that this study will be available to the public after January 1, 1982, through the Government Printing Office and I urge interested persons to contact GPO for details on procedures for ordering copies of the review.

Mr. President, I now ask unanimous consent that the document entitled "Health Effects of 'Agent Orange' and Dioxine Contaminants" and the letter to Senator SPECTER from Mr. Charles T. Hagel, with the enclosed answers, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

HEALTH EFFECTS OF "AGENT ORANGE" AND DIOXINE CONTAMINANTS

(By William D. Dolan, M.D.)

The American Medical Association's Council on Scientific Affairs, in response to a request from the Medical Student Section, has reviewed the medical evidence regarding the toxicity and long-term health effects of Agent Orange and its associated contaminant 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD). This Executive Summary, which was prepared by the Council on Scientific Affairs Advisory Panel on Toxic Substances,[1] summarizes the findings in its Technical Report on the subject, which is available on request.

BACKGROUND

During the latter stages of the US involvement in Vietnam, herbicidal mixtures of 2,4,-dichlorophenoxyacetic acid (2,4-D) and 2,4,5-trichlorophenoxyacetic acid (2,4,5-T), otherwise identified by the military as Agent Orange, were sprayed over certain areas of Vietnam for the express purpose of defoliating the jungle and destroying one of the enemy's means of concealment. Similar spray programs have been used in the US as a means of forestry management. For the past 30 years, mixtures of 2,4-D and 2,4,5-T have been used extensively by the homeowner and farmer for ridding lawns and agricultural acreage of unwanted broadleaf vegetation. Large numbers of persons have been exposed to varying amounts of 2,4-D and/or 2,4,5-T, as well as the contaminant 2,3,7,8-tetrashlorodibenzo-p-dioxin (TCDD), in the normal course of employment.

Also over these years, there has been a number of industrial incidents wherein workers, as well as civilian populations, have been subjected to accidental exposure to these compounds. There are now pending a number of litigious actions and government regulatory responses that are based upon alleged adverse health effects from such exposures.

The most serious of these allegations by Vietnam veterans and persons who were involved in accidental industrial exposures assert that Agent Orange, or compounds of a like nature, may have caused malignant tumors, sterility, spontaneous abortions, birth defects, disfiguring skin diseases and other illnesses. In spite of the voluminous data on the biological effects of the phenoxy-type pesticides and the associated chlorinated dioxins, there is still very little substantive evidence for the many claims that have been made against these compounds. Data from experimental animals do indicate that TCDD is a toxic material; however, while suggestive, the animal data are not necessarily applicable to man. Still, a number of those exposures to TCDD of industrial and general populations that have occurred have been sufficiently well documented to offer some insight into the effect of TCDD on man.

Agent Orange, or Herbicide Orange, was a label given by the U.S. military forces to a 50:50 mixture of the n-butyl esters of 2,4-D and 2,4,5-T together with a minor amount (1 percent) of the free acid of 2,4,5-T and varying amounts of the contaminant TCDD. Agents Green, Pink and Purple also were used as defoliants by the military forces from 1962 thru 1964, a time when very few American troops were committed to the field. Another formulation, Herbicide Orange II, was similar to Agent Orange except that the isooctyl ester of 2,4,5-T was substituted for the n-butyl ester of 2,4,5-T. In addition to Agent Orange, other spray defoliants used in Vietnam included Herbicide White, whose active ingredient was picloram (or the triisopropanolamine salt of 4-amino-3,5,6-trichloropicolinic acid). This substance is very persistent in the environment and highly carcinogenic in rats and mice. Lesser amounts of Herbicide Blue, which contained sodium cacodylate[2] (26 percent) and cacodylic acid (5 percent), were used. Though the long-term effects in humans of either or both of these compounds is uncertain, picloram and cacodylic acid should be considered along with the above agents that were encountered in Vietnam.

TCDD may form as a by-product of the synthesis of 2,4,5-trichlorophenol (TCP), a precursor of 2,4,5-T, when 1,2,4,5-tetrachlorobenzene is subjected to alkaline hydrolysis at elevated temperature and pressure. If the reaction temperature is allowed to go above 180° C, the sodium-2-hydroethoxide (formed from the ethylene glycol solvent and caustic soda) decomposes exothermically and promotes the dimerization of sodium trichlorophenate to TCDD. The presence of TCDD as a contaminant of 2,4,5-trichlorophenol was discovered in 1957, when workmen involved in the manufacture of TCP developed chloracne.

About 20 years ago, commercially available 2,4,5–T contained anywhere from 1 to 70 ppm of TCDD. When the industry became aware of the contaminant's existence and toxicity, production operations were monitored and altered to reduce the level. Current manufacturing operations are able to control the amount of TCDD in commercial 2.4,5–T formulations to less than 0.01 ppm (with occasional batches as high as 0.05 ppm), a level believed to be non-hazardous to humans and other organisms. Data relating to an acceptable maximum level are presently under regulatory review by FIFRA (Federal Insecticide, Fungicide and Rodenticide Act); the recommended maximum concentration is now placed at 0.1 ppm.

Commercial formulations of 2,4,5–T and 2,4–D were used safely in agriculture for over 30 years with no recognizable evidence of carcinogenicity or birth defects in humans. Those adverse effects that did occur from massive doses of either pure 2,4–D or pure 2,4,5–T were manifested soon after the exposure, and the victims recovered with no signs of long-term damage. When the first symptoms were to present months or years after the last exposure to these compounds, it was evident another causal agent had to be responsible. That agent was later suspected to be TCDD. Though closely related chemically to 2,4,5–T, 2,4–D is not generally contaminated with TCDD.

BIOLOGICAL EFFECTS

Two of the more pronounced biological effects of some of the chlorinated dioxins are their tendency to cause chloracne (especially, in the rabbit, nude mouse, monkey and man) and the accumulation of fluid (ascites) in the pericardium and peritoneal cavity of chicks.

Chloracne in man is typified by comedones in a malar distribution; the pre- and postauricular portions are often accompanied by hirsutism and sometimes by melanosis and a secondary inflammation. The disease was first described in 1899; its cause was discovered in 1918 to be due to contact with certain chlorinated hydrocarbons. Chloracne has now become one of the more common forms of occupational dermatitis. Other acute toxic reactions to dioxin include liver and renal damage, porphyria cutanea tarda, hyperpigmentation, hirsutism, polyneuropathies (e.g., sensory impairments and weakness in lower extremities) and neurasthenic or depressive syndromes. Thus far, long-term effects, except for persistent chloracne, have not been seen.

Chloracne is not caused by 2,4,5-T and 2,4-D per se; if the condition occurs upon exposure to either or both of these compounds, it is most likely that the contaminant TCDD is responsible. Chloracne usually appears within 2 to 3 weeks after the first exposure. Mild chloracne clears up within several months after cessation of exposure; severe chloracne, on the other hand, has been known to persist for as long as 30 years following the last exposure. Persons most responsive are those who are prone to develop acne vulgaris. If one's exposure to TCDD is

[1] John R. Beljan, MD; Nelson S. Irey, MD; Wendell W. Kilgore, PhD; Kazuo Kimura, MD, PhD; Raymond R. Suskind, MD; Jaroslav J. Vostal, MD, PhD; R.H. Wheater, MS, Secretary.

[2] Sodium cacodylate is the sodium salt of cacodylic acid (hydroxydimethylarsine oxide).

severe enough, cysts form and, on occasion, inflammation and scarring will occur. If there is no medical history of chloracne, then the likelihood of a significant exposure to, or adverse health effects from, TCDD is remote. Hence, chloracne is the clinical marker of TCDD exposure.

Chronic exposures to TCDD lead to degeneration of the liver and thymus in experimental animals: one sensitive index of exposure is atrophy of the thymus. Porphyria, altered levels in serum enzymes and weight loss are also observed. Major organs to be affected are the liver, blood forming organs and the reticuloendothelial system. Progressive weight loss, the first clinical sign of toxicity in the monkey, may be accompanied by alopecia, facial edema and a dry, scaly dermatitis over the rest of the body.

The metabolism of TCDD in man is unknown, and for the present there is only limited information available on the metabolic pathways and metabolites that may occur in other mammals. TCDD is distributed equally among the fat and liver of mammals, to a lesser extent in the kidneys, and is eliminated via the feces. Samples of fat from beef cattle and samples of milk from cows that had grazed on a 2,4,5-T-treated pasture or rangeland, in addition to human milk from an area where 2,4,5-T herbicides were used repeatedly over a period of 20 years, had small to undetectable (not more than 10 ppt) amounts of TCDD.

No clearly defined mutagenic effect has been observed in vitro with TCDD. TCDD does induce gentic changes by the Ames test with *S typhimurim* and *E coli* but not with repair-defective strains; there is no evidence (from dominant lethal and cytogenetic evaluations in rodents) that such changes occur in whole animals.

Of perhaps more relevance to man are the in vitro studies on mammalian cells—ie, HeLa; Balb–3T3, normal mouse fibroblasts; SV101, virus (SV40)-transformed 3T3 mouse fibroblasts; human foreskin fibroblasts; and normal human lymphocytes. No significant growth inhibition in the cell cultures nor discernible ultrastructural changes have been observed by electron microscopy.

The teratogenicity and fetotoxicity of TCDD were discovered in 1969, in the course of a study on the biological activity of 2,4,5-T. The sample being used was later found to be contaminated with TCDD. The incidence of cleft palate was greater in two particular mouse strains (C57BL/6 and AKR), while the C57BL/6 mouse and the rat developed a higher incidence of cystic kidney. All doses given the rat led to gastrointestinal hemorrhage in the fetus. The increased ratio of fetal liver to body weight in the mouse suggested that TCDD was fetotoxic in this particular species.

A majority of studies using high doses of 2,4,5-T with 0.1 ppm of TCDD or less showed cleft palate in mice, but no other species, and embryotoxicity in the mouse, rat, hamster, sheep, monkey and rabbit. There is no scientific evidence that 2,4-D, 2,4,5-T or TCDD has caused reproductive difficulties or hazards in the human. No conclusive evidence is yet available that phenoxy herbicides or TCDD are mutagenic or teratogenic in man.

TCDD can induce cancer or serve as a cancer promoter in some strains of rats and mice. In contrast to some other chemical carcinogens, the carcinogenicity is always accompanied by considerable systemic toxicity.

From an environmental view, TCDD breaks down rapidly on leaves of plants, in water and on the surface of soil, especially through the action of sunlight. In soil it generally has a half-life of about 230 days; some soil microorganisms can degrade it, especially if other chlorinated hydrocarbons are present.

EXPERIENCE IN MAN

One of the most extensive human experiences with the adverse effects of TCDD in man involves the residents of Seveso, Italy. In July of 1976, TCDD was accidentally released from the ICMESA[3] trichlorophenol synthesis plant when a safety disk in a steam-heated reactor vessel ruptured. The plume of reactor contents, including TCDD, rose 160 feet above the factory and fell in a cone-shaped pattern about a mile long and a half-mile wide. This is the largest single population to have been exposed to the compound. Over 37,000 persons were potentially exposed to varying doses.

Two years after the incident occurred, the acute and mid-term health effects were assessed; the mild chloracne, which occurred mainly in a small group of children, healed quickly. Subclinical peripheral nerve impairment was reported; there was also some liver involvement, but without apparent functional disorder. Neither immunoresponse nor susceptibility to infectious diseases was altered.

The most recent progress report on the long-term epidemiologic survey of the residents of the Seveso area emphasizes the preliminary nature of their findings and reiterates the conclusion of prior investigators. Except for the skin, no organs or body functions were impaired. No derangement of gestation, no fetal lethtality and loss, no gross malformations, no growth retardation at term and no cytogenetic abnormalities have yet occurred.

The first of several accidental releases of TCDD and other dioxins, attending the manufacture of 2,4,5-trichlorophenol (TCP) or 2,4,5-T occurred in 1949 in the US. At least 11 other industrial accidents or exposure incidents have occurred since then, both here and abroad. To date, an estimated 579 workers are known to have been exposed, including 156 employees in the ICMESA plant at Seveso.

CURRENT STUDIES

There are now a number of studies underway by agencies of the US government and industry, which may resolve questions on the kinds and extent of human damage from exposure to low levels of TCDD:

Thru its Department of Environmental and Drug-Induced Pathology, the Armed Forces Institute of Pathology (AFIP) is examining biopsy and autopsy tissue of all Vietnam veterans. To date, only 152[4] cases have been assessed: the dominant diseases are epidermal inclusion cysts and chronic, non-specific dermatitis. If any malignancies were to have been induced by TCDD, they should be appearing by now, yet there have been no unusual morphological features nor clustering of tumors by diagnosis or site as to implicate Agent Orange.

A soft-tissue sarcoma study also has been proposed that will be conducted jointly by the Armed Forces Institute of Pathology and the National Cancer Institute.

The Air Force, through Project Ranch Hand, will administer and examine the 1,200 personnel who were involved in the actual handling and spraying of Agent Orange. They, and the control population of 20,000, are to be followed over the next 20 years.

The University of California, Los Angeles, was awarded a contract by the Veterans Administration for the design of an epidemiologic study of Vietnam veterans.

Approximately 45,000[5] Vietnam veterans who expressed concern about the hazards of Agent Orange have been examined by the VA; data on 25,000 of these men have been placed in a special Agent Orange Registry, which may serve later to identify them and to provide medical information as well as indications of health trends over the long term.

The Chloracne Task Force was established to sift out those cases of dermatitis that either resemble or are truly chloracne. Cases of the former type will be re-examined by dermatologists who have an expert knowledge of the disease. Thus far, there are only 700 cases of "skin conditions" out of the total of 3,500[6] filed claims for damage from Agent Orange.

RECOMMENDATIONS

The Council on Scientific Affairs recommends that:

(1) The above studies on exposed, or allegedly exposed, persons continue to be supported and, if feasible, enlarged to include the cooperative engagement of all internationally known exposure data, as recommended by the International Agency for Research on Cancer (IARC).

(2) All physicians be alerted through AMA publications to the classical signs of chloracne and the possible signs and adverse effects of TCDD exposure. They should be encouraged to enlist in the present efforts to identify and treat those persons who have had serious exposures to TCDD, and to cooperate in the collection of vital information that is needed for the ongoing human epidemiologic studies.

VETERANS ADMINISTRATION,
Washington, D.C.

Hon. ARLEN SPECTER,
U.S. Senate.
Washington, D.C.

DEAR SENATOR SPECTER: You will recall that I promised you my written answers to some of your questions during my confirmation hearing before the Senate Veterans' Affairs Committee.

Both Administrator Robert Nimmo and I have testified that we are disappointed and frustrated at the slow progress of the Agent Orange investigations and at the limited state of our knowledge about the herbicide's possible health effects. Being a Vietnam combat veteran, I understand the worry and frustration Vietnam veterans feel over these unknown hazards.

The Veterans Administration is totally committed to finding answers to these Agent Orange questions. We are exploring all pos-

---

[4] Dr. Nelson S. Irey, Chairman of the Environmental and Drug Induced Pathology at the Armed Forces Institute of Pathology, presented written testimony at the Senate Veterans' Affairs Committee November 18, 1981, hearing on Agent Orange, including tabulated data on the first 408 cases examined. He stated at the November 19, 1981, VA Advisory Committee meeting that approximately 600 cases had been examined so far although the data from only the first 400 or so had been tabulated.

[5] The VA Department of Medicine and Surgery, Office of Environmental Medicine's December 11, 1981, Weekly Status Report of Herbicide Orange Activities reports that 72,000 Vietnam veterans have received Agent Orange Exams. According to the Office of Environmental Medicine, approximately 40,000 of these have been entered in the Agent Orange Registry.

[6] The VA Department of Medicine and Surgery, Office of Environmental Medicine reported that as of December 1, 1981, 11,404 claims had been filed for injury due to Agent Orange.

sible ways to get quicker and better answers about possible Agent Orange links to adverse health effects on veterans.

Enclosed are my answers to your questions. In the margin I have indicated where the questions appear in the transcript of my Committee hearing. Thank you for the opportunity to send them to you.

Sincerely,

CHARLES T. HAGEL,
Deputy Administrator.

Enclosure.

ANSWERS TO QUESTIONS

Page 48, line 3: When will the so-called Ranch Hand tests be completed?

The epidemiological study being conducted by the Air Force of the Ranch Hand group includes several components or stages. The anticipated dates of completion, we have been told, are as follows: the mortality study will be finished about August 1982; the interviews with the individual participants will be completed by May 1982 and will be reported about July 1982. The completion dates of the initial physical examinations are not yet certain but the results are expected to be available by mid-1983.

The protocol calls for following the study participants for the next twenty years to determine whether Agent Orange produces any long-delayed effects.

Page 48, line 8: When you say [that "we should start seeing some results in the spring of next year"], what do you mean by that?

The mortality study or the interviews may reveal an unexpectedly high incidence of one or more diseases among the 1,200 Ranch Hand veterans as compared to the control pilots who were not in Ranch Hand. If this occurs, these results should be seen by the spring of 1982. It has been emphasized to me that positive results usually appear, if they do, some time before negative results can be demonstrated; that is, we could know that Agent Orange produced some effect earlier than we could say that the herbicide does not have that effect.

Page 49, line 7: And when is the CDC (Centers for Disease Control) study (of birth defects) due to be completed?

The CDC tells us that the birth defects study has begun and the data collection will be finished early in 1983. They will be analyzed and reported by the late fall of that year.

Page 49, line 16: Is it your understanding that at the conclusion of the CDC tests we will be in a position to make a factual determination as to causal connection between Agent Orange and birth defects?

The CDC study may demonstrate that the children fathered by Vietnam veterans have a higher incidence of some certain birth defect or more defects overall than babies in families where the father has not been in Vietnam. If this occurs, it will be possible to conclude that the overall experience in Vietnam had an adverse effect on the veteran's children. It is very unlikely that it will be possible to identify the cause as Agent Orange from this study alone. You will recall that I testified that Agent Orange is only one aspect of the study. As in the Ranch Hand study of effects on the veterans, it will be much more difficult to establish the fact that there is no effect on the children.

Page 50, line 1: Will the Ranch Hand study disclose an answer to the issue of causation on birth defects?

As I said in my testimony, the Ranch Hand study is not set up primarily to determine whether Agent Orange causes birth defects. The pilots will be asked about defects in their children so that the study will collect data that will help answer the question of a causal connection between the father's exposure to the herbicide and defects in his children. The data from this study by themselves are not likely to answer the question.

Page 60, line 17: How long at the outside should Vietnam veterans have to wait on an answer as to whether birth defects are caused [by] exposure to Agent Orange?

Page 60, line 23: Are you meaning by ["when we should know something" about the birth defect data] that we should have a judgment as to whether there is or is not a casual connection between Agent Orange and birth defects?

A positive answer, one that says "Yes, this particular birth defect is caused by the father's exposure to Agent Orange," could appear within two years as the data accumulate from the various studies. It is also possible that a weaker causal connection could be detected many years later in the veteran's grandchildren or great grandchildren. It makes things very difficult for us but true genetic defects may not be detectible until two or more generations after the defect is produced.

Page 61, line 16: Would you provide your best estimate as to when we will be in a position to answer those questions [of the causal connections between Agent Orange and birth defects]?

We are up against the limitations of science here and we may have to seek our answers through a more arbitrary procedure or from a combination of scientific and social sources. As I understand it, the epidemiological studies of Agent Orange will continue to yield information over the next twenty years or so about possible health effects; birth defects, cancer, psychological problems among others. At present, we cannot estimate how long it will take to obtain sufficient evidence to arrive at a sound scientific conclusion.

This means that we are going to have to use all available scientific information whether it is newly acquired or found through literature surveys. We will have to bring to bear good judgment and common sense, together with compassion, in interpreting this information; and we may have to change our opinions as new information appears. Much as we would like to reassure you and my fellow Vietnam veterans that certain health effects cannot be due to Agent Orange and that others definitely are, we are not able to do it. We shall be more and more definite about the health effects as information accumulates; we shall be more certain two years from now than we are today and still more certain ten years from now. In the interval we will have to make our decisions with less scientific certainty.

UNITED STATES-CHILE RELATIONS

Mr. KENNEDY. Mr. President. I am deeply concerned by continuing indications that the Reagan administration intends to develop a closer relationship with the Pinochet military regime in Chile. I continue to oppose efforts to improve or "normalize" relations with this regime because they are neither in the interest of the United States nor in the interest of the people of Chile.

In 1976 Senator Humphrey and I sponsored legislation to prohibit military assistance to Chile. This action was in direct response to the serious violations of basic human rights in Chile—including the arrests and the detentions, often without charge or trial, of thousands of Chileans. "Disappearances," torture, and exile were tools repeatedly used by the military junta to impose its will on the people.

During debate this fall on the 1982–83 foreign assistance authorization bill, the Congress has agreed to new language to govern any U.S. security assistance to Chile. That language stipulates that no aid shall be provided to Chile unless the President certifies that providing such aid is in the national interest, that the Government of Chile is making significant progress on human rights, that the Government of Chile is not aiding or abetting international terrorism, and that Chile is taking appropriate steps to cooperate in bringing to justice by all legal means those Chileans indicted by a U.S. grand jury for the murders of the former Chilean Foreign Minister and Ambassador to the United States, Orlando Letelier, and his American associate, Ronni Karpen Moffitt, in Washington in 1976.

I have pressed throughout this year for a strong congressional response to terrorism and continuing human rights violations by the Pinochet government. I expressed my views most recently in a letter which I sent to the Senate and House conferees meeting to consider the foreign aid bill. I shall ask unanimous consent to have that letter printed in the RECORD following my remarks.

I was pleased that the conferees strengthened the previously approved Senate version—including the Presidential certification of the Letelier-Moffitt issue—and added language to the law requiring the President, in making his determination, to consider Chilean progress both in ending the practices of internal exile and forced expulsion, and allowing those citizens who desire to return to Chile to do so, and in permitting the unimpeded investigation, by internationally recognized commissions on human rights, of alleged violations of internationally recognized human rights.

In October, I questioned the chairman and ranking member of the Senate Foreign Relations Committee, my friends Senators PERCY and PELL, as to the implications of the new conditions on Chile. I stated clearly my view that the situation in Chile had not significantly improved to warrant a change in our Government's relations with the Pinochet regime. I was assured that no aid was presently contemplated, that none would be permitted without a full review of any certification, and several of my colleagues agreed with me that conditions in Chile today do not justify such a certification.

Within 24 hours of Senate action, however, and in the wake of remarks by my distinguished colleague, Senator PERCY, that he was unaware of any intention by the administration to provide military aid to Chile, the administration appeared to begin to prepare the way for such assistance. On October 23, the State Department spokesman, in response to a question, said it was the Department's judgment that "there has been a significant improvement in the human rights situation in Chile since the arms ban was enacted in 1976."

On December 7, the Senate Foreign

Relations Committee held hearings on the confirmation of James Theberge as the new U.S. Ambassador to Chile. During those hearings Senator PERCY asked Mr. Theberge if he thought the President could certify that Chile was not violating internationally recognized standards of human rights. Mr. Theberge, in behalf of the Department, said that "there has been improvement in human rights from 1976 on * * * I cannot say that there have been systematic and gross violations of human rights in Chile"—suggesting that there may be grounds for Presidential certification that the conditions have so improved as to allow a resumption of U.S. aid.

Mr. President, the administration's attitude toward the Pinochet regime is totally inexcusable and unacceptable. It is an attitude of "see no evil, hear no evil" when evil is there to see by all. It is a complete contradiction of the most fundamental beliefs of individual liberty and rights on which this country was founded and for which Americans have fought and died throughout 200 years of our history.

By all independent accounts from widely respected international groups interested in human rights, the human rights situation in Chile has deteriorated during this past year. On November 6, the U.N. Economic and Social Council issued a report entitled "Protection of Human Rights in Chile." This 195-page report documents the continued abuse of human rights in Chile, and I shall ask unanimous consent to include the conclusions of this report in the RECORD following my remarks. If there are any in this Senate who continue to believe we should be associated with the Pinochet regime and its practices, I urge them to read this report, which describes arrests without charges, long detentions, and officially sanctioned torture. The Rapporteur says that he cannot avoid the conclusion that the Chilean authorities are systematically refusing to respect the right of their political opponents to liberty, physical, and moral integrity, and security of person. In describing the situation in Chile in 1981, the report says:

> The Commission on Human Rights reiterated its indignation at the deterioration of the human rights situation in Chile, in particular concerning the alteration of the democratic legal system and its institutions, the continuation of the state of emergency, the increase in the number of detentions often followed by disappearances, banishments and cases of torture, ill-treatment and unexplained deaths, as well as the persecution and intimidation of persons and institutions engaged in trade union and academic activities and the Catholic Church and the restrictions on economic, social and cultural rights, in particular trade unions rights, and right to education and the rights of indigenous populations.

The report concludes as follows:

> Generally speaking, it is not possible to report any improvement in the human rights situation in Chile. The new constitutional and institutional situation has not helped to reduce the scope of the restriction and violations of human rights, or to change the repressive measure directed at ever broader sectors of opinion. None of the appeals by the General Assembly and the Commission on Human Rights has been heard, nor is it possible to report the adoption of any measure conducive to restoring the exercise of human rights. Consequently, the international community should continue to give its attention to the human rights situation in Chile and use whatever means it deems appropriate to ensure the full restoration of those rights.

Mr. President, the Human Rights Report on Chile compiled by the Department of State itself makes many of the same points as the U.N. Economic and Social Council report. Amnesty International has also noted a marked deterioration in the human rights situation in Chile, and Amnesty has expressed its concern about several new developments. Since 1980 there has been widespread use of the practice of "internal exile."

The Government of Chile, through its use of administrative sentences, sends its citizens to remote parts of the country. There has also been a marked rise in the use of forced expulsion. Chileans who have political views at variance with the Pinochet regime are simply escorted to the airport sent abroad and denied the right to return.

Amnesty also has pointed to the increased use of military tribunals where sentences are often more grave than those from civil courts. There are more than 200 political prisoners at present. Further, under a decree issued under the 1980 Constitution, the government can now hold its citizens incommunicado for 20 days—previously it was only 5 days—without charge or explanation to the families. Amnesty notes that those detained report repeatedly acts of torture during this time. That torture is systematic, widespread, and becoming much more sophisticated.

During confirmation hearings on Mr. Theberge, I posed several questions and I shall ask unanimous consent to have those questions and Mr. Theberge's answers printed in the RECORD following the conclusion of my remarks. While Mr. Theberge in his responses may have been technically correct in saying that the administration has not "formally designated Chile as a country whose government engages in a consistent pattern of gross violations of internally recognized human rights," the absence of such a designation does not alter the reality in Chile itself where indeed there are consistent patterns of such abuses.

There are abuses from the past which have not been resolved—most notably, the countless "disappearances" of Chilean citizens and the assassination of Orlando Letelier and Ronni Moffitt and subsequent Chilean coverup of those responsible for this cold-blooded murder on the streets of Washington.

For example, on December 10, International Human Rights Day, the Pinochet government arrested four prominent Chileans. One, German Molina, is secretary-general of the Chilean Human Rights Commission, and head of the commission since the expulsion of its President Jaime Castillo, who the Pinochet government expelled from Chile because of his efforts to protect the rights of the Chilean people.

A second is Pablo Fuenzalida, a member of the commission. They were arrested as they left the commission office following the celebration of the third anniversary of the founding of the Chile Human Rights Commission.

The government is also seeking to arrest Pedro Filipe Ramirez, a former minister, and has arrested Eugenio Diaz Corvalan, a lawyer with the national trade union coordination committee. These people are examples of government action against individuals who are working to improve the human rights situation in Chile.

Mr. Theberge in his hearing said that "disappearances" ceased in 1977. Again he may be technically correct because of the very narrow definition of a "disappearance." In reality the old abuse goes on with a new twist, but the result is the same—victims disappear alive and are found, if at all, dead.

On July 7, a 28-year-old artist, Hugo Rivero Gomez, who through his art has protested the policies of the Chilean military regime, was taken from his home blindfolded and handcuffed by four plainclothesmen. The style is typical of Chilean secret police tactics. The artist's wife reported him missing to the police on July 8, and the following day she was shown a picture of him dead. Technically, he was not "disappeared" because the police accounted for him. But the end was the same—officially sanctioned murder.

These are but a few examples of continued human rights abuses by the present Government of Chile. Mr. President, I believe that any government which systematically commits these abuses and, in the words of the U.N., uses torture as a daily practice cannot be characterized as having made significant progress in human rights and cannot be so certified by the President.

Mr. President, another of the conditions requiring Presidential certification is that the Government of Chile is not aiding and abetting international terrorism. Yet, in the past few days, the FBI has issued a report that implicates the Government of Chile in the production of a deadly nerve gas. I shall ask unanimous consent to include this memorandum in the RECORD at the close of my remarks. The gas was smuggled into this country for possible use by Chilean agents in attempts to assassinate Chilean dissidents in the United States and it was allegedly stored in Chile for possible use against Argentina and Peru.

Mr. President, the government which produces this gas and allegedly kept it for possible use against its neighbors is none other that very government with which the administration now wants improved relations.

It is the same government decried by the U.N. Commission on Human Rights for its human rights violations and its failure to cooperate in legitimate investigations of these violations. It is the same government that arrests its citizens

without charges or trial, and exiles internally and abroad—using the practice of exile to cripple judicial proceedings.

Mr. President, I intend to vote against Mr. Theberge as the new U.S. Ambassador to Chile because I believe that his responses to my questions have failed to show sufficient concern about the human rights violations and terrorist practices of the Pinochet government. I will vote against this nomination because we must speak out clearly and forcefully against the Reagan administration's policy, which in effect condones the oppressive policies of the Pinochet government. When that government listens to the cries of its own people and stops its support for terrorist activities and brings to justice those who have committed such crimes, then and only then will I cast my vote favorable and join in support for improved relations with Chile.

I ask unanimous consent that the material I have referred to be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., December 14, 1981.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR CHUCK: As the Senate/House Conference continues its work on the 1982/82 Foreign Assistance Authorization Bill, I strongly urge the Senate conferees to recede to the House position on U.S. policy toward Chile.

As you remember, during debate on this bill, I made clear that the Senate conditions on military aid and supply were the minimum the Congress should accept, and that it would be much more preferable to maintain existing legislation which prohibits military assistance to Chile due to violations of human rights in that country. The Senate made clear that Chile would not be eligible for military aid unless the President made important determinations on national interest, human rights, and international terrorism. In addition, we called for bringing to justice all those involved in the assassinations of Orlando Letelier and Ronnie Moffitt.

The human rights situation in Chile has seriously deteriorated over the past year. That deterioration is documented in the report of the U.N. Economic and Social Council entitled "Protection of Human Rights in Chile" issued on November 6, 1981. Since then, there have been further reports of arbitrary arrests including four prominent Chileans active in efforts to improve the human rights situation in Chile. One of these is the acting Secretary-General of the Chilean Human Rights Commission, who has assumed this capacity as a result of the Chilean Government's decision to expel Jaime Castillo, the head of the Commission and the defense lawyer for the Letelier family. I am attaching a list of those arrested for use by you and members of the Conference Committee.

In addition, the FBI has just issued a circular implicating the Government of Chile in the production of deadly nerve gas. The gas was smuggled into the United States by one of the persons convicted in the Letelier-Moffitt assassination. Not only is contemplated use of nerve gas in the U.S. abhorrent to all Americans, but other quantities of this gas are reported to exist in Chile for use in the event of hostilities with Argentina or Peru. Such a policy violated international conventions of which Chile is a party, and is one more example of the terrorist policies of its government. I am enclosing a copy of the FBI circular, for use by you and the members of the Conference committee, and the Bureau advises that it has no objection to your use of this report.

Now is not the time to relax U.S. policy toward the Pinochet Government in Chile. I strongly urge you to support maintaining the current legislated prohibition of aid to Chile, or at least strengthening further the Senate conditions on any aid to Chile.

Sincerely,

EDWARD M. KENNEDY.

REPORT OF THE ECONOMIC AND SOCIAL COUNCIL PROTECTION OF HUMAN RIGHTS IN CHILE

VIII. CONCLUDING OBSERVATIONS AND RECOMMENDATIONS

491. Pursuant to General Assembly resolution 35/188 and resolution 9 (XXXVII) of the Commission on Human Rights, the Special Rapporteur has prepared this report on the situation of human rights in Chile, which he has the honour to submit to the General Assembly through the intermediary of the Secretary-General.

492. The mandate assigned to the Special Rapporteur by resolution 11 (XXXV) of the Commission on Human Rights was to study, in accordance with the Commission's instructions in resolution 8 (XXXI) of 27 February 1975, and in co-operation with the Chilean authorities, the human rights situation in Chile. In resolution 21 (XXXVI), the Commission requested the Special Rapporteur to deal also with the problem of missing persons in Chile. Later resolutions by the General Assembly and the Commission on Human Rights extended the mandate given to him under these resolutions.

493. As stated in the introduction to this report, the Chilean authorities refused to have any contact with the Special Rapporteur or to assist him in carrying out his mandate. The Special Rapporteur invited the said authorities to contact him during consultations arranged in Geneva and New York. He also made efforts to ascertain their opinions on certain issues in which he had been asked to intervene because serious violations of human rights had been alleged. No reply has been received, however, to any of the letters sent to the Chilean authorities. As a result the Special Rapporteur has been constrained to draw upon such sources as articles in the Chilean press in order to ascertain the opinions and intentions of the Chilean Government with regard to the issues and the particular human rights he deals with in his report.

494. The Special Rapporteur realizes how important the co-operation of the Chilean authorities is for him to carry out his mandate properly. He believes that the co-operation of the judiciary is particularly important, and for that reason sent a personal letter to the President of the Supreme Court. In his view, no effort should be spared in seeking the co-operation of the Chilean authorities for the purpose of improving the human rights situation in Chile.

495. Before drafting this report, the Special Rapporteur studied a large amount of information from various sources critically and impartially. One of his primary sources was the Chilean press, particularly organs closely reflecting the opinions of the Government, which often allowed him to verify information from other sources. Information passed on by institutions, organizations and groups concerned with defending human rights in Chile also proved highly useful, as did information from non-governmental organizations engaged in the same kind of work at the international level. Numerous personal accounts were gathered from people living in Chile. All this information was painstakingly studied and compared in order to provide the General Assembly with a comprenensive and thorough report on the developments occurring during the period covered.

496. In his report to the Commission on Human Rights at its thirty-seventh session (E/CN.4/1428), the Special Rapporteur remarked, on the subject of the new Constitution approved by plebiscite, that "From the marked preponderance of the military authorities in all the organs of government it can be inferred that the military Government, initially imposed on a provisional emergency basis, has thus acquired stable institutional authority". Referring, in the present report, to the entry into force of the said Constitution and the establishment of the new bodies created thereby, one cannot but endorse that remark and note that the text of the present Constitution fails to respect the principle set forth in article 21 of the Universal Declaration of Human Rights, since the will of the people is not at present the basis of authority. Actually none of the institutions called upon to direct the life of the country in the course of the next eight years will be eletced by the people. On the contrary, it will be the armed forces and the President of the Republic in particular who will impose their will on the various bodies that will be functioning over this period under the rules laid down to govern their establishment and operation.

497. Consideration of the situation in Chile has led the Special Rapporteur to conclude that the country faces no emergency situation which justifies suspension of the exercise of fundamental human rights. Nevertheless, the Government has persisted in restricting the exercise of such rights by prolonging the state of emergency, which has continued without interruption since 1973 and has now been compounded by the "state of risk of internal disturbance" established by the twenty-fourth transitional provision of the Constitution. New edicts have been issued, increasing the penalties for those who contravene measures adopted by the President of the Republic under the powers conferred upon him by the state of emergency. The simultaneous existence of these two states of emergency restricts individual rights in the same way as would the state of siege provided for in case of civil war or domestic unrest, and judicial protection is virtually non-existent, since judges have no means of verifying the merits of measures imposed by the authorities.

498. From the legislative point of view, the combination of two states of emergency has created a more serious situation in Chile than previously existed, given that the executive branch now has discretionary powers which the judiciary is not equipped to monitor and which impinge upon the rights to liberty, physical and moral integrity, and security of person.

499. Wartime military tribunals have also been re-established under new legislation, and their modus operandi provides no guarantee that persons accused of offenses will be tried with the safeguards offered by a regular procedure.

500. The Special Rapporteur notes that the new constitutional provisions and legislative instruments which have entered into force over the last few months also impose restrictions on the exercise of human rights and could be even said to aggravate the previous situation. This new legislation, which authorizes the simultaneous existence of various states of emergency involving serious limitations on individual freedoms and rights, and the fact that courts and procedures intended for use in war time are in operation, are subjects of concern to the Special Rapporteur, who recommends the Gen-

eral Assembly to ask the Chilean Government to abolish them and thus put an end to the states of emergency currently in force in Chile.

501. Having carefully studied the personal accounts submitted to him and the complaints he has received from individuals and bodies involved in defending human rights, the Special Rapporteur cannot avoid the conclusion that the Chilean authorities are systematically refusing to respect the right of their political opponents to liberty, physical and moral integrity, and security of person. What is more, it is not just their political opponents who are currently subject to persecution or violation of these rights, but also people who are opposed to certain measures or aspects of governmental policy, particularly those who defend human rights and criticize human rights violations.

502. People placed under arrest, generally without a warrant being issued or a decree being passed to that effect, are taken to secret places where they are held incommunicado and where, blindfolded, they undergo various physical or moral hardships for periods which have at times exceeded 20 days, the maximum authorized by the twenty-fourth transitional provision of the Constitution. The vast majority of the people thus arrested have not been brought before a judge. Often when they are taken before the courts, the courts immediately decide to release them and dismiss the charges. Other detainees have then been consigned to house arrest for three months by order of the Minister of the Interior (who is not required to justify such action) away from where they normally live, far from their families and normal occupations, in precarious circumstances and subject at times to acts of violence, maltreatment and harassment. Others again have been released after a period in the aforementioned secret places of detention. In all three cases, those concerned have suffered deprivation of liberty and been subjected to detention in secret and to degrading treatment without any legal grounds for their detention since there has been no trial. Many of them, moreover, have been subjected to slander, with the official communiqués put out by the security agencies or the ministry of the Interior accusing them, with neither grounds nor proof, of serious offences.

503. In absolute terms, the number of recorded arrests up to August 1981 has decreased by comparison with the same period in 1980. Nevertheless, it should be noted that the number of individual arrests has risen while there has been a drop in the number of mass arrests because there have been very few unauthorized public meetings. Restrictions on the freedom of association and the risk of arrest or deportation on such grounds have discouraged people from organizing meetings or taking part in public actions or demonstrations.

504. The Special Rapporteur has noted that torture continues to be routinely practiced during the interrogation of some detainees. In that regard it should be pointed out that being detained in a secret place, blindfolded, in complete isolation, subjected to humiliating treatment and deprived of all legal or human protection, seriously affects a detainee's moral integrity and constitutes a form of degrading treatment even when not accompanied by other psychological torture or severe hardship. This type of degrading treatment is being applied to all prisoners by the security agencies. Some people are also exposed to threats to their person or threats to their families, or are placed in situations which break their nerve, or are beaten or subjected to cruel tortures or have drugs injected into them in order to break their will and obtain their total submission. The number of people who have complained of physical or psychological torture in 1981 is a little lower than it was in 1980. However, the practice of torture continues; and, in particular, the material elements for torturing prisoners (secret installations, instruments of torture, specialized staff) still exist; so that this lower figure does not seem to indicate that any decision has been taken to put an end to these deplorable practices. It is possible that many people subjected to torture do not complain of the treatment they have suffered since, as is clear from a number of well-known cases, one of the principal objectives of the security agencies is to break the will of their victims or intimidate them to such an extent that they no longer dare to complain.

505. The Special Rapporteur is concerned at the presence of professional torturers in the institutional structures of society, since this is debasing and degrading for society itself and particularly for government officials who encourage this kind of activity and base their power on it. One example of this degradation is the case of the security agency officials who made use of their power to force two bank employees to seize the money held in the bank where they worked, and then murdered them and got rid of their bodies by blowing them up with powerful explosives.

506. The Special Rapporteur is also concerned at the murders committed by security agencies or anonymous groups, particularly murders of political dissidents hunted down by these agencies. These murders have been committed in circumstances which suggest that they are political crimes or result from abuse of power by senior officials. The Special Rapporteur is particularly concerned by the fact that, in judicial investigations of crimes committed against political dissidents, it is impossible to establish the facts or determine responsibilities; and, when the criminals are identified, the courts seem unable to sentence them to punishments commensurate with the seriousness of the offenses committed, and usually display a surprising tolerance.

507. The Special Rapporteur has noted with particular concern the persecution of certain people, particularly people involved in the protection of human rights. It seems that activities of this kind have been the main reason for the persecution of members of the Catholic Church, or of institutions sponsored by the church, and also of lawyers and doctors who use their professional status to help and protect persecuted persons. The Special Rapporteur therefore recommends to the General Assembly that it should request the Chilean Government to put an end to arbitrary detentions, unlawful solitary confinement of prisoners, physical or psychological pressures, murders for political motives and the persecution of people who do not agree with the opinions, measures or policies of the Government.

508. The security agencies still enjoy exceptional prerogatives and impunity for crimes committed against political dissidents. According to recent decisions by the courts, they have even acquired the right to commit offences punishable by law on the pretext that such licence is essential for safeguarding public order. The total secrecy which surrounds the activities of these agencies makes it impossible for Chileans to discover the location of places of detention or the identity of officials who arrest, interrogate and, in some cases, torture prisoners. The Special Rapporteur does not know to what extent the security agencies are free to act in violation of legal standards and rules, but he believes that these prerogatives—and, even more so, their condonation by the courts—constitute a dangerous precedent which may contribute to the perpetration of political crimes, abuses of authority and other serious offences.

509. The attitude of the judiciary, which does not exercise independently its functions of monitoring the acts of the executive and protecting human rights, is such that the Special Rapporteur can affirm that human rights are not protected in Chile. The judiciary accepts without objection the illegal acts of the security agencies, the existence of secret places of detention and the imposition of punishments by administrative order, without making inquiries as to the justification of these measures and without questioning the refusal of the security agencies, the armed forces and the administrative authorities to comply with its requests for information in cases when fundamental human rights are involved. The fact that the judiciary refuses to transmit applications for habeas corpus, refuses to investigate in good and due form, political crimes in which members of the security agencies are involved, and accepts arguments purporting to justify these crimes and other criminal acts in the name of "national security" requirements, is contrary to the rules and principles affirmed in the international instruments to which Chile is a party.

510. The Special Rapporteur recommends to the General Assembly that it should request the Government of Chile to comply with its international obligations in matters relating to the life, liberty, physical and moral integrity and safety of persons, by ensuring that arrests are always made in public places and in the manner prescribed by law, and that persons arrested are assured of a regular hearing before competent judges, who must have adequate powers to protect the rights of individuals, to monitor the acts of all State officials and to investigate irregularities or offences committed by those officials in the exercise of their functions.

511. On the subject of the situation of persons imprisoned for political reasons, who have this year been transferred to various prisons in the country and are confined together with ordinary law offenders and prisoners, the Special Rapporteur has addressed to the Chilean authorities a letter reminding them that in July 1978 senior officials of the Chilean State, in the presence of the Ad Hoc Working Groups, recognized the right of persons imprisoned for political reasons to be held in premises different from those occupied by ordinary law prisoners, and that they promised the Group to keep the two types of prisoners apart as far as possible. Political prisoners are now being confined in various prisons in the country, in which they appeared to be ill-treated and subjected to frequent and arbitrary punishment.

512. The Special Rapporteur recommends to the General Assembly that it should request the Government of Chile to ensure that persons imprisoned for political reasons are placed in premises separate from those used for other prisoners, and that the ill-treatment and punishment to which some of them are being subjected should be discontinued.

513. The repeated appeals by the international community for a proper investigation of the fate of missing persons have not been heeded by the Government of Chile. Inquiries undertaken by some of the investigating magistrates appointed by the Supreme Court have led to the identification of some of the bodies found in various places; but it has not yet been possible to ascertain the fate of more than 600 persons—arrested by officials and later declared to be missing—whose names appear on the lists presented to the investigating magistrates by the Chilean Bishops. There has also been no punishment of those officials responsible for

crimes leading to the disappearance of certain people, even where those officials have been identified. The robbery at the bank in the Calama area, followed by the murder of two employees of that bank by officials of the security agencies of the region, brought to light the use of methods similar to those used to eliminate political opponents, including certain missing persons whose bodies have been recovered. The real inquiry into the fate of those persons should include a checking of the record of arrests of all the agencies which carry them out, with verification of the names included in the lists of arrested persons and detainees from the month of September 1973 up to the end of 1977, and the questioning of those who were officials in these agencies, and there should be no acceptance of evasive replies or refusals to furnish the information requested in order to establish the truth. Only if the judiciary exercises all the powers attaching to its role with firmness and to the full extent necessary will the question of the fate of the missing persons be cleared up. The Special Rapporteur believes that as long as the judiciary does not fully exercise its functions and does not make public all the results and all the evidence obtained during the inquiries, it will not be possible to find out what has become of the missing persons.

514. During 1981 several individuals were expelled from Chile. They include some well-known Chilean figures who had held posts in preceding governments. None of the individuals expelled was accused of having committed any offence or of having defended violence. They are all persons who have expressed their disagreement with the political course of the Government, in particular with violations of fundamental human rights. Some of the individuals expelled were at the head of organizations for the protection of human rights, and all were obliged to leave the country for having tried to exercise their right to freedom of expression and to address petitions to the authorities. Since the entry into force of the new Constitution, the right of an individual to live in his own country, to move freely, and to enter and leave the country has become subject to further restrictions, since political opponents are being consistently excluded from Chilean territory.

515. Political rights have been suspended in Chile for eight years. Nor is the right to freedom of expression any longer observed, if it goes beyond certain limits of tolerance unilaterally established by the authorities. The new legislative provisions tend to restrict the freedom of the press and in particular to oblige the media to apply a greater degree of self-censorship. Many dissidents have recently been dismissed from the universities. Exclusions are steadily being extended to additional sectors of the social, economic and cultural life of the country, with a clear tendency to impose uniformity of thought and expression in all areas where that is possible.

516. The educational systems remains subject to strict control by the military authorities, and the recent restructuring of the universities seems to be directed mainly towards increasing that control. There is also a continuing tendency to restrict the number of vacant posts available in the universities and to make secondary and higher education more expensive, while lowering the level of education in the primary schools, the only sector that now remains accessible to the majority of the population. The State is steadily reducing the resources allotted to education in general, while maintaining exclusive control over the ideological content of what is taught; thus it provides an education void of any critical sense and totally in line with the views of the authorities. The dismissal of teachers and the expulsion of students who have tried to exercise their rights of freedom of expression, assembly or association are only some of the measures designed to intensify ideological and political control of education. Education in Chile is being geared more and more to the economic system advocated and applied by the authorities, which tends to emphasize social differences while sharpening the differences in the level of instruction.

517. In recent years most of the population of Chile has been obliged to cut down considerably its consumption of essential items, while the better-off minorities have increased their consumption appreciably. The purchasing power of the incomes of the poorest sectors has been brutally reduced in real terms since 1973, apart from a slight adjustment in 1980. Generally speaking, the wages and incomes of the better-off groups have tended to rise, while those of the poorest groups have remained the same or declined. In addition there has been a tendency to eliminate certain workers' rights concerning wages and conditions of work, which makes their life more difficult. The new labour legislation does not refer to the particulars of the labour contract, thus eliminating all protection for workers, who are, moreover, forbidden to join forces outside each enterprise for the purpose of collective bargaining on working conditions, a measure that further weakens the poorest groups, which cannot even count on benefiting from any advantage that they might gain from being more numerous. Nor can they any longer use their right to strike, whose exercise has been regulated by legislation in such a way that the strikes never yield the results hoped for by the workers.

518. The trade-union organizations are encountering obstacles to their free operation, obstacles that also deprive them of any possibility of effective action. The control exercised by the labour department over trade-union management, the weakening of the role of the federations and confederations, which have overcome serious difficulties in establishing and maintaining themselves, the constitutional rules which render many experienced leaders incapable of exercising their trade-union responsibilities, the juridical obstacles to the exercise of the right to association and assembly, and the persecution of trade-union leaders of differing views and of the trade-union organizations—a persecution that takes the form of prosecution, arrests, detention, obligatory residence, and dismissal from or dissolution of trade associations—all these measures constitute serious restrictions of trade-union rights. The Special Rapporteur accordingly notes that the trade-union rights recognized in the international instruments dealing with the subject are not exercised in Chile.

519. Unemployment has fallen slightly in the capital, but 20 per cent of the population of Chile still live in extreme poverty, and the governmental programmes seem to provide no real solution to this tragic problem.

520. The situation of the indigenous population, far from having improved in comparison with what was described in previous reports, has continued to deteriorate. These indigenous communities are now deprived of their common lands, the source of their subsistence and ethnic identity, and find themselves encouraged or obliged to divide them up in accordance with laws and procedures unknown to them which prevent them from defending themselves, because those laws and procedures are not adapted to their cultural situation. Moreover, some communities appear to be on the point of being displaced despite their right to territories which they have occupied for hundreds of years.

521. Generally speaking, it is not possible to report any improvement in the human rights situation in Chile. The new constitutional and institutional situation has not helped to reduce the scope of the restriction and violations of human rights, or to change the repressive measures directed at ever broader sectors of opinion. None of the appeals by the General Assembly and the Commission on Human Rights has been heard, nor is it possible to report the adoption of any measures conducive to restoring the exercise of human rights. Consequently, the international community should continue to give its attention to the human rights situation in Chile and use whatever means it deems appropriate to ensure the full restoration of those rights.

CONFIRMATION HEARINGS ON JAMES THEBERGE AS U.S. AMBASSADOR TO CHILE

(Questions by Senator EDWARD M. KENNEDY)

Mr. KENNEDY. Q: On October 22, 1981, the Senate adopted an amendment to the Foreign Aid Authorization Bill which established as one of the conditions which must be met in any Presidential certification on aid to Chile "that the Government of Chile is not aiding or abetting international terrorism."

Can you tell the Committee whether you believe that the Government of Chile supported acts of terrorism in the past?

Mr. THEBERGE. A: A US Grand Jury indicted three Chileans in connection with the assassinations of Orlando Letelier and Rinni Moffit. In order for that to happen there must have been substantial evidence that the three were involved. On the basis of that evidence we requested their extradition. It was denied by the Chilean Supreme Court, primarily on grounds that plea bargained testimony is not admissible as evidence under Chilean jurisprudence. There have been other allegations of terrorist acts committed by the Chilean Government; but in none of these cases has there been trial and conviction. Within our legal tradition men are presumed innocent until found guilty. I cannot give a categorical "yes" or "no" answer to your question.

Mr. KENNEDY. Q: Let me read from a declassified cable from the FBI dated a week after the assassination of Letelier regarding "Operation Condor." This was an organization of cooperating intelligence services in South America. The cable reads: "A third and most secret phase of 'Operation Condor' involves the formation of special teams from member countries who are to travel anywhere in the world to non-member countries to carry out sanctions up to assassination. . . ." The cable went on to note, "It is not beyond the realm of possibility that the recent assassination of Orlando Letelier in Washington, D.C. may have been carried out as a third phase action of 'Operation Condor.'" Since then, the US Government and, subsequently, a federal grand jury reached the conclusion that the Chilean Government had ordered the assassination. The former head of the Chilean Intelligence Service and two others were indicted for that murder.

Do you have any information as to whether other such international terrorist acts have been carried out by the Chilean Government?

Mr. THEBERGE. A: I am aware of allegations that the Chilean Government was responsible for the death of General Prat and his wife in Buenos Aires in 1974, and for the attack on Bernando Leighton and his wife in Rome in 1975.

Mr. KENNEDY. Q: If such information con-

cerning additional acts was released, what would be your recommendation as to appropriate US actions?

Mr. THEBERGE. A: The United States Government opposes international terrorism. Our relations with any government which engages in such activities would suffer. Clearly, if such activities occurred in the United States, I would recommend and support all appropriate diplomatic actions that contributed to the effective investigation and prosecution of those responsible.

Mr. KENNEDY. Q: Do you agree that there should be a special concern about Chilean agents who come to the US and who violate US law? Would you take steps to prevent such actions (as the Letelier affair) from being taken in the future?

Mr. THEBERGE. A: I am unalterably opposed to the illegal actions of any foreign agents in the United States. If, while Ambassador to Chile, it should come to my knowledge that agents of the Government of Chile might be engaged in actions contrary to our laws, I would take all measures within my power to prevent such actions.

Mr. KENNEDY. Q: Congressional Affairs Liaison of the FBI confirmed to me today (December 7) that the Bureau is advising government agencies including the FAA, in an unclassified memo, that Townley, who is now serving a sentence in relation to the Letelier assassination, obtained nerve gas while he was in Chile and brought that nerve gas into the United States to use in the assassination had that been necessary. I understand that this nerve gas was also produced by Chile to use against Argentina and Peru in case of war.

Are you aware of this? Can you find out for the Committee whether this is accurate and what steps are being taken to determine whether that nerve gas—I believe it is called "sarin"—has been used elsewhere by Chilean intelligence authorities?

Mr. THEBERGE. A: No, I have no knowledge of this report. I do not know whether I, or any government official, can determine the accuracy of this information. As Ambassador, I would, of course, do my best to comply with all requests and instructions from the Department of State.

Mr. KENNEDY. Q: During Senate debate of the Foreign Assistance Authorization Bill, the following provision was adopted: "It is the sense of the Congress that the Government of Chile should take steps to bring to justice by all legal means available in the United States or Chile those indicted by a US Grand Jury in connection with the murders of Orlando Letelier and Ronni Moffit."

Mr. THEBERGE. A: I will faithfully represent, to the best of my ability, the views of the American public, Congress and Executive Branch on this issue to the Chilean Government. The "sense of the Congress" language is one very important manifestation of the concern felt by many Americans regarding the Letelier/Moffitt assassinations. So long as there are legal means available, I will urge the Government of Chile to take all appropriate steps to ensure that those implicated in the assassinations are tried and, if found guilty, punished.

Mr. KENNEDY. Q: Are you familiar with the Chilean Government's recent action related to this case, and specifically the expulsion of the attorney for the Letelier family just prior to his appeal of a military court acquittal in the passport fraud case of Chilean intelligence officers in the United States stemming from the Letelier assassination?

Will you press the Government of Chile to permit Mr. Jaime Castillo to return to Chile?

Mr. THEBERGE. A: Yes. I believe that Mr. Jaime Castillo's return to Chile has been the subject of discussion between our two governments, and I would expect to take this matter up at the earliest feasible moment.

Mr. KENNEDY. Q: The families of Orlando Letelier and Ronnie Moffitt brought civil suits against the Government of Chile. In November 1980, Federal Judge Joyce Hens Green ruled in favor of the families, finding the Government of Chile responsible for the deaths. Judge Green entered a judgement against the Government of Chile for $4.9 million in damages to be paid to Letelier and Moffitt families. The Government of Chile has not paid that judgement.

Are you aware of what steps the US Government has taken to press that this judgement be paid? What are these steps?

Mr. THEBERGE. A: No, I am not aware of what steps the US Government may have taken in this case.

Mr. KENNEDY. Q: Judge Green's opinion states: "Whatever policy options may exist for a foreign country, it has no discretion to perpetuate conduct designed to result in the assassination of an individual or individuals, action that is clearly contrary to the precepts of humanity as recognized in both national and international law."

Do you agree with that view? What will you do to further it in Chile?

Mr. THEBERGE. A: I agree fully with the view expressed by Judge Green. Should circumstances require, I would express clearly and forcefully the position not only of Judge Green, but of the vast majority of the American people.

Mr. KENNEDY. Q: What steps will you tell this Committee that you will take to urge the Government of Chile to pay this final judgment issued by a US Federal Court?

Mr. THEBERGE. A: It is my understanding that this is a civil suit and that the US Government is not directly involved. I do not know what role the U.S. Government can properly carry out. As Ambassador I will be guided by the instructions I receive from the Department of State, and I will carry them out to the best of my ability.

Mr. KENNEDY. Q: What should be the role of an Ambassador in countries where there are serious violations of human rights?

Mr. THEBERGE. A: Human rights are a central aspect of American foreign policy. The role of the American Ambassador, in this regard, is to make sure that host country officials understand the importance of that factor and to report accurately the status of human rights in the country.

Mr. KENNEDY. Q: In response to a question from Senator Percy, you stated your belief that the Administration could provide Congress with the required certification because the Government of Chile is "not systematically and grossly violating human rights." How can you justify such a statement in view of the report just issued by the United Nations (Economic and Social Council) that the Government of Chile continued to refuse to cooperate with the Special Rapporteur and that they had failed to take the concrete measures mentioned in the resolution 21 (XXXV) of 29 November 1980? I refer to the entire report but would note that in point 10 the Commission on Human Rights "reiterated its indignation at the deterioration of the human rights situation in Chile. . . ."

Mr. THEBERGE. A: Neither the previous nor the present administration formally designated Chile as a country whose government engages in a "consistent pattern of gross violations of internationally recognized human rights." There has been significant improvement in the human rights situation in Chile since 1977. There have been no disappearances since October 1977; there has been no indefinite detention without trial since 1976; most political prisoners were amnestied in 1978. These are important advances. This is not to say that all problems have been resolved But Chile is by no means unique in that regard. As Ambasador, I will use appropriate diplomatic means to express the support of the American Government and people for the full restoration of all rights and protections that constitute the core of both the American and Chilean political traditions.

FEDERAL BUREAU OF INVESTIGATION,
Washington, D.C., December 9, 1981.

Guillermo Novo Sampol; Alvin Ross Diaz; Virgilio Pablo Paz Romero; Jose Dionisio Suarez Esquivel; Ignacio Roberto Novo Sampol; Michael Vernon Townley; Juan Manuel Contreras Sepulveda; Armando Fernandez Larios; Pedro Espinosa Bravo; Victims—Orlando Letelier; Ronni Karpen Moffitt; Protection of Foreign Officials—Murder; Explosives and Incendiary Devices; Conspiracy; Obstruction of Justice, Perjury

Eugene M. Propper, the former Chief United States Prosecutor in the Letelier assassination, and author Taylor Branch are collaborating in writing a book detailing the United States investigation of captioned matter, which book is to be published in early 1982.

In connection with extensive research to develop material for their book, Propper and Branch interviewed numerous individuals connected with captioned matter, including former officials of DINA, the Chilean Intelligence Service. They traveled extensively and Branch visited several foreign countries, including Chile. Propper and Branch advised that they secured a number of letters which were sent from the United States by self-admitted DINA agent Michael Vernon Townley to his DINA "cut-out" Gustavo Etchepare in Chile.

According to Propper and Branch, Townley made references in several of his letters to a highly secret DINA undertaking known as "Project Andrea." Propper and Branch advised that in his letters, Townley expressed concern that the United States Government would ascertain details of "Project Andrea," which would be highly embarrassing to the Chilean Government.

Propper and Branch indicated that Townley also expressed apprehension that the United States Government would be able to determine details related to "Project Andrea" through the GallenKamp Company in London, England, and through companies in Miami, Florida, that sold a microwave oven to Townley and rented a number of gas storage cylinders to Townley.

Propper and Branch also indicated that Townley, in his letters, expressed concern that the United States Government would be able to ascertain details concerning "Project Andrea" through an individual in Miami, Florida, identified as Sam McIntoch, who sold Townley unidentified electronic components bearing the brand name "Sierra." Propper and Branch reported that Townley's father, J. Vernon Townley, also assisted his son and Etchepare in liquidating outstanding bills in the respective amounts of 350 pounds sterling, $525.00, $160.00 and $325.00 to the GallenKamp Company, the company which sold the microwave oven to Townley and the company which rented the gas storage cylinders to Townley and to Sam McIntoch.

Propper and Branch noted that Townley also expressed concern in his letters that the Federal Bureau of Investigation would trace payments to the aforementioned companies and McIntoch through a checking account in the name of Prosin Limited at the Southeast First National Bank, Miami, Florida,

which Townley utilized in connection with his official DINA responsibilities.

According to Propper and Branch, "Project Andrea" involved the manufacture of nerve gas by DINA, which was to be utilized against Argentina and Peru in the event of hostilities between these countries and Chile. Propper and Branch advised that Townley, acting as a DINA agent, manufactured and stored a quantity of nerve gas at a laboratory located at Townley's residence in Santiago, Chile, during 1975 and 1976 and utilized chemicals purchased through the GallenKamp Company, the microwave oven and the rented gas cylinders in the process.

Propper and Branch advised that Townley created a substance known as isopropylmethylphosophonofluoridate, a clear liquid organophosphate commonly known as sarin, which vaporizes on being exposed to the atmosphere, producing droplets that enter the body through the skin or lungs to interdict the neurochemistry that permits the respiratory muscles to function.

Propper and Branch advised that Eugenio Berrios, a chemical engineer who was known by his DINA code name "Hermes," worked with Townley and also was involved in a parallel project on behalf of the Chilean Army for the manufacture of the same nerve gas.

Propper and Branch advised that when Townley traveled to the United States in September, 1976, via LAN-Chile on his mission to assassinate Orlando Letelier, he carried a quantity of the nerve gas with him on board the aircraft in his shirt pocket in a Chanel No. 5 perfume atomizer.

Propper and Branch advised that Townley was considering the utilization of this nerve gas to assassinate Letelier, but decided against using this method.

Propper and Branch advised that, according to Townley, Guillermo Novo Sampol and Virgilio Pablo Paz Romero, leaders of the Cuban Nationalist Movement, an anti-Castro terrorist organization, who assisted Townley in the planning and execution of the assassination of Orlando Letelier, were aware of Townley's possession of the nerve gas in the United States and also had witnessed the preparation of the nerve gas at Townley's laboratory at his residence in Santiago, Chile, during the period April, 1976, through June, 1976, when both Novo and Paz visited Townley in Chile.

According to Propper and Branch, the following LAN-Chile personnel assisted Townley and DINA in transporting materials between Chile and the United States: Ronnie Berger, Alejandro Fornes, Eugenio Herrera, Guillermo Neira, Bernardo Lacasia, Ronnie Lowery, Pocho Acevedo, and Jorge Nordenflycht.

Subsequent to the receipt of the above information from Propper and Branch, arrangements were made to have Townley brought to Federal Bureau of Investigation Headquarters from the place of his incarceration in a Federal penitentiary, where he was interviewed by Special Agents of the Federal Bureau of Investigation. Townley confirmed Propper's and Branch's information regarding the manufacture and intended use of the nerve gas by the Chilean Government.

Townley, however, denied that he personally carried the nerve gas with him from Chile to the United States on a LAN-Chile aircraft. Townley claimed to have had the nerve gas sent from Chile to the United States through LAN-Chile flight personnel who were unaware that they were transporting nerve gas. Townley did confirm that the nerve gas was transported to the United States by LAN-Chile flight personnel in a Chanel No. 5 perfume atomizer.

Townley advised that Novo and Paz requested that the Cuban Nationalist Movement be furnished a supply of nerve gas to utilize in their terrorist activities; however, Townley claimed that because of the unstable nature of Novo and Paz and other members of the Cuban Nationalist Movement, he refused their request. Townley advised that he insured that the nerve gas transported to the United States by LAN-Chile flight personnel was returned to Chile to the custody of DINA by the same method.

GIVE THE FIRST LADY A BREAK

Mr. THURMOND. Mr. President, today I would like to pay tribute to the First Lady of this country, Mrs. Ronald Reagan. She is a fine, intelligent woman who is extremely supportive of her husband. It is unfortunate, therefore, that some journalists have been writing unwarranted stories about Mrs. Reagan for some of the things she has said and done.

It particularly disturbs me, Mr. President, that some reporters have written stories unfairly criticizing Mrs. Reagan for attempting to renovate the White House in record time—and without spending a cent of taxpayer money.

In this connection, Mr. President, I ask unanimous consent that an excellent article on Mrs. Reagan that appeared in the November 25, 1981 edition of the Washington Post by freelance journalist Selwa Roosevelt be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GIVE THE FIRST LADY A BREAK

Dear Fellow Presspersons:

Fun's fun, but the pummeling of Nancy Reagan has gone on long enough. The latest attack, by Post columnist Judy Mann (Metro, Nov. 20), rebukes Mrs. Reagan for being only a wife and finds "the trouble with Nancy Reagan's image is Nancy Reagan."

The article prompts me to blow the referee's whistle. When is the press going to give the first lady a break? When are you going to stop expecting her to conform to certain criteria to please the fourth estate—criteria, I might add, that change as frequently as the hemline and seem just as capricious.

How fickle you are and how short your memories. Only yesterday you were making fun of Bess Truman's avoirdupois and Mamie Eisenhower's bangs. You laughed at their dowdy clothes and pedestrian friends.

Along came Jackie Kennedy, and you extolled in her the very things you now deplore in Nancy Reagan. Jackie was quite regal; her clothes and tastes were elegant and expensive and her friends were indeed rich—though slightly more WASPish with slightly older money than the Reagan group.

Except for Mrs. Kennedy's highly praised restoration of the White House, which 20 years later Mrs. Reagan is striving to maintain. I cannot remember any worthy charities that had the benefit of Jackie's patronage. You liked Lady Bird Johnson, and she fared well at your hands thanks to expert advice from Elizabeth Carpenter, her chief of staff, who stroked the press and won it with her efficiency and humor. Mrs. Johnson was justly praised for her "beautification" project, and no one objected when her zillionaire friends gave tax-deductible gifts to help it along. Nor did the press take her to task for primping up the Mall while folks were suffering in the ghetto. And although Mrs. Johnson was one of the richest first ladies in history, no one ever asked what she paid for her clothes or what she gave to charity.

You maligned poor Pat Nixon for being so determinedly middle-class. She was torn to pieces by the buzzards converging over the dead presidency of her husband, but she bore her anguish with great dignity despite the antipathy and heartlessness of the press.

Candid Betty Ford you liked for her gutsy battle with cancer and because she was an outspoken defender of the ERA and other pet projects of yours. She was good copy, but she shocked the less sophisticated hinterland with remarks often considered inappropriate for a first lady.

And finally, hark back to Rosalynn Carter, who only recently departed our fair city. You couldn't wait to pounce the minute she overstepped her "wifely" role. Remember the "Iron Magnolia"—the lady who had the temerity to sit in on Cabinet meetings and visit foreign heads of state to discuss substantive matters? Remember how you made fun of her weekly lunches with husband Jimmy to tell him how to run the country?

Let's face it. Most first ladies can't win, whatever they do. But in the interests of fair play and to help understand Nancy Reagan, I would like to venture some observations about this first lady especially vis-a-vis the press:

Mrs. Reagan is shy, sensitive and vulnerable. She is so reserved and private that to save her soul (and her image!) she cannot expound to strange journalists her innermost thoughts, her feelings toward those she loves, her philosophy of life, etc.

She cannot dissemble. She is so honest she cannot "stage" events to make her look good. She has tried, but is not adroit at turning aside hurtful remarks with a quip. She never tries to control or manipulate interviewers so that they concentrate on subjects she wants to discuss. When you ask a question, she often answers hesitatingly and briefly. (Hence, not an exciting story; hence annoyance and chagrin on the part of the journalist.)

She feels apprehensive and defensive with the press. She is hurt and bewildered by their hostility. And it's no wonder, when even a kind gesture such as offering chocolates to the reporters on her campaign plane was ridiculed in a column by an arrogant young journalist.

She is a real lady and a loyal friend. Those who have had the pleasure of meeting her in small groups find her warm and charming, especially when she is not on trial by the press. She is fun, relaxed, an excellent conversationalist, and interested in a wide range of subjects. She is also eager to listen and learn. She is not about to abandon her wealthier friends when they become politically inconvenient.

She has no doubt about her priorities. Her life is dedicated to Ronald Reagan .She adores him, and her greatest joy comes from being his wife. She feels this even more keenly since the assassination attempt. Most Americans applaud her for this devotion and love, but the carping comes from younger women, especially in the press, who simply cannot identify with her and do not understand her priorities.

The column in The Post criticizes her for not being "substantively" involved in various charities and causes. While that is not true, it is also irrelevant. By simply focusing attention on and illuminating a problem or a need, Mrs. Reagan gives the most effective help a first lady can.

On the matter of priorities, Mrs. Reagan uld well childe the press. Instead of writ- reams about her clothes and hairdressers, might report more fully her visits to drug nters, hospitals and other institutions. (For ample, the youngsters she talked with at ug treatment centers felt that marijuana ould not be legalized. All indicated that eir addiction to hard drugs began with arijuana. The press gave this scant atten- on.)

Mrs. Reagan has been first lady less than a ear. In this time she has suffered the shock an assassination attempt on the president; e has renovated the White House in record me without spending a cent of public nds; she has taken the time to get ac- uainted with Washington and become a art of the community, she is learning about s institutions and discovering where she an be of help. She has been more accessible han almost any first lady in recent memory.

One need not agree with her viewpoints on verything. (I, for one, wish she would un- erstand the importance of keeping abortion afe and legal.) But one has to at least grant er the right—indeed the duty—of being rue to herself and to chart her course as irst lady in keeping with her personality, her unbringing and her own interests.

A TRIBUTE TO MRS. MATTIE TALMADGE OF McRAE, GA.

Mr. THURMOND. Mr. President, I wish to take this opportunity to pay tribute to the late Mrs. Mattie "Miss Mit" Talmadge, who passed away at the age of almost 101 on October 20, 1981. She was the wife of the former Georgia Gov. Eugene Talmadge and mother of Herman Talmadge, former Georgia Governor and U.S. Senator.

To her beloved children, Herman Talmadge and Mrs. Scott Shephard, family, and friends I again extend my deepest sympathy.

"Miss Mit," as she was affectionately known, played a significant role in the history of Georgia politics. In fact, some refer to her as the "matriarch" of a "20th century political dynasty." She was the only woman in the history of the State to serve three times as the first lady and only the second woman in Georgia history whose husband and son both were Governor. One of the reasons for her husband's and son's successes may be largely attributed to her influence.

The death of "Miss Mit" is not only a loss felt by Georgia, but also by South Carolina. Born in Edgefield, S.C., she spent most of her childhood days in the Palmetto State before moving to Georgia, where she would later become one of the leading figures in that State's political arena.

Her son, former Senator Herman Talmadge, may have best summarized the qualities of his mother when he said, "Four simple words describe Mama. They are character, courage, work, and thrift in that order."

I feel a sense of personal loss with the passing of this outstanding lady because she was related to me. She and my father, John William Thurmond, were first cousins—two great people who set an exemplary life of hard work, strong moral character, and service to their fellow man. I knew "Miss Mit" as a practical woman who consistently utilized common sense in every decision that she made in life. In the complex world of politics, she always maintained a simple philosophy of integrity, thrift, and compassion that greatly contributed to her success, as well as the successes of her husband and son.

As a committed Christian, she loved her God and lived an exemplary life; as a first lady, she loved her State and its citizens and served them well; as a farmer, she loved the land and was successful in her farming operations.

In every facet for her life, she walked a productive and fruitful path, making friends wherever she went. "Miss Mit" was, without question, a lady, a leader, and a legend.

Since these brief words cannot justly depict the greatness of this remarkable woman, I wish to share two articles from the Atlanta Constitution, excerpts from an article in the Atlanta Journal, and an article from the Savannah Morning News that more fully describe her life and contributions.

Mr. President, in order to share these news stories with my colleagues, I ask unanimous consent that they be printed in the RECORD.

There being no objection, the article were ordered to be printed in the RECORD, as follows:

[From the Atlanta Constitution, Oct. 21, 1981]

GEORGIA MATRIARCH (MISS MIT) IS DEAD

(By Brenda Mooney)

Mattie "Miss Mit" Talmadge, the matriarch of Georgia's most prominent 20th century political dynasty, died Tuesday of heart failure. She was 100.

Mrs. Talmadge, who had been hospitalized in McRae since Sept. 27, is the only woman to have served three times as the state's first lady and only the second woman in Georgia history whose husband and son both were governor.

Her husband, Eugene Talmadge, was elected governor four times but died before taking office for a record fourth term. Her son, Herman Talmadge, also had a term as governor and served 24 years as a U.S. Senator before being defeated for re-election last year.

Funeral services are scheduled for Thursday at the First Baptist Church in McRae.

One of only two Georgia governor's wives immortalized in bronze on the state Capitol grounds, Miss Mit is depicted on a plaque attached to a statue of her husband. On that plaque, she is being embraced by Eugene Talmadge at the edge of a cattle field.

When she died, Mrs. Talmadge was just a few weeks away from her 101st birthday on Nov. 7. She had not officially retired until age 98, when she gave up supervision of her farm at the sprawling Sugar Creek plantation in Telfair County.

Asked once to describe his mother, Herman Talmadge said, "She is second only to God."

A few years later, he put it another way: "Four simple words describe Mama. They are character, courage, work and thrift in that order.

"There is nothing frivolous or artificial about her. I've never known her to play bridge, go to a dance, drink anything stronger than coffee or take so much as an aspirin tablet."

On election day 1980, she was brought by helicopter from a Jacksonville, Fla., hospital to her home so she could vote for her son.

Her retort was quick and simple when asked on the eve of her 100th birthday what she thought of his loss. "I don't think about it," she said, sitting in her parlor. "It don't bother me a bit."

Mrs. Talmadge then said she planned to spend her second century "doing the same thing, I reckon. Farm."

Born in Edgefield County, S.C., as Mattie Thurmond, Mrs. Talmadge came to Georgia as a young girl and was a railroad telegraph operator at Ailey, Ga., when she was 16.

At age 18, she married John Peterson, who died later of typhoid fever. While living with her mother-in-law in Ailey, Miss Mit met Eugene Talmadge, a young lawyer boarding in Mrs. Peterson's home.

"Eugene and I used to go horseback riding together," she recounted once. "Then he started asking me to parties in Ailey with him. I wouldn't go, so he stayed home to be with me."

They were married in 1909 and soon afterward moved to Telfair County, which became their permanent home.

It was Eugene who gave her the nickname by which she was known throughout the state.

"My first name was Mattie," she one explained. "But he started calling me Miss Mit. Then everybody took it up. I've always spelled my nickname with one 't' but lots of people write it with two 't's.' It really doesn't matter to me how it's spelled," she said.

She had one son by her first marriage and three children by her second, Herman, Mrs. W. H. Kimbrough of Atlanta and Mrs. Charles Smyly of Eastman.

Although longtime South Carolina Sen. Strom Thurmond is her first cousin and she played cards as a child with the populist leader "Pitchfork" Ben Tillman, Mrs. Talmadge initially was opposed to her husband's foray into politics.

"When Gene first talked about running for commissioner of agriculture, I was against it," she recalled one time. "But after I knew he was determined to do it, I helped him all I could."

According to her son, Herman, Mrs. Talmadge "was never too busy to help (Eugene Talmadge) in his work. She encouraged him in all his undertakings and was unquestionably obedient to his decisions. She was completely loyal to him in victory and adversity."

Eugene Talmadge was commissioner of agriculture from 1927 to 1933. He served three two-year terms as governor after that—from 1933–1937 and again from 1941–1943—and was elected to a fourth term but died before taking office.

The elder Talmadge's death touched off Georgia's famous "three governors" battle and led eventually to son Herman's election to the office in a 1948 special election. Herman served as governor until 1955.

From 1933 until 1975, Mrs. Talmadge was a fixture at state gubernatorial inaugurations. She often appeared in a blue outfit, to match her blue-gray eyes, and what society columnists of the time called "pert little hats."

But while she went along as the men in her life made politics their career, Miss Mit kept farming as her first concern. When she and her husband moved to Atlanta and into the governor's mansion, she took a cow and some chickens with her and allowed them to graze on the front lawn.

Years later, while flying over miles and miles of trees in Virginia, she commented, "I don't see how folks make a living here with no place to grow turnip greens."

On Tuesday, Gov. George Busbee lamented her death, saying, "I long have been an ad-

mirer of Miss Mit as a woman of spunk and resourcefulness. She was a charming and witty first lady who carried out her duties as wife, homemaker and mother and public figure with considerable grace."

[From the Atlanta Constitution, Oct. 23, 1981]

HATING TO THINK (MISS MIT) IS GONE

(By Celestine Sibley)

The death of "Miss Mit" Talmadge last Tuesday was a blow to hundreds of older Georgians who knew her in her halcyon days as matriarch of the state's most powerful political family.

It also brought a touch of sadness to those of us who knew her in a peripheral way—from covering the activities of her husband and son, from seeing her at inaugurations and election night shindigs, from interviewing her from time to time. I think that tremendous strength and self-reliance, that certainty which was Miss Mit's is going to be missed by the state at large.

Miss Mit is the type of Southern woman I think of when I rise up to defend the sex against those who would depict females of our region as weak and vacillating idiots. She knew who she was—a situation which seems to be increasingly rare, if you believe what you read nowadays. She was steady and assured and like an old Mississippi woman I have heard of, could proudly say, "I kivver the ground I stand on!"

All of us have our favorite memories of Miss Mit and sometimes when we get together we talk about her humor, her devotion to her family and to the land, her wondrous adventures in farming. She was my introduction to the feminine side of Georgia politicking. I had never covered a political race until I was sent out into the hustings with her husband, Eugene Talmadge, and his opponent, young James V. Carmichael of Marietta. The paper was supporting Carmichael editorially and there was a good deal of bitterness in "Ol Gene's" heart against our editor, Ralph McGill, with vitriolic and sometimes very funny attacks in every speech.

But Miss Mit didn't hate anybody. I remember her introducing me to her daughter Margaret and saying gently, "She works for The Constitution but she doesn't have anything to do with them mean things they're saying about your father." I didn't but only a savvy politician like Miss Mit would know it. She taught me then and later that good politicians haven't time to hold grudges or to nurture petty grievances. They don't get their feelings hurt or sulk.

On several occasions I visited Miss Mit at Sugar Creek farm and there was no more gracious hostess. She had an instinct for hospitality and if, after a hard day of overseeing the work in a field, she had no company meal on hand it didn't matter a whit. "Come on in and eat some collard greens with me," she would say.

Just before her husband died he was confined to a hospital in Jacksonville and I was sent down to see him. He wasn't allowed to have company, my newspaper friends in Jacksonville told me. No interviews allowed. But Miss Mit, who sat in the little waiting area outside his door, checking on him from time to time, knew that a newspaper reporter has to have a story. She knew I would probably have to hang around until I got one and she also knew that I had a sick baby at home.

So she tried to think of things I could use. I remember her bright blue gaze on the distant horizon as she racked her brain for medical facts and little details which might help me. The doctor had put Ol' Gene on goat's milk, she told me, and made a humorous story of her efforts to find goat's milk in a modern city. The trouble was that the story I was seeking was what was going to happen to the governor's office with a very-sick governor-elect taking over. Miss Mit didn't know but she and a nurse, a big formidable iron curtain of a woman, agreed to take some questions I jotted down into the old governor and to see if he would answer them for me.

He did better than that. He told them to bring me into the room and he answered the questions in person, easily, readily, finishing, "Now you get out of here and go home to your sick baby." Miss Mit had told him, and no doubt prevailed upon him to see me. She was not only a strong woman but a kind woman and I hate thinking she's gone from Telfair county and Sugar Creek farm forever.

[From the Atlanta Journal, Oct. 21, 1981]

MISS MIT, TALMADGE MATRIARCH, DIES

(By Journal Staff Writers)

McRAE, GA.—Mattie Thurmond Talmadge, mother of Georgia's former senior senator and widow of one of the state's most colorful governors, died Tuesday at the Telfair County Hospital.

"Miss Mit," as she was popularly known for most of her life, was 17 days shy of her 101st birthday. The cause of death was listed as congestive heart failure.

She is survived by a son, former Sen. Herman Talmadge, and a daughter, Mrs. Scott Shepherd of McRae, who was at her bedside when she died.

The funeral will be Thursday at the McRae Baptist Church.

"I long have been an admirer of 'Miss Mit as a woman of spunk and resourcefulness,' Gov. George Busbee said Tuesday. "She was a charming and witty first lady who carried out her duties as wife, homemaker and public figure with considerable grace. Mrs. Talmadge was a strong and positive influence on all who knew her.

"Her love for the land and her home state will long be remembered. Mary Beth joins me in extending heartfelt sympathy to Sen. Talmadge and other members of the family. All who were fortunate enough to know Mrs. Talmadge will miss her." The death of "Miss Mit" at 1:40 p.m. Tuesday erased one of Georgia's last links to the legendary days of the old Talmadge regime, when three-term governor Eugene Talmadge held the reins of power as tightly as he gripped his red suspenders.

As the mother of Herman Talmadge, the former railroad dispatcher had held on to the quiet political power that first came to her when her husband was inaugurated as governor in 1933.

But she seldom exercised it, preferring instead the life of an industrious country lady at Sugar Creek, the sprawling farm that she had operated 140 miles south of Atlanta since 1937.

Born in Edgefield, S.C., on Nov. 7, 1880, she was christened Mattie by her father, Jasper Thurmond.

That soon became "Miss Mit," (often spelled with two t's though she preferred only one).

At 16, she went to Ailey, Ga., where a brother-in-law was a railroad agent and knew Morse code. Soon, she picked up the system of dots and dashes and worked as a dispatcher for more than a decade.

Her marriage to John A. Peterson of Ailey ended with his death in 1906, when their son, John Jr., was 3 months old.

After a horse-riding courtship, she married Ailey lawyer Eugene Talmadge in 1909. It was the beginning of what armchair historians called "the Talmadge clan."

She at first opposed "ol' Gene's" entry into politics.

But his powers of persuasion, soon to be demonstrated in Capitol cloakrooms and on stumping tours across the state, won her over to his view.

Besides, she said, "he was the best vote-getter in the family."

Ironically, it was Eugene Talmadge's departure for Atlanta to become commissioner of agriculture in 1927 that forced his wife into the farming business.

"He left me with the children and the farm," she recalled later, "and I simply had to learn how to run the farm."

Her business approach was as straitlaced as her Baptist beliefs.

"Mamma has always taken life seriously," her son Herman once said, "She regards it as a matter of survival, and views every problem and challenge in life in terms of fundamental values."

Despite the attraction of Atlanta during her husband's first two terms as governor from 1933 to 1937, the state's first lady preferred to remain at home, managing the farm.

Through her efforts, the farm became a plantation, with a 12-room, five-bath colonial mansion as its headquarters.

The house, built toward the end of the Depression, cost $100,000. Most of the money came from her earnings as a cotton farmer.

She believed in staying at home "like a woman should be." But, a farm worker said, "she runs the farm better than a lot of men."

Like the farm, the family's political fortunes grew.

If a Democratic nomination was tantamount to election in those one-party days, a good word from "Ol' Gene" was tantamount in some quarters to the nomination itself.

And young "Hummin" (as the family pronounced his name) seemed sure to follow in his father's footsteps with equal success.

As his mother put it, "Once a Talmadge man, always a Talmadge man." There were plenty of Talmadge men around.

Life in the old governor's mansion on The Prado in Ansley Park was a curious mixture of the simple and the sophisticated. The Talmadges kept a cow in the barn and grazed her on the front yard—a symbol of Georgia's almost solidly agricultural economy.

In a slightly more urban touch, the first couple had the mansion's tennis courts resurfaced, like many modern suburbanites, and battled wild onions on the lawn.

Often they could be seen shortly after dawn clip-clopping their way through Piedmont Park on two of the three horses they kept at the mansion.

Their presence drew jammed crowds to the rallies staged by Gene in the wool hat areas outside Atlanta, rural sections he loved best.

The crowds ate "half a mile of barbecue" and listened to three-hour speeches.

And they welcomed the bright-voiced, braid-haired "Miss Mit" with the same enthusiasm that marked their Wednesday afternoons off and a trip to town.

The campaign forays often left the Talmadge couple divided. Gene harangued the audience—sometimes 50,000 strong—from a makeshift podium. His wife, meanwhile, sauntered through the crowd.

Candidates for lesser offices sought her out.

Patronage seekers shook her hand.

She worked actively as a Democratic state committeewoman, attended the party's national conventions and showed up at more sessions of the Southern Governors' Conference than any single governor could.

By any standard, Miss Mit was a power to be reckoned with. At one point, she was mentioned as a possible successor to Gene.

But her husband's death in 1946, shortly after his election to a fourth term, curtailed her political involvement.

"Hummin told me not to politick for nobody but him," she explained.

[From the Savannah Morning News, Oct. 21, 1981]

MISS MIT TALMADGE, CLAN MATRIARCH, DIES

McRAE.—Mattie "Miss Mit" Talmadge, whose husband was elected governor of Georgia four times and whose son was a governor and U.S. senator, died Tuesday of heart failure at the age of 100.

The matriarch of one of Georgia's most famous political clans, "Miss Mit" had been hospitalized at Telfair County Hospital in failing health since Sept. 27.

Mrs. Talmadge was the widow of Gov. Eugene Talmadge, who died in 1946 before taking office for a record fourth term, and the mother of Herman Talmadge, who also served in the Georgia governor's office and then was elected four times to the U.S. Senate.

"I long have been an admirer of 'Miss Mit' as a woman of spunk and resourcefulness," Gov. George Busbee said Tuesday. "She was a charming and witty first lady who carried out her duties as wife, homemaker and mother and public figure with considerable grace."

He added, "Mrs. Talmadge was a strong and positive influence on all who knew her. Her love for the land and her home state will long be remembered."

Known as a farm-woman with a zest for Georgia politics, "Miss Mit" once was described as equally at home in a state ballroom and a tobacco field.

She lived in the Talmadge home on Sugar Creek planation near here.

She devoted much of her energy to managing 800 acres of farmland on the plantation, raising cattle, hogs and chicken and food crops.

"Miss Mit" took a milk cow with her to the governor's mansion when her husband was there, said Scott Shepherd, husband of Mrs. Talmadge's daughter, Margaret.

"She's always had a milk cow, and when she went to Atlanta, it grazed on the lawn," he said.

Her husband gave her the nickname by which she was known statewide.

"My first name was Mattie," she once explained. "But he started calling me Miss Mit. Then everybody took it up."

"Miss Mit" at first didn't want her husband to get into politics.

"When Gene first talked about running for commissioner of agriculture, I was against it," she recalled. "But after I knew he was determined to do it, I helped him all I could."

AGENDA FOR PROGRESS

Mr. CANNON. Mr. President, I have spent much time and given much thought seeking to understand the rationale underlying the OMB's determination to reduce important programs of NASA and, in particular, those identified as aeronautical systems development programs. Toward that end someone recently suggested that I review a study, published some time ago by the Heritage Foundation, from which to obtain an independent viewpoint which might answer some of my questions. Pressed for time, as most of us have been in the past few weeks, I requested the most experienced aeronautics expert on the staff of our Subcommittee on Science, Technology and Space to review and comment on the study in question.

Dr. Smick, who responded to that request, was so disturbed by the thrust of that study as it applies to aeronautics that his comment developed into a treatise on the subject, which I believe will be of interest and value to many. So I take this occasion to request its inclusion with this statement.

It would probably be helpful to any readers, unfamiliar with his background, to summarize it briefly so that the breadth and relevance of his experience would be recognized. Dr. Smick studied physics at Yale and Stanford where he received his B.A., and Ph. D. degrees respectively. He supplemented that education with study of aeronautical engineering at Purdue. After 5 years of military service in the Air Force he spent 25 years in the airline industry divided between TWA and American Airlines.

During that period he at various times headed those companies' engineering, flight test, quality control, and maintenance departments. He also headed TWA's initial commercial diversification program and served as a staff vice president in TWA's marketing department. His comment echoes from another perspective many of the concerns and viewpoints I have expressed in several statements made on this floor during this session of the Congress.

Mr. President, I ask unanimous consent that the comments of Dr. Smick of the committee staff be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COMMENTARY ON "AGENDA FOR PROGRESS"

(By A. E. Smick)

Chapter 3, entitled General Science, Space and Technology of the "Agenda for Progress," a study published by the Heritage Foundation, covers a spectrum of inter-related issues dealing with tangible as well as imponderable human benefits of scientific research and technology development. This chapter treats with industry, government and institutional roles therein. It categorizes and delineates various aspects of research and development and the variance of government and industry roles in those categories. It considers the role of high energy physics in sub-atomic and interstellar research. It discourses on elusive and far ranging economic and marketing issues. It analyzes the sources and deployment of funds expended in scientific research and technology development. It contemplates new international and domestic institutional structures for future guidance of all the world's scientific efforts.

Remarkably, the accompanying disclaimer indicates that the study and its views are not a product of the Heritage Foundation but entirely those of its single author. This suggests an awesome range of knowledge and wisdom on the part of one modern day scholar that may rightly topple the image of Solomon in the minds of many. In commenting on this study, I (for one) would prefer to limit my range to matters on which my knowledge and experience might justify submittal of relevant recommendations to decisionmakers. I will address only aeronautical research and technology development as treated (others will say mistreated) in the Agenda for Progress. This treatment will include historical and philosophical generalities as well as critical specific issues of the present Federal budget cycle.

Three score and seven years ago, a number of leaders in our nation, the undisputed birthplace of powered flight, were dismayed by the early disclosures of World War I that every major European contestant in that war had developed aircraft superior to those in the U.S. With foresight and wisdom, sadly eluding certain present day scholars and budget planners, Congress thereupon established the National Advisory Committee on Aeronautics—NACA. It constructed aeronautics and propulsion laboratories and research centers staffed with creative engineers and scientists; it supported and stimulated related university research; it developed enduring cooperative links with an emerging industry; it supported joint industry-government research and technology development programs in aerodynamics and propulsion. To what end?

Within the first decade of NACA's leadership and support of the Nation's aeronautics developments, its aviation pioneers set record after record with diverse flight firsts, capped by Lindberg's solo crossing of the Atlantic. Artifacts of these pioneering achievements are on display at our National Aeronautics and Space Museum where they stimulate the spirit and imagination of millions visiting the museum from countries all over the world.

Within the second decade of aviation progress supported by NACA, our industry developed commercial aviation products and airline services that became the foundation for its future worldwide predominance in the supply of such commercial products and services.

Early in the third decade of aviation progress supported by NACA came the test of World War II. The combination of an aviation industrial base and a technological base rooted in NACA programs enabled production of a range and quantity of military aircraft which had much to do with sparing western civilization the millennium of horror envisaged by a determined egomaniac. This responsiveness of industry to military needs accentuated the wisdom of an independent agency whose technology development and industry links were at the root of the synergism which permitted then, as it does now, the rapid adaptability of that technology for either civil or defense needs.

The fourth decade of progress under NACA saw the aviation industry's potential for worldwide leadership in civil aviation come to fruition. Its newly developed jet transports rapidly became the flagships of every international airline in the free world. The speed, safety, reliability, and comfort of these aircraft brought international travel to households that had never left their hometowns. It provided to many people on a then relatively peaceful planet a renewed hope (forlorn, as it turns out) that international travel and personal communication between peoples involved in commerce, recreation, the arts and sciences. plus many international institutions would help achieve permanent peace in the world.

In that decade a new challenge—the conquest of space travel and exploration—was encountered, this time by developments in our least friendly neighbor on this planet. Recognizing (as who but the uninformed would not) that the results of four decades of progress in earthbound aviation supported by NACA proved that the Nation had in place a model for meeting this new challenge in space science, Congress established the National Aeronautics and Space Administration—NASA. In so doing it reaffirmed and extended the agency's role to encompass space as well as aeronautics. It authorized continuation of the productive collaboration between government, industry, academia, and independent research institutions in a wide range of programs all coordinated, directed and largely funded by NASA.

In the ensuing fifth and sixth decades, the greater emphasis on space science and exploration led to the successful Apollo program, interplanetary scientific discoveries, development of commercial satellite communications, mapping and data gathering by satellite over remote land areas of the world, oceanographic and atmospheric data gathering by satellite, and the beginnings of mankind's first space transportation capability.

In the meantime under continued but cur-

tailed NASA support for aeronautics research and development, the aviation industry's technological leadership achieved a new dimension of importance to the national economy. In 1980, aviation exports achieved a net contribution to the U.S. balance of trade of about $13 billion—itself equivalent to over 400,000 jobs. Gross manufacturing and airline revenues were nearly $100 billion which, at very nominal profit levels, would equate to $2–3 billion in tax revenues to the national treasury. Over a million people with a wide range of scientific, technical, marketing and production skills enjoyed full-time employment in the industry. A quarter of a billion passengers were carried by the certificated trunk and regional carriers in the U.S. without a single fatality.

Now, with desperation displacing reason in its quest for needed reductions in Federal spending, the OMB proposes to eliminate NASA's aeronautical systems development programs and to further curtail its technology base. Untimely support for this errant notion comes forth in the Heritage Foundation's published study entitled an "Agenda for Progress." What a remarkably inappropriate title that is! Its immediate implications are either, (a) that the NACA/NASA record just reviewed does not constitute progress, or, (b) that the industry has matured at a self-sustaining plateau with limited new technological challenges and opportunities, or (c) that displacing the NASA aeronautical roles of the past with some vaguely conceived new "institutional innovation" will indeed achieve progress previously lacking or too costly to sustain. Let me address these implications in that order.

(a) This is so patently preposterous that it needs no further discussion and should be dismissed by paraphrasing a simple prayer "forgive them Lord, for they know not what they say."

(b) This is a serious conclusion that thoughtful but inadequately informed people may come to. It is a premise which OMB appears to have based its budget planning upon. As such it merits substantial analysis and discussion.

First, I will touch on the technological, challenges, not with encyclopedic thoroughness, which I am ill equipped to provide, but sufficiently to illustrate the needs. The first and foremost of these is technology development for energy efficiency. Regardless of any temporary complacency attributable to today's world oil glut, an adequate supply of petroleum fuel for aviation needs—civil and military—remains as a relentless threat to the future of all aviation activities. NASA's aircraft energy efficiency programs of the past few years have achieved rewarding improvements. They have also indicated abundant opportunities for greater economies requiring further advanced technology development to achieve them. A few that are under way, or waiting in the wings, so to speak, which would be curtailed by the proposals of the OMB are described below.

1. Graphite Composite Materials For Large Aircraft Primary Structure:

Those familiar with airplane design recognize that any new design concept originates with and rests on the wing. At present a program, supported by NASA, is developing and testing applications of this structural material to secondary and lightly loaded components of the primary structure. That program, no matter how promising its results, will not permit any large aircraft manufacturer to risk design of a new large transport such as would be necessary to gain the major energy efficiency advantage of this advanced material technology. A major program directed toward wing construction of composite materials must first be successfully completed. Research is needed to disclose and develop full understanding of the physical and chemical nature of the bonding between the carbon filaments and its matrix, positive knowledge as to how that bonding may change with time, with exposure to fuel, water ingestion, lightning strikes or physical injury during service.

2. Advanced Turboprop Technology Development:

Research in recent years has established that turboprop design can now be expected to provide about 15 percent improvement over advanced turbofan engines in passenger seat-mile fuel efficiency at cruising speeds typical of medium-range turbofan transports. Intensified and accelerated program support is needed in the area of propeller design, engine and gear box design, vibration and acoustics research and test, plus selection and modification of an existing airframe for full-scale flight demonstration and test. Such an effort would advance by several years our Nation's technology readiness and industry's ability to undertake product development for extensive world markets.

3. Airplane Active Control Technology:

For decades civil aircraft have accepted a severe drag penalty in empennage design to provide natural stability in pitch—that is, to offset the unstable couple provided by the upward lift force of the wing and the downward force represented by the weight. Modern computer and electronics technology applied to active control of horizontal tail surfaces can substantially reduce the size, weight, and drag contribution of the empenage and permit more efficient wing location and performance. This offers performance potential for military aircraft and energy savings, particularly for large transports. It is technology which foreign competition is pursuing intensely.

Those are representative near-term technological challenges forced by a national need for fuel conservation. It is representative of any situation in which a public goal, which can in our society be fulfilled only by industry, may present too great a financial risk for industry to undertake voluntarily. The public options in those situations are to forego the benefits, or mandate by law and regulation industry's achievement (as with the auto fuel economy program), or support industry by Federal funding of the high risk technology development and demonstration which thereafter makes possible industry's far larger investment and risk taking in product design, development, testing, production and marketing.

Looking further into the technological challenges of the future looms the ultimate prospect of zero availability of petroleum based fuel. One alternative to the environmentally unattractive solution based upon use of coal and shale derivatives is the use of liquid hydrogen. This alternative poses technological, economic, political, and institutional challenges which will never be met by industry absent a necessary Federal role. NASA is structured to provide much of that role when it becomes necessary and timely.

Pointing toward opportunities in aviation, let us never forget that the raison d'etre for aviation is speed. Mankind, at least in a free society, will not forever accept the magnificent sub-sonic transports of today as the practical limit for useful airline travel. Hypersonic transports lie ahead when research and technology development establish their economic and technological feasibility. Those whose lifetimes have been spent in aviation are the first to understand that this industry is in its infancy and not the mature industry that some believe it to be.

Are there more tangible, more immediate reasons for Federal support of aeronautical technology development programs? Are there reasons to doubt that the aviation industry can and would pursue the more immediate of those programs if terminated or severely curtailed by NASA? As illustrated by Senator Cannon in his testimony before the House Science and Technology Committee hearings of December 8, 1981, "An advanced aeronautic development typically involves complex technology, costly one-of-a-kind laboratory facilities, collaboration by a wide range of highly specialized experts in many disciplines, and high risk of technological and economic failure. For example, the ongoing program to develop and establish the technological feasibility of an advanced turboprop or propfan propulsion system requires carefully planned and centrally managed participation of a major propeller design company, an engine company, two airframe companies and the world's finest propulsion laboratory at NASA's Lewis Research Center.

"Under the successful system which has evolved through half a century of progress since NASA and its predecessor agency, NACA, were established by Congress, NASA, and only NASA, can provide the central planning, coordination, technical integration, scheduling, and management of such a complex program. Absent NASA's unique and proven competence to perform that role, our aviation industry would be stifled by a combination of antitrust constraints, by proprietary conflicts, by unacceptable single company risk taking. The result would be simple—no result."

But that does not reflect the economic consequences of that result. Other industrialized nations have marked well the unmatched success of the U.S. aviation industry largely attributable to the NASA model for technology development. Consortia of foreign governments and industry have adopted derivatives of that model. Their technology and marketing accomplishments are now severely threatening our aviation industry. The European consortium producing the wide body Airbus has displaced Douglas and Lockheed in worldwide sales of their DC–10 and L–1011. (Only last week Lockheed announced termination of its L–1011 production program with accompanying layoff of several thousand employees.)

Before this decade is out, most of the major airlines of the world are expected to begin procurement of several thousand advanced medium size, medium range transports to replace less fuel efficient aircraft which are also incompatible with community noise abatement goals. That multi-billion dollar market is now severely competitive even if we pursue all advanced technology developments of the character earlier touched on; that market will be substantially lost if we fail to do so. In place of today's large positive contribution to our trade balance, we may see our own airlines opting for foreign aircraft for the nation's major airline services just as they now do for commuter class services.

It takes little sophisticated analysis to recognize the economic impact of that scenario. We are currently experiencing it in the automotive industry, wherein hundreds of thousands of U.S. employees and their families have been added to the staggering welfare costs of the nation.

Excluding the massive expenditures for social security retirement, for medicare, child nutrition, assistance for the blind and aged, and other unaffected welfare programs, the gross Federal cost of remaining welfare benefits is about $130 billion annually. Loss of the current positive aviation trade balance would alone add several hundred thousand families to those rolls at a cost of $5 billion per year. What a terrible price to pay for the shortsighted desire to avert $250 million of Federal support for NASA's aeronautical technology development programs. Nor does that account for the human costs of lost jobs, family dislocations, broken homes, abandonment of hope, that are the legacy of such a disastrous judgment call.

(c) Let me now consider the merits of the several alternatives offered in the "Agenda for Progress."

1. A Federal Prize Program:

Let us apply this alternative to one of the needs earlier noted, namely, the pursuit of research, technology development and validation toward an advanced turboprop concept. This, if successful, would permit the vast medium range air travel requirements of the world to be performed at speeds of about Mach 0.75–0.80 with fuel savings of about 15 percent relative to the most advanced turbofan power plants. That fuel saving corresponds to many millions of barrels of petroleum.

In the proposed scenario, a private corporation, instead of NASA, would expend $200 million to perform this research and development. Somehow its board of directors and associated lending institutions would have the a priori conviction that the development would be successful and earn a compensatory award. The corporation would cheerfully overlook the consequences of failure which would disqualify it for an award, or overlook the possibility that in the intervening years for the development a political bureaucracy would change its rules and void the award, or overlook the likelihood that the award grant would deprive it of proprietary values in the R&D results.

A corporation might prefer buying mineral rights on the moon to proceeding on that basis.

2. Philanthropy:

At this season of the year, it perhaps is appropriate to find in the spirit of the Three Kings of Orient bearing Gifts a solution for the development of advanced fuel efficient turboprop technology. Being somewhat faithless by disposition, I find it difficult to look back 20 centuries for a formula for progress into the 21st century.

3. Institutional Innovations:

We are asked to believe, or more accurately, it is suggested that "institutional R&D offers at least as great a potential for benefits to modern civilization as does technical R&D." To a world that has suffered disappointment and failure in its greatest international institutional innovations, this idea must appear as incredible as it does to me. When one contrasts the contributions of aeronautics technology to the travel opportunities of people all over the world, or the video communications by satellite among people all over the world, or the enrichment of the minds and spirit of people all over the world at the spectacular achievements of NASA's Apollo program, its interplanetary missions and the Columbia shuttle flights to the disarray or non-achievement of some of our noblest institutional approaches, it seems impossible to accept preference of the latter over technical R&D.

In any case, the closing italicized statement of the study contains a note of unintended irony. Whereas the study condemns Federal involvement in the technology demonstration and validation phases of technical R&D, with respect to institutional R&D, it clearly recognizes the Federal role . . . "to bring knowledge of the innovation up to the point where other potential users could decide whether to adopt it on their own." It would be hard to find more apt words to explain NASA's role in technology development and demonstration which seems so unacceptable to the study—and unhappily to OMB.

This nation has in place an institutional approach in NASA's long nurtured association with industry, academia, DOD laboratories, and private research laboratories that has been characterized by over 60 years of progress. It has fulfilled some of the most tangible needs of our people in both civil and defense aviation as well as responding to many of our people's highest aspirations in its space science program. Let us neither dim nor displace that bright beacon of progress with the faint flicker of hope some may see in any of the speculative alternatives offered in this misnamed "Agenda for Progress."

S. 1939: THE NATIONAL INSTITUTE ON ARTHRITIS AND MUSCULOSKELETAL DISEASES

Mr. CRANSTON. Mr. President, I am pleased to have joined with the distinguished senior Senator from Arizona (Mr. GOLDWATER) in introducing last Friday, S. 1939, a bill to establish a National Institute on Arthritis and Musculoskeletal Diseases within the National Institutes of Health. As author of the National Arthritis Act of 1974 (Public Law 93–640) I have long been acutely aware of the needs of and potential for research into arthritis and musculoskeletal diseases. If enacted, this bill would help to promote our Nation's research efforts for some of the most prevalent and devastating diseases in our society.

Before describing the provisions of S. 1939, I would like to discuss briefly what we know about arthritis, its nature and incidence, and the costs to the Nation that result from it.

WHAT IS ARTHRITIS?

Mr. President, arthritis is usually thought of as a condition of old age. Actually, arthritis is a generic term covering more than 100 forms of diseases that afflict young and old alike. Over 31.5 million Americans have some form of arthritis—one out of every seven citizens. Each year approximately 1 million Americans fall victim to this painful and debilitating disease. Arthritis attacks the body's moveable joints and connective tissues, sometimes resulting in systemic complications with critical damage to major organs. Over 20 million Americans suffer from arthritis severe enough that they seek a physician's help. In 1978, 549,000 hospitalizations were due to arthritis-related diseases.

RHEUMATOID ARTHRITIS

The two most common forms of arthritis are rheumatoid arthritis and osteoarthritis. According to 1960–62 data from the "National Health Examination Survey," which is based on physician examinations and provides perhaps the most accurate data on the incidence of disease in the population, over 5.7 million persons aged 18 to 79 were afflicted with rheumatoid arthritis—over 3.2 percent of the population. This survey does not take into account the millions of persons institutionalized in nursing homes and other facilities. Also, due to the increased prevalence of the disease among older individuals and the aging trend in the population since 1962, it seems clear that the current prevalence of this condition is likely to be much higher.

Rheumatoid arthritis is the most devastating and crippling form of arthritis. It is a chronic disease that leads to permanent joint deformities and lifelong disability. Rheumatoid arthritis is especially insidious because it is a systemic disease often leading to damage in other organs, such as the eyes, heart, and lungs. This disease strikes individuals of all ages from the very young to the very old and affects women three times as often as men.

A particular devastating form of this disease is juvenile rheumatoid arthritis, which affects over 250,000 children. As in the case of cancer and heart conditions, when a chronic disease such as arthritis strikes a child, it can often be much more severe than an adult case. Juvenile rheumatoid arthritis can stunt growth, blind, cripple, deform, and disable, and it can kill. It is estimated that another 250,000 children suffer from other forms of arthritis. Today the prevalence of arthritis among children is higher than that of polio during the most severe epidemics of the past.

OSTEOARTHRITIS

Osteoarthritis is the most common form of arthritis. According to the national health examination survey for 1960–62, based on X-ray examinations of noninstitutionalized patients, over 37.4 percent of the population aged 18 to 79 had some form of osteoarthritis. For those individuals aged 75 and over, the incidence of the disease was as high as 86 percent. Again, due to aging trends in the population, the incidence of osteoarthritis is probably much higher than these figures would indicate.

Although osteoarthritis usually develops more slowly and, in comparison to the severity of rheumatoid arthritis, is milder and less painful, it is a progressive condition that can in its later stages produce extreme pain and disability. Over 10 million Americans have osteoarthritis severe enough to cause painful problems seriously affecting their ability to perform their daily activities and their jobs. Osteoarthritis often develops after traumatic injury to a joint.

According to a 1971 survey, there were 17 million significant injuries associated with sports and recreational activities plus 11 million disabling injuries resulting from non-sports-related accidents. Of these roughly 28 million accidents, about 80 percent, or 22 million, involved the musculoskeletal system—more than 2 million involving joint injuries. Despite the long-term consequences and the seriousness of posttraumatic osteoarthritis and the incidence of the disease, little research has been conducted in this special field.

THE ECONOMIC COSTS OF ARTHRITIS

The financial costs of arthritis to patients, insurance companies, and taxpayers are staggering. The Arthritis Foundation estimated that in 1978 Americans paid $14.5 billion in costs related to arthritis. In 1980, approximately $1 billion was spent on quack remedies. The physical and emotional costs to the victims of the disease and their families are enormous.

In 1971, over 27 million workdays were lost due to arthritis-related disabilities. This represents over $5 billion in wages lost to employees.

Individuals with arthritis account for about 19 percent of those receiving social security disability insurance—SSDI—benefits. Although many workers with arthritis remain on the job as long as possible, some 535,000 workers disabled by arthritis and forced by the intense pain and physical limitations that they suffer to leave their jobs are today collecting SSDI benefits. The cost to the Nation for these payments in fiscal year 1981 alone is estimated to have been $2.7 billion. If payments for

their dependents are included, this figure is estimated to be as high as $3.25 billion.

NEED FOR A STRONGER APPROACH FOR ARTHRITIS RESEARCH

The National Arthritis Act of 1974 was tremendously successful in organizing and utilizing our national resources to wage a strong attack against arthritis. That legislation provided for the design of a master arthritis research plan pointing out the areas to be pursued, the existing resources with which that can be done, and the additional resources that are needed. The act also established research and demonstration centers that have provided an opportunity for intensive interdisciplinary arthritis research and also training in and demonstration of advanced diagnostic, prevention treatment, and control methods relating to arthritis.

Unfortunately, Mr. President, although current biomedical research policies have substantially increased our knowledge of arthritis, implementation of the National Arthritis Act and the national arthritis plan have fallen short of what should have been achieved. The budget levels recommended under the plan for arthritis-related research within the various institutes of the NIH have not been realized. Indeed, with each year the gap between recommended and actual expenditures has grown wider. The arthritis plan recommended that funds be doubled in 1977 for arthritis-related research within the various institutes of the NIH with subsequent annual increases of about 20 percent through 1980.

However, funding for arthritis and musculoskeletal disease within the National Institute of Arthritis, Diabetes, Digestive, and Kidney Diseases (NIADDK) increased by only 19 percent from 1976 to 1977, and since 1977 funding has increased at an average annual rate of about 16.4 percent. During the period 1977 through 1980, substantially less than half of the arthritis-related research grant applications that were approved for funding have been able to be funded by the NIADDK.

Part of the reason that arthritis and musculoskeletal research has not received the focus and priority it warrants is that, it is lumped with the current institute, NIADDK, in an incongruous variety of disease categories. Although arthritis and musculoskeletal diseases afflict more than 14 percent of the total U.S. population, in 1981 only 16.7 percent of the NIADDK budget—just 1.7 percent of the entire NIH research budget—was devoted to this research.

Looking to a future with a regrettably shrinking budget for our overall Federal health research effort, I believe we must develop policies for using limited financial resources more effectively and efficiently so that we can gain the maximum benefits for the maximum number of persons from biomedical research. The bill we are proposing would help achieve this.

By establishing a separate institute for arthritis and musculoskeletal diseases, we would provide arthritis and musculoskeletal disease issues with the greater visibility they should have at the national level and enable researchers in these areas to compete more successfully for increasingly scarce resources. Thus, we would help to facilitate the implementation of high-priority programs as mandated by the National Arthritis Act and recommended in the arthritis plan.

THE NATIONAL INSTITUTE ON ARTHRITIS AND MUSCULOSKELETAL DISEASES

Mr. President, the statutory authority for the new National Institute on Arthritis and Musculoskeletal Diseases—NIAMD—which S. 1939 would establish within the NIH would be patterned after that of other NIH research institutes. Thus, NIAMD would be directed to undertake research and demonstrations related to the cause, prevention, and treatment of arthritis and musculoskeletal diseases; to promote coordination of research programs in the public and private sector; to make grants for research; to establish and information clearinghouse; and to conduct research training.

In addition, in light of the tremendous number of traumatic musculoskeletal injuries that Americans receive in sports and other recreational activities, the new institute would include in its focus research on sports-related disorders.

Mr. President, the National Institute on Arthritis and Musculoskeletal Diseases would be funded under the existing authority of section 301 of the Public Health Service Act, as is the case for other NIH institutes. The only authorization of appropriations in the bill is for the support of existing and new multipurpose arthritis and musculoskeletal research and demonstration centers. The authorization of appropriations for these centers would be $12 million for fiscal year 1983, $15 million for fiscal year 1984, and $18 million for fiscal year 1985.

In 1983, this would represent a 40-percent reduction from the authorization level in fiscal year 1982. However, this reduction is not a cut in actual funding levels for these important entities; it simply reflects more accurately the current level of appropriations, approximately $8.8 million in fiscal year 1982 for these centers.

Mr. President, it is extremely important to point out that his bill does not provide for increased funding in order to create the National Institute on Arthritis and Musculoskeletal Diseases. Because the present division pertaining to arthritis and musculoskeletal diseases within the current institute is already autonomous in many of its functions, the start-up, overhead, and administrative costs related to separating these disease groups from the NIADDK are not expected to be substantial. The benefits to be gained from the greater visibility for arthritis-related research would more than compensate for the minimal costs that are anticipated.

I would note that concerns have been raised as to whether skin disease research should be included in the new institute that this bill would establish or remain in the existing institute. This is an important matter and one to which I will be giving careful consideration, in the weeks and months ahead, in close consultation with the Senator from Arizona (Mr. GOLDWATER) and after receiving the news of the concerned individuals and organizations.

CONCLUSION

Mr. President, we cannot ignore the costs to the Nation in economic and human terms resulting from arthritis and related diseases. Nor can we ignore the need to find ways to improve the quality of life for those unfortunate individuals whom arthritis strikes so unfairly. An accelerated research effort in arthritis would bring us closer to providing these millions of arthritis sufferers with relief from their pain and the potential for a future of full participation in everyday activities without the constant frustration of immobile joints and limitations on movement.

Thus, I urge that the Committee on Labor and Human Resources, to which the bill has been referred, give this important legislation prompt and careful consideration, and I pledged to my good friends the distinguished chairman (Mr. HATCH) and the very able ranking Democratic member (Mr. KENNEDY) my full cooperation and assistance in the further development and progress of the bill.

Mr. President, I request unanimous consent that the full text of the bill be printed at this point in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 1939

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

ESTABLISHMENT OF INSTITUTE

SECTION 1. Title IV of the Public Health Service Act is amended by adding at the end thereof the following new part:

"PART J—NATIONAL INSTITUTE ON ARTHRITIS AND MUSCULOSKELETAL DISEASES

"ESTABLISHMENT OF INSTITUTE

"SEC. 481. There is established in the Public Health Service a National Institute on Arthritis and Musculoskeletal Diseases (hereinafter in this part referred to as the 'Institute').

"RESEARCH AND TRAINING IN ARTHRITIS AND MUSCULOSKELETAL DISEASES

"SEC. 482. In carrying out the purpose of section 301 with respect to arthritis and musculoskeletal diseases the Secretary through the Institute and in cooperation with the advisory council to the Institute established under section 432 shall—

"(1) conduct, assist, and foster research, investigations, experiments, and demonstrations relating to the cause, prevention, and methods of diagnosis and treatment of arthritis and musculoskeletal diseases, including sports related disorders;

"(2) promote the coordination of research programs conducted by the Institute, and similar programs conducted by other agencies, organizations, and individuals;

"(3) make available research facilities of the Service to appropriate public authorities and to health officials and scientists engaged in special studies related to the purposes of this part;

"(4) make grants to universities, hospitals, laboratories, and other public or private agencies and institutions and to individuals for such research projects relating to arthritis and musculoskeletal diseases and disorders, as recommended by the advisory council to the Institute;

"(5) establish an information clearinghouse on research, prevention, and treat-

ment of arthritis and musculoskeletal diseases and collect and make available on a timely basis, through publications and other appropriate means, information as to, and the practical applications of, research and other activities carried out pursuant to this part;

"(6) secure from time to time, and for such periods as necessary, the assistance and advice of persons from the United States and abroad who are experts in the field of research authorized by this part; and

"(7) in accordance with regulations and funds appropriated or donated for the purpose, provide research training and instruction and establish and maintain research traineeships, in the Institute and elsewhere, in matters pertaining to the diagnosis, prevention, and treatment of arthritis and musculoskeletal diseases, including sports related disorders, with such stipends and allowances (including travel and subsistence expenses) for trainees as may be deemed necessary, with the number of persons receiving such training and instruction and the number of persons holding such traineeships to be fixed by the advisory council to the Institute, and in addition provide for such training, instruction, and traineeships through grants, upon recommendation of the advisory council to the Institute, to public and nonprofit private institutions.

"NATIONAL ARTHRITIS AND MUSCULOSKELETAL DISEASES PROGRAM

"SEC. 483. The Director of the Institute, with the advice of its advisory council, shall develop a plan for a national arthritis and musculoskeletal diseases program to expand, intensify, and coordinate the activities of the Institute respecting the diseases, and shall carry out the program in accordance with such plan. The program shall be coordinated with other research institutes of the National Institutes of Health to the extent that they have responsibilities respecting such diseases and shall, at least, provide for—

"(1) investigation into the epidemiology, etiology, and prevention of all forms of arthritis and musculoskeletal diseases, including sports related disorders, primarily through support of basic research in such areas as immunology, genetics, biochemistry, microbiology, physiology, bioengineering, and any other scientific discipline which can contribute important knowledge to the treatment and understanding of these diseases;

"(2) research into the development, trial, and evaluation of techniques, drugs, and devices used in the diagnosis, treatment, and prevention of arthritis and musculoskeletal diseases;

"(3) research on the refinement, development, and evaluation of technological devices that will replace or be a substitute for damaged bone, muscle, and joints and other supporting structures; and

"(4) establish mechanisms to monitor the causes of athletic injuries and identify ways of preventing such injuries on scholastic athletic fields.

The plan required by this section shall be developed within one hundred and eighty days after the date of the enactment of this part and shall be transmitted to the Congress at that time.

"MULTIPURPOSE ARTHRITIS AND MUSCULOSKELETAL DISEASE RESEARCH CENTERS

"SEC. 484. (a) The Secretary, acting through the Institute may, after consultation with its advisory council provide for the development, modernization, and operation (including staffing and other operating costs such as the costs of patient care required for research) of new and existing centers for arthritis and musculoskeletal diseases. For purposes of this section, the term 'modernization' means the alteration, remodeling, improvement, expansion, and repair of existing buildings and the provision of equipment for such buildings to the extent necessary to make them suitable for use as centers described in the preceding sentence.

"(b) Each center assisted under this section shall—

"(1)(A) use the facilities of a single institution or a consortium of cooperating institutions, and

"(B) meet such qualifications as may be prescribed by the Secretary, and

"(2) conduct—

"(A) basic and clinical research into the cause, diagnosis, early detection, prevention, control, and treatment of, arthritis and musculoskeletal diseases and complications resulting from such diseases, including research into implantable biomaterials and biomechanical and other orthopaedic procedures; and

"(B) research training programs for physicians, scientists, and other health professionals.

"(c) Each center assisted under this section may conduct programs to—

"(1) establish the effectiveness of new and improved methods of detection, referral, and diagnosis of individuals with a risk of developing arthritis and musculoskeletal diseases; and

"(2) disseminate the results of research activities and develop means of standardizing patient data and recordkeeping.

"(d) The Secretary shall give appropriate consideration to the need for centers especially suited to meeting the needs of special groups affected by arthritis and musculoskeletal diseases, especially children and the elderly.

"(e) The Secretary shall evaluate on an annual basis the activities of centers receiving support under this section and shall report to the appropriate committees of Congress the results of his evaluations not later than four months after the end of each fiscal year.

"(f) Support of a center under this section may be for a period of not to exceed five years and may be extended by the Director of the Institute, for additional periods of not more than five years each, after review of the operations of such center by an appropriate scientific review group established by the Director of the Institute, and recommended for approval by the advisory council to the Institute.

"(g) For purposes of this section, there are authorized to be appropriated $12,000,000 for the fiscal year ending September 30, 1983, $15,000,000 for the fiscal year ending September 30, 1984, and $18,000,000 for the fiscal year ending September 30, 1985.

"ARTHRITIS AND MUSCULOSKELETAL DISEASE COORDINATING COMMITTEE

"SEC. 486. (a) In order to improve coordination of all activities in the National Institutes of Health, in the Department of Health and Human Services, and in other departments and agencies of the Federal Government relating to Federal health programs and activities relating to arthritis and musculoskeletal diseases, including sports related disorders, the Secretary shall establish a Coordinating Committee to be composed of representatives of the Department of Health and Human Services (including the Food and Drug Administration), the Veterans' Administration, the Department of Defense, and other Federal departments and agencies involved in research, health services, or rehabilitation programs affecting arthritis and musculoskeletal diseases. The committee shall include the Directors (or their designated representatives) of each of the research institutes of the National Institutes of Health involved in arthritis and musculoskeletal diseases related research. The committee shall be chaired by the Director of the Institute and shall prepare a report, not later than sixty days after the end of each fiscal year, for the Secretary detailing the work of the committee in seeking to improve coordination of departmental and interdepartmental activities relating to arthritis and musculoskeletal diseases during the preceding fiscal year. Such report shall include:

"(1) a description of the work of the committee in coordinating the research activities of the National Institutes of Health relating to such diseases during the preceding year, and

"(2) a description of the work of the committee in promoting the coordination of Federal health programs and activities relating to arthritis and musculoskeletal diseases to assure the adequacy of such programs and to provide for the adequate coordination of such programs and activities.

"(b) The committee shall meet at the call of the chairman, but not less often than four times a year.".

CONFORMING AMENDMENTS

SEC. 2. (a) Section 431(a) of the Public Health Service Act (42 U.S.C. 289a(a) is amended by striking out "arthritis, rheumatism, and".

(b)(1) Subsection (a) of section 434 of such Act (42 U.S.C. 298c–1) is amended by striking out "Arthritis, Diabetes," each place it appears and inserting in lieu thereof "Diabetes".

(2) Subsection (b) of such section is amended (A) by striking out "Arthritis, Diabetes," and inserting in lieu thereof "Diabetes," and (B) by striking out "Arthritis and Musculoskeletal and".

(3) Subsection (c) of such section is amended (A) by striking out "arthritis and musculoskeletal and", and (B) by striking out "arthritis, musculoskeletal and".

(4) Subsection (d) of such section is amended (A) by striking out "Arthritis, Diabetes," and inserting in lieu thereof "Diabetes", and (B) by striking out "Arthritis and Musculoskeletal and".

(5) Subsection (e) of such section is amended by striking out paragraph (1) and by redesignating paragraphs (2) and (3) as paragraphs (1) and (2), respectively.

(6) The heading for such section is amended by striking out "ARTHRITIS, DIABETES," and inserting in lieu thereof "DIABETES".

(c)(1) Subsection (a) of section 436 of such Act (42 U.S.C. 289c–3) is amended (A) by striking out "arthritis, diabetes mellitus," and inserting in lieu thereof "diabetes mellitus", and (B) by striking out "an Arthritis Interagency Coordinating Committee,".

(2) Subsection (b) of such section is amended by striking out "Arthritis, Diabetes," and inserting in lieu thereof "Diabetes".

(d)(1) Subsection (a) of section 437 of such Act (42 U.S.C. 289c–4) is amended by striking out "the National Arthritis Advisory Board,".

(2) Subsection (b)(2) of such section is amended by striking out "Arthritis, Diabetes," and inserting in lieu thereof "Diabetes,"

(3) Subsection (d) of such section is amended by striking out "and the National Arthritis Advisory Board, six of the members of each" and inserting in lieu thereof ", six of the members of".

(4) Subsection (g) of such section is amended by striking out "Arthritis, Diabetes," and inserting in lieu thereof "Diabetes".

(5) Subsection (h)(3) is amended by striking out "Arthritis, Diabetes," and inserting in lieu thereof "Diabetes".

(6) The heading for such section is amended by striking out ", ARTHRITIS,".

(e) Sections 438 and 439 of such Act (42 U.S.C. 289c–5, 289c–6) are repealed.

(f) The heading for part D of such Act is amended by striking out "ARTHRITIS, DIABETES," and inserting in lieu thereof "DIABETES".

VOCATIONAL REHABILITATION

Mr. WEICKER. Mr. President, I am pleased to be able to join the distinguished Senator from California (Mr. CRANSTON) in cosponsoring S. 1987, a bill to continue the longstanding Federal commitment to provide vocational rehabilitation services to disabled Americans currently receiving SSDI and SSI, by allowing additional moneys to the States to pay for such services. This is not the first time that the Senator from California and I have collaborated on attempting to secure passage of legislation of this type. In June, we offered an amendment to the Omnibus Reconciliation Act of 1981 designed with much the same purpose in mind: To provide States with the necessary funds to retain and rehabilitate disabled workers so that they might once again take their rightful place among the ranks of the gainfully employed. Unfortunately, the amendment was narrowly defeated by a vote of 47 to 50.

Six months later we are back here on the floor of the Senate making the same case for the same basic program, citing much the same facts and figures to substantiate our claims—and what for? To make the point, just the one simple point, that nothing has changed in those intervening 6 months. Nothing has changed to dissuade those of us who supported similar legislation this summer from believing in the long-term cost-effectiveness of such a measure. Absolutely nothing has changed, Mr. President.

In the next year, unfortunate as it is, an estimated 17,000 disabled American workers, who would have received rehabilitative services and perhaps be gainfully employed once more, have not, and will not, receive such services unless and until the Senate acts to correct its past mistakes in this matter. It makes absolutely no sense to reduce Federal spending in such areas as vocational rehabilitation which, though it will certainly result in some short-term costs savings, will just as certainly end up costing the Federal Government and society at large far more further down the road.

We have heard much talk as of late about the need and the desirability of curbing the expansion of the entitlement programs. Now we have a chance to do just that. Long-term costs for very expensive institutional care are avoided as disabled people return to work.

Indeed, it has been clearly shown that for every dollar spent on rehabilitating a disabled individual, that once rehabilitated and gainfully employed that individual pays back to the Federal Government between $1.40 and $2.40 in taxes. From a purely economic standpoint, therefore, we have nothing to lose and everything to gain from investing in a program such as this. If we do not choose to make such an investment, however, the losses to those who might have benefited from services which are designed to restore them to the marketplace—and the losses to society as a whole, in terms of loss productivity and diminished human dignity—will be truly incalculable.

A DECADE OF PROGRESS FOR THE NORTHERN PLAINS RESOURCE COUNCIL

Mr. BAUCUS. Mr. President, I recently had the pleasure of addressing the 10th annual convention of the Northern Plains Resource Council in Billings, Mont.

During the past decade, NPRC has earned the reputation of being the "conscience of the State" in decisions relating to our State's abundant natural resources. In particular, the Northern Plains Resource Council has been actively concerned with the relationship between development of Montana's vast energy resources and air quality.

In light of the great interest which surrounds the reauthorization of the Clean Air Act, I would like to ask unanimous consent that the text of my remarks before the NPRC be printed in the RECORD. My conclusion is I hope my colleagues share. The right to a clean and healthful environment must not be sacrificed for short-term profits.

There being no objection, the text was ordered to be printed in the RECORD, as follows:

SPEECH BY SENATOR MAX BAUCUS

The last ten years have been a tumultuous, exciting decade of growth and progress for the Northern Plains Resource Council. In many ways, NPRC and I have been sidekicks through the 70s, each of us learning to care for and protect the land we love.

Like any friendship, ours has had its rocky stretches. I'm sure I've frustrated you as many times as you have returned the favor, but with the years has come the bond of shared experiences and the wisdom of time.

Earlier today, however, as I looked over the roster of past NPRC Chairmen, I had the feeling that maybe you'd gotten the long end of the stick when it comes to wisdom.

Men like Dick Colberg, Bob Tully, Wally McRae, Charlie Yarger, and Bill McKay, and women like Anne Charter and Helen Waller have brought to the Northern Plains Resource Council a gutsiness and an understanding of the land. With the assistance of a superb staff, they have served you and all of us well.

So with the pride of an old friend, I congratulate all of you, the people who have made NPRC Montana's conscience in the decisions that shape the future of our State.

Yet, while you deserve praise, there is no time to bask in it. For while the 70s produced a generation of citizens committed to the stewardship of our natural resources, the 80s have given us a new wave of radicals.

Unlike the extremists of an earlier day, these radicals are dressed in Brooks Brothers suits instead of ragged jeans. And instead of carrying placards, they're toting sheafs of cost/benefit analyses to justify unchecked development at any price.

Nowhere is this new radicalism more apparent than in the reauthorization of the Clean Air Act. Nowhere is it more clear that these sophisticated radicals are out of step with the mainstream of America.

Armed with a questionable mandate for regulatory reform and a balanced budget, these new radicals have come to Congress to suggest that the premiere public health act, the Clean Air Act, needs a little cosmetic surgery.

That is a position I happen to share. But we seem to part company on the question of the technique of this operation. I believe it requires the skillful use of a legislative scalpel, not the meat axe offered by these extremists.

Unfortunately, the evidence continues to mount that efforts to gut the Act are being fostered by the Administration. As a new member of the Senate Environment and Public Works Committee, I've been following this scenario closely since last January.

Let's look at the record. Beginning last April, the Committee gathered testimony on the Clean Air Act. An exhaustive series of hearings were held across the country, including a field hearing here in Billings at which representatives of the Northern Plains Resource Council testified.

While the need for fine tuning the Act became evident, the more important conclusion drawn from the testimony of hundreds of witnesses is that the Act works. In a hundred different ways, witnesses generally concurred with the National Commission on Air Quality statement:

"The Commission's recommendations reflect a general conclusion that the structure of the Clean Air Act is sound and needs refinement instead of fundamental change. ... The prognosis for the 1980s reflects a need for the control of air pollution to be a continued national priority."

In short, the Act has resulted in a consistent improvement of air quality with accompanying benefits to public health and well being.

With this background, you can understand my concern when the President appointed as Administrator of the Environmental Protection Agency, a woman who had no demonstrated concern for clean air and clean water.

Since taking office in May, Mrs. Gorsuch has fulfilled my worst fears. Budget cut has been heaped on budget cut at EPA. For FY 1983, Mrs. Gorsuch has even volunteered to slash the Agency another 20 percent at a time when demands of new legislation such as Superfund and the Toxic Substances Control Act are just being felt. Moreover, the Clean Air Act is of little value without an agency strong enough to enforce it.

EPA has promised Clean Air Act drafts and those promises have been reneged. Instead, draft bills have been leaked out and their existence denied. And now we have been handed 11 "principles" for the revision of the Act fully laid out in a one and a half page press release!

And if that weren't enough, last week 38 points of revision suddenly appeared in selected Senators' offices. Although I wasn't one of the lucky few to receive a copy, I am told by the Assistant Administrator of EPA that this was an "unofficial document officially delivered."

If that puzzles you, I can assure you that we are in the same boat.

Frankly, I believe it is time for everyone involved to quit playing their hand close to the vest and lay their cards on the table.

On one side of the table you would see a full house of special interest amendments, tacitly endorsed by the Administration. Taken separately, they are innocuous. But together, they dictate a radical attack on this critical public health measure.

On the other side of the table, is the real ace in the hole, however. That card is the voice of the American people saying "no" to a weakening of the Act.

National pollster Lou Harris makes this point clearly.

Listen to his testimony before a House Committee:

"By 80 to 17 percent, a sizeable majority of the public does not want to see any relaxation in existing federal regulation of air pollution. I am not an expert on this legislation nor on the subject of environmental regulation, but I can tell you this: This message on the deep desire on the part of the American people to battle pollution is one of the most overwhelming and clearest we have ever recorded in our twenty-five years of surveying public opinion."

An interesting aside to the Harris survey is that, regionally, Westerners lead the way in backing a tough clean air law.

Don't get me wrong. I am not an advocate of government by public opinion survey. However, in this day and age, it is nice to know that there is strong support for doing what is right in cleaning up air pollution.

How then will these two sides be resolved?

In the first place, far too often in Washington, the personal stakes of this legislation are lost on the euphemisms of politicians and lobbyists. We must clear away that smokescreen and talk in real terms about health and human lives.

For example, when we talk of primary air standards protecting sensitive population, we are not talking about a five percent blip on a population curve.

We are talking about 12 million living and, I hope, breathing people. We are talking about a 67 year old widow on Social Security. With reasonably clean air, she may live another 20 years. Without, she may live 10.

We are talking about an 18 month old infant with developing lungs that are particularly sensitive to the hazards of air-borne pollution.

We are talking about a retired rancher suffering from angina who is forced to stay indoors because of fouled air.

Put in those terms, I think you will agree that glib talk of cost-benefit analysis is a bunch of bunk. I have yet to see the actuarial table that puts a dollar figure on my life I would sign off on. I'm sure the same is true for you.

Those who argue to the contrary, no matter how smooth, no matter how well financed, no matter how many charts and graphs they carry, are the real radicals in this debate.

Given that starting point, let's stand back for a moment and look at the Clean Air Act in light of 10 years of experience.

In fact, the Act has its problems. It is complex. It is expensive. It is ineffective in some instances.

Recognizing those problems, I favor amendments to streamline cumbersome, ineffective regulatory mechanisms. I will support strengthening the states' role in managing air resources. I will vote for change that reflects our improved scientific knowledge of air pollution.

While time is too short for a section by section analysis, let's look at a few specific issues.

The first and most controversial is the PSD or Prevention of Significant Deterioration Program. The imposing tangle of red tape associated with PSD must be straightened out if the program is to be retained.

The idea of budgeting our air resources remains sound and we have seen the benefits of this program right here in Montana. However, to demand the tracking of short term increment consumption is the type of requirement which generates a great deal of frustration and very little clean air.

I'm also anxious to address the problem of acid rain. Already a variety of proposals have been introduced by Senators from New England. I believe, however, that this is an issue which must not be thought of as regional only.

In fact, at a symposium I co-sponsored at the Yellow Bay Research Center, that message was brought home. Scientists from Montana and other Rocky Mountain states outlined the threat to Western streams and lakes imposed by acid rain.

Thus, while our knowledge is not perfect, I cannot go along with those who urge years of additional study. I believe action must be taken to reduce emissions of sulphur dioxide and nitrogen oxides, the precursors of acid rain.

The control of harzardous pollutants is another matter that requires a positive response. Since 1970, only 7 pollutants have been listed under Section 112 of the Act. With dozens of new and exotic substances pouring into our air every year, no one can disagree that this snails pace is acceptable.

EPA must be given the statutory tools to accelerate its identification and listing of toxic pollutants. Authority to establish economic, readily available control measures for such pollutants should be provided quickly.

On the issue of percent reduction, I believe that a careful examination must be made of the air quality benefits which this requirement is buying for us. I believe that a compromise position may be available which will recognize the benefits of scrubbing in some areas without requiring redundant control technologies elsewhere.

Unquestionably dozens of other amendments will be proposed in areas such as automotive emissions, non-attainment air sheds, and technology requirements.

While I look forward to reviewing these proposals, I am convinced that they must be looked at in the aggregate.

Amendments can easily be seen as modest revisions when taken separately. Together, however, they can topple the entire framework for clean air in this country.

This then is the challenge: Now is the time, and the debate of the Clean Air Act is the place to stand and hold the ground which we won in the 1970s. Reasonable amendments are in order. Emasculation of the Clean Air Act is not.

Montana's Constitution says it all. "All persons are born free and have certain inalienable rights. They include the right to a clean and healthful environment." Surely that is a fight worth joining. I look forward to your support.

ICC REGULATIONS RE EXPORT COAL

Mr. SPECTER. Mr. President, earlier this year the Norfolk & Western Railway, joined by the Chessie system and the Family Lines system, petitioned the Interstate Commerce Commission to exempt export coal carried by the railroads to Atlantic and gulf ports from interstate commerce regulation.

Coal producers objected to such an exemption because, they argue, this would be inconsistent with present law on interstate commerce as amended by the Staggers Rail Act of 1980. Inasmuch as export coal traffic is often captive to the railroads, it can become a likely target for unreasonably high rail rates.

The ICC has initiated a proceeding in which the Commission requests comments on the notion of exempting export coal traffic moved by the railroads to all ocean ports—Atlantic, gulf, and Pacific coasts—from regulation.

The proposal would allow rail carriers to discriminate in rates and services in regard to export coal carried to rail carrier-owned port terminals in contrast to port facilities owned by others. Also, it would permit unconstrained pricing of railroad coal transportation resulting in export coal traffic subsidizing other rail traffic and/or contributing excessive revenues to railroads holding monopoly positions with respect to export coal movements.

Moreover, such an exemption would cause a serious disincentive for rail carriers to enter into transportation contracts with export coal shippers inasmuch as the carriers would no longer face the possibility of maximum rate regulation under the law. All of these impacts would make the price of U.S. coals less competitive with other world coal supply sources.

Mr. President, I wish, therefore, to introduce a resolution to express the sense of the Senate that the Interstate Commerce Commission should not grant a petition to exempt from interstate commerce regulation export coal carried by railroads to ocean ports.

I ask unanimous consent to have the resolution printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION

Resolved, That it is the sense of the Senate that the Interstate Commerce Commission should not grant a petition filed by the Norfolk and Western Railway, joined by the Chessie System and Family Line System, to exempt from interstate commerce regulation export coal carried by railroads to U.S. ocean ports.

FIRST PENNSYLVANIA BANK

Mr. SPECTER. Mr. President, I wish to call the attention of the Senate to a significant event involving the 100th anniversary of First Pennsylvania Bank on January 7, 1882.

First Pennsylvania Bank, National Association, one of Philadelphia's major banks, is the Nation's oldest bank as well.

Founded under the leadership of Superintendent of Finance, Robert Morris, the predecessor Bank of North America began active operations on January 7, 1782.

Thomas Willing, a successful merchant and a partner of Morris, was the bank's first president. Its original list of subscribers includes such prominent figures as Benjamin Franklin, Thomas Jefferson, Alexander Hamilton, James Monroe, John Jay, John Paul Jones, and Commodore John Barry.

Two other Philadelphia financial institutions played a prominent role in the formation of First Pennsylvania as we know it today.

Of particular significance was the Pennsylvania Company for Insurance and Granting Innuities, the first major life insurance underwriter in the new Nation. Chartered by the State in 1812, the Pennsylvania Co. applied for and was granted a supplementary charter granting authority to engage in deposit banking. Thus, it became the first chartered institution with this authority, and in 1872 the Pennsylvania Co. turned entirely to banking.

In 1929, the Pennsylvania Co. merged with the Bank of North America and continued to expand through a series of mergers with smaller banks and trust companies. In 1947 the bank's name was shortened to The Pennsylvania Company for Banking and Trust.

The final merger leading to the present First Pennsylvania Bank took place in 1955 with the acquisition of the First National Bank of Philadelphia. First National, founded by prominent financier Jay Cooke in 1863, was the first federally supervised bank in the Nation and was chartered under the National Bank Act 1863.

The surviving institution operated under the Philadelphia Co.'s State charter.

In 1969, First Pennsylvania Corp. was formed as a one bank holding company with the bank as its principal operating subsidiary. The bank was converted to a nationally chartered institution in 1974 and awarded the Comptroller of the Currency's Federal Charter No. 1.

First Pennsylvania was one of the first to popularize consumer loans, offer term loans to small businesses, and provide around-the-clock check collection services. The bank has been well known for its leadership in providing a wide range of banking services.

HOME MORTGAGE INTEREST DEDUCTIBILITY

Mr. MATTINGLY. Mr. President, I was pleased to cosponsor and see the Senate adopt unanimously Senate Resolution 238, requesting the Finance Committee not to make any changes in the rule governing the deductibility of interest paid on home mortgages.

While the American economy is currently in a recession, the housing industry is in a state of depression. Today, less than 1 American family in 20 can qualify for a mortgage on the average home. With interest rates making mortgage payments for a home almost unaffordable, the deductibility of interest is often the key element to one's ability to survive financially.

I have serious reservations about getting our economic house in order by enactment of so-called revenue enhancements. I hope that all so-called revenue enhancement proposals, whether to eliminate the deductibility of interest paid on home mortgages or to increase the excise tax on alcohol and tobacco products, will be met with equal scrutiny as was Senate Resolution 238. With a Federal budget of over $700 billion for fiscal year 1982, I am confident Congress can further reduce Federal spending in an effort to reach fiscal sanity as opposed to doing so on the backs of the American taxpayers.

I was pleased to support this effort to squash the attempt to eliminate the home mortgage interest deductibility.

A TRIBUTE TO THE MAJORITY LEADER

Mr. COCHRAN. Mr. President, as we near adjournment of the 1st session of this 97th Congress, I feel that I must express my profound respect and appreciation for the outstanding manner in which our distinguished majority leader has performed his duties and managed the schedule of Senate business. Enormously complex and important legislation was steered to passage in this historic first year of his service as majority leader. Without his thoughtful, considerate manner, and intellectual qualities that equip him to guide this body in its work, this success would not have been possible.

Mr. President, HOWARD BAKER is truly a great statesman and a consummate Senate leader. I feel fortunate, indeed, to have had the privilege of serving this year and witnessing at close range the way he so impressively carried out his responsibilities.

Mr. President, I salute him and congratulate him for this masterful performance.

Mr. BAKER. Will the Senator yield to me?

Mr. COCHRAN. Yes, Mr. President.

Mr. BAKER. Mr. President, I came to the floor inadvertently. I would not have come if I had known the Senator from Mississippi was going to make such generous comments. They not only make me blush, but they are patently untrue. He is most generous in his remarks.

Mr. President, I thank him from the bottom of my heart and I thank him and the Senators on both sides of the aisle for the magnificent cooperation they have given me this year. It made it possible, I think, to operate the Senate with good humor and good effect.

Mr. President, I thank the Senator again for his remarks.

THE "THIRD HOUSE" OF CONGRESS: AN APPRECIATION

Mr. WARNER. Mr. President, as this 1st session of the 97th Congress draws to its close, may I say a heartfelt thank you to the often unsung body of men and women who support us in our common effort.

We who serve as Members of the Senate are surrounded and supported daily by a dedicated group of helpers—from parliamentarians, reporters, Capitol Police officers, restaurant workers, elevator operators, service department personnel, doorkeepers, office and committee staff, pages, cloakroom attendants, and a host of others.

Collectively, these Capitol employees, on both ends of the Hill, serve almost as a "third house" of Congress. They work for us and with us, making our own tasks more possible of accomplishment.

Mr. President, I have been privileged over the years to serve in many organizations, both private and public. I have worked for and with many people, and many have worked for and with me.

And I must say that never before have I encountered a more accommodating, more dedicated, more capable—or, frankly, nicer—group of people than those who serve in the "third house."

So, at this joyous season of the year—doubly joyous for us who are looking forward to a short respite from our daily rounds—my hat is off in a salute of gratitude to that fine group of men and women who stand beside and behind us as we do the people's business.

Thanks—and the best of the holiday season—to all of them, and to my colleagues, who have made the experience of this year, for me, so memorable and meaningful.

FOLLOWUP RESPONSES FROM HEARING ON NOMINATION OF ROBERT P. NIMMO TO BE ADMINISTRATOR OF VETERANS' AFFAIRS

Mr. CRANSTON. Mr. President, during the Committee on Veterans' Affairs July 9, 1981, hearing on the nomination of Robert P. Nimmo to be Administrator of Veterans' Affairs, I asked a number of questions to which Mr. Nimmo agreed to provide detailed responses for the record. Mr. Nimmo's nomination was confirmed by the Senate on July 10, but the responses to a number of my questions were not received until after the hearing record was published.

Therefore, for the information of my colleagues and the public, I will ask unanimous consent that Mr. Nimmo's December 3, 1981, letter to the chairman of the committee, my good friend from Wyoming (Mr. SIMPSON), providing these responses be printed in the RECORD at the conclusion of my remarks.

Mr. President, I would like to note that I am in the process of following up further with the Administrator with respect to certain aspects of his responses. Also, I would note that I am not submitting for printing in the RECORD a copy of the entirety of the attachments to the Veterans' Administration's Circular 00–81–39—because of its great length—which Mr. Nimmo submitted as an enclosure with his December 3 letter. A complete copy of the attachment is available in the committee's offices, and I will endeavor to have it printed next year as part of an outstanding committee hearing record.

I ask unanimous consent that Mr. Nimmo's letter to Senator SIMPSON and a portion of Circular 00–81–39 be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

VETERANS' ADMINISTRATION,
Washington, D.C., December 3, 1981.

Hon. ALAN K. SIMPSON,
Chairman, Committee on Veterans' Affairs, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: During my confirmation hearing, I agreed to provide a more detailed response to several questions. I have for your convenience repeated the questions asked, my initial response, and then a more detailed response.

1. Question. The Presidential message of October 10, 1978, on the progress of the Vietnam era, conferred upon the Veterans Administration the status of a Cabinet Agency for the purpose of attending Cabinet meetings. The Carter Administration believed that the presence of the VA at Cabinet meetings was "useful for other Departments with overlapping responsibilities" and helped the VA to have a "stronger voice". What are the plans of the Reagan Administration?

Response. So far as I am aware, the Reagan Administration has not considered the question of whether the Administrator of the Veterans Administration should attend Cabinet meetings. I am aware of the past practice dating from 1978 and believe that I understand your thoughts on this matter. I will be pleased to convey your concerns to Mr. Edwin Meese, III, as soon as possible.

Additional response. During a recent discussion with Mr. Edwin Meese, III, of issues in which the VA has an interest, Mr. Meese expressed the view that unlike Cabinet-level agencies, the VA does not have broad responsibility for policy formulation. While eventual Cabinet status for the VA was not ruled out in the discussion, my understanding is that such status is not currently favored by the Administration.

I have had no difficulty in presenting my views on VA matters to the White House and do not expect my access to be in any way impeded.

2. Question. What are your plans for work-

ing with OPM and monitoring OPM's activities in connection with the Veterans Preference provisions of Title 5, especially those for disabled veterans?

Response. If I may, Senator, I would like to respond to that in writing.

Additional response. I would like to emphasize my commitment to the hiring of the disabled and veterans throughout the Veterans Administration. In this regard, I am particularly concerned about veterans who are service-connected disabled or who served during the Vietnam era. Recently, I approved a circular which has been transmitted to all VA stations and offices which includes the VA's report on the affirmative action program for the hiring, placement, and advancement of the handicapped at the VA and our affirmative action program plan. It includes the goals of the program and the VA's accomplishments to date. This report and plan was developed in accordance with the guidelines and instructions contained in the Equal Employment Opportunity Commission's Management Directive. I am enclosing a copy of the circular which explains these goals more completely.

The VA is actively recruiting the disabled for employment at the VA, especially through organizations such as the Paralyzed Veterans of America and other veterans' organizations, and through the Disabled Vietnam-Era Veterans Outreach Program under the Department of Labor. The VA also contacts the State Vocational Rehabilitation Offices, State Employment Services, colleges, and universities and participates in job fairs, career days and other employment and training assistance to veterans and their dependents.

In addition, at the request of the White House, the VA has the lead role in developing programs throughout the Country that serve to make both disabled persons and the public aware of efforts being made to train and assist physically, as well as psychologically, disabled persons.

Each Federal agency is required to comply with veterans' preference laws in its employment practices, while overall responsibility for their implementation rests with the Office of Personnel Management (OPM). As an agency, the VA has used this authority extensively, and our record in this area speaks for itself.

If there was any doubt about OPM's commitment to effective implementation of veterans' preference laws, I believe that it was cleared up when Donald Devine, the Director of OPM, testified before the House Subcommittee on Education, Training and Employment on November 10, 1981. In his prepared remarks, Mr. Devine stated unequivocally that veterans' preference is an integral part of the Federal Government's merit employment system, and he outlined steps OPM has taken to reaffirm the Government's commitment to veterans' preference.

The VA has no authority to enforce compliance with these laws by other agencies, but I can assure you that my own commitment to such laws is firm, the VA's own implementation record is excellent, and that I will continue to take an active interest in their implementation Government-wide.

I am aware that several veterans' organizations and others have complained of certain hiring practices within the Postal Service. I believe that both the Postal Service and OPM have resolved to clear up complaints that veterans are not given appropriate preference consideration in hiring decisions. Resolution of these complaints goes beyond the role of the VA, since employment decisions are not reviewed by us and I have no authority to enforce compliance with veterans' preference laws.

I have been advised of OPM's intention to review this matter and assure that the law is properly implemented in the Postal Service. If there are complaints which I am able to assist in resolving, or if some proposal requires a greater involvement of the VA in an area where other Government agencies lack expertise, I will certainly do all that I can to assure that such matters are resolved.

3. Question. With respect to your written response to my written question number 1–A, when do you expect to reach a decision on the best manner in which to carry out your government-wide coordination and advocacy responsibilities under section 220 of title 38, and will you agree now to report to the Committee as to what you decide?

Response. The responsibilities under section 220 of title 38 to seek to achieve maximum coordination of services among all programs and activities affecting veterans carried out by all other Executive Branch authorities, and to promote special consideration and preference for veterans in all programs of the Federal Government, is a broad charge. Nevertheless, I intend to promptly commence an analysis of this section to identify specific objectives which we can pursue, and to formulate some practical procedures for achieving them. I will complete this process and provide a report back to you as soon as possible.

Additional response. The VA is involved in a wide-range of interagency relationships. These significant relationships include the Departments of Housing and Urban Development, Education, Justice, Labor, Defense, and Health and Human Services. Also, the VA interacts with the Social Security Administration, the National Institutes of Health, the Equal Employment Opportunity Commission, the General Services Administration, the Environmental Protection Agency, and the Advisory Council on Historic Preservation.

I intend to establish service agreements with each of the departments where the VA shares programmatic responsibility. Several of these agreements are already in place and working well. I also intend to work with each of these Federal departments and agencies to insure that the objectives of Congress are achieved and our Nation's veterans are served in a most effective manner.

The VA has actively participated in promoting the Targeted Jobs Tax Credit (TJTC) since the program was authorized by the Revenue Act of 1978 (Public Law 95–600). Although the Department of Labor and the Internal Revenue Service were mandated by the law to publicize the program, the VA has met its pledge of support principally through communications to our personnel and potentially eligible veterans and employers. A letter to all regional office field stations in early 1979 explained the TJTC and VA's role in administering and publicizing the program.

Our veterans services officers were provided information on the TJTC through our regularly scheduled telephone conference calls with special reports required on the number of vocationally rehabilitated veterans vouchered and certified under the program. A Memorandum of Understanding concerning the TJTC was entered into between the Department of Veterans Benefits and the Employment and Training Administration (ETA) of the Department of Labor and copies of ETA's TJTC Handbook were distributed to all VA regional offices.

To specifically promote the TJTC among employers and veteran eligibles the VA produced its own TJTC pamphlet stressing the natural linkage between this tax credit and the VA's OJT and apprenticeship training programs. In a special mailing conducted in March of 1981 these pamphlets were sent to approximately 65,000 VA approved OJT and apprenticeship employers urging the hiring of eligible veterans and underscoring the tax advantages of participation in the TJTC program.

Finally, I believe that my relationship with other Government officials in the area of veterans' affairs will allow me to be included in the early stages of formulation of veterans' policies and programs within their jurisdiction.

4. Question. I note that the Blinded Veterans Association in its testimony alleges systematic employment discrimination by the VA against blinded individuals. Would you please meet with Mr. Fales and the BVA in response to his allegations and keep the Committee advised on how you can deal with them?

Response. I would be pleased to.

Additional response. On November 6, 1981, I met with Mr. Fales and we discussed our mutual interest in veterans' issues.

I am aware that past practices and patterns of discrimination against visually impaired individuals, as well as other disabled persons, have existed throughout the public and private sectors. However, I believe the VA is recognized for its leadership role in hiring disabled individuals. For example, the percentage of handicapped persons employed within the VA's workforce (10.5 percent) ranks as first among large agencies and compares quite favorably with the Federal average for these individuals (7.4 percent). There are 2,206 visually impaired individuals employed by the VA, of that number, 326 are receiving compensation for service-connected injuries.

I believe the vigorous pursuit of our present program will enable us to maintain our position of leadership among Federal agencies. Our efforts will continue to be monitored through reports covering various handicapped and disabled veteran employment categories. I am committed to the employment of the disabled and visually impaired. I believe these individuals can make a valuable contribution at all levels of employment within the Federal Government.

The BVA has had a contract with the VA since 1972 to provide certain outreach services that the VA cannot provide. Blinded Vietnam era veterans, which in many cases are severely disabled and homebound, are the primary recipients of this outreach. This contract provides that BVA counselors would visit the veteran, discuss with him the various VA services available and assist the veterans in taking advantage of these services.

Since blindness affects a comparatively small number of veterans, these counselors also visit VA hospital personnel, adjudication officers and others who deliver services and benefits to blinded veterans, and discuss with them the many issues related to blindness. I believe this contract is very worthwhile and serves the best interest of a group of severely disabled veterans while also advancing the mission of the VA.

Mr. Chairman, I hope this correspondence is responsive to the needs of the Committee. If you need further information, please contact me.

Sincerely,

ROBERT P. NIMMO,
Administrator.

[Circular 00–81–39]

FISCAL YEAR 1980 NATIONAL ACCOMPLISHMENT REPORT AND FISCAL YEAR 1981 NATIONAL AFFIRMATIVE ACTION PROGRAM PLAN FOR THE HIRING, PLACEMENT AND ADVANCEMENT OF HANDICAPPED INDIVIDUALS, INCLUDING DISABLED VETERANS

1. Purpose.

a. This circular transmits to all field stations, including area offices of the Department of Memorial Affairs, the VA's Fiscal Year 1980 National Accomplishment Report and Fiscal Year 1981 National Affirmative Action Program Plan for the Hiring, Placement and Advancement of Handicapped Individuals, Including Disabled Veterans.

b. The Accomplishment Report and the Affirmative Action Plan were developed in accordance with guidelines and instructions contained in the EEOC's (Equal Employment Opportunity Commission) Management Directive EEO–MD 708, dated February 20, 1981.

Since the timetable and period of coverage for Fiscal Year 1980 Affirmative Action Program Plans for the Hiring, Placement and Advancement of Handicapped Individuals, Including Disabled Veterans, were extended from September 30, 1980, to March 31, 1981 (EEO–MD 706, dated July 1, 1980), the Accomplishment Report for fiscal year 1980 covers the 18-month period from October 1, 1979, through March 31, 1981. The fiscal year 1981 National Plan, however, covers the last 6 months of fiscal year 1981, April 1, 1981, through September 30, 1981, as required by EEO–MD 708. The goals and results-oriented affirmative actions set forth in the fiscal year 1981 National Plan are agencywide in scope and should be implemented throughout the agency, where possible, to further equal employment opportunities for handicapped individuals and disabled veterans.

2. Submission of plans. EEOC's guidelines and instructions governing the submission of plans and accomplishment reports for the handicap program are applicable to National Plans for the Handicapped and National Reports of Accomplishments only. No submissions are required, or should be made, to EEOC by field stations, unless specifically requested by that agency. It should be noted however, that EEO–MD 708 (par. 6b) requires the development and implementation of plans for the handicapped at the local level, even though direct submissions to EEOC are not required, unless requested. Field stations, however, should submit a copy of their fiscal year 1981 affirmative action plans and fiscal year 1980 reports of accomplishments to the Affirmative Action Service (092), Office of Human Goals, VA Central Office, before September 30, 1981.

3. Report control number. Interagency Report Control Number 0234–EEO–XX has been assigned to this report.

4. Rescission. This circular expires October 1, 1981.

ROBERT P. NIMMO,
Administrator.

Attachment.

AFFIRMATIVE ACTION PROGRAM

For handicapped individuals including disabled veterans (IRCN 0234–EEO–XX).

FY 1980 Report of Accomplishments (October 1, 1979 through March 31, 1981 and FY 1981 Affirmative Action Plan (April 1, 1981 through September 30, 1981).

Veterans Administration.

810 Vermont Avenue, N.W., Washington, D.C. 20420.

Number of Employees Covered by This Plan, 232,801.

Rufus G. Johnson, Jr., Acting Director, Equal Employment Opportunity.

Robert P. Nimmo, Administrator of Veterans Affairs.

INTRODUCTION

1. This report on the Veterans Administration's Affirmative Action Program for the Hiring, Placement and Advancement of Handicapped Individuals Including Disabled Veterans is divided into two parts. Part 1 contains the Veterans Administration's FY 1980 National Report of Accomplishments. Part 2 contains the agency's FY 1981 National Affirmative Action Program Plan.

2. The Report of Accomplishments and the Affirmative Action Program Plan were developed in accordance with the guidelines and instructions contained in the Equal Employment Opportunity Commission's (EEOC) Management Directive EEO–MD–708, dated February 20, 1981. EEOC's Management Directive EEO–MD–706, dated July 1, 1980, extended the timetable for FY 1980 plans from September 30, 1980 to March 31, 1981, giving agencies a total of 18 months to meet the goals and objectives established in FY 1980 affirmative action program plans. Hence, the VA's National Report of Accomplishments covers the period October 1, 1979 through March 31, 1981 and the FY 1981 National Affirmative Action Program Plan covers the last six months of FY 1981, April 1, 1981 through September 30, 1981. It should be noted that two sets of printouts were required to cover the 18-month period for the Report of Accomplishments.

3. The following disabilities were targeted by EEOC (EEO–MD–703, dated December 6, 1979) for special emphasis and recruitment efforts during the transition period: deafness, blindness, missing extremities, partial paralysis, convulsive disorders, mental retardation, mental illness and distortion of limbs and/or spine. The disabilities selected for the target group (on an experimental basis) were chosen to provide a focus on severe handicaps that traditionally have caused persons to be excluded from the work force, and that could be identified relatively easily for recruitment purposes during the transition year. Targeting certain disabilities for special recruitment in no way legitimizes dscrimination against persons with other disabilities and in no way sanctions the discontinuance of affirmative action to hire handicapped individuals whose disabilities are not included in the targeted group.

INTERNATIONAL YEAR OF DISABLED PERSONS—1981

1. At the request of the White House, the Veterans Administration has taken the lead role in developing programs throughout the United States that serve to make both disabled persons and the public aware of efforts being made to train and assist physically as well as psychologically disabled persons.

2. The VA's Action Plan for the International Year of Disabled Persons includes the following goals:

a. Linkage of VA to all Federal agencies who deal with disability

b. Development of awareness throughout the agency of the needs of the disabled.

c. Improvement of the quality of life for individuals with disabilities

d. Education of the public and private sectors to the rights of disabled persons

e. Linkage of VA and community programs for disabled persons.

3. To promote the observance of the International Year of Disabled Persons, the Veterans Administration will be involved in the following activities:

a. The VA Vocational Rehabilitation program has been expanded to assist service-disabled veterans in achieving maximum independence in daily living, and to the maximum extent feasible to become employable, and to obtain and maintain suitable employment

b. Under the provisions of an updated agreement between the VA and the Department of Labor, the VA provides renewed opportunities for cooperative employment and training assistance to veterans and their dependents

c. Utilizing VA Career Development Centers to provide disabled and other veterans with career and job-related information

d. The establishment of six pilot regional Independent Living Centers

e. The opening of the first of two half-way houses for alcohol dependence

f. Convening a prosthetic and sensory aid exposition at the Washington-Sheraton Hotel, Washington, D.C., August 30–September 4, 1981

g. The establishment of a work evaluation unit to adapt prosthetic devices to specific job skills

h. Conducting employee awareness training sessions for the non-disabled on problems associated with specific disabilities such as blindness, deafness and wheelchair accessibility

i. Utilizing case managers to increase and facilitate the coordination of rehabilitation services

j. Encouraging VA field stations to sponsor special activities throughout the year which are designed to create a greater awareness of the capabilities and accomplishments of disabled persons. Suggested activities include sports, employer information projects, community involvement, participation on local committees, etc.

4. Basic to the observance of the International Year of Disabled Persons is the hope that this commemoration in honor of disabled persons will bring about a keener appreciation and awareness of the concerns, interests, achievements, capabilities and aspirations of disabled persons.

5. VA field stations have been asked to designate a staff member to serve as local chairperson and to develop and coordinate various programs and events. An 11-member Intra-Agency Committee will guide the agency's overall effort.

FISCAL YEAR 1980 REPORT OF ACCOMPLISHMENTS FOR THE AFFIRMATIVE ACTION PROGRAM FOR HANDICAPPED INDIVIDUALS INCLUDING DISABLED VETERANS

(October 1, 1979, through March 31, 1981)

STAFFING COMMITMENTS

a. Percentage of time spent by personnel with agencywide responsibility for affirmative action program for handicapped individuals including disabled veterans 150 percent.[1]

b. Number of coordinators designated in all component activities and field establishments, 215.

c. Percentage of time spent by component and field coordinators in implementing the program. Indicate the number in each group:

1–10 percent, 215; 11–100 percent, none.

d. Number of agency component activities and field establishments having appointing authority, 328.

A TRIBUTE TO THOMAS G. CORCORAN

Mr. THURMOND. Mr. President, today I would like to pay tribute to Thomas Gardiner (Tommy) Corcoran, a man who was one of Washington's most prominent lawyers and a so-called architect of the Franklin Roosevelt New Deal.

Tommy Corcoran was truly a great man, although I did not always agree with him politically. During his long years of public service, he was a model of efficiency, effectiveness, and integrity and made many fine contributions.

It was particularly significant that when he left Government service in 1940, after his years of helping to establish some of President Roosevelt's key policies, that his law office was besieged by some of the same corporate leaders who had most loudly denounced him when he worked for the New Deal economic policies. So many became his clients that his law firm, Corcoran, Foley, Youngman & Rowe, grew and prospered through subsequent decades. In fact, newspapers usually identified

[1] Includes one full-time employee (100 percent) plus 25 percent of time at each of the two levels of review and supervision.

him in his private career as a lawyer-lobbyist.

I admired Tommy Corcoran, too, for his support for the activities of Gen. Claire Chennault's Flying Tigers, American volunteer fighter pilots who flew missions against the Japanese before the American entry into the Second World War. He served as a lawyer for the organization, and did outstanding work in wrestling with the problem of shipping supplies around the world through South America and Africa and across the Himalaya Mountains to the Far East.

America lost a great native son when Thomas Corcoran passed away on December 6 of this year. I salute him for his many contributions, and I join his wide range of friends and loved ones in saluting his service.

Mr. President, I ask unanimous consent that four articles on Mr. Corcoran and his distinguished career—two from the Washington Post and the New York Times and two eulogies given by his former law partner, James Rowe, and Mrs. Claire Chennault—be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Dec. 9, 1981]

THOMAS GARDINER CORCORAN

If ever there was in "this gorgeous town" a disarmingly affable broker of political influence who enjoyed the mix of public service, ideas and friendships, it was Thomas G. (Tommy) Corcoran. Mr. Corcoran, who died here Sunday at the age of 80, was a principal strategist, insider and tireless point man for the New Deal revolution during some of its most perilous and interesting times. And "Tommy the Cork," as Franklin D. Roosevelt fondly referred to him, reveled in the role of lawyer-lobbyist (or "entrepreneur," as Mr. Corcoran would put it) in the high circles of all three branches of government.

What Mr. Corcoran knew and marketed so well was "what the government likes and does not like," an insight he mastered firsthand and marketed with great skill. With New Deal architect, White House teammate and longtime friend Benjamin V. Cohen, Mr. Corcoran became an invaluable administration figure and presidential counselor. It was this expertise that he later employed as a lawyer to seek and deliver results on behalf of major corporations that were doing business with the government.

His success in the private sector was a direct sequel to his influential role as engineer-designer of truly revolutionary policies. After all, it was the Corcoran-Cohen duo—known as the "hot-dog boys," an allusion to their mentor, Felix Frankfurter—that collaborated on the big acts, the enduring measures of the New Deal; the Securities and Exchange Commission Act, the Public Utilities Holding Company Act, the Federal Housing Administration Act, the Tennessee Valley Authority and the Wage and Hour Law. In the process, Mr. Corcoran also succeeded in attracting scores of highly capable, dedicated people to government service and important positions from which they were to make substantial contributions to public policy.

If critics had problems with Mr. Corcoran's later transition to private practice in government circles, neither he nor his clients did. Many of the very people who had damned him as a policy-maker were to find him a useful colleague and attorney in those later years, and he found these marriages of mutual interests rewarding in the fullest senses. With his infectious Irish humor and quick repartee, Mr. Corcoran delighted friends, legal adversaries and himself while gliding through the halls and offices of goevrnment.

"When I walk down the corridors of the Federal Power Commission," he once explained with a grin to a House subcommittee that was looking into his activities, "it's right down the main aisle . . . in broad daylight, with a brass band behind me." And that is how those who knew Tommy the Cork suspect he has just left their company.

[From the New York Times, Dec. 7, 1981]

THOMAS G. CORCORAN, LAWYER AND ADVISER TO ROOSEVELT, DIES

A lawyer of undisputed brilliance and wit, Thomas Gardiner Corcoran was the personification of the Washington insider whose enormous influence on legislation and Government dealings endured well beyond his heyday in the Roosevelt Administration. It often also made him the target of political opponents and those whose interests were affected by his backstage maneuvers.

He was one of Roosevelt's principal strategists in shaping such historic innovations as the Securities Act of 1933, the Securities Exchange Act of 1934 and the Fair Labor Standards Act of 1938.

The precise measure of his efforts rarely emerged. As a drafter of legislation and, later as a lobbyist-lawyer with countless friends in high positions, he worked behind the scenes.

Mr. Corcoran, a young protégé of Felix Frankfurter and a holdover from the Hoover Administration, became one of the "hot-dog boys," a band of bright young lawyers who guided Roosevelt's New Deal through some of its most perilous years.

HELPED SHAPE SECURITIES PANEL

He teamed with Benjamin V. Cohen in the battle to create the Securities and Exchange Commission, shaping it and steering it through the legislative shoals. Their victory was one of the New Deal's headiest moments.

Mr. Corcoran stood on the left flank of the Roosevelt staff, which often fought internally with such more conservative advisers as Postmaster General James A. Farley, a formidable power in the Democratic Party.

Men like Mr. Corcoran and Mr. Cohen were obscure lawyers at the time, working quietly to push the President's program through Congress. But by 1935, "Tommy the Cork," as Mr. Corcoran was called and other "bright young men" had become known well enough around the capital for their legislative influence and power of patronage to draw fire personally.

While clearing some of the laws most bitterly resisted by the opposition, Mr. Corcoran was also reported to have played an important role in Roosevelt's efforts to enlarge the Supreme Court and to "purge" Democratic legislators not wholly committed to his policies.

CONGRESSIONAL ANTAGONISM

Mr. Corcoran's activities then led to Congressional antagonism, which reportedly blocked plans to appoint him to a high Government position in 1941. He decided to return to private law practice in Washington and promptly built a flourishing clientele of businessmen dealing with the Government.

His opponents said he was a lobbyist for big interests, a charge that gave rise to a number of public quarrels and formal inquiries over the years, starting in 1941 and as recently as last year.

Thomas Gardiner Corcoran was born Dec. 29, 1900, in Pawtucket, R.I. He attended Brown University, where he was valedictorian and a member of Phi Beta Kappa, and earned both his bachelor's and master's degrees in 1922.

Just losing out on a Rhodes Scholarship, he enrolled at Harvard University Law School and quickly won the reputation as the most brilliant member of his class, an assessment with which Professor Frankfurter agreed. He graduated at the head of his class in 1925 and went on to a doctor of juristic science the following year.

SECRETARY TO JUSTICE HOLMES

His performance also won him the honor of serving a year in Washington as secretary to Justice Oliver Wendell Holmes of the Supreme Court.

For five years, Mr. Corcoran practiced corporate law in New York with the Wall Street firm of Colton & Franklin, specializing in the reorganization of companies and the issuance of new stocks.

In 1932, after a short stint with the Federal Reserve Board, he was appointed by President Herbert Hoover as counsel to the newly formed Reconstruction Finance Corporation in Washington. That year, Mr. Hoover was soundly defeated by Mr. Roosevelt, but Mr. Corcoran, having always been a Democrat, remained in his post to build his influence in the Government and the White House.

Mr. Corcoran was introduced to Mr. Roosevelt by Professor Frankfurter, who had never lost touch with his "favorite pupil." He was assigned to the Treasury as assistant to the Secretary.

HELPED BY SECRETARY

Mr. Corcoran received much help in those days from Mr. Roosevelt's secretary, Marguerite Lehand, who was a personal friend. Gifted with what seemed like boundless energy, reviving himself with large doses of black coffee and dextrose through merciless work days, all he had to do on the telephone was to use his opening gambit, "This is Tommy Corcoran at the White House," and Cabinet members, legislators and administrators snapped to attention.

"White House Tommy" became one of his nicknames, though his detractors had some less endearing phrases for him. Many, even among the New Dealers, resented his closeness to the President, who often followed his advice and whose most-remembered speeches bore the mark of Mr. Corcoran's trenchant wit and sharp phrase-making.

In the early 1930's, Mr. Corcoran also served as special assistant to the Attorney General. In 1934, he returned to the Reconstruction Finance Corporation as special counsel, a post he kept until the end of Roosevelt's second term.

The peak of his power came in the President's fights to "pack" the Supreme Court and to defeat certain members of Congress in the 1938 election.

Although he disagreed with both these aims, Mr. Corcoran loyally fought so hard for them that when they failed he had to pay the price: A new Presidential favorite, Harry Hopkins, took his place.

In 1940, he wed Margaret Dowd, the closest of his secretaries.

CALLED BEFORE INVESTIGATIVE PANEL

Frustrated in every attempt to get a better job at a higher salary, Mr. Corcoran quit for the rewards of private practice the next year. Shortly thereafter, he was called before a Senate investigations committee to answer the first of what was to become periodic charges of influence-peddling on behalf of private clients.

He testified that he earned $100,000, then a huge sum, in the first few months as a private lawyer. It was not established then, or ever, that he had done anything illegal.

In the words of a friend, Mr. Corcoran's trouble was that he worked as strenuously and in the same manner for private interests as he once had for the President: "He has never been able to make a distinction between them, or to realize that what might be justified within the Government cannot be from outside it."

Mr. Corcoran's wife died in 1967. He is survived by four sons, Thomas Jr. of Washington, David of Bethesda, Md., Howard of Potomac, Md., and Christopher of Newfoundland; a daughter, Cecily Kihn of Philadelphia; two brothers, David of Waterville Valley, N.H., and Judge Howard Corcoran of the District Court of Washington, and six grandchildren.

THOMAS GARDINER CORCORAN—1900–1981

(By James Rowe)

I thought he would live forever. The son of a Yankee Puritan mother and an Irish father, he inherited from one the persistent driving diligence and from the other the imagination and irresistible ebullience and gaiety that carried him throughout his life. His incredible energy was fearful to behold. A few weeks ago he said to his doctor that he had often found himself tired recently and he wondered why. Dr. Abernethy said, "It goes with the territory once you're 80"; and he is said to have replied, "Not with my territory, it doesn't!"

He was a New Hampshire mountaineer and a football player. It took him some years to become varsity center at Brown because of his size—but he made it. He was a downhill skier, indifferent at best if one looks back on his broken ankles and legs—but he skied. He was a first-rate scholar when he wished to be, valedictorian of his class, a Phi Beta Kappa, and on the Harvard Law Review. He was secretary to Justice Oliver Wendell Holmes of the Supreme Court: There was no greater kudo for a young lawyer in the nation.

He was a great advocate at the bar, a brief writer of excellence and a superb intellectual persuader of men. He was an unparalled legislative draftsman. Except for Franklin Roosevelt himself, he and Ben Cohen—Corcoran and Cohen—were a huge part of the New Deal. They were the generals and captains of their young armies. The New Deal legislation which has remained on the statute books for almost a half century are testaments to them both. Together they were much stronger than just adding them one to one. They had all through the government during those New Deal years scores and scores of youthful juniors awaiting their orders. Ben was the ideal man, the visionary, the man of wisdom. Tom was the quarterback, the strategist, the persuader.

Since Sunday, my phone has been ringing from all over the country as members of this now thin gray line of the New Deal mourn one of their own.

With the possible exception of the Founding Fathers, there was never before and certainly has not been since, the excitement, the intellectuality, the excellence, or the sense of accomplishment that existed in the New Deal. It is remembered by the hundreds, even thousands of the young men and women who flocked to Washington to serve under such leaders as Roosevelt and his Braintrusters.

Quoting his old master, Justice Holmes, whom Tom loved to quote, who was then speaking of his old Civil War comrades, but whose words because of Tom and Ben—Corcoran and Cohen—also apply to the New Dealers:

"Through our great good fortune, in our youth our hearts were touched with fire." [1]

Tom was, of course, himself a man for heroes. He had great ones like F.D.R. and Oliver Wendell Holmes. General Claire Chennault who led the American Flying Tigers in China against the Japanese was another. Tom supplied the General with men and material and took on that war "over the hump" against the Japanese as his own personal war.

As a private lawyer, he treated his clients the way he would himself. Once he took them on as clients they were his cause. I remember a conversation years ago with his old close friend, the late Ben Sonnenberg, the famous New York public relations man. I ran into him somewhere on Cape Cod and he asked: "How's Tommy?" I said, "About the same." He said, "You know, Tommy has one great failing. I do a great deal of work these days for the cigarette companies and they are all dreadfully fearing the cancer attack on cigarettes. I never forget that it is they who have cancer, not me. But Tommy always gets cancer along with his clients."

It was, I feel, a valid point. He was indeed a last-ditch fighting crusader for those clients even though some of us felt occasionally that some of them didn't deserve it. But Tom always did.

Essentially, he had the soul of a schoolmaster. When Peggy died, almost a quarter of a century ago, he became mother as well as father to his children. He kept an acerb eye on their studies. They had to excell in their studies; they also had to do everything else well. They all took all kinds of lessons in golf, in tennis, dancing, fencing, riding, whatever. I often thought that if he ordered all of them out into the field, handed each a bow and arrow and directed them to put the arrow through a target at 100 paces, everyone of them would have done it with ease. He said at least 1,000 times to them and at least 100 times to me that he could give his children only one thing, the ability to take care of themselves in an unstable, difficult, and dangerous world. And proudly he produced three lawyers, two doctors, and one landscape architect.

Last Sunday, at his family's request, I called Lady Bird Johnson, widow of the President. She said immediately: "A large part of my life is gone—a sparkling, glittering part."

He was always the most generous man I have ever known. Yesterday, I called an eminent New England judge, a law school classmate of his. He said only—"He was the most generous man I ever met. If you have the time I will give you chapter and verse." I said, "Judge, I have the time but I don't need the chapter and verse. I first met him in 1934 when he was instrumental in getting me the clerkship with Oliver Wendell Holmes. I have been his law partner almost thirty-five years and I learned about his generosity long ago."

Once more I remember the words of his hero, Justice Holmes—about what Holmes, almost a century ago, had said about an old lawyer friend of his own.

When a great tree falls, we are surprised to see how meager the landscape seems without it. So when a great man dies. . . .[2]

EULOGY FOR THOMAS G. CORCORAN, ESQ.

(By Anna Chennault)

This morning we gather here to pay tribute to a wonderful human being, Thomas G. Corcoran. The world will not see his like again. I am not only speaking on behalf of my family, but also on behalf of many of his friends around the world, particularly in Asia, who have sent condolences and asked me to express their sympathy to the family.

It is not easy to say the last farewell to a man like Tom Corcoran. He was not only a generous person but so much fun to be with. In twenty days he would have been 81 but no one thought of his age. He will always remain young in our memory. We shall think of him in the days ahead with sorrow—but also with pride. For those of us who were fortunate enough to know him well it certainly was a crowning experience to be his close friend.

I was one of the fortunate ones who got to know him during his twilight years when I arrived in Washington twenty years ago, and I was gratified that I opened a new horizon for him; in a way a new dimension in his life that is the wonderful world of Asia. He learned much about that part of the world with curiosity and fascination and gained so many friends in the Pacific and Southeast Asia. Some were just humble citizens but many were leaders in high positions.

As for my husband, General Chennault, the leader of the Flying Tigers, he had the good fortune to work with Tom during the Second World War. They spent some of the darkest hours together but they also took comfort in seeing the ending of the Second World War in the Pacific in 1945. From then on they remained the best of friends until the death of my husband. In triumph as well as in sorrow, they got along well because they were both men of the same character—generous, courageous, thoughtful, caring and with a great sense of duty to their country and compassion to mankind.

During the twenty years that I have known him, I consider his greatest contribution was his caring for the young people. I am sure many young lawyers today, without the assistance of Tom Corcoran would not be where they are today. I have seen him take care of sick friends, while he himself was not feeling well. I have seen him go out of his way to care for people in need while he himself probably needed caring more than the others. For this reason Tom Corcoran lived a rich life—a life full of friends, full of excitement, full of hope and full of dreams, full of passion for challenge. He was not a man living in the past but always talking about the future. He has done well for his friends and for his country.

As we watch the world go through many crises and disasters, as we see many free men and women who fought to cherish the dignity of man and honor to their countries, we have a great sense of loss with the passing of this outstanding American. Tommy, not only with the silver tongue, but with the moving touch of the piano. He made us laugh, he taught us to sing—whereever he went there was always music. He made the most humble person feel important and many presidents have cherished his friendship, as well as advice.

And what a great teacher he was.

Yesterday he was still with us but today he is with us no more. As many of his friends will remember, he was a man always late for appointments. There were never enough hours for him to work and how he loved to work! Tom always said he would live to be a thousand because he had so much to do but he did not keep his promise. He surprised us in departing in such a hurry but his hopes and his dreams shall always be with us. We shall always remember the way he laughed, the way he sang, the way he touched the piano and accordion, the way he warmed

---

[1] Mr. Justice Holmes, Memorial Day address, 1884.

[2] Oliver Wendell Holmes on Sidney Bartlett, Boston, March 23, 1889.

up a cool gathering. Now that his rendevous with destiny is over, we are all poorer because Thomas G. Corcoran has bid us farewell.

IN MEMORY OF A GREAT HUMAN BEING: JERRY WURF

Mr. MATSUNAGA. Mr. President, earlier today I was among hundreds of mourners who attended the memorial services held at the Washington Hebrew Congregation Center for the late Jerry Wurf, who for 17 years and until his death was president of the 1,400,000-member American Federation of State, County & Municipal Employees (AFSME). As one who had the good fortune to know Jerry Wurf personally and as one who admired him for what he was, I could not withhold my tears, as speaker after speaker extolled the virtues of this great human being. It dawned upon me that he was even greater than the man I had pictured him to be.

The working people of America have lost a real champion for their cause, and all Americans have suffered the loss of one who has advanced the cause of American democracy more than any other contemporary leader.

Unfortunately, he had to leave us less than a month before he was scheduled to receive a small token of recognition of his outstanding leadership in the fight for human rights, in the form of the Labor Human Rights Award from the National Trade Union Council of the Jewish Labor Committee.

Jerry Wurf devoted his life to the welfare of working people and gained for them improved wages, better working conditions, along with self-pride and human dignity. He had a profound love for his fellow man and a deep belief in the dignity of honest labor which was undiminished at the time of his death. His passing at the age of 62 brought to a close one of the most remarkable chapters in the history of the labor mcvement, and he left behind not only a bereaved family but a host of sorrowing friends whose lives he had enriched.

We whose lives were enhanced by his actions owe a debt of gratitude to his widow, Mildred, his son, Nicholas, and his daughters, Abigail and Linda Susan, for their having unselfishly shared with us the love and compassion of a great leader and a super human being.

Mr. President, I ask unanimous consent that an article about Jerry Wurf which appeared in the New York Times of December 12, 1981, be printed in the RECORD following my statement.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

JERRY WURF, 62, UNION CHIEF, DIES; WAS HEAD OF MUNICIPAL WORKERS

Jerry Wurf, president of the nation's largest union of public employees, the American Federation of State, County and Municipal Employees, died of a heart attack Thursday at George Washington University Hospital in Washington. He was 62 years old.

Mr. Wurf, who lived in the Cleveland Park section of Washington, had suffered from a painful disease of the nerve endings recently and had been hospitalized for about a month after surgery, according to a hospital spokesman, Irene Haske.

Although he was never a public employee, Mr. Wurf was a union leader for more than 40 years and, more than any other person, was credited with building public employee unionism in this country. The public labor force has grown to more than 18 million workers.

In the 1950's and early 1960's be guided and built District Council 37, the large public employees' union in New York City, into a major component of the national union.

PRESIDENT FOR 17 YEARS

For the last 17 years, Mr. Wurf was president of the national union and was largely responsible for building its membership from 200,000 to more than a million, including police officers, fire-fighters, sanitation and hospital workers, office clerks and other employees of the nation's cities, counties and states.

Mr. Wurf, a Brooklynite with a foghorn voice, curly iron-gray hair and bushy eyebrows behind horn-rimmed spectacles, was a powerful and persuasive speaker. He was known as a maverick in the union movement because he did not readily fall into line with whatever cause was being advanced by the leadership.

"On some issues," Mr. Wurf said in an interview last September, "there is knee-jerk solidarity, and on other issues there is no solidarity."

Although he did not oppose the striking air traffic controllers, for example, he made no secret that he did not favor their tactics.

As head of the largest component union in the American Federation of Labor and Congress of Industrial Organizations, he often found himself at odds with George Meany, the federation's longtime president, and, while he led many walkouts, he repeatedly declared that he did not favor strikes for their own sake.

He always believed that arbitration procedures should be established in situations, like the controllers' strike or even among police and fire fighters, in which public workers were locked in confrontations with the Government that neither side could win.

Even so, it was under Mr. Wurf's leadership and tough negotiating stances that his union made rapid gains at the bargaining table. And it was a walkout of District Council 37 that led to the demise of New York State's Condon-Wadlin Act, which required the dismissal of public employees who struck. That statute was replaced by the Taylor Law, which prescribed fines and other less severe penalties.

In recent months Mr. Wurf had been in the forefront of labor's opposition to the Reagan Administration's budget cuts. His last major address, in fact, was at the Solidarity Day rally in Washington Sept. 19. His illness forced him to miss the A.F.L.–C.I.O. convention in New York City in November and a meeting of the federation's executive council with President Reagan on Dec. 2.

Mr. Wurf had supported Jimmy Carter in the last Presidential election after first leaning to the candidacy of Senator Edward M. Kennedy. Over the years, Mr. Wurf had become known as something of a plunger on political losers. He was among the first to endorse the Presidential candidacy of Edmund S. Muskie in 1971, and he later supported George McGovern.

BORN 1919 IN NEW YORK

Jerome Wurf was born in New York City on May 18, 1919, the son of a textile jobber. He attended New York University and, when he graduated in 1940, found work as a cafeteria busboy and cashier. He soon was organizing his fellow workers.

In 1947, Arnold Zander, the founder and president of the federation, hired Mr. Wurf as an organizer and later gave him the job of building District Council 37, which is now headed by Victor Gotbaum. It had less than 1,000 members when he joined, but the membership had swelled to 38,000 by 1964, when he won the national union presidency from Mr. Zander.

When he assumed the presidency, he took over a union that was nearly bankrupt and had ties to the Central Intelligence Agency and other questionable features. He began by selling union housing projects and some union buildings and began putting the union on a sound financial footing.

He also severed links to the C.I.A. and saw the union through a series of major tests, including a strike by black sanitationmen in Memphis in 1968 to protest racial discrimination.

In April 1978, his union became the largest unit of the A.F.L.–C.I.O. when it absorbed a former competitor, the Civil Service Employees Association of New York. In recent years, it has aggressively recruited women and blacks, two groups often ignored by the labor movement because of their traditional resistance to organization.

Mr. Wurf was named a vice president of the A.F.L.–C.I.O. in 1969, but his influence in the governing body was often vitiated by his opposition to its postures. Among other things, he opposed United States military involvement in Vietnam, which Mr. Meany strongly supported.

Mr. Wurf is survived by his wife, Mildred, two daughters and a son. A private funeral will be held tomorrow and a memorial will be held next Wednesday.

LYNWOOD HALL

Mr. BRADLEY. Mr. President, I would like to publicly acknowledge and thank Lynwood Hall for his cooperation and assistance to me and all of the Democratic Members of the Senate during the last 3 years.

I am saddened, as I know many of my colleagues are, that Lynwood has decided to return to his home State of Georgia where he will pursue more pastoral interests—helping his father run a family farm, developing his outstanding artistic talents, and, perhaps, engaging in the peaceful art of politics.

For 5 years Lynwood has assisted all of the Members on our side of the aisle and our staffs with graciousness. He approached the important work he handled efficiently and thoroughly. I deeply appreciate the many kindnesses he has shown me.

Lynwood has mentioned his great admiration for Thomas Jefferson—a great philosopher, a prosperous and industrious farmer, a creative individualist, and a true gentleman. All of those attributes are found in Lynwood. I wish him an equal amount of success.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Marks, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

REPORTS OF THE NATIONAL SCIENCE BOARD FOR CALENDAR YEARS 1979 AND 1980—MESSAGE FROM THE PRESIDENT—PM 103

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying reports; which was referred to the Committee on Labor and Human Resources:

To The Congress of the United States:

In accordance with the requirements of Section 4(j) of the National Science Foundation Act, as amended, I hereby transmit the Twelfth Annual Report of the National Science Board for calendar year 1979 and the Thirteenth Annual Report of the National Science Board for calendar year 1980. Both reports cover the period prior to my term of office.

RONALD REAGAN.

THE WHITE HOUSE, *December 16, 1981.*

PRESIDENTIAL APPROVAL

A message from the President of the United States announced that on December 15, 1981, he had approved and signed the following joint resolution:

S.J. Res. 115. Joint resolution to approve the President's recommendation for a waiver of law pursuant to the Alaska Natural Gas Transportation Act of 1976.

MESSAGES FROM THE HOUSE

At 3:37 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1196) to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize appropriations for development and security assistance programs for the fiscal year 1982, to authorize appropriations for the Peace Corps for the fiscal year 1982, and for other purposes.

The message also announced that the House has passed the following bills and joint resolutions, without amendment:

S. 657. An act to designate the Department of Commerce Building in Washington, the District of Columbia, as the "Herbert Clark Hoover Department of Commerce Building";

S. 1192. An act to amend the National Visitor Center Facilities Act of 1968 to provide for the rehabilitation and completion of Union Station in Washington, District of Columbia, and for other purposes;

S.J. Res. 34. Joint resolution to provide for the designation of the week commencing with the third Monday in February 1982 as "National Patriotism Week";

S.J. Res. 57. Joint resolution to provide for the designation of February 7 through 13, 1982, as "National Scleroderma Week";

S.J. Res. 84. Joint resolution to proclaim March 19, 1982, "National Energy Education Day"; and

S.J. Res. 136 Joint resolution to validate the effectiveness of a plan for the use and distribution of funds appropriated to pay a judgment awarded to the San Carlos Tribe of Arizona.

The message further announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4331) to amend the Omnibus Reconciliation Act of 1981 to restore minimum benefits under the Social Security Act.

The message also announced that the House agrees to the amendment of the Senate to the following bill:

H.R. 4894. An act to authorize the Secretary of the Interior to disburse certain trust funds of the Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin, and for other purposes.

The message further announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4559) making appropriations for foreign assistance and related programs for the fiscal year ending September 30, 1982, and for other purposes; it recedes from its disagreement to the amendments of the Senate numbered 53, 70, 73, and 142, and has agreed thereto; and it recedes from its disagreement to the amendments of the Senate numbered 22, 23, 24, 25, 38, 62, 63, 89, and 138, and has agreed thereto, each with an amendment, in which it requests the concurrence of the Senate.

At 6:12 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House has passed the following bill and joint resolution, without amendment:

S. 1976. An act to amend the Act of July 31, 1946, as amended (40 U.S.C. 193a); and

S.J. Res. 121. Joint resolution to provide for the designation of the year 1982 as the "Bicentennial Year of the American Bald Eagle" and the designation of June 20, 1982, as "National Bald Eagle Day."

The message also announced that the House has agreed to the following concurrent resolution, without amendment:

S Con. Res. 56. Concurrent resolution authorizing the reprinting of the committee print entitled "Investigation of Senator Harrison A. Williams, Jr."

The message further announced that the House agrees to the amendments of the Senate to the bill (H.R. 4879) to clarify the treatment of international banking facility deposits for purposes of deposit insurance assessment and to remove certain limitations on the mortgage loan purchase authority of the Federal Home Loan Mortgage Corporation and the Federal National Mortgage Association.

The message also announced that the House agrees to the amendment of the Senate to the amendments of the House to the bill (S. 271) to repeal section 222 of the Communications Act of 1934.

The message further announced the House agrees to the amendment of the Senate to the bill (H.R. 1797) to direct the Secretary of the Department in which the U.S. Coast Guard is operating to cause the vessel *Capt. Tom* to be documented as a vessel of the United States so as to be entitled to engage in the coastwise trade.

The message also announced that the House has passed the following bill, with amendments:

S. 1204. An act to amend the Noise Control Act of 1972, as amended by the Quiet Communities Act of 1978.

The message further announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 4353. An act to amend the Act entitled "An act to establish a uniform law on the Subject of Bankruptcies", approved November 6, 1978; and

H.R. 5116. An act to amend the Act of November 6, 1978 with respect to certain fees charged under the Bankruptcy Act.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 231 Concurrent resolution to authorize the erection of certain structures at the west front of the Capitol in connection with a rally to be held on January 15, 1982, in commemoration of the birth of Dr. Martin Luther King.

At 8:15 p.m., a message from the House of Representatives, delivered by Mr. Gregory, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1086) to extend and revise the Older Americans Act of 1965, and for other purposes.

The message also announced that the House has agreed to the amendment of the Senate to each of the following bills:

H.R. 779. An act to authorize the Secretary of the Army to contract with the Tarrant County Water Control and Improvement District Numbered 1 and the city of Weatherford, Tex., for the use of water supply storage in Benbrook Lake, and for other purposes;

H.R. 4327. An act to amend the Immigration and Nationality Act, and for other purposes; and

H.R. 5159. An act to amend the Internal Revenue Code of 1954 to provide a temporary increase in the tax imposed on producers of coal, and for other purposes.

The message further announced that the House agrees to the amendment of the Senate to the amendments of the House to the joint resolution (S.J. Res. 100) to authorize the participation of the United States in a multinational force and observers to implement the treaty of peace between Egypt and Israel.

The message also announced that the House agrees to the amendments of the

Senate to the amendment of the House to the bill (S. 1946) to provide for the final settlement of certain claims against Czechoslovakia, and for other purposes.

The message further announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3567) to authorize appropriations for the fiscal years 1982 and 1983 to carry out the purposes of the Export Administration Act of 1979, and for other purposes.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1211) to extend the Toxic Substances Control Act for 1 year.

The message further announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4503) to amend the Federal Water Pollution Control Act to authorize funds for fiscal year 1982, and for other purposes.

The message also announced that the House has passed the following joint resolution, without amendment:

S.J. Res. 117. Joint resolution to authorize and request the President to designate the week of January 17, 1982 through January 23, 1982, as "National Jaycee Week".

The message further announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 5273. An act to allow the George Washington University Higher Education Facilities Revenue Bond Act of 1981 of the District of Columbia to take effect immediately.

The message also announced that the House has agreed to the following concurrent resolution; without amendment:

S. Con. Res. 54. Concurrent resolution to provide for the printing of 3,000 copies of the General Explanation of the Economic Recovery Tax Act of 1981.

HOUSE BILL REFERRED

The following bill was read twice by unanimous consent, and referred as indicated:

H.R. 5116. An act to amend the Act of November 6, 1978 with respect to certain fees charged under the Bankruptcy Act; to the Committee on the Judiciary.

HOUSE BILLS REFERRED

The following bills, received from the House of Representatives yesterday, December 15, 1981, were read twice by unanimous consent, and referred as indicated.

H.R. 4961. An act to make miscellaneous changes in the tax laws, and for other purposes; to the Committee on Finance; and

H.R. 5021. An act to extend the date for the Submission to the Congress of the report of the Commission on Wartime Relocation and Interment of Civilians; to the Committee on the Judiciary.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, December 16, 1981, he had presented to the President of the United States the following enrolled bill:

S. 1948. An act to permit to become effective certain Farm Credit Administration regulations which expand the authority of financing institutions, other than farm credit system institutions, to borrow from and discount with Federal intermediate credit banks.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. McCLURE, from the Committee on Energy and Natural Resources, without amendment:

S.J. Res. 111. Joint resolution consenting to an extension and renewal of the interstate compact to conserve oil and gas (Rept. No. 97-304).

By Mr. ROTH, from the Committee on Governmental Affairs:

Report to accompany the bill (S. 1080) to amend the Administrative Procedure Act to require Federal agencies to analyze the effect of rules to improve their effectiveness and to decrease their compliance costs; to provide for a periodic review of regulations, and for other purposes (Rept. No. 97-305).

By Mr. THURMOND, from the Committee on the Judiciary:

Report to accompany the bill (H.R. 4775) to recognize the organization known as Former Members of Congress (Rept. No. 97-306).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation:

Anthony J. Calio, of Maryland, to be Deputy Administrator of the National Oceanic and Atmospheric Administration;

(The above nomination from the Committee on Commerce, Science, and Transportation was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

Mr. PACKWOOD. Mr. President, I also report favorably two nomination lists in the Coast Guard which were received by the Senate and appeared in the CONGRESSIONAL RECORD on December 15, 1981, and, to save the expense of reprinting them on the Executive Calendar, ask unanimous consent that they lie on the Secretary's desk for the information of Senators.

The PRESIDING OFFICER. Without objection, it is so ordered.

By Mr. PERCY, from the Committee on Foreign Relations:

Ex. B, 95-1. Two related Protocols done at Montreal on September 25, 1975, entitled: A. Additional Protocol No. 3 to Amend the Convention for the Unification of Certain Rules Relating to International Carriage by Air, signed at Warsaw on October 12, 1929, As Amended by the Protocols done at the Hague, on September 28, 1955, and at Guatemala City, March 8, 1971: and Montreal Protocol No. 4 to Amend the Convention for the Unification of Certain Rules Relating to International Carriage by Air, signed at Warsaw on October 12, 1929, as Amended by the Protocol done at the Hague on September 8, 1955 (with certain conditions and recommendations) (Ex. Rept. No. 97-45).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. STEVENS:

S. 1976. A bill to amend the act of July 31, 1946, as amended (40 U.S.C. 193a); considered and passed.

By Mr. JOHNSTON:

S. 1977. A bill to repeal the Public Utility Holding Company Act of 1935 as no longer necessary to accomplish the purpose for which it was enacted; to the Committee on Banking, Housing, and Urban Affairs.

S. 1978. A bill to quiet title and possession with respect to a certain private land claim in Livingston Parish, Louisiana; to the Committee on Energy and Natural Resources.

By Mr. GRASSLEY:

S. 1979. A bill to eliminate the duty on sulfaguanidine, sulfapyridine, and sulfathiazole; to the Committee on Finance.

By Mr. BOSCHWITZ:

S. 1980. A bill for the relief of Ms. Uasantha Senerath; to the Committee on the Judiciary.

S. 1981. A bill for the relief of Dr. Ching Hon Pui; to the Committee on the Judiciary.

By Mr. SCHMITT (for himself, Mr. WARNER, and Mr. JEPSEN):

S. 1982. A bill to amend the Strategic and Critical Materials Stock Piling Act and the Defense Production Act of 1950 to strengthen military preparedness, and for other purposes; to the Committee on Armed Services.

By Mr. SYMMS (for himself and Mr. WALLOP):

S. 1983. A bill to amend the Internal Revenue Code of 1954 to provide transitional rules for estate and gift tax treatment of disclaimers of property interests created by transfers before November 15, 1958; to the Committee on Finance.

By Mr. McCLURE (for himself, Mr. MELCHER, Mr. PRESSLER, Mr. HEFLIN, Mr. GOLDWATER, and Mr. EXON):

S. 1984. A bill to amend the Federal Trade Commission Act to protect the legislative and regulatory authority of the state legislatures, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. BENTSEN:

S. 1985. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for dividends paid by certain small businesses and to provide simplification in accounting rules related to inventory; to the Committee on Finance.

By Mr. MELCHER:

S. 1986. A bill to provide for the use and distribution of funds awarded the Blackfeet and Gros Ventre Tribes of Indians and the Assiniboine Tribe of the Forth Belknap Indian Community, et al. in dockets numbered 250-A and 279-C by the United States Court of Claims, and for other purposes; to the Select Committee on Indian Affairs.

By Mr. CRANSTON:

S. 1987. A bill to amend the Social Security Act to provide general revenue funding for successful programs providing rehabilitation services to individuals in receipt of dis-

ability benefits under title II or XVI of such Act; to the Committee on Finance.

By Mr. STENNIS:

S. 1988. A bill to designate Domiciliary Number 1 at the Veterans' Administration Medical Center in Biloxi, Mississippi, as the "William B. Sheppard Domiciliary."; to the Committee on Veterans Affairs.

By Mr. DECONCINI (for himself, Mr. JACKSON, and Mr. JOHNSTON):

S. 1989. A bill to amend title XVIII of the Social Security Act to provide medicare coverage under part A for alcoholism treatment services, and to provide payment for such services on a charge basis; to the Committee on Finance.

By Mr. THURMOND:

S. 1990. A bill to amend title 10, United States Code, to revise and codify the permanent provisions of law relating to military construction and military family housing; to the Committee on the Judiciary.

By Mr. HOLLINGS:

S. 1991. A bill for the relief of Ms. Elizabeth Ann Jones-Smoak; to the Committee on the Judiciary.

By Mr. MATHIAS (for himself, Mr. KENNEDY, Mr. METZENBAUM, Mr. WEICKER, Mr. BIDEN, Mr. CHAFEE, Mr. MOYNIHAN, Mr. CRANSTON, Mr. ANDREWS, Mr. BAUCUS, Mr. BENTSEN, Mr. BOREN, Mr. BOSCHWITZ, Mr. BRADLEY, Mr. BUMPERS, Mr. BURDICK, Mr. CANNON, Mr. CHILES, Mr. ROBERT C. BYRD, Mr. COHEN, Mr. DANFORTH, Mr. DECONCINI, Mr. DIXON, Mr. DODD, Mr. DOMENICI, Mr. DURENBERGER, Mr. EAGLETON, Mr. FORD, Mr. GLENN, Mr. HART, Mr. HATFIELD, Mr. HEINZ, Mr. HOLLINGS, Mr. HUDDLESTON, Mr. INOUYE, Mrs. HAWKINS, Mr. JACKSON, Mrs. KASSEBAUM, Mr. LEAHY, Mr. LEVIN, Mr. LONG, Mr. MATSUNAGA, Mr. MITCHELL, Mr. PACKWOOD, Mr. PELL, Mr. PERCY, Mr. PRESSLER, Mr. PROXMIRE, Mr. PRYOR, Mr. QUAYLE, Mr. RIEGLE, Mr. ROTH, Mr. SARBANES, Mr. SASSER, Mr. SPECTER, Mr. STAFFORD, Mr. TSONGAS, Mr. WILLIAMS, Mr. JOHNSTON, Mr. STEVENS, and Mr. MELCHER):

S. 1992. A bill to amend the Voting Rights Act of 1965 to extend the effect of certain provisions, and for other purposes; to the Committee on the Judiciary.

By Mr. MATHIAS:

S. 1993. A bill to make amendments to the District of Columbia Self-Government and Governmental Reorganization Act relating to the judiciary; to the Committee on Governmental Affairs.

By Mr. KENNEDY:

S. 1994. A bill to conserve credit by restricting the availability of credit for unproductive corporate mergers and other speculative purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. DOLE (for himself and Mr. EAST):

S. 1995. A bill to remedy procedural and structural defects in the criminal justice system: to the Committee on the Judiciary.

By Mr. DOLE (for himself, Mr. EAST, and Mr. GRASSLEY):

S. 1996. A bill to provide for more effective deterrents for violent crime offenders; to the Committee on the Judiciary.

By Mr. DOLE:

S. 1997. A bill to provide assistance to State and local governments in combining crime; to the Committee on the Judiciary.

By Mr. MATHIAS:

S. 1998. A bill to provide preferential treatment under the Immigration and Nationality Act to certain aliens who are retired officers or employees of certain international organizations, members of their families, or surviving relatives of deceased officers or employees of such organizations; to the Committee on the Judiciary.

By Mr. WARNER:

S. 1999. A bill to amend the Act to provide for the establishment of the Wolf Trap Farm Park in Fairfax County, Virginia, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. DOLE (for himself, Mr. HEFLIN, Mr. THURMOND, Mr. EAST, Mr. BAUCUS, Mr. SIMPSON, and Mr. DECONCINI):

S. 2000. A bill to amend title 11, United States Code, to establish an improved basis for providing relief under Chapter 7, and for other purposes; to the Committee on the Judiciary.

By Mr. HATCH (for himself, Mr. THURMOND, and Mr. CRANSTON):

S. 2001. A bill to amend the Lanham Trademark Act to prohibit any State from requiring that a registered trademark be altered for use within such State and to encourage private enterprise with special emphasis on the preservation of small business; to the Committee on the Judiciary.

By Mr. HUDDLESTON (for himself and Mr. ABDNOR):

S. 2002. A bill to assure that an intensive course of English instruction is an integral part of the bilingual education program and that participation in the bilingual education program will in most cases be limited to one year, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. HUDDLESTON (for himself, Mr. CHILES, Mr. HATFIELD, Mr. WARNER, Mr. BUMPERS, Mrs. HAWKINS, Mr. JOHNSTON, and Mr. GORTON):

S. 2003. A bill to amend the Immigration and Nationality Act with respect to procedures for the annual admission of refugees; to the Committee on the Judiciary.

By Mr. PELL:

S. 2004. A bill for the relief of William J. Games; to the Commission on Finance.

By Mr. MATSUNAGA (for himself and Mr. INOUYE):

S. 2005. A bill to enable the Native Hawaiians Study Commission to accept gifts and voluntary services; to the Committee on Energy and Natural Resources.

By Mr. HELMS:

S.J. Res. 137. A joint resolution to amend the Constitution to preserve the right to life; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. STEVENS (for Mr. DOLE):

S. Con. Res. 54. A concurrent resolution to provide for the printing of 3,000 copies of the General Explanation of the Economic Recovery Tax Act of 1981; considered and agreed to.

By Mr. STEVENS (for Mr. HELMS) (for himself and Mr. HUDDLESTON):

S. Con. Res. 55. A concurrent resolution to authorize the Secretary of the Senate to make technical corrections in the enrollment of the bill (S. 884) to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes; considered and agreed to.

By Mr. STEVENS (for Mr. WALLOP):

S. Con. Res. 56. A concurrent resolution authorizing the reprinting of the committee print entitled "Investigation of Senator Harrison A. Williams, Jr."; considered and agreed to.

By Mr. BAKER:

S. Con. Res. 57. A concurrent resolution providing for the sine die adjournment of the Ninety-seventh Congress, First Session; considered and agreed to.

By Mr. TSONGAS (for himself, Mr. JEPSEN, Mr. PERCY, Mr. DODD, Mr. MOYNIHAN, Mr. JACKSON, Mr. RIEGLE, and Mr. BOSCHWITZ):

S. Con. Res. 58. A concurrent resolution expressing the sense of the Congress with respect to the continued internal exile and treatment by their Government of the Soviet Union of Andrei Sakharov and his wife, Yelena Bonner; considered and agreed to.

By Mr. HUDDLESTON:

S. Res. 270. A resolution relating to the "Great Friendship Run"; to the Committee on the Judiciary.

By Mr. BAKER:

S. Res. 271. A resolution appointing a committee to notify the President concerning the proposed adjournment of the session; considered and agreed to.

By Mr. COHEN (for himself, Mr. HEINZ, Mr. PRYOR, Mr. CHILES, Mr. DURENBERGER, Mr. BRADLEY, Mr. GRASSLEY, Mr. BURDICK, Mr. MELCHER, Mrs. KASSEBAUM, and Mr. GLENN):

S. Res. 272. A resolution expressing the sense of the Senate with respect to the rights of residents in certain health care facilities; to the Committee on Labor and Human Resources.

By Mr. ROBERT C. BYRD:

S. Res. 273. A resolution authorizing the President of the Senate and the President of the Senate pro tempore to make certain appointments after the sine die adjournment of the present session; considered and agreed to.

By Mr. BAKER:

S. Res. 274. A resolution authorizing the President of the Senate to sign enrolled bills and resolutions; considered and agreed to.

S. Res. 275. A resolution tendering the thanks of the Senate to the Vice President for the courteous, dignified, and impartial manner in which he has presided over the deliberations of the Senate; considered and agreed to.

By Mr. ROBERT C. BYRD:

S. Res. 276. A resolution tendering the thanks of the Senate to the President pro tempore for the courteous, dignified, and impartial manner in which he has presided over the deliberations of the Senate; considered and agreed to.

By Mr. THURMOND:

S. Res. 277. A resolution to commend the conduct of the distinguished Majority Leader; considered and agreed to.

S. Res. 278. A resolution to commend the extraordinarily cooperative conduct of the distinguished Minority Leader; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. STEVENS:

S. 1976. A bill to amend the Act of July 31, 1946, as amended (40 U.S.C. 193a); considered and passed.

(The remarks of Mr. STEVENS on this legislation appear earlier in today's RECORD.)

By Mr. JOHNSTON:

S. 1977. A bill to repeal the Public Utility Holding Company Act of 1935 as no longer necessary to accomplish the purposes for which it was enacted; to the Committee on Banking, Housing, and Urban Affairs.

REPEAL OF PUBLIC UTILITY HOLDING COMPANY ACT

● Mr. JOHNSTON. Mr. President, on November 19, I joined with Senator D'AMATO in introducing three bills respecting the Public Utility Holding Company Act. Those bills, S. 1869, 1870, and 1871, present a wide range of options for amending the act. Today, I am presenting a fourth option with regard to the Public Utility Holding Company Act—outright repeal.

Mr. President, the Public Utility Holding Company Act is an anachronism. The act applies to only a handful of companies throughout the country. The primary objectives of the act—corporate simplification and geographic integration of public utility holding companies—was accomplished long ago. Subsequent Federal legislation in the securities and energy areas have duplicated many provisions of the act. State and local utility regulation has matured to the point that Federal regulation in the area is needless.

Despite these developments, however, the few companies still subject to the act continue to be subject to substantial and burdensome limitations, registration requirements and reporting obligations. The effect of those regulatory requirements is to reduce efficiency and impose financial hardship at a time when our public utilities can scarcely afford unnecessary costs.

Mr. President, it is time to admit that the public utility holding company no longer serves the public interest, but operates to retard the development of utility companies. Because the act is outdated, and because the act is so complex, I feel that the Senate should be presented with the option of outright repeal in lieu of wholesale amendment. The benefits will be greater and the process much easier. I ask unanimous consent that the bill be printed in the RECORD at the conclusion of my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1977

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

CONGRESSIONAL FINDINGS

SECTION 1. The Congress hereby finds that:

(a) The Public Utility Holding Company Act of 1935 imposes substantial and burdensome requirements upon the holding company sector of the public utility industry. The Act subjects utility holding companies to a level of regulation not found necessary with respect to other organizations in the same or related industries;

(b) The Public Utility Holding Company Act of 1935 continues to impose these requirements even though substantially all of the purposes of the Act have been achieved. Public utility holding companies have been limited to single integrated public utility systems operating in cohesive geographic areas or regions. The simplification of the capital structures of public utility holding companies contemplated under the Act has been completed. Public utility companies organized in holding company systems are not subject to effective Federal, State and local control, without the regulation of the 1953 Act.

(c) Only a small number of public utility holding companies are regulated under the Act. Those that remain regulated under the provisions of the Act are subject to registration and reporting requirements, as well as to other limitations on activities, that are not borne by other companies operating in the utility business, or elsewhere in industry;

(d) Existing Federal and state registration and regulatory requirements are fully adequate to insure the protection of investors holding interests in public utility holding companies. The elaborate process of utility registration under the Public Utility Holding Company Act of 1935 afford no greater protection than is afforded by the Securities Act of 1933 and the Securities Exchange Act of 1934. State utility regulatory commissions are now capable under familiar principles of regulatory law to review acquisitions and system transactions entered into by public utility operating companies and their affiliates;

(e) The requirements of the Public Utility Holding Company Act of 1935 are duplicative of other existing Federal and state requirements. State public utility commissions are competent to investigate whether utilities' acquisition of diverse businesses is likely to endanger the reliability of utility service, and are generally empowered to disallow costs charged by companies associated with utility companies which are not in the public interest;

(f) It is in the public interest to eliminate the provisions of the Public Utility Holding Company Act of 1935 which inhibit innovation. These provisions have retarded the financial health of registered public utility holding companies relative to other companies and utilities. These provisions also provide disincentives to entry into the electric utility generating sector by other industries.

REPEAL OF PUBLIC UTILITY HOLDING COMPANY ACT OF 1935

SEC. 2. The Public Utility Holding Company Act of 1935, Chapter 687, Title I, 49 Stat. 803, as amended, codified at 15 U.S.C. § 79 to § 79z–6 (1976), is hereby repealed.

REPEAL OF RELATED PROVISION OF THE FEDERAL POWER ACT

SEC. 3. Section 318 of the Federal Power Act, Chapter 687, Title II, § 213, 49 Stat. 863, as amended, codified at 16 U.S.C. § 825, providing that any person subject to the requirements of both the Federal Power Act and the Public Utility Holding Company Act of 1935, shall be subject to the provisions of the Public Utility Holding Company Act of 1935, rather than to the provisions of the Federal Power Act with respect to the same subject matter, is hereby repealed.

SAVINGS PROVISION

SEC. 4. This Act shall not be construed to affect any proceedings commenced as of the effective date of these provisions by an official filing with the SEC by any company subject to the provisions of the Public Utility Holding Company Act of 1935.●

By Mr. GRASSLEY:

S. 1979. A bill to eliminate the duty on sulfaguanidine, sulfapyridine, and sulfathiazole; to the Committee on Finance.

ELIMINATION OF DUTY ON CERTAIN SULPHA DRUGS

● Mr. GRASSLEY. Mr. President, today I am introducing a bill that will suspend import duties on three sulpha drugs, sulfathiazole, sulfapyridine, and sulfaquanadine.

There are no U.S. producers of these three sulpha drugs, consequently the import duties do penalize the U.S. hog producer by increasing his cost of these important sulpha drugs and therefore his cost of production.

The rate of duty on sulfathiazole is 32.25 percent of the import price, sulfaquanidine and sulfapyridine each carry an import duty of 24.65 percent. The drugs themselves are expensive, compounding their cost with high and unnecessary duties only means higher food prices for U.S. consumers.

I urge all of my colleagues to support this measure, it will help the hog producer and consumer alike.●

By Mr. SCHMITT (for himself, Mr. WARNER, Mr. JEPSEN, and Mr. DECONCINI);

S. 1982. A bill to amend the Strategic and Critical Materials Stock Piling Act and the Defense Production Act of 1950 to strengthen military preparedness, and for other purposes; to the Committee on Armed Services.

STRATEGIC STOCKPILE REFORMS ACT OF 1981

● Mr. SCHMITT. Mr. President, I am introducing legislation today that would substantially revise the manner in which our national defense stockpile is managed. The legislation would consolidate the stockpile related functions of the General Services Administration and the Federal Emergency Management Agency into a strategic stockpile commission. This improved structure for the implementation of the Strategic and Critical Materials Stockpiling Act will insure that the important improvements which have been made in this act in recent years can be efficiently and effectively administered.

Let me review for a moment the need for this legislation.

The national defense stockpile exists to insure that our country can continue to have vital economic and defense materials in times of national emergency. We could almost think of it as our national survival pack of strategic materials.

But our stockpile is in trouble. Shortsighted political considerations have frequently taken priority over strategic issues in the setting of our stockpile goals. Past administrations have sometimes seen the stockpile as a sort of checking account to be tapped whenever we need to raise money to balance the budget or fund a new program. As a result, it is estimated that the stockpile is some $14 billion short of achieving current goals.

A recent report issued by the Senate Republican Policy Committee concludes that "If no purchases or sales from the stockpile had been made between 1962 and 1981 we would be much closer to the present goals than we are after all the changing of stockpile goals during this period." This conclusion suggests, I believe, that the present system of management has actually been counterproductive. We appear to move further away from our goals as time goes by.

The Federal Emergency Management Agency estimates that had the status quo of 1962 been maintained, the cost of achieving current stockpile goals would have been minimal and there would be

valuable surpluses of high value commodities such as copper, aluminum, zinc, cobalt, nickel, and lead. I ask unanimous consent that that Republican Policy Committee Report, "National Defense Stockpile Inventory of Strategic and Critical Materials, 1962–1980 Comparison," be reprinted in the RECORD following my statement.

Some of the general problems in the current management are the following:

First. Stockpile goals have been changed frequently in the past, but not always consistently. For example, at one time stockpile goals for aluminum, copper, lead, nickel, and zinc were set at zero. During the period of 1963–75, all of the stockpiled aluminum, copper, and nickel was sold, as was most of the zinc and about half of the lead. New stockpile goals for these materials will require their purchase at current market prices, which are far higher than the prices at which these commodities were sold.

Second. The stockpile has frequently been manipulated for nondefense political purposes contrary to the statutory requirement that directs otherwise. The initiatives of the Nixon administration to sell off a major portion of the stockpile, presumably to generate revenue to reduce Federal budget deficits, are a case in point. The current administration's recommendations to sell $2.14 billion worth of stockpiled materials, but to purchase only $60 million worth of new materials for the stockpile, hardly inspires confidence that the stockpile is not still being used for budgetary purposes.

Third. The storage and handling of some stockpiled materials has been less than satisfactory; poor security may have resulted in theft; weighing of materials prior to sale may have been inaccurate; material has been allowed to deteriorate or become obsolete; and billing for sold materials has been faulty.

Fourth. The fact that funds derived from past sales of stockpiled materials have gone into the Treasury's general fund, rather than being used to purchase needed materials for the stockpile, has seriously depleted the assets of the stockpile.

Let us look at how our stockpile has fared under these past policies with regard to some specific materials:

COBALT

The stockpile goal for this material was 129 million pounds in 1955 but only about 12 million pounds in 1973; consequently much cobalt—approximately 60 million pounds—was sold at prices averaging $2 to $4 a pound. Recently the administration bought 5.2 million pounds of cobalt from Zaire for $15 a pound, with an option to purchase an additional 5.2 million pounds next year. In other words, we are paying $11 to $15 per pound more for cobalt today than we sold it for only a few years ago. More consistent and realistic management of this material clearly would have saved much money.

ZINC

The stockpile goal for zinc was about 1.5 million tons in 1950 but was reduced to zero in 1963. Sales have reduced the amount stockpiled to less than 400,000 tons; yet the current stockpile goal is more than 1.4 million tons.

There is a curious irony here. At the end of 1963, the stockpile contained 1,580,741 tons of zinc—slightly above the present objective. For various reasons, including the size of the domestic industry at that time, the defense authorities concluded that no stockpile of zinc was required.

Over the subsequent years more than three-quarters of the stockpile was sold—at prices averaging perhaps $300 a ton. One effect of these stockpile sales was, of course to hold the zinc price down. That, in turn, discouraged investment in modern plant and helped bring about the dramatic decline in the industry's capacity. Because the capacity is down, Government has concluded that it needs a big stockpile again. And what is the price the Government will have to pay for zinc? It is currently about $900 a ton—some $600 more than the price the Government received for zinc sold from the stockpile.

LEAD

In 1956 the stockpile goal for lead was almost 1.2 million tons, but by 1963 the goal had been reduced to zero. Almost 1.4 million tons were still being stockpiled in 1962, but subsequent sales has reduced this amount to about 600,000 tons. Yet, the current stockpile goal for lead is about 1.1 million tons, thus requiring additional purchases.

COPPER

At one time the stockpile goal for copper was 3.5 million tons; this was reduced to almost 800,000 tons by 1963 and further reduced to zero by 1973. More than 1.1 million tons of copper were in the stockpile in 1962, but sales reduced the amount to 260,000 tons by 1973 and most of this had been sold by 1974. The current goal for copper is 1.0 million tons, but there is less than 30,000 tons in the stockpile. The cost to buy back the copper sold from the stockpile will be substantial, and it is a cost that could have been avoided with sound management of our resources.

SILVER

Currently there is more controversy over the management of silver than for any other stockpiled material. At present, the stockpile contains 139.5 million troy ounces of silver, whereas the goal has been set at zero, largely on the grounds that adequate supplies of silver during wartime could be obtained from domestic sources and from imports from Canada and Mexico. Consequently, this years' budget act authorizes the sale of 46.537 million troy ounces as of October 1, 1981; 44.682 million troy ounces as of October 1, 1982; and 13.9 million troy ounces as of October 1, 1983.

Critics contend that, in view of the sharp changes in the stockpile goals in the past, there is no guarantee that the goal for silver may not be again changed, thus requiring repurchase of silver, possibly at much higher prices. They also note that of the $2.140 billion recommended in stockpiled materials sales, silver amounts to about $2.093 billion. Hence they suggest that the sale of silver is being promoted more for budgetary than for defense purposes. Further, the manner in which these sales have been conducted raises serious questions regarding GSA's ability to conduct these sales without needlessly disrupting the market.

CHROMIUM

Chromium is a vital strategic material needed for manufacturing of a wide range of essential military equipment. In light of the fact that the United States imports 91 percent of our consumption, the availability of chromium is a matter of great concern. Yet, 682,000 short tons of chromium have been sold from the stockpile since 1962—and the stockpile is now nearly 200,000 tons short of its goal.

These are just a few examples of the inadequacy of stockpile management with regard to a few of the vital strategic materials in our stockpile.

What is the essential message of this litany of stockpile management inefficiencies? It is this: The number, and extent to which, a long list of materials have been mishandled suggests that structural and organizational problems exist which require a fundamenal change in the management structure of the strategic stockpile. I am persuaded that the following elements must be a part of any comprehensive solution to these problems.

Management of the stockpile needs to be consolidated. At present, stockpile management is fractured and disorganized. Sales and purchases of materials are made by the General Services Administration—but only upon the recommendation of the Federal Emergency Management Agency which collects information and recommendations from the Departments of Defense, Commerce, Interior, State, and others, to establish stockpile goals. But it does not stop there. FEMA proposals to buy and sell materials are transmitted to OMB, where budgetary consideration may weight in heavily on stockpile decisions. This, I believe, is the source of many of the changes in stockpile goals that have occurred in the past several administrations. All too often, goals have been manipulated downward to justify stockpile sales that would raise revenues to reduce the Federal deficit.

After OMB has taken a look at and probably revised FEMA's stockpile proposals, Congress considers the administration's recommendation in the annual budget. Regrettably, Congress has frequently gone along with the executive branch's budgetary abuse of the stockpile. Further, the Congress has, on occasion, been persuaded by special interest groups to adopt stockpile policies which may have been helpful to particular industries, but which in the long run, create more problems for the achievement of stockpile goals.

I am convinced that there are far too many players in this game for the current organizational structure to adequately meet our vital national interests. Furthermore, no one in Government has

sole responsibility for the stockpile. GSA and FEMA both have very broad responsibilities in diverse areas—stockpile management is but one of their many functions; one which is frequently shortchanged.

Management of the stockpile should be able to respond to market influences; but the current system has months of delay built into it, before a sale or purchase can be initiated. We are now selling silver at $8–$9 per ounce and driving the price lower with the sales, to the detriment of our domestic producers. Where was GSA when the price of silver peaked at $50 per ounce? They were not in the market. They could not have been, it would take months to get approval from the executive branch and Congress.

Materials in stockpile may need to be rotated from time to time to insure that they meet current industry specifications. My understanding is that the majority of our cobalt stockpile does not meet certain high technology uses and would require costly and time consuming reprocessing in a time of national emergency. Such a routine rotation of stockpiled materials should not require congressional or executive branch involvement, and accompanying delay.

Management of sales and purchases should at times be conducted quietly so as not to disrupt the market or "telegraph" our intentions. Yet, by virtue of the fact that stockpile purchases and sales must be congressionally authorized, the whole world has an idea of what the managers of the stockpile will be doing—and they can act accordingly. To some extent, stockpile sales and purchases provide an opportunity for speculators and producers, foreign and domestic alike, to profit from the unreasonable and unworkable system we have constructed.

Management of the stockpile should be removed to the maximum extent from political or budgetary considerations. The purpose of the stockpile is to provide a degree of protection to our country in time of war or emergency. It was not created as a budget balancing tool. We must restore the stockpile to its original purpose.

To achieve these objectives I am introducing this legislation which is designed to reorganize the management of the national defense stockpile.

I ask unanimous consent that a summary of the bill be inserted in the RECORD at the conclusion of my statement.

The establishment of a strategic stockpile commission would go a long way toward solving many of our materials problems. Furthermore, it would centralize in one agency all of the participants in the management of the stockpile. There would be one voice in Government that could speak with authority on the nature and extent of materials problems. This voice is currently missing. Further, the establishment of a strategic stockpile commission would remove, to the maximum extent possible, the budgetary and political manipulation of our national stockpile.

The United States is currently involved in a materials war. The only problem is, as a nation we do not know it—and the Soviets do. There are many actions which must be taken to counter this threat—changes in Federal lands policy, taxes, pollution control, initiatives in deep sea mining, et cetera, so that we can develop our own resources and attain self-sufficiency wherever we can.

But there are many materials with which the United States is not endowed in abundance. Where this is the case the stockpile is our best method of protecting our country and our economy. With certain other materials we have domestic deposits which are not currently in production, but which may be in the future with advances in technology or with appropriate production incentives. In these cases the stockpile can serve a vital function in bridging us over to the day when we can become self-sufficient.

One of our primary political problems in Washington is that the Congress is so much absorbed in the immediate issues of today that there is rarely attention given to our long-term structural problems. Minerals dependency is such a long-term problem and it requires a long-term structural solution. This legislation, I believe can play a part in achieving that solution.

I ask unanimous consent that the text of the bill and a summary be included in the RECORD.

There being no objection, the bill and summary were ordered to be printed in the RECORD, as follows:

S. 1982

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Strategic Stockpile Reform Act of 1981".

TITLE I—AMENDMENTS TO THE STRATEGIC AND CRITICAL MATERIALS STOCK PILING ACT; RELATED AMENDMENTS

SEC. 101. The Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98 et seq.) is amended—

(1) by striking out sections 5 and 12;

(2) by redesignating sections 3, 4, 6, 7, 8, 9, 10, 11, and 13 as sections 6, 7, 8, 9, 10, 11, 12, 13, and 14, respectively;

(3) by inserting after section 2 the following new sections:

"DEFINITIONS

"SEC. 3. For the purposes of this Act:

"(1) The term 'strategic and critical materials' means materials that (A) would be needed to supply the military, industrial, and essential civilian needs of the United States during a national emergency, and (B) are not found or produced in the United States in sufficient quantities to meet such need.

"(2) The term 'national emergency' means a general declaration of emergency with respect to the national defense made by the President or by the Congress.

"(3) The terms 'stockpile' and 'National Defense Stockpile' means the National Defense Stockpile described in section 6(a).

"(4) the term 'agency' has the same meaning as provided in section 551 (1) of title 5, United States Code.

"ESTABLISHMENT OF THE STRATEGIC STOCKPILE COMMISSION

"SEC. 4. (a) There is established as an independent agency in the executive branch of the Federal Government a commission to be known as the Strategic Stockpile Commission (hereafter in this Act referred to as the 'Commission').

"(b) The Commission shall be composed of five members appointed by the President, by and with the advice and consent of the Senate, from among individuals who have substantial experience, training, or expertise in national defense matters, economics, finance, industrial mobilization, foreign affairs, or the development and marketing of ores and other mineral substances. Not more than three members of the Commission shall be members of the same political party.

"(c)(1) Except as provided in paragraphs (2) and (3), the term of office of each member of the Commission shall be ten years.

"(2) Of the members of the Commission first appointed under subsection (b)—

"(A) one shall be appointed for a term of two years;

"(B) one shall be appointed for a term of four years;

"(C) one shall be appointed for a term of six years;

"(D) one shall be appointed for a term of eight years; and

"(E) one shall be appointed for a term of ten years.

"(3) Any member appointed to fill a vacancy occurring before the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term.

"(d)(1) The President shall designate, by and with the advice and consent of the Senate, one member of the Commission appointed under subsection (b) to serve as the Chairman. The Chairman shall be tne principal executive officer of the Commission and shall preside at meetings of the Commission.

"(2) The President shall designate, by and with the advice and consent of the Senate, one member of the Commission appointed under subsection (b) to serve as the Vice Chairman. In the absence or disability of the Chairman, the Vice Chairman shall act as Chairman.

"(e)(1) The members of the Commission shall meet regularly and shall perform the functions and exercise the powers of the Commission on a majority vote of a quorum of the Commission.

"(2) A vacancy in the Commission shall not impair the authority of a quorum of the Commission to perform the functions or exercise the powers of the Commission.

"(f) Three members of the Commission shall constitute a quorum for the transaction of business.

"FUNCTIONS OF THE STRATEGIC STOCKPILE COMMISSION

"SEC. 5. The Commission shall—

"(1) after consulting with the Secretary of Commerce, the Secretary of Defense, the Secretary of the Interior, and the head of any other agency as the Commission considers appropriate, develop policy for the management of the National Defense Stockpile;

"(2) manage the National Defense Stockpile;

"(3) make recommendations to the President, the Congress and the agencies for such action as the Commission considers appropriate with respect to—

"(A national policy on strategic and critical materials; and

"(B) research and development relating to strategic and critical materials; and

"(4) perform such additional functions as

may be required under the provisions of title III of the Defense Production Act of 1950."; and

(4) by adding at the end thereof the following new sections:

"ADMINISTRATIVE PROVISIONS

"SEC. 15. (a) In order to carry out its functions under this Act, the Commission may—

"(1) prescribe such regulations as the Commission considers necessary to carry out the provisions of this Act;

"(2) subject to civil service and classification laws, appoint, employ, and fix the compensation of such personnel as may be necessary to carry out the provisions of this Act;

"(3) establish such standing and ad hoc interagency committees composed of such officers and employees of the Government as the Commission considers necessary to carry out the provisions of this Act;

"(4) obtain from any Federal agency, including any independent establishment or instrumentality of the United States, advice, information, estimates, statistics, and such other assistance as the Commission considers necessary for the performance of its functions under this Act;

"(5) solicit from any State or political subdivision thereof advice, information, estimates, statistics, and such other assistance as the Commission considers necessary for the performance of its functions under this Act;

"(6) obtain the services of experts and consultants in accordance with the provisions of section 3109 of title 5, United States Code;

"(7) accept and utilize the services of individuals employed intermittently in the Government service and reimburse such individuals for travel expenses, as authorized by section 5703 of title 5, United States Code, including per diem as authorized by section 5702 of such title;

"(8) enter into contracts or other arrangements, or modifications thereof, to carry out the provisions of this Act;

"(9) make advance, progress, and other payments which the Commission considers necessary to carry out the provisions of this Act without regard to the provisions of section 3648 of the Revised Statutes, as amended (31 U.S.C. 529);

"(10) make such other expenditures as the Commission determines are necessary to carry out the provisions of this Act; and

"(11) pay the compensation of personnel, per diem, travel expenses, and all other expenses of the Commission from the National Defense Stockpile Transaction Fund established by section 11.

"(b) Any officer or employee of the Government who is designated by the Commission under subsection (a)(3) to be a member of a standing or ad hoc interagency committee shall serve on such committee.

"TRANSFER OF AUTHORITY DURING TIME OF WAR

"SEC. 16. Notwithstanding any other provision of this Act, upon a declaration of war or national defense emergency the President shall assume the functions of the Commission and shall make the determinations and issue the orders authorized by this Act. In time of war declared by the Congress, the Commission shall act at the direction of the President in the performance of such functions.".

SEC. 102. (a) Except as otherwise specifically provided, wherever in this section a reference is expressed in terms of a section of the Strategic and Critical Materials Stock Piling Act, the reference is to the section as redesignated by section 101(2).

(b) The Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98 et seq.) is further amended—

(1) in section 8—

(A) by striking out clause (2) of subsection (a) and inserting in lieu thereof the following:

"(2) insure that such materials, after acquired, are maintained in a condition suitable for industrial and defense uses by providing for the storage, security, and maintenance of the materials in the stockpile;";

(B) by striking out clauses (4) and (5) of subsection (a) and inserting in lieu thereof the following:

"(4) provide for the rotation of any material in the stockpile when necessary to insure that the material in the stockpile at any time is of a quality suitable for industrial use as determined by applying the applicable industry's standards (with respect to the quality of such material) at such time;

"(5) subject to the notification requirement in subsection (d)(2), dispose of such materials as the Commission considers appropriate to carry out the provisions of this Act; and"; and

(c) by adding at the end thereof the following new subsection:

(f) In disposing of materials under this Act, the Commission may manage and administer the sale of such materials in foreign countries.";

(2) in section 9—

(A) by striking out "and" at the end of subsection (a)(1);

(B) by striking out the period at the end of subsection (a)(2) and inserting in lieu thereof a semicolon and "and";

(C) by adding at the end of subsection (a) the following new clause;

"(3) on the order of the Commission during any period in which there is a severe interruption or restriction in the supply of such materials as the result of an economic embargo or other condition."; and

(D) by adding at the end thereof the following new subsection:

"(c) An order issued under subsection (a)(3) shall provide (1) only for the release of the types of materials the supply of which is severely interrupted or restricted, and (2) for the disposition of such materials (A) by sale at the prevailing fair market price of such materials in the United States, and (B) in quantities that will not reduce the quantities of such materials in the stockpile below necessary minimum quantities specified by the Commission."; and

(3) in section 11—

(A) by striking out "appropriated" in the second sentence of subsection (b)(1) and inserting in lieu thereof "expended";

(B) by striking out subsection (b)(2) and inserting in lieu thereof the following:

"(2) Moneys covered into the fund under paragraph (1) and subsection (c) and any moneys appropriated to the fund shall be available, without fiscal year limitation, to carry out the provisions of this Act unless otherwise provided in appropriation Acts.";

(C) by striking out paragraph (3) of subsection (b); and

(D) by striking out "and shall be available only for the acquisition of replacement materials" in subsection (c).

SEC. 103. (a) Section 5313 of title 5, United States Code, is amended by adding at the end thereof the following new item:

"Chairman, Strategic Stockpile Commission.".

(b) Section 5314 of such title is amended by adding at the end thereof the following new item:

"Members, Strategic Stockpile Commission (4).".

TITLE II—AMENDMENTS TO THE DEFENSE PRODUCTION ACT

SEC. 201. (a) Section 301 of the Defense Production Act of 1950 (50 U.S.C. App. 2091) is amended—

(1) in subsection (a)(1)—

(A) by inserting "(A)" after "(a)(1)";

(B) by inserting "the Commission," after "the Department of Commerce,"; and

(C) by adding at the end thereof the following new subparagraph:

"(B) Subject to the provisions of subsection (e)(1)(B), the Commission may, without the authorization of the President, guarantee loans in the manner provided in subparagraph (A) to expedite production and deliveries or services under Government contracts entered into by the Commission in the management of the National Defense Stockpile.";

(2) in the first sentence of subsection (b) by inserting "or when designated by the Commission in any case in which the Commission is acting under subsection (a)(1)(B)," after "President,";

(3) In subsection (c) by striking out "President, and to such regulations as he may prescribe; and the President" and inserting in lieu thereof "President, or of the Commission in any case in which the Commission is acting under subsection (a)(1)(B), and to such regulations as the President or the Commission, as the case may be, may prescribe. The President or, in any case in which the Commission is acting under subsection (a)(1)(B), the Commission"; and

(4) in the first sentence of subsection (e)(1)(B), by inserting ", or which are initiated by the Commission under subsection (a)(1)(B)," after "subparagraph (A)".

(b) Section 302 of such Act (50 U.S.C. App. 2092) is amended—

(b) by inserting "(a)" before the first sentence; and

(2) by adding at the end thereof the following new subsection:

"(b)(1) Subject to paragraph (2), the Commission may, without the authorization of the President, make provision for such loans described in subsection (a) as the Commission considers necessary in the management of the National Defense Stockpile.

"(2) The Commission may not make provision for any loan under paragraph (1) unless—

"(A) the Committees on Armed Services of the Senate and the House of Representatives have been notified in writing of the proposal to make provision for such loan;

"(B) a period of 60 days of continuous session of Congress has expired since the date on which the notice was transmitted to such Committees; and

"(C) neither House of Congress has adopted, within such period, a resolution disapproving such proposal.'. (c) Section 303 of such Act (50 U.S.C. App. 2093) is amended by adding at the end thereof the following new subsection:

"(h) (1) Subject to the provisions of the paragraph (2), the Commission may, without the authorization of the President, make provision for any action described in subsections (a), (c), (e), and (g) whenever the Commission considers such action necessary to carry out its functions under the Strategic and Critical Materials Stock Piling Act. In making any such provision, the

Commission may exercise the same authority as the President, and shall be subject to the same limitations on such authority, as provided in subsections (a), (b), (c), and (d).

"(2)(A) The Commission may not make provision for action as authorized under paragraph (1) unless—

"(i) the Committees on Armed Services of the Senate and the House of Representatives have been notified in writing of the proposal for such action;

"(ii) a period of 60 days of continuous session of Congress has expired since the date on which the notice was transmitted to such Committees; and

"(iii) neither House of Congress has adopted, within such period, a concurrent resolution disapproving the proposal for such action.

"(B) For the purposes of subparagraph (A), the continuity of a session of Congress is broken only by an adjournment of the Congress sine die, and the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of the 60-day period.".

(d) Subsection (a) of section 304 of such Act (50 U.S.C. App. 2094) is amended by inserting a comma and "including the Commission," after "Government".

(e) Section 308 of such Act (50 U.S.C. App. 2098) is amended by adding at the end thereof the following new subsections:

"(d) For the purposes of this title, the term 'Commission' means the Strategic Stockpile Commission established by section 4 of the Strategic and Critical Materials Stock Piling Act.

"(e) For the purposes of this title, the term 'National Defense Stockpile' means the National Defense Stockpile described in section 6(a) of the Strategic and Critical Materials Stock Piling Act.".

(f) Such Act is further amended by adding at the end thereof the following new section:

"SEC. 309. The Commission shall make recommendations to the President for such actions by the President under this title as the Commission considers appropriate.".

TITLE III—MISCELLANEOUS, TECHNICAL, AND CONFORMING AMENDMENTS

SEC. 301. (a) Except as otherwise specifically provided, wherever in this section a reference is expressed in terms of a section of the Strategic and Critical Materials Stock Piling Act, the reference is to the section as redesignated by section 101(2).

(b) The Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98 et seq.) is amended—

(1) in sections 6, 8, 9, 10, 12, and 13 by striking out "President" each place it appears and inserting in lieu thereof "Commission";

(2) in section 6—

(A) by striking out "(hereinafter in this Act referred to as the 'stockpile')" in subsection (a); and

(B) by striking out "The" in subsection (b) and inserting in lieu thereof "Except as provided in section 9(a)(3), the";

(3) in section 8—

(A) by striking out "section 3 (a)" in subsection (a)(1) and inserting in lieu thereof "section 6 (a)";

(B) by striking out "subject to the provisions of section 5(b)," in subsection (a)(6); and

(C) by striking out "section 7 (a)" in the first sentence of subsection (b) and inserting in lieu thereof "section 9(a)";

(4) in section 10(b) by striking out "section 3(a)"; and inserting in lieu thereof "section 6(a)";

(5) in section 11—

(A) by striking out "paragraphs (5) and (6) of section 6(a)" in subsection (b)(1) and inserting in lieu thereof "clauses (E) and (F) of section 8 (a)(1)";

(B) by striking out "section 6(a)(1)" in subsection (b)(2) and inserting in lieu thereof "section (8)(a)(1)(A)"; and

(C) by striking out "section 6 (a)(4) or disposed of under section 1(a)" in subsection (c) and inserting in lieu thereof "section 8(a)(1)(D) or disposed of under section 9 (a)"; and

(6) in section 13(2) by striking out "section 6(c)" and inserting in lieu thereof "section 8(c)".

(c)(1) The section heading of section 6 of such Act is amended by striking out "Presidential" and inserting in lieu thereof "Commission".

(2) The section heading of section 9 of such Act is amended by striking out "President" and inserting in lieu thereof "Commission".

TITLE IV—TRANSFER, SAVINGS, AND PERSONNEL PROVISIONS

SEC. 401. For the purposes of this title—

(1) the term "Commission" means the Strategic Stockpile Commission established by section 4 of the Strategic and Critical Materials Stock Piling Act as added by section 101 (3) of this Act; and

(2) the term "agency" has the same meaning as provided in section 551 (1) of title 5, United States Code.

SEC. 402. (a) There are transferred to the Commission all functions of the President under the Strategic and Critical Materials Stock Piling Act being administered by and through the Federal Emergency Management Agency or the General Services Administration on the day before the effective date of this Act.

(b) The assets, liabilities, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds employed, held, used, available, or to be made available in connection with or arising from the functions transferred to the Commission by this Act are, subject to section 202 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 581c), transferred to the Commission.

(c) The Director of the Office of Management and Budget, at such time or times as the Director shall provide, may provide for such additional incidental transfers of assets, liabilities, grants, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds held, used, available, or to be made available in connection with or arising from the functions transferred to the Commission by this Act as may be necessary to carry out the provisions of the Strategic and Critical Materials Stock Piling Act.

(d) Subject to the provisions of this Act and notwithstanding the provisions of chapter 9 of title 5, United States Code, the President, for a period of 180 days after the effective date of this Act, may transfer to the Commission any functions (including powers, duties, activities, facilities, and parts of functions) of any other agency of the United States, or of any officer or office thereof, which relate primarily to the functions transferred to the Commission by this Act. In connection with any such transfer, the President may, under this section, or other applicable authority, provide for appropriate transfers of records, property, and funds.

SEC. 403. (a) All orders, determinations, rules, regulations, permits, contracts, certificates, licenses, and privileges—

(1) which have been issued, made, granted, or allowed to become effective in the performance by any other agency, before the effective date of this Act, of functions transferred to the Commission by this Act; and

(2) which are in effect at the time this Act takes effect,

shall continue in effect according to their terms until modified, terminated, superseded, set aside, or repealed by the President, by the Commission, by any court of competent jurisdiction, or by operation of law.

(b) The provisions of this Act shall not affect any proceedings pending at the time this Act takes effect before any agency or any component thereof; but such proceedings, to the extent that they relate to functions transferred to the Commission by this Act, shall be continued before the Commission. Orders shall be issued in such proceedings, appeals shall be taken therefrom, and payments shall be made pursuant to such orders, as if this Act had not been enacted; and orders issued in any such proceedings shall continue in effect until modified, terminated, superseded, or repealed by the Commission, by a court of competent jurisdiction, or by operation of law.

(c) Except as provided in subsection (e)—

(1) the provisions of this Act shall not affect actions commenced before the effective date of this Act, and

(2) in all such actions proceedings shall be had, appeals taken, and judgments rendered in the same manner and effect as if this Act had not been enacted.

(d)(1) No action or other proceeding commenced by or against any officer in his official capacity as an officer of any agency shall abate by reason of the enactment of this Act. No cause of action of or against any agency, or any officer thereof in his official capacity, shall abate by reason of the enactment of this Act. Causes of action and actions or other proceedings with respect to a function transferred to the Commission by this Act may be asserted by or against the United States or the Commission, as may be appropriate.

(2) If, before the date on which this Act takes effect, any agency, or any officer thereof in his official capacity, is a party to an action arising from the performance of a function transferred to the Commission by this Act, such action shall be continued with the Commission substituted or added as a party.

(3) In any action pending on the effective date of this Act, the court may at any time, on its own motion or that of any party, enter an order which will give effect to the provisions of this subsection.

(e) Orders issued and actions taken by the head of an agency in the performance, before the effective date of this Act, of the functions transferred to the Commission by this Act shall be subject to judicial review to the same extent and in the same manner as if such orders had been issued and such actions had been taken by the head of the agency performing such functions on the day before the effective date of this Act. Any statutory requirements relating to notice, hearings, actions upon tht record, or

administrative review that apply to any functions transferred to the Commission by this Act shall apply to the performance of such functions by the Commission.

(f) Reference in any other Federal law to the President, any agency, or any officer or office of such agency with respect to any function transferred to the Commission by this Act, shall be deemed to refer to the Commission.

SEC. 404. In appointing or employing personnel, the Commission shall consider the applications for appointment or employment submitted by individuals who, as of the day before the date of the enactment of this Act, have been appointed or are employed to perform the functions transferred to the Commission by this Act. Notwithstanding any other provision of law, the Commission shall not be required to appoint or employ such individuals or to give preference to any such individual in appointing or employing personnel.

TITLE V—INTERIM ACTIONS; INTERIM FUNDING; EFFECTIVE DATE

SEC. 501. (a)(1)(A) The members of the Commission may be appointed in the manner provided by this Act at any time after the date of the enactment of this Act.

(B) The Commission may, at any time after the date of the enactment of this Act, select for appointment or employment personnel to be appointed or employed by the Commission on or after the effective date of this Act.

(2) Each member of the Commission shall be compensated from the date the member is appointed.

(3) The compensation of members of the Commission and the other expenses of the Commission incurred under this subsection shall be paid from funds in the National Defense Stockpile Transaction Fund established by section 9 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. App. 98h).

(b) There are authorized to be appropriated, from funds in the National Defense Stockpile Transaction Fund not otherwise appropriated, such amounts as may be necessary to carry out the provisions of subsection (b).

SEC. 502. (a) Except as provided in subsection (b), this Act and the amendments made by this Act shall take effect 180 days after the date of the enactment of this Act.

(b) This section and section 501 shall take effect on the date of the enactment of this Act.

SUMMARY OF STRATEGIC STOCKPILE REFORM ACT OF 1981

MANAGEMENT OF THE NATIONAL DEFENSE STOCKPILE

The legislation would establish a Strategic Stockpile Commission composed of five members appointed by the President and confirmed by the Senate.

Members of the Commission would be required to have expertise in such areas as defense materials requirements, minerals production or marketing, economics, or other related fields.

The Commission would function as an independent agency of the Federal government, but would not be subject to annual authorization or appropriations. The Armed Services Committee of each House would retain oversight responsibilities over the National Defense Stockpile similar to those of the Banking Committee's with regard to the Federal Reserve Board. The Banking Committees of both Houses would have oversight responsibility over use of Defense Production Act programs of the Commission as well as any economic implications of stockpile levels, sales, and purchases.

Following a Declaration of War the Commission would come under the direct control of the President with the Commissioners serving as agents of the President.

FUNCTIONS OF THE STRATEGIC STOCKPILE COMMISSION

The Commission would develop policy for, and would manage, the National Defense Stockpile.

The functions of the General Services Administration relating to acquisitions and disposals of stockpiled materials would be transferred to the Commission.

The functions of the Federal Emergency Management Agency relating to the National Defense Stockpile would be transferred to the Commission.

The Commission would be required, in developing stockpile policy, to consult directly, and on a continuous basis, with the Department of Defense, Department of Commerce, the Department of Interior, and the other Departments and agencies currently involved in setting stockpile objectives.

The Commission would be provided with the authority to buy and sell materials, in furtherance of stockpile goals, without specific approval by the Executive Branch, or authorization by the Congress.

The Commission would be empowered to rotate materials periodically in order to insure that the quality of stockpiled materials meets current military or industrial requirements.

The Commission would make recommendations to the President, the Congress, and to other agencies, concerning national policy on strategic and critical materials, and with regard to research and development relating to strategic materials and substitutes.

STOCKPILE TRANSACTION FUND

The Stockpile Transaction Fund would be transferred to the Strategic Stockpile Commission. All revenues from future stockpile sales would go into the fund. Use of transaction fund assets would be restricted to financing stockpile purchases and to paying the operating expenses of the Commission.

DEFENSE PRODUCTION ACT

The Commission would be permitted to propose, subject to congressional veto, minerals related projects under Title III of the Defense Production Act.

NATIONAL DEFENSE STOCKPILE INVENTORY OF STRATEGIC AND CRITICAL MATERIALS 1962–80 COMPARISON

It has often been stated that the dangers of mineral import dependence can be mitigated through stockpiling of critical minerals—not only for strategic military purposes but also as a protection against peacetime disruptions of supply. The 1946 Act established a strategic stockpile for precisely that purpose.

However, the National Defense Stockpile is woefully below the goals that have been set for these materials and dependence on stockpiles alone as an assurance of adequate supplies of essential minerals is a dangerous policy.

During the past 35 years stockpile policies have changed frequently and drastically. The targets for individual minerals in some instances have changed as many as 10 or 15 times. For some of the most important metals—aluminum, copper, lead, zinc and nickel—the goals at times have been set at zero. Under the Kennedy, Johnson and Nixon Administrations, the large holdings of these metals were offered for sale. All the aluminum, nickel and copper was sold as well as most of the zinc and about half the lead. It is obvious that the desire to raise revenues or to influence market prices has prevailed over strategic considerations.

Domestic cobalt-producing mines were closed in the mid-sixties as they were unable to compete in the market at the prices then prevailing. At that time the stockpile began to sell cobalt. Over a 12-year span, 60 million pounds of the 100 million pounds on hand at the end of 1962 was sold.

This year the Administration has committed itself to purchase one-twelfth of the amount sold earlier at a cost of that is about half the entire proceeds realized from the earlier sales.

In the future it is essential that a more consistent policy with respect to stockpiles be established.

The attached compilation compares the actual holdings in the National Stockpile in 1962, when the figures were made public for the first time, with the present stockpile goals. It shows, in general, that if no purchases or disposals had been made between 1962 and 1981 that we would be much closer to the present goals than we are after all the changing of stockpile goals during this period.

The following examples are illustrative:

Commodity	Inventory December 1962	Goal September 1980	Excess/deficit 1962 inventory versus 1980 goal	Actual excess/deficit 1980
Cobalt	103, 120, 123 lb	85, 400, 000 lb	+17, 720, 123 lb	−44, 597, 607 lb.
Copper	1, 134, 162 ST	1, 000, 000 ST	+134, 162 ST	−970, 952 ST.
Lead	1, 385, 630 ST	1, 000, 000 ST	+285, 630 ST	−498, 964 ST.
Nickel	223, 217 ST	200, 000 ST	+61, 717 ST	−200, 000 ST.
Platinum	766, 342 Tr. oz	1, 310, 000 Tr. oz	−543, 658 Tr. oz	−857, 360 Tr. oz.
Aluminum	5, 938, 870 ST	7, 150, 000 ST	−1, 211, 130 ST	−3, 705, 936 ST.
Zinc	1, 579, 907 ST	1, 425, 000 ST	+154, 907 ST	−1, 049, 030 ST.

It should be noted that there was no silver objective in 1962. This was not due to a conscious decision to avoid stockpiling silver but because of the large amounts the Treasury still held then.

The Federal Emergency Management Agency estimates that it will cost $14 billion to achieve the present goals. If the status quo (1962) had been maintained, on balance the cost would be very little and there would have been surpluses in the high value commodities such as copper, aluminum, zinc, cobalt, nickel, and lead.

* The Treasury held 1,626,138,290 TrOz of silver in 1962.

(a) Aluminum Oxide, Fused Crude: hold 249,864 ST of fused crude as offset against 208,220 ST of aluminum oxide, abrasive grain.

(b) Chromium Group, Chemical and Metallurgical Grades: Metallurgical grade ore goal is 3,200,000 SDT of specification grade; inventory 1,956,824 SDT, shortfall 1,243,176 SDT.

(1) Hold 217,695 DT of Fe Cr high carbon against shortfall of 544,238 SDT of specification grade ore.
(2) Hold 243,892 ST of Fe Cr low carbon against 609,730 SDT of specification grade ore.
(3) Hold 89,208 SDT of non-specification grade metallurgical ore against the balance of the 89, 2208 SDT specification grade ore shortfall.
(4) Hold 47,466 SDT of non-specification grade metallurgical ore against a shortfall of 31,644 ST of Fe Cr Si.
(5) Hold 56,830 SDT of non-specification grade metallurgical ore against a shortfall of 16,237 ST of chromium metal.
(6) Hold 337,715 SDT of non-specification grade metallurgical ore against 337,715 SDT of chemical grade ore shortfall.

(c) Columbium group:

(1) Columbium group not broken down in 1962.
(2) Hold 930,911 pounds Cb as FE Cb against 1,095,189 pounds Cb as concentrates.
(3) Hold 44,851 lb Cb as Cb metal against 52,766 lb Cb as concentrates.

(d) Manganese, Dioxide, battery Grade Group:

Hold 21,989 SDT of manganese, battery grade natural ore against a shortfall of 21,989 SDT of manganese, battery grade,synthetic dioxide.

(e) Manganese Group, chemical and Metallurgical grades: Metallurgical grade ore goal is 2,700,000 SDT; inventory 2,409,377 SDT; shortfall 290,623 SDT of stockpile grade ore.

(1) Hold 14,172 ST of Mn metal against 35,430 SDT of metallurgical ore.
(2) Hold 23,574 ST of Fe Mn Si against 42,433 SDT of metallurgical ore.
(3) Hold 28,921 St of Fe Mn medium carbon against 57,842 SDT of metallurgical ore.
(4) Hold 77,460 ST of Fe Mn high carbon against 154,920 SDT of metallurgical ore.
(5) Hold remaining 83,518 ST of Fe Mn high carbon against reduction of ore value in desired inventory mix.

(f) Tungsten Group:

(1) WC powder goal is 2,000,000 lb W; stockpile grade inventory 1,921,167 lb W; shortfall 78,833 lb W; Hold 111,775 lb W as non-specification grade WC to offset 78,243 lb W as WC specification grade (assume 70% recovery of usable W).

(2) W metal powder goal is 1,600,000 lb W; inventory stockpile grade 1,566,964 lb W; shortfall 33,036 lb W. Non-stockpile grade W metal powder inventory is 331,947 lb W. Assume 70% recovery as usable material, then 331,947x.70=232,363 lb W. Hold 47,194 lb W as non-specification grade powder to offset shortfall of 33,036 stockpile grade W powder.

(3) Hold balance of non-stockpile grade W powder 232,363-33,036=199,327 lb W as powder against 234,209 lbs W as concentrate.

(4) Hold 840,752 lbs W as Fe W stockpile grade against 987,884 lb W as concentrate. Hold 1,184,609 lb W nonstockpile grade Fe W at 70 percent recoverable against 974,341 lb W concentrate.

Mr. JEPSEN. Mr. President, I rise today to support the Strategic Stockpile Reform Act of 1981, introduced by my distinguished colleague from New Mexico, Senator SCHMITT. Establishment of an independent management commission for the National Defense Stockpile will finally insure that strategic interests control stockpile policy and management.

The National Defense Stockpile was created in 1946 to reduce the dangers of mineral import dependence through stockpiling of critical raw materials. The stockpile was designed to provide protection against peacetime disruption of supply, as well as to meet strategic military needs in wartime.

Unfortunately, stockpile policies have undergone frequent and drastic changes over the last 35 years. The stockpile goals for some individual minerals have changed as many as 10 or 15 times. The goals for some of the most important minerals have at times been reduced to zero.

Mr. President, it is obvious that economic considerations have consistently prevailed over strategic considerations in stockpile policy. In the midsixties, for example, the stockpile began the sale of cobalt, a metal vital for aircraft production. Over a 12-year period, 60 million pounds of the 100 million pounds on hand was sold. This year, the administration has committed itself to purchase one-twelfth of the amount sold earlier at a cost that is about half the entire proceeds realized from the earlier sales.

Now, at a time when we are increasingly aware of our dependence on foreign mineral imports, the stockpile is seriously below the goals in many vital raw materials. We are deficient in cobalt, aluminum, lead and copper, and it will take $14 billion to bring levels of these materials up to the targets. At the present rate of acquisitions, it will take us decades to reach our goals.

The lesson of the past 35 years is clear: We need to establish an independent agency to manage the National Defense Stockpile. There is simply no other way to guarantee that national security is the paramount consideration in the administration of the stockpile, as was mandated in 1946.

The Strategic Stockpile Reform Act of 1981 would establish an independent, five-member commission nominated by the President and confirmed by the Senate. All the members of the Strategic Stockpile Commission would be required to have expertise in such areas as defense materials requirements, minerals production, et cetera.

The Commission would combine the policy function of the Federal Emergency Management Agency and the management functions of the General Services Administration. Most importantly, the Commission's management of the National Defense Stockpile would be completely removed from the congressional budget authorization process, further hindering the use of the stockpile for economic or political reasons.

Mr. President, this legislation is long overdue. Enactment of the Strategic Stockpile Reform Act of 1981 will insure that the management of the stockpile serves no other goal than that of a strong national defense.

By Mr. SYMMS (for himself and Mr. WALLOP):

S. 1983. A bill to amend the Internal Revenue Code of 1954 to provide transitional rules for estate and gift tax treatment of disclaimers of property interests created by transfers before November 15, 1958; to the Committee on Finance.

ESTATE AND GIFT TAX TREATMENT OF DISCLAIMERS

● Mr. SYMMS. Mr. President, I am introducing a technical piece of legislation today which will remedy an existing inequity in our tax system by providing, in general, that holders of remainder interests created before the publication of the IRS regulations in 1958 will have a period of 9 months after the enactment of this bill within which to disclaim their interests and such disclaimers would be treated as a "qualified disclaimer" under section 2518.

In general, a disclaimer is a renunciation or a refusal to accept the ownership of property. If a disclaimer is properly made and is deemed effective for Federal gift tax purposes, the subsequent transfer of the property will not be considered a taxable transfer by the person disclaiming. In addition, a disclaimer may result in increasing the amount of the estate tax charitable or marital deduction if the property disclaimed passes to a charity or a surviving spouse. If the disclaimer is not treated as valid for Federal gift tax purposes, it will constitute a taxable gift.

Prior to 1976, the Internal Revenue Code did not specifically address the issue of whether a disclaimer was subject to gift tax. Yet, although there was no Internal Revenue Code gift tax provision governing disclaimers, the Treasury, on November 15, 1958, issued regulations to the effect that a disclaimer could constitute a taxable gift under certain circumstances even though it was effective under applicable local law. Until that date in 1958, the law had been clear that a disclaimer was not subject to gift tax so long as it was effective under applicable local law.

Thus, prior to 1958 the Federal gift tax consequences of a disclaimer was largely dependent upon its effectiveness under local law, and although there were certain principles that were common in many of the State laws, there were also many differences. Nevertheless, the basic rationale underlying all local law was the perception that a person who had properly disclaimed was not considered to have held title to the property at any time. Some States had not enacted any statutory provisions and their disclaimer rules, if any, had been developed by the courts. Because of the differences in local laws, therefore, disclaimers made under identical situations in different States may not have received the same treatment for Federal gift tax purposes.

The 1958 regulations provided that one of the circumstances which resulted in the gift tax being applied was the situation where the disclaimer was not made within a "reasonable time after knowledge of the existence of the transfer." Many of the State statutes dealing with disclaimers did not provide for a specific time period within which a disclaimer had to be made in order to be effective, although a number of States did provide that the disclaimer had to be made within a "reasonable time" after the transfer. The language of the regulations did not immediately cause a problem because "a reasonable time after the transfer" was not a new concept. However, what the tax bar did not know was that the IRS was about to introduce a new concept by interpreting the word "transfer" to mean that point in time when the trust was created.

For many years, tax practitioners uniformly had been of the view that the proper time to disclaim a remainder interest in a trust was after the life beneficiary had died and the interest became possessory, rather than when the trust was created. This was because prior to the time when the interest became possessory, it was not fixed—the intended beneficiary could die or the assets underlying the interest could be completely consumed. However, the IRS took the opposite view and, using the language of its 1958 regulations, interpreted "transfer" to mean the date of creation rather than the date on which the interest became possessory.

In 1973, the precise question was presented to the court of appeals for the eighth circuit in the Keinath case, and the court rejected the interpretation of the IRS. Specifically, the court held that a disclaimer of a remainder in a trust would not be subject to gift tax if it was made within a "reasonable time" after the death test was satisfied. However, the IRS has refused to follow the decision in Keinath and has persisted in taking the position that a remainder interest must be disclaimed within a reasonable time after the creation of the trust, regardless of when the holder of the intervening life estate dies.

To date, the efforts of the IRS have met with success in the U.S. Tax Court and in a recent split decision in the court of appeals for the ninth circuit in Jewett whereas decisions against the IRS have been handed down by the court of appeals for the eighth circuit in its 1973 decision in Keinath and again more recently in its 1980 en banc decision in the Cottrell case. This conflict of opinion has led to mass confusion and a series of very expensive court cases on the part of taxpayers since 1973.

At the urging of the estate and trust bars, Congress acted to end the controversy and establish definitive rules for the determination of an effective disclaimer. Section 2518 of the Internal Revenue Code was added by the Tax Reform Act of 1976 and provided definitive rules relating to disclaimers of interests created after 1976. If the requirements of the provision are satisfied, a refusal to accept the property is to be given effect for Federal estate and gift tax purposes even if the applicable local law does not technically characterize the refusal as a "disclaimer."

If a qualified disclaimer is made, the Federal estate, gift, and generation-skipping transfer tax provisions are to apply with respect to the property interest disclaimed as if the interest had never been transferred to the person making the disclaimer, and thus, a person making a qualified disclaimer is not to be treated as having made a gift to the per-

son to whom the interest passes by reason of the disclaimer.

Under section 2518, a "qualified disclaimer" is an irrevocable and unqualified refusal to accept an interest in property that satisfies four conditions.

First, the refusal must be in writing.

Second, the written refusal must be received by the transferor of the interest, his legal representative, or the holder of the legal title to the property not later than 9 months after the day on which the transfer creating the interest is made. However, if later, the period for making a disclaimer is not to expire in any case until 9 months after the day on which the person making the disclaimer has attained age 21.

Third, the person must not have accepted the interest or any of its benefits before making the disclaimer.

Fourth, the interest must pass to a person other than the person making the disclaimer as a result of the refusal to accept the property.

Section 2518 resolved the dispute in favor of the IRS and for the first time codified the requirement that a qualified disclaimer for gift tax purposes had to be made within a reasonable time of the creation of the interest. However, section 2518 by its express terms applies only to the disclaimer of property interests created after December 31, 1976. Section 2518 does not change prior law as to the disclaimer of property interests created prior to January 1, 1977.

Nevertheless, the IRS has persisted in taking the position that a remainder interest in a trust must be disclaimed within a "reasonable time" after the creation of the trust even though the trusts were created prior to the enactment of section 2518. In other words, the Service is applying the standards of section 2518 retroactively.

If the IRS view prevails, the result is that holders of remainder interests in trusts created prior to January 1, 1977 were and are now forever preempted from making effective disclaimers. Curiously, section 2518 gives the holders of remainder interests created after January 1, 1977—those created with full knowledge of the new law—a 9-month period in which to disclaim. It could not have been the intent of Congress to grant a 9-month period to disclaim to those interests created after the law was known and at the same time to deny to those trusts already in existence the right to conform to the new standards.

The inequity of the IRS position is most obvious with regard to those interests created prior to the publication of the IRS regulations in 1958. As noted above, the law prior to that date was clear that a disclaimer did not constitute a taxable gift so long as it was effective under applicable local law. Local law generally provided that an interest did not have to be disclaimed until it became possessory. Therefore holders of trust interests created in 1920 or 1940 or even 1950 and not reduced to possession by the time of the IRS regulations never had the opportunity to disclaim subsequent to the announcement of the new policy.●

By Mr. McCLURE (for himself, Mr. MELCHER, Mr. PRESSLER, Mr. HEFLIN, and Mr. GOLDWATER):

S. 1984. A bill to amend the Federal Trade Commission Act to protect the legislative and regulatory authority of the state legislatures, and for other purposes; to the Committee on Commerce, Science and Transportation.

FEDERAL TRADE COMMISSION AMENDMENTS OF 1981

Mr. MELCHER. Mr. President, on behalf of Senator McCLURE, who is in the hospital today, we are introducing a bill. We are also joined in the introduction of the bill by Senators PRESSLER, HEFLIN, GOLDWATER, and EXON.

Mr. President, today Senator McCLURE and I take another step in our 3-year bipartisan effort to reform the role of the Federal Trade Commission regarding its authority over State regulated professions.

During consideration of the most recent FTC authorization we offered an amendment which would have placed a moratorium on the FTC's activities regarding the professions. The legislation being introduced today is an outgrowth of these earlier efforts and subsequent oversight of the Commission.

This past summer the Senate Consumer Subcommittee of the Senate Commerce Committee conducted oversight hearings on July 15 and 17 entitled "FTC Activities Concerning Professionals," serial No. 97–59. I hope my colleagues and their staffs will obtain a copy of those hearings for use regarding the bill we are introducing today.

I testified at these hearings to outline the problems of FTC regulations, affecting professional groups that are already regulated by State laws. As a veterinarian and former member and chairman of the Montana Board of Veterinary Medical Examiners I have had direct experience with the licensing and regulation of my profession under the statutes of the State of Montana. To have the Federal Trade Commission attempt a layer of Federal regulations interfering with State law is not only unworkable, it is counterproductive for the veterinary profession and the people the profession serves. In our case, veterinarians serve the entire community and rural areas that their practice covers.

Other professions have similar circumstances which are better served by State surveillances under State law.

My remarks at the hearing follow:

STATEMENT OF SENATOR JOHN MELCHER

As an original sponsor, with Senator McClure, of an amendment to limit the FTC's jurisdiction regarding state regulated professions, my testimony is designed to illustrate my continuing concern for duplicative, costly governmental regulations through which the FTC would dictate to professionals how they should practice their professions.

I am heartened that this Subcommittee on Consumer of the Senate Commerce Committee has undertaken these oversight hearings regarding FTC activities as they impact upon state regulated professions and professional organizations.

During last year's consideration of the FTC authorizing legislation (S. 1991), Senator McClure and I offered an amendment which would have placed a two year moratorium on the FTC from substituting itself for state regulatory agencies and voluntary associations within their proper areas of concern. Since that time when we lost our amendment by a narrow 45–47 vote under the threat of a presidential veto, and in the face of the sweet promise of oversight hearings, much has changed.

I can say happily that the FTC's investigation of the veterinary profession has been terminated. Nevertheless, the FTC still retains, under its perception of its jurisdiction, the authority to re-institute this or other investigations of a similar nature regarding the veterinary profession. The American Veterinary Medical Association has aptly delineated in its testimony for this same hearing the protracted and extensive nature of the FTC's investigation of this profession. As the only veterinariar serving in Congress, I can say that had I been in private practice in my profession and had to suffer through this investigation, I would be no less upset than the individual practitioners who have spoken to me regarding it.

I understand that representatives for AVMA could not personally testify because of their conflicting national convention. I do hope, however, the Subcommittee staff will carefully study AVMA's testimony. It is surely a case study of government regulations gone wrong.

Mr. Chairman, our political process is a federal system. Unfortunately, the expanding elasticity of the interstate commerce clause through case law and the insatiable demands of federal government regulation have subverted this federal system. Our states have been neutered in the process. Legislation is essential to reverse this direction.

The FTC is one prime tool in the denigration of our state's police powers. In its zeal to protect the consumer, the FTC has far exceeded its statutory mandate. As Montana Attorney General Mike Greeley stated in response to the FTC's actions seeking to supersede state laws:

I also disagree with the concept which the FTC is advocating by this Rule and others it is now proposing that its regulations or rules supersede and in effect repeal conflicting state law. I personally do not believe this to be the intent of Congress in the granting of rulemaking authority to your agency . . . I do not strenuously object to the federal government taking legislative action in areas of social concern when the states have failed or refused to act. I do, however, strongly object to such action when the states have already acted responsibily to resolve a problem in their own way as they have in this instance.

All states supervise and regulate the delivery of medical and legal care to their citizens. The state laws which the FTC sought to nullify have been adopted to meet local conditions and thereby protect the public. By nullifying these, the FTC has sought to make national standards for circumstances which cry out for local and regional variations to fit community needs.

Our states are attuned to the needs and problems of their own communities; for the federal government to interfere is unwarranted.

I do not quarrel with the body of antitrust case law which has developed regarding the professions. Rulings such as the Supreme Court Goldfarb decision subjecting professionals to penalties arising from anticompetitive practices (price-fixing conspiracies or illegal boycotts) are fine and the FTC or DOJ should prosecute. While I would like to believe that this would never be necessary by the federal government, I accept the principle that the antitrust laws should apply to the business aspects of professional practice.

I also oppose FTC activity in the field of

professional regulation for several other deeply-felt reasons. First, the activities of professionals are different from those of most of the retail and wholesale merchants that the Federal Trade Commission was established to regulate. Second, the existing mechanisms for regulating professionals are working well and should be encouraged, not crippled as the FTC is attempting to do. And finally, my philosophy of federal government leads me to conclude that the federal agencies should not become involved in an activity traditionally and adequately governed by non-federal authorities.

A professional works under different circumstances than does a person in other retail and service industries. Most of the time, people come to a professional only when they have a problem that poses a serious threat to their well-being which they cannot handle themselves. Whether the problem is an abandoned spouse, an inflamed appendix, aching tooth, sick dog, or failing eye sight, each client or patient's problem is unique and can only be resolved by actions based on professional judgment.

Almost by definition, the client or patient must entrust his fate to the competency and integrity of the professional. A person's health or well-being is placed in the professional's hands, and his performance will have permanent effects on the life of that person. Whether we are dealing with law, psychiatry, or dentistry, each person's problems are unique and must be addressed on their own merits by a professional with a deep and specialized expertise. The skills of the professional are inherently not susceptible to general rules.

The mechanisms that have been developed over the years to protect consumers from lazy and incompetent professionals reflect this inability to generalize. The professionals themselves saw the need first and took the initial steps to assure professional competence. In the middle of the Nineteenth Century, voluntary associations were established by many of the professions to encourage higher competence in their colleagues.

These associations also encouraged the development of the state regulatory systems that have added the force of law to these voluntary standards throughout this century. Each association and each state have developed slightly different ways of assuring the competency of its professionals. This is only logical, because professionals are taking care of individual people and their problems, and people are different in different parts of the country. The citizens and professionals in a local area are in the best position to judge the actions of a professional. Furthermore, the growing presence of malpractice law has had a major impact on the conduct of professionals.

But the Federal Trade Commission would change all this. The FTC would substitute its judgment, in advance, of how the professional should exercise his judgment. To my way of thinking, this is nonsense. Perhaps after years of investigations, hearings, and litigation, the professionals of the Federal Trade Commission would also conclude that it is nonsense. At least their recent termination of the investigation of the veterinary profession portends this.

I believe that the Federal Trade Commission has better things to do. However, it appears that it is up to Congress to give the agency the sense of reasonable priorities that it cannot seem to develop on its own. The traditional regulatory systems of the professional associations, the states, and the courts are all working well. It would just be a sinful waste of millions of dollars if we have to wait for the FTC to learn these things by itself.

The result I foresee from the FTC's effort to regulate the professions is a debilitating weakening of the influence and effectiveness of the private, voluntary professional associations and our federal system. These associations are sources of leadership in each of the professions, and with their expertise, they can bring more good to society than the FTC has ever dreamed possible. They may need a little prodding occasionally, such as Mr. Bates provided for professional advertising, but the association, not the FTC, has the knowledge of the professions needed to make such changes work.

We must act now to prevent the Federal Trade Commission from squandering more and more of its limited resources on futile efforts. I can see no good coming from further agency activity in the area of professional regulation. I can see only arbitrary and inept rules that could change the nature of professional practices without any discernible benefit to clients and patients.

As noted at the beginning of my testimony, my interest in legislation designed to prohibit these FTC activities remains. Senator McClure and I intend to reintroduce such legislation.

Mr. Chairman, I ask that the statement of the American Veterinary Medical Association and attachments be printed in the hearing record in full and to follow immediately after my statement.

Mr. MELCHER. Mr. President, I believe this legislation strikes the proper balance between Federal Government regulation, State regulation, and the regulation of professionals by professionals.

As the FTC comes before Congress for reauthorization in 1982, I look forward to working with my colleague from Idaho and to the passage of this legislation as part of that reauthorization.

Mr. President, this bill is a bill to restrict the Federal Trade Commission's activities regarding the professions.

We have had over the past couple of years an attempt, Senator McCLURE and I have, to make certain that the FTC's zealous efforts to regulate professions will not interfere with those professions that are licensed and covered by State law.

The bill attempts to define the authority of the FTC in that regard and to limit their authority to insert themselves in an unneeded position where State law regulates and licenses professional groups.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1984

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Trade Commission Amendments of 1981."

(b) Whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made a section or other provision of the Federal Trade Commission Act.

EXEMPTIONS OF STATE REGULATED PROFESSIONS AND THEIR ASSOCIATIONS

SEC. 2. (a) Section 4 of the Act is amended by adding at the end thereof the following: "Incorporated or unincorporated associations of State regulated professions means nonprofit professional associations of practitioners who are independently licensed and regulated by the laws of the respective States."

(b) Section 5(a)(2) is amended by inserting after the word "except" the following: "practitioners of a profession whose members are licensed and regulated by a State as a condition of independent practice within the State, incorporated or unincorporated associations of State-regulated professions,".

(c) Section 6(a) is amended by inserting after "excepting" in the first sentence "incorporated or unincorporated associations of State-regulated professions,".

(d) Section 6(b) is amended by inserting after "excepting" in the first sentence "incorporated or unincorporated associations of State-regulated professions,".

(e) Section 6(h) is further amended by adding the following language at the end thereof: "Nothing in this section shall authorize the Commission to initiate any investigation or proceeding, or promulgate any rule or regulation (excepting rules and regulations that are already the subject of litigation in the courts) affecting any State regulated profession, or individual members thereof, or with respect to its State or National professional associations."

PREEMPTION OF STATE LAW

SEC. 3. (a) Section 6(a) is amended by inserting immediately before the period at the end thereof the following: "; *Provided, however,* That the Commission shall have no authority to gather and compile information concerning, or investigate, the organization, business, conduct, practices, and management of any person, partnership, or corporation acting in conformance with applicable State law."

(b) Section 18(a) is amended by adding new paragraphs (3) and (4) as follows:

"(3) The Commission shall have no authority for purposes of this section to prescribe any rule with respect to unfair or deceptive acts or practices in or affecting commerce (within the meaning of Section 5(a)(1) of this Act) regulating the activity of any person, partnership or corporation which conform to applicable State law.

"(4) Nothing in this section shall authorize the Commission to promulgate any rule affecting any State regulated profession, or individual members thereof, or its State or national professional associations."

DATA GATHERING

SEC. 4. Section 9 is amended by inserting immediately before the first semi-colon in the first sentence of the first paragraph thereof the following:

", provided the Commission shall reimburse all reasonable costs including attorneys' fees of the person, partnership, or corporation complying with the information request".

SUBPOENAS

SEC. 5. (a) Section 9 is amended by inserting immediately prior to the second paragraph thereof the following:

"Upon refusal by any person, partnership or corporation to appear or produce evidence relating to any matter under investigation, following a reasonable time after issuance of the request, the Commission may apply for the issuance of a subpoena from any district court within the jurisdiction of which such inquiry is carried on."

(b) Section 9 is amended by deleting the words "require by subpoena" in the first sentence of the first paragraph and substituting the word "request" and, further, by deleting the last sentence in the same paragraph.

UNFAIR METHODS OF COMPETITION: UNFAIR OR DECEPTIVE ACTS

SEC. 6. (a) Section 5(a)(1) is amended by adding at the end thereof the following language:

"For purposes of this Act an unfair method of competition or an unfair or deceptive act or practice shall be an Act which causes substantial consumer injury that outweighs the benefits derived from such act."

PROCEEDINGS

SEC. 7. (a) Section 5(b) is amended to read as follows:

"(b) Whenever the Commission shall have reason to believe that any person, partnership, or corporation has been or is using any

unfair methods of competition or unfair or deceptive act or practice (provided, however, that the Commission shall have no jurisdiction to initiate any proceeding against such person, partnership, or corporation acting in conformance with applicable state law), and if it shall appear to the Commission that an initiation of a proceeding by it in respect thereof would be in the interest of the public, it shall file a complaint in the district court for the judicial district in which at least one of the respondents reside, or has his principal place of business or, if he does not reside or have his principal place of business within any such judicial district, in the District Court of the United States for the District of Columbia. The person, partnership, or corporation named as defendant shall have the right to appear at the place and time so fixed and show cause why an order should not be entered by the Court requiring such person, partnership, or corporation to cease and desist from the violation of the law so charged in said complaint. Any person, partnership, or corporation may make application, and upon good cause shown, may be allowed by the Court to intervene and appear in said proceeding by counsel or in person. If upon such hearing the Court shall be of the opinion that the method of competition or the act or practice in question is prohibited by this Act, it shall state its findings as to the facts and shall issue and cause to be served on such person, partnership, or corporation an order requiring such person, partnership, or corporation to cease and desist from using such method of competition or such act or practice. Until the expiration of the time allowed for filing a petition for review, if no such petition has been duly filed within such time then until the record in the proceeding has been filed in a court of appeals of the United States, as hereinafter provided, the Court may at any time, upon such notice and in such manner as it shall deem proper, modify or set aside, in whole or in part, any report or any order made or issued by it under this section. After the expiration of the time allowed for filing a petition for review, if no such petition has been duly filed within such time, the Court may at any time, after notice and opportunity for hearing, reopen and alter, modify, or set aside, in whole or in part, any order made or issued by it under this section, whenever in the opinion of the Court conditions of fact or of law have so changed as to require such action or if the public interest shall so require: *Provided, however,* That said person, partnership, or corporation may, within sixty days after service upon him or it of said report or order entered after such a reopening, obtain a review thereof in the appropriate court of appeals of the United States, in the manner provided in subsection (c) of this section."

(b) Subsection (c) through (l) of section 5 are amended by deleting the word "Commission" each place it appears and inserting in lieu thereof the words "District Court".

(c) Section 5(m)(1)(B) is amended by deleting the word "Commission" the first time it appears and inserting in lieu thereof the word "District Court".

(d) Section 13(a)(2) is amended by deleting the word "issuance" and inserting in lieu thereof the word "filing"; by deleting the word "Commission" the second and third times it appears and inserting in lieu thereof the words "District Court"; and by inserting the words "of appeals" after the words "the court."

(e) Section 13(b) is amended to read as follows:

"(b) Whenever the Commission has reason to believe—

"(1) that any person, partnership, or corporation is violating, or is about to violate, any provision of law enforced by the Federal Trade Commission, and

"(2) that the enjoining thereof pending the filing of a complaint by the Commission and until such complaint is dismissed by the district court or set aside by the court of appeals on review, or until the order of the district court made thereon has become final, would be in the interest of the public—

The Commission by any of its attorneys designated by it for such purpose may bring suit in a district court of the United States to enjoin any such act or practice. Upon a proper showing that, weighing the equities and considering the Commission's likelihood of ultimate success, such action would be in the public interest, and after notice to the defendant, a temporary restraining order or a preliminary injunction may be granted without bond: *Provided, however,* That if a complaint is not filed within such period (not exceeding 20 days) as may be specified by the district court after issuance of the temporary restraining order or preliminary injunction, the order or injunction shall be dissolved by the district court and be of no further force and effect: *Provided further,* That in proper cases the Commission may seek, and after proper proof, the district court may issue, a permanent injunction. Any such suit shall be brought in the district in which such person, partnership, or corporation resides or transacts business."

(f) Section 13(c) is amended by inserting the word "district" immediately before the word "court" each time it appears.

REPEAL OF FTC INTERVENOR PROGRAM

Sec. 8. Section 18(h) is repealed. Subsections (i), (j) and (k) of section 18 are redesignated as "(h)", "(i)" and "(j)" respectively.

EFFECTIVE DATE

Sec. 9. The amendments made by this Act shall be effective immediately upon enactment.

● Mr. McCLURE. Mr. President, I am today introducing, along with Senator MELCHER, the "Federal Trade Commission Amendments of 1981." I am pleased that Senators GOLDWATER, HEFLIN, PRESSLER, and EXON have also joined us in cosponsoring this important legislation, making it a bipartisan effort which includes Senators with extensive knowledge about the FTC.

As my colleagues know, I have for some time been very concerned about the Commission's actions involving both business and the professions as well as their traditional relationship to the States. Many will recall, in fact, the amendment that Senator MELCHER and I pressed on this issue during the 1980 consideration of the FTC reauthorization.

While that effort failed by only two votes, little has occurred since then to alleviate the concerns which prompted it. That is, the Commission continues to dabble in areas where its jurisdiction is questionable and overstep its authority even where it does exist.

The FTC is scheduled for reauthorization in 1982, so now is the time to begin to address the problems raised, but not resolved, in the last Congress. A moratorium bill similar to last year's McClure-Melcher amendment has already gained the support of well over 100 cosponsors on the House side; and, our new proposal builds on that concept relative to the FTC's actions against the professions.

I emphasize that our bill is not limited to clarifying the relationship between the professions (lawyers, engineers, physicians, dentists, optometrists, architects, accountants, veterinarians, and the like), the States, and the FTC. I think many of the FTC's procedures are fundamentally flawed and inherently unfair to all parties before the Commission—business, professional, and otherwise—and should be dealt with as well.

Accordingly, we address three major areas: The traditional State responsibility for legislative and regulatory action in our Federal system; the ability of professions and their associations to develop meaningful standards of professional conduct to protect the public; and the basic unfairness of the process that subjects groups to FTC fishing expeditions and allows the Commission to be judge, jury, and prosecutor on the same case.

Consider the first issue. There is a clear danger that unelected FTC officials in Washington are working to preempt State law and regulatory authority. In its first ophthalmic goods and services rulemaking, for instance, the FTC sought to nullify any State law that did not conform to its proposed rule. This action occurred in spite of the fact that the State legislatures are just as concerned and more sensitive to local conditions and values. Furthermore, any basis for such an assertion of regulatory authority is absent in the Federal Trade Commission Act.

Because Congress apparently has not spoken clearly enough on this issue, our bill spells out in no uncertain terms that the FTC has not been given any authority to set aside State law and that it is the States which have the proper authority to regulate the professions.

The second issue we raise in our bill is the encouragement of self-regulation in the public interest. Every profession has adopted ethical standards intended to guide the members of the profession in responsible conduct to clients and to the public. To be sure, we may find an example where this self-regulation has not worked as it should, but these cases are few and far between. The vast majority of professionals have heeded their ethics and served the public well.

Mr. President, professionals must and will continue to police themselves. The Commission simply does not have the know-how to do it in their place.

Our bill would end the suppression of self-regulation by preventing the FTC from initiating any more actions against the professions or their nonprofit associations. This is something that has been the subject of hearings before the Senate Commerce Consumer Subcommittee in 1979 and again this summer. Our bill addresses the legitimate concerns raised in both sets of hearings.

The final issue, the FTC's procedures for enforcement, was addressed in part by enactment of the FTC Improvements Act of 1980. There Congress set additional requirements on the Commission's trade regulation rulemaking authority in order to protect the public from overzealous efforts by misguided "reformers". I am satisfied that this situation is much improved over 2 years ago.

However, the Commission's adjudicatory procedures continue to trouble me. It is the Commission that decides to

bring a complaint against a party. Then, FTC attorneys try the case before an administrative law judge, also an FTC employee. Any appeal of the administrative law judge's decision is then taken before the full Commission—the very body that decided to bring the complaint in the first place. Such an arrangement is, to me, inherently unfair for parties before the Commission.

Judicial review can only be had in the courts of appeals. Any review at that level is a limited one and the Commission's findings are given great weight. Is it any wonder so many parties sign consent decrees? As far as they are concerned, fighting the Commission is a no-win situation. Even if the courts ultimately decide against the Commission, the legal costs to achieve such a victory are staggering. In fact, they are beyond the means of many parties.

I think it is time to restore some equity to the FTC's adjudications. Parties to Commission proceedings should have a fair "day in court" and should not feel that the deck is stacked against them.

Our bill addresses these problems in several ways. First, it puts an end to "fishing expeditions" by limiting the FTC's subpena authority. Second, it requires the FTC to find that any consumer injury caused by allegedly unfair or anticompetitive behavior outweighs any benefits flowing from such behavior. Third, it provides that the FTC prove its case before a Federal district court, not an administrative law judge who is a Commission employee. I think this change is the most important of all the procedural changes contained in the bill because it assures an independent review of all the facts by an impartial judge.

Mr. President, the FTC is a creation of the Congress and it is our responsibility to insure that the Commission operates within the boundaries of the law. In recent years, we have seen unprecedented efforts by the Commission to expand its activities into areas well beyond those charted by Congress. It is time for Congress to curb these actions.

This bill is a vehicle for doing just that. At the same time, it can be an instrument for moving the agency more toward the economic analysis and efficiency role which the new Chairman Miller has said it should emphasize. That would also be consistent with recommendations made by the administration over the past few months.

I know there will be hearings and debates on these and other issues involving the FTC in the second session. I look forward to that debate and I believe that this bill can be a focal point for these discussions. Adoption of these provisions will be an important signal by Congress that it responds to the concerns of its constituents and takes its oversight responsibilities seriously.●

By Mr. BENTSEN:

S. 1985. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for dividends paid by certain small businesses and to provide simplification in accounting rules related to inventory; to the Committee on Finance.

SMALL BUSINESS CAPITAL FORMATION AND INVENTORY SIMPLIFICATION TAX ACT OF 1982

● Mr. BENTSEN. Mr. President, today I am introducing the Small Business Capital Formation and Inventory Simplification Tax Act of 1982.

The program I am proposing today is not inflationary and targeted at increasing cash flow in the most important segment of our economy—the small business community. Small business accounts for almost half of our gross national product and provides over 87 percent of all new private sector jobs. My bill today addresses two of the fundamental problems confronting the continued strong economic growth of the small business community—capital formation and inventory reform. Both issues have become a primary concern of the small business and independent business community.

My bill will allow a small business to deduct the first $150,000 of a dividend distribution. This provision will enable small business to attract new capital. By permitting a deduction for dividend distribution the investor is encouraged to take an equity interest in the business in lieu of a debt interest. This will help prevent undercapitalization of corporations and strengthen the debt-equity ratio of newly formed corporations. In addition, this provision will enable small business the benefit of being organized in corporate form while being taxed on the first $150,000 of earnings in the same manner as a sale proprietorship or partnership.

Mr. President, this year was a particularly difficult year for businesses to depend on external sources of funds, such as bank loans and/or the capital markets, for investment and expansion. It was a year in which many businesses could not afford to borrow money at rates of interest in excess of 20 percent and still turn a profit.

Inventory accounting reform is one way of minimizing the problems caused by this type of dependency. Instead, it fosters capital formation by increasing the internal cash flow and retained earnings of a business.

The impacts of inventory accounting appear in improved profits and higher cash flows, especially through the reduction in income under LIFO accounting. Inventory, especially wholesale and retail inventory, has been steadily increasing as a percentage of total assets. Furthermore, inventory intensive industries like wholesaling and retailing have increased in employment by 5 million since 1970. This suggests that inventory accumulation and distribution is playing an increasingly larger role in the economy and for this reason the tax and accounting provisions concerning inventory will also have more of an impact.

Corporate cash flows have increased steadily since 1961 but have surged strongly since 1974 as more companies have adopted LIFO—last in, first out—accounting. More recently, constant dollar cash flows, which stood at $147.9 billion in January 1979 increased to $155.2 billion a year later, an increase of 4.9 percent. During that same period output grew only 2.7 percent. Hence, new inventory accounting has made the business industry more liquid.

However, as of 1976 less than 4 percent of manufacturers used LIFO, less than 2 percent of retailers used it.

Why is this?

In a recent study by the National Association of Wholesaler-Distributors, the most frequent responses were: "Too complex and too costly."

Let me give a short explanation that will illustrate that point.

Tax regulations provide that a taxpayer must keep inventories in which the production purchase or sale or merchandise is an income-producing factor. There are two accrual methods for determining the cost of items in the closing inventory—FIFO, first in, first out, and LIFO, last in, first out.

The preferred method, in times of inflation is LIFO because it more realistically relates cost plus inflation to income.

However, for tax purposes LIFO has extensive and detailed accounting and recordkeeping requirements; for example, indexing:

The determination of an individual index is not only complex, but burdensome. The double-extension method of determining an individual index requires the inventory to be priced out on a unit basis twice; once to determine the base year unit cost, and a second time to determine end of year unit cost. The end of year cost is then divided by the base year cost to determine the index number which, in turn, determines the amount of the LIFO reserve.

In an inventory of 10,000 items—relatively typical for wholesaler-distributors—such calculations are overwhelming.

Pooling is another example of LIFO complexity.

Present LIFO income tax regulations require the creation of pools, each pool containing products similar in nature. The pools are then used to determine the increase or decrease in the LIFO inventory.

A small manufacturer of one or more similar products is allowed to pool its entire inventory together. Wholesalers and retailers on the other hand, are required to separate their inventories into pools by major lines, types, or classes of goods. The customs of classification of a particular commodity group are important factors in determining a pool.

In fact, the Department of Treasury has in the past recognized this complexity and on one appearance before Congress former Deputy Assistant Treasury Secretary for Tax Policy, Dan Halperin stated:

"Small business has a legitimate complaint that the current complexity in the use of LIFO effectively denies them its benefits. The Administration supports the need to simplify the LIFO rules for small business to make them more available."

Given the LIFO simplification provision in the recently enacted Economic Recovery Tax Act of 1981 and draft simplification regulations floated for public comment early this year. it would appear that the current Treasury Department would also subscribe to that philosophy.

Suffice it to say that inventory reform is one means of easing the capital for-

mation burdens placed on small business. Like depreciation reform it aids capital formation through increasing the internal flow of cash.

During an inflationary period, LIFO results in a reduced income taxes payable, which can be deferred so long as inventory levels and prices remain at least as high as when LIFO was adopted, because current revenue from operations is more accurately reflected.

The financial impact on business today is greater than it has ever been.

There is a growing emphasis on liquidity and the more fundamental elements of net worth.

Given today's economy and that of the foreseeable future, LIFO can help realize the desirable goals of both business and Treasury, provided business is not denied access to it by complexities and cost.

I would add that in addition to LIFO the use of the simpler cash receipts and disbursements method of accounting for those small businesses that do not report inventory for tax purposes is equally as important for cash/flow capital formation as is LIFO for inventory businesses.

In recognition of the need to foster business capital formation, the following provisions of the tax law on accounting for inventories are particularly burdensome and, therefore, should be revised. My bill would accomplish those objectives as follows:

First. Repeal of LIFO conformity requirement. Under the present law, a business electing LIFO must keep its financial statements and its tax statements the same. In other words, it cannot use LIFO for financial purposes and, at the same time, use LIFO for tax purposes. This bill would revoke the LIFO conformity requirement.

Second. Alleviating the initial penalty associated with the LIFO election. If a business wants to elect LIFO, it is required to restore to cost inventory writedowns taken in prior years. Thus, a business that restores inventory writedowns to costs due to its desire to elect LIFO, has a larger bill due and payable over the next 3 years. To alleviate this severe drain on the business when it elects LIFO, it would be permitted to restore inventory writedowns to income over a 10-year period.

Third. Simplification of inventory pooling requirements. The current LIFO pooling requirements are a regulatory burden on wholesalers and retailers. These businesses are forced to keep complex records based on the pooling requirement to group items of inventory by major lines, types, or classes of goods, that is multiple pooling. Manufacturers, on the other hand, use a natural business unit (one pool).

Subsection (a). Certain small businesses permitted to use one pool:

In a massive simplification of the law, small businesses with less than $4 million in gross receipts would be permitted to use one pool for LIFO.

Subsection (b). Pooling simplification for wholesalers and retailers:

Wholesalers and retailers, not electing the preceding subsection, would be permitted to pool their goods according to the general expenditure categories of consumer goods described in the CPI detailed report or the 15 major PPI commodity categories listed in the PPI detailed report.

Fourth. Permitting businesses to use regularly published Government price indexes. In general, a business on LIFO must develop an internal price index for valuation of its inventory. This is particularly a costly and complex requirement for small business. Department stores are currently the only industrial group permitted to use Government price indexes.

This bill permits any business electing LIFO to use an index based on general categories from the Consumer Price Index or the Producers Price Index.

Fifth. Permitting business to use certain internal indexes, without showing other methods are unsuitable or impractical. The tax regulations place certain limitations on the type of internal price index a business may use for LIFO.

For businesses wanting to continue to use internal price indexes under LIFO, this bill would broaden the choice of internal indexes. This provision would permit many businesses to use the link chain method of indexing.

Sixth. Repeal of 403(b) of the Crude Oil Windfall Profit Tax Act of 1980. This provision in the Windfall Profit Tax Act which requires a corporation to recapture its LIFO benefit as ordinary income in certain specified situations. In general, this recapture occurs when a corporation distributes its LIFO inventory in a partial or complete liquidation of the business.

Seventh. Cash receipts and disbursements method, cash method, of accounting. A business may elect the cash method if its gross receipts are less than $1.5 million and if it meets the active participant test. In general, an active participant is someone who is actively involved in management and whose principal business activity is such trade or business.

This bill is not something for Wall Street but Main Street. It is necessary and consistent with sound economic objectives.

I urge my colleagues to cosponsor this bill, and the Congress will act quickly on this legislation.●

By Mr. MELCHER:

S. 1986. A bill to provide for the use and distribution of funds awarded the Blackfeet and Gros Ventre Tribes of Indians and the Assiniboine Tribe of the Fort Belknap Indian Community, and others, in dockets Nos. 250–A and 279–C by the U.S. Court of Claims, and for other purposes: to the Select Committee on Indian Affairs.

DISTRIBUTION OF FUNDS AWARDED TO CERTAIN INDIAN TRIBES

● Mr. MELCHER. Mr. President, today I am introducing a bill to provide for the distribution of certain judgment awards to three tribes in Montana. On January 7, 1981, the Court of Claims ruled in favor of the plaintiff tribes in dockets 279–C and 250–A, as follows: For the Assiniboine Tribe of Fort Belknap, $2,170,013; for the Blackfeet Tribe, $400,000; and for the Gros Ventre Tribe of Fort Belknap, $2,094,987. Funds to satisfy the award were appropriated on January 23, 1981.

The use and distribution of Indian claims litigated before the Court of Claims are governed by the Indian Judgment Fund Act of 1973. When the Bureau of Indian Affairs does not, for whatever reason, submit an approved Secretarial distribution plan to Congress within 180 days, plus an additional 90 days if requested, after the funds are appropriated for payment, then legislation is necessary. In these cases, although the tribes acted expeditiously in submitting their plans to the Bureau, the Bureau did not submit a plan to Congress within the necessary time frame.

The bill I am introducing would distribute the funds according to plans approved by the tribal communities involved. In the case of the Assiniboine and Gros Ventre Tribes, 80 percent of the funds will be distributed per capita and 20 percent will be utilized for tribal social and economic programs. The Blackfeet award will go to the governing tribal body to be used for general government operations and social and economic programs.

I am urging early enactment of this legislation so that the tribes and their members can have the benefit and use of the funds that were set aside for them nearly a year ago.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1986

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any other provision of the law, the funds appropriated on January 23, 1981, in accordance with Section 1302 of the Supplemental Appropriation Act, 31 U.S.C. 724a, in satisfaction of a judgment awarded to the Blackfeet & Gros Ventre Tribes of Indians and the Assiniboine Tribe of the Fort Belknap Reservation in dockets numbered 250–A and 279–C of the United States Court of Claims (less attorney fees and litigation expenses), including all interest and investment income accrued, shall be distributed and used as herein provided.

SEC. 2. The funds appropriated to the Blackfeet Tribe of the Blackfeet Reservation, Montana, in docket 279–C, amounting to $400,000.00, shall be held in trust and invested by the Secretary of the Interior (hereinafter "Secretary") for the benefit of the members of the Blackfeet Tribe. The governing body of such tribe is authorized to utilize such funds on a budgetary basis, subject to the approval of the Secretary, for governmental operation and social and economic programs.

SEC. 3. The funds appropriated to the Assiniboine Tribe of the Fort Belknap Reservation, Montana, in docket 250–A, amounting to $2,170,013 shall be used and distributed as follows provided that no person shall be eligible to share in more than one award in his own right:

(a) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all persons duly enrolled as Assiniboine members of the Fort Belknap Reservation and born on or prior to and living on the date of enactment of this Act.

(b) Twenty per centum of such funds shall be held in trust and invested by the Secre-

tary for the benefit of the members of the Assiniboine Tribe of the Fort Belknap Reservation. The Treaty Committee of such tribe is authorized to utilize such funds on a budgetary basis, subject to the approval of the Secretary, for social and economic programs. Such programs may include but are not limited to land acquisitions and the development of local reservation projects.

SEC. 4. The funds appropriated to the Gros Ventre Tribe of the Fort Belknap Reservation, Montana, in docket 279–C, amounting to $2,094,987.00, shall be used and distributed as follows, provided that no person shall be eligible to share in more than one award in his own right.

(a) Eighty per centum of such funds shall be distributed in the form of per capita payments (in sums as equal as possible) to all persons duly enrolled as members of the Fort Belknap Indian Reservation of at least one-quarter degree Gros Ventre blood and born on or prior to and living on the date of enactment of this Act.

(b) Twenty per centum of such funds shall be held in trust and invested by the Secretary for the benefit of the members of the Gros Ventre Tribe of the Fort Belknap Reservation. The Treaty Committee of such tribe is authorized to utilize such funds on a budgetary basis, subject to the approval of the Secretary, for social and economic programs. Such programs may include but are not limited to land acquisitions and the development of local reservation projects.

SEC. 5. The per capita shares of living competent adults shall be paid directly to them. Per capita shares of deceased individual beneficiaries shall be determined and distributed pursuant to regulations prescribed by the Secretary. Per capita shares of individuals under age eighteen shall be paid in accordance with such procedures, including the establishment of trusts, as the Secretary determines to be necessary to protect and preserve the interests of such individuals.

SEC. 6. None of the funds distributed per capita or held in trust under the provisions of this Act shall be subject to Federal or State income taxes, and the per capita payments shall not be considered as income or resources when determining the extent of eligibility for assistance under the Social Security Act.

SEC. 7. The Secretary of the Interior is authorized to prescribe rules and regulations to carry out the provisions of this Act.●

By Mr. CRANSTON:

S. 1987. A bill to amend the Social Security Act to provide general revenue funding for successful programs providing rehabilitation services to individuals in receipt of disability benefits under title II or XVI of such act; to the Committee on Finance.

VOCATIONAL REHABILITATION SERVICES FOR SOCIAL SECURITY ACT BENEFICIARIES

Mr. CRANSTON. Mr. President, today I am introducing, for appropriate reference, a bill that would amend the Social Security Act to provide assistance to State vocational rehabilitation programs specifically for Disabled Social Security Act beneficiaries in order to accomplish two objectives that I believe the Members of this body will strongly support. Those objectives are, first, to save the Federal Government millions of dollars—with even greater savings resulting to the social security trust funds—and, second, to assist thousands of disabled Americans in their efforts to return to work and to free themselves from the disability and welfare rolls.

Joining with me as principal cosponsors of this legislation are the chairman of the Handicapped Subcommittee of the Committee on Labor and Human Resources (Mr. WEICKER), the ranking minority member of that subcommittee and its former chairman for over a decade (Mr. RANDOLPH), and the Senator from Vermont (Mr. STAFFORD), himself a longtime ranking minority member of that subcommittee, which has accomplished so very much for disabled persons. It was my great privilege to serve on that subcommittee for so many years with and under the leadership of the Senators from West Virginia and Vermont, two great champions of disability legislation.

Mr. President, this bill—which is the product of extensive discussions between members of my staff and staff members of the Committees on Finance and Labor and Human Resources—would restore with certain significant modifications programs that were in existence under the Social Security Act since 1966 for the benefit of disabled persons entitled to cash payments of social security disability insurance—SSDI—and supplemental security income—SSI—disability benefits. For ease of reference, I will refer to both of these former programs, the SSDI and SSI programs together, as the rehabilitation transfer programs.

As a result of an extremely ill-advised action, first proposed by the President in his March 1981 revised budget and later adopted by the Congress as part of the huge Omnibus Budget Reconciliation Act of 1981, now Public Law 97–35, the rehabilitation transfer programs were eliminated as of October 1, 1981. In place of the old programs, which had established their cost effectiveness, Congress adopted a proposal, originally passed by the House, that provides for an inadequate replacement program with a greatly reduced scope and, as I will explain shortly, with greatly increased costs of administration.

ILL-ADVISED BUDGET CUTTING

Mr. President, during this period in our history when we are looking at all conceivable ways to reduce Federal spending to help get inflation under control and strengthen our ailing economy, it is absolutely essential that, in making cuts, we give very careful consideration to whether each cut will ultimately have the overall desired effect. Some proposed cuts may save outlays in a particular target area but eventually produce the same or larger costs in other areas. The risk of such unwise, impractical cuts was greater earlier this year than it has ever been. During that period, a new administration attempted in a few weeks to identify cuts totaling tens of billions of dollars, and the Congress, in its great haste to enact an enormous package incorporating the bulk of those cuts, agreed to a vast number of program changes to which it was able to give little consideration. This bill is designed to reverse, in large part, one such ill-advised reduction.

I would also stress, however, that, if this bill were enacted it would not simply restore an ill-advised cut, it would reconstitute the programs involved in an improved format designed to make them more cost effective. Thus, the overall experience would not simply be a washout. Rather, having taken full advantage of this occasion to reexamine closely the rehabilitation transfer programs, we will have improved them significantly through this legislation.

REHABILITATION TRANSFER PROGRAMS

Mr. President, the rehabilitation transfer programs not only have saved money for the American taxpayer but, more importantly, have helped provide critical services to thousands of disabled citizens. By helping the States provide needed rehabilitation services to disabled persons, these programs have assisted individuals in their efforts to return to work and become active participants in their communities and to prevent needless institutionalization. Thus, the programs in the past have provided a double benefit—both by making it possible for disabled persons to lead fuller, more productive lives in their families and communities and by saving tax dollars in the process.

Mr. President, without the incentive to provide services for individuals receiving Federal disability aid—and as I will discuss, the newly enacted replacement program provides no such incentive—it is unlikely that, during this period of budget reductions, State departments of rehabilitation will focus their diminished resources on individuals who are in receipt of Federal financial assistance. The result will be that individuals currently receiving SSDI and SSI disability benefits will not receive the critical rehabilitative services necessary to help them in their efforts to work and to get off the disability rolls.

CURRENT LAW DOOMED TO FAIL

Mr. President, the substitute program recently enacted as part of the recent Reconciliation Act—sections 2209 and 2344 of Public Law 97–35—is clearly doomed to failure and needs to be replaced. According to an internal memorandum circulated in the Social Security Administration, it is estimated that the new program will distribute only $3.5 million to the States and only in the form of after-the-fact reimbursements. In addition, the Senate-reported Labor, HHS, Education, Appropriations Act, as well as both the further continuing resolutions contain an appropriation of only $3.1 million for the SSI portion of these programs for fiscal year 1982. These figures should be compared to fiscal year 1981 outlays under the old program of $37.3 million for the SSI portion and $124 million for the combined SSDI and SSI programs. That money was used to rehabilitate Federal beneficiaries to help them get off the disability and welfare rolls and to help the Federal Government save much larger amounts.

To continue the comparison, the tiny program envisioned under current law will increase the Social Security Administration's administrative costs by $1.5 million over the cost of administering the repealed programs. This is because 35 new staff positions are needed to administer the very complicated new program. There will be some small offsetting savings by eliminating the involvement

of the Rehabilitation Services Administration, which had 13 full-time equivalent employees to help administer these programs in fiscal year 1981, but certainly nothing close to the amount of the increases that the SSA considers necessary.

Therefore, even though the program authorized under current law will serve only a tiny fraction of the number of individuals served under the old rehabilitation transfer programs or under the new program we are proposing here today, it will cost significantly more to administer. The program our bill would create would increase savings to the Federal Government over the very limited provision in current law by rehabilitating many more Federal beneficiaries at a significantly lower proportionate administrative cost.

PROVISIONS OF NEW PROGRAM

Mr. President, with this as background, let me briefly explain the provisions of our bill, and how it is designed to accomplish its objectives. Our bill would replace the programs currently authorized as a result of the Reconciliation Act and replace them with a new streamlined program modeled after the old rehabilitation transfer programs—in place for the last 15 years—with changes to correct various deficiencies in the old programs by strengthening the cost-effective features inherent in this approach.

As did the old programs, our bill would provide funding to State departments of rehabilitation for the purpose of providing vocational rehabilitation services to individuals currently receiving benefits under the SSDI and the SSI programs for disabled persons.

In the first 2 years of the program, $100 million would be distributed to the State-run vocational rehabilitation programs for this purpose. This amount can be compared to the total $124 million distributed to the States under the old program in fiscal year 1981 and to the total of $106 million that was projected, before the Reconciliation Act was enacted, to be distributed in fiscal year 1982.

Also, as under the old programs, one objective of our bill is to produce savings for the social security trust funds and for general revenues as a result of the vocational rehabilitation of the maximum number of individuals currently receiving Federal disability benefits.

In contrast to the old programs, however, this bill would result in greater savings due to the fact that funds would be distributed to the States based on their record of achieving successful rehabilitations that result in terminations from the disability rolls. In each of the first 2 years of the program—fiscal years 1982 and 1983, $100 million would be made available for the new program and each State would receive a percentage of that amount equal to the percentage of Federal beneficiaries who were rehabilitated in that State's vocational rehabilitation programs during the previous 5-year period and who were terminated from the disability rolls during fiscal year 1981 and fiscal year 1982, respectively.

The standard for measuring such rehabilitations would be "SGA"—substantive gainful activity—rehabilitated beneficiaries, a term already used by the rehabilitation services administration and which the Commissioner of the Rehabilitation Services Administration would have the flexibility to define by regulation, thus helping restrain administrative costs. In addition, the Social Security Administration would determine how many of these "SGA" rehabilitated beneficiaries within a given fiscal year are actually terminated from the disability rolls and are, thus, no longer receiving Federal disability benefits.

After the first 2 years of the program, the amount each State would receive each year would be adjusted up or down by a maximum of 20 percent based on the number of disability benefit terminations during the previous year. Thus, each State could receive up to a 20-percent increase or decrease, contingent upon the State's successes—or lack thereof—in rehabilitating Federal beneficiaries to the point at which they no longer receive SSA program benefits. This self-adjusting funding mechanism has the unique quality of helping to insure that the maximum amount of savings to the Federal Government is realized. In the past, the initial success of the old program resulted in the expansion of funding without regard to what level of funding would result in the optimal amount of savings. The funding mechanism in our bill would assure that the optimal amount of funds transferred to each state would be calculated in such a way as to create incentives for states to achieve the maximum level of savings.

In addition, the self-adjusting mechanism would provide strong incentives for the States to focus their resources on Federal beneficiaries. Without this incentive—and the program authorized under current law is too small to provide any such incentive—it is unlikely that State departments of rehabilitation would focus their limited resources on individuals who are in receipt of Federal financial assistance.

In addition, the 20-percent limit on the annual increase or decrease that each State would receive would protect against extreme fluctuations in the assistance a State could receive.

ACHIEVING NET SAVINGS AND STRENGTHENING THE SOCIAL SECURITY SYSTEM

Mr. President, although the new program which our bill would establish would initially involve Federal Government outlays of $100 million for fiscal years 1982 and 1983, the result for the Federal budget ledger would eventually be an overall savings. The timing of exactly when savings would exceed costs is difficult to predict. However, we do know that savings eventually would be greater than total, cumulative outlays and that, as a result of the funds transferred, thousands of disabled people would be living richer, more meaningful lives as productive members of their communities.

Mr. President, I would also stress that our bill would have an immediate positive impact on the financial solvency of the social security system. All of us in Congress are concerned about the future of the social security system in meeting its obligation to provide benefits to replace income lost as a result of disability or retirement. Some Members of Congress are even talking about radically reducing the benefit levels in order to assure the financial integrity of the system.

However, if this bill is enacted, we would strengthen the social security system by immediately increasing the social security disability trust fund reserves without reducing any benefits; at the same time, we would be increasing benefits in the form of renewed Vocational Rehabilitation Services for Social Security Act beneficiaries. Also, the immediate savings to the trust funds would eventually be overshadowed by much larger savings that would accrue to the trust funds as a result of the thousands of social security disability insurance beneficiaries who would no longer be receiving benefits out of the trust funds but rather who would—through their payroll taxes—be contributing dollars into the trust funds. These increased tax receipts are not included in our savings estimate.

In addition, as I have pointed out earlier, by allowing the funding level for each state to fluctuate up or down by 20 percent after the new program has been in effect for 2 years, we would further be helping to assure that funds are being utilized in the most effective fashion. States would be rewarded or penalized based upon their successes, or lack thereof, in fully rehabilitating Social Security Act beneficiaries.

RECONCILIATION DEBATE

Mr. President, it was only a few months ago, on June 25, 1981, that I argued here on the Senate floor in favor of preserving the previous rehabilitation transfer programs. In fact, 49 of my colleagues agreed with me in my efforts to prevent the elimination of these cost-effective programs. With three Senators necessarily absent for the vote who announced their support for my amendment, it was defeated 47 to 50.

During that debate, I explained how, by transferring to State departments of rehabilitation money otherwise held in reserve for the payment of disability benefits for individuals unable to work due to a disabling condition, we have helped to create the situation where fewer individuals will need the cash payment benefits in the future. I also explained that the use of disability benefit funds for the specific purpose of helping individuals get off the disability rolls had resulted and would continue to result in a net reduction in the amount of money that flows out of the Federal Treasury.

Mr. President, the argument was made then that the transfer under the old programs of funds out of the Social Security Disability Trust Fund to State departments of rehabilitation was an improper use of trust fund moneys. Although I disagreed with this criticism then, as I do today, I have nevertheless modified the bill we are introducing so as to provide for funding out of general revenues rather than from the trust funds. This modification has the dual benefit of helping to shore up the ailing social security

trust funds, while meeting any concerns about use of trust fund money.

Mr. President, concerns expressed during the June debate about the cost effectiveness of the old transfer programs were not meritorious. The Social Security Administration itself published—in the February 1981 issue of the Social Security Bulletin, volume 44, issue No. 2, the results of a study it conducted on the disability insurance portion of the rehabilitation transfer programs. This study clearly showed the cost effectiveness of the transfer programs. To quote from the study:

Using cost-benefit procedures and varying assumptions as to the impact of vocational rehabilitation services, the savings to the trust funds were found to range between $1.39 and $2.72 per $1 cost for the DI beneficiaries who completed their vocational rehabilitation service period in fiscal year 1975.

We also heard then the concern that many people who received benefits under the old program were not actually rehabilitated as a result of services received in the program, that the programs were inefficient in accomplishing the job for which they were originally designed, and that as a result the programs have not been cost effective. Although I refuted these assertions last June, and demonstrated that the latest, most complete evidence revealed that the benefit-cost ratio had consistently exceeded $1 for every dollar spent, we have nevertheless taken this opportunity to redesign the program so as to minimize the chance that the program might be abused in certain contexts and not achieve its original objectives.

In this regard, the distribution formula in the bill would tie the level of assistance each State would receive to the relative number of individuals rehabilitated in that State who have earnings at a level equal to or greater than substantial gainful activity and who eventually reach a status indicating the ability to perform an ongoing employment objective sufficient to disqualify them for Federal disability benefits.

Since a mechanism for routinely collecting the data as to the number of individuals who are rehabilitated and achieve earning at the SGA level has existed for many years at RSA, and since these individuals can be routinely cross-referenced with the individuals terminated by the Social Security Administration from the Federal disability rolls, an administrative savings would accrue in not having to collect the extensive new data that the current law requires. The number of individuals across the Nation earning at a level of SGA for a continuous period of 9 months—data which must be developed under the current program—is currently unknown. To acquire this data, SSA will have to spend valuable social security trust fund money, as well as funds from general revenues, thereby further diminishing the funding available for rehabilitation.

CONCLUSION

Mr. President, I strongly urge all of my colleagues to support this legislation to restore, with an improved, more cost-effective structure, the authority for a critically important program to provide for the vocational rehabilitation of disability benefit recipients. This bill provides us with the unusual opportunity to help achieve two goals that I believe we all share—providing much-needed help to severely handicapped individuals in order to enable them to lead productive lives and, at the same time, reducing the total costs of Federal programs.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1987

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 222(d) of the Social Security Act is amended to read as follows:

"Payments for Rehabilitation Services for Blind or Disabled Individuals Receiving Benefits under this Title or Title XVI

"(d)(1) For the purpose of making vocational rehabilitation services more readily available to disabled individuals who are—

"(A) entitled to disability insurance benefits under section 223,

"(B) entitled to child's insurance benefits under section 202(d) after having attained age 18 (and are under a disability),

"(C) entitled to widow's insurance benefits under section 202(e) prior to attaining age 60,

"(D) entitled to widower's insurance benefits under section 202(f) prior to attaining age 60, or

"(E) blind or disabled, have not attained age 65, and are entitled to supplemental security income benefits under title XVI,

and to the end that savings will result to the Federal Disability Insurance Trust Fund and to general revenues as a result of enabling the maximum number of such individuals to engage in productive activity, there are authorized to be appropriated for each fiscal year such sums as may be necessary to enable the Secretary to make payments to States under paragraph (2).

"(2)(A) With respect to each of the fiscal years 1982 and 1983, each State (or an entity or entities having an agreement or contract under paragraph (3) to carry out a program within a State) shall be entitled to receive payment from the Secretary for each such fiscal year, for the purpose of defraying in part the costs of vocational rehabilitation services furnished individuals described in paragraph (1) (including services during their waiting periods), under a State plan for vocational rehabilitation services approved under title I of the Rehabilitation Act of 1973 (29 U.S.C. 701 et seq.), in an amount which bears the same ratio to $100,000,000 as the number of 'SGA rehabilitated beneficiaries' (as defined in paragraph (4), and as determined by the Commissioner of the Rehabilitation Services Administration) in such State whose benefits (described in subparagraphs (A) through (E) of paragraph (1)) were terminated during the preceding fiscal year by reason of ability to perform substantial gainful activity bears to the number of such 'SGA rehabilitated beneficiaries' in all the States whose benefits were so terminated during such prior fiscal year.

"(B) With respect to fiscal year 1984 and each fiscal year thereafter, each State (or the entity or entities having an agreement or contract under paragraph (3) to carry out the program within such State) shall be entitled to receive payment for such purpose in an amount equal to the amount of the payment made to such State, or with respect to such State under an agreement or contract under paragraph (3), for the preceding fiscal year, increased or decreased by a percentage equal to the percentage increase or decrease (as the case may be) in the number of 'SGA rehabilitated beneficiaries' in such State whose benefits (described in subparagraphs (A) through (E) of paragraph (1)) were terminated during the preceding fiscal year by reason of ability to perform substantial gainful activity, over the second preceding fiscal year; but in no event shall the increase or decrease in the amount of the payment to (or with respect to) a State exceed 20 percent for any one fiscal year.

"(3) In the case of any State that is unwilling to participate in the program established under, or does not have a plan which meets the requirements of, paragraph (2), the Secretary may provide such services in such State by agreement or contract with other public or private agencies, organizations, institutions, or individuals. The provision of such services shall be subject to the same conditions as otherwise apply under paragraph (2).

"(4) For purposes of this subsection the term 'SGA rehabilitated beneficiary' means an individual described in paragraph (1) who—

"(A) has, within the five-year period immediately preceding the date on which such individual's benefits (described in subparagraphs (A) through (E) of paragraph (1)) were terminated, completed a program of services under the State plan for vocational rehabilitation approved under title I of the Rehabilitation Act of 1973 in accordance with the individualized written rehabilitation program required under section 102 of such Act, or under a program described in paragraph (3);

"(B) concurrently with receiving such services has achieved employment with earnings at or above a level determined by the Commissioner of the Rehabilitation Services Administration, in accordance with regulations which such Commissioner shall promulgate (notwithstanding the provisions of section 223(d)(4) and regulations thereunder), to be a level of substantial gainful activity for purposes of this paragraph; and

"(C) has maintained such employment for the period of time (in no event less than 60 days) determined by such Commissioner as necessary to demonstrate the likelihood of the individual continuing to maintain such employment.

"(5) Payments under this subsection shall be made in advance or by way of reimbursement, with necessary adjustments for overpayments and underpayments.

"(6) The Secretary shall cooperate with the Commissioner of the Rehabilitation Services Administration so as to ensure that the resources of the agencies involved in carrying out this subsection are effectively and efficiently utilized in attaining the purposes of this subsection.".

(b) Section 1615(d) of the Social Security Act is repealed.

(c) The amendment and repeal made by subsections (a) and (b) shall apply with respect to services rendered on or after October 1, 1981.

By Mr. DECONCINI (for himself, Mr. JACKSON, and Mr. JOHNSTON):

S. 1989. A bill to amend title XVIII of the Social Security Act to provide medicare coverage under part A for alcoholism treatment services, and to provide payment for such services on a charge basis; to the Committee on Finance.

PAYMENT FOR TREATMENT FOR ALCOHOLISM

Mr. DECONCINI. Mr. President, today I am introducing on behalf of myself and my distinguished colleagues, Senators JACKSON and JOHNSTON, a bill concerning the very serious problem of alcoholism. The legislation was suggested by alcohol-

ism treatment providers who are convinced that the present system can be made more cost effective for the Government and more rewarding for the patient.

I have become convinced that new approaches are needed if medicare is to control burgeoning costs while maintaining that recipient's receive the finest care. This bill specifically addressed medicare reimbursement for alcoholism treatment. Not only is the bill designed to improve the medicare patient's outcome but it also will realize immediate Federal budget savings of over $1 billion per year.

Alcoholism is accepted today not only as a psychological disease but as an illness with physical manifestations. No longer is alcoholism perceived as an illness that need be concealed. It has been conservatively estimated that 7 percent of the adult population in the United States are alcoholics; approximately 19 percent of teenagers are problem drinkers, including alcoholics. Even more frightening, some 50 percent of motor vehicle fatalities are related somehow to the consumption of alcohol. Indeed over one-third of adult inpatients in general hospitals are there because of alcoholism or alcohol-related problems.

It is estimated that as many as 15 percent of the elderly population, the primary recipients of medicare benefits, are alcoholics. These prevalence figures may not even accurately reflect the extent of the problem of alcoholism in the elderly when one considers that reports coming from managers of retirement communities have called it the No. 1 problem leading to accidents, fires, and deaths. Elderly alcoholics who are drinking have a higher incidence of major health problems than their nondrinking alcoholic counterparts.

In a 3-year followup study, elderly alcoholics, having alcohol-related health programs at a rate of 89 percent, stopped drinking, which showed a reduction in the rate to only 55 percent of such problems. Prolonged alcohol abuse adversely affects the heart, the liver, and the central nervous system, to name but a few. Taking these physiological effects of alcohol into account, successful treatment of the elderly alcoholic immediately reduces concomitant, severe health problems, including attempts at suicide and outbursts of violence.

The notion that the elderly alcoholic is an unlikely prospect for recovery is, fortunately, quite incorrect. Indeed, the chance of recovery seems to increase with age. Data confirms that as people age, the rate of recovery from alcoholism increases up to about age 50 when it stabilizes at about 70 percent recoveries as measured by abstinence at 1 year.

Under the present medicare system, alcoholism treatment is reimbursed at 100 percent of those costs that are considered reasonable and necessary. According to the Federation of American Hospitals, this actually comes out to about 88 percent of charges. Thus, the Federal Government, as the major purchaser of health care, is receiving a discount. As outpatient coverage is currently designed, medicare beneficiaries are not effectively covered for similar outpatient alcoholism treatment services available to nonmedicare patients. This state of affairs is not so much the result of explicit exclusion from coverage as it is the practical outcome of a system of coverage that has not yet addressed alcoholism as a health care entity.

Those outpatient services that are covered do not fit together to form an integrated and individualized treatment package for alcoholism. The existing avenues to outpatient coverage are: First, medical social services; second, home health visits; and third, comprehensive rehabilitation centers. Although it may be theoretically possible for a provider to construct an outpatient followup and aftercare program for alcoholics under these categories of coverage, the resultant package would be unwieldy, overly costly, and inappropriate to the patient's true needs.

A separate but related difficulty in providing cost-effective treatment to medicare's alcoholic beneficiaries is the payment of providers on a cost-reimbursement basis, which puts emphasis on statistically countable services for allocating costs under the reimbursement formulas. Such emphasis on statistically countable units of service, instead of usual and customary charges deemed useful and necessary for the patient, biases reimbursement in the direction of services that do not make for an integrated or individualized treatment package. The reimbursement mechanism drives treatment in the direction of rendering inappropriate services in order to satisfy the reimbursement system's need for countable units of service.

The bill, I am introducing will modify the medicare reimbursement system to improve patient outcome through incentives and concurrently save the Federal Government over $1 billion a year. Under this bill medicare would reimburse a flat 75 percent of charges, which is a percentage below the 88 percent of charges currently reimbursed by the Health Care Financing Administration (HCFA). By reimbursing on a percent of charges basis, the Government and provider decide "up front" what coverage a medicare beneficiary can except, thus taking third and fourth beneficiary parties out of the process of choosing treatment for an individual beneficiary.

When incentives are changed to encourage cost-efficient procedures, energies are directed successfully toward a new goal; positive incentives can directly influence decisions made by millions of individuals working toward personal goals. The savings in administrative costs that could be realized by switching to this simple predictable system, taking into account both the institution's and Government's layers of administrative costs, is probably quite substantial. The immediate savings, within the first year, directly realized by a reduction in the rate of reimbursement is nearly $500 million annually.

The bill further stipulates that the provider be allowed to seek the remaining 25 percent from the patient; however, and most importantly, the patient, by the very terms of the bill, is not legally liable for such payment, and no other source of public money may be available to either provider or patient for this 25 percent of charges. This guarantees that the patient is the only source for these charges and motivates the provider to achieve sobriety for the patient. Furthermore, the patient who has invested in his or her treatment is better motivated to get something out of it.

The money that an alcoholic does not spend on liquor—estimated to be $2,000 to $3,000 annually—is "new" money and would easily cover 25 percent of charges for successfully treating the disease, without having an impact on the patient's ability to have the necessities of food, clothing, and shelter. It should be made clear, however, that no individual will be refused treatment because of inability to pay. It can be fairly projected that the improved treatment outcomes and methods will result in an additional savings of over $500 million annually.

Since the bill is designed to allow a 75 percent of charges reimbursement across-the-board, a provider will be able to treat an individual without financial constraints. This makes all types of treatment equally affordable by patient and provider, leaving them free to select the best treatment for each individual case. Thus, when an individual no longer requires inpatient care, less costly outpatient care can be provided while still receiving medicare reimbursement at 75 percent of charges. This will encourage integrated, effective, and cost-effective treatment. By including outpatient services as an integral part of medicare coverage, medicare can maximize cost-reduction while improving the health status of the elderly.

In order to cap the Government's payments, the bill allows the Government to consider recognizing only those charges whose rate of change does not exceed the Consumer Price Index. This will serve against any tendency by providers to set abnormally high prices. Moreover, the bill has a built-in marketplace mechanism to control charges: both medicare and nonmedicare patients must be charged from the same fee schedule.

Mr. President, the incentives inherent in the percent-of-changes reimbursement system are natural for the cost-efficient and effective treatment of medicare alcoholics. The medical importance of alcoholism as the number three killer in the United States, and the economic importance of alcoholism as a major drain on our society's wealth through lost productivity and increases in associated illness, both argue for serious consideration of this bill.

To summarize, the changes in the medicare system outlined above would, I believe, significantly improve medicare patient outcome and result in Federal budget savings of over $1 billion per year in the second full year of implementation. While this bill is no panacea for all of the ills of the medicare program, it is clearly superior to the present system of cost reimbursement and will improve the well-being of the medicare beneficiary.

I hope my colleagues on the Finance Committee will conduct full and

thorough hearings on the issues raised in this proposal. If the ideas are sound—as I believe they are—they will withstand the sharpest scrutiny. And if they do withstand that test, they deserve to be enacted into law.

I ask unanimous consent that the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1989

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 1812(a) of the Social Security Act is amended—

(1) by striking out "and" at the end of paragraph (2);

(2) by striking out the period at the end of paragraph (3) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new paragraph:

"(4) alcoholism treatment services provided in accordance with section 1861(bb).".

(b) Section 1813(a)(1) of such Act is amended by inserting ", other than for such services provided as alcoholism treatment services in accordance with section 1861 (bb)," after "The amount payable for inpatient hospital services".

(c) Section 1814(a)(2) of such Act is amended—

(1) by striking out "or" at the end of subparagraph (D);

(2) by striking out the period at the end of subpargraph (E) and inserting in lieu thereof "; or"; and

(3) by adding at the end thereof the following new subparagraph:

"(F) in the case of alcoholism treatment services, such services are required for the treatment of the individual for alcoholism.".

(d) Section 1814(b) of such Act is amended—

(1) by redesignating paragraph (3) as paragraph (4);

(2) by striking out "paragraph (3)" in paragraph (1) and inserting in lieu thereof "paragraphs (3) and (4)";

(3) by striking out "or" at the end of paragraph (2);

(4) by striking out "paragraph (3)" in the last sentence of such subsection; and

(5) by inserting after paragraph (2) the following new paragraph:

"(3) in the case of alcoholism treatment services, 75 percent of the charges with respect to such services, subject to the charge limitations in section 1861 (bb) (3); or".

(e) Section 1861 of such Act is amended by adding after subsection (aa) the following new subsection:

ALTERNATIVELY REQUIRED OUTPATIENT TREATMENT SERVICES FOR ALCOHOLISM

"(bb)(1) The term 'alcoholism treatment services' means services provided by a hospital, having an agreement with the Secretary under this subsection, which would otherwise constitute inpatient hospital services under part A or outpatient hospital services under part B, and which are provided for the treatment of an individual for alcoholism. Outpatient hospital services shall qualify as alcoholism treatment services only if they are provided immediately after an inpatient hospitalization of the individual for treatment for alcoholism, or are provided at any time after such an inpatient hospitalization for the treatment of alcoholism and are required alternative interventions which attempt to prevent subsequent inpatient services.

"(2) The Secretary shall enter into an agreement with any hospital which is willing and able to do so under which payments are made to such hospital for alcoholism treatment services in accordance with section 1814(b)(3) and this section, if such hospital meets the requirements of subsection (e) and such hospital agrees—

"(A) that no individual entitled to benefits under part A shall be refused alcoholism treatment services by such hospital on account of such individual's inability or refusal to pay the 25 percent of charges not reimbursed under part A, and that any such individual shall incur no legal obligation to pay such charges;

"(B) to accept reimbursement for such services under this title only in accordance with section 1814(b)(3), and on the basis of the charge limitation established under paragraph (3) of this subsection;

"(C) not to accept any payment for such services made on behalf of any individual entitled to benefits under part A from any Federal, State, or local governmental program, other than (i) part A of this title, or (ii) any health benefit program under which such individual is entitled to such payment if eligibility for such program is based upon such individual's employment or former employment by an entity of Federal, State, or local government; and

"(D) that the hospital will charge for alcoholism treatment services on the basis of a single schedule of fees which is the same for individuals entitled to benefits under this title as for other individuals.

"(3)(A) Payment under section 1814(b)(3) to a hospital having an agreement with the Secretary under paragraph (2) shall be equal to 75 percent of the lesser of (i) the actual charge for such service, or (ii) the charge limitation amount for such service as determined under subparagraph (B).

"(B) The charge limitation amount for any service for a hospital for its first accounting year beginning in calendar year 1981, shall be such hospital's actual charge for such service on the first day of such accounting year. The charge limitation amount for any service for any hospital for any accounting year thereafter shall be an amount equal to such hospital's charge limitation amount for such service (or, in the case of a new service, such hospital's charge limitation amount for a similar or comparable service) for the preceding accounting year, increased or decreased by a percentage equal to the percentage increase or decrease in the consumer Price Index for the last quarter of the last calendar year ending prior to the beginning of such accounting year over such Index for the last calendar quarter of the second preceding calendar year ending prior to the beginning of such accounting year.

"(4) Any alcoholism treatment services which otherwise would constitute inpatient hospital services under part A shall be subject to certification and review procedures under this title in the same manner as inpatient hospital services, and any day of such inpatient services shall be counted as a day of inpatient hospital services for purposes of determining the limitations on the number of days of inpatient hospital services to which an individual is entitled under part A.".

(f)(1) Section 1832 (a)(1) of such Act is amended by inserting before the semicolon at the end thereof the following: "and those which constitute alcoholism treatment services as defined in section 1861(bb)".

(2) Section 1832 (a)(2)(B) of such Act is amended—

(A) by striking out "and" at the end of clause (i);

(B) by striking out "; and" at the end of clause (ii) and inserting in lieu thereof ", and"; and

(C) by adding at the end thereof the following clause:

"(iii) alcoholism treatment services (as defined in section 1861 (bb));".

(g) Section 1905 (a) (18) of such Act is amended—

(1) by striking out "or" at the end of subparagraph (A);

(2) by striking out the period at the end of subparagraph (B) and inserting in lieu thereof "; or"; and

(3) by adding at the end thereof the following new subparagraph:

"(C) any such payments which constitute payment for any portion of the charge of alcoholism treatment services (as defined in section 1861 (bb)) furnished to an individual under part A of title XVIII.".

(h) The amendments made by this Act shall apply to alcohol treatment services furnished on or after January 1, 1982.

STATEMENT BY SENATOR HENRY M. JACKSON ON MEDICARE REIMBURSEMENT FOR ALCOHOLISM

● Mr. JACKSON. Mr. President, as a cosponsor of this bill I support the previous statements of the distinguished Senator from Arizona. I would like to expand, however, on some of the problems elderly alcoholics face and the Federal budget savings this bill would realize. In the present climate of budget cutbacks and savings it is easy to support a bill that will realize over $1 billion of savings to the medicare program without diminishing the quality of care.

As has been stated by my distinguished colleague, as many as 15 percent of the elderly population are alcoholics. That probably understates the percentage because alcoholics often deny having the disease. Managers of retirement communities have called alcoholism the No. 1 problem leading to accidents, fires, and deaths.

It is quite incorrect to assume that the elderly alcoholic is an unlikely prospect for recovery. In fact, the chance of recovery seems to increase with age. Some experts in the field report that as people age the rate of recovery from alcoholism increases. This rate increases until the age of 50 when it stabilizes at about 70 percent recovery. Recovery is measured by abstinence of 1 year.

The problems of the elderly alcoholic are well known. They have a high rate of suicide compared to their nonalcoholic counterparts, with women showing a higher rate of suicide than men. Elderly alcoholics have a higher incidence of major health problems than their nondrinking counterparts. Prolonged alcohol abuse adversely affects the heart, the liver, and the central nervous system. Successful treatment of the elderly alcoholic reduces severe health problems, including attempts at suicide and outbursts of violence.

The social profile of the elderly alcoholic shows an outstanding disruption in the stable supportive communities of work, family and friends that the younger alcoholic is able to draw upon. There can be physical disappointments of old age. The elderly tend to live alone, to take prescription drugs that may adversely interact with normal amounts of alcohol, and to live in reduced circumstances as their fixed income loses out to inflation. All these factors would recommend that a stable long-term social community be provided to recovering elderly alcoholics. Therefore, the need to integrate outpa-

tient with inpatient treatment for the medicare alcoholic under a unified category of coverage seems compelling.

This bill will reduce costly inefficiencies and save the Federal budget over $1 billion per year after the second full year of implementation.

There are immediate savings by a reduction in the current rate of reimbursement equal to $488,199,000. The proposed change in the rate of reimbursement to 75 percent of charges is a drop of 13 percent over the current calculated percent of charges reimbursement of 88 percent.

There will be a reduction in Government administrative costs of $6,115,000. An institution's administrative cost for handling the medicare cost-reimbursement procedure is about $100 per bed, without including functions associated with regular audits or costs of quality-of-service review.

Fewer patients would need retreatment, saving $300,430,000. With greater freedom to design treatment to meet the needs of the individual alcoholic covered by medicare, we will be able to reach patients whose needs are not addressed under the current system of limited outpatient coverage.

The savings to be realized through reduced cost of treatment is $225,322,000. With the option to choose the treatment best suited to each patient, the provider will be using the less expensive outpatient alternative rather than inpatient treatment.

It would be difficult to compute the savings associated with reduced illnesses. It is, however, commonly assumed that a substantial percentage of non-alcoholism hospital admissions are indeed alcohol related.

As such, these estimates at savings will save the medicare trust fund over $1 billion per year, while, more importantly, improve the treatment to the medicare patient.

The White House Conference on Aging ended last week, having made hundreds of useful suggestions to the President and Congress for ways in which to enrich the quality of life for America's 34 million older citizens. The White House Conference has helped dramatize, in a constructive way, the sheer vastness of the problems facing older Americans. It is a "minority" which all of us will join if we are fortunate enough.

I think it is important that as we consider the needs of older Americans, we think of them as individuals with differing needs.

Older Americans are a great national asset and should be viewed as an enormous reservoir of talent, knowledge and experience from which we can draw. We need not only consider programs thought to "benefit" seniors, but also ones to expand opportunities.

I believe this bill works in these positive ways, and I urge my colleagues to support the measure. I also hope that hearings on this bill will occur early next session.●

By Mr. THURMOND:

S. 1990. A bill to amend title 10. United States Code, to revise and codify the permanent provisions of law relating to military construction and military family housing; to the Committee on the Judiciary.

MILITARY CONSTRUCTION AND MILITARY FAMILY HOUSING

Mr. THURMOND. Mr. President, today I am introducing for appropriate reference a bill to codify current provisions in law with regard to military construction. The purpose of this bill is to organize and streamline military construction law that has evolved over the years and that is currently scattered throughout the code.

This draft bill represents an effort of long standing by Members of the House and of the Senate. Congressmen BRINKLEY and TRIBLE are today introducing an identical bill in the House.

My intentions are to hold hearings on this bill in conjunction with hearings that will be to examine the fiscal year 1983 military construction authorization bill. I would expect to complete action on the bill in the next session of Congress in time for its provisions to apply to the fiscal year 1984 military construction budget.

I am pleased that the ranking minority member of the Senate Armed Services Committee Subcommittee on Military Construction, Senator GARY HART, has joined with me in sponsoring this legislation.

By Mr. MATHIAS (for himself, Mr. KENNEDY, Mr. METZENBAUM, Mr. WEICKER, Mr. BIDEN, Mr. CHAFEE, Mr. MOYNIHAN, Mr. CRANSTON, Mr. ANDREWS, Mr. BAUCUS, Mr. BENTSEN, Mr. BOREN, Mr. BOSCHWITZ, Mr. BRADLEY, Mr. BUMPERS, Mr. BURDICK, Mr. ROBERT C. BYRD, Mr. CANNON, Mr. CHILES, Mr. COHEN, Mr. DANFORTH, Mr. DECONCINI, Mr. DIXON, Mr. DODD, Mr. DOMENICI, Mr. DURENBERGER, Mr. EAGLETON, Mr. FORD, Mr. GLENN, Mr. HART, Mr. HATFIELD, Mrs. HAWKINS, Mr. HEINZ, Mr. HOLLINGS, Mr. HUDDLESTON, Mr. INOUYE, Mr. JACKSON, Mrs. KASSEBAUM, Mr. LEAHY, Mr. LEVIN, Mr. LONG, Mr. MATSUNAGA, Mr. MITCHELL, Mr. PACKWOOD, Mr. PELL, Mr. PERCY, Mr. PRESSLER, Mr. PROXMIRE, Mr. PRYOR, Mr. QUAYLE, Mr. RIEGLE, Mr. ROTH, Mr. SARBANES, Mr. SASSER, Mr. SPECTER, Mr. STAFFORD, Mr. TSONGAS, Mr. WILLIAMS, Mr. JOHNSTON, Mr. STEVENS, and Mr. MELCHER):

S. 1992. A bill to amend the Voting Rights Act of 1965 to extend the effect of certain provisions, and for other purposes; to the Committee on the Judiciary.

VOTING RIGHTS ACT EXTENSION

● Mr. MATHIAS. Mr. President, today, for myself and 60 of my colleagues, I introduce a bill to extend the Voting Rights Act of 1965. The bill we now send to the desk has strong bipartisan support in both the House and Senate, and is identical to the Voting Rights Act extension, H.R. 3112, as amended, adopted by the House of Representatives on October 5, 1981, by an overwhelming vote of 389 to 24.

This is the second time this year that I have introduced a proposal to extend the Voting Rights Act of 1965. On April 7, Senators KENNEDY, METZENBAUM, WEICKER, BIDEN, CHAFEE, MOYNIHAN, CRANSTON, and I introduced S. 895, the Voting Rights Act Amendments of 1981. That bill was identical to the original version of H.R. 3112, which was offered on the same day by PETER RODINO, chairman of the House Judiciary Committee.

When I introduced S. 895, I noted while much had been accomplished under the Voting Rights Act since 1965, much more remained to be done and that unless the act were extended, much of the hard-won progress over the past 16 years would be put in jeopardy. The evidence compiled in the intervening months has confirmed my concern. Enactment of a strong, effective Voting Rights Act extension is not only justified, but circumstances compel it.

Shortly after H.R. 3112 was introduced, the House Judiciary Subcommittee on Civil and Constitutional Rights began its review of the bill. The subcommittee, under the leadership of Chairman DON EDWARDS, conducted 18 days of hearings, including field hearings in Montgomery, Ala., and Austin, Tex. More than 100 witnesses testified before the subcommittee, including victims of voting discrimination, Members of Congress, State and local officials, representatives of civil rights groups, religious leaders, scholars, and two former heads of the Department of Justice's Civil Rights Division, one Republican, one Democrat. In my view, the hearing record points to one inescapable conclusion: an effective Voting Rights Act extension must be enacted promptly.

Day after day, the subcommittee heard testimony about the continuing need for the Voting Rights Act. Far from merely rehashing tales of abuses dating back to the 1960's, the hearing record is replete with contemporary examples of voting discrimination. Some are reminiscent of the 1960's—intimidation or harassment of minority members seeking to vote or register. But, other, more sophisticated dodges, such as at-large elections, annexations, majority vote requirements, purging of voters, and even changes in polling places, have been effectively employed to dilute the impact of minority voters.

It was against this background that the subcommittee unanimously reported H.R. 3112. without amendment, on July 21, 1981. Subsequently, on July 31, 1981 the full House Judiciary Committee, by a vote of 23 to 1, approved a revised version of H.R. 3112. And, on October 5, 1981, the House approved the bill and rejected by a lopsided margin all efforts to weaken the bill approved by the House Judiciary Committee.

It is this bill, approved so decisively by the House of Representatives, that we introduce today. This proposal is fair. It is a compromise measure which we believe will be effective. Specifically, the House-passed bill contains a liberalized "bailout" provision, which was adopted at the time of the markup by the House Judiciary Committee. Under this new procedure, jurisdictions covered under

the act's special provisions, including preclearance under section 5, could bail-out more easily than under present law.

S. 895 and H.R. 3112, as introduced, would have continued the existing and more stringent "bailout" procedures. In my view, this change represents a major accommodation and I share the belief of the House Judiciary Committee that it "will provide the necessary incentives to the covered jurisdictions to comply with laws protecting the voting rights of minorities," and thus allow them to achieve exemption from the act's special requirements.

Basically, the bill would:

Continue the section 5 preclearance provision of the act while providing reasonable incentives for States and counties to "bailout" from the preclearance requirement. A covered jurisdiction could bailout if it could show that for a period of 10 years it had met certain conditions, including full compliance with the act, no acts of voting discrimination, and positive actions to protect minority voting rights.

Continue until August 6, 1992 the requirement of bilingual election materials and voting assistance.

Amend section 2 of the act to clarify the burden of proof in voting discrimination cases and thus remove the uncertainty caused by the failure of the Supreme Court to articulate a clear standard in City of Mobile against Bolden.

Mr. President, I urge my colleagues to join those of us who are sponsoring this bill and help write what I hope will be the last chapter in the very long and difficult saga that has occupied this Nation for well over a century: the struggle to guarantee the right to vote for all Americans.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1992

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (a) of section 4 of the Voting Rights Act of 1965 is amended by striking out "seventeen years" each place it appears and inserting in lieu thereof "nineteen years".

(b) Effective on and after August 5, 1984, subsection (a) of section 4 of the Voting Rights Act of 1965 is amended—

(1) by inserting "(1)" after "(a)";

(2) by inserting "or in any political subdivision of such State (as such subdivision existed on the date such determinations were made with respect to such State), though such determinations were not made with respect to such subdivision as a separate unit," before "or in any political subdivision with respect to which" each place it appears;

(3) by striking out "in an action for a declaratory judgment" the first place it appears and all that follows through "color through the use of such tests or devices have occurred anywhere in the territory of such plaintiff.", and inserting in lieu thereof "issues a declaratory judgment under this section.";

(4) by striking out "in an action for a declaratory judgment" the second place it appears and all that follows through "section 4(f)(2) through the use of tests or devices have occurred anywhere in the territory of such plaintiff.", and inserting in lieu thereof the following: "issues a declaratory judgment under this section. A declaratory judgment under this section shall issue only if such court determines that during the ten years preceding the filing of the action, and during the pendency of such action—

"(A) no such test or device has been used within such State or political subdivision for the purpose or with the effect of denying or abridging the right to vote on account of race or color or (in the case of a State or subdivision seeking a declaratory judgment under the second sentence of this subsection) in contravention of the guarantees of subsection (f)(2);

"(B) no final judgment of any court of the United States, other than the denial of declaratory judgment under this section has determined that denials or abridgements of the right to vote on account of race or color have occurred anywhere in the territory of such State or political subdivision or (in the case of a State or subdivision seeking a declaratory judgment under the second sentence of this subsection) that denials or abridgements of the right to vote in contravention of the guarantees of subsection (f)(2) have occurred anywhere in the territory of such State or subdivision and no consent decree, settlement, or agreement has been entered into resulting in any abandonment of a voting practice challenged on such grounds; and no declaratory judgment under this section shall be entered during the pendency of an action commenced before the filing of an action under this section and alleging such denials or abridgements of the right to vote;

"(C) no Federal examiners under this Act have been assigned to such State or political subdivision;

"(D) such State or political subdivision and all governmental units within its territory have complied with section 5 of this Act, including compliance with the requirement that no change covered by section 5 has been enforced without preclearance under section 5, and have repealed all changes covered by section 5 to which the Attorney General has successfully objected or as to which the United States District Court for the District of Columbia has denied a declaratory judgment;

"(E) the Attorney General has not interposed any objection (that has not been overturned by a final judgment of a court) and no declaratory judgment has been denied under section 5, with respect to any submission by or on behalf of the plaintiff or any governmental unit within its territory under section 5; and no such submissions or declaratory judgment actions are pending; and

"(F) such State or political subdivision and all governmental units within its territory—

"(i) have eliminated voting procedures and methods of election which inhibit or dilute equal access to the electoral process;

"(ii) have engaged in constructive efforts to eliminate intimidation and harassment of pesrons exercising rights protected under this Act; and

"(iii) have engaged in other constructive efforts, such as expanded opportunity for convenient registration and voting for every person of voting age and the appointment of minority persons as election officials throughout the jurisdiction and at all stages of the election and registration process.

"(2) To assist the court in determining whether to issue a declaratory judgment under this subsection, the plaintiff shall present evidence of minority participation, including evidence of the levels of minority group registration and voting changes in such levels over time, and disparities between minority-group and non-minority-group participation.

"(3) No declaratory judgment shall issue under this subsection with respect to such State or political subdivision if such plaintiff and governmental units within its territory have, during the period beginning ten years before the date the judgment is issued, engaged in violations of any provision of the Constitution or laws of the United States or any State or political subdivision with respect to discrimination in votng on account of race or color or (in the case of a State or subdivision seeking a declaratory judgment under the second sentence of this subsection) in contravention of the guarantees of subsection (f)(2) unless the plaintiff establishes that any such violations were trivial, were promptly corrected, and were not repeated.

"(4) The State or political subdivision bringing such action shall publicize the intended commencement and any proposed settlement of such action in the media serving such State or political subdivision and in appropriate United States post offices. Any aggrieved party may intervene at any stage in such action.";

(5) in the second paragraph—

(A) by inserting "(5)" before "An action"; and

(B) by striking out "five" and all that follows through "section 4(f)(2).", and inserting in lieu thereof "ten years after judgment and shall reopen the action upon motion of the Attorney General or any aggrieved person alleging that conduct has occurred which, had that conduct occurred during the ten-year periods referred to in this subsection, would have precluded the issuance of a declaratory judgment under this subsection. The court, upon such reopening, shall vacate the declaratory judgment issued under this section if, after the issuance of such declaratory judgment, a final judgment against the State or subdivision with respect to which such declaratory judgment was issued, or against any governmental unit within that State or subdivision, determines that denials or abridgements of the right to vote on account of race or color have occurred anywhere in the territory of such State or political subdivision or (in the case of a State or subdivision which sought a declaratory judgment under the second sentence of this subsection) that denials or abridgements of the right to vote in contravention of the guarantees of subsection (f)(2) have occurred anywhere in the territory of such State or subdivision, or if, after the issuance of such declaratory judgment, a consent decree, settlement, or agreement has been entered into resulting in any abandonment of a voting practice challenged on such grounds."; and

(6) by striking out "If the Attorney General" the first place it appears and all that follows through the end of such subsection and inserting in lieu thereof the following:

"(6) If, after two years from the date of the filing of a declaratory judgment under this subsection, no date has been set for a hearing in such action, and that delay has not been the result of an avoidable delay on the part of counsel for any party, the chief judge of the United States District Court for the District of Columbia may request the Judicial Council for the Circuit of the District of Columbia to provide the necessary judicial resources to expedite any action filed under this section. If such resources are unavailable within the circuit, the chief judge shall file a certificate of necessity in accordance with section 292(d) of title 28 of the United States Code.".

SEC. 2. Section 2 of the Voting Rights Act of 1965 is amended by striking out "to deny or abridge" and inserting in lieu thereof "in a manner which results in a denial or abridgement of" and is further amended by adding at the end of the section the following sentence: "The fact that members of a minority group have not been elected in numbers equal to the group's proportion of the population shall not, in and of itself, constitute a violation of this section.".

SEC. 3. Section 203(b) of the Voting Rights Act of 1965 is amended by striking out "August 6, 1985" and inserting in lieu thereof "August 6, 1992".

SEC. 4. Title II of the Voting Rights Act of 1965 is amended by adding at the end the following section:

"VOTING ASSISTANCE

"SEC. 208. Nothing in this Act shall be construed in such a way as to permit voting assistance to be given within the voting booth, unless the voter is blind or physically incapacitated.".

SEC. 5. Except as otherwise provided in this Act, the amendments made by this Act shall take effect on the date of the enactment of this Act.●

● Mr. KENNEDY. Mr. President, today Senator MATHIAS and I, for ourselves and 59 of our colleagues, are introducing a new bill to extend the Voting Rights Act of 1965.

As a result of the Voting Rights Act, hundreds of thousands of Americans can now vote and, equally important, have their vote count as fully as the votes of their fellow citizens. Hundreds of men and women from racial and ethnic minorities now hold public office in places where that was once impossible.

Twice before, in 1970 and 1975, the crucial provisions of the act have been extended. Each time the act has come under attack. But each time, the Congress on a bipartisan basis has come to its rescue, with the support of Americans from every part of the country. And in 1975, the act's protection was extended to Hispanic Americans and other language minorities who have been the victim of similar discrimination in the right to vote.

The bill we are now introducing is identical to the legislation which the House passed on October 5, by a vote of 389 to 24. That vote reflects the widespread support around the country for extension of a strong Voting Rights Act with effective enforcement provisions. The broad bipartisan coalition for this bill defeated amendments to weaken the act on the floor by margins of 3 to 1 and 2 to 1.

In the interest of expediting passage of this crucial legislation early next year, it is appropriate for the Senate to concentrate its efforts on swift passage of the House bill, which has demonstrated such overwhelming support of that body.

Last spring, Senator MATHIAS and I introduced S. 895 which now has over 30 cosponsors. That measure would extend the Voting Rights Act intact including the provisions which protect Hispanics and other minority language Americans. It also includes a clarification of section 2 of the Voting Rights Act.

Citizens may show that a particular election practice resulted in voter discrimination, without the requirement of a "smoking gun" of direct evidence of intent. Otherwise our minority citizens will face an impossible standard of proof in all but the most flagrant cases of discrimination.

The new bill parallels our original legislation except for two modifications.

First, it contains a new "bailout" procedure to permit jurisdictions now covered by section 5 of the act to end such coverage if they have complied with the provisions of the act, eliminated discriminatory procedures, and accepted participation of minorities in elections through reasonably accessible registration and other reforms.

The new "bailout" provision is a major concession that should expedite renewal of the act. A substantial number of the presently covered jurisdictions will be eligible to apply for the "bailout." This represents a compromise which is fair and will be effective.

Second, the House bill contains the same provision as the original bill on the test for proving discrimination under section 2 of the act. But to avoid any misunderstanding, the House added a provision expressly stating that unlawful discrimination cannot be established merely by the fact that minorities have won less than proportional representation in State and local offices. Other evidence would be required.

We have come a long way since 1965. But our task is not finished. Continued progress toward equal opportunity in the electoral process will be halted if we abandon the act's crucial safeguards now.

I am concerned about the need for further progress. But I am even more concerned about the risk of losing what has already been won. Those who fought the battles know how fragile the victories are. Without the preclearance provision of section 5 for new laws, many of the advances of the past decade could be wiped out overnight with new schemes and devices.

Even now, the impressive rise in registration is threatened in some States by highly questionable reregistration requirements. Their ostensible purpose is to purge old records—but their timing and methods are clearly discriminatory.

The House Judiciary Committee compiled a solid hearing record. The committee held 18 days of detailed hearings—including field hearings in the South and Southwest. It heard over a hundred witnesses. Community leaders, local officials, religious leaders, labor representatives, civil rights organizations and public interest groups, such as the League of Women Voters and Common Cause, all urged the Congress to preserve a strong voting rights act and to clarify section 2 so that it would again be available to challenge voting discrimination.

The House hearing record made clear that we are not simply rehashing problems from the 1960's or early 1970's. In fact, while more than 800 proposed changes have been objected to since 1965, well over half of those objections have been made since the last time the act was extended in 1975. The hearings demonstrated a clear, continuing, and disturbing pattern of efforts to discriminate.

All too often, the background of these submissions—the absence of an innocent explanation, or the sudden departure from past practice as minority voting strength approaches a new level—reveal a continuing intent to dilute the minority vote, and a continuing need for the act.

Many of the practices are complex and subtle. Some sophisticated schemes may, on superficial analysis, seem part of the everyday rough and tumble of American politics—tactics used traditionally by the "ins" against the "outs." In reality, these schemes are simply the latest form of efforts to perpetrate past voting discrimination, and to undermine the results of the Voting Rights Act. Although progress has been made, too many black voters and too many Hispanic voters are still denied the most basic right of democracy—the right to participate fully in the selection of their Government.

The sponsorship of this legislation shows that a majority of the U.S. Senate now favors a strong Voting Rights Act.

I hope we can move quickly in the next session to enact this legislation, so that the most precious and fundamental right in our democracy will finally become a reality for every American citizen.●

● Mr. BIDEN. Mr. President, with the elimination of the poll tax, residency requirements, and literacy tests, the most egregious aspects of discrimination against American minority voters have been eliminated. However, discriminatory changes in election systems can still deny or abridge minority voting. Therefore, the Voting Rights Act should be extended.

I am cosponsor of this bill to extend the Voting Rights Act because I believe strongly that it is necessary to extend the Voting Rights Act requirement for preclearance for certain jurisdictions. Ten years in the future, in 1992, when the amended bill would allow all States to change their election laws without automatic scrutiny by the Federal Government, hopefully there will be no need for its provisions. Such is not the case in 1981, however. The country still needs the provisions of the Voting Rights Act and it must be extended.

Although this bill is not perfect it is presently the only vehicle available to extend all the provisions of the present Voting Rights Act—an act which I believe is critical for this country.

The results were dramatic. Since the passage of the Voting Rights Act, the number of blacks registered to vote in the States covered by it has doubled. Since the language minorities protection was added in 1975, their nationwide registration has increased by 30 percent.

These figures indicate real progress. But now is not the time to rest on our laurels. Twice before, Congress has recognized the need to continue the protection of the act. Discrimination still exists, Mr. President. It exists in more subtle and sophisticated ways, but it is still there. And it is not very subtle if it is your vote that is being diminished.●

● Mr. SASSER. Mr. President, I am pleased today to join with so many of my colleagues in sponsoring the extension of the Voting Rights Act.

The free and unfettered right to vote is our most precious privilege. Indeed, the right to vote is virtually the definition of a democracy.

In 1870, with the passage of the 15th amendment, this Nation recognized the importance of the franchise, and elevated it to the same level as the other rights seen as fundamental to a free society—speech, press, religion, and due process of law.

However, stating a right does not make it real and the next decades saw the right to vote of many of our fellow citizens restricted, diluted, or simply denied. Often, no sooner would the Justice Department prove an election law discriminatory than the local jurisdiction concerned would put into effect a similar

law and the process would start all over again.

Attempts to frustrate the right to vote moved faster than the wheels of justice.

By the early 1960's, it had become obvious that the case-by-case approach was simply not working. In response, the Congress, after an enormous struggle, passed the Voting Rights Act in 1965. For the first time, the Federal Government could protect the right to vote through the administrative process. Thus, simple and more importantly prompt relief was possible.

The results were dramatic. Since the passage of the Voting Rights Act, the number of blacks registered to vote in the States covered by it has doubled. Since the language minorities protection was added in 1975, the nationwide registration has increased by 30 percent.

These figures indicate real progress. But now is not the time to rest on our laurels. Twice before, Congress has recognized the need to continue the protection of the act. Discrimination still exists, Mr. President. It exists in more subtle and sophisticated ways, but it is still there. And it is not very subtle if it is your vote that is being diminished.

The bill we are introducing today will continue the protection afforded in current law. And it will give clear expression to the intent of the 1965 Voting Rights Act. That intent is that interference with the right to vote is unacceptable in this country. It was unacceptable in previous years and it is unacceptable now.

So, I am pleased to join my colleagues in introducing this bill and I look forward to action early in the new session to continue the protection of what the League of Women Voters of my State of Tennessee has so appropriately called the most vital tool of participatory democracy.●

● Mr. MOYNIHAN. Mr. President, on April 7, I was proud to join my distinguished colleagues Senator KENNEDY, Senator MATHIAS, Senator WEICKER, Congressman RODINO, and others in proposing the extension of the major provisions of the Voting Rights Act of 1965. At that time I noted that unless Congress acted, the core of this historic legislation would expire in 17 months. Hence the time was at hand to begin the orderly and deliberate process of insuring extension. We now find ourselves 8½ months later. The House has acted. It has passed a good bill and I am pleased to join my colleagues again today on the introduction of that measure.

The House bill differs from the one introduced on April 7, in two regards. First, it contains a new procedure under section 5, the "bailout" provision. Under the House bill section 5 preclearance is contained until a covered jurisdiction can earn a "bailout" by meeting strong and reasonable standards of compliance with the act.

The provision allows bailout suits to be brought in the District Court for the District of Columbia by either States or counties; but to bail out a State or county must meet certain tests both for itself and for governmental units within it.

To bail out, a jurisdiction is required to show, on behalf of itself and its political subdivisions, that during the past 10 years and during the time the bailout suit is pending:

First, it has not used a test or device in a discriminatory manner. (This requirement could be met by jurisdictions originally covered in 1965 and 1970; jurisdictions originally covered in 1975 could not file until 1985);

Second, it has not been found by a court to have abridged the right to vote, and it has not been party to a consent decree or settlement agreement resulting in the elimination of a discriminatory voting practice;

Third, it has eliminated voting procedures and methods of election that limit minority participation in the political process;

Fourth, it has complied fully with the procedures set forth in section 5 of the Voting Rights Act (for example, it has submitted all changes for preclearance before putting them into effect);

Fifth, it has not made a submission within the previous 10 years to which the Department of Justice or the D.C. District Court has objected;

Sixth, no examiners have been sent to the jurisdiction;

Seventh, the jurisdiction has engaged in constructive efforts to eliminate intimidation and harassment; and

Eighth, the jurisdiction has engaged in constructive efforts to increase opportunities for minority participation in the political process.

In seeking to bail out, the jurisdiction must present evidence on levels of minority participation, although the bill does not require any particular levels.

There must be public notice of the filing of a bailout suit and of any proposed settlement. These provisions give anyone affected by the coverage an opportunity to be involved in the bailout proceedings before the judge renders a decision.

Once a jurisdiction has bailed out, it can be brought back under coverage at any time during the following 10 years if it engages in conduct that, had it occurred prior to bailout, would have prevented the jurisdiction from bailing out. The Attorney General or any aggrieved person can file suit to bring a jurisdiction back under the preclearance provisions.

Second, the House bill strengthens section 2. The same provision as that contained in the original Senate bill on the test for proving descrimination is retained.

This provision allows courts to find discrimination if either a discriminatory result or a discriminatory purpose is shown. However, a sentence has been added to make it clear that no quota system or requirement of proportional representation is mandated.

Mr. President, the civil rights movement of the midsixties constructed two great legislative monuments. The Civil Rights Act of 1964, which stated that neither Government agencies nor private employers could discriminate on the basis of race, and the Voting Rights Act of 1965, which as amended states that an American citizen's right to vote cannot be conditioned on his race, color, ethnic origin, or linguistic group.

There is a tendency now to suppose that the objectives of those great enactments have been attained, that they have served their purposes, and that, therefore, they are no longer needed.

Would that discrimination had indeed been extirpated from the United States and the civil rights of every citizen permanently secured. Regrettably, this is not the case. Great progress has been made, but there must be no slowing or swerving in our resolve to finish the task.

The Voting Rights Act has been supported by Democratic and Republican administrations, and by Senators and Congressmen of every political view. In a fundamental sense, it is legislation that transcends politics; that makes democratic government a reality and thereby makes politics possible. It is the foundation under all civil rights enactments, for it is the one that insures that elected representatives are properly elected. It must be preserved. And I shall do all within my power to see that it is extended.●

● Mr. ROTH. Mr. President, the right of every American to vote is the most basic element of our democracy. In recent years, thanks in large measure to the Voting Rights Act, we have made tremendous progress in assuring equal access to the political process for every American.

But more needs to be done. As an early sponsor of the bill to extend the landmark Voting Rights Act for 10 years, I believe the Congress must take action to continue this important and effective legislation. We must continue to insure that all of our citizens have the opportunity to cast their ballots freely and without any roadblocks.

Today I am again cosponsoring legislation to extend the act. However, I understand that there are two changes to the basic act incorporated in the bill—one dealing with the bailout provision and another overturning the Supreme Court decision of City of Mobile against Bolden.

In the coming weeks I intend to seek the advice of legal scholars and also follow closely the hearings which I hope will occur quickly in the Judiciary Committee on the bill with respect to these provisions. Until then I must reserve final judgment on them. But, I remain dedicated to the cause of voting rights strongly committed to the extension of the basic act.●

By Mr. MATHIAS:

S. 1993. A bill to make amendments to the District of Columbia Self-Government and Governmental Reorganization Act relating to the judiciary.

JUDICIARY OF THE DISTRICT OF COLUMBIA

● Mr. MATHIAS. Mr. President, today I am introducing legislation to amend the District of Columbia Self-Government and Governmental Reorganization Act (also known as the Home Rule Act) with respect to the appointment of judges to the courts of the District of Columbia.

As my colleagues may know, the Home Rule Act contains provisions that govern the manner in which District of Columbia judges may be selected and nominated by the President. It establishes a Judicial Nomination Commission whose

purpose it is to recommend names to the President to fill vacancies on the Superior Court and the Court of Appeals of the District of Columbia. Strict qualifications for judicial nominees and for members of the Judicial Nomination Commission are set out in the act.

The bill I am introducing today is intended as a vehicle for review and discussion of this judicial selection process. It proposes several important alterations in the process, including a change in the current residency requirement and a change in the manner in which names for possible nomination are transmitted to the President. Many of the proposals in this bill were recommended in a subcommittee report of the District of Columbia Court System Study Committee of the District of Columbia Bar. It is my intention, as the chairman of the Subcommittee on Governmental Efficiency and the District of Columbia, to schedule hearings on this matter early in the second session of the 97th Congress.

Mr. President, I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1993

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 431(e)(3)(E) of the District of Columbia Self-Government and Governmental Reorganization Act is amended by striking out the comma and "and such member shall be an active or retired Federal judge serving in the District." and inserting in lieu thereof a period.

SEC. 2. Section 443 of such Act is amended—

(1) in subsection (a) by—

(A) striking out "Except as" and inserting in lieu thereof "As"; and

(B) striking out "from the list" and inserting in lieu thereof "from a list"; and

(2) in paragraph (3) of subsection (b) by—

(A) striking out "is a bona fide resident of the District of Columbia and has maintained an actual place of abode in the District" and inserting in lieu thereof "resides in the District of Columbia or within twenty miles of its boundaries and has maintained an actual place of abode therein"; and

(B) striking out "required to be residents of the District to be eligible for reappointment or to serve any term to which reappointed" and inserting in lieu thereof "subject to the terms of this subsection in order to be eligible for reappointment or to serve any term to which reappointed".

SEC. 3. Section 434 of such Act is amended—

(1) by adding at the end of subsection (a) the following: "No member may serve more than one term, and the member appointed in accordance with subsection (b)(4)(A) shall serve at the pleasure of the President.";

(2) in Subparagraph (B) of paragraph (1) of subsection (b) by amending such subparagraph to read as follows:

"(B) resides in the District of Columbia or within twenty miles of its boundaries and has maintained an actual place of abode therein for at least 90 days immediately prior to his appointment;";

(3) in paragraph (3) of subsection (b) by amending such paragraph to read as follows:

"(3) It shall be the function of the Commission to submit names of potential nominees for appointment to positions as judges of the District of Columbia courts in accordance with section 433 of this Act.";

(4) in subparagraph (E) of paragraph (4) of subsection (b) by striking out the comma and "and such member shall be an active or retired Federal judge serving in the District." and inserting in lieu thereof a period; and

(5) by amending subsection (d) to read as follows:

"(d)(1) In the event of a vacancy in any position of the judge of a District of Columbia court, the Commission shall, within sixty days following the occurrence of such vacancy, submit to the President, for possible nomination and appointment, the names of not less than three persons for each vacancy. The President, within his discretion, may request that additional names be submitted. Whenever a vacancy will occur by reason of the expiration of such a judge's term of office, the Commission's names of potential nominees shall be submitted to the President not less than one hundred and twenty days prior to the occurrence of such vacancy.

"(2) In no instance shall the Commission recommend any person, who in the event of timely nomination following a recommendation by the Commission, does not meet, upon such nomination, the qualifications specified in section 433.".●

By Mr. KENNEDY:

S. 1994. A bill to conserve credit by restricting the availability of credit for unproductive corporate mergers and other speculative purposes; to the Committee on Banking, Housing, and Urban Affairs.

CREDIT CONSERVATION ACT OF 1982

● Mr. KENNEDY. Mr. President, I send to the desk a bill to restrict the availability of credit for unproductive large-scale corporate mergers and other speculative purposes, and I ask for its appropriate referral.

This legislation is essentially identical to an amendment which I offered last month to the Export Administration Amendments Act and which was approved by the Senate by a vote of 77 to 12. Unfortunately, the amendment was not accepted by the House conferees because of procedural considerations under the House rules of germaneness and committee jurisdiction.

However, I hope that the Senate will continue to press for action on this measure as part of our continuing effort to bring interest rates down and to make urgently needed credit available to critical sectors of our economy such as the housing, construction, and automobile industries, small business, and agriculture.

This legislation calls for the conservation of credit by urging the President, in cooperation with the Federal Reserve Board, to encourage banks not to extend credit for unproductive large-scale mergers and other speculative purposes. This bill is not a credit allocation measure. It is a credit conservation measure. It asks voluntary action by the President and the Federal Reserve Board to conserve by limiting its availability for certain purposes.

All of us understand the principal target of this bill. In recent months, some of the Nation's largest oil companies and other giant corporations have tied up huge amounts of credit in the takeover battles for Conoco and Marathon. These mergers are unproductive. They add nothing to the productivity of the Nation or even the oil industry. Instead of going out and exploring for oil and finding new oil reserves, these firms are simply using vast amounts of credit to buy up the oil reserves of their takeover targets. They would rather buy their oil than drill for it.

We are not talking here about any form of credit controls. It is my belief that banks should not be extending large amounts of credit, as they have done over the past few months, for nonproductive corporate mergers. By doing so, they are reducing the amount of credit available to critical areas of the economy such as housing, construction, the automobile industry, small businesses, and family farms.

I believe that this legislation is a prudent and a reasonable indication of the feelings of the Members of the Senate and, I dare say, of the overwhelming majority of the American people. When credit is scarce and interest rates are extremely high, banks should not be extending credit for activities that are not productive, that do not provide additional jobs, and that do not strengthen our economy. When small businesses and family farms are starved for credit and being driven into bankruptcy, credit should not be available for oil mergers and similar unproductive activities. This is a measure which we should endorse, and I hope the Senate will adopt it.

This is not an unusual idea. On past occasions, when interest rates have been high, Chairman Volcker of the Federal Reserve Board has subscribed to this concept, and has urged its member banks to limit the extension of credit for such purposes. What we are basically saying to the Federal Reserve Board is, "You have found this step to be propitious at other times; now we are urging you to find it to be propitious at the present time with regard to nonproductive mergers."

I believe all Americans have been startled by the fact that billions of dollars in credit have been made available to enable some of the largest and wealthiest corporations in this country to pursue their merger wars.

We are facing the simple reality that tens of billions of dollars—some estimates are as high as $60 billion—have been made available to giant corporations in the past few months to engage in unproductive mergers. When that amount of credit is available to those corporations, it means that less credit is available to small businesses, for the housing industry, for family farmers, and for the automobile industry.

I hope the Federal Reserve Board and the White House will heed this proposal. They could implement it even without legislation. It is a voluntary measure. It is based upon the previous precedents of the Federal Reserve Board. It calls for action now to conserve credit for productive purposes in our economy.●

By Mr. DOLE (for himself and Mr. EAST):

S. 1995. A bill to remedy procedural and structural defects in the criminal justice system; to the Committee on the Judiciary.

By Mr. DOLE (for himself, Mr. EAST and Mr. GRASSLEY):

S. 1996. A bill to provide for more effective deterrents for violent crime offenders; to the Committee on the Judiciary.

By Mr. DOLE:

S. 1997. A bill to provide assistance to State and local governments in combating crime; to the Committee on the Judiciary.

CRIMINAL PROCEDURES ACT, VIOLENT CRIME, ACT, AND CRIMINAL JUSTICE ASSISTANCE ACT

• Mr. DOLE. Mr. President, I take this opportunity to address a problem of profound significance in American society today—the problem of violent crime. During the past 10 years, the citizens of this Nation have seen an escalation in the incidence of violent crimes which is unparalleled in our history. Pick up any major metropolitan newspaper in America today, and you will see the story: Police, prosecutors and courts unable to stem rapid increases in the incidence of burglary, robbery, rape, murder, arson, and a host of other equally destructive crimes; families in fear of their neighborhoods; Americans turning to personal firearms in self defense; and the formation in some communities of vigilante groups. These disturbing trends prompt the inevitable question: What has gone wrong?

On October 16th, Attorney General Smith reported to the Congress on the results of the task force established by him to study the problems in our criminal justice system and make recommendations as to the changes that may be necessary to enhance the effectiveness of the Federal enforcement effort.

The report was divided into two phases: The first half proposed various measures that could be implemented without changes in the structure of our laws or significant, new expenditures; the second half of the task force report puts forth policy recommendations that would require modification of laws and commitments of economic resources.

The task force report explored each component of the criminal justice system, ranging from Federal and State law enforcement agencies to community efforts against crime. Emphasis was placed upon the interrelated roles that the relevant agents—law enforcement agencies, prosecutorial agencies, the courts, and the public—must fulfill to reduce crime. Numerous systemic problems were identified as contributing to an inefficient response on the part of public agencies to the cancerous growth of crime.

They include: Inadequate Federal, State, and local coordination; provocative overcrowding of prisons; expansive interpretations of constitutional or statutory rights which have allowed offenders to go free due to technical violations of law committed by officers in the course of investigations; a revolving door bail system that permits offenders with established criminal records who pose a threat to the safety of the community to be released on bail, only to commit additional crimes; and punishments for violent offenders so lenient that they merely encourage the criminal mind, to name but a few.

To be sure, the causes of crime are complex and any meaningful solution must go farther than merely focusing upon the offender, who is the symptom of a greater, underlying problem. Experts, of course, disagree upon precisely what the nature of that problem is. Some would focus upon economic factors; others, upon the problems of illiteracy and inadequate job skills, or the weakening of family authority.

Undoubtedly, the upsurge in criminal behavior is the result of these and many more factors—some of which may have their genesis not in the nature of the structure of our society, but rather in the unknowable, darker corners of the human mind. But even as we face the complexity of the causes, we must not be blinded to the necessity of protecting ourselves from the worst among us who, for whatever reason, have lost basic respect for their fellow human beings.

Thus, it is to that element of protection that we turn our attention. During the past few generations, many different approaches have been tried and rejected as inadequate to provide that basic level of protection that a society must have from the violent criminal offender. As we look to that experience, we find that it verifies certain assumptions about the nature of criminal behavior and effective law enforcement, while nullifying others.

One of the assumptions which has been overwhelmingly rejected is the belief that lenient sentencing, and the use of extensive rehabilitative treatment will solve the problems of the criminal mind. Unfortunately, this approach has had little impact on a vast, unregenerate criminal element. And the prevalent practice of imposing inadequate punishment for violent offenses only aggravates, if not incurs three trends: Society's disillusionment with the criminal justice system, the relaxation of society's moral sanction on crime per se, and the breakdown of individual inhibitions against criminal activity.

There are those who justify the lenient character of the criminal justice system as necessary to accommodate the extensive freedoms which are an integral part of our democratic system of government. Personal liberties will be abused, the argument reasons, hence a high crime rate is to be expected. Such reasoning is erroneous. The Founders of our Nation did not intend to create a society which would tolerate anarchic personal behavior. Inherent in the creation of any social system is the underlying notion of the delicate balance struck between individual autonomy and the public welfare. Our Constitution embodies this balance of competing interests in its identification of two, equally important purposes of government: to "insure domestic tranquility" as well as to "secure the blessings of liberty."

Without the existence of that domestic tranquility spoken of in the Constitution, the guarantee of individual liberties reserved to us in that document becomes but a sham—for in a society under attack by the forces of lawlessness, liberty itself is the victim as well as our people.

What can be done? The road back to a safe and sane society will be long and arduous. But the critical, first step must be a re-examination of the structure of our Federal criminal laws, and the methods in which they are administered, with a view toward rectifying the problems which the Attorney General's task force—and other observers—have identified. The majority of the task force recommendations revolve around three principal objectives: The reform of inefficient and counterproductive procedures, the targeting of violent offenders in terms of detection and punishment, and improved assistance to State and local law enforcement authorities, who struggle with the vast bulk of violent crimes committed in this country.

Thus, Mr. President, it is with great pleasure that the Senator from Kansas, now introduces for Senate consideration, a package of three bills which are designed to address some of the more urgent problems identified by the Attorney General as interfering with the legitimate, effective enforcement of the Federal criminal laws. Those bills are: The Criminal Justice Procedure Act of 1981; The Violent Crime Act of 1981; and The Criminal Justice Assistance Act of 1981.

In materials which I will make available to my colleagues at a later time upon request, I will detail the intent and impact of each separate measure in these bills; for the purposes of this statement, I will only briefly summarize here the contents of each piece of legislation.

THE CRIMINAL PROCEDURES ACT

The Criminal Procedures Act amends various aspects of Federal criminal procedural law to accomplish the following: Expanding forfeiture and penalties for RICO and continuing criminal enterprise drug law violations where there is a previous conviction; revising the considerations viewed in a bail determination to include the potential threat a defendant poses to the community; limiting the exclusionary rule to cases where bad faith, intentional violations of constitutional rights eventually result in prejudice to the defendant and recovery of evidence which would have remained undiscovered but for the violation.

Further, the bill institutes insanity defense procedures which permit the plea of "not guilty by reason of insanity" to be entered where the defendant confesses to all elements of the offense except for requisite intent due to mental disease or defect, while allowing the courts to commit persons acquitted on such grounds; prohibits the use of internal operating guidelines of the Department of Justice or other law enforcement agencies to thwart criminal prosecution; and provides for amendments to The Special Prosecutors Act which eliminate those provisions requiring appointment of a prosecutor for allegations of misdemeanor offenses; and correct constitutional problems arising from court appointment of a prosecutor.

In addition, the bill provides for reform of habeas procedures, limiting cross-petitions from State prisoners to those cases where the State defendant did not get a full and fair hearing in State court on the claim. This feature of the bill further prohibits the grant of a petition (from Federal or State defendants) where the claimed error does

not go to the question of guilt, innocence, or punishment, and places a 3-year statute of limitations on the raising of a claim, to run from the time the conviction is final or the new grounds are discovered. Also, prisoners are barred from raising any error which could have been raised in prior proceedings.

Finally, the bill modifies juvenile prosecution procedures to henceforth allow Federal prosecutors to pursue juvenile offenses where there exists a commanding Federal interest rather than (as present) only where the State refuses to exercise jurisdiction or is unable to exercise jurisdiction over the offense; it amends the Freedom of Information Act to restrict disclosure of information which might compromise criminal investigations or informants; and it amends the Tax Reform Act of 1976 so as to allow for expedited disclosure of tax information in criminal investigations, and to modify the standard for disclosure to eliminate the condition that the materials be "not available from any other source."

THE VIOLENT CRIME ACT

The focus of the Violent Crime Act is on those measures which would have the most significant impact on severe, violent crime. It includes: mandatory prison sentences for offenses involving the use of a firearm or infliction of serious bodily injury, or the attempt to inflict such injury (minimum term of confinement: 5 years, no parole or probation); a uniform, all-encompassing general assault and murder statute which would apply to Federal employees where the assault/homicide is perpetrated upon the employee on account of, or in the course of, the performance of his duties; and an assault/homicide statute to cover relatives of Federal officers in the event such crimes are perpetrated upon those individuals in an attempt to impede or intimidate the officer in performance of his duties, or to retaliate for same.

Other measures put forth in this bill are: The creation of a "contract murder" offense to cover solicitation organized crime homicides; the institution of a Federal offense for robbery of controlled substances from a pharmaceutical establishment where a pattern of thefts in one locality is demonstrated; and a statutory delineation of narcotics enforcement policy, which emphasizes the targeting and elimination of the top 100 drug rings in the Nation.

THE CRIMINAL JUSTICE ASSISTANCE ACT

This bill would revise the LEAA grants program to focus on providing funding for enforcement programs of proven effectiveness. Although no current year funding is provided for, this bill would preserve the administrative structure for a limited grants program until such time as funding might be available. The bill provides that funds may be expended for the following purposes:

First, upgrading the capabilities of enforcement personnel and introducing new management concepts and approaches;

Second, providing training and technical assistance focused on development and improvement of enforcement programs of proven effectiveness;

Third, providing information to State and local officials about new enforcement programs (how to implement and manage them);

Fourth, developing corrections standards and accreditation processes;

Fifth, continuing the work of the commission on accreditation for law enforcement agencies;

Sixth, providing emergency enforcement assistance to States where the State has inadequate resources to deal with a special enforcement problem having statewide or national significance; and

Seventh, establishing a National Police Academy, which will have the responsibility to train national, regional, and local police officers for accreditation purposes.

Much of the improvement in the efficiency and professionalism of local law enforcement personnel may be attributed to LEAA criminal justice assistance grants projects. Consequently, this bill is designed to maintain those programs of proven effectiveness in the law enforcement effort. The programs of this type that would be funded under this bill are: Sting operations; career criminal prosecutions assistance; integrated criminal apprehension programs (Federal, State, local cooperative offender locator programs); treatment alternatives to incarceration; victim-witness assistance programs; arson prevention and control; prosecutor's management information systems (offender data base); and violent juvenile offenders rehabilitation programs.

CONCLUSION

In conclusion, Mr. President, these three bills represent a comprehensive, across-the-board effort to cope with the dilemma of serious crime as faced by our Nation. The establishment of an effective criminal justice system demands that each component operate in a satisfactory and cooperative manner. At present, the system suffers from outdated procedures, an overemphasis on the rights of the defendant and prisoner as opposed to the public welfare, inadequate penalization of grave offenses, and finally, a need for a more coordinated effort against crime on the part of public agencies, and Federal, State, and local government.

We do not say that the measures encompassed in these pieces of legislation will lower the incidence of violent crimes if enacted into law, in and of themselves; they do not, for example, affect the State justice systems which must cope with the vast majority of such crimes. We do believe, however, that they are essential reforms to any broad-based effort to begin dealing seriously with the problem, and that they can constitute the foundation of a more effective Federal criminal justice system.

Mr. President, I ask unanimous consent that the text of S. 1995, the Criminal Procedures Act, S. 1996, the Violent Crime Act, and S. 1997, the Criminal Justice Assistance Act, be included in the RECORD following my remarks. I would further request that a star print of these bills be prepared so that any last-minute errors in drafting, which may have gone unnoticed, may be remedied.

There being no objection, the bills were ordered to be printed in the RECORD, as follows:

S. 1995

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Criminal Procedures Act of 1982".

PURPOSE

SEC. 2. The purpose of this Act is to amend Federal criminal procedures in such respects as are necessary to provide for increased effectiveness, fairness, and certainty in the administration of the criminal statutes of the United States.

CRIMINAL FORFEITURES

SEC. 3. (a) Section 1963 of title 18, United States Code, is amended—

(1) in subsection (a) by inserting after "of this chapter shall", the following: ", upon the first such conviction,";

(2) in subsection (a) by striking out "and" after "1962,";

(3) in subsection (a) by inserting before the period the following: ", and (3) any profits or proceeds of the unlawful activities engaged in by the individual found to have violated such section, in whatever form held, and without regards to whether or not legal title to such profits or proceeds is vested in such individual";

(4) by redesignating subsections (b) and (c) as subsections (f) and (g); and

(5) by inserting after subsection (a), the following new subsections:

"(b)(1) Whoever is convicted of violating any provision of section 1962 of this chapter, after having been previously convicted for a separate violation of any of the provisions of such section, shall, where such subsequent conviction is in whole or in part based upon acts committed since the date of the first such conviction, be fined not less than $50,000 nor more than $200,000 for each such subsequent violation, and shall be sentenced to a term of life imprisonment. Such person shall not be eligible for probation upon such subsequent conviction, nor shall such person be eligible for parole or furlough, upon such term of imprisonment before having served a minimum of twenty years of such term of imprisonment.

"(2) In addition to the foregoing, such person so convicted of a second offense under section 1962 of this chapter shall forfeit to the United States any interest in property forfeitable under the provisions of subsection (a) of this section, as well as any and all interests in personal or real property acquired by him or by another person for his use and benefit since the date of the first such conviction, or the proceeds thereof in whatever form, if it be shown by a preponderance of the evidence that—

"(A) such person was not engaged in any lawful, gainful employment during the period from the first such conviction up to the date of the filing of criminal charges which form the basis for the second such conviction;

"(B) such person, although engaged in lawful employment during the period specified in subparagraph (A) of this paragraph, nevertheless obtained the majority portion of his income during such period from unlawful activities; or

"(C) such person did, during the period specified in subparagraph (A) of this paragraph, commit or cause to be committed an act of injury or destruction to persons or property for the purpose of furthering or concealing the unlawful activities which formed the basis for such person's subsequent conviction, whether such acts were committed or caused to be committed by him personally or through his agent or employee.

"(3) Such real and personal assets as are forfeitable under the provisions of this section shall be forfeitable even though they

have been transferred to the control and ownership of another person, if it be shown that the actual use and benefit of such property was retained by the convicted person whose assets are subject to such forfeiture; or, if it be shown that such assets were transferred to another person who aided and abetted the commission of the criminal acts for which such person whose assets are forfeitable was convicted, regardless of who may have the use and benefit of such property.

"(c) To the extent that assets, interests, profits, and proceeds forfeitable under this section—

"(1) cannot be located;

"(2) have been transferred, sold to, or deposited with third parties; or

"(3) have been placed beyond the jurisdiction of the United States,

the court, upon conviction of the individual charged, may direct the defendant to forfeit such other assets as may be available, limited in value to those assets that would otherwise be forfeited under subsections (a) and (b) of this section. Upon petition of the defendant, the court may authorize redemption of assets forfeited under this subsection, provided the assets described in subsections (a) and (b) are surrendered or otherwise remitted by such defendant to the jurisdiction of the court.".

(b) Section 408 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (Public Law 91-513, 21 U.S.C. 848) is amended—

(1) in subsection (a)(1) thereof—

(A) by striking out "in paragraph (2)", prior to the first semicolon in such subsection and inserting in lieu thereof the following: " by this section"; and

(B) by striking out the words "in paragraph (2)" at the end of such subsection and inserting in lieu thereof "this section";

(2) in subsection (a)(2)(A) by adding after "the profits obtained by him in such enterprise" the following: ", including any profits and proceeds, regardless of the form in which held, that are acquired, derived, used, or maintained, directly or indirectly, in connection with or as a result of a violation of paragraph (1)";

(3) by adding after subsection (a)(2) the following:

"(3) Any person who is convicted a second time under paragraph (1) of continuing in a criminal enterprise shall forfeit to the United States all property which is forfeitable under the provisions of subsection (a)(2) of this section, in addition to any and all interest of such person in personal or real property acquired by him or by another person for his use and benefit since the date of the first such conviction, or the proceeds thereof in whatever form, if it be shown by a preponderance of the evidence, that—

"(A) such person was not engaged in any lawful, gainful employment during the period from the first such conviction up to the date of the filing of criminal charges which form the basis for the second such conviction;

(B) such person, although engaged in lawful employment during the period specified in subsection (a)(3)(A)(i) above, nevertheless obtained the majority portion of this income during such period from unlawful activities; or

"(C) such person did, during the period specified in subsection (a)(3)(A)(i) above, commit or cause to be committed acts of injury or destruction to persons or property for the purpose of furthering or concealing the unlawful activities which formed the basis for such person's subsequent conviction, whether such acts were committed or caused to be committed by such person personally or by or through an agent or employee of such person.

Such real and personal assets as are forfeitable under the provisions of this section shall be forfeitable even though they have been transferred to the control and ownership of another person, if it be shown that the actual use and benefit of such property was retained by the convicted person whose assets are subject to forfeiture; or, if it be shown that such assets were transferred to another person who aided and abetted the commission of the criminal acts for which such person whose assets are subject to forfeiture was convicted, regardless of who may have the use and benefit of such property."; and

(4) by adding the following new subsection after subsection (d):

"(e) To the extent that assets, interests, profits, and proceeds forfeitable pursuant to this section—

"(1) cannot be located;

"(2) have been transferred, sold to, or deposited with third parties; or

"(3) have been placed beyond the territorial jurisdiction of the United States,

the court, upon conviction of the individual charged, may direct forfeiture of such other assets of the defendant as may be available, limited in value to those assets that would otherwise be forfeited under subsection (a) of this section. Upon petition of the defendant, the court may authorize redemption of assets forfeited under this subsection, provided the assets described in subsection (a) are surrendered or otherwise remitted by such defendant to the jurisdiction of the court.".

(c)(1) Title 28, United States Code, is amended by adding after section 529 thereof the following:

"§ 529A. Negotiations with foreign governments.

"(a) The Attorney General shall move expeditiously to conduct negotiations to conclude agreements to secure the cooperation of the law enforcement authorities of foreign countries in order to effectively deprive domestic criminals of the use of foreign havens for the proceeds of their crimes.

"(b) The Attorney General shall report to the Committees on the Judiciary of the Senate and the House of Representatives within six months after the date of enactment of this section on progress being made to conclude such agreements.".

(2) The table of sections for chapter 31, title 28, United States Code, is amended by adding after the item relating to section 529, the following:

"529A. Negotiations with foreign governments.".

BAIL REFORM

SEC. 4. (a) Sections 3150, 3151, and 3152 of title 18, United States Code, are redesignated as sections 3156, 3157, and 3158, respectively.

(b) Chapter 207 of title 18, United States Code, is amended by striking out sections 3146-3149 and inserting in lieu thereof the following:

"§ 3146. Release authority generally.

"Any person charged with an offense may be ordered released or detained pursuant to the provisions of this chapter by a judge authorized to order the arrest and commitment of offenders, but a person charged with an offense for which a sentence of death is authorized may be ordered released only by a judge of a court of the United States that has original jurisdiction in criminal cases.

"§ 3147. Release pending trial in a noncapital case.

"(a) Any person charged with an offense, other than an offense for which a sentence of death is authorized, shall, at his appearance before a judge, be ordered detained or released pending trial. If released, the person may be released on his personal recognizance, or upon the execution of an unsecured appearance bond in an amount specified by the judge, and upon the mandatory condition set forth in subsection (d) of this section, unless the judge determines, in the exercise of his discretion, that such release will not reasonably assure the appearance of the person as required. If such a determination is made, the judge shall, either in lieu of or in addition to the above methods of release, impose the mandatory condition set forth in subsection (d) and the least restrictive condition or combination of conditions of release set forth in subsection (e) that will reasonably assure the appearance of the person for trial. After the court has determined the conditions of release pursuant to this subsection, and the person has indicated that he can satisfy those conditions, the court shall consider the provisions of subsection (b).

"(b) The court upon ordering the detention or release of a person pursuant to subsection (a) shall determine, in the exercise of its discretion, whether such release will endanger the safety of any other person or the community. If such a determination is made, the judge shall, either in lieu of or in addition to the conditions set pursuant to subsection (a), impose the least restrictive condition or combination of conditions of release set forth in subsection (e) that will reasonably assure the safety of any other person or the community. No financial condition set forth in subsection (e) may be imposed to assure the safety of any person or of the community.

"(c) If, after a due process hearing as defined in section 3149(d) of this chapter the court finds that there is clear and convincing evidence that the person is likely to flee or is a danger to any other person or to the community, and that no condition or combination of conditions of release will reasonably assure the defendant's appearance or the safety of any other person or of the community, then the court shall order such person detained in custody.

"(d) The judge shall provide as an explicit condition of release for any person ordered released pursuant to this subsection, that the person not commit a Federal, State, or local crime during the period of his release.

"(e) The judge may provide as an explicit condition of release for any person ordered released pursuant to this subchapter that the person—

"(1) remain in the custody of a designated person who agrees to supervise him, if the designated person is reasonably able to assure the judge that the person will appear as required and will not pose a danger to the safety of another person or the community;

"(2) abide by specified restrictions on his travel, associations, or place of abode;

"(3) work conscientiously at his employment, or if unemployed, actively seek employment;

"(4) report on a regular basis to a designated law enforcement agency or pretrial service agency;

"(5) refrain from excessive use of alcohol, or any use of a narcotic drug or other controlled substance, as defined in section 102 of the Controlled Substances Act (21 U.S.C. 802), without a prescription by a licensed medical practitioner;

"(6) avoid all contact with potential witnesses who may testify concerning the offense;

"(7) refrain from possessing a firearm, destructive device, or other dangerous weapon;

"(8) undergo available medical or psychiatric treatment, including treatment for drug or alcohol dependency, and remain in a specified institution if required for that purpose;

"(9) execute an appearance bond in a specified amount and deposit in the registry of the court, in cash or other security as

directed, a sum not to exceed 10 per cent of the amount of the bond, which deposit is to be returned upon the performance of the conditions of release;

"(10) execute a bail bond with solvent sureties, or deposit cash in lieu of such a bond; or

"(11) satisfy any other condition reasonably necessary to assure appearance as required pursuant to subsection (a) and to assure the safety of any other person or the community pursuant to subsection (b), including a condition requiring that the person return to official detention after specified hours or during specified periods, and abide by such other restrictions on the person's freedom, associations, or activities that the court deems appropriate.

A defendant who is detained or subject to restrictions because of the imposition of a condition set forth in subsection (e)(11) shall be brought to trial expeditiously pursuant to the provisions of chapter 208 of this title. The court may only impose financial conditions of release pursuant to this subsection for the purpose of assuring a defendant's appearance in court.

"(f) In determining whether the person should be detained or which conditions of release will reasonably assure the appearance of the person as required and will reasonably assure the safety of any other person or the community, the judge shall, on the basis of available information, take into account—

"(1) the nature and circumstances of the offense charged;

"(2) the weight of the evidence against the person; and

"(3) the history and characteristics of the person, including his character, mental condition, family ties, employment, past conduct, length of residence in the community, financial resources, record of convictions, record of appearance, flight to avoid appearance, or nonappearance at court proceedings, the use of illegal drugs, whether he was on probation, parole, or other release pending completion of sentence for a conviction under Federal, State, or local law at the time of the current arrest, and whether he was on pretrial release or release pending sentence or appeal for an offense under Federal, State, or local law at the time of the current arrest.

"(g) A judge authorizing the release or detention of a person pursuant to this section shall issue an order containing a statement of the reasons for detention if imposed, or any conditions of release imposed, shall advise him of the penalties applicable to a violation of a condition of his release, and shall advise him that a warrant for his arrest will be issued immediately upon such a violation.

"(h) In any case in which a judge has ordered a person detained and has imposed conditions upon the release of such person, if, twenty-four hours after the release hearing, such person continues to be detained because of his inability to meet the conditions of release he may, upon application, have the detention order or conditions reviewed by the judge who imposed them. A person who is detained or ordered released on a condition that requires him to return to official detention after specified hours may, upon application, have the order of detention or condition reviewed by the judge who imposed it. Unless the order of detention or conditions of release are amended and the person is thereupon detained or released on another condition, the judge shall set forth in writing the reasons for continuing the detention or conditions imposed. If the judge who ordered the detention or imposed conditions of release is not available, any other judge in the district may review such conditions.

"(i) A judge ordering the detention or release of a person on a condition specified in this section may at any time amend his order to impose additional or different conditions of release. If the imposition of such additional or different conditions results in the detention of the person as a result of his inability to meet such conditions, the provisions of subsection (h) are applicable.

"(j) Any information may be presented and considered in connection with an order entered pursuant to this section regardless of its admissibility under the rules governing admission of evidence in criminal trials.

"(k) A judge may detain, for a period of ten days or less, a person charged with an offense who comes before him for a pretrial release determination if it appears that the person—

"(1) is, and at the time the offense was committed was, on pretrial or other release for a felony under State or Federal law; or

"(2) is on probation, parole, or other release pending completion of sentence for any offense under Federal, State, or local law;

and that the person may flee or pose a danger to any other person or to the community if released. During the ten-day period, the United States attorney shall notify the appropriate court, probation, or parole official. If the official fails or declines to take the person into custody during such period, the person shall be treated in accordance with the provisions of subsections (a) through (e).

"(l) A court may dispose of an offense that is a misdemeanor or an infraction by entering an order directing forfeiture of collateral posted to assure appearance if a fine in such an amount would be an appropriate sentence after conviction of the offense charged.

"§ 3148. Release pending trial in a capital case.

"A person who is charged with an offense for which a sentence of death is authorized shall be treated in accordance with the provisions of section 3147, unless the judge has reason to believe that no conditions of release will reasonably assure that the person will not flee or will not pose a danger to any other person or to the community. If such a risk of flight or danger is believed to exist, the person shall be ordered detained. Such an order is not appealable under section 3151, but may be reviewed under other provisions for review of conditions of release or orders of detention.

"§ 3149. Release pending sentence or appeal.

"(a) The judge shall order that a person who has been found guilty of an offense and who is awaiting imposition or execution of his sentence be held in official detention unless the judge finds, pursuant to a due process hearing, by clear and convincing evidence that the person is not likely to flee or pose a danger to the safety of any other person or to the community. If the judge finds that the person is not likely to flee or to pose a danger to the safety of any person or to the community, the person shall be treated in accordance with the provisions of section 3147.

"(b) The judge shall order that a person who has been found guilty of an offense and sentenced to a term of imprisonment, and who has filed an appeal or a petition for a writ of certiorari, be held in official detention, unless the judge finds pursuant to a due process hearing—

"(1) by clear and convincing evidence that the person is not likely to flee or pose a danger to the safety of any other person or the community; and

"(2) that the appeal is not frivolous nor taken for purposes of delay.

If the judge finds that the person is not likely to flee or pose a danger to the safety of any other person or the community and that the appeal is not frivolous or taken for purposes of delay, the person shall be treated in accordance with the provisions of section 3147.

"(c) The judge shall treat a defendant in a case in which an appeal has been taken by the United States pursuant to the provisions of section 3731 in accordance with the provisions of section 3147.

"(d) For the purposes of this section and section 3147 (c), 'due process hearing' means a hearing conducted in accordance with the requirements of the due process clause of the fifth amendment to the United States Constitution including but not limited to the right to counsel, the right to cross-examine witnesses, and the right to present evidence.

"§ 3150. Release of a material witness.

"If it appears from an affidavit filed by a party that the testimony of a person is material in a criminal proceeding, and if it is shown that it may become impracticable to secure his presence by subpena, a judge may order the arrest of such witness and shall impose conditions of release pursuant to section 3147. No material witness may be detained because of his inability to comply with any condition of release if the testimony of such witness can adequately be secured by deposition, and if further detention is not necessary to prevent a failure of justice. Release may be delayed for a reasonable period of time until the deposition of the witness can be taken pursuant to the Federal Rules of Criminal Procedure.

"§ 3151. Appeal from denial of release.

"(a) Any person—

"(1) who is detained, or whose release on a condition requiring him to return to custody after specified hours is continued; and

"(2) whose application pursuant to section 3147 (h) and (i) has been reviewed by a judge other than—

"(A) a judge of the court having original jurisdiction over the offense with which he is charged;

"(B) a judge of a United States court of appeals; or

"(C) a Justice of the Supreme Court of the United States;

may file a motion with the court having original jurisdiction over the offense with which he is charged for an amendment to the order. Such a motion shall be determined promptly.

"(b) In a case in which a person is detained after—

"(1) a court denies a motion under subsection (a) to amend an order imposing conditions of release; or

"(2) conditions of release have been imposed or amended by a judge of the court having original jurisdiction over the offense charged;

an appeal may be taken to the court having appellate jurisdiction over such court. An order so appealed shall be affirmed if it is supported by the proceedings below. If the order is not so supported, the court may remand the case for a further hearing, or may, with or without additional evidence, order the person released pursuant to section 3147. Such an appeal shall be determined promptly.

"§ 3152. Sanctions for violation of release conditions.

"(a) A person who has been released pursuant to section 3147, and who has violated a condition of release, is subject to revocation of such release, an order of detention, and a prosecution for contempt of court in addition to such further criminal or civil penalties which may be applicable to the circumstances of the violation.

"(b) An attorney for the Government may initiate a proceeding for revocation of an order of release by filing a motion with the district court. A judge may issue a warrant for the arrest of a person charged with vio-

lating a condition of release, and the person shall be brought before a judge in the district in which his arrest was ordered for a proceeding in accordance with this section. The judge shall enter an order of revocation and detention if, after a hearing, the judge—

"(1) finds that there is clear and convincing evidence that such person has violated a condition of his release; and

"(2) finds that—

"(A) based on the factors set forth in section 3147(f), there is no condition or combination of conditions of release that will assure that such person will not flee or pose a danger to the safety of any other person or of the community; or

"(B) no condition or combination of conditions will assure that the person will abide with such reasonable conditions of release as may be imposed by the court.

If the judge finds that there are conditions of release that will assure that the person will not flee or pose a danger to the safety of any other person or the community, and that the person will abide by such appropriate conditions, he shall treat the person in accordance with the provisions of section 3147 and amend conditions of release to the extent necessary to assure compliance with the conditions of release.

"(c) A law enforcement officer, authorized to make an arrest for an offense committed in his presence, may arrest a person who has been released pursuant to section 3147 if he has reasonable grounds to believe that the person has violated a condition of release imposed on such person and set forth in subsection 3147(e)(2), 3147(e)(5), 3147(e)(6), or 3147(e)(7).

"§ 3153. Release in a case removed from a State court.

"If the judgment of a State court in a criminal proceeding is before the Supreme Court of the United States for review, the defendant may not be released from custody pending such review other than pursuant to the laws of such State.

"§ 3154. Surrender of an offender by a surety.

"A person charged with an offense, who is released upon the execution of an appearance bond with a surety, may be arrested by the surety, delivered to a United States marshal, and brought before a judge. At the request of the surety, the judge shall order the person held in official detention, and shall endorse on the recognizance, or on the certified copy of the recognizance, the discharge and exoneretur of the surety. The person so committed shall be held in official detention until released pursuant to this chapter or to another provision of law.

"§ 3155. Commitment of an arrested person.

"(a) A person who is arrested and charged with an offense or held as a material witness and who is not ordered released pursuant to the provisions of this chapter, shall be ordered committed to the custody of the Attorney General for confinement in a facility for official detention. A copy of the order shall be delivered to the person in charge of the facility as evidence of his authority to hold the arrested person, and the original order, with the return endorsed thereon, shall be returned to the court that issued it.

"(b) The person in charge of an official detention facility to whom an arrested person is delivered pursuant to the provisions of subsection (a) shall deliver the person to a United States marshal for the purpose of a court appearance on order of a court of the United States or on request of an attorney for the Government.".

(c) The table of sections for chapter 207 of title 18, United States Code, is amended by adding after the item relating to section 3145 the following:

"3146. Release authority generally.
"3147. Release pending trial in a noncapital case.
"3148. Release pending trial in a capital case.
"3149. Release pending sentence or appeal.
"3150. Release of a material witness.
"3151. Appeal from denial of release.
"3152. Sanctions for violation of release conditions.
"3153. Release in a case removed from a State court.
"3154. Surrender of an offender by a surety.
"3155. Commitment of an arrested person.
"3156. Penalties for failure to appear.
"3157. Contempt.
"3158. Definitions.".

EXCLUSIONARY RULE

SEC. 5. (a) Chapter 223 of title 18, United States Code, is amended by adding at the end thereof the following:

"§ 3505. Exclusionary rule.

"(a) No evidentiary matter, otherwise admissible under applicable law, shall be excluded from being considered by the court or by the jury in any Federal criminal proceeding solely on the grounds that such evidence has been obtained in violation of any regulatory, statutory, or constitutional provision of Federal or State law, unless the court finds as a matter of law that such evidence—

"(1) was obtained by the employment of methods which constituted a violation of constitutionally protected rights of a defendant, which violation resulted in actual prejudice to such defendant; and

"(2) was obtained as a result of intentional misconduct by agents of the Government of such a nature as to indicate—

"(A) willful intent to subvert the requirements of the law, or

"(B) gross negligence with respect to or wanton disregard for, the requirements of the law or the rights of the defendant; and

"(3) was not, and would not have been, known to agents of the Government but for the acts done in violation of the defendant's constitutional rights.

"(b) In evaluating the prejudicial nature of the acts constituting a violation of a defendant's constitutional rights, the court shall consider the totality of the circumstances, including the following:

"(1) the extent to which the violation was willful or reckless;

"(2) the extent to which privacy was invaded; and

"(3) the extent to which exclusion will tend to prevent such violations.

"(c) In applying this section, no court shall prohibit the consideration of any evidence by the court or jury which was procured by officers who acted in good faith reliance upon a reasonable belief in the legitimacy of their actions in obtaining such evidence, regardless of any violation of law which may have occurred pursuant thereto.".

(b) Chapter 171 of title 28, United States Code, is amended—

(1) in section 2671 by adding at the end thereof the following paragraph:

"'Investigative or law enforcement officer' means any officer of the United States empowered by law to execute searches, to seize evidence, or to make arrests for any violation of Federal law, or any person acting under the authority of such officer.";

(2) in section 2674 by adding before the period at the end of the first paragraph thereof the following: ", except as provided herein"; and

(3) by adding at the end thereof the following:

§ 2681. Tort claims: Illegal search and seizure

"(a) The United States shall be liable for any damages resulting from tortious acts of the types specified in section 2680 (h) of this chapter which are committed by an investigative or law enforcement officer of the United States during a search or seizure conducted by such officer while acting within the scope of his office or employment, where such search or seizure is conducted in violation of the fourth amendment to the United States Constitution, provided that such violation was one—

"(1) that was committed with willful intent to subvert the requirements of the law, or

"(2) that was the result of gross negligence with respect to, or wanton disregard for, the requirements of the law or the constitutional or statutory rights of the aggrieved party.

"(b) Any person aggrieved by such a violation may recover such actual and punitive damages as the court may award under subsection (c) of this section.

"(c) Punitive damages may be awarded by the court upon consideration of all the circumstances of the case, including—

"(1) the extent of the investigative or law enforcement officer's deviation from permissible conduct;

"(2) the extent to which the violation was willful or a result of grossly negligent behavior;

"(3) the extent to which the aggrieved person's privacy was invaded;

"(4) the extent of the aggrieved person's personal injury, both physical and mental;

"(5) the extent of any property damage; and

"(6) the effect such an award would have in preventing future violations of the fourth amendment to the United States Constitution.

"(d) Notwithstanding subsections (b) and (c) of this section, the recovery of any person who is convicted of any offense for which evidence of such offense was seized in violation of the fourth amendment to the United States Constitution is limited to actual physical personal injury and to actual property damage sustained as a result of the unconstitutional search and seizure.

"(e) No judgment, award, compromise, or settlement of any action brought under this section shall exceed the amount of $25,000, including actual and punitive damages. The United States shall not be liable for interest prior to judgment.

"(f) Any action under this section shall be brought within the period of limitations provided in section 2402(b) of this title, and shall be brought in accordance with, and subject to, all other applicable provisions of this chapter and section 1346(b) of this title.

"(g) The tort remedy against the United States provided for in this section shall apply only to claims arising on or after the date of enactment of this section.

"§ 2682. Frivolous tort claims

"A party who files a lawsuit against the United States under the provisions of this chapter may be held liable to the Government by the court (upon the motion of the Government) for expenses incurred by the Government in defending such lawsuit, including a reasonable sum equivalent in value to the services rendered by the Government attorneys in defense of such lawsuit if such lawsuit is judicially determined to be founded upon claims which are clearly frivolous and lacking in any substantial merit.".

MENTAL IMPAIRMENT OF CRIMINAL OFFENDERS OR DEFENDANTS

SEC. 6. (a) Chapter 313 of title 18, United States Code, is amended to read as follows:

"CHAPTER 313—OFFENDERS WITH MENTAL DISEASE OR DEFECT

"Sec.
"4241. Determination of mental competency to stand trial.

"4242. Determination of the existence of insanity at the time of the offense.
"4243. Hospitalization of a person found not guilty by reason of insanity.
"4244. Hospitalization of a convicted person suffering from mental disease or defect.
"4245. Hospitalization of an imprisoned person suffering from mental disease or defect.
"4246. Hospitalization of a person due for release but suffering from mental disease or defect.
"4247. General provisions for chapter 313.

"§ 4241. Determination of mental competency to stand trial.

"(a) At any time after the commencement of a prosecution for an offense and prior to the sentencing of the defendant, the defendant or the attorney for the Government may file a motion for a hearing to determine the mental competency of the defendant. The court shall grant the motion, or shall order such a hearing on its own motion, if there is reasonable cause to believe that the defendant may presently be suffering from a mental disease or defect rendering him mentally incompetent to the extent that he is unable to understand the nature and consequences of the proceedings against him or to assist properly in his defense.

"(b) Prior to the date of the hearing, the court may order that a psychiatric examination of the defendant be conducted, and that a psychiatric report be filed with the court, pursuant to the provisions of section 4247 (b) and (c).

"(c) The hearing shall be conducted pursuant to the provisions of section 4247(d).

"(d) If, after the hearing, the court finds by a preponderance of the evidence that the defendant is presently suffering from a mental disease or defect rendering him mentally incompetent to the extent that he is unable to understand the nature and consequences of the proceedings against him or to assist properly in his defense, the court shall commit the defendant to the custody of the Attorney General. The Attorney General shall hospitalize the defendant for treatment in a suitable mental hospital, or in another facility designated by the court as suitable—

"(1) for such a reasonable period of time as is necessary to determine whether there is a substantial probability that in the foreseeable future he will attain the capacity to permit the trial to proceed; and

"(2) for an additional reasonable period of time until—

"(A) his mental condition is so improved that trial may proceed; or

"(B) the pending charges against him are disposed of according to law.

If a defendant's mental condition is determined to be such that there is not substantial probability that in the foreseeable future he will attain the capacity to permit the trial to proceed, the defendant is subject to the provisions of section 4246.

"(e) When the director of the facility in which a defendant is hospitalized pursuant to subsection (d) determines that the defendant has recovered to such an extent that he is able to understand the nature and consequences of the proceedings against him and to assist properly in his defense, he shall promptly file a certificate to that effect with the clerk of the court that ordered the commitment. The clerk shall send a copy of the certificate to the defendant's counsel and to the attorney for the Government. The court shall hold a hearing, conducted pursuant to the provisions of section 4247(d), to determine the competency of the defendant. If, after the hearing, the court finds by a preponderance of the evidence that the defendant has recovered to such an extent that he is able to understand the nature and consequences of the proceedings against him and to assist properly in his defense, the court shall order his immediate discharge from the facility in which he is hospitalized and shall set the date for trial.

"(f) A finding by the court that the defendant is mentally competent to stand trial shall not prejudice the defendant in raising the issue of his insanity as a defense to the offense charged, and shall not be admissible as evidence in a trial for the offense charged.

"§ 4242. Determination of the existence of insanity at the time of the offense.

"(a) Upon the filing of a notice, as provided in rule 12.2 of the Federal Rules of Criminal Procedure, the court, upon motion of the attorney for the Government, may order that a psychiatric examination of the defendant be conducted, and that a psychiatric report be filed with the court, pursuant to the provisions of section 4247 (b) and (c).

"(b) If the issue of insanity is raised by notice as provided in rule 12.2 of the Federal Rules of Criminal Procedure on motion of the defendant or of the attorney for the Government, or on the court's own motion, the jury shall be instructed to find, or, in the event of a nonjury trial, the court shall find, the defendant—

"(1) guilty;

"(2) not guilty; or

"(3) not guilty by reason of insanity.

"§ 4243. Hospitalization of a person found not guilty by reason of insanity.

"(a) If a person is found not guilty by reason of insanity, the court shall order a hearing to determine whether the person is presently suffering from a mental disease or defect as a result of which his release would create a substantial danger to himself or to the person or property of another. The court may make any order reasonably necessary to secure the appearance of the person at the hearing.

"(b) Prior to the date of the hearing, the court may order that a psychiatric examination of the defendant be conducted, and that a psychiatric report be filed with the court, pursuant to the provisions of section 4247 (b) and (c).

"(c) The hearing shall be conducted pursuant to the provisions of section 4247(d).

"(d) If, after the hearing, the court finds by a preponderance of the evidence that a person found not guilty by reason of insanity is presently suffering from a mental disease or defect as a result of which his release would create a substantial danger to himself or to the person or property of another, the court shall commit the person to the custody of the Attorney General. The Attorney General shall release the person to the appropriate official of the State in which the person is domiciled if such State will assume responsibility for his care, custody, and treatment. If such State will not then assume such responsibility, the Attorney General shall hospitalize the person for treatment in a suitable mental hospital, or in another facility designated by the court as suitable, until such State will assume such responsibility or until the person's mental condition is so improved that his release would not create a substantial danger to himself or to the person or property of another.

"(e) When the director of the facility in which a person found not guilty by reason of insanity is hospitalized pursuant to subsection (d) determines that the person has recovered from his mental disease or defect to such an extent that his release would no longer create a substantial danger to himself or to the person or property of another, he shall promptly file a certificate to that effect with the clerk of the court that ordered the commitment. The clerk shall send a copy of the certificate to the person's counsel and to the attorney for the Government. The court shall order the discharge of the person or, on the motion of the attorney for the Government or on its own motion, shall hold a hearing, conducted pursuant to the provisions of section 4247(d), to determine whether he should be released. If, after the hearing, the court finds by a preponderance of the evidence that the person has recovered from his mental disease or defect to such an extent that his release would no longer create a substantial danger to himself or to the person or property of another, the court shall order his immediate discharge.

"§ 4244. Hospitalization of a convicted person suffering from mental disease or defect.

"(a) A defendant found guilty of an offense, or the attorney for the Government, may, within ten days after the defendant is found guilty, file a motion for a hearing on the present mental condition of the defendant. The court shall grant the motion, or at any time prior to the sentencing of the defendant shall order such a hearing on its own motion, if there is reasonable cause to believe that the defendant may presently be suffering from a mental disease or defect for the treatment of which he is in need of custody, care, or treatment in a mental hospital.

"(b) Prior to the date of the hearing, the court may order that a psychiatric examination of the defendant be conducted, and that a psychiatric report be filed with the court, pursuant to the provisions of section 4247(b) and (c). In addition to the information required to be included in the psychiatric report pursuant to the provisions of section 4247(c), if the report includes an opinion by the psychiatrists that the defendant is presently suffering from a mental disease or defect but that it is not such as to require his custody, care, or treatment in a mental hospital, the report shall also include an opinion by the psychiatrists concerning the sentencing alternatives that could best accord the defendant the kind of treatment he does need.

"(c) The hearing shall be conducted pursuant to the provisions of section 4247(d).

"(d) If, after the hearing, the court is of the opinion that the defendant is presently suffering from a mental disease or defect and that he should, in lieu of being sentenced to probation or imprisonment, be committed to a mental hospital for custody, care, or treatment, the court shall commit the defendant to the custody of the Attorney General. The Attorney General shall hospitalize the defendant for treatment in a suitable mental hospital, or in another facility designated by the court as suitable. Such a commitment constitutes a provisional sentence to the maximum term authorized for the offense of which the defendant was found guilty.

"(e) When the director of the facility in which the defendant is hospitalized pursuant to subsection (d) determines that the defendant has recovered from his mental disease or defect to such an extent that he is no longer in need of custody, care, or treatment in a mental hospital, he shall promptly file a certificate to that effect with the clerk of the court that ordered the commitment. The clerk shall send a copy of the certificate to the defendant's counsel and to the attorney for the Government. If, at the time of the filing of the certificate, the provisional sentence imposed pursuant to subsection (d) has not expired, the court shall hold a hearing, conducted pursuant to the provisions of section 4247(d), to determine whether the provisional sentence should be reduced. After the hearing, the court may order that the defendant be released, be placed on probation, or be imprisoned for the remainder of the sentence or for any lesser term.

"§ 4245. Hospitalization of an imprisoned person suffering from mental disease or defect.

"(a) A defendant serving a sentence of imprisonment, or an attorney for the Government at the request of the director of

the facility in which the defendant is imprisoned may file a motion with the court for the district in which the facility is located for a hearing on the present mental condition of the defendant. The court shall grant the motion if there is reasonable cause to believe that the defendant may presently be suffering from a mental disease or defect for the treatment of which he is in need of custody, care or treatment in a mental hospital. A motion filed under this subsection shall stay the release of the defendant pending completion of procedures contained in this section.

"(b) Prior to the date of the hearing, the court may order that a psychiatric examination of the defendant be conducted, and that a psychiatric report be filed with the court, pursuant to the provisions of section 4247 (b) and (c).

"(c) The hearing shall be conducted pursuant to the provisions of section 4347(d).

"(d) If, after the hearing, the court is of the opinion that the defendant is presently suffering from a mental disease or defect for the treatment of which he is in need of custody, care, or treatment in a mental hospital, the court shall commit the defendant to the custody of the Attorney General. The Attorney General shall hospitalize the defendant for treatment in a suitable mental hospital, or in another facility designated by the court as suitable, until he is no longer in need of custody, care, or treatment in a mental hospital or until the expiration of his sentence of imprisonment.

"(e) When the director of the facility in which the defendant is hospitalized pursuant to subsection (d) determines that the defendant has recovered from his mental disease or defect to such an extent that he is no longer in need of custody, care, or treatment in a mental hospital, he shall promptly file a certificate to that effect with the clerk of the court that ordered the commitment. The clerk shall send a copy of the certificate to the defendant's counsel and to the attorney for the Government. If, at the time of the filing of the certificate, the sentence imposed upon the defendant has not expired, the court shall order that the defendant be reimbursed.

"§ 4246. Hospitalization of a person due for release but suffering from mental disease or defect.

"(a) If the director of a facility in which a person is hospitalized pursuant to this chapter certifies that a person whose sentence is about to expire, or who has been committed to the custody of the Attorney General pursuant to section 4241(d), or against whom all criminal charges have been dropped, is presently suffering from a mental disease or defect as a result of which his release would create a substantial danger to himself or to the person or property of another, and that suitable arrangements for the custody and care of the person are not otherwise available, he shall transmit the certificate to the clerk of the court for the district in which the person is confined. The clerk shall send a copy of the certificate to the person, and to the attorney for the Government, and, if the person was committed pursuant to section 4241(d), to the clerk of the court that ordered the commitment. The court shall order a hearing to determine whether the person is presently suffering from a mental disease or defect as a result of which his release would create a substantial danger to himself or to the person or property of another. A certificate filed under this subsection shall stay the release of the person pending completion of procedures contained in this section.

"(b) Prior to the date of the hearing, the court may order that, a psychiatric examination of the defendant be conducted, and that a psychiatric report be filed with the court, pursuant to the provisions of section 4247 (b) and (c).

"(c) The hearing shall be conducted pursuant to the provisions of section 4247(d).

"(d) If, after the hearing, the court finds by a preponderance of the evidence that the person is presently suffering from a mental disease or defect as a result of which his release would create a substantial danger to himself or to the person or property of another, the court shall commit the person to the custody of the Attorney General. The Attorney General shall release the person to the appropriate official of the State in which the person is domiciled if such State will assume responsibility for his care, custody, and treatment. If such State will not then assume such responsibility, the Attorney General shall hospitalize the person for treatment in a suitable mental hospital, or in another facility designated by the court as suitable, until such State will assume such responsibility or until the person's mental condition is so improved that his release would not create a substantial danger to himself or to the person or property of another.

"(e) When the director of the facility in which a person is hospitalized pursuant to subsection (d) determines that the person has recovered from his mental disease or defect to such an extent that his release would no longer create a substantial danger to himself or to the person or property of another, he shall promptly file a certificate to that effect with the clerk of the court that ordered the commitment. The clerk shall send a copy of the certificate to the person's counsel and to the attorney for the Government. The court shall order the discharge of the person or, on the motion of the attorney for the Government or on its own motion, shall hold a hearing, conducted pursuant to the provisions of section 4247(d), to determine whether he should be released. If, after the hearing, the court finds by the preponderance of the evidence that the person has recovered from his mental disease or defect to such an extent that his release would no longer create a substantial danger of himself or to the person or property of another, the court shall order his immediate discharge.

"§ 4247. General provisions for chapter 313.

"(a) As used in this chapter—

"(1) 'insanity' means a mental disease or defect as a result of which a person lacked the state of mind required as an element of the offense charged; and

"(2) 'mental disease or defect' means an impairment of mental functions sufficient to render a person incapable of either distinguishing right from wrong, or of conforming his conduct to the requirements of the law.

"(b) A psychiatric examination ordered pursuant to this chapter shall be conducted by at least two qualified psychiatrists. The psychiatrists shall be—

"(1) designated by the court if the examination is ordered under section 4241, 4242, 4243, or 4244; or

"(2) designated by the court, and shall include one psychiatrist selected by the defendant, if the examination is ordered under section 4245 or 4246.

For the purpose of an examination pursuant to an order under section 4241, 4242, 4243, or 4244, the court may commit the person to be examined for a reasonable period, but not more than sixty days, to the custody of the Attorney General for placement in a suitable mental hospital or another facility designated by the court as suitable.

"(c) A psychiatric report ordered pursuant to this chapter shall be prepared by the psychiatrists designated to conduct the psychiatric examination, shall be filed with the court with copies provided to the counsel for the person examined and to the attorney for the Government, and shall include—

"(1) the person's history and present symptoms;

"(2) a descripion of the psychological and medical tests employed and their results;

"(3) the psychiatrists' findings; and

"(4) the psychiatrists' opinions as to diagnosis, prognosis, and—

"(A) if the examination is ordered under section 4241, whether the person is presently suffering from a mental disease or defect rendering him mentally incompetent to the extent that he is unable to understand the nature and consequences of the proceedings against him or to assist properly in his defense;

"(B) if the examination is ordered under section 4242, whether the person was insane at the time of the offense charged;

"(C) if the examination is ordered under section 4243 or 4246, whether the person is presently suffering from a mental disease or defect as a result of which his release would create a substantial danger to himself or to the person or property of another; or

"(D) if the examination is ordered under section 4244 or 4245, whether the person is presently suffering from a mental disease or defect as a result of which he is in need of custody, care, or treatment in a mental hospital.

"(d) At a hearing ordered pursuant to this chapter the person whose mental condition is the subject of the hearing shall be represented by counsel and, if he is financially unable to obtain adequate representation, counsel shall be appointed for him. The person shall be afforded an opportunity to testify, to present evidence, to subpena witnesses on his behalf, and to confront and cross-examine witnesses who appear at the hearing.

"(e) The director of the facility in which a person is hospitalized pursuant to—

"(1) section 4241 shall prepare semiannual reports; or

"(2) section 4243, 4244, 4245, or 4246 shall prepare annual reports;

concerning the mental condition of the person and recommendations concerning his continued hospitalization. The reports shall be submitted to the court that ordered the person's commitment to the facility and copies of the reports shall be submitted to such other persons as the court may direct.

"(f) Statements made by the defendant during the course of a psychiatric examination pursuant to section 4241 or 4242 are not admissible as evidence against the accused upon any issue except the issue of the presence or absence of a mental disease or defect which is claimed by the defendant to have negated the mental state required for the commission of any crime charged.

"(g) Nothing contained in section 4243 or 4246 precludes a person who is committed under either of such sections from establishing by writ of habeas corpus his eligibility for release under such sections.

"(h) The Attorney General—

"(1) may contract with a state, a locality, or a private agency for the confinement, hospitalization, care, or treatment of, or the provision of services to, a person committed to his custody pursuant to this chapter.

"(2) may apply for the civil commitment, pursuant to State law, of a person committed to his custody pursuant to section 4243 or 4246; and

"(3) shall consult with the Secretary of the Department of Health and Human Services in the general implementation of the provisions of this chapter.".

(b) The first sentence of paragraph (a) of rule 12 of the Federal Rules of Criminal Procedure is amended by adding after "not guilty" the following: ", not guilty by reason of insanity".

(c) Rule 12 is further amended by adding at the end thereof the following new paragraph:

"(i) The plea of not guilty by reason of

insanity shall be entered pursuant to rule 12.2.".

(d) Rule 12.2 of the Federal Rules of Criminal Procedure is amended to read as follows:

"Rule 12.2.—Notice of Plea of Not Guilty by Reason of Insanity.

"(a) If a defendant intends to rely upon the plea of not guilty by reason of insanity, he shall, within the time provided for the filing of pretrial motions or at such later time as the court may direct, notify the attorney for the government in writing of such intention and file a copy of such notice with the clerk. If there is a failure to comply with the requirements of this paragraph, the plea of not guilty by reason of insanity may not be entered. The court may for cause shown allow late filing of the notice or grant additional time to the parties to prepare for trial or make such other order as may be appropriate.

"(b) If a defendant intends to introduce expert testimony relating to a mental disease, defect, or other condition bearing upon the issue of whether he had the state of mind required for the offense charged, he shall, within the time provided for the filing of pretrial motions or at such later time as the court may direct, notify the attorney for the government in writing of such intention and file a copy of such notice with the clerk. The court may for cause shown allow late filing of the notice or grant additional time to the parties to prepare for trial or make such other order as may be appropriate.

"(c) In an appropriate case the court may, upon motion of the attorney for the government, order the defendant to submit to a psychiatric examination as provided in section 4242 of title 18, United States Code, by at least two qualified psychiatrists designated for this purpose in the order of the court. No statement made by the accused in the course of any examination provided for by this rule, whether the examination shall be with or without the consent of the accused, shall be admitted in evidence against the accused on any issue raised in such criminal proceeding, except the issue of whether or not the defendant suffered from a mental disease or defect which negated the intent required for the commission of the offense charged.

"(d) If there is a failure to give notice when required by paragraph (b) or to submit to an examination when ordered under paragraph (c), the court may exclude the testimony of any expert witness offered by the defendant on the issue of his state of mind.

"(e) A defendant is not guilty by reason of insanity if his actions constitute all necessary elements of the offense charged other than the requisite state of mind, and he lacked the requisite state of mind as a result of mental disease or defect.".

DEPARTMENT OF JUSTICE INTERNAL OPERATING PROCEDURES

SEC. 7. (a) Section 533 of title 28, United States Code, is amended—

(1) in the section heading by inserting before the period the following: "; investigative guidelines";

(2) by inserting "(a)" before "The Attorney General"; and

(3) by adding at the end thereof the following:

"(b) The Attorney General may issue departmental policies, guidelines, and regulations concerning the investigation and prosecution of criminal cases and related law enforcement matters that shall be followed by every Federal law enforcement officer, as defined by section 111 of title 18. Nothing in any policies, guidelines, or regulations so promulgated shall create any substantive or procedural right inhering to the benefit of any individual, and no court shall have jurisdiction over a claim in any proceeding, including a motion to quash a subpena, suppress evidence, or dismiss an indictment, based solely on an alleged failure to follow such policies, guidelines, or regulations as may be promulgated by the Attorney General.".

(b) The section analysis of chapter 33 of title 28, United States Code, is amended by inserting before the period the following: "; investigative guidelines" at the end of the item relating to section 533.

SPECIAL PROSECUTOR

SEC. 8. (a) Chapter 39 of title 28 of the United States Code is amended—

(1) in section 591(a) by deleting "petty offense" which appear at the end of such section and inserting in lieu thereof the following: ", misdemeanor or petty offense"; and

(2) in section 592 by striking out all the material following subsection (a) and inserting in lieu thereof the following:

"(b)(1) If the Attorney General, upon completion of the preliminary investigation, finds that there is not probable cause to believe that conduct of the type described in subsection (a) of this section has been, or is being engaged in, he shall so notify the party or parties who provided the information forming the basis for the investigation as well as any individual who was a subject of such investigation. A record of every such allegation of official misconduct, and all information developed in the investigation of such allegation, together with a memorandum containing a summary of the information received and a summary of the results of the investigation conducted, shall be kept in the permanent records of the Department of Justice and such information shall not be revealed to any other individual outside the Department of Justice without consent of the Office of the Attorney General, or upon order of a court of appropriate jurisdiction.

"(2) If the Attorney General, upon completion of the preliminary investigation, finds that there is probable cause warranting further investigation or prosecution of persons alleged to have engaged in conduct described in section 591(a) of this title, or if 90 days elapse from the receipt of the information without a determination by the Attorney General that the matter is so unsubstantiated as not to warrant further investigation or prosecution, then the Attorney General shall appoint a special prosecutor. The Attorney General shall define the prosecutorial jurisdiction of the office of such special prosecutor by and through such letters of appointment as may be issued, and shall provide notice of the appointment of such prosecutor and the extent of such prosecutorial jurisdiction to such parties, if any, as have made allegations of official misconduct.

"(3) If—

"(A) after the filing of a memorandum under subsection (b) of this section, the Attorney General receives additional specific information about the matter to which the memorandum related; and

"(B) the Attorney General determines after such additional investigation as he may deem appropriate, that such information warrants further investigation or prosecution,

then the Attorney General shall, not later than 90 days after receiving such additional information, appoint a special prosecutor in accordance with the provisions of subsection (b)(2) of this section.

"(c) The Attorney General may require a special prosecutor appointed under the provisions of this section to accept referral of any matter that relates to a matter within that special prosecutor's prosecutorial jurisdiction.

"(d) The Attorney General's determination under subsection (b) of this section to appoint a special prosecutor shall not be reviewable in any court.".

(b) Section 593 of title 28, United States Code, is hereby repealed.

(c) Section 594(e) of title 28, United States Code, is amended—

(1) by striking out "or the division of the court" after "Attorney General" in the first sentence of such subsection; and

(2) by striking out "as established by the division of the court".

(d) Section 595(b) of title 28, United States Code, is amended—

(1) in paragraph (1) by striking out "division of the court" and inserting in lieu thereof "Attorney General";

(2) in paragraph (3)—

(A) by striking out all material which follows the first sentence and inserting in lieu thereof the following: "Any disclosure of matters occurring before a grand jury shall be in accordance with the provisions of rule 6(e) of the Federal Rules of Criminal Procedure.";

(B) by striking out "The division of the court" and inserting in lieu thereof "The Attorney General"; and

(C) by striking out "the division deems" and inserting in lieu thereof "the Attorney General deems".

(e) Section 595(e) of title 28, United States Code, is amended by—

(1) striking out the first sentence and inserting in lieu thereof: "A majority of the majority party members, or a majority of all nonmajority party members of the Committee on the Judiciary of either the House of Representatives or the Senate may request in writing that the Attorney General appoint a special prosecutor."; and

(2) striking out the second sentence and inserting in lieu thereof the following: "Not later than thirty days after the receipt of such a request, or not later than fifteen days after the completion of a preliminary investigation of the matter with respect to which the request is made, whichever is later, the Attorney General shall provide written notification of any action the Attorney General has taken in response to such request, and if no appointment has been made, why such appointment was not made.".

(f) Section 596(a) of title 28, United States Code, is amended—

(1) in paragraph (1) by inserting after "only for extraordinary impropriety" the following: "constituting an act of moral turpitude or bad faith execution of such special prosecutor's responsibilities,";

(2) in paragraph (2) by striking out all material which appears after "publishing any or all of the report."; and

(3) in paragraph (3) by striking out "division of the court" each place it appears and inserting in lieu thereof the following: "appropriate Federal court,".

(g) Section 596(b) of title 28, United States Code, is amended—

(1) in paragraph (1)—

(A) by striking out "An" and inserting in lieu thereof "The"; and

(B) by inserting "a" before "special prosecutor" each place it appears; and

(2) in paragraph (2)—

(A) by striking out "The division of the court, either on its own motion or upon suggestion of the" and inserting in lieu thereof "The";

(B) by striking out "terminate an" and inserting in lieu thereof "terminate the"; and

(C) by inserting "a" after "office of".

(h) Section 597 of title 28, United States Code, is amended by inserting at the end thereof the following: "Upon the appointment of a special prosecutor, the Attorney General, and all officers and employees of the Department of Justice, shall deliver to such special prosecutor as soon as is prac-

tical all information or materials within their knowledge or possession concerning the matters which are within the special prosecutors jurisdiction.".

(i) Section 49 of title 28, United States Code, is hereby repealed.

HABEAS CORPUS

SEC. 9. (a) Section 2244 of title 28, United States Code, is amended by adding at the end thereof the following new subsections:

(d) In a habeas corpus proceeding brought in behalf of a person in custody pursuant to the judgment of a State court, if the Federal question presented was properly presented under State law in the State court proceedings both at trial and on direct appeal, or properly presented in a collateral proceeding and disposed of exclusively on the merits, the claim may not be considered or determined by a judge or court of the United States, unless the petitioner establishes that he is in custody in violation of the Constitution or laws of the United States, that the alleged violation is of a Federal right which has as its primary purpose the protection of the reliability of either the factfinding process at the trial or the appellate process on appeal, and was prejudicial to the petitioner as to his guilt or punishment; and that the claimed constitutional or statutory violation presents a substantial question—

"(1) which was not theretofore raised and determined, and

"(2) which there was no fair and adequate opportunity theretofore to raise and have determined.

"(e) No petition filed in behalf of a person in custody pursuant to the judgment of a State court shall be considered or determined by a judge or court of the United States if it is not filed within three years from the date the State court judgment and sentence became final under State law, unless the Federal right asserted did not exist at the time of the State court trial and that right has been determined to be retroactive, or the violation of an existing right was not, and could not have been (in the exercise of reasonable diligence) known to the petitioner within three years after the date the judgment and sentence became final under State law. In such case, the petition may be entertained within three years from the date said violation or right was determined to exist.".

(b) Section 2254(d) of title 28, United States Code, is amended to read as follows:

"(d) In any proceeding instituted in a Federal court by an application for a writ of habeas corpus by a person in custody pursuant to the judgment of a State court, a determination, after a hearing, on the merits of a factual issue, which is made by a State court of competent jurisdiction in a proceeding to which the applicant for the writ and the State or an officer or agent thereof were parties, which determination is evidenced by written findings, opinion, or other reliable and adequate written indicia, shall not be redetermined or relitigated by a judge or court of the United States, unless the applicant shall establish or it shall otherwise appear, or the respondent shall admit—

"(1) that the merits of the factual dispute were not addressed in the State court hearing;

"(2) that the factfinding procedure employed by the State court was not adequate to afford a full and fair hearing;

"(3) that the material facts could not be developed at the State court hearing;

"(4) that the State court lacked jurisdiction of the subject matter or over the person of the applicant in the State court proceeding;

"(5) that the applicant was an indigent and the State court, in deprivation of his constitutional right, failed to appoint counsel to represent him in the State proceeding; or

"(6) that unless that part of the record of the State court proceeding in which the determination of such factual issue was made, pertinent to a determination of the sufficiency of the evidence to support such factual determination, is produced as provided for hereinafter, and the Federal court on a consideration of such part of the record as a whole concludes that there is no evidence to support such finding.

No evidentiary hearing may be conducted in the Federal court when the State court records demonstrate the factual issue was litigated and determined, unless the existence of one or more of the circumstances respectively set forth in paragraphs numbered (1) to (6), inclusive, is shown by the application. The Federal court may further designate a United States magistrate to consider the motion in the first instance and prepare a statement of facts and proposed findings of law and fact for the court hearing the petition to consider in issuing a final determination upon the motion.".

(c) Section 2255 of title 28, United States Code, is amended to read as follows:

"§ 2255. Federal custody; remedies on motion attacking sentence.

"(a) A prisoner in custody under a sentence imposed by a court established by an act of Congress may move such court to vacate, set aside, or correct the sentence, if—

"(1)(A) he is in custody in violation of the Constitution of the United States,

"(B) the claimed constitutional violation presents a substantial question—

"(i) which was not theretofore raised and determined, and

"(ii) which there was no fair and adequate opportunity theretofore to raise and have determined, and

"(c) the claimed constitutional violation is of a right which has as its primary purpose the protection of the reliability of either the factfinding process at the trial or the appellate process on appeal from the judgment of conviction, and was prejudicial to the petitioner as to his guilt or punishment;

"(2) he is in custody in violation of the laws of the United States;

"(3) the sentence was imposed in violation of the laws of the United States;

"(4) the court was without jurisdiction to impose such sentence; or

"(5) the sentence is otherwise subject to collateral attack.

"(b) a motion for such relief may be made at any time within three years after a conviction is final, or within three years after the discovery of error providing the basis for the requested relief, which error was not, and could not (in the exercise of reasonable diligence) have been known to the petitioner within three years after the date the conviction became final or within three years after the rendition of a decision regarding matters of law affecting the conviction from which relief is sought.

"(c) Unless the motion and the files and records of the case conclusively show that the prisoner is entitled to no relief, the court shall cause no notice thereof to be served upon the United States attorney, grant, a prompt hearing thereon, determine the issues and make findings of fact and conclusions of law with respect thereto. If the court finds that the judgment was rendered without jurisdiction, or that the sentence imposed was not authorized by law or is otherwise open to collateral attack, or that there has been a denial or infringement of the constitutional rights of the prisoner as described in subsection (a) of this section, the court shall discharge the prisoner, resentence him, grant a new trial, or correct the sentence as may appear appropriate.

"(d) A court may entertain and determine such motion without requiring the production of the prisoner at the hearing. The court may further designate a United States magistrate to consider the motion in the first instance and prepare a statement of facts and proposed findings of law and fact for the court which imposed the sentence (or other court reviewing the matter) to consider in issuing a final determination upon the motion.

"(e) The sentencing court shall not be required to entertain a second or successive motion for similar relief on behalf of the same prisoner.

"(f) an appeal may be taken to the court of appeals from the order entered on the motion in accordance with section 2253 of this title.

"(g) An application for a writ of habeas corpus on behalf of a prisoner who is authorized to apply for relief by motion pursuant to this section, shall not be entertained if it appears that the applicant has failed to apply for relief, by motion, to the court which sentenced him or that such court has denied him the relief sought, unless it also appears that the remedy by motion is inadequate or ineffective to test the legality of his detention.".

JUVENILE CRIME

SEC. 10. Section 5032 of title 18, United States Code, is amended to read as follows:

"§ 5032. Delinquency proceedings in district courts: Treatment of juvenile as adult for purposes of criminal prosecution.

"(a) A juvenile alleged to have committed an act of juvenile delinquency which if committed by an adult would be a felony shall not be proceeded against in any court of the United States unless the Attorney General, after investigation, certifies to an appropriate district court of the United States that the juvenile court or other appropriate district court of a State (1) does not have jurisdiction or refuses to assume jurisdiction over said juvenile with respect to such alleged act of juvenile delinquency, or (2) does not have available programs and services adequate for the needs of juveniles, or (3) that the offense charged, if committed by an adult, would be a felony punishable by a maximum penalty of five years imprisonment or more, and there is a special interest warranting Federal prosecution. If the Attorney General does not so certify, such juvenile shall be surrendered to the appropriation legal authorities of such State.

"(b) If an alleged juvenile delinquent is not surrendered to the authorities of a State or the District of Columbia pursuant to this section, any proceedings against him shall be in an appropriate district court of the United States. For such purposes, the court may be convened at any time and place within the district, in chambers or otherwise. The Attorney General shall proceed by information, and no criminal prosecution shall be instituted for the alleged act of juvenile delinquency except as provided below.

"(c) A juvenile who is alleged to have committed an act of juvenile delinquency and who is not surrendered to State authorities shall be proceeded against under this chapter unless he has requested in writing upon advice of counsel to be proceeded against as an adult, except that, with respect to a juvenile sixteen years and older alleged to have committed an act after his sixteenth birthday which if committed by an adult would be a felony punishable by a maximum penalty of ten years imprisonment or more, life imprisonment, or death, criminal prosecution on the basis of the alleged act may be begun by motion to transfer of the Attorney General in the appropriate

district court of the United States, if such court finds, after hearing, such transfer would be in the interest of justice. In such cases, the juvenile shall be considered an adult for purposes of prosecution and disposition except that no juvenile convicted as an adult shall be placed or retained in an adult jail or correctional institution in which he has regular contact with adults incarcerated because they have been convicted of a crime or are awaiting trial on criminal charges.

"(d) Evidence of the following factors shall be considered, and findings with regard to each factor shall be made in the record, in assessing whether a transfer would be in the interest of justice: the nature of the alleged offense; the extent and nature of the juvenile's prior delinquency record; the nature of past treatment efforts and the juvenile's response to such efforts; and whether juvenile disposition will reflect the seriousness of the juvenile's conduct, promote respect for the law, promote the protection of the public from the juvenile's conduct, and provide a just response to the conduct of the juvenile.

"(e) Reasonable notice of the transfer hearing shall be given to the juvenile, his parents, guardian, or custodian and to his counsel. The juvenile shall be assisted by counsel during the transfer hearing, and at every other critical stage of the proceedings.

"(f) Once a juvenile has entered a plea of guilty or the proceeding has reached the stage that evidence has begun to be taken with respect to a crime or an alleged act of juvenile delinquency subsequent criminal prosecution or juvenile proceedings based upon such alleged act of delinquency shall be barred.

"(g) Statements made by a juvenile prior too or during a transfer hearing under this section shall not be admissible at subsequent criminal prosecutions.".

FREEDOM OF INFORMATION ACT

SEC. 11. (a) Section 552(a) of title 5, United States Code, is amended—

(1) by striking out the material before clause (1) and inserting in lieu thereof the following:

"(a) Each agency shall make available to any United States person the following information:";

(2) in paragraph (3) by inserting before the period at the end thereof the following: ": *Provided, however,* That this section shall not be construed to require a law enforcement or national security intelligence agency to disclose information to any person requesting such disclosure on behalf of an individual who is not a United States person as defined in this section";

(3) in paragraph (4)(B) by inserting before the period the following: ", but if the court examines the contents of a law enforcement or national intelligence agency's records withheld by the agency pursuant to subsection (b)(1), (b)(3), or (b)(7), the examination shall be in camera. The court shall maintain under seal any affidavit submitted by a law enforcement or intelligence agency to the court in camera";

(4) in paragraph (6)(A) by striking out clause (1) and inserting in lieu thereof the following:

"(1) notify the person making the request of the receipt of the request and notify such person within 30 days after the receipt of such request of the number of pages encompassed by the request and the time limits imposed by this subsection upon the agency for responding to the request; determine whether to comply with the request and notify the person making the request of such determination and the reasons therefor within 60 days after the receipt of such request (excepting Saturdays, Sundays, and legal public holidays) if the request encompasses less than 200 pages of records with an additional 60 days permitted for each additional 200 pages of records encompassed by the request, but all determinations and notifications shall be made within 1 year; and notify the person making the request of the right of such person to appeal to the head of the agency an adverse determination; and"; and

(5) in paragraph (6)(C)—

(A) by striking out "in responding to" and inserting in lieu thereof "in attempting to respond to"; and

(B) by inserting "shall" before "allow".

(b) Section 552(b) of title 5, United States Code, is amended—

(1) in paragraph (2) by adding ", including such materials as (A) manuals and instructions to investigators, inspectors, auditors, and negotiators, and (B) examination material used solely to determine individual qualifications for employment, promotion, and licensing" after "agency";

(2) by amending paragraph (6) to read as follows:

"(6) records or information concerning individuals the release of which would constitute an unwarranted invasion of personal privacy, including compilations or lists of names and addresses of agency personnel;";

(3) in paragraph (7)—

(A) in the introductory language—

(i) by striking out "investigatory records" and inserting in lieu thereof "records or information"; and

(ii) by adding "or information" after "such records";

(B) by amending subparagraph (A) to read as follows:

"(A) reveal investigatory information relating to an ongoing investigation or enforcement proceeding,";

(C) by amending subclauses (D), (E), and (F) to read as follows: "(D) tend to disclose the identity of a confidential source, including any foreign, State, or other public agency or authority or any private institution that furnished information on a confidential basis; and, in the case of a record or information compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, information furnished by a confidential source; (E) disclose techniques, procedures, guidelines, or priorities for law enforcement investigations or prosecutions; (F) endanger the life or physical safety of any natural person; or"; and

(D) by adding the following new subclause at the end thereof: "(G) disclose information relating to such categories of investigations of terrorism, organized crime, or foreign counterintelligence as are exempted by the Attorney General by regulation or order;"; and

(4) by striking out all the material after paragraph (9) and inserting in lieu thereof the following:

"Any reasonably segregable portion of a record not already in the public domain which contains information pertaining to the subject of a request shall be provided to any person properly requesting such record after the portions which are exempt under this subsection have been deleted. Each agency which carries out law enforcement or national security intelligence functions shall prepare and furnish the same general standardized written response for issuance to any person making a request for records under this section to be used both in cases where the agency does not have the records requested and in cases where the records are protected from disclosure because disclosure would reveal that a criminal investigation concerning the person is in progress.".

(C) Section 552(d) of title 5, United States Code, is amended—

(1) by striking out "March 1" each place it appears and inserting in lieu thereof "December 1", and

(2) by striking out "prior calendar year" in the material following paragraph (7) and inserting in lieu thereof "prior fiscal year".

(d) Subsection (e) is amended to read as follows:

"(e) For purposes of this section—

"(1) the term 'agency' as defined in section 551(1) of this title includes any executive department, military department, Government corporation, Government controlled corporation, or other establishment in the executive branch of the Government (including the Executive Office of the President), or any independent regulatory agency;

"(2) the term 'foreign intelligence' means information relating to the capabilities, intentions, and activities of foreign powers, organizations, or persons;

"(3) the term 'foreign counterintelligence' means information gathered and activities conducted to protect against espionage and other clandestine intelligence activities, sabotage, international terrorist activities or assassinations conducted for or on behalf of foreign powers, organizations, or persons;

"(4) the term 'terrorism' means any activity that involves a violent act that results in or risks serious bodily harm to any individual or aggravated property destruction and that is done for the purpose of—

"(A) intimidating or coercing the civil population or any segment thereof;

"(B) influencing or retaliating against the policies or actions of the Government of the United States or of any State or political subdivision thereof or of any foreign state; or

"(C) influencing or retaliating against the trade or economic policies or actions of a corporation or other entity engaged in foreign commerce;

"(5) the term 'organized crime' means criminal activity by two or more persons who are engaged in a continuing enterprise for the purpose of obtaining monetary or commercial gains or profits wholly or in part through racketeering activity as defined in section 1961 of title 18, United States Code;

"(6) the terms 'law enforcement agency' and 'national security intelligence agency' for the purposes of this section shall mean—

"(A) those divisions of the Department of Justice which have responsibility for criminal law enforcement, foreign intelligence, and foreign counterintelligence investigations and prosecutions; the Secret Service and Alcohol, Tobacco, and Firearms Division of the Department of the Treasury; the Central Intelligence Agency; the Defense Intelligence Agency; any foreign intelligence component of the Department of Defense; and

"(B) any agency, not listed in subsection (e)(6)(A) above, which may be designated by the Congress as one having investigatory responsibilities in the areas of criminal law enforcement, foreign intelligence, or foreign counterintelligence; and

"(7) the term 'United States person' means a citizen of the United States or an alien lawfully admitted for permanent residence (as defined in section 101(a)(20) of the Immigration and Nationality Act, 8 U.S.C. 1101(a)(20)), an unincorporated association a substantial number of members of which are citizens of the United States or aliens lawfully admitted for permanent residence, or a corporation which is domiciled in the United States; but such term shall not include a corporation or an association that is a foreign power, as defined in section 101(a) of the Foreign Intelligence Surveillance Act of 1978 (50 U.S.C. 1801(a)).".

S. 1996

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Violent Crime Act of 1981".

PURPOSE

SEC. 2. It is the purpose of this Act to amend certain provisions of the criminal laws

of the United States to enhance Federal efforts to combat violent crime.

MANDATORY PRISON SENTENCES

SEC. 3. (a) Section 3575 of title 18, United States Code, is amended—

(1) in subsection (b) by striking out all material following "judgment or commitment.", and inserting in lieu thereof, the following: "If it appears by a preponderance of the information, including information submitted during the trial of such felony and the sentencing hearing and so much of the presentence reported as the court relies upon, that the defendant is a special dangerous offender, the court shall sentence the defendant to a period of imprisonment of not less than five years, nor more than twenty-five years, and not otherwise disproportionate in severity to the maximum term otherwise authorized by law for such felony offense. In addition to such term of imprisonment as may be imposed under this section, the court shall sentence in accordance with the law prescribing penalties for such felony. The court shall place in the record its findings, including an identification of the information relied upon in making such findings, and its reasons for the sentence imposed.";

(2) by striking out subsection (d) and inserting in lieu thereof the following:

"(d) Notwithstanding any other provision of this section, the court shall not sentence a dangerous special offender to less than any mandatory minimum penalty prescribed by law for such felony. The period of imprisonment imposed pursuant to this section shall be considered a mandatory minimum penalty, and any defendant sentenced under this section shall not be eligible for probation, nor shall he be eligible for parole or furlough upon such sentence.";

(3) in subsection (e) by—

(A) striking out the period in paragraph (3) and inserting in lieu thereof "; or "; and

(B) adding after paragraph (3) the following:

"(4) the defendant committed such felony while using, or threatening to use, a firearm or other dangerous weapon;

"(5) the defendant did, while committing such felony, concealing the commission of such felony, or fleeing to avoid arrest and prosecution for the commission of such felony, inflict serious bodily injury upon another individual; or

"(6) the defendant, in planning and preparing for the commission of a criminal offense, or in attempting to commit such an offense, did knowingly intend, or attempt, to inflict serious bodily injury upon any other individual."; and

(4) by adding at the end thereof the following:

"(h) As used herein, the term—

"(1) 'dangerous weapon' shall include any item defined as a destructive device under the provisions of section 921(a)(4), title 18, United States Code, as well as any animate or inanimate object or substance which is capable of being used to inflict serious bodily injury upon another individual; and

"(2) 'serious bodily injury' shall include maiming, disfigurement, aggravated assault, and any interference with natural physiological processes which is threatening to life or the physical safety of the body, as well as death.".

(b) Chapter 227 of title 18, United States Code, is amended by redesignating sections 3577 and 3578 as sections 3578 and 3579, respectively, and by inserting after section 3576 the following:

"§ 3577. Use of firearm; infliction of bodily injury.

"(a) Any person who, while committing a felony offense against the United States, or while concealing the commission of such offense or fleeing to avoid the arrest and prosecution for such offense—

"(1) employs, or threatens, the use of a firearm or other dangerous weapon against another individual;

"(2) inflicts serious bodily injury upon another individual; or

"(3) knowingly intends, or attempts, to inflict serious bodily injury upon another individual,

shall be sentenced to a term of imprisonment of not less than five years, in addition to any other penalty allowed by law. Such term of imprisonment shall be considered a mandatory minimum penalty, and any defendant sentenced under the provisions of this section shall not be eligible for probation, nor shall he be eligible for parole or furlough upon such sentence.

"(b) The applicability of this section to an individual defendant convicted of a felony offense shall be determined by the court, upon motion of the Government, after consideration of such information as has been made available to the court through the trial of such offense, if any, such proceedings as may be conducted pursuant to the entry of a plea of guilty, if any, and materials submitted to the court in connection with sentencing. If the court is pursuaded, by a preponderance of the evidence, of the applicability of this section to an individual defendant, it shall then sentence in accord with the provisions hereof.

"(c) The term—

"(1) 'dangerous weapon' as used herein shall include any item defined as a destructive device under the provisions of section 921(a)(4), title 18, United States Code, as well as any animate or inanimate object or substance which is capable of being used to inflict serious bodily injury upon another individual; and

"(2) 'serious bodily injury' as used herein shall include maiming, disfigurement, aggravated assault, any interference with natural physiological processes which is threatening to life or the physical safety of the body, as well as death.".

ASSAULT AND MURDER OF FEDERAL EMPLOYEES

SEC. 4. (a) Section 1114 of title 18 of the United States Code is amended to read as follows:

"§ 1114. Protection of officers and employees of the United States.

"(a) Whoever kills any employee of the United States, or any employee of any agency or instrumentality thereof, on account of the performance of such employee's official duties, or while such employee is engaged in the performance of such duties, shall be punished as provided under sections 1111 and 1112 of this title.

"(b) The term employees shall include any individual performing services for the Government of the United States or for any agency or instrumentality thereof, whether on a permanent or temporary basis, and regardless of whether or not remuneration is provided for such services.".

(b) Section 351 (a) of title 18, United States Code, is amended by inserting ", or a member of the executive branch of Government who is the head of a department listed in section 101 of title 5, United States Code" after "Member-of-Congress-elect".

CONTRACT MURDER

SEC. 5. (a) Title 18, United States Code, is amended by adding after section 1117 the following:

"§ 1118. Contract murder or assault.

"(a) (1) The terms 'contract murder' and 'contract assault', as used in this section, shall mean a murder or assault of a nature which violates the laws of the United States or of the State where the act occurs, and which is committed, or commissioned, by any person who—

"(A) coerces, or induces, the perpetration of the murder or assault by another person by offering, providing, agreeing to offer or to provide, or threatening to cease offering or providing anything of value, or who threatens to inflict injury to the person or property of any individual; or

"(B) solicits, receives, or agrees to receive anything of value for the commission of such murder or assault.

"(2) The term 'anything of value' as used in this section means anything tangible or intangible the offering party agrees to offer, provide, or in fact offers or provides, or threatens to cease offering or providing, in exchange for the promise of another to commit or attempt to commit a contract murder or assault and includes tangible items such as money, land, or other property, and intangible items such as influence, position, and a nonspecific promise of rewards for services performed.

"(b) It shall be unlawful for any individual to willfully and knowingly commission or commit a contract murder or assault, or to attempt to commission or commit a contract murder or assault.

"(c) Any individual found guilty of a violation of this section shall be sentenced to a term of imprisonment of fifteen years to life and such individual shall not be eligible for probation, nor shall he be eligible for parole or furlough upon such sentence until he has served a minimum of fifteen years imprisonment for such offense. In addition, such individual shall be fined not less than $10,000, nor more than $200,000.

"(d) This chapter shall not preempt any State law which would be permissible in the absence of this section. No law of any State which would be valid in the absence of section 1118 and no officer, agency, or instrumentality of any State may be deprived of jurisdiction over any offense which it would have jurisdiction over in the absence of section 1118.".

(b) The analysis of chapter 51 of title 18, United States Code, is amended by adding at the end thereof the following: "1118. Contract murder or assault.".

PROTECTION OF FAMILIES OF FEDERAL OFFICERS

SEC. 6. (a) Chapter 7 of title 18, United States Code, is amended by adding at the end thereof the following:

"§ 115. Protection of families of Federal officers.

"Any person who assaults, maims, kidnaps, murders or threatens to assault, maim, kidnap, or murder the spouse, parent, brother, sister, child, ward, or other relative by blood or marriage, of any person designated in section 1114 of this title, with intent to impede, intimidate, interfere with, or retaliate against the designated person while engaged in or on account of the performance of his official duties, shall be fined not more than $10,000 or imprisoned not more than ten years, or both. If a dangerous weapon is used in the commission of the offense, he shall be fined not more than $20,000 or imprisoned not more than fifteen years, or both. If personal injury results, he shall be fined not more than $50,000 or imprisoned for not more than twenty years, or both. If death results, he shall be imprisoned for any term of years or for life.".

(b) The analysis of Chapter 7 of title 18, United States Code, is amended by adding at the end thereof the following: "115. Protection of families of Federal officers.".

ROBBERY OF A PHARMACY

SEC. 7. (a) Chapter 103 of title 18, United States Code, is amended by adding immediately after section 2117 the following new section:

"§ 2118. Robbery of a pharmacy.

"(a) Any person who takes property of another from a licensed pharmacy regularly engaged in the retail dispensing in interstate

commerce of prescription drugs or devices, by force or violence, or by intimidation, and who has previously engaged in a pattern of such robberies, shall be fined not more than $5,000, or imprisoned for not more than five years, or both.

"(b) For purposes of this section, the term 'property' means a controlled substance consisting of a narcotic, amphetamine, or barbiturate that is listed in Schedule I, II, III, or IV established by section 202 of the Controlled Substances Act (21 U.S.C. 812).".

(b) The table of sections for chapter 103 of title 18, United States Code, is amended by adding at the end thereof the following:

"2118. Robbery of a pharmacy.".

NARCOTICS ENFORCEMENT POLICIES

SEC. 8. (a) The purpose of this section is to set goals of Justice Department narcotics law enforcement policy.

(b)(1) One hundred and eighty days after the date of enactment of this section the Attorney General shall submit to the Judiciary Committee of the Senate and the House of Representatives a report which shall explain how (A) any proposed reorganization of the Drug Enforcement Administration, and (B) the Justice Department narcotics control policy generally will accomplish the following goals:

(i) reducing the number of narcotics trafficking organizations and independent traffickers as evidenced by—

(I) identifying the one hundred most sophisticated narcotic trafficking organizations in America, targeting and successfully eliminating at least ten of these narcotic organizations each year through arrests and indictment of the top people in each organization;

(II) increasing by 10 per centum annually the total number of level 1 and 2 violator arrests in which the Drug Enforcement Administration was the primary enforcement agency conducting the investigation; and

(III) increasing by 10 per centum annually the number of level 1 and 2 violator arrests in which the Drug Enforcement Administration assisted other Federal, State, or local enforcement agencies; and

(ii) reducing the economic incentives for drug traffickers by seizing and forfeiting assets of major narcotics traffickers through the use of forfeiture laws by returning annually to the United States Treasury a dollar value of forfeited assets using such laws which at least equals the annual budget for the Drug Enforcement Administration.

(2) For purposes of this section the term—

(A) "drug seizure" means confiscated drugs by law enforcement agencies;

(B) "level 1 and 2 violators" means the most significant drug traffickers which include interstate or international traffickers, laboratory operators, financiers, or heads of criminal organizations;

(C) "seizure" means physical securing of property by law enforcement personnel;

(D) "forfeiture" means a judicially required divestiture of property without compensation; and

(E) "forfeited assets" means four types of assets which apply to the forfeiture statutes: (i) contraband, such as guns and controlled substances; (ii) derivative contraband, such as boats, airplanes, and cars used to warehouse, transport, or exchange contraband; (iii) direct proceeds, such as cash received for exchanging or payment for a variety of transactions involving contraband; and (iv) derivative proceeds, such as corporate stock, real estate, legitimate businesses that are purchased, maintained, or acquired with the direct proceeds of an illegal transaction.

(c) The Attorney General shall thereafter report annually to the Congress on the success of such policies and such reorganizations as may be proposed by the Attorney General to accomplish the purposes set forth herein.

S. 1997

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Criminal Justice Assistance Act of 1981".

PURPOSE

SEC. 2. The purpose of this Act is to provide for the development and administration of research and grant programs designed to assist State and local law enforcement agencies in the fulfillment of their responsibilities.

CRIMINAL JUSTICE ASSISTANCE PROGRAMS

SEC. 3. (a) Part J of tile I of the Omnibus Crime Control and Safe Streets Act of 1968 is amended by adding at the end thereof the following new section:

"Program for fiscal year 1982

"SEC. 1004. (a)(1) Except as provided in paragraph (2) and notwithstanding any other provision of this title, funds available for fiscal year 1983, from appropriations for prior years, to carry out the activities of this title may be obligated or expended to carry out such activities and to pay administrative costs of such activities.

"(2) Notwithstanding any other provision of this title, the provisions of parts B and C of this title shall not be affected for the period of fiscal year 1982.

"(b) Notwithstanding any other provision of this title, no funds described in subsection (a) may be used to carry out any activities not authorized by this title nor may any such funds be transferred or reprogramed during fiscal year 1982 for carrying out any activities not authorized by this title.

"(c) Notwithstanding any other provision of law, all of the funds described in subsection (a) shall remain available until expended.".

(b)(1) Title I of the Omnibus Crime Control and Safe Streets Act of 1968 is amended by adding at the end thereof the following:

"PART N—CRIMINAL JUSTICE INFORMATION AND TRAINING PROGRAM

"PURPOSE

"SEC. 1401. (a) Notwithstanding any other provision of this title, it is the purpose of this part to provide Federal technical assistance and training to States, units of local government, combinations of such units, and private nonprofit organizations, for purposes of supporting their efforts to develop and implement programs and projects which are of proven effectiveness or have a record of proven success in improving the functioning of the criminal justice system.

"(b) The Federal portion of any grant made under this part may be up to 100 per centum of the cost for the technical assistance or training specified in the application for such services.

"(c) The administration of this part is to be carried out by the Director of the Office of Justice Research and Statistics, as explained in part H of section 801 of this title.

"(d) Funds appropriated under this title shall be used for—

"(1) upgrading the capabilities of criminal justice professionals, introducing new knowledge, and initiating new management concepts and approaches;

"(2) training and technical assistance focused on development and improvement of programs of proven effectiveness, such as career criminal prosecutions; integrated criminal apprehension programs (ICAP); STING programs; treatment alternatives to street crime programs (TASC); victim-witness assistance programs; arson prevention and control; prosecutor's management information systems (PROMIS); and violent juvenile offenders programs (New Pride); and

"(3) providing information to State and local officials and personnel about these program approaches and how they may be implemented, such information to be made available to State and local governments through (A) written program briefs and technical manuals; (B) national and regional training seminars; and (C) direct onsite technical assistance in program planning, management, and operations.

"(4) Corrections standards and accreditation to continue the process for the revision and development of correctional standards and continuation of an independent Commission on Accreditation. Accreditation should provide an effective model for the improvement, monitoring, and evaluation of services and facilities through standards implementation in the field of corrections.

"(5) Law enforcement accreditation, to continue the Commission on Accreditation for Law Enforcement Agencies which represents a major effort to establish and maintain performance standards for law enforcement. To make this program effective, the Commission will develop an accreditation process, giving local law enforcement agencies the opportunity to demonstrate that they meet the profession's highest performance criteria.

"(6) Emergency enforcement assistance in accordance with procedures set forth in this paragraph—

"(A) in the event that a crime problem of serious proportions exists throughout a State or a part of a State, a State may submit an application under this section for Federal law enforcement assistance for the affected area;

"(B) an application for assistance under this section shall be submitted in writing to the Attorney General, in a form prescribed by rules issued by the Attorney General. The Attorney General shall, after consultation with members of the Federal law enforcement community, approve or disapprove such application not later than ten days after receiving such application; and

"(C) Federal law enforcement assistance may be provided pursuant to this section in meritorious cases. In determining whether to approve or disapprove an application for assistance under this section, the Attorney General shall consider—

"(i) the nature and extent of the crime problem throughout a State or in any part of a State;

"(ii) the emergency or extraordinary circumstances which produced the problem;

"(iii) the availability of State and local criminal justice resources to resolve the problem;

"(iv) the cost associated with the increased Federal presence; and

"(v) the need to avoid unnecessary Federal involvement and intervention in matters primarily of State and local concern.

"(e) There is hereby established a National Police Academy, which shall provide for and encourage career officers. The Academy shall have authority to train national, regional, and local police officers in both general and special police duties.

"(f) Such Director shall annually request the Administrators of the National Institute of Justice and the Bureau of Justice Statistics, State and local governments, and other appropriate public and private agencies to suggest other national initiatives. Such Director and such Administrators shall jointly then, pursuant to regulations such Director and such Administrators jointly promulgate annually, publish proposed national initiatives pursuant to this part and invite and encourage public comment concerning such priorities. After considering any comments submitted during such period of time, such Director and such Administrators jointly may establish initiatives for that year (and determine whether existing priority programs and projects should be modified). Such di-

rector and such Administrators shall jointly publish in the Federal Register the initiatives established pursuant to this part prior to the beginning of fiscal year 1983 and each fiscal year thereafter for which appropriations will be available to carry out the program. In the event of a disagreement by such Director and such Administrators as to the exercise of joint functions under this section, the Attorney General shall resolve such disagreement.

"APPLICATION REQUIREMENTS

"SEC. 1402. (a) No assistance may be made under this part unless an application has been submitted to the Director in which the applicant—

"(1) sets forth a program or project which is eligible for assistance under this part:

"(2) describes the assistance requested and the need for such assistance; and

"(3) demonstrates that the assistance is necessary to improve the functioning of the criminal justice system.

"(b) Each applicant for assistance under this part shall certify that it meets all the requirements of this section, that all the information contained in the application is correct, and that the applicant will comply with all the provisions of this title, and all other applicable Federal laws. Such certification shall be made in a form acceptable to the Director.

"CRITERIA FOR DISTRIBUTION AND PERIOD FOR AWARD

"SEC. 1403. (a)(1) The Director shall, according to the criteria, terms, and conditions as he determines consistent with this part, provide training and technical assistance for programs or projects which most clearly satisfy the priorities established under this part.

"(2) In providing the services under this part, the Director shall at no time make available funds for the purpose of subsidizing or funding the routine operational activities or equipment needs of a State, unit of local government, or a combination of such units.

"(b) The Director may provide training and technical assistance to priority programs and projects under this part for a period to be determined by the Director.".

(2) The table of contents of such title is amended by adding at the end thereof the following:

"PART N—CRIMINAL JUSTICE INFORMATION AND TRAINING PROGRAM

"Sec. 1401. Purpose.
"Sec. 1402. Application requirements.
"Sec. 1403. Criteria for distribution and period for award.".●

By Mr. MATHIAS:

S. 1998. A bill to provide preferential treatment under the Immigration and Nationality Act to certain aliens who are retired officers or employees of certain international organizations, members of their immediate families, or surviving relatives of deceased officers or employees of such organizations; to the Committee on the Judiciary.

INTERNATIONAL ORGANIZATIONS STAFFS' CHILDREN, SURVIVORS, AND RETIREES ACT OF 1981

● Mr. MATHIAS. Mr. President, I am delighted to send to the desk a bill that would correct an injustice in the current law that works a tremendous emotional hardship on the children of people who work in this country for international organizations, such as the World Bank and the International Monetary Fund.

Present immigration laws require that these children return to their parents' country after they complete their education, or if their parents die or retire. This is so even if they have spent most of their lives in the United States. Many of these children think of themselves as Americans and think of America as their home. The homeland of their parents is just another foreign country, and they often do not speak its language. I think we should reconsider our policy of forcing them to leave this country and return to an unfamiliar homeland, when they may have no family or friends there and will never make the adjustment successfully.

In the past few years I have seen many tragic cases with families broken apart by the operation of this unduly harsh law. Let me share with you some of these cases. A man who works for the International Monetary Fund in Washington, D.C., wrote me last year saying:

My daughter . . . (now 21) entered the United States . . . at age 9. She was in the Montgomery County Public Schools, but incompatibility of programs prevented her from getting into a university in the United Kingdom. She is now in her senior year at college in Oregon, and she will graduate in December. What is she to do then? We have no relatives to speak of in the United Kingdom, and I would not know how to advise her to find a job there. Officials say that she should marry an American, but this is unreasonable.

And listen to this story from a concerned parent:

All three of my sons (aged 19, 17, 14) have been here for 11½ years and lost their original national identity through the education process. They no longer speak or read Mandarin Chinese. They act and think as Americans. They face an uncertain future, and this causes all of us great heartache.

A troubled mother writes:

My daughter is now a freshman at the University of Virginia. Her father, who was Iraqi, is now deceased. She was born in Egypt, but has an Iraqi passport. She has no one in Iraq; she cannot live with my elderly parents in Egypt; she cannot live by herself in Egypt (culturally, it is simply not done); and she cannot remain legally in the United States. She has lived for over 17 years in this country.

While this provision of the law works particular hardships on children, it also causes emotional distress to adults who have over the years made the United States their real home while working for these international organizations. When employment in the United States with an international organization ceases because of death or retirement, widows, widowers, and retired employees are, like their children, forced to leave the United States—no matter how long they have lived here.

The bill I introduce today would make it possible for employees of international organizations and their immediate families to remain in the United States, but only after many, many years of service and residence in the United States. I think such a law would serve the best interest of the United States, the international organizations, and the men, women, and children who live here.

Former United Nations Secretary-General Kurt Waldheim wrote to me last year and told me that a decision by the U.S. Government to extend such a privilege would represent" * * * yet another expression of the * * * humanitarian traditions of this great country."

My bill would confer special immigration status on widows, widowers, retirees, and children who have resided in the United States for many years, should they seek such status.

In 1979, I introduced a bill—S. 1566—that was similar in principle to this bill. It was incorporated into the larger Immigration and Naturalization Efficiency Act, S. 1763, and was favorably reported to the Senate floor by the Judiciary Committee. On the House side, the Immigration Subcommittee adopted a provision of the omnibus bill that dealt with the same issue as my bill, but it was dropped on the House floor because of procedural objections. I regret that the press of business during the last days of the 96th Congress prevented us from taking final action on these bills, but I am encouraged by the fact that the failure of action was prompted primarily by procedural problems not related to the substance of our bill.

In this Congress, we will try again. My bill would lighten the great emotional burden that now weighs on both the parents and children who have become "Americanized." I urge its speedy adoption, and I ask unanimous consent that the text of my bill be printed in the RECORD immediately following these remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1998

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "International Organizations Staffs' Children, Survivors, and Retirees Act of 1981".

SEC. 2. (a) Subsection (a)(15)(G) of section 101 of the Immigration and Nationality Act (8 U.S.C. 1101) is amended by adding at the end thereof the following new clause:

"(vi) an alien who, as an officer or employee of any such international organization, has resided in the United States for a period of, or periods aggregating, at least ten years preceding the date of his retirement from the employ of such international organization, and the members of his immediate family;".

(b) Subsection (a)(27) of section 101 of the Immigration and Nationality Act (8 U.S.C. 1101) is amended—

(1) by striking out "or" at the end of subparagraph (F);

(2) by striking out the period at the end of subparagraph (G) and inserting in lieu thereof a semicolon and "or"; and

(3) by inserting after subparagraph (G) the following new subparagraph:

"(H) an immigrant—

"(i) who is an unmarried son or daughter of an officer or employee of an international organization entitled to enjoy privileges, exemptions, and immunities as an international organization under the International Organizations Immunities Act (59 Stat. 669) and who—

"(I) is not more than twenty-five years of age on the date of application for admission to the United States, and who has resided in the United States as a member of the immediate family of such officer or employee for a period of, or periods aggregating, at least seven years between the ages of five and twenty-one, or at least ten years, or

"(II) is at least twenty-six years of age on the date of the application for admission to the United States, who, before attaining twenty-six years of age, has resided

in the United States as a member of the immediate family of such an officer or employee for a period of, or periods aggregating, at least seven years between the ages of five and twenty-one, or at least ten years, and who applies for admission to the United States not later than six months after the date of the enactment of this subparagraph; or

"(ii) who is the surviving spouse of a deceased officer or employee of such an international organization, and who has resided in the United States as a spouse of such an officer or employee for a period of, or periods aggregating, ten years preceding the death of such officer or employee, and who applies for admission to the United States not later than one year after the death of such officer or employee or six months after the date of the enactment of this subparagraph, whichever is later; or

"(iii) who, as an officer or employee of any such international organization, has resided in the United States for a period of, or periods aggregating, at least fifteen years preceding the date of his retirement from the employ of such organization and who applies for admission to the United States not later than one year after such date or six months after the date of the enactment of this subparagraph, whichever is later; or

"(iv) who is the spouse or unmarried son or daughter of a retired officer or employee described in clause (iii), or the unmarried son or daughter of a surviving spouse described in clause (ii), accompanying (or intending to join) such retired officer or employee or surviving spouse as a member of his immediate family.".●

By Mr. DOLE (for himself, Mr. HEFLIN, Mr. THURMOND, Mr. BAUCUS, Mr. SIMPSON, Mr. EAST, and Mr. DECONCINI):

S. 2000. A bill to amend title 11, United States Code, to establish an improved basis for providing relief under chapter 7, and for other purposes; to the Committee on the Judiciary.

BANKRUPTCY IMPROVEMENTS ACT OF 1981

● Mr. DOLE. Mr. President, it is with great pleasure that I today forward to the clerk the Bankruptcy Improvements Act of 1981, a bill which is designed to implement desperately needed changes in the Bankruptcy Reform Act of 1978.

This bill is the end result of a thorough and comprehensive review of the strengths and weaknesses of the Bankruptcy Reform Act which has been conducted by the Judiciary Subcommittee on Courts during the past 11 months. Discussions with representatives of the credit industry, members of the judiciary, legal scholars, and private practitioners in January and February of this year led to hearings held by the subcommittee on April 3 and 6. As a result of those discussions and hearings, numerous amendments, largely technical in nature, were proposed which were passed by the Senate as the Bankruptcy Amendments Act of 1981 on July 17. Additional hearings were held on October 29 for the purpose of consideration of suggestions for further, substantive amendments designed to restore the equitable balance between debtors and creditors which was, in certain respects, upset by a handful of provisions passed in the 1978 code. Judges, scholars, and bankruptcy practitioners testified as to the effectiveness of the code as it applies to consumer debtors and suggested ideas for improvement. Reflecting strong bipartisan effort, the subcommittee members, after careful deliberation, drafted this bill, which embodies many of those recommendations.

REASONS FOR THE BILL

Mr. President, in 1978 Congress enacted the Bankruptcy Reform Act, which included the Bankruptcy Code (containing the substantive law of bankruptcy) and a number of other provisions relating to bankruptcy administration. The Bankruptcy Reform Act was the first major revision of the bankruptcy laws of the United States since 1938, and its enactment was the culmination of an effort that extended over a number of years. The new Code makes numerous substantive changes in the law of bankruptcy and in the administration of debtor's estates.

Many of these new provisions have worked well and have had beneficial effects for creditors and debtors. However, it became clear soon after the new Code became effective that the changes wrought by the law in certain areas have disrupted the delicate balance of equity between debtors and creditors, particularly with respect to consumer credit transactions. It is the committee's view that these imbalances are already having serious economic and social repercussions that call for remedial legislation.

One event of great concern since passage of Public Law 95–598 has been the dramatic, unparalleled, and constant increase in the number of bankruptcy cases filed, and the substantial pressure on the consumer credit industry which has resulted. Data from the administrative office of the U.S. courts reveals the following: That since the adoption of the new Code, bankruptcy filings have increased an astounding 69 percent in nonbusiness filings alone. There is no doubt that part of the increase in nonbusiness cases results from factors other than the Bankruptcy Code. For example, the combined effects of sluggish economic conditions and continued inflation certainly have contributed to the increase in bankruptcy filings. Several witnesses at the subcommittee hearings suggested that lawyer advertising, now permitted by the Supreme Court's latest decisions, also has contributed to the upsurge.

These factors, however, simply do not explain the unprecedented increase in bankruptcy cases. Instead, it is apparent that provisions of the Code have played a substantial role in stimulating the number of bankruptcy filings; the startling increase in the number of bankruptcies since the Code went into effect does not permit the committee to attribute the rise solely to economic conditions. If that were the case, it could be expected that the economic problems would exert a gradual, upward pressure on the number of filings. This is not, of course, what has happened.

Thus it is, Mr. President, that attention has centered upon the question of whether the Code provisions themselves may be, in part, responsible for the surge in bankruptcies. Ample testimony before the subcommittee supported the conclusion that, in many areas, the new Code has served to create a bankruptcy system that gives certain debtors a head start rather than a fresh start.

Mr. President, I will not take time now to detail the problems identified by witnesses appearing before the subcommittee. I believe the text and summary sufficiently outline the areas that have been of concern to the committee.

Mr. President, this bill is truly a subcommittee product and I want to express my appreciation to my colleagues Mr. HEFLIN, Mr. THURMOND, Mr. BAUCUS, Mr. SIMPSON, and Mr. EAST for their careful attention to the development of this legislation. In addition, Mr. DECONCINI has been supportive of our efforts and his staff, as well as the staffs of the other gentlemen I named, have been most helpful.

Mr. President, I ask unanimous consent that the bill and a section-by-section analysis be printed in the RECORD.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 2000

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Bankruptcy Improvements Act of 1981".

SEC. 2. Section 109 of title 11, United States Code, is amended:

(a) in subparagraph (b) thereof—

(1) by redesignating paragraphs (1), (2), and (3) as paragraphs (2), (3), and (4), respectively; and

(2) by inserting a new paragraph (1), to read as follows:

"(1) an individual prohibited by the provisions of subsection (c) of this section from obtaining relief under the provisions of such chapter;"

(b) By redesignating subsections (c), (d), and (e) as subsections (d), (e), and (f), respectively; and

(c) by inserting a new subsection (c), to read as follows:

"(c)(1) Subject to the provisions of paragraph (2) of this subsection, an individual may not be a debtor under Chapter 7 of this title if such individual can pay a reasonable portion of his debts out of anticipated future income. For the purposes of this paragraph, the term—

(a) "reasonable portion of debts" shall mean a substantial percentage of the total outstanding debt reflected upon the schedule of liabilities filed pursuant to section 521(1), excluding debts secured by a first mortgage or deed of trust on the debtor's principal residence;

(b) "anticipated future income" shall mean such income, if any, that the debtor has a reasonable expectation of receiving, either from sources which—

(i) are providing actual income at the time of the filing of the petition, or

(ii) will provide income commencing upon a date certain within twelve months following the filing of the petition—

and which is not needed by the debtor for the support of himself and his dependents.

(2) The provisions of this section shall not apply in any case were the court finds that its application would impose undue hardship upon the debtor and the debtor's dependents."

SEC. 3. Section 305 of title 11, United States Code, is amended—

(a) by designating subsections (b) and (c) as subsections (c) and (d), respectively; and

(b) by inserting, after subsection (a), the following new subsection (b):

"(b) The court may dismiss a case under chapter 7 of this title upon the motion of any party in interest filed prior to the conclusion of the meeting of creditors held pursuant to section 341, and after notice and a hearing, if the debtor is ineligible for relief under the provisions of section 109(a) of this title. If, after hearing, the court determines that the motion to dismiss should be denied, attorney's fees and costs of the proceedings may be awarded to the debtor unless the petitioner establishes that the motion was filed in good faith. If the court determines that the motion should be granted, the order of dismissal shall take effect fifteen days after the determination upon the motion, during which time the stay provided by section 362 of this title shall remain in effect. If a debtor against whom such a motion is granted files a motion for conversion of the proceedings to chapter 13 of this title pursuant to section 706, the stay shall remain in effect until such motion is determined. Any dismissal of proceedings under this section shall be without prejudice to the debtor.

SEC. 4. Section 341(c) of title 11, United States Code, is amended to read as follows:

"(c) Except in the districts designated in section 1501 of this Act, the court will preside at any meeting under this section. In the districts designated in such section, the court will convene any meeting under this section, and shall perform such additional judicial duties as may be required under other provisions of this title."

SEC. 5. Section 506(a) of title 11, United States Code, is amended—

(a) by inserting "(1)" after "(a)",

(b) by striking out the last sentence, and

(c) by adding at the end thereof the following new paragraph:

"(2) The value of the creditor's interest in the estate's interest in such property shall be determined in light of the purpose of the valuation and of the proposed disposition or use of such property, and in conjunction with any hearing on such disposition or use or on a plan affecting such creditor's interest. The value of consumer goods which the debtor seeks to redeem pursuant to section 722 of this title or which are to be retained pursuant to section 1325(a)(5)(B)(ii) of this title shall be presumed to be the established resale market price, if such market exists, as may be determined from recognized trade publications or comparable means.

SEC. 6. Section 521 of title 11, United States Code, is amended—

(a) by redesignating paragraphs (2), (3), and (4) as paragraphs (4), (5), and (6), respectively;

(b) by inserting after paragraph (1) the following new paragraphs:

"(2) if the debtor is an individual, file a statement of income and expenses setting forth—

"(A) the debtor's current income;

"(B) an estimate of the debtor's current expenditures for living expenses and the support of his family;

"(C) all net income which the debtor reasonably expects to receive within the twelve months following the date of the filing of the petition, to the extent foreseeable; and

"(D) all expenditures (other than those included in subparagraph (B) above) which the debtor reasonably anticipates he would have to make within the twelve months following the date of the filing of the petition if relief under the provisions of this title were not available to him, to the extent foreseeable.

"(3) if the debtor's schedule of assets and liabilities includes consumer debts which are secured by property of the estate, the debtor shall file and serve, within ten days of the filing of a petition under Chapter 7 of this title, upon each creditor holding such security and the trustee, a statement expressing the debtor's intention with respect to retention or surrender of the collateral and, if applicable, specifying that the collateral is claimed as exempt, that the debtor intends to redeem the collateral, or that the debtor intends to reaffirm debts secured by the collateral;"

(c) by inserting "(a)" before "The debtor", and

(d) by adding at the end thereof the following new subsection:

"(b) At or before the meeting of creditors provided for by section 341 of this title, the debtor shall perform his intention with regard to secured creditors, as specified by subsection (a)(3), by surrendering such property to the creditor or the trustee, redeeming such property by paying the redemption price or confirming his intention to pay such price pursuant to section 722 (b), or by reaffirming the debt. If the debtor has not fully performed his obligations under subsection (a)(3) and this subsection at or before the meeting of creditors, the stay imposed by section 362 shall terminate with respect to the enforcement of liens against such property, unless the court orders otherwise."

SEC. 7. (a) Section 522(b) of title 11, United States Code, is amended—

(1) by striking out paragraph (1),

(2) by striking out ", other than subsection (d) of this section," in paragraph (2)(A), and

(3) by redesignating paragraphs (2)(A) and (2)(B) as paragraphs (1) and (2), respectively.

(b) Section 522 of title 11, United States Code, is further amended by striking out subsection (d).

(c) Section 522(f) of title 11, United States Code, is amended by striking out "lien is" and all that follows through the period and inserting in lieu thereof "lien is a judicial lien."

SEC. 8. (a) Section 523(a) of title 11, United States Code, is amended in paragraph (3) by striking out "section 521(1) and inserting in lieu thereof "section 521(a)(1)".

(b) Section 523 of title 11, United States Code, shall be further amended by striking out subsection (d) and inserting in lieu thereof the following:

"(d) For purposes of subsection (a)(2) of this section, any debt which incurred on or within 45 days before the date of the filing of a petition under this title is presumed to be nondischargeable under such subsection; however, such presumption shall be rebuttable by the debtor.

"(e) If a creditor requests a determination of dischargeability of a consumer debt under subsection (a)(2) of this section, and such debt is discharged, the court may grant judgement against such creditor in favor of the debtor for the costs of, and a reasonable attorney's fee for, the proceeding to determine dischargeability if it finds that the proceeding was not brought by the creditor in good faith."

SEC. 9. (a) Section 524(a) of title 11, United States Code, is amended—

(1) in paragraph (2) by striking out "and" at the end thereof,

(2) in paragraph (3)—

(A) by striking out the period and inserting in lieu thereof "; and", and

(3) by inserting after paragraph (3) the following new paragraph:

"(4) does not operate as an injunction against the enforcement of a lien that has not been avoided under the provisions of this title.".

(b) Section 524(c) of title 11, United States Code, is amended—

(1) in paragraph (1) by inserting "and" at the end thereof,

(2) by striking out paragraphs (2), (3), and (4), and

(3) by adding at the end thereof the following new paragraph:

"(2) such agreement contains a clear and conspicuous statement which advises the debtor that the agreement may be rescinded at any time prior to discharge or within 60 days after it is entered into and approved by the court, whichever occurs later, by giving a written notice of rescission to the creditor. This paragraph shall not apply to a case concerning an individual, to the extent that such debt is a consumer debt secured by real property."

(c) Section 524(d) of title 11, United States Code, is amended to read as follows:

"(d) At the meeting of creditors provided by section 341(c) of this title, the court shall inform the debtor of the nature and effect of a discharge, and of any reaffirmation of debt."

SEC. 10. Section 547(b) of title 11, United States Code, is amended—

(a) in paragraph (4) by—

(1) amending subparagraph (B) to read as follows:

"(B) between 90 days and one year before the date of the filing of the petition, if such creditor at the time of such transfer was an insider;", and

(2) by striking out "and" at the end thereof, in paragraph (5) by deleting the period at the end of the paragraph and inserting in lieu thereof "; and", and by adding at the end thereof the following new paragraph:

"(6) if such creditor at the time of such transfer had reasonable cause to believe the debtor was insolvent at the time of such transfer."

SEC. 11. Section 554(c) of title 11, United States Code, is amended by striking out "section 521(1)" and inserting in lieu thereof "section 521(a)(1)".

SEC. 12. Section 722 of title 11, United States Code is amended—

(a) by inserting "(a)" before "An", and

(b) by adding at the end thereof the following new subsection:

"(b) upon notice and hearing, the court may require a creditor to accept payments in redemption of the value of a claim secured by a nonpossessory, nonpurchase money security interest in tangible personal property, over a reasonable period not to exceed five years, if such tangible personal property consists of:

"(1) household furnishings, household goods, wearing apparel, appliances, books, animals, crops, musical instruments, or jewelry that are held primarily for the personal, family, or household use of the debtor or a dependent of the debtor;

"(2) implements, professional books, or tools of the trade of the debtor or the trade of a dependent of the debtor; or

"(3) professionally-prescribed health aids for the debtor or a dependent of the debtor.".

SEC. 13. Section 1106(a)(2) of title 11, United States Code, is amended by striking out "section 521(1)" and inserting in lieu thereof "section 521(a)(1)".

SEC. 14. Section 1111 of title 11, United States Code, is amended by striking out "section 521(1)" and inserting in lieu thereof "section 521(a)(1)".

SEC. 15. Section 1301 of title 11, United States Code, is amended by inserting after subsection (c) the following new subsection:

"(d) A creditor who proposes to act pursuant to subsection (c) shall notify the debtor and codebtor of such intention. The debtor or codebtor shall then have 10 days to file and serve a written objection to the taking of the proposed action. If the debtor or codebtor does not file and serve a timely written objection, then the creditor's action taken in accordance with its notice shall not violate subsection (c).

SEC. 16. Section 1321 of title 11, United States Code, is amended—

(a) by inserting "(a)" before "The debtor", and

(b) by adding at the end thereof the following new subsection:

"(b) Unless otherwise ordered by the court, the case will be automatically dismissed unless payments under the plan commence within thirty days after the filing of the plan. The payments shall be made to the trustee, and shall be retained by the trustee until a plan is confirmed or not confirmed. If any plan is confirmed, the trustee shall then distribute the funds in accordance with the plan. If no plan is confirmed, the funds shall be returned to the debtor after deducting the costs of administration.".

SEC. 17. (a) Section 1322(a) is amended—

(1) in paragraph (2) by striking out "and" at the end thereof,

(2) by redesignating paragraph (3) as paragraph (4), and

(3) by inserting after paragraph (2) the following new paragraph:

"(3) provide for payment, in deferred cash payments, of claims of a type specified in section 523(a) of this title, and"

(b) Section 1322(b) of title 11, United States Code, is amended by amending paragraph (1) to read as follows:

"(1) designate a class or classes of unsecured claims, as provided in section 1122 of this title, but may not discriminate unfairly against any class so designated; however, such plan may treat claims which are specified in section 523(a) or involve a codebtor differently than other unsecured claims;"

(c) Section 1322(c) is amended to read as follows:

"(c) the plan may not provide for payments over a period of more than five years.".

SEC. 18. Section 1325(a) of title 11, United States Code, is amended—

(a) in paragraph (3) by inserting ", and the plan represents a bona fide effort which is consistent with the debtor's ability to repay his debts, after providing support for himself and his dependents," before the semicolon,

(b) in paragraph (C) of paragraph 5 thereof by striking out "and",

(c) by redesignating paragraph (6) as paragraph (7), and

(d) by inserting after paragraph (5) the following new paragraph:

"(6) the plan extends for a period of five years or the plan provides for payments of a reasonable portion of all allowed unsecured claims; and".

SEC. 19. Section 1328 of title 11, United States Code, is amended—

(a) by amending section (a)(2) thereof to read as follows:

"(2) of a kind specified in section 523(a) of this title."

(b) by amending section (c)(2) thereof to read as follows:

"(2) of a kind specified in section 523(a) of this title to the extent such claims were not proposed to be paid as part of the plan."

SECTION-BY-SECTION SUMMARY

Section 1. Title: Bankruptcy Improvements Act of 1981.

Section 2. This section establishes a threshold eligibility test for relief under Chapter 7 based on the individual petitioner's ability to pay a reasonable portion of his debts out of future income. The individual's income, and the likelihood that it will continue, serves as the basis for extending consumer installment credit today. Such credit is not extended on the strength of the liquidation value of assets but on the expectation that the consumer debtor will continue to earn a living and pay his debts in installments as they are due. If the debtor has the capacity to repay, his petition for a 100% discharge of his debts may be dismissed after a court hearing. If, however, the debtor cannot reasonably be expected to pay his debts from future income, he will receive a discharge. The determination of whether the petitioner can reasonably be expected to repay his debts is based on disclosures of income and expenses required by Section 7, below. The disclosures relate to the debtor's existing financial situation and his own estimate of his income and expenses for the following year. Thus, the debtor makes the initial determination of his ability or inability to repay his debts and chooses either Chapter 7 or Chapter 13, and only if objection is made by a creditor is the court called upon to render a decision on eligibility for relief under Chapter 7.

Section 3. This section establishes the procedure for implementing the threshold test. It gives the court the discretion to dismiss a petition, after notice and hearing, if it finds the petitioner ineligible for relief.

Section 4. This section requires the bankruptcy judge to convene the meeting of creditors and adjudicate matters appropriate for resolution. While not requiring the bankruptcy judge to be present during the entire meeting and the examination of the debtor, it assures his availability to resolve any disputes that arise.

Section 5. Whether the debtor seeks to redeem collateral in Chapter 7 or retain collateral in Chapter 13, the purpose is to continue use and possession of the property. This provision establishes the valuation of such property based on such continued consumer usage of property. Value would be determined by the established resale market value of the property, where appropriate.

Section 6. This provision requires the debtor to disclose his income and expenses. Since relief under Chapter 7 is based on the ability to pay some or all of the debts out of future income (see Section 2, above), the debtor must also disclose his own estimate of his income and living expenses for the next two years. Disclosure of this information is necessary to determine the debtor's eligibility for relief under Chapter 7 (see Section 2, above) and is necessary to determine the feasibility of the repayment plan, if relief under Chapter 13 is being sought. The debtor must also list his assets and liabilities and disclose his intentions regarding them. With regard to assets of the estate, the debtor has several options. He may claim property as exempt, he may seek to redeem property, he may seek to return property by reaffirming all or part of the underlying debt, or he may surrender property to the secured creditor. This provision requires the debtor to disclose what course of action he wants to make regarding collateral, enables prompt action to be taken, and avoids the problem of debtors in bankruptcy retaining and using collateral for extensive periods of time without making payments thereon. Subsection (b) requires the debtor to perform or carry out his stated intentions with regard to the property. To facilitate this, creditor-debtor communications are permitted, and if the debtor does not perform his intentions, the secured creditor is then free to enforce its lien.

Section 7. This section eliminates the list of exempt property created by the 1978 Code and returns the responsibility for establishing exemptions to the states. Thirty-one states have already "opted out" of the federal schedule. This provision would extend that result to the remaining states. This section also eliminates the power of the debtor to avoid certain liens in household goods and other specified property. (See Section 13, below).
